HYDRABAD. See HAIDARABAD.

IAIAN LANGUAGE: A language of the Melanesian group, which is peculiar to Uvea, the most northerly of the Loyalty Islands.

IRAINDRANO: A district in the province of Betsileo, Madagascar, lying south of Fianarantsoa. Mission field of the LMS (1864), with (1903) 1 missionary and his wife, 320 native workers, men and women; 24 Sabbath schools, 79 day schools, and 2,744 professed Christians, of whom 918 are communicants.

IBADAN: A walled city in the Yoruba country, W. Africa, situated 83 miles N. N. E. of Lagos, with which it is connected by railway. Population, about 120,000. Station of the CMS (1852), with (1903) 1 missionary, 2 women missionaries, 11 native workers, men and women; 4 day schools and 984 professed Christians, of whom 351 are communicants. Mohammedans are gathering many converts in the country. Yet a few Mohammedans are converted to Christianity each year. Circuit station also of the WMS.

IBANSHI: A town in the Congo Free State, Africa, situated about 45 miles N. by E. of Luebo, at an altitude of about 1,000 feet. It is an important center of trade for the Bakuba tribe. Station of the PS (1897), with (1903) 2 missionaries, 1 with his wife; 12 native workers, men and women; 2 outstations, 2 places of worship, 1 day school, and 600 professed Christians, of whom 197 are communicants. Name also written Ibanj and Ibange.

IBO LANGUAGE: Belongs to the negro group of African languages and is spoken by an unknown number of tribesmen found in the Calabar region, between the Niger and Cross rivers in W. Africa. It has been reduced to writing by missionaries of the CMS, Roman letters being used for the purpose. Some beginnings of a literature have appeared.

IBUNO: A settlement in Southern Nigeria, W. Africa, situated on the Kwa Ibo River not far from the coast. Station of the Qua Iboe Mission (1857), with (1903) 1 missionary, 5 native workers, 3 schools, 1 dispensary, 1 printing house, 1 industrial farm, and 525 professed Christians. The mission has also a steam launch for river touring.

IBWIJI: A settlement in German East Africa in the Chigogo district, not far from Mpapwa. Station of the CMS (1901), with (1903) 1 missionary and his wife, 3 native workers, 1 day school, 1 dispensary, and 20 professed Christians.

ICELAND: A large island in the North Atlantic Ocean, subject to the Danish crown, 160 miles northeast of Greenland and 600 miles west of Norway. Area, including adjacent islands, 39,758 square miles, of which 16,243 are habitable. Iceland is of volcanic origin, and therefore all its mountains are volcanoes. It is remarkable for its numerous geysers and intermittent hot springs. The climate is colder than when it was first settled, since great masses of ice yearly drift from Greenland to its shores and remain for months encircling the island in a compact mass. The Gulf stream makes the southern portion warmer and more rainy than the northern. Population (1901), 78,470, who are descendants of the first Norwegian settlers, speaking the purest Norse. The men are tall, fair-complexioned and blue-eyed, with frames hardened by frequent exposure to rough weather. They perhaps inclined to idleness and intemperance, they are strictly upright, truthful, generous, and hospit-
able. The women are industrious and chaste. Religious faith and the domestic virtues are traditional in every household. Education is universal, and it is hard to find an adult who is unable to read and write. Their church is exclusively Lutheran, but lately three missionary stations have been established by the Roman Catholics. Foreigners have the same rights of residence, holding property, etc., as natives.

I-CHANG-FU: An important inland town and treaty port in the province of Hu-pel, China, situated on the left bank of the Yangtze River, 165 miles W. of Hankow (363 miles by river). Lying at the outlet of the river after it has accumulated 350 miles through mountain passes and rocky ravines, the town is exposed to considerable risk from floods, and in 1870 many houses were washed away. It stands at the head of steam navigation on the Yangtze, but access to it is so hampered by rocks that its value for foreign trade is slight. Altitude, 500 feet. Population, 33,000. Station of the Church of Scotland Foreign Missions and Women’s Committee (1878), with (1900) 10 missionaries, men and women; 14 native workers, men and women; 6 day schools, 1 hospital, and 206 professing Christians. Station also of the PE (1889), with 4 native workers. Station also of the CIM (1895), with (1903) 1 missionary and his wife. Station also of the Swedish Missionary Society (1894), with a dispensary and a day school.

I-CHAU-FU: A town in the province of Shantung, China, situated 220 miles N. by W. of Nanking. Station of the PN (1891), with (1903) 11 missionaries, men and women (2 of them physicians); 5 day schools, 2 dispensaries, 2 hospitals, 1 medical class, and 364 church members. Name written by the Society Icknow.

I-CHENG: A town in the province of Shan-si, China, situated 32 miles S. E. of Ping-yang-fu. Station of the CIM (1902), with 1 missionary and his wife.

IDAIYANGUDI: A town and district in Madras, India, situated on the seacoast in the extreme south of Timnecki, about 40 miles S. W. of Tuticorin. The inhabitants are chiefly of the Shanar or Palmyra rearing caste, and poorer and more ignorant than those farther north. The majority of the people became Christians early in the 19th century, but afterward, through neglect and indifference, to lapse into evil ways and heathenism. Station of the SPG (1825), with (1903) 43 native workers, men and women; 24 places of worship, 12 day schools, 2 high schools, and 3,082 professing Christians, of whom 791 are communicants.

IDUTYWA: A district or reserve in Cape Colony, S. Africa, situated in the Transkei region, some 70 miles N. of East London. Station of the SPG (1893), and the Episcopal Church in Scotland (1896), with (1903) 1 missionary, 31 native workers, 17 outstations, 12 places of worship, 17 day schools, and 2,800 professing Christians, of whom 793 are communicants.

IGATPURI: A town in the Bombay Presidency, India, situated in the district of Nask, 72 miles N. E. of Bombay. Population (1891) 7,500, of whom 4,800 are Hindus. Station of the ME, with (1903) 1 missionary and his wife, 5 native workers, 1 preaching place, 4 Sunday schools, 1 day school, and 277 professed Christians.

IH-YANG. See I-YANG-HISIEN.

IJEBU ODE: A town in the Yoruba country, W. Africa, situated about 35 miles N. E. of Lagos. Population, about 30,000. Station of the CMS native Church, with (including Ijebu Igbo, 1903) 19 native workers, 7 day schools, and 3,768 professed Christians, of whom 623 are communicants. Station also of the WMS, with (1903) 1 missionary, 34 native workers, men and women; 35 places of worship, 6 day schools, and 407 professed Christians. Name also written Ijebu Ode, Ijebu, and Ode.

IKOKO: A settlement in the Congo Free State, 320 miles N. E. of Stanley Pool. Station of the ABMU (1894), with (1903) 2 missionaries, 1 missionary’s wife, 3 women missionaries, and 5 native workers.

IKONETA: A settlement in Southern Nigeria, situated on the Cross River, near Creek Town. Station of the UFS (1856), but now (1903) operated as an outstation of Ikorofong. Name written by the Society Ikonetu.

IKOROFIONG: A town in the Old Calabar region of W. Africa (now called Southern Nigeria) situated on the right bank of the Cross River, about 12 miles N. W. of Creek Town. Station of the UFS (1858), with (1903) 2 missionaries, one with his wife; 1 woman missionary, 14 native workers, 5 outstations, 11 day schools and 88 professed Christians.

IKWEZI LAMACHI: A settlement in Alfred County, Natal, South Africa, near Harding. Station (1877) of the Young Men’s Foreign Missionary Society of Birmingham, England (YMCA), with 1 missionary and his wife, 14 native workers, 9 outstations, 6 day schools and 2 industrial schools.

ILALANGINA: A mission district in Madagascar, situated in the Betalio province and near Fianarantsoa. Extending to the N. E. from that place. Occupied by the LMS in 1870. It now (1903) has 1 missionary and his wife, 180 native workers, men and women; 20 Sabbath schools, 60 day schools and 1,670 professed Christians, of whom 480 are communicants.

ILESHA: A town in the Yoruba country, near the border of Nigeria, W. Africa, situated about 150 miles N. E. of Lagos. Population, about 40,000. Station of the CMS native Church, with (including Ilesha, 1903) 8 native workers, 3 preaching places, 3 day schools and 845 professed Christians, of whom 132 are communicants. Name also written Ilesa. The WMS also has a native worker here, with a growing congregation.

ILOIL: A town and seaport in the Philippine Islands, situated on the E. coast of the island of Panay. It is next to Manila, the chief port of the islands. Its largest export is sugar. Population about 11,000. Station of the PN (1900), with (1903) 2 missionaries and their wives (one a physician), 6 native workers, 3 outstations, 1 hospital and dispensary.

IMAD-UD-DIN, REV. Maulvi, D.D.: Born at Paniput, North India, in 1822. Died at Amritsar, August 28, 1900. He was a Mohammedan Mauvi, and a lineal descendant of the famous Mohammedan saint, Qutub Jamal, who was a descendant of the ancient royal house of Persia. Imad-ud-din was educated at the Government College at Agra; was converted to Christianity as a result of a discussion in public between mis-
VISIONARIES AND MUSLIM DOCTORS; RECEIVED INTO THE CHURCH AT AMRITSAR, APRIL, 1866, AND BECAME THE NATIVE PREACHER AT AMRITSAR. HE WAS APPOINTED EXAMINING CHAPLAIN TO THE BISHOP OF CALCUTTA FOR HINDUSTANI CANDIDATES, AND AFTERWARD HE WAS CHAPLAIN TO THE BISHOP OF LAHORE. IN 1884 THE DECEASED CONVERSION OF THE MUSLIM DOCTORS DESCRIBED HIM BY THE ARCHBISHOP OF CANTERBURY; AND HIS PEN PRODUCED THE FOLLOWING WORKS: "HIDJAYAT-UL-MUSLIM; HAQIQI 'ARJAN," BEING 12 TRACTS ON THE CHRISTIAN RELIGION; A SHORT COMMENTARY ON THE BOOK OF REVELATION; A POPULAR LIFE OF MOHOMET; A TREATISE ON THE RESURRECTION; A COMMENTARY ON ST. MATTHEW'S GOSPEL; AND A NUMBER OF OTHER ABLE WORKS.

IMPOLEWI: A SETTLEMENT IN NATAL, S. AFRICA, SITUATED 12 MILES N. N. W. OF PIETERMARITZBURG. STATION OF THE UFS (1872), WITH (1903) 1 MISSIONARY AND HIS WIFE, 5 NATIVE WORKERS, 2 OUTSTATIONS, 6 DAY SCHOOLS AND 381 PROFESSED CHRISTIANS.

IMPUR: A VILLAGE IN ASSAM, BRITISH INDIA, SITUATED IN THE NAGA HILLS, NEAR THE BURMAN FRONTIER. STATION OF THE ABMU (1876), WITH (1903) 3 MISSIONARIES AND THEIR WIVES, 15 NATIVE WORKERS, MEN AND WOMEN; 8 PREACHING PLACES, 9 DAY SCHOOLS, AND 367 PROFESSED CHRISTIANS.

IMVANI: A SETTLEMENT IN CAPE COLONY, S. AFRICA, SITUATED IN THE QUEENSTOWN DISTRICT, ABOUT 20 MILES S. E. OF QUEENSTOWN. STATION OF THE EPISCOPAL CHURCH IN SCOTLAND (1854), WITH (1900) 2 MISSIONARIES, 1 WOMAN MISSIONARY, 47 NATIVE WORKERS, 10 OUTSTATIONS, 12 SCHOOLS AND 620 PROFESSED CHRISTIANS.

INANDA (LINDLEY): A SETTLEMENT IN NATAL, S. AFRICA, SITUATED ABOUT 15 MILES N. BY W. OF DURBAN. STATION OF THE ABCFM (1847), WITH (1903) 1 MISSIONARY, 2 WOMEN MISSIONARIES, 24 NATIVE WORKERS, MEN AND WOMEN; 7 DAY SCHOOLS AND 1 BOARDING SCHOOL FOR GIRLS, WITH INDUSTRIAL DEPARTMENT.

THIS VAST AND VARIOUS TERRITORY IS FOR THE MOST
part under the rule of the British crown and Parliament. In many scattered portions of Indian territory the original power of native rulers is still acknowledged; these states sometimes cover large tracts of country, with their millions of inhabitants, and sometimes embrace but a single town, with its dependent villages, or a bit of mountain jungle where the authority of some half-savage aboriginal chief is owned by the handful of his tribe. But even these native states are under the ,, more or less, watchful eye of the paramount English power; the authority of their ostensibly independent native rulers is circumscribed within definite limits at the discretion of that power, while its actual exercise is carefully superintended, with more or less minuteness of detail, by English officials appointed for that purpose.

Political Divisions: Such a diverse territory can be best described in the present work by treating of its separate political divisions in their proper alphabetical order under separate headings. With the exception of the native states, all of which are of merchant castes, the whole of India is divided among the supervision of the paramount power through a class of officials known as ,, residents,, all of India is governed, in the name of the British sovereign, by a Viceroy, or Governor-General, assisted by a Council, whose seat is at Calcutta. For purposes of administration the country is divided into eight great ,, provinces,, each under the control of a governor, lieutenant-governor or commissioner, according to rank of the province.

These provinces are: Madras, Bombay, Bengal, United Provinces of Agra and Oudh, Punjab, Burma, Assam, Central Provinces. In addition to these provinces there are four ,, minor charges,, each under a Chief Commissioner. These are Coorg, Ajmere-Merwara, British Baluchistan and the Andaman Islands. The Northwest Frontier Province, with seat of administration at Peshawar, is administered by a military officer whose title is Agent to the Governor-General.

Population: The people of India, with whom in their religious relationships our interest now principally lies, are divided by race, by caste, by language, and even in some instances by distinct castes. The broadest division is that by religion. The census of 1901 shows the distribution of the population according to religion (including the native feudatory states) to be as follows: Of the 294,233,345 souls comprised in the total population of the Indian Empire, 207,146,422 are classed as Hindus; 62,458,061 as Mohammedans; 9,476,750 are Buddhists; 8,584,349 are spirit-worshippers (chiefly the aboriginal tribes); 2,923,241 are Christians; 2,195,288 are Sikhs; 1,334,148 are Jains; 94,190 Parsees; 18,228 Jews; and 2,686 are of other shades of belief or disbelief.

The division of the people into castes obtains only among the Hindus. The ancient fourfold division is well understood by every one who has ever heard of India. The Brahmans or priests occupy the highest place; the second caste is that of the Kshatriyas, or soldiers; merchants, or Vaisyas, form the third; while the fourth, including the vast body of the people, is that of the laborers, or Sudras. In modern times, however, this simple division has become exceedingly complicated. The Brahmans still maintain their preeminence as the first and highest caste, although within the limits of Brahmanism there are many subdivisions, between some of which intermarriage is not allowed. The great mass of agriculturalists and laborers, who acknowledge themselves as members of the fourth or Sudra caste. But, instead of finding between the castes of first and fourth rank distinctly marked gradations indicating the limits of the second and third, we find a great multitude of castes, partly formed of what may be regarded as the fragments of the old soldier and merchant castes, partly the result of intermarriages between men of higher grade and women of lower (the offspring of such marriages occupying a social position midway between that of their parents), and partly due to the inevitable complication of social relations, as the process of social evolution went on. Among this mass of castes the names of the old titles still exist of Kshatriyas and Vaisyas. The Rajputs of Northwestern India are descendants of the old second or soldier caste; the merchants (in many places known as Wans or Banjars) may usually be regarded as belonging to the old third or merchant caste; and the various Hindu castes are often so numerous. Thus, while the old nomenclature still exists with reference to the Brahmans and the Sudras, it has been for the most part superseded with reference to the soldiers and the merchants, owing to the divisions of these old castes, and the confusion which the Hindu religion and Hindu society progressed. In addition to the castes already mentioned, the followers of every species of trade and handicraft form a caste by themselves. Thus there is the caste of goldsmiths, of tailors, of carpenters, of blacksmiths, of weavers, of shoemakers and leather workers, of potters, etc. Some of these castes occupy a position above the Sudras; some, especially the shoemakers and potters, below them. Below all these respectable castes of Hinduism are ranged the great body of the outcaste population, who are not allowed to live within the village limits, who are sometimes debarred even from entering the street in which Brahmans reside, who must not draw water from the wells or streams used by those of higher rank, and whose very touch, sometimes even whose mere shadow, is polluting. Yet they often perform important services and are considered as civil functionaries in the village. These outcastes are often spoken of collectively as Pariahs—which is the term used to designate them in Tamil—their vernacular, and is applied to many of which individuals of this description are locally denominated. The origin of the caste system is lost in the dimness of remotest antiquity. It is probable that it originated in some such way as this: The Arians, who entered India from the Northwest some fifteen centuries before the Christian era, found the land as they advanced already in the possession of a previous population. As this population, the Aryans with their strong character, higher civilization and more cultivated language (the Sanskrit), in process of time overcame. Gradually diversity of function within their own body gave rise to a corresponding diversity of social position, or caste; the priests, the soldiers and the merchants settled themselves into their own distinct classes, the distinct existence of which as such was ensured by the custom that the son should follow the calling of his father. The former inhabitants of the land seem for the most part to have accepted the religion, and to some
degree—the in an inferior form and with many corruptions—the language of their Aryan conquerors, and to have been relegated by the latter to the lowest position in the social scale, that of laborers or agriculturists. Thus the three higher castes were of Aryan origin, while the fourth or Sudra caste, between which and the three higher there is a much wider gap than between any two of the higher themselves, was composed of the great body of the previous population. It is probable that the outcaste bodies (Pariyahs, Mahars, Mangs, Dheds, etc.) represent early aboriginal tribes, brought into some degree of union with the new social organism arising after the Aryan invasion, but too low to become actually incorporated in it, as members in good repute, as those composing the fourth Hindu caste were. Probably the tribes still existing apart and usually spoken of as aboriginal tribes (Santals, Gonds, etc.) are descended from aboriginal bodies who refused to yield to the Aryan invaders, or to accept the low position to which their brethren—the progenitors of the outcastes of to-day—were consigned.

Languages: It is exceedingly probable that the tribes which were thus overrun by the Aryans have preserved, in a more or less pure form, some languages, or dialects, spoken by them. Repeated invasions and conquests must have marked the earliest history of India, as they have their later developments; and these repeated processes of invasion have left their evidences in the strata of tribes and races which to-day make up the complex population of Hindustan. Not only can the diversity of caste be in part accounted for in this way, but also the great diversity of language which characterizes India. It is stated by philologists that within the limits of both Hither and Farther India (meaning by the last term that peninsula which includes Burma and Siam, of which only a part is politically connected with the Anglo-Indian empire) three hundred distinct languages and dialects are in actual use at the present time. The variety of the aboriginal tribes already so many times alluded to, of which each one has usually its own distinct form of speech, accounts in large measure for the great number. The principal languages of India, each of which is spoken by millions, and which have all received more or less literary cultivation and development, are much fewer in number.

The Indian languages can be conveniently distributed into several groups, according to their affinities. The first division consists of the most important tongues used in northern and western India. These are: The Bengali, spoken in the province of Bengal by about 37,000,000 or 40,000,000. It is subject to several dialectic variations, especially upon the northern side of its territory, where it comes in contact with other languages, by the intermingling of which in the speech of the people the purity of all is corrupted. About half of those using the language are Muslims; their form of the language is known as Mohammedan, and forms another dialect of the language. On the northeast of Bengal, in the Brahmaputra valley, about 2,000,000 people use the Assamese, which is most probably a language allied to the Bengali.

Southwest, in the province of Orissa, the Oria tongue is used by some 8,000,000 of people. The Hindi language, occupying an immense tract northwest of Bengal, covering the Northwest Provinces, and overlapping on every side into the surrounding regions, is the most widely used tongue of all the modern languages of India. The number of those to whom it is vernacular is estimated at 80,000,000. More than half of these, however, use the Hindustani or Urdu, which is the dialect formed by the Mohammedan conquerors of India, with many Arabic and Persian words and written with Arabic instead of Hindu letters. Other dialectic variations are numerous. The Bengali, the Oria, the Assamese, the Hindi, the Sinhali, the Gujarathi and the Marathi, with their many dialects, are sister-tongues of the Aryan family, the incorporating in them a multiplicity of elements: grammar, of idiom, of words from the non-Aryan languages with which the spoken Sanskrit of a former period gradually became corrupted. Of these Aryan vernaculars only the Bengali, the Hindi, and the Marathi—have retained any high degree of cultivation, or possess any important literature. It is possible that the other languages of this group may one day disappear; but these three are widely prevalent among the tongues, which seem destined to permanence.

The Hindu population of South India presents us with a second great family of languages, much farther removed than those of the north and west from the Sanskrit, and owing to it smaller—these important—languages. Of them, are usually spoken as the Dravidian group. The term "Dravir" or "Dravida" is found in Sanskrit literature as applied to the Indian peninsula where the chief languages of the branch are spoken. The most important of these, all of them, is the Tamil, covering the area from a few miles north of the Madras to the extreme south of the eastern side of the peninsula, and running more than half the distance across the peninsula toward the Indian Ocean. North of the Tamil area, on the east side of Lower India, lies the Telugu country, along the Bay of Bengal and up into Central India, until it meets the Oria language along its northeastern edge and the Marathi along its northwestern. West of the Tamil and Telugu areas lies that of Kanarese, which also meets the Marathi from the northwest. The Malayalam stretches along the western coast of India from Cape Comorin northward nearly 300 miles. The Tamil, the Telugu (sometimes from its abundance of vowel and liquid sounds called the Indian Italian), the Kanarese, and the Malayalam are all cultivates, languages possessing a literature and a distinctive alphabetical character. The Tamil is by far the most important and richest of them all, and is used by the largest number of people—nearly 15,000,000 in all. Tamil is also used extensively in Northern Ceylon, and by many emigrants to Burma, the Straits Settlements, Mauritius and the West Indies.

Besides the cultivated language of the Dravidian group just described, languages of the same family are used by some of the jungle tribes of India, as the Gonds and Khoaves of Chota Nagpur and of the Nilgiri Hills and some others. The number of persons using Dravidian forms of speech must be more than 60,000,000.

Religions: Regarding the religious condition of
the people, it will be sufficient to refer the reader to the several articles in this work in which the different religions practised in India are treated in detail; with the remark that for the most part, the people cling to those religions with the tenacity—often an unthinking tenacity—which is to be expected of those who have been educated from their earliest years to believe that adherence to the customs of one's ancestry, and to the religious rites practised by one's forefathers, is the only way the world is made; or that the intense conservatism of all Oriental nations is thus reinforced by religious sanctions, and is exalted to the position of religious obligation. Hinduism has been interwoven with the developing life of the Hindu people for a period of more than thirty centuries; it has presided over the formation of their philosophies, their social customs, their intellectual habits and their literature; and it lies at the very basis of their lives in all possible relations to a degree which is hardly paralleled elsewhere. These facts account fully, extreme, and thirty the exemples of Christian progress among the Hindus. The Mohammedans in India do not derive their religion from ages so remote as the Hindus, and on this account their momentum along the line of present religious tenets might be looked to be less, yet they show fully as much determination in upholding their peculiar tenets as the Hindus do in upholding theirs; they are characterized by the same intense conviction that they are God's chosen people, commissioned to take and purge the earth, in which and in which they possess a considerable share of dignity and artistic excellence. But such exceptions to the general character of grotesqueness are not frequent. Numerous temples—some cut from the solid rock; some built of stone with neither mortar nor cement; some whose towers arise to imposing heights, like those of Western sculpture; and others some whose stone-built shrines, a simple cube with a pyramidal roof; some built last year, and others in various stages of decay attesting their foundation centuries ago; some covered with rudely fashioned images of gods and of animals esteemed sacred, adorned with water and without a certain plaintive beauty in its melodies. Their singing is apt to be rather nasal, and their instrumental music seems to a European nothing but a discordant clamor of drums and scrambling of shrill wind-instruments; but some of them are pleasing in tone. For a long time the associations of Hindu music, being almost wholly those of the Hindu temple, and the Hindu festival were considered insuperable objections to its use among Christians. But of late years, in more than one part of the great Indian mission field, native poets have arisen, who have composed Christian hymns in the meters of Hindu prosody and have adapted them to such Hindu melodies as seemed best fitted for the purpose. In many churches of Indian Christians the hymns and tunes are now used with most excellent effect.

Preachers and street evangelists in the bazaars and villages find many of these native tunes with Christian words most useful in gaining the ear of the people for the proclamation of Christian truth. This conversion of the world was, by chance, and the result of the work of the Gospel among the Hindus, not a decided step of progress in the work of naturalizing Christianity among a people the essential genius of whose mind seemed in some respects ill adapted to receive it.
It is difficult to describe in a few words the intellectual condition of the Indian people. In some respects, and among the castes, intellectual cultivation has existed for centuries whose twofold result is seen to-day, in a keenness of mind and a faculty of profound speculative thought which is remarkable, in the philosophical treatises, the commentaries upon them, the hymns and the poems which compose the body of Hindu classic literature. On the other hand, the people as a rule are unable to read, and are content to live on, generation after generation, with no intellectual progress, content if they get rice or other grain enough to keep them from starvation, and careless of mental or spiritual sustenance. It is among the Brahmans that the intellectual cultivation of India has reached its fullest result. They have been not only the priests, the religious leaders of the people, but also the creators of its intellectual, philosophical and literary development, and the depositaries of its intellectual wealth. With the exception of an occasional lyric poet arising from among the lower orders of the people, whose homely verses in the vernacular of his own district would often obtain an immense currency and exert a vast influence upon the children of which the poet himself had sprung, nearly all the thinkers, students, and authors of India have been Brahmins. The elaborate grammar of the Sanskrit language is due to their assiduous cultivation; Indian theology, philosophy, poetry, and science have been developed almost wholly by them. The Brahman intellect is keen, acute, subtle, and speculative; but their logic is apt to be fallacious and their argumentation specious rather than profound and thorough. The education of the merchant class consists of but little else than reading, writing, and such practical operations of arithmetic as will make ready and correct accountants. The royal and soldier castes have been apt to affect a lofty contempt for all literary accomplishments, as things fit only for Brahmins; and have paid the penalty of their folly in many a case by being compelled to wait on druggists and financiers, who, little by little, would absorb the real power of the throne, while its nominal occupant was busy with his elephants, his horses and soldiers, or else sunken in ignoble debauchery. The great masses of the people are not to-day, and never have been, able even to read their own vernacular; thus they have become on the one hand the dupes of a crafty priesthood and on the other the prey of cunning moneylenders on whose advances of cash they are forced to depend, but whose wiles and tricks they are too ignorant to detect. Such education as the children of Hindu families enjoyed before the establishment of missionary and government schools was imparted by Brahman schoolmasters, who were wont to collect the boys wanting instruction (girls were never taught) and to teach them to repeat by rote verses from the Sanskrit poets, to read and write their own vernacular, and to perform none of simple arithmetics. Brahman youths who wished for a thorough training in the sacred language, religion, and philosophy would attach themselves to some noted scholar and would be by him put through an elaborate course of instruction, extending to many years. In this way large numbers of young Brahman would sometimes be found attending upon the instructions of such a learned man, or guru, composing thus a sort of college. It is true that such schools of instruction would be confined, in its subjects, to the Sanskrit language, the practise of the Hindu religion, including familiarity with the sacred books, or Vedas, and to skill in Hindu philosophy; while its recipients would not extend beyond the ranks of the Brahman caste. Merchants did not need such training, soldiers did not care for it, and the Sudras were deemed unworthy of it.

Morals: The moral condition of the people should be described as one of apathy or even deadness rather than as one of violent and malignant opposition to virtue. Their lives are destitute of stimulus and incentive. Their religion furnishes no motive for the present and incites no aspiration for the future. The thought of bettering their own condition, or of doing aught to benefit another's, is foreign to their minds. The Oriental doctrine of fate is ever present to quench all upward endeavor. It is their destiny to be what and as they are; and who are they to contend with destiny? The chief faults of the people are lack of truthfulness—which, especially among traders, merchants and money-lenders, develops rapidly and deeply into malversation, cheating and fraud, and licentiousness. Yet caste rules constitute some safeguard for the virtue of their women, for a female of good caste detected in immorality is apt to be promptly dealt with and expelled by the caste authorities. Intemperance is not usually a vice of the Hindu people, the in recent years the introduction of cheap foreign liquors, often miserable adulterations, and the course of the government in licensing drinking-places, has stimulated the use of intoxicating liquors among all classes. The disposition of the people is mild, and crimes of violence are no more common among them than among the people of other races. The ranks of the professional thieves and bandits are largely recruited from certain of the wild jungle tribes, who have been robbers from time immemorial.

Modern Hindus: The Aryans, entering India some two thousand years before Christ, gradually extended themselves—first through the valley of the Ganges, then into Southern India. They have left behind them no written history. But Hindu princes of various families founded dynasties and ruled over realms of greater or less extent, until they were in turn supplanted by submission by the Mohammedans. These fierce and relentless conquerers entered India through the same northwest door as those who had preceded them. The year 1000 may be taken as marking approximately their first appearance in Hindustan. Mahmoud King of Ghazni, a city in Afghanistan, was the first Mohammedan leader to undertake the conquest of India. He made twelve expeditions into the country—the first a few years before the approximate date above given. Mohammedan power slowly grew; one dynasty after another continued the work of invasion, until first the Punjab, then the Ganges valley, and at last all of India was reduced to Muslim sway, tho the country was never long at peace. Rebellions were constantly keeping the land in turmoil, headed sometimes by an ambitious Mohammedan, sometimes by a Hindu whose limbs were galled by the chains of Muslim rule. In the middle of the 17th century.
a Maharatta chieftain named Sivaji consolidated into a formidable power the strength of the Maharatta race and made great inroads upon the power of the Mohammedans. He overran all India, and the prominent and ancient dynasties of Maharatta houses were established both in North and South India. But their power was broken at the battle of Pannipat, near Delhi, in 1761, when they contended unsuccessfully against an army led by Ahmad Shah of Afghan-istan.

The English came to India very early in the 17th century, first as merchants in a small and humble way. Their mercantile operations were conducted by the East India Company, whose original charter was signed by Queen Elizabeth, near the close of her reign. Little by little their power and the scope of their influence extended itself. Establishments, or "presidencies," defended by forts and armies, under the command of this company of merchants, were placed at Madras, at Calcutta, at Bombay. From these points the authority of the Company slowly but surestly spread. When the Maharatta power fell in 1761, the English were already strong enough to step into the first place of power in Hindustan; and, in fact, the question of English supremacy in Bengal, and by consequence in India, had been settled at the battle of Plassey, near Calcutta, in 1757. The Conferment of the title of Subraj-ud-Daula, the Mohammedan ruler of Bengal. From these source beginnings and along a path providentially prepared for them by the fall of the Mahurratas, the only native race capable of offering an effectual resistance, the East India Company proceeded to its manifest destiny of absorbing and ruling—not as merchants, but as conquerors and princes—the whole of India. When the great mutiny of 1857 burst upon India—a movement fomented among the native troops in upper employ of the Company, and used by certain dispossessed heirs of old Indian princes in the hope of destroying the English supremacy, and regaining the lost control of their own land—English power for a moment trembled; but the result of the mutiny was merely the transfer of the supreme power in India to the hands of the East India Company to the direct control of the British crown and Parliament.

More and more have the English rulers of India realized that they have a duty and mission to perform in that land. They have governed the country with a stern and rigorous justice, with a benevolent and paternal dispensation. If they have not always been conciliatory toward the natives, and have failed largely in winning the love of the subject races, they have always been respected for their justice and integrity, and their rule has been prized for the good order, peace, the prosperity, which they have given to the country. They have encouraged and fostered education; they have established post offices, post roads, railroads, telegraphs; they have developed agriculture, manufactures, and commerce; they have provided hospitals and medical treatment for the diseased, and have fed the multitudes in time of famine.

Missionary work in India is carried on under the strong protection of a government, which, while wholly neutral in religious matters, undertakes to assure to everyone one religious liberty, and to protect all in the exercise of it.

Christianity in India: While we may regard the tradition that the Apostle Thomas introduced Christianity in India during the 1st century as unauthentic, we know that a representative of the Christian College at Alexandria found Christians on the Malabar coast before the close of the 2d century who were in possession of the Hebrew Gospel of St. Matthew, and we learn that a Bishop of India was present at the Council of Nicaea in A. D. 325. In the 6th century Syrian missionaries of the Nestorian faith propagated the Gospel in India, and Christian churches still existed on the Malabar coast and in Ceylon. From the time of Marco Polo's visit to India, in the 13th century, when he reported seeing Christians at many points where he touched, until the dawn of the 19th century, when the era of modern missions began, nearly every century witnessed earnest work by Roman Catholic missionaries in India; but in the 18th century Christianity had comparatively few consistent followers in the land.

The King of Denmark began the work of evangelical missions in India. Bartholomew Plakorff, a German, who was sent out by Frederick IV. of Denmark, reached Tranquebar, a Danish possession, in 1706; and they may be regarded as the pioneers of the great missionary host that wrought so faithfully during the following century for the redemption of this great land.

The details of the modern missionary history of India must be sought under the titles treating of the several districts, races and missionary societies in this land; but here we may appropriately refer to the following interesting facts: As to the great increase of Christian work in India, America furnishes 35; England, 34; the Continent, nine, and the international societies and missions from other lands number 15. We are impressed by the words of Sir William Hunter in his work, The Indian Empire: "Between 1851 and 1890 the number of mission stations increased three-fold, while the number of native Protestant Christians has multiplied more than five-fold, the number of communicants nearly fifteen-fold and the number of churches or congregations sixteen-fold. This was largely due to the extended government of our imperial work. The native ordained pastors increased from 21 in 1851 to 797 in 1890, and the native lay preachers from 493 to 3,491." The Statesman's Year-book gives the following facts concerning education in India: Number of educational institutions, March 31, 1901, 147,344, of which 62,039 are private and unaided; scholars under instruction, 4,417,422; number of colleges for men, 175, with 21,015 students; women's colleges, 11, with 205 students; students matriculated in the 5 universities in 1900, 7,528. The numerical increase of the evangelical forces in India during the last decade of the 19th century should inspire gratitude and kindle hope.

We may hope for far greater blessings than these to come to India during the opening decade of this century of our Lord; but if the percentage of increase is equal to that of last decade the year 1910 will witness a Protestant community...
of more than one million and a quarter in this great empire.

INDIAN HOME MISSION to the Santhals (1867); This Missionary Society is not indigenous in India and its title may mislead some. It should therefore be noted at once that the Society is to be reckoned among Danish Missionary Societies. It was founded in 1867 by the Rev. H. P. Boersens of Copenhagen and the Rev. L. O. Skefrud. The last named missionary, who was a Norwegian, was sent out under the Gesnser Society in 1863, and Mr. Boersens went out the following year, and the in- formation of joining him in the Gesnser Society’s station in Purulia, Chota Nagpur. Not finding the situation such as they had expected, they, before long, withdrew and began an independent work among the Santals, their design being to set up a “Home” which should be a center of all those influences which flow from the home. The first three Santals to be converted were baptized in 1869, one of whom was afterward ordained. Schools were established and the pupils brought to the Middle-vernacular standard, while also receiving manual training after the custom of the people. In 1880 a colony was started in Assam for Christian Santal emigrants, the soil being more fertile than in Bengal; in 1890 the mission purchased a tea garden near the colony for its benefit. The Ebenese Missionary Society supports a work at Dinajpur, fifty miles distant, in the care of native helpers. A mission press has been established at Ebenezer, from which a monthly paper, The Friend of the Santhal, is issued, and school books, hymn-books, the catechism and other Christian literature have been printed. The Gospels have for some time been in circulation, and the whole Bible is now being printed at the expense of the British Bible Society. In 1902 there were 10,600 baptized Santals connected with this mission. There are 5 stations, 15 outstations, 5 missionaries, 46 native helpers, 9 day schools, with 375 pupils. The support of the mission comes partly from its tea plantations (in 1902 the tea culture brought in 30,000 rupees), and in the main from collections made in Scandinavia (42,000 rupees), the United States (14,500 rupees), Great Britain (2,000 rupees), and India (500 rupees). Committees exist to collect funds in England, in Scotland, Denmark, Sweden, Norway, and the United States.

INDO-PORTUGUESE: A dialect of Portuguese found among the descendent of the ancient Portuguese settlers in Ceylon and other places in the Indian seas.

INDORE: A town and capital of a district in the same name of Haidarabad, India, situated 93 miles N. by W. of the city of Haidarabad. Station of the WMS, with (1903) 1 missionary and 7 native workers, men and women. Name written by the Society Indor.

INDORE: The capital of the native state of Indore, and Residency of the Governor General’s Agent for Central India. It is situated 107 miles W. S. W. of Bhopal, in a healthful region, at an altitude of 1,786 feet. Population (1891) 83,000, of whom 60,000 are Hindus, 18,000 Moslems, and 14,000 Christians. Station of the PCC (1877), with (1903) 10 missionaries, men and women, 2 of whom are physicians; 2 dispensaries, 1 hospital, 1 orphanage, 1 widows’ home, and 1 college affiliated to Calcutta University.

INDRAMAYU: A town and seaport on the north coast of Java, Dutch East Indies, situated at the cape of the same name, about 108 miles E. of Batavia. Station of the Netherlands Missionary Union (1864), with (1900) 1 missionary. Name written by the Society, Indramajo.

INDUSTRIAL MISSIONS AID SOCIETY: This Society was established in London in 1897 by Mr. W. H. Fry, and marks a wider effort in industrial missions. The Society proposes to develop the industrial element in missionary operations by associating the people, of plants and workshops, and other industries, with the work of Foreign Missions, financially separate, but linked in close fellowship. The Society began by opening factories at Ahmednagar for the manufacture of rugs, metal work, etc., thus giving employment to those trained in the mission’s workshops, and to other Christians. It plans to do missions generally such a work as the Basel Industrial Committee is doing for the adherents of the Basel Missions. It has sent out to India a skilled operator, whose business it is to study Indian products and the market, and advise wisely regarding the articles to be produced by industrial schools and plants, and be able to market the output to advantage.

An organization having a similar purpose and called the Foreign Missions Industrial Association has been organized by Mr. Fry in New York. It was incorporated early in 1904, and has in connection with it a Ladies Auxiliary Committee.

INDUSTRIAL TRAINING IN MISSIONS: Industrial education and training institutions have a growing place in missions because they are found to supply economic and moral deficiencies and necessities of converts, and to be an effective instrumentality for the Heathen and Heathen communities. These economic necessities of the convert are due, for one thing, to his isolation. By allying himself with the new religion, he cuts himself off from his family, his tribal relations and rights, his interest in common land, cattle, implements, and cooperative business enterprises; he loses caste; he is precluded from all low and immoral occupations, from parasitic dependence upon a rich or high-caste master, and from the priesthood and all the occupations associated with idols, superstitions and heathenthrust. Because of the ill-will of his former coreligionists, he is usually at a disadvantage in legitimate lines of trade, and oftentimes is shut out from them entirely. The mission companies, in many cases indeed opens the way for, the overwhelming competition of Western trade. So the missionary finds the convert in a poverty deeper and wider than that of his heathen neighbors, and cannot escape a sense of responsibility for his condition. Not only so, but new
wants and necessities are the speedy fruitage of the Gospel. Decent clothing instead of a loin cloth, decent housing instead of herding in a one-room hovel, care for health through sanitation and medical treatment, education for the children, a Bible, and at least a few books, a church and minister are now essential to him as a man and a Christian. He may be unable to meet the expense of the old grade of living; much more is he helpless before that of the new ideals, which the missionary has inspired. Either the essentials of decent life must be supplied him as a gift, to the sapping of his manhood, and the increasing burden of missionary treasuries, or the way must be opened for him to earn that wherewith he may pay for them himself; and, more than this, he ought to be earning something for the extension of the kingdom among his own people. The embarrassment is greater still in the case of the thousands of orphans whom Christian charity has compelled the missionaries to shelter during famine, persecution, or other disasters, and whom they cannot turn out again to die. How shall they be supported, and what shall they do when it is time for them to leave the orphanage? In the words of the Rev. Dr. Bachmann, "Mr. Dyer," the most of them may be utilized as servants or helpers of the missionary and as Christian workers; but all are not fitted for such service; false hopes are engendered by the system, and as the Christian community grows larger, the proportion that can be thus provided for becomes smaller. The demand for clerks, teachers and the like is very limited in most missionary lands, and in India the multiplication of over-educated non-producers is the cause of serious alarm to the authorities. Under such conditions restlessness and discontent are a natural result. Industrial helplessness is settling down upon the Christians of India.

Educational Value of Manual Training: The solution to which the working missionary early reluctantly came, was that industrial education and work must be provided; and the theory of missions has been adjusting itself more slowly to a like conclusion. This conclusion would have seemed to impose an intolerable burden, had it not been soon discovered that not only economic, but also moral and spiritual, needs are met by industrial training, in which a new and effective humanitarian motive is provided for remedial work. Manual training is now generally recognized by educators as having an important educational value, fostering interest in work, power of initiative and sustained effort and constructive ability, and, in general, effective manhood and womanhood. Industrial education, as developed at Hampton, Tuskegee, and other schools, has proved the most promising agency in the uplifting of the negro and Indian. The mind of the barbarous and degraded heathen is dull and sluggish, enmeshed in the conceit of ignorance and indifferent to high things. But a better way to make a board, a box or a blanket interests the dullest, while the wonders of the workshop, with its powerful engine and its ingenious tools, are as stirring as a miracle, convincing him of his ignorance, breaking down his prejudices and making him willing to hear upon other sub- jects. The boy who can do such marvels and teach others to do them.

Industrial training dignifies manual labor, which is generally despised by the inferior races and by those educated in a purely literary course. Furthermore, it discourages the dependent pauper spirit, and encourages self-respect and self-reliance by enabling the pupil to make at least a partial return for the expense of his education; it is wholesome, checking physical vice; and it affords a test of character by which lazy, inefficient pupils may be detected and the motives of those who ask for help be discovered. Once more, the native agents, ministers, and teachers, upon whom ultimate evangelization depends, need such training to fit them for efficient leadership, which can only be given to the young boys, but for self-reliant, practical men, frugal themselves, and able to earn part of their own support if need be, and to economically build and administer church or school. Industrial training much more often than not is vital to the accomplishment of the ultimate object of missions, for a self-supporting, self-governing native church possessed of initiative to propagate itself cannot be formed until the members are able to support themselves. The problem of providing a native ministry in most fields is not more that of finding devoted preachers and pastors than it is of developing thrift by artisans. Men are provided, but the time given to manual labor hinders general education. Government examinations in India and South Africa show that pupils in schools with industrial courses are on a level in literary attainments with their competitors from purely literary schools, the time given to work being compensated for by the greater alertness and application of the industrial pupil. The same testimony comes from the schools for the American negro.

The Growth of Industrial Training in Missions: Under the impulse of such motives manual industry has always had some place in the history of missions. Our Lord and His apostles honored labor and were mindful of the physical and material welfare of their followers. The early missionaries to the now Christian countries of Europe were pioneers of industry as well as of religion, introducing the ideal of peaceful toil in settled homes as an offset to the wild life of adventure and rapine, which was the ideal of early barbarism. The Moravians from the first sent out artisans as well as teachers, and the continental societies were generally in advance of the British and American in Industrial mission work. Carey supposed that missionaries could support themselves, and so set an example to their converts; a larger proportion of the earliest missionaries of the London Missionary Society also were artisans. Missionaries have been ahead of educationalists at home in their appreciation of the value of manual training. Household industries being a usual feature of the earliest girls' boarding schools. Cyrus Hamlin, with his bakery and his stove and rat-trap factory, was a generation in advance. Lovedale in Africa had been doing its work for the negro some twenty years before Hampton was founded by Gen. Armstrong, himself the son of a Hawaiian missionary.

Much of the industrial work of missions has been begun without aid from the boards at home, the cost incurred being met by special contributions from individual philanthropists convinced by missionaries who saw the need of this form of effort. The year 1880 saw about 150 manual schools and classes reported in the whole field of foreign missions. By 1890 there were 55. In his "Centennial Survey" (statistics to
1900) Dr. Dennis reports 179 industrial institutions and classes with 9,074 pupils, of whom 6,622 were males and 2,452 females. Of these schools 63 with 1,845 pupils were in Africa, and 92 with 5,288 pupils in India and Ceylon. Since 1900 the number of such institutions has grown more rapidly, Husband's Protestant Mission Directory for 1902 enumerating 97 missionary institutions in India and Ceylon in which trades were taught.

Nature of the Existing Industrial Enterprises: The number has been classified as follows: (1) Schools with industrial features whose chief object is discipline and self-help. An increasing number of orphans and boarding schools are of this sort. At the Ecumenical Conference of 1900, Miss Barnes described such a school in India, in which the girls cultivate the cotton, spin the cloth, make their clothes, tend garden, cook, keep house, and take care of the clothing, food and health of the younger children, at the same time heading the schools of the district at the Government examinations. The Ramabai schools and orphanages at Poona and Mukti are of this nature, and such schools as the girls are in demand as wives and are a power in domestic and social regeneration. (2) Schools where trades are taught, aiming not only at a disciplinary education, but to fit the pupil for a definite life work. They require a larger equipment and expenditure. Of these, the UFS institution at Lovedale, S. Africa, is one of the oldest and most useful. Normal and theological, as well as industrial, courses are maintained, but all the students are given careful instruction in ordinary school studies and in religion, and all are required to do some kind of manual work as a discipline and contribution to self-support. Its enrollment includes pupils from almost all the South African peoples, as well as Dutch and English, and from all denominations, the sectarian character of the instruction being carefully guarded. The school receives support from the missionary funds and from government grants. A full course is given in printing, book-binding, blacksmithing, wagon-making, basketry, carpentry, farming, telegraphy, and domestic science. At least eighty per cent. of the 2,000 who have received its training have led useful lives; very few have reverted to the criminal habits of their early days, and the majority have proved strong, energetic Christians. A large proportion of the present pupils are children of the Christian negroes whom Lovedale taught a generation ago. Blythwood Institution, also in S. Africa, is an offshoot, and Livingstone, in Nyasaland, owes much to its assistance. Another typical example is the Lutheran Industrial Mission at Muhlenburg, Liberia (1840), where, among other occupations, farming and coffee-growing are made a specialty, the exports of coffee providing the school with its working capital. Graduates have cleared a group of plantations about it, and established settlements, schools, and churches in other parts of Liberia. The PN school at Sidon, Syria, the LMS school at Malua, Samoa, which is self-supporting, the ABCFM Industrial School at Tullipally, Ceylon, also self-supporting, the CEZ industrial classes in spinning and embroidery, and more than self-supporting, and the Petit School of Industrial Arts, Ahmednagar, India, named after its Parsi benefactor (under the ABCFM), and giving extended courses in wood work, metal work and weaving, are further examples. The trades taught in schools of this class include carpentry and cabinet-making, blacksmithing and metal work, printing and book-binding, weaving, tailoring, shoe-making, and embroidery. The largest number of such institutions are in India, with Africa second, and they have been an important agency in planting Christian civilization in the South Sea Islands and the New Hebrides, and agricultural schools especially have done much for the aborigines of North America.

(3) The industrial community, in which industrial establishments where Christians may find temporary or permanent employment are added to trade schools, is a further development. The classical example is found in the Basel Society's Industrial Missions, with factories at Calicut, Cannore, Coacala in Malabar, and Palghat in Madras. The Basel Society missionaries began, as far back as 1842, various experiments to meet the necessities of their destitute converts, and the Home Committee took up the problem. A circular issued in 1854 by its Industrial Commission has this to say: 'It is our aim to found, as far as possible, to remove the social difficulties which the institution of caste opposes to the missions in their endeavors to establish new congregations, and, second, what may perhaps be called a mission in itself, not by preaching, but if possible by power of example, by Christianity in its practical, every day life, a mission by the exemplification of Christian diligence, honesty, and respectability. Later the whole control of the industrial enterprises was transferred to the Basel Industrial Committee, whose only connection with the Committee of the Basel Missionary Society is that some members are common to both, and the two committees work in close cooperation. The funds for the industries have been sufficiently supplied by donations, upon which the donors receive five per cent. interest, and the remaining profits are devoted to the extension of the industries, to charities, and to contributions to the Basel Mission. An improved native product, "Basel Mission cloths" (including the Khaki cloth now adopted for military uniforms), and roofing tiles of a novel pattern have been the most notable products of the Basel enterprises in India. Labourers are employed in these works, but a considerable proportion now work independently as carpenters, bookbinders, and weavers, having been assisted by the mission in making a start for themselves. They are even employed in the establishments of rival firms, which copy the Basel tiles and Basel cloth. By the last report of the Basel Industrial Missions, after paying 5 per cent. on the capital invested and various donations to funds for the support of invalids, widows, and orphans, $57,780 was turned over to the Evangelical work of the Basel Society. The many difficulties have hest not the progress of the work and reasons for discouragement are not wanting, the supporters of the mission are convinced that it has done a good and is on the right lines. A similar mission has been maintained by the Basel Society in the Gold Coast (Cape Coast), and another in Brazil, with new secretaries. Yet another example that will repay study is Frere Town, Mombassa, East Africa, established by the CMS as a refuge for freed slaves, in whose well-ordered settlements the freed slaves of 1885 were received, cared for, fed,
clothed, and taught by the freed slaves of 1875, now baptized Christians and leading a life of quiet industry. On the other side of the world, old Metlakahtla, of the CMS, and New Metlakahtla, established independently by William Duncan, are illustrations at once of the difficulties and benefits of industrial communities. The most extensive industrial mission undertakings yet attempted are in Central Africa. In 1875 the Free Church of Scotland, at an initial expense of $50,000, sent out for the founding of Livingstonia Mission, on Lake Nyasa, a company under the guidance of Lieut. Young, consisting of Dr. Laws and another minister, a carpenter, blacksmith, engineer, agriculturist, and seaman, who first established civilization at Cape McClear and then at Bandawe, where the wilderness has been transformed into a cultivated field, and idle, war-loving savages into an industrious Christian community. Those trained in the mission establishment engage in trade and farming in the vicinity of the mission, and many others are scattered widely over Central Africa in useful employment. The Established Church of Scotland has developed a like community at Blantyre. The Universities’ Mission to Central Africa. Mission Industries’ Company, now working with success in similar lines. Newer industrial enterprises in missions are the Industrial Evangelistic Mission of Northern India, founded in 1902 by Rev. and Mrs. J. C. Lawson of Philibit, with Mr. C. W. Cotton as the Secretary of the London Committee, and the Scottish Missions’ Industries’ Company, a purely business enterprise in relations with the UFS similar to those held by the Basel Industrial Committee to the Basel Missionary Society.

Some principles of the successful conduct of industrial missions have become established:

1. The Object: The kingdom of God as the end of industrial, as of all other forms of missions, must ever be kept in view. Not physical comfort of converts, not civilization, not economy in missions, but the making of Christian men and Christian communities is the goal. In the Basel Mission the greatest care is taken to develop manhood; wages are only paid for value received, charity being administered from a fund. Malua made it a rule not to sell any of the products of the school farm, as this was found to cultivate conditions of a degrading nature, not to mention the training of the head, hand and heart is the key to the redemption of Africa," says Dr. Day of Muhlenburg.

2. Adaptation: Equal need does not exist for industrial missions in all fields. Where there is a well-developed industrial system, as in China and Japan, there may be no need of them, except as a means of self-help and discipline, or the need may be small compared with that in the fields where the people are of inferior race and where Mohammedan or Hindu supremacy denies industrial opportunity to the Christian. There must be adaptation of the industrial experiment to the varying conditions of each community; to the genius and capacities of the people; to the materials at their disposal; to the market available for the goods produced, and to the openings for the products of the various trades. The mission fields are strewn with the relics of industrial enterprises and their machinery, resulting from the blind imitation of useful institutions elsewhere. That the convert may overcome the prejudice against him as a Christian, have permanent employment, maintain his self-respect and bring honor to the cause, he must be trained to be a better workman than his heathen competitor and the Christian workshop must turn out the better goods. The same reasons advise the giving of a more expensive training in trades which promise a reasonably profitable and adequate return. An entrance of short, cheap courses in easier trades which can only yield enough to meet the Christian's enlarged necessities. It has been found unwise to attempt the production of articles in competition with Western manufacture, unless protected against those by distance or other cause. Either a new article or an improved article for home consumption or native products of fine quality suitable for export have proved most remunerative. It should be added that those who labor for the submerged classes in great cities, for the American negro and Iyidian, for the African and the islander, and those who are interested industrially in India, where land-owning and agriculture are beset with peculiar difficulties, alike place growing emphasis upon the soil as furnishing the most wholesome, permanent, and promising employment for those whom they seek to benefit.

3. Efficiency: Efficient superintendence and liberal capital and equipment are essential. The employment of native artisans as instructors has proved a failure, and in few cases have ordained missionaries been found competent as instructors or superintendents of industrial work. The successful superintendent is a trained artisan with sufficient breadth and culture to enable him to study the conditions and adapt the work. He will be the better for knowing something of a variety of trades. He might well be apt to teach, but one thing he must be—an honest Christian, who puts the kingdom of God before all else as the purpose of his mission. Such a man should be placed on an equality with other missionaries, and experience has proved him worthy of it.

Industrial education is expensive at home and cannot be otherwise in the mission field. Necessity for trained superintendents and for apparatus makes it difficult to begin in a small way, but the most successful industrial enterprises have started cautiously and felt their way to their larger work. Usually the successful industrial leader begins with a few artisans, with one who has genius for organization and leadership. Hamlin and Bebek with its mill and bakery; Armstrong and Hampton, Washington and Tuskegee, Stewart and Lovedale, Laws and Livingstonia, Duncan and Metlakahtla, Ramabai and Poona—such linking of names might be continued indefinitely to illustrate the point. Having granted that industrial training is a necessity in most mission fields, the discovery of the godly man of genius to plan and organize is a first condition of success.

Station of the South Africa Wesleyan Methodist Church, with 29 native workers, 20 outstations, 2 schools, and 265 professed Christians. Name written by the Society, Endwedwa.

ING-CHUNG: A city and district in the province of Fo-kien, China. The district begins 125 miles south in part of Fu-chou, and extends 100 miles in a northwest direction. Its mountains are high, its hill roads are long, its villages sparse, and the workers few. Station circuit of the ME, with (1903) 1 missionary and his wife, 26 native missionaries, 26 native workers, 10 preaching places, 50 accounters, 13 Sunday schools, and 403 professed Christians.

INKOH. See YUNG-FU-HSIEN.

INGLE, James Addison: Missionary bishop of Han-lau, China; born in Frederick, Md., March 11, 1866; died in Han-kau, December 7, 1903. After his graduation from the University of Virginia in 1888 he studied for the ministry of the Protestant Episcopal Church at the Virginia Seminary in Alexandria. In 1889 he was appointed as missionary of the PE to China and was assigned to the charge of the important station at Han-kau in the province of Hu-pei. For ten years he worked here with great success and in 1902 was consecrated first bishop of Han-kau. During a period of less than two years he greatly strengthened the work of his Church in Central China. He gave special attention to the training of native clergy, catechists, and teachers, and through them, as well as through his staff of American clergy, was enabled to carry on a widely extended and very successful evangelistic work. He also greatly developed the boarding and day schools of his district and enlarged the service of the mission hospital.

INHAMBANE: A village and seaport in Portuguese East Africa, situated on the E. side of the bay of the same name, and about 220 miles N. E. of Lorenço Marques. Station of the SPG (1895), with 3 missionaries. Also outstation of the Free Methodist (American, 1885), with a day school. The original native pronunciation of the name is Inyambane, the name Inhambane being the Portuguese spelling of the African name.

INNER MISSIONS. See GERMAN INNER MISSIONS.

INTELLECTUAL UPLIFT BY MISSIONS: A few preliminary postulates must stand at the outset of even a brief discussion of this topic. Thus it is freely granted that in all mission lands other factors coming from without besides Christianity exert an intellectual influence upon the people; and it is often difficult to differentiate between the work done by missionaries and that accomplished by the Christian civilization which enters with them, or precedes their coming. Again, it is evident that thus far Protestant missions, which are alone being considered here, have been numerically but a small factor in the life of most non-Christian nations. Thus, in China, in 1900, there were some 140,000 Chinese to every Protestant missionary residing there, and the native Protestant counted only as one to about 400 of his countrymen. A third postulate has to do with the grades of society affected. As will be shown, the intellectual influence of missions varies largely with the original status of the people to whom missionaries are sent. Finally, it should be remembered that the very aim of missions differs from that of commerce or political conquest in that Christianity has as its sole object the salvation and uplifting of the community. The very nature of the system thus necessitates the elevation rather than the degradation of society. For the present purpose a threefold classification of mission lands will suffice to show the intellectual effects of missions upon non-Christian peoples.

1. The lower races, many of them savage, and the rest barbarous, have naturally been most extensively influenced on the intellectual side through missionary effort. The presence of the missionary and his belongings constitute an intellectual quickening. Before his ship reaches the land, if it happens to be an unvisited island of the South Seas, its appearance suggests that he came from heaven and was borne on the wings of the wind to these shores, and this gives rise to wonder. In more advanced countries, as soon as he lands, he is an object of intellectual curiosity. He brings with him the garb and furnishings of the Occident, many of them being new to the natives. In countries where there is no native press, gossip supplies his ideas to the masses, and his possessions and their use spreads through large regions and is everywhere the subject of remark and wonder.

2. His study of the language is a new impulse to discussion and thought. He asks questions concerning their native literature of which which never occurred to them. Other queries are raised by him which tax the knowledge of the wisest of savage peoples.

3. In those races where there is no written language, an unspeakable impulse to intellectual development is imparted through the introduction of the alphabet. In some 100 languages this wonder-working process has been wrought through the missionary; and from the New Hebrides, where the "talking chip" with its first printed literatures of a tribe or a nation, this intellectual influence is widened and strengthened. In this latter process, especially among the nations where there is already a rude form of written speech, the language is greatly enriched by new ideas and the more systematic use of an already existing tongue.

4. A concomitant of the two processes just mentioned is the enlistment from among the people of a body of the best educated men obtainable as evangelists and teachers. When mental culture becomes indigenous, it raises men to a position of intellectual predominance and awakens desires in the minds of multitudes of others. Even those who have never studied an hour feel the contagion of this transformation of a few.

5. Education is especially necessary to the program of missions among the lower races. In many cases it is the very first work of the sort ever attempted. So simple a matter as the use of a picture to enable the missionary to explain what is being taught those who are studying, raises the outlook far above their former position of mental sluggishness. Thus, on some of the great African lakes, when this process was first employed, it took much time for the older ones
to see a picture and only gradually were the dog, ox, etc., made out. While education in these countries is usually elementary, it is for that very reason more widely pervasive than in cultivated countries, since among the lowest races the only possibility for education is found in the mission-schools. Religion is the main aim, the elements of science are taught; and thus the crude philosophy of nature races, which has as its explanation the so-called superstitions of animism, fetishism, etc., is gradually displaced, and true knowledge for the first time shines its clear light on the masses.

6. The Bible, or those portions of it which are usually translated at an early stage of the enterprise, aside from its religious value, is, likewise, a very strong intellectual stimulus to the masses. Its varied contents, its practical doctrines affecting the daily life, and the portion of the earth which forms its background, are a help to breadth of view and a step toward international unity. Just as all western countries have the Bible as a common heritage, and as its institutions have in some degree influenced them, so an intellectual bond the Bible first unites savage or uncivilized tribes to a higher civilization.

7. The Christian books which are numerously prepared act upon the few as a strong motive to learn and to improve. Teaching the alphabet and simple reading is the key to religious truth, and thousands gain possession of the key who do not enter into the religious treasures which it was the primary purpose to open to them. They have, nevertheless, come to a position of intellectual enlightenment which would not have been brought to them from commercial or anti-religious sources.

8. In these countries of lower development it frequently happens that the missionary is the pioneer and abettor of commerce and trade. Elements of material culture, the portion of the fruitage of his efforts, and there can be no large development in this direction which is not at the same time a stimulus to the intellect. While it is true that there are dangers in this direction such as are seen in the cultivated countries of the old world, they do not so greatly affect peoples just emerging from the savage or barbarous state.

9. The stimulating intellectual forces above named are broadly scattered in this class of races. Comparatively few such races have had intensive work done among them, but the very fact that the missionary found them without a developed mind has made his presence a more marked factor in the national or tribal life.

11. The cultured races of the old world are, on the one hand, less open to the intellectual influence of missions than the races just named, while at the same time they furnish better material for development. Here, therefore, the work is more intensive than extensive in its character, considering the amount done by a single missionary.

1. The missionary brings not merely a new religion to these peoples, but also new theories of life which constitute the basis of enlarged intellectuality. The discussion between a missionary and a Brahman in India, or between representatives of Christianity and Buddhism in Japan quickens the thought of hundreds of onlookers who carry away with them the main arguments of the disputants. These are in turn talked over by new groups of interested listeners. Moreover, a prominent theory which the missionary is likely to defend is that of the necessity for knowledge on the part of every believer of the new religion. This gives the first impulse to the education of women, and imprints or strengthens the desire to learn in many from lower walks in life.

2. A new science brought to such nations and empires frequently occasions a revolution in prevailing theories. China's literati have been astounded, tho not outwardly manifesting interest, at the possible explanation of an eclipse or the arguments adduced to prove the rotundity of the earth. One remembers what a revolution it caused in the minds of those boys who constituted Dr. Duff's first school in India, when he gave them their first lesson in English based upon the unimportant word O-X. Upon those simplest letters of the English alphabet he hung truths which burst in a moment the bonds of ignorance. Superstition must always abound until a true philosophy of the external world is made known to a people, and the simpler explanations of its phenomena often fly with great rapidity from lip to lip.

3. Missionaries have also carried into this class of countries new means of intercommunication. Their languages had hitherto been committed to writing and a considerable literature may have existed, the missionaries introducing ready impartment of ideas through the publication of periodical literature and interesting tracts and books. Thus the Christian Literature Society of India, through its present and earlier organization, has stimulated Hindu to similarly impact the idea of progress. Almost the sole influence in the earlier history of missions in China, India and Japan, leading to the rapid development of native periodical literature, came from the work of missions.

4. Such literary efforts, however, cannot long be carried on without the production of a reformed language. Just as the New Testament in the early Christian Church enriched the classical Greek, and as the literary efforts of Dante affected Italy, and Luther's translation of the German Bible enriched that tongue, so to-day China is coming into the possession of a form of the Mandarin which is hardly conceivable, had there been no missionaries in that country. The same is true in all lands of this class, since before the coming of the missionary there has been an aristocracy of letters which selfishly kept to itself a monopoly of learning, with the result that the language was far above the comprehension of the ordinary people.

5. The more rational method of teaching, and the scientific material brought to these nations through the schools established, have been an impetus to education. Intellectual and material improvements the result of the missionaries' stimulus which compelled them in self-defense to establish schools in great numbers. While in India the government has aided native schools, it has done it largely through missionaries, both by encouraging them to enter the work and by its grants-in-aid. It is to be remembered also that in such an empire as Japan the educational system owes more to a missionary, Dr. Verbeck, and to Joseph Neesima, a native apostle of Christian education, than to almost any other source, the Mr. Fukuzawa, adored by the Prussian, etc. In the last ten years the Government assumed the guidance and expense of educational reform.
6. Only through missions have the lowly and despised classes in the community been touched intellectually through education. In Mohammedan countries, as well as in great empires like India and China, women and girls have not hitherto been considered as fit subjects for intellectual culture. The Christian school aims to reach the intellectual and spiritual status of the society to which it can do the most good, and in Mohammedan countries the educated men and girls are the product almost wholly of missionary schools.

III. There is a question in the minds of many authorities regarding the wisdom of conducting Protestant missionary work in nominally Christian lands, most of them Papal countries, missions do exist among such peoples. Here the intellectual contribution of missions is naturally less marked than in the two classes previously named.

1. The representative of Protestantism who comes in contact with a perverted or less developed form of Christianity must naturally spend much of his time in discussion. He must give a raison d’être for his presentation of Protestantism. His arguments are often keenly intellectual, and even where they are not well educated they strongly present the claims of their ancestral faith. Listeners are keenly alert and their thought processes are quickened as never before by the arguments adduced.

2. The stimulus coming to the native press through the publication of Protestant literature in those countries is helpful to all. Even in the shadow of the Vatican, where the Scriptures are now being published, in periodicals and in the vernacular, at a lower rate and under Papal sanction, it is hardly probable that it would have been done were it not for the strong Methodist work carried on in the Holy City. In South America and Mexico it has been especially true that Protestantism has imparted a wide stimulus to the thought of the people.

3. Mission schools in Papal lands have been an unexpected help to education, particularly in Latin America. The work done in St. Paolo, Brazil, has influenced education in that extensive republic, and in less degree other institutions in South America. Mexico, Austria and Spain have been an intellectual blessing to the people. Probably nothing in the latter country has been so helpful as an object lesson as the Institute for Girls under the charge of the late Mrs. Alice Gordon Gulick.

4. The stimulus efforts in these lands have developed a native leadership of wide influence. Diaz in Cuba is an illustration of many who in Latin America and in the Philippines have come to a position, not only of religious influence, but of intellectual power.

IV. While the illustrations of the positions above taken will indicate the extent to which tribes and nations are indebted to the intellectual uplift of missions.

1. A few instances are adduced of communities which have been most thoroughly leavened by the Gospel and its accompanying intellectual life. The Hawaiian Islands, now a part of the United States, are both intellectually and spiritually the product of the American Board’s work. Schools were quite as much emphasized as in New England, and they became the foundation of the modern Hawaiian society and the stepping-stone to their present political position. The Fiji Islands, which in the childhood of many now living were without missionaries and the abodes of cannibal cruelty, are not only the banner country of the world in the matter of church-going, but in 1901 the Wesleyans alone had 1,473 schools, accommodating 28,491 scholars. At that time the entire population of the colony was only 11,401. The more than 150,000 school children in the entire number of inhabitants were studying in the schools of one Protestant missionary society. The Karens in Burma are another illustration of a despised race, hardly deemed worthy of an education, who, through the efforts of the American Baptist Missionary Union, were brought to an intellectual and spiritual condition which is most remarkable, the Karen schools of the Union having in 1901 some 13,049 scholars. Uganda, too, in the very heart of Africa, owes its marvelous intellectual progress of the past few years to the educational labors of the London Missionary Society. An even stronger illustration is derivable from the history of missions in Madagascar, where, until recent times, the representatives of the London Missionary Society have been almost the sole educators of the entire people.

2. Figures may give a better view than the above illustrations of what is actually being accomplished in intellectual lines through Protestant missions. Beach’s Geography and Atlas of Protestant Missions, the determination of which, mainly those of 1906, gives the number of educational institutions conducted by Protestant missions as 24,728, in which there were 1,127,853 pupils or students. This included instruction in a variety of educational institutions, from the undergraduate to the primary school. Dr. Dennis’ Centennial Survey of Foreign Missions, which gives the condition at the end of 1899, states that the entire Bible had been translated by missionaries into 99 languages or dialects, while the entire New Testament had been rendered into 122 additional editions. The Portraits of the Bible had been translated into 236 other tongues, making the total number of missionary versions of a part or all of the Bible, 450. There were, according to the same authority, 159 mission publishing houses and printing presses, with an output for the year reported of 381,104,458 pages. This included 379 periodicals published by the missionaries, which were general or religious in character. One can imagine the intellectual as well as the spiritual value of such a record as the above. It does not suggest, however, the intellectual stimulus imparted, which can best be realized by a comparison of sections of the same country or tribe, which have been reached by missions, with other portions not so touched. In Burma, the Karens, who are intellectually below the Burmans, have been so benefited by the mental and religious instruction received that they now outstrip in many respects their naturally stronger neighbors. The same is, to a less degree, true of certain low castes in Northern India, who, through teaching, have become the peers of those several degrees higher in the social scale. In China, the late viceroy, Li Hung-chang, applied to a Christian educational institution for all its graduates, promising to permit them to observe Sunday, the living in a Sabbathless land. These men are from the lower ranks in life who were desired merely because of their intellectual attainments, and were thus preferred to native scholars possessing
high degrees. Christianity has in mission countries been especially a quickener of thought, so that the traditions of ages or generations are replaced with the science of the West, and lives have been changed to correspond with this new light.

INTERNATIONAL MEDICAL MISSIONARY AND BENEVOLENT ASSOCIATION (Battle Creek, Mich., 1893): While this Association is denominationally connected with the Seventh Day Adventists, its work is not sectarian. The object for which it was formed was to "erect and manage homes for orphan children and for friendless aged persons; hospitals and sanatoriums for the sick poor and others; to establish dispensaries and medical missions at home and abroad; to provide visiting nurses; to educate missionary physicians and nurses; to provide for the needy poor, and to promulgate the principles of health and temperance."

INTERNATIONAL MEDICAL MISSIONARY SOCIETY (New York, 1881): In the spring of 1881 a meeting was held at the house of Dr. T. A. Sabine, New York City, to consider the formation of an organization similar to the Edinburgh Medical Missionary Association. Six persons were present: the Rev. Wm. M. Taylor, D.D., three physicians, one lawyer, and a business man. Geo. D. Kowkott, M. D., explained the character, scope and aim of the proposed work, and it was at once decided to organize a society to aid and train candidates, of either sex, for service as medical missionaries under any evangelical missionary society. The society thus organized has since then served all sections of the Christian Church under a strictly inter-denominational constitution.

In the original undertaking of the Society, the generosity of an individual has enabled it to establish a "Place of Rest" for missionaries and other Christian workers, together with a summer training school for missionary candidates. The seat of the Society and its home for medical students is at Niagara Falls, but the Place of Rest and summer school are on the property belonging to the Society at Goshen, Mass., a summer resort 1,500 feet above sea level.

The aid given to medical students who are preparing for missionary service is based upon the plan of aiding for last bills only, after the student and his family or friends have done what they can for his support. Since the organization of the Society nearly 150 medical students whom it has aided have been sent to the foreign field by various missionary societies, and its former students are now laboring in the field in India, Cuba, Brazil, China, and the New Hebrides.

INTERNATIONAL MISSIONARY UNION (1884): The founder of this unique organization was the Rev. J. T. Gracey, D.D., of Rochester, N. Y. After assisting at a series of missionary meetings at the campground at Niagara Falls, Ont., where he had stipulated that all the speakers should be missionaries, he conceived the idea of an organization of missionaries of all denominations who should come together once a year to talk over the varied phases of their work, compare notes, and profit by one another's successes or failures. The project was laid before an assembly of missionaries who were on furlough, and met with an enthusiastic response. A simple constitution was drawn up, and the title, "International Missionary Union," was given to the new organization. Foreign missionaries of both sexes, of any evangelical denomination, are eligible for membership, whether on the active or retired list, as well as all missionaries under appointment. The sole condition of membership is that the missionary must be in good standing with his Board.

The entire dues of the members consist of an initial fee of fifty cents; there are no yearly dues.

In 1896 the Union had grown so rapidly that it became necessary to organize more fully, and a subscription list was established. It was composed of 200 members, consisting of a president, vice-president, secretary, treasurer, and librarian, with a board of control and an executive committee appointed to act as occasion may require.

For several years the annual meetings of the Union were held at different places, but in 1899 Dr. Henry Foster, of the Clifton Spring Sanitarium, Clifton Springs, N. Y., suggested that thereafter all the annual meetings of the Association should be held at that place, offering free entertainment to all members of the Union during the week of the annual session. This generous offer was accepted, and the following year Dr. Foster erected a beautiful and commodious tabernacle on the sanitarium grounds for the use of the Union so long as it should hold its meetings at Clifton Springs.

With an initial membership of forty, the Union now has over 1,200 members. In 1902 many young men and women under appointment to the foreign missions field were present. Consequently, special classes were held for them, and opportunities arranged for them to confer with experienced missionaries from the fields to which they were going. This proved so valuable that it is now to be made a permanent feature of the annual meetings of the Union. These annual meetings are held for one week, beginning the first Wednesday in June. The Union has no income; a collection is taken on the one Sunday of the week when it is in session, to defray the expense of the publication of the annual report, the International Missionary Index, and of notices, etc.

INTERNATIONAL SERVICE OF MISSIONS: Missions were not established to promote diplomatic amenities or aid backward nations in assuming international functions. They have severally accomplished their intended objects incidentally in these directions by forging connecting links of contact and intercourse, cultivating good will, solving difficulties, giving friendly advice, facilitating acquaintance with Western administrative systems, mediating between foreign diplomats and native misunderstandings, encouraging that status of mutual confidence which promotes
peaceful relationships, and often ministering as the almoners of international philanthropy in times of calamity and distress. If these statements are well founded, missions are proving themselves to be among those evolutionary forces which work for the kindly recognition of mutual obligation in the universal nature of mankind.

Illustrations of this can be discovered not only in modern times, but in the history of missions during earlier centuries. It is the missionary, quite as much as the political or commercial motive, which seems to assert itself in many of those initial ventures which have led on to the exploration of an unknown world, and the making and molding of new nations. The apostolic age of the Church was international in the expansiveness of its evangelistic aims, and in the scope of its missionary activities. Subsequent centuries bear witness to the outreachening touch of Christianity, bringing nation into contact with nation. The Nestorians pushed boldly into China as early as the 7th century, and into India probably at a date still earlier, following Pantaenus, who had preceded them in the latter part of the 2d century. Ulfils was a messenger to the Goths in the 4th century, and to the Slavs in the 9th. In Central and Northern Europe, including the British Isles, we can trace the entrance of Columba, Augustine, Columbanus, Gallus, Eligius, Boniface, Willibrord, Anseg, and many others equally zealous the less conspicuous in the annals of those formative centuries. Raps Egede linked Denmark with Greenland in the 18th century. The Moravian missionaries followed, and from that time Herrnhut became an active factor in the international contact of the world. Labrador was reached by Jens Haven in 1765; Francis Xavier linked Portugal with India in the 16th century; Heurnius was a connecting bond between Holland and the Dutch East Indies in the 17th century; and in the 18th century Ziegenbalg, Plutschau, and Schwartz brought Denmark into spiritual relations with India. These were all international messengers upon an errand of peace, good will, and friendship.

The maritime discoveries of the 15th century were undertaken, among other motives, with a definite and pronounced missionary purpose. That ponderous work entitled The Jesuit Relations and Allied Documents reveals the immense and prolonged contributions of Roman Catholic missionaries toward the establishment of international intercourse between France and America for nearly two hundred years. The footsteps of those indefatigable missionary pioneers can be traced during the 17th century along the shores of the Great Lakes, and on both sides of the Great Lakes, on into the Far West. They deflect southward into Maine, into Illinois, and even as far as Louisiana, and penetrate northward toward the inhospitable, icy wilderness of Hudson Bay. The British colonial establishments in North America, moreover, were missionary in spirit to an extent which makes them almost the forerunners of the foreign missionary societies of a later age. Their charters usually had a strong missionary clause, and their noblest men were Christian pioneers as well as statesmen. They sought not only religious liberty and opportunity for themselves, but they were driven by conscious instances intent upon the dissemination of the Gospel among the aborigines. In the first Charter of Virginia, given by James I., in April, 1606, it was stipulated that "the Word and service of God be preached, planted, and used as well in said colonies, as also as much as might be among the savages bordering among them." In a letter to Sir Walter Raleigh, referring to the project of the Virginia colony, Hakluyt writes expressing his pleasure in Raleigh's plans, because "you meane to send some such good Churchmen thither (to Virginia) as may truly say with the Apostles to the Savages, wee seke not yours but you." Bradford declared the propagation of the Gospel of the Kingdom of Christ as one of the great hopes of his pilgrimage. Winthrop confessed to the same motive, and in his journal are numerous references to his desires for the conversion of the aborigines. The Charter of Massachusetts Colony emphasizes the missionary motive as one of the inspirations which prompted its establishment. Macdonald's Select Charters and Other Documents Illustrative of American History, 1606-1755 (Pages 2, 3, 16, 25, 42, 126, and 184), gives the text of some of these chartered asseverations of missionary aims in our early colonial history.

These mighty tides of spiritual interest which now link Christian communions on every continent, have been the outcome of missions. In their own sphere of moral and religious influence missionaries have cooperated with English statesmen, and rendered a service of value both to Great Britain and to India. The strange and unwarranted attitude of the old East India Company toward missionary effort has long ago changed, and the value of missions to British interests in India is now freely recognized. Since the days of the mutiny it has become more and more apparent that a native Christian community is a valuable ally of English rule, and, so far as its influence goes, a moral guarantee of fidelity and good will. The sailing of Captain James Wilson and thirty-six missionaries in the Duff, which was owned and sent out by the London Missionary Society in 1796, opened the South Pacific to those largesses of light and civilization which missionary effort has sent there during the past century. The west coast of Africa first felt the touch of Christian sympathy and helpfulness when Peter Greig, the Scotch missionary, went there in 1797. The cooperation of the Church Missionary Society, the Wesleyan Missionary Society, and the United Presbyterian Church, has contributed in no small measure to the opening up of the vast regions of the Niger Basin, and has been a factor in furthering the present political supremacy of Great Britain throughout Nigeria. The marvelous story of African colonization during the 19th century is indebted by linked with missionary devotion and achievement. Such names as Vanderkemp, Philip, Krapf, Rebmann, Moffat, John Mackenzie, Livingstone, and Bishop Mackenzie of the Zambes, as well as many others later in the century, certify to the truth of this statement. We may almost reckon the Uganda Protectorate as virtually the outcome of missions, with that colossal achievement of a railway from Mombasa to the Victoria Nyanza as a necessary result. Khama's country, and the whole of British Central Africa, including the upper waters of the Zambezi, where there is a considerable missionary enterprise, is being cleared out in order to illustrate a national value in missionary enterprise.

Turning to China, we find Morrison and Gutz-
laff, the former in the double capacity of missionary and interpreter for the East India Company, serving in international affairs before its formal opening to the foreigner. The Rev. E. C. Bridgman and Dr. Peter Parker were associated with the Hon. Caleb Cushing in negotiating the first treaty which the United States made with China, in which they were in the employ of the foreigners of the Chinese language, familiar with the customs of the country, and acceptable media of communication. The aid which they rendered was extremely useful. Mr. Cushing declared that "they were invaluable assistance to me in the early British negotiations that Morrison and Gutzlaff rendered a similar service. The former was associated with Lord Amberst in 1816, being for some years interpreter and secretary to the British Ambassador, and Gutzlaff was his successor in the same position. When the Treaty of Nanking was in process, the latter participated in the negotiations and rendered important aid. It would thus appear that the initial word of friendly diplomatic intercourse between China and two great governments of the West was spoken through the medium of missionary secretaries and interpreters.

A few years later, in 1858, when the notable Treaties of Tientsin between the four governments of the United States, Great Britain, France, and Russia were drawn up with China, in the case of the United States treaty two American missionaries whose services in the negotiations were of historic importance and value were associated with the Hon. W. B. Reed, the minister who represented the United States on that occasion. Dr. S. Wells Williams and Dr. W. A. P. Martin, both of whom residing in China, took an active part in the preliminary conference, and in fixing the provisions of the document, as well as securing its acceptance. It was due to Dr. Williams that the memorable Toleration Clause, afterward included substantially in the British treaty, was inserted in the latter contract. This clause is due the credit of securing a treaty incorporating the policy of a tolerant recognition of Christianity on the part of the Chinese Government. Dr. Williams was given to understand at the time that the Toleration Clause would have been inserted in the British treaty had it been left out in the American. This concession had not been before included in formal treaties, although the French Minister, in 1844, had secured from the Emperor, Tao-kwang, an imperial rescript revoking persecuting orders, and proclaiming an edict of toleration. This, however, was practically a dead letter, and would have been of little value so far as any permanent international policy was concerned. It should be remarked, also, that the British missionaries at Ning-po and Shanghai had addressed Lord Elgin on the subject of toleration before the British treaty was drawn up, but, judging from his reply, the appeal was of little avail. The treaty concession of Tientsin may, therefore, be called the Magna Charta of religious freedom in China. Dr. Williams, and in a measure Dr. Martin also, were its sponsors, and thus to American missionaries belongs the high honor of establishing the principle of religious freedom in a permanent historical setting, before the view of "almost the two halves of the human race." Dr. Williams was subsequently appointed to the office of Secretary and Interpreter of the United States Legation in China, and served in this capacity—chiefly at Peking—until his resignation in 1876. It was he who secured official quarters for the United States ambassadors in Peking, and his efficient executive discharge of his duties was an important service during those early years of ministerial residence at the Chinese capital. He was, on many occasions, left in charge of the legation as acting minister.

Another Presbyterian missionary, the Rev. D. B. McCartee, M.D., had a long and useful career in diplomatic positions both in China and Japan. He accompanied Flag Officer Stribling, of the American Navy, on an expedition to treat with the rebels at Nanking at the time of the Taiping troubles, and through his personal influence with the Chinese leaders he was largely instrumental in securing a "sealed guarantee of protection for all Americans against violence from the rebels, and for all natives in the employ or care of American citizens." In connection with his services in the Mixed Court in Shanghai, in 1872, he was appointed on a special mission to Japan to treat for the return of three hundred Chinese coolies who had been driven on the Peruvian vessel, Maria Laz, by a typhoon into the harbor of Yokohama. The Chinese authorities presented him with a gold medal and a complimentary letter in recognition of the successful issue of the mission. He subsequently became professor of law and of natural science at the University of Japan, and acted as consul's assistant.

In those memorable negotiations which signaled the entrance of modern Japan into the comity of nations, at the time of Commodore Perry's expedition, we find Dr. S. Wells Williams accompanying, at the special request of the Commodore, both of his first and second expeditions, in 1853 and 1854. He took an active and influential part in the negotiations, and it was at his suggestion that the "most favored nation clause" was introduced into the Japanese treaty, the first compact of Japan with Western nations. His serious and vivid appreciation of the historic significance of his diplomatic services appears in private letters and extracts from his journal. He writes of the scene in the Bay of Yedo: "It was the meeting of the East and the West, the circling of the world's intercourse, the beginning of American interference in Asia, putting the key in the door of Japanese seclusion." Speaking of the presence of the American ships, he writes: "Behind them and through them lie God's purpose of making known the Gospel to all nations, and bringing its moral and religious possibilities to this people, which has had only a sad travesty of the truth as it is in Christ Jesus. I have a full conviction that the seclusion policy of the nations of Eastern Asia is not according to God's plan of mercy to these peoples. Only true missionary diplomacy, with its faith and foresight, was an instrument chosen of God to participate in those momentous events which
inaugurated the opening of both China and Japan to an era of modern progress destined to be the most significant; in 1853, in observance of a national memorial monument to Commodore Perry erected in 1901 on the shores of Japan was an appropriate and graceful tribute, but the services of Dr. Williams most assuredly deserve also a grateful commemoration on the part of Christendom. The services of several distinguished missionaries in Japan have been of international import.

Dr. Guido F. Verbeck and Dr. S. R. Brown were especially useful and helpful to the Japanese during the critical period of the reorganization of their national life, since the introduction of those monumental changes which have characterized the Meiji era of modern times. Dr. Verbeck suggested the plan of the now historic embassy sent by the Japanese Government to America and Europe in 1871, and the project was finally executed, in large part under his advice and cooperation. Its results proved to be of decisive influence in permanently establishing the friendly relations of Japan with the nations of Christendom, and was a factor of practical moment in securing that religious toleration which has distinguished the Empire of Japan in the modern history of the East. It is a matter of further interest that the recent revision of Japanese treaties, which has established a basis of equality with Western nations since July, 1899, has been both favored and facilitated by resident missionaries out of a sense of justice and fairness to Japan. Many manifestations, resolutions, and public meetings, as well as by private influence, they have made it known that they regarded the aspirations of Japan in this matter with sympathy and favor.

The diplomatic relations of the United States with Korea have been also facilitated by the services of Dr. Horace N. Allen, who was the first American missionary to arrive in Korea. He went there in 1844, and was soon appointed physician to the Court. He subsequently, in 1857, accompanied the first Korean Embassy to Washington as its secretary, returning to Seoul in 1890 as secretary of the United States Legation. In 1897 he was appointed United States Minister to Korea, a position which he still (1904) occupies.

The United States have the treaty relations of Christian nations with the great Asiatic governments of China and Japan been facilitated by missionary cooperation, but diplomatic negotiations with smaller tribes and kingdoms—especially in Oceania—have received aid from the same source. Missionaries have often prepared the way for the establishment of such international ties by initial intercourse and friendly residence, thus becoming pioneer media of information and contact. A capital illustration of this is New Guinea, where Chalmers and Lawes, and other missionaries of the Church of England, became the forerunners of the present British protectorate. The services they rendered in anticipation of the British occupation of Southern New Guinea, in 1884, have been cordially acknowledged by Sir James E.as and Sir Cyprian Bridge, both high officers in the British service. In the missionary labors in New Zealand brought Maori hearts into touch with Christianity and civilization to an extent which no doubt greatly facilitated its peaceful political attachment to the British Empire. The earliest mission was especially successful among the Ngapuhi tribe, and it was the chiefs of this important and powerful clan who, in February, 1849, at Waitangi Falls, were the first signers of the great exception to British, supremacy. Nearly two-thirds of the entire Maori population had professed Christianity in 1859. Marsden, as early as 1814, and Selwyn, later, were all unconsciously pioneer empire-builders in New Zealand. The peaceful, and cordial, ceding of Fiji to Great Britain by its chiefs and people, in 1874, followed in the wake of successful missionary toil by the English Wesleyans, resulting in a marvelous preoccupation of native hearts throughout the islands by the Gospel which the Wesleyans brought. A British protectorate was established over the Tonga group by treaty with the chiefs in 1874, followed before that English missionaries had labored there in friendly contact with that proud and vigorous race. The Samoan Islands, now portioned out between Germany and the United States, were annexed to Christianity half a century or more before their political destiny was determined. The Cook, or Hervey, Islands were Christianized and civilized by the London Missionary Society over a generation before the British protectorate was established, in 1888. As early as 1864 the natives of New Zealand desired Great Britain for annexation, but a protectorate only was instituted in 1888, which at the request, again repeated, of the native chiefs was changed to annexation to New Zealand in 1900. Thus a reclaimed race was made ready by missions for relations of peaceful diplomacy with a great nation of Christendom. The Santa Cruz group—now a part of the British Empire—was the scene of the martyrdom of Young and Nobbs, in 1864, and of John Coleridge Patteson, in 1871. Thousands of hearts throughout Christendom have read the story with tender interest, and some day no doubt a fitting memorial of Patteson will commemorate under the British flag that pathetic incident which, as Gladstone said of Patteson himself, was a "pledge of nobler destinies."

The virtual preemption of the New Hebrides, as destined in all probability to have their political future linked with the British Empire, may be regarded as the outcome of a missionary occupation which has been sealed by martyrdom, and crowned by the uplifting transformation of savage tribes into aspirants for political order and moral civilization. In 1820 two English missionaries—Ward and Burton—endeavored to secure a foothold in Sumatra among the fierce Battaks, but were unable to do so. In 1832 two American missionaries—Munson and Lyman—made another attempt, but were martyred by cannibals. Thirty years later a third endeavor, on the part of the Rhenish Society, was successful, and a region in North Sumatra, previously wholly inaccessible to the white man, was opened by a peaceful missionary occupation. From this martyr seed has sprung a Christian population of some fifty thousand native Battaks now living in a state of peace and good order which promises a developed civilization. The Dutch Government in the East Indies is surely a debtor for the missionary labors of the Rhenish Society.

Hawaii, now United States territory, was largely molded and fashioned for her destiny by missionary pioneers whose labors have assumed an importance which may fairly be regarded as of international interest. During the whole of the 19th century, while by the irresistible growth of
economic and political ties, and the manifest trend of history, it belonged in posse to the United States to assume the responsibility for the fitting summation when it would become so in esse. Ex-Secretary of State the Hon. John W. Foster, in his admirable volume, *American Diplomacy in the Orient* (page 108), places a high estimate upon the beneficial effects, social and political, of American missions in Hawaii. There are other groups whose political destiny is now linked with European nations—the Gilbert Islands, with Great Britain, and the Marshall and Caroline, with Germany—which have long been under the careful training of missionary teachers from America. Whatever opinion may be held of the political wisdom of the occupation of the Philippines by the United States, there is no valid reason to doubt that beneficent results are most assuredly to follow in those islands from this foreign occupation. The recognition of missionary bipedation on the part of Christianty is, moreover, a strenuous and clearly manifest result, which, let us hope, will be fruitful in moral good and social betterment to the people of the islands.

Not only in connection with diplomacy, but in time of war and public calamity, the services of missionaries have been of benefit. During the mutinies and uprisings in Uganda they served in defense of life and property. At the siege of Peking the conspicuous and brilliant services of missionaries in defense of the Legations during the persecution of the Chinese has been universally acknowledged. The successful issue was due in no small measure to the skilful and heroic participation of missionaries in that victorious defense. Not only were the lives of the ambassadors saved, but consequences were averted which might have precipitated unparalleled calamities. There is a manifest international value, moreover, attaching to the efforts of missionaries in the sphere of philanthropy. In times of famine, earthquake, epidemics, and great disasters, sympathy and help are given by the funds administered. That international scourge and scandal of the slave trade has been checked and all but abolished largely through the helpful cooperation of missionaries. In the promotion and establishment of peace among the nations there is also an unusual war value for the service and influence of missionaries. They neither strive nor cry, nor is their voice heard in the streets, nor have they the power of diplomats or rulers to determine issues, but they, nevertheless, do a quiet and often effective and unique service of counsel, conciliation and restraint. The work that they do in promoting good government is, moreover, in the interests of peace. Mission converts are men of peace, not the advocates of massacre and disorder. They are inclined to friendliness and forbearance rather than to treachery and violence, and the face of Oriental perils they may at times safeguard, as hardly any other agency can do, both the lives and property of foreigners. The Moravians in their work in Dutch Guiana, during the latter half of the 18th century, and until the middle of the 19th, achieved a victory over the Bush Negroes which was a boon to the Dutch Government.

The work of early missionaries in South Africa was an influential factor in solving native problems and promoting their peaceful solution. In times of disorder and massacre in the Turkish Empire they have acted as mediators, pacifi-

cators, and saviors of lives and property, as in Mount Lebanon during the troubles of 1860, in Bulgaria in 1876-77, and Asiatic Turkey in 1895-96.

The exposition and accentuation of the principles of international law have also been a feature of missionary service. Verbeck did important preliminary work in this direction in Japan, and Martin in China. When the latter went to reside in Peking in 1863 he carried with him a translation into Chinese of Wheaton's *Elements of International Law*. This was welcomed by the Chinese Foreign Office as a timely guide amid the perplexities arising out of the new international compacts into which they had just entered. Dr. Martin supplemented the above translation by Chinese versions of Woolsey, Bluntschli, and Hall, on international relations. Chalmers taught the very alphabet of the law of nations to the natives of New Guinea, and in 1899 Secretary Wardlaw Thompson, of the London Missionary Society, reported the curious fact that Mr. Abel, one of their missionaries in New Guinea, was instructing the people, and especially the school children, "to repeat a brief statement of the British laws which has been prepared for the benefit of all the inhabitants of New Guinea. These simple rules of conduct are learned as the commandments are learned, and thus law and order are associated with religion." It is certainly a novel feature of education and of religious worship to associate the commandments, the care, and the laws of the nation, in an all-round summary of human duty. Here seems to be an admirable hint for the reformer and the earnest advocate of higher standards of citizenship.

The immensely effective and beneficial influence of Christianity in evolving throughout Christendom that remarkable code of national chivalry—voluntary in its sovereignty and sacred in its dignity—which we have come to designate as international law, has been perpetuated and extended among Asiatic and other foreign peoples largely by the initiative of missionary teachers and statesmen. They have sought to introduce the humane provisions of the code in times of war, and they have secured also, among many savage tribes, the practical recognition of another benefit of all the inhabitants of British Guiana. On the other hand, missionaries have not been unmoved spectators of infractions or dubious applications of the international code by Western powers in their contact with Oriental nations. The missionary protest in the face of some notable lapses in these respects, especially in China, has been vigorous and uncompromising.

On the subject of opium the missionary body is a unit, and this is substantially true of their opposition to the territorial dismemberment of the Chinese Empire.

It would thus appear that the messenger of the Gospel in mission lands has long been assigned an international rôle—not, to be sure, in any formal or official capacity, but as contributing incidentally, and sometimes unconsciously, to the sum total of good-will and friendship among the nations, the natives a victory over the Bush Negroes which was a boon to the Dutch Government.

The work of early missionaries in South Africa was an influential factor in solving native problems and promoting their peaceful solution. In times of disorder and massacre in the Turkish Empire they have acted as mediators, pacifi-
diplomatic relations, and aided in establishing peaceful and mutually beneficial ties between the nations. This remarkable service, it may be noted, has been coincident with monumental changes in world-politics and with ethnic intercourse brought about by discovery, colonization, and commercial enterprise. Missionary expansion has thus given a certain impetus, as well as kindly tone, to that interchange of intellectual, spiritual, and material commodities which has become the unique glory of our age, and is leading on as much as any other single influence to the goal of universal peace and unity. Imperialism—the irrepressible note of the age—is given an ethical significance, and directed toward a sublime ideal, by this international leaven of missions. Paul's conception of the relationship of superior to inferior races has hardly been taken seriously among the nations. That great missionary-apostle and statesman regarded himself as "debtor" even to the barbarians—an aspect of inter-racial obligation which has been to a surprising extent a negligible consideration in the diplomatic intercourse of the nations. The spirit of missions, however, like a voice crying in the wilderness, has not been forgotten. A missionary's kindness, he sought diligently to promote kindly consideration, good will, and fair dealing, and has endeavored faithfully to exemplify them in its own sphere.

**INYATI:** A settlement in Rhodesia, South Central Africa, situated among Matabele tribes, about 150 miles of Bulawayo. Station of the LMS (1860), with (1903) 1 missionary, 4 native workers, 4 day schools, and 639 professed Christians, of whom 60 are communicants.

**IPOLI:** A village on the Malay Peninsula, situated on the Kintah River in the state or district of Perak. The climate is healthy. Station of the ME, with (1900) 2 missionaries, 1 missionary's wife, 11 native workers, men and women; 2 outstations, 2 day schools, 2 boarding schools, and 287 professed Christians. The work in this place is chiefly among the Chinese, but it also reaches the Hindu coolies, and, what is of considerable importance in such a mission field, it reaches the English. The paper in the villages, with occasional example, counts for much with the natives. The BFBS furnishes the ME funds for employing a colporteur and 2 Bible women in this district.

**IPOLELA:** A village in Natal, S. Africa, situated 46 miles W. by S. of Pietermaritzburg. Station of the SPG (1874), with (1903) 1 missionary and 400 professed Christians, of whom 220 are communicants.

**IQUIQUE:** A seaport town in Chile, S. America, situated on the west coast. It is an export center for the nitrate trade. Water is very scarce in the neighborhood. Population (1895), 33,031, and January, 1902 (estimated), 42,498. Station of the ME, with (1903) 4 missionaries and their wives, 2 outstations, 2 Sabbath schools, 1 boarding school, 1 Seamen's Bethel, and 342 professed Christians. Station also of the SDA.

**IRELAND:** Presbyterian Church in. See Presbytery Church in.

**IRELAND, William B.:** Born near Oswestry, Shropshire, England, December 21, 1821; graduated at Illinois College 1845, Andover Theological Seminary 1848; ordained the September following; sailed as a missionary of the ABCFM for Africa, October 14, 1848, being stationed at Infuni in Natal. In 1855 he was appointed by the mission to take charge of the boys' seminary at Amanzimtotse, and for seventeen years he devoted his heart and strength to its welfare. But his impaired health prevented his bearing the burden of so responsible a work. He occupied a large place in the mission, and in the affections of the Zulus and of all who knew him. He died in Boston, October 12, 1885.

**IROD: See Enope.**

**IRUNGALUR:** A town in the Presidency of Madras, India, situated to the N. of the Coleroon branch of the Cavury River and about 12 miles N. of Trichinopoly. It was a stronghold of the Jesuits, who came there in the 15th century, and had influence enough to prevent Schwartz, the early Halle missionary, from being allowed to reach there. In 1830 some 18 neglected congregations of the descendants of the early converts of the Jesuits put themselves under the care of an SPG missionary. The place has been occupied by the SPG since that time, with (1903) 62 native workers, men and women; 17 places of worship, 15 day schools, and 231 professed Christians, of whom 69 are communicants.

**IRWIN HILL:** A village on the northern side of the island of Jamaica, West Indies, pleasantly situated on a slight ridge about 4 miles from Montego Bay. Mission station of the Moravians (1828), at present in charge of native workers.

**ISABEL ISLAND LANGUAGE.** See Booru.

**ISPHAHAN: See ISPHAHAN.**

**ISHL-HSGH.- See ISHL-HSGH: Town in the S. of the province of Shansi, China, situated about 20 miles N. W. of Ki'ai-chau. Station of the CIM (1891), with 6 missionaries, men and women, who (1903) reorganized the work broken up by the Boxer uprising.

**ISMID. See NICOMEDIA.**

**ISOAVINA:** A town and district in Madagascar, situated about 11 miles E. of Antananarivo. Station of the LMS (1867), with (1903) 1 missionary and 65 native workers, men and women; 30 day schools, and 4,157 professed Christians, of whom 1,319 are communicants.

**ISOTRY: A ward in the city of Antananarivo, Madagascar, and a missionary district connected with the church in that ward, under the LMS. It now has 11 native workers, 20 day schools, and 488 professing Christians, of whom 238 are communicants.

**ISPHAHAN:** A city of Persia, 226 miles south of Teheran, on the Zenderud River. It was formerly capital of the Empire and a great center of trade, especially with Baghdad. It has never recovered from the Afghan invasion of 1722. Like many Oriental cities, large sections of it are deserted, the people finding it cheaper and easier to remove than to rebuild. The population, estimated at 80,000, is mostly Persian; the others are about 13,000 Jews and some Kurds. Connected with the city by bridges across the river is the suburb of Julfa, which is the real center of missionary work for Isphahan. Isphahan is the residence of the Anglican bishop, and CMS missionaries from Julfa keep a dispensary for the London Jewish Society (1847), with (1902) 1 missionary, 5 native workers, 2 day schools, 1 industrial school.
ITARSI: A town and railway junction in the Central Provinces. It is situated in the district of Hoshangabad, about 10 miles S. of the town of that name. Station of the FFMA (1893), with (1901) 1 missionary and his wife, 1 dispensary, and 2 day schools.

IVORY COAST: A French colony on the Gulf of Guinea, West Africa, lying between Liberia and the Gold Coast Colony, and joining on the north the French Military Territories and Senegambia. It has an area of about 119,000 square miles, and a population estimated at 2,000,000. The colony has vast valuable forests and gold mines of unknown riches. The capital is Bingerville (formerly called Adjame). The principal rivers are the Tanwé, Kindjabo, and Akba, the last said to be 240 miles in length, affording splendid access to the interior. The origin of the inland peoples is not definitely known. The trading tribes about Ebene Lagoon are called by the English nickname ‘Jack-Jack’; west of the Lahu are the Ayeckoms, commonly called Quas; while farther west are the Kroomen. The coast tribes are mild and trustworthy.

The only Protestant mission in this territory consists of 3 settlements, which fall within the field of the FE mission in Liberia.

J- : A town in the province of Kiang-si, China, about 180 miles S. E. of Kiu-kiang. Station of the CIM (1890), with (1902) 4 women missionaries. Name given as Ib-yaing in CIM publications.

JABALPUR: A town in the Central Provinces, India, 160 miles northeast of Nagpur. It stands at an altitude of 1,460 feet, in a rocky basin, surrounded by a series of lakes which are shaded by fine trees and bordered by rocky crags. Its streets are wide and regularly laid out. It is perhaps the most important railway center in all India. Population (1891), 84,500, of whom 60,900 are Hindus and 19,400 Mohammedans. Station of the CMS (1854), and CEZ (1875), with, together (1900), 4 missionaries, 3 with their wives; 4 women missionaries, 39 native workers, men and women; 3 outstations, 19 elementary schools, 1 boarding school, 137 professed Christians, and 387 Zenana pupils. Station also of the ME, with (1900) 2 missionaries and their wives, 2 women missionaries, 46 native workers, 4 outstations, 5 day schools, and 389 professed Christians. Station also of the WMS, with (1900) 2 missionaries, 17 native workers, men and women; 4 day schools, and an orphanage.

JACKSON, Bishop William Wal rond: Born in Barbados, January 9, 1811. Died at Ealing, November 25, 1895. Missionary of the SPG. Educated at the best school in Barbados; one of the first candidates confirmed by the first Bishop of Barbados; licensed as catechist at the age of seventeen, and entered as the first student of Codrington College, where, after winning a scholarship, he became the Senior Theological Scholar. From the beginning of his ministry (ordained deacon in 1834 and priest in 1835) he was in charge of important parishes in Barbados, Trinidad, and St. Vincent. In Trinidad heroughed it through the forests, visiting small stations; and in St. Vincent his chief work was among the Caribs and Negroes. He was a member of the Governor’s Council in Antigua; exerted a strong influence in legislation, and some of the laws that he had enacted were beneficial especially to the poor man and laborer. On his departure from the diocese in 1879, people of all classes and creeds, in the fourteen islands under his episcopal supervision, gave him a valuable testimonial of their loving esteem.

JACOBITE: A name given to the Monophysite churches of the East, especially the Syrians residing in Northern Syria, Southern Asia Minor, and Mesopotamia. Their principal headquarters are at Mosul, Diarbekir, Maadan, and Aleppo. They have also a bishop at Jerusalem. Other important centers are Oorfa, Mardin, Jazireh, and a district of Jebel Tour, east of Diarbekir. They have found it difficult in many places to cope with the aggressive influences of the Roman Catholics, who have sent large numbers of monks to establish themselves especially in Mesopotamia, in the cities of Mardin and Mosul, and, having enticed many of the priests, have succeeded also in forcing the congregations to follow them by refusing any of the sacraments except as they adopted the Roman Catholic faith.

Protestant mission work among the Jacobites has been somewhat successful, especially as carried on from Mardin, Diarbekir, and Mosul. The relations between the Jacobite leaders and the American missionaries have been quite cordial, and the constant effort to come into pleasant relations with them has been productive of good results. The larger part of the Protestant communities of Mardin, Jebel Tour, and the villages about Diarbekir are made up from the Jacobite communities.

JAESCHKE, Heinrich August: Born in Herrnhut, Saxony, May 17, 1817. He was descended from a family of those Moravian exiles who found refuge and freedom on the estates of Count Zinzendorf at the settlement of Herrnhut. After two years’ study in the theological seminary at Gnadenfeld he was appointed, in 1837, a teacher in the boys’ academy in Christiansfeld, where the Danish language chiefly was used. He acquired the language so rapidly that in a short time he was able to compose and preach in Danish. Five years later he was appointed a professor in the Nieszky Pedagogium, where he instructed in ancient and modern languages. He here began the study of Arabic, Persian, and Sanskrit. He was a proficient in Greek. He became acquainted also with Hungarian, Bohemian, Polish, and
Swedish. His diary was kept in seven languages. In 1856 he joined Messrs. Pagell and Heyde in mission work at Kailang, a village in the province of Khotan, on the borders of Tibet, intending as soon as the way was open to enter with them and labor among the Chinese Mongols. Having acquired the language he compiled a German-Tibetan, and some years later an English-Tibetan, Lexicon, both of which are considered standard authorities. The British Government published the Chinese-Latin Lexicon for the use of Chinese and English officers in Kashmir. He also wrote and translated several books and tracts for the converts, for pupils in schools, and for distribution among the people. He prepared also a small Tibetan grammar in the English language for the use of missionaries and others. He began the translation of the Bible, but after ten years of almost incessant labor his health failed, and he was obliged to return to Europe. There, in great weakness, he continued the work, and completed the translation of the New Testament, which was published by the British and Foreign Bible Society. The work was completed in 1785, which was published by Mr. Redclif in the translation of the Old Testament. He died in Herrnhut, September 24, 1883.

JAFFA: A town in Syria, lying 33 miles N. W. of Jerusalem, of which it is the seaport and with which it is connected by railroad. It is regarded as an important center for missionary work, because all pilgrims and visitors to Jerusalem, whether Christians, Jews, or Muslims, naturally land at Jaffa. There are fourteen colonies of Jews from abroad in the immediate neighborhood of the town, making with those in the town itself a body of some 6,500 Jews. The population of Jaffa is about 16,000. It is a station of the Tabitha Mission Schools (1829), of the CMS (1876), of the Jaffa Medical Mission (1878), of the London Society for the Promotion of Christianity among the Jews (1882), of the Jerusalem Union (Berlin), and of the Christian and Missionary Alliance. Together these societies have at Jaffa 20 missionaries and 29 native workers, men and women; 1 boarding school, 1 industrial school, 1 hospital, and 2 dispensaries.

JAFFNA: A town in Ceylon, situated on the southern coast of the island or peninsula of Jaffna, 116 miles N. W. of Trincomalee. It is the district town, and has the administrative buildings, a college, and a public library. The fort is the most perfect little military work in Ceylon—a pentagon of blocks of white coral. Traces of the Dutch occupancy of the town can still be seen, and not a few of the churches date back to the time of the Portuguese. The industry of the Tamil inhabitants has changed the sandy soil to a fertile district, with luxuriant tropical vegetation. Its trade is mainly in tobacco and rice for the Pulicat market (1891), 43,000. Station of the WMS, with (1903) 3 missionaries, 2 women missionaries, 67 native workers, men and women; 6 outstations, 21 day schools, 2 boarding schools, 1 college, and 455 professed Christians. The Society uses the name Pottah to designate its station here.

JAGATAI TURKISH LANGUAGE. See Turkish Language.

JAGDALI DIALECT. See Mutani.

JAINS: A religious sect in India, who are found in Upper Hindustan, in the provinces of Mewar and Marwar, along the Ganges, and in Calcutta. They are also found in some other parts of India, especially along the Malabar coast. They are considered heterodox by the Hindus, and in their belief they adhere to some of the tenets of Buddhism and to some of the teachings of the Brahmans. Like the Buddhists, they deny the origin and authority of the Vedas, and they worship some of the same saints. Like the Brahmans, they recognize the distinctions of caste, and worship some of the deities of the Hindu pantheon, tho they reject all the rites which cause the sacrifice of animal life. They believe in final emancipation, when the vital spirit is released from the bonds of action, and they define the size of such souls, their home, their quality and their longevity which pertains to them. The Jains are divided into two orders—the priest and the layman. The former leads a life of abstinence and general self-denial. He carefully avoids the destruction of animal life, even covering his mouth to avoid inadvertently swallowing insects. The layman is supposed to practise the virtues of liberality, gentleness, piety, and penance. He also carefully strains the water which he drinks, and covers all liquids lest an insect may be drowned therein. There are other differences among them which govern their dress and decorations. They worship a number of deified saints, called Jins, to whom they ascribe attributes of the most extravagant character. Two of these are now the principal objects of worship. The origin of the sect is lost in obscurity, but it probably was subsequent to the rise of the Buddhist religion.

JAIPOUR: A town in Chota Nagpur, India, situated 8 miles W. of Purulia. Outstation of the CMS (1856), with 1 missionary, 1 native worker, and 31 professed Christians, of whom 309 are communicants. Name also written Jaypur.

JAIPOUR: A town in the Madras Presidency, India, situated in the district of Visagapatam, 95 miles N. W. of the town of that name, at an altitude of 2,000 feet. Population (1891), 5,000. Station of the Brethren Missionary Society (1857), with (1903) 1 missionary and his wife, 7 native workers, men and women, and 752 professed Christians, of whom 239 are communicants. Name written by the Society, Jaypur.

JAIPOUR: A city in Rajputana, India, the capital of a native state of the same name, situated at an altitude of 1,438 feet, about 50 miles E. N. E. of Ajmere. It stands in a small plain which seems to have been the bed of a lake. The city was founded in 1725 by Brahur II. The streets are regular and wide. It is the chief commercial center of Rajputana. Population (1891), 159,000. Station of the UFS (1866), with (1903) 2 missionaries, 1 with his wife; 3 women missionaries, 39 native workers, men and women; 11 elementary schools and 1 dispensary. Name also written Jaypur.

JALA: A town in Chota Nagpur, India, situ-

Jalalpur: A town in the Punjab, India, situated about 20 miles N. of Wazirabad. Station of the Church of Scotland Foreign Missions' Committee (1899), with 2 missionaries, 5 native workers, and 1 dispensary and hospital.

Jalandhar: A town in the Punjab, India, situated 47 miles E. S. E. of Amritsar. Population (1901), 67,735, of whom 59,000 are Mohammedans and 23,000 Hindus. Station of the PN (1846), with (1903) 1 missionary and his wife, 2 women missionaries, 41 native workers, 6 day schools, and 1 boarding school. Name written by the Society, Jullundur.

Jala: A town in the State of Vera Cruz, Mexico, situated 75 miles W. N. W. of Vera Cruz City, at an altitude of 4,300 feet. Jalap grows wild in the vicinity and takes its name from the town. Population about 18,000. Station of the PN (1897), with (1903) 1 missionary and his wife, 4 native workers, 1 day school and 1 dispensary. 

Jalalpur: See Jalalpur.

Jaleswar: A town in Orissa, Bengal, India, situated 24 miles N. E. of Balasore. Station of the Free Baptist Missionary Society (1885), with (1900) 1 missionary and his wife and 11 native workers, men and women. Name also written Jellasore.

Jalna: A town in Haidarabad, India, situated 36 miles E. by S. of Aurungabad, in arid land but surrounded with fruit gardens which are famous. Altitude, 1,632 feet. Population, 6,300. Station of the UFS (1862), with (1903) 2 missionaries, one with his wife; 2 women missionaries, 51 native workers, men and women; 13 outstations, 12 elementary schools, 1 boarding school 1 dispensary and hospital and 268 communicants.

Jalpaiguri: A town in Bengal, India, situated about 50 miles S. E. by S. of Darjiling, at an altitude of 270 feet. Population (1891) 9,700, of whom 5,700 are Hindus. Station of the BMS (1888), with (1903) 1 missionary and his wife and 6 native workers.

Jamalpur: A town in Bengali, India, situated in Behar, 32 miles W. of Bhagalpur. Population (1891) 18,000, of whom 14,000 are Hindus. Station of the CEZ (1894), with (1903) 3 women missionaries and 13 native women workers.

Jammalamadugu: A town in the Presidency of Madras, India, situated in the district of Cuddapah, 102 miles E. by S. of Bellary. Population (1891) 6,000, of whom 4,200 are Hindus. Station of the LMS (1896), with (1903) 2 missionaries, 3 women missionaries, a dispensary and a hospital. The church statistics are included in those of Cuddapah.

Jammu: A town in Kashmir, India, situated about 80 miles N. of Amritsar. It was formerly the capital of an independent Rajput kingdom, and possesses a citadel and a number of extensive ruins. The place has been rated as very unhealthy on account of its bad water supply. This, however, has been remedied. Population (1891) 34,800. Occupied as an outstation by the SPG in 1892.

Jandiala: A town in the Punjab, India, situated 55 miles S. E. by E. of Amritsar in the Jandiala district. Population about 7,000. Station of the LMS and CEZ (1881), with 4 women missionaries, 11 native workers, men and women; 12 elementary schools, a hospital, 95 Zenana pupils and 55 professed Christians.

Jangaon: A town and railroad station in the native state of Haidarabad, India, situated about 48 miles N. E. of Secunderabad. Station of the ABMU (1901), with (1903) 1 missionary and his wife.

Janicke, "Father": Born of Bohemian parents in Berlin in 1748; died in 1827. He was a weaver by trade, but having conceived an ardent desire to possess a university education, he turned all his energies upon this, and with many interruptions he succeeded, after enduring great privations, in fitting himself to enter Leipzig University, whence he graduated in due course, and in 1779 became pastor of a Bohemian Church in Berlin.

Early in life he was much under Moravian influences, and his own brother was a missionary in India. Hence his missionary labors were close to his heart. He was a very earnest man, and had the not uncommon trait of earnest men in a brusque manner that aroused violent opposition among some whose offices in the Church he in vain endeavored to have protected his sympathies. It was a layman, von Schnirching, who suggested to Janicke the idea of founding a training school for missionaries in Berlin. This school, whose influence had a large place in the founding of the Berlin Missionary Society, was opened in 1800. In 1805 Father Janicke founded a Bible Society, which developed into the Prussian Central Bible Society. In 1811 he founded a Tract Society which has come to be a well-known institution.

It was characteristic of this great-hearted man that when he opened his Training School for missionaries, he made its needs his own. He lived upon his earnings in the city and paid the expenses of the school from his own pocket as much as the ten shillings a month for teachers he had mastered the Punjabi language, he, with his cousin, Dr. Newton, of the same mission, commenced the preparation of a dictionary of that language. It was completed and published at

THE ENCYCLOPEDIA OF MISSIONS 342
the mission press in 1854, a quarto of 438 pages, in the Gurumuki character. Dr. Janvier pos-
sessed great energy of character, and was full of zeal for the salvation of the heathen. He met
his death March 24, 1864, at a mela in Anandpur, where he was engaged in preaching and distrib-
uting tracts. In the evening he was met by a fanatic Sikh, and felled to the ground with a
club. He lingered insensible till morning, when he died.

JAO-CHAU-PU: A town in the province of
Kiang-si, China, 60 miles S. of Kiu-kiang.
Station of the CIM, with (1865) 1 missionary and
his wife and 2 native workers. Name written
by the Society, Rao-chau.

JAPAN: The archipelago and empire of Dai
Nippon (great dayspring), called "Japan" by
foreigners, consists of a chain of islands border-
ing the Continent of Asia between Russia at
Kamchatka and the Chinese coast opposite
Formosa and the Pescadores. It is set in a quad-
ralate of nearly 9,000 miles wide and 2,000 miles
long. The northern island is Hokkaido (lon-
titude 50° 56'), the southern Formosa (lati-
tude 21° 42'), the most eastern Shimushiu (longi-
tude east 156° 32'), the most western Yonaku (longi-
tude east 122° 45'). Of the great quadrilateral
thus drawn about Japan's extremities, the total
land area is but 150,000 square miles; the remain-
ing 17,840,000 square miles being ocean water
which surrounds nearly 4,000 islands having
43,000 miles of coast line. The largest island is
Hondo or Hon-shiu, that is, main island, or main
country, and on unreviewed maps is called Niphon,
which is the Dutch spelling of the name of the
whole empire, the native common name being
Nippon, or Nihon. Hondo, Kiu-shiu, Shikoku
and Yezo, or Hokkaido, are the four largest islands.
The lesser groups of islands, besides Kiu Kiu and
Chishima, are Awaji, Tsu-shima, Goto, Iki, Oki,
Sado, Shiehjima, Ogawara (Bonin), etc. All
the outlying islands from Tsu-shima to Sado are
on the western side of Hondo, which is, in gen-
eral, destitute of harbors; while the eastern front
is well indented and contains numerous places
suitable for anchorage and commerce. The general lay of Hondo, the arrows like the
side of an archer's bow recurved at each end, the cord
or string bisecting the Sea of Japan, the arrow-
rest being at Tokio, the capital, which is thus
almost exactly at the center of the empire.

Physical Features: Geologically, Japan is part
of the chain of volcanoes stretching from Kam-
chatka into China, the islands being the tops of
otherwise submerged mountain plateaus of gran-
ite and old schists and clay slates on which late
and active volcanoes have superimposed their
peaks, and the islets being the fragments of the
great lines of mountains and islands. The whole
surface of the country consists of mountains and
valleys, large plains and great rivers being nearly
unknown, while lakes, except Biwa and In-
awashiro, are few and small. The scenery is
rarely wild and imposing, tho in general beautiful,
and in many places exceedingly lovely. Most of
the mountains are rounded and forest-covered.

Only about ten per cent. of the total area is cul-
vitated, which, however, is nearly all that is avail-
able, since the arable land is almost wholly in the
valleys and isler plains. Surrounded on every
side by the ocean, fish food is cheap, abundant
and nourishing. In the tertiary age the Japan-
ese islands were united to the continents of Asia
and America, after which began the great upheav-
als which have both separated and made moun-
tainous the isler mass. Now islands is the esti-
mate of Japan quite similar to that of the United
States between the lower Mississippi and the
Atlantic Ocean in the amount and distribution
of rain and the variations of temperature, but
the flora of these two portions of the world are
closely related both in general character and the
large number of plants common to each. Extending
through twenty-seven degrees of latitude, there is
great difference in climate in various places and
at different altitudes. The monsoon winds and the Kuro Shio (black stream) are the chief regulating factors. The
westerlies, under the influence of the cold
current of the north, have lower tem-
peratures, more fog, rain, snow and ice than the
eastern islands. The sea, which, being nearer
the gulf stream, are warmer and more free from
snow and ice. The average temperature from
April to October is 68° F., November to February
74° F. In many parts of Yezo the winter lasts
from November to May, but the cold rarely drops
to 28°. The rainy time of the year is between
March and November, the wettest month being
September and the driest January. The rainfall,
in some years reaching 145 inches, has had an average during 1876-1888 of 58.33 inches.

The great plagues of Japan are typhoons and
earthquakes (to which one writer adds rats),
and the phenomena of these are studied, as well
as those of wind, temperature and moisture.
Vessels are warned of coming typhoons from
nearly fifty stations. From a study of the cli-
matology of Japan it is evident that the con-
ditions of the air, wind, temperature and mois-
ture are to a large extent similar in all the
continents, except that the extremes of summer heat
and winter cold and dryness reached on the
neighboring continent are hardly known in
Japan. The frequency of earthquakes seems to
be compensated for in the comparative rarity of
thunderstorms and danger from lightning. 
Japan may be safely called one of the healthful
countries of the north temperate zone, and ordi-
ary precautions as to choice of building-sites
and habits of life will secure the same possibilities
of health as in the same latitude in Europe or
America. The months of September, October, and November
are, in a decreasing order of severity,
September, August, October, and July. Four
or five typhoons pass over Japan annually, of
which Tokio receives about one. Occasionally a
typhoon comes as early as April. The native
houses, admirable for summer use, are not
usually habitable by Europeans in winter. The
numerous mountain resorts, and the easy accessi-
bility of Yezo, where the climate is cooler, furnish
Japan with sanitariums for rest, recuperation,
or prolonged vacation.

The peculiarities of the climate of Japan are
reflected in its vegetation. During eight months
of the year plant life is active, during four almost at a standstill, the herbage in early summer and autumn being at its best. Evergreens are the characteristic features of the landscape. Nearly all types of vegetation, temperate, arctic and tropical, prevail, and the Mediterranean, Pacific and north European coasts will be recalled by travelers. These types meet, especially in central Japan, where, at the higher elevations, the birch and the beech are still common, while the bamboo and the camphor-laurel flourish in the milder lowlands.

Japan is the land of the monkey and the giant salamander. Except the ass, sheep and goat, most of the common domestic animals exist here. The chief mammals are the monkey, bat, bear, badger, marten, dog, wolf, fox, squirrel, rat, hare, wild boar, stag, antelope. About 400 species of fish have been cataloged, with 1,200 species of mollusca, the seas being amazingly rich in life of every form able to exist in salt water.

Population: In round numbers, the population of Dai Nippon in 1899 was 44,000,000.

Except the Ainu, in Yezo, the people are now a homogeneous race, made up of several stocks. The chief peculiarities in physical appearance and language are found in Lu Chu and other outlying islands. The language spoken in the capital, Tokio, is now the standard, and using this a good speaker can be understood easily all over the empire, as the variations in dialect, the numerous, are comparatively slight, and are vastly less than in China. In comparison with China, India, Siam or indeed with any Asian country, Japan is politically more of a unit, and her people the most homogeneous of any Asiatic nation. The Kuzokü, or nobility, includes the members of the imperial family, those persons of the old-raised nobility formerly called daimio (great name) and others who for talent or illustrious services have been ennobled by patent. The Shizoku or gentry include the former samurai (servants of the emperor) whose ancestors served the feudal lords as retainers, or who have in various ways risen to social rank, and who, altogether, under the old order constituted the military and literati of the empire. The Heimin, or common people, were formerly divided into several distinct classes, beneath which were the eta, outcasts, and hi-nin (not human); but all these distinctions, eta status, etc., are now equal before the law, and subject to the same political and social forces and liabilities. The agricultural people comprise one-half of the population, after which in order come traders and artisans. In physical stature the Japanese are an undersized people, the average height of the men being 5.5 feet, and that of the women 4.5 feet. Further, the native is not proportionately developed. The invertebrate habit, continued for ages, of sitting on their knees without chairs, the hams resting on the heels or ankles, has resulted in a curious malformation, or, rather, lack of growths by which the upper part of the body is disproportionately longer than the lower. The Japanese do not smoke opium or bind the feet of their women, but the use of tobacco in the form of smoke is almost universal; and the custom of "chewing tobacco" for filling the lungs with the volatile tobacco-vapor may be one of the causes of the common lung diseases and flat breasts of the men. The most common fatal diseases of the Japanese are, in their order, those of the nervous, digestive and respiratory organs, the skin disorders are frightfully common, and epidemics are not rare.

In mental traits the Japanese are bright, quick, perceptive and in general clever, maturing in childhood, developing in adolescence, and from fifteen to forty years of age being probably, to any people in the world, the most to be respected mental development and decay come earlier than with the Germann races. In universal courtesy and politeness, the Japanese people have probably never been surpassed in kindly greetings and gentle manners being common to all grades of society, even the language (between equals, only) being infused with the eminently Christian idea of each esteeming the other better than himself.

Government: The government is that of a monarchy, the chief ruler, the Mikado, being hereditary, who is assisted by a senate, a privy council, and a cabinet of ministers, each of whom has charge of a department. For administrative purposes the empire is divided into 46 ken or prefectures, and into large eastern provinces, Tokio, Osaka, and Kyoto, being organized as Asiatic imperial cities. These ken consist, as a rule, of two of the old geographical divisions of kun or provinces united, there being in the empire 85 provinces, 805 kori or districts, 12,185 cities and towns, and 58,456 villages. The sub-prefectures number 560, and the towns and cities having mayors number 11,377. The smaller villages are under the care of a nanushi or head-man, and the entire populace is arranged into responsible groups of five households—a system which enables the government to keep the most minute oversight of all subjects of the Mikado. Further details of the government, the reader is referred to the constitution of Japan, proclaimed February 11, 1889. This being the culminating point of Japanese history, since it has led to the suppression, by consent of the Western nations, of the extra-territoriality clauses of the treaties, we now turn to a survey of the origin of the people and to the condensed story of the religious and political development of the nation, which, by adopting such a constitution, solemnly declared its purpose to change its personal political system from an Asiatic despotism to a modern representative government.

Political History: The true history of Japan is now in process of construction out of the materials obtained by a critical study of geology and cognate physical sciences, languages, the number, legends, poetry and mythology, and a comparison of Chinese, Korean, and Japanese historical records. The most ancient literature extant is not older than the 8th century, and the early writers draw no clear line of demarcation between myth and history. Hence there is little to be depended on until the 6th century.

At the dawn of history, the archipelago is found populated. The conquerors from the Asian highlands, who, by way of Korea, landed in Kyushu and by gradual conquest northward established themselves in the Kyushu. Lake Biwa, at Nara and Kyoto, found on their arrival inhabitants who were hunters and fishermen. To these the conquerors were a superior race of men, and they parcelled out the land among themselves, compelling the aborigines to be serfs. To this day, at least two types of countenance are easily distinguishable, and the
characteristics of a mixed race appear in the people. The round, flat, "pudding face" of the lower classes and the more oval countenance of the aristocrats, with its more delicate features and profile, are in noticeable contrast, being, according to some writers, types of the Ainu and the invading Yamatu, respectively. Others say that these people developed from streams of immigration from Korea, which supplied these types; and that, as neither recorded history, nor tradition, nor mythology shows any traces of migration from the southward, we are to look upon the Koreans as the nearest congeners of the Japanese of historic times. The Ainu occupied the soil of Hondo, it is claimed by some able writers that the Japanese and Ainus are as distinct in race as the whites and Indians in North America.

From about the year 400, when calendars, writing, and Chinese appliances of civilization were introduced, Japanese history becomes clear.

Ancestor-worship was the religion of the invaders, and out of their method of defying their famous patriarchs and heroes grew up the Kami-no-Michi, or, in later Chinese phrase, Shinto (theos-logos), the name or doctrine of the gods, which is a compound of the worship of nature and of deified human beings. This is a cardinal feature of the Japanese system. The Mikado rules over Japan by divine right from all eternity, and the divine origin and right of the ruler is the central doctrine of Shinto as the national religion. Upon this religion the fabric of government was built. What a blended religious and political system might have developed into we have no means of knowing, but immediately upon the importation of foreign influences from China, the germs were planted for mighty growths in politics, social, religious, and intellectual life, which were profoundly to affect and notably modify the nation and its development. From the 6th to the 12th century the history of Japan includes on its political side the abolition of the rude feudalism of the conquerors, and the gradual centralization of the government in Kioto, with the adoption of codes of law, boards or ministries, the division of the empire into provinces, governed by officers sent out by, and directly responsible to, the central government, and the gradual assimilation of tribes or petty principalities and outlying portions of the population into one homogeneous people. Such a result was not accomplished without much military energy, and many bloody victories of the disciplined imperial troops over the brave but poorly armed mountaineers and distant tribes. A far-reaching effect on society was the gradual separation of the military from the agricultural class, the physically strong and intellectually gifted becoming permanent soldiers, continually in camp and clothed in equally inadaptable javelin and sword. Such a body or bodies of men on the distant frontiers were far more likely to know, respect, believe in, obey, and follow their favorite commander than to heed the mandates of the distant and shadowy court at Kioto. The foundations of a new feudal system were laid. Out of the various classes or bushi, or "bux," has been evolved the samurai, the soldier-scholar, the most picturesque and interesting figure in the national history. From this class, which now constitutes over one-twentieth of the populace, have arisen nearly all the great warriors, statesmen, scholars, reformers, Christian inquirers, and philanthropists of Japan times, while the man of the agricultural class is still the typical ultra-conservative. The buux or Samurais were the military, the kugyô or civil court nobles and officers were the civil, servants of the Mikado, who was in theory the owner of all the land.

The further growth of government in Japan can best be appreciated from a point of view of the relation of religion to its development. We therefore turn to the subject of the religions of the Empire.

Religions: In religion the Ainus are fetish-worshippers, and the superstitions of fetishism, shamanism, the worship of the reproductive powers of nature, and the hereditary powers of ancestors are ingrained in the people of the Nippon archipelago. These primitive beliefs underlie the other national religions, Shinto and Buddhism; the former being the possibly indigenous cult based on ancestor-worship and the deification of heroes, the latter having been adopted from India by way of China and Korea, with remarkable development and variations on Japanese soil. Shinto is the state religion, as has been noted already.

Buddhism: In the formation of the total product of evolution of Japan, Buddhism has been a most potent factor. Introduced in 552 A.D. from Korea, with its elaborate systems of ethics, ritual, dogma, and scriptures, it soon completely overshadowed the bald and impoverished cult of Shinto. Its complete victory was heralded when Kõbô, the deified American warrior, turned his back on the Japanese syllabary, the profound scholar of mighty intellect, who had visited China and mastered the Sanskrit, proclaimed in the beginning of the 9th century his scheme of reconstruction and of reconciliation, by which the older and indigenous faith was absorbed into the foreign. This man, the Philo and Euhemerus of Japan, declared, after revelation from the gods, that all the Shinto deities were avatars or incarnations of Buddha. He therefore baptized them with Buddhist names, and in place of the Shinto festivals appointed others to be celebrated according to the Buddhist liturgies. Having already obtained a foothold in the palace, and by its influence turned the emperors into cloistered monks and empresses into nuns—thus dealing a blow at Shinto in its vitals, and by weakening the government prepared the way for the decay of the imperial authority and the supremacy of the military classes—the victory of Kõbô's system was easy. Further, the Buddhist monks were explorers, road-makers, bridge-builders, improvers of diet and living, chaplains of the army, and the monks, almost the only scholars and learned men apart from the court, the benefactors of the people, the exponents of civilization, and the foster-fathers of art, of literature, and of material development. From the 6th to the 12th century is the missionary era of Japanese Buddhism, after which for two centuries the development of doctrine followed, in which emerged those new and startling forms of the faith of Sakamuni which have made Japan the land of dreadful heresies to the coreligionists of Siam and China. The doctrine of Shinto or "reformed" Buddhism, we see the circle of development complete, and the beginning and the end meeting in what seems a caricature of Christianity. Of the six great sects in Japan, one originated in India, one in China, and four in Japan, viz., the Shin-gon, Jô-dô, Shin, and Nichiren, who were "reformed" Buddhism. These sects are mainly developments of the pantheistic prin-
The first place, he declared war against Korea, and sent armies of invasion which were many Christian officers and soldiers making them Generals. Kuroda and Kurou. No sooner were the leaders of the Christians immersed in war duties in a foreign land than Hideyoshi, the next year, 1593, seized nine missionaries, six Franciscans and three Jesuits, in Osaka and Kioto, and sent them to Nagasaki, where they were publicly burned to death. For the next few years the open propaganda was less active, the work was secretly carried on and converts multiplied. The Jesuit friars established a printing press, and, using type from Europe, published a number of interesting books, none of which had already circulated in manuscript. After Hideyoshi's death the whole country was excited by civil troubles between the adherents of Ieyasu and of Hideyori, the son of Hideyoshi, but missionary work went on until the Christians numbered over a million and a half.

While Ieyasu was busy in subduing his enemies, he ignored Christianity, an example which the lesser political lights followed; but on gaining the victory over the southern army, in which were many of the Christian converts, he ordered the Chrysanthemum portrait of Sekigahara in October, 1600, he, like Hideyoshi, threw off the mask and issued a decree of expulsion of the foreigners. Busy, however, with reorganizing the empire from his seat of government in the distant east at Yedo and Fuchu (Shizuoka), Ieyasu could not, even if he had not, press his policy of expulsion, and large numbers of Spanish and Portuguese priests continued to secure entrance into Japan. In 1608, by the Papal bull, priests of all orders were allowed to reside in Japan. In 1610 the Dutch, and in 1612 the English, had footholds, and in 1615 came the first English vessel to Hirado. At this time there were two hundred missionaries, with "two million converts;" but the strength was apparently in numbers only, for without leaders or men of influence in the state its weakness was made apparent when in Kiushiu, between 1600 and 1614, the daimio changed, adopted, or annihilated popular Christianity at their pleasure, using it simply as the tool of their ambition. Whatever may have been the motive, in 1614, of the sudden and fiercely energetic action of Ieyasu in issuing that decree, which was at once executed with blood and iron—the inherent Japanese jealousy of foreign influence, the pressure of the Buddhist priesthood, the intrigues of the Protestant, Dutch and English, or his own despotic purpose to secure peace, and even national independence, by isolating Japan from all the world,—it is certain that his purpose succeeded. From Sendai to Satsuma the Christians were compelled to renounce their faith, and, failing to do so, were imprisoned, exiled, tortured, or beheaded, while the foreign religieux were deported. Thousands of natives fled to China and Formosa, or, outwardly recanting, kept alive their faith even until their teachers from Europe returned in 1658. By compelling the owners of seaworthy vessels to burn them and pronouncing the death sentence alike upon the Christian and the returned Japanese castaway, the ruling powers in Japan now kept their country insulated from the world. The terms of the English treaty with the nomarch of Nagasaki were the sole exceptions to these rigid laws of exclusion. During two and one-half centuries the Dutch and the Japanese lived in har-
mony. Moreover, the intercourse of the Japanese
with the little Dutch colonists was a small
source of intellectual stimulus and culture to the
Japanese mind, and prepared the way for that
easy acceptance of foreign ideas which has so
surprised the world since the diplomatic victory
of Commodore Perry.

Indeed, it will be found on examination of the
antecedents of nearly every reformer and leader
in the modern progress of Japan, that his first
enlightenment, or motive to renovation of mind,
came from his own or his father's contact with the
Dutch or Dutch learning. Further, abundant
facts coming to the light in these days, when New
Japan is so busily engaged in building the monu-
ments of the martyrs she once imprisoned and
beheaded, show beyond doubt that the begin-
nings of modern Protestant, the unorganized,
Christianity in Japan were prior to the coming
of the missionaries, and sprang from the Dutch.

Some of the sons and grandsons of these inquirers
or martyrs are now pastors of Christian churches,
and this wide area of propedeutics for modern
civilization and Christianity gives strongest hope
of its reality and permanence in the hearts of the
people. Other disconnected events belong to the
story of the revival of ideas of progress in Japan.

With the coming of the Pacific to American
commerce and the development of the fur trade
and whale-fishery, the number of rescues of Jap-
anese waifs became every year increasingly nu-
merous. To return these involuntary exiles to the
land they loved was dictated by humanity. One
notable attempt of this class was that made by
the owners of the ship "Morrison," who, in 1837,
shipped by their vessel to Japan seven Japanese,
with Dr. S. Wells Williams and Dr. Gutzlaff as
interpreters. The ship was fired on at Uraga,
July 30, in Yedo Bay, and also repulsed at
Kagoshima, in Satsuma. From these waifs Messrs.
Gutzlaff and Williams in China learned the
language, and translated into it portions of the
Bible. In the gradual evolution of a com-
plete version of the Holy Scriptures in Japanese,
this work of Gutzlaff and Williams, and that of
the Rev. Dr. G. Torrey, translated from the English
Bible obtained at Deshima, with that of Betthelheim,
a missionary supported in the Lu Chiu Islands by
a British Naval Society from 1846 to 1854,
may be considered historical links. The settle-
ment of California and the discovery of gold
there again called the attention of the American
Government to Japan. By a coincidence that
suggests the hand of Providence, the present
Emperor of Japan was born November 3, 1852,
on the very day that Perry was ready to sail into
Yedo Bay. The success of this naval diplomat-
ism is matter of history, but the treaties signed by
the Shogun, or military commander-in-chief,
offended the nation. A condition of anarchy
followed which was full of hostility to foreigners.
This was regarded by the Western nations as
wanton disregard of treaties, which was chastised
by the combined fleets. Shortly after the Jap-
anese had thus felt the power of the West a rea-
tion took place in favor of learning the secret of
this power. The popular ferment was accom-
panied by a determination to suppress the mil-
tary form of government which had opened the
doors to the West. A short civil war, in the win-
ter of 1867-68, disposed of the Shogun
and his adherents, and the Mikado or actual Emperor
was restored to his rightful supremacy. Several
serious revolts tested the stability of the new
political order. The most serious of these began
early in 1877 and continued during seven months.
Since that time the progress of Japan has been
rapid and, one may say, marvelous.

With this revival of national feeling and patri-
otsim, the importance became enhanced of rela-
tions between Japan and Korea, over which
country China and Japan exercised a joint
protectorate. The wide difference between Japan
ese and Chinese theories, as to progress and as to
the reforms which Korea needed to adopt for its
own best interests, led to friction and finally to
war in 1894-95. After the Chinese troops had
been expelled from Korea, and her naval arm
broken, a peace was signed by which the fortress
of Port Arthur and its immediate territory were
ceded to Japan. At that moment, however, Japan
unexpectedly came forward with a "recom-
mandation" that Japan restore Port Arthur to
China. The reason alleged was that the occupa-
tion of that fortress by a foreign power would
be a menace to the independence of both China
and Korea. Germany and France supported
Russia in this view, and Japan was forced to
yield the fortress which had been taken by hard
fighting.

Such forcible interference was enough in itself
to cause immediate attention by Japan to the
problem of increasing her military and naval
equipment. When, three years later, Russia, by
arrangement with China, occupied the fortress
which she had forced Japan to evacuate, it
became clear that sooner or later the Mikado
would cross swords with the great Czar.

The clash of policies came in the autumn of 1903,
and the cause of dissension was the question of secur-
ing the independence of China and Korea, threat-
ened by the somewhat equivocal attitude of the
Russian authorities in Manchuria. Not having re-
ceived what she considered satisfactory pledges
on this point, Japan, on the 6th of February,
1904, broke off diplomatic relations with Russia,
and resorted to arms as the champion of the
rights of China and Korea, but with a zest which
the world knew had by no means been forgotten.
One feature of the case which should be born in mind is that in 1902 the
British Government entered into an engagement with Japan to support her at any time when the
integrity of either China or Korea might be about to be threatened by any hostile coalition. This
agreement between the Asiatic and the Eu-
ropian island empires contains as much of danger to
the peace of Europe as it does of consolation to
Japan in undertaking war against Russia.

Mission in Japan since the Reforms: The Roman
Catholics. On the opening of Japan, missionaries
of Greek, Roman, and Reformed Christianity at
once entered the empire, the Roman Catholics
to discover their brethren and continue the old
methods of propaganda, and the Russians or
Greek (Orthodox) and the Protestant mission-
aries to break new ground. As early as 1846 the
Pope had nominated a bishop and several mission-
aries, who in the Lu Chiu islands awaited the
opening of the country. At Urakami and
other places near Nagasaki there were found,
in 1865, thousands of people who possessed some
prayers and other books, with marginal words of Latin origin, and practised some
of the minor rites of the faith, besides abstaining
from acts significant to Buddhist, and especially
Shinto worshipers. Until toleration became the fact, which was even before it became the law, in 1872, many of these people were imprisoned, exiled, and otherwise treated as if they were of the sentiment of Roman Catholic or Protestant missionaries. Many interesting relics and survivals of Roman Christianity of the 17th century have been discovered by the priests, and here and there small bodies of descendants of former believers have been more or less converted, becoming or the sentiment of Roman Catholic or Protestant missions.

In the thirty-one years of their revived work, making diligent use of the methods peculiar to Roman Catholic missionary operations, they have again established themselves widely over the empire, but especially in Kiusiu. The missionaries are mostly French, and their zeal and consecration are worthy of praise.

The Greek Church: The missionaries of the Church of Russia began operations at Hakodate in 1870, and have steadily continued their labors. A large native ministry has been trained, the Bible has been read, used, and taught, and in the freedom allowed their converts the Russian priests are much like the Protestants. Among the most magnificent buildings in the capital of Japan are those of the Russian Church, the indefatigable head being the archimandrite Nicolai, who is assisted by three other Russian clergy, and having about 1,700 baptized converts and 25,000 adherents. In a recent informal conference of native Christian workers without reference to the branches of the Church universal, the Greek Church was well represented. Some parts of Japan where these churches have been planted they have not held their own, the weak converts lapsing into heathenism and the earnest Bible-readers passing into Protestant churches.

Protestant Missions: The gates of Japan were first opened to the world through the influence of Americans, and the first Protestant missionaries to enter the country were Americans. The Protestant Episcopal, the Presbyterian, and the (Dutch) Reformed Churches in the United States sent out missionaries—Williams, Hephburn, and Verbeck—who settled in 1859 at Nagasaki and Yedo. Missionary societies in the United States obtained the right of residence only as teachers of English in Japanese schools; and when Goble, of the American Baptist, came to Japan in 1860, and Ensor, of the CMS, in 1869, and Greene, Gulick, and Davis, of the American Board, in 1871, they were allowed at first to work as teachers rather than as preachers of the Gospel. This "silent sowing" continued until 1873, when the old edict against Christianity was repealed; and after this date many missionary societies, from America, England, Scotland, and Germany, entered the promising field. The revolution in 1868 left Japan in a state of unrest; and during the next fifteen years, as a witness of the events narrates, the condition of affairs is almost without parallel.

"Missionary schools were crowded with the sons and daughters of high and low. A missionary was called to lay the foundation of a national university, and to be a general adviser of the government. Statesmen, men of wealth, governors, and lower officials became the patrons of Christian schools and sometimes opened their houses for religious services. From all quarters came requests to hold meetings in school-houses and theaters; audiences numbering several hundreds, sometimes 1,000 or 1,500, were readily got together, and they would listen to a succession of speakers through four or five hours, or even longer. We have seen the power of God to-day was a frequent exhibition. Witness of those scenes will never forget them. In every three years the Church was doubled. These years of the appropriation and more or less thorough assimilation of the best of Western thought and life were the most momentous in the nation's history. This period more than any other was creative of the New Japan." Indeed, until 1889 the Japanese missions grew steadily in power; but from that time until now the work has been marked by lessening progress, pause, and even retrogression. From 1884 until 1889 the number of adult evangelical Christians rose from 5,000 to 29,000; but in 1899 it was only 41,800. In 1888 the number of adult baptisms for the year reached 7,700; but in 1892 it was only 3,700, and now it scarcely keeps up to this number. As Warneck says: "The rapid advance was occasioned far less by a universal hunger and thirst after righteousness, than by the cooperation of a number of factors unconnected with religion, which wrought a change of mind in favor of Christianity as an educational and cultural force, particularly among wide circles of the educated classes. The disestablishment of the church by the state, the new legislature, which paved the way for Christianity, and the recommendation of it on grounds of politics and culture produced an atmosphere favorable for missions, in which the plenteously scattered seeds of the Gospel were shone on as by the sun." The reaction that followed lasted until nearly the close of the last century; but the period of opposition seems to have reached its culmination. Since the revision of the treaties, in 1899, and the attitude of Japan in the Chinese Boxer uprising of 1900, a change for the better is apparent, and the forces that make for righteousness are moving forward. The latest statistics available give the following data for 1900: Missionaries 757, stations 157 (including many where more than one society labor, so that the number is too large by about fifty); organized churches 445, of which 95 are self-supporting; church members 42,451, native ministers 37, ordained preaching assistants 93, native workers 558, Bible women 224. There are 16 boys' boarding schools, with 2,270 pupils, 45 girls' boarding schools with 3,361 pupils, 85 day schools with 6,086 pupils, 949 Sunday schools, with 36,310 pupils, 16 theological schools with 120 students, 13 schools for Bible workers with 175 students, 6 hospitals and 8 dispensaries, at which 2,121 patients had been treated during the year. Of the societies at work in Japan, there are thirty-one from America and Canada, seven from Great Britain, one from the Continent, and these are enforced by the work of the Salvation Army, the Hephzibah Faith Mission and four local societies.

Christian literature in the vernacular is one of the most powerful forces in the evangelization of Japan. From 1895 to 1899 the Tract Society issued 25,400,000 tracts, and the religious press has been busy in this line of work.

The Bible in Japanese: A veteran missionary ascribes one-half of all the results of Christian missions in Japan to the work of the Bible societies. Of these, the American, the British and Foreign, and the National Bible Society of Scotland have agencies in Japan, and have diligently
executed the work of publication and distribution, besides making generous contributions for the expenses of translation. The work of giving the Bible to this nation was begun, as said above, by Rev. Karl Gutzlaff and Dr. S. Wells Williams, and vigorously pressed forward by Rev. J. Goble, S. R. Brown, D.D., and Dr. J. C. Hepburn on the opening of the country by treaty. In 1872 all the Protestant missionaries were invited to meet in Yokohama to form a Translation Committee, which began its labors, and on the 3d of November, 1879, finished its work of translation and revision of the New Testament. In April, 1880, the complete New Testament was in the hands of the native Christians. A few months previously Rev. Nathan Brown, D.D., published a version of the New Testament in which the words relating to baptism were translated, and not, as in the union version, transliterated, from the Greek. Plans for translating the Old Testament were not made until 1876, nor perfected until 1892. On the 3d of February, 1888, at a large meeting held in Tokio, the completion of the Bible in Japanese was announced. Besides many missionaries there were in hearty and able cooperation with the committee the native scholars, Matsuyama, Takahashi, Iyemura, Ibuka, and others. These brethren have enabled their foreign teachers to present to the Japanese people a version of the Bible in their own idiomatic, readable, rhythmic, and destined in all probability to be the standard for generations to come. In the language of this union version of the Holy Scriptures special prominence is given to the native element, as against the Chinese-Japanese so fashionable during the last half-century or more.

Since January, 1890, the total sales and gifts of Bibles have been 29,156; New Testaments, 116,671, and portions, 749,455, making a total of 94,000. One Bible seller sold (largely portions) during the last four months of 1899, 22,206 volumes. While in 1883 there were only four religious journals, in 1894 there were forty, and in 1900 there were fifty-five reported, of which four were weekly newspapers and seventy were monthly.

Tokyo, the capital, is largely the distributing center of the Gospel in Japan; and here twenty percent of all the workers are located, and institutional Christianity has a plant established at this commercial emporium valued at 1,200,000 yen, or about $600,000.

A notable meeting of the Evangelical Alliance of Japan was held at Osaka in April, 1900, and it was decided to enter upon special evangelistic work throughout the Empire at the beginning of the new century. The General Conference of Missionaries, which met at Tokio in October, 1900, appointed a committee of ten to cooperate with the Committee of the Alliance in furthering this special work for Japan's evangelization. These efforts have been attended by blessed results. From May 12 to June 30, 1901, meetings were held in fifty-two churches in Tokio alone, attended by more than 100,000, and resulting in 3,307 converts or inquirers. Japanese students have been deeply affected by this evangelistic movement; and in October, 1901, during the meetings held by Mr. John R. Mott, over four hundred, within three days, decided to become disciples of Jesus Christ. Many are praying, working, and hoping for the redemption of Japan during the first generation of the 20th century; and this blessed result depends upon the faith and works of the people of God.

JARKEND. See JARKAND.

JARO: A suburb of Iloilo, in the S.E. of the island of Panay, Philippine Islands. Station of the AIMU (1900), with 1 missionary and 1 native worker.

JATKI LANGUAGE. See MALTANI.

JAUNPUR: A town in the United Provinces, India, situated on the Gomati River, 37 miles N. W. by N. of Benares. It was formerly the capital of a large Muslim kingdom. It has many fine buildings, and is celebrated for its manufactures of perfumes. Population (1891), 42,000, of whom 26,000 are Hindus and 16,000 Mohammedans. It is the site of the Zenana Bible and Medical Mission, with (1900) 3 women missionaries, 10 women native workers, 6 day schools and a dispensary.

JAVA: An island of the Indian Archipelago, situated in latitude 5° 2' to 8° 50' south, and longitude 105° 12' to 114° 35' east. It is the richest colonial possession of the Netherlands, and in respect to its population, its natural beauty, the mildness of its climate, and the industry of its people, is the most important of all the islands of the archipelago. The area of the island is 50,260 square miles. Its greatest length is from east to west, 666 miles, with a breadth varying from 56 to 136 miles. With Madura included in the official Java, its area is 50,554 square miles. The mountain range which forms the central ridge is of volcanic nature, and there are still many active volcanoes. The highest is Semeru, 12,238 feet. The climate of Java, with the exception of some marshy districts in the northern plains, is healthful and very salubrious. The heat is not intense, but the long continuance of it proves trying to European constitutions, and the heat first are not affected by it. In the interior tablelands the climate is colder and more bracing.

Java is under the government of the Netherlands. The East India Company, created by the Dutch in 1602, gradually conquered the Dutch East Indies, and when the Company was dissolved in 1798 the mother country took over the control of all its Dutch possessions, and since 1830 the Netherlands has been undisturbed in its supremacy. The island is divided into residencies, each governed by a resident, who, with his assistants, has almost absolute control by means of a vast hierarchy of native officials. There are 22 of these residencies, including Madura. The population is very dense, numbering in 1900 25,745,698. Of these, over 50,000 are Europeans, 22,25,500 Chinese, 111,000 Arabs and the remainder natives. The natives belong to the Malay race, and are divided into the Javanese proper, the Sundanese, and the Madurese. The Malay type is best retained in the Sundanese, while the Javanese are the most civilized. In early times a warlike, ferocious spirit must have characterized the Javanese, but now they...
are peaceable, docile, sober and industrious. Under Dutch rule the condition of the people has been most prosperous, and is improving rapidly under their wise and judicious administration.

_Reformation:_ Nominally the natives are Mohammedans, since the Hindu dynasty was overthrown in the 15th century by the Mohammedans; in former times they were Buddhists and Brahmans, as Hindu civilization was introduced early in the Christian era. The result has been that religions but in all the logical systems are interwoven with their original spirit-worship, and the latter has absorbed the foreign element and still remains the dominant faith of the people.

_Language:_ Javanese is the prevailing speech, and is found in two distinct styles—the court speech and the plain talk among the people.

The three principal towns of Java are Batavia (115,887), Samarang (89,286), and Surabaya (146,944).

Mission work is carried on by the Netherlands Missionary Society in East Java, where the Dutch Baptist Society has also one station. The Netherlands Missionary Union has stations in West Java. Besides these there are the following societies: The Protestant Church in Netherlands East Indies, Java Comité, Mennonite Missionary Society, Christian Reformed Church, and the Dutch Missionary Society. The Netherlands Missionary Union has at this date (1902) 13 missionaries employed on the island, and a church membership of 25,000. The chief station of all missions on the island is Medan, and in many places missionary workers. In this center of missionary activity there are a number of churches, a seminary for native preachers, several schools and a hospital. The Christian community under the care of these missionaries numbers 4,000.

_Java Comité._ See Netherlands; Missionary Societies of the.

_Javanese Language._ Belongs to the Malay family and is spoken by about 13,000,000 people in the island of Java. It has been used for literary purposes by missionaries of Dutch societies, and sometimes written with Roman letters. It is more often written with the Javanese characters, however, and sometimes with Arabic letters.

_Jaypur._ See Jaipur.

_Jehlam._ A town in the Punjab, India, on the north bank of Jehlum River. Climate, hot; healthful in winter. Population (1891), 12,900, of whom 7,400 are Mohammedans and 4,300 Hindus. Station of the UP (1875), with 2 missionaries and their wives, 4 women missionaries, 3 day schools, a medical class, and a dispensary. Name also written Jhelum.

_Jellasore._ See Jaleswar.

_Jericho._ A settlement in the Transvaal Colony, S. Africa; situated 28 miles N. N. W. of Pretoria. Station of the Hermannsburg Missionary Society (1880), with (1900) 1 missionary and his wife, 1 native worker, and 1 day school.

_Jerusalem._ From the time of the Crusades Jerusalem has been a special point for missionary work. Among the different branches of the Christian Church, European and Oriental, have had their representatives there. The strongest element has been and still is the Greek, the Greek Patriarch receiving the support and encouragement of the Russian Government.

Next in strength come, perhaps, the Armenians, who have a large convent and church. The Latinis have not been very strong until recent times. The conflicts between these different branches of the Church have been accompanied with an inter- mission and contempt of the Muslims, who have been compelled to guard the holy places by cen- trics in order to prevent Christians from destroy- ing each other in the places in the places that they affect to reverence. Jerusalem has also been, natu- rally, a popular place for the Jews, and various effors have been put forth, like the present Zion- ist movement, to establish this race in their ancient capital. It has seemed, however, as if the very presence of the Holy Place acted upon them so as to destroy all sense of religion, and the Jews of exiles, to establish themselves at Jeru- sulem and thence go forth to other parts of Turkey. This was quickly found to be impracticable, and from that day to this there has been no disposition on the part of either of the American societies working in Turkey to enter a place already occu- pied by Latin missionaries. The missionary work of the Eastern Church have patriarchs or bishops at Jerusalem. It is an important ecclesiastical center of the Roman Catholic Church, and the Church of England also maintains a bishop there.

_Jerusalem Union_ (in Berlin). See Germany; Missionary Societies in.

_Jewett, Fayette._ Born at Newbury, Vt., August 15, 1824; graduated at Vermont University 1848; studied medicine and practised at Nashua, N. H. In September, 1852, he decided to devote himself to the foreign mission work, and being accepted by the ABCFM, sailed for Turkey March 14, 1853. He was first stationed at Tocat, then at Siyas and in 1858 at Yozgat, these changes being required by the necessities of the work and the missionary families. He was a pioneer in medical work in these places. He was ordained as an evangelist at Constantinople May 28, 1857. In 1859 he returned to the United States to seek relief from a peculiar and distress- ing affection, and on the return journey he died at Liverpool, June 18.

_Jewett, Rev. Lyman._ Born in Waterford, Me., March 9, 1813; graduated from Brown University in 1843 and took a course of study at Newton Theological Institution. He was ap- pointed a missionary of the ABMU in 1847.
He began his labors at Madras, afterward removing to Nellore; but in the closing years of his missionary service he returned to Madras, there closing a period of thirty-eight years of consecrated, and successful work in the mission field. He was notable for a rare combination of true humility and great self-reliance. For years he was the only missionary on the Telugu field, and it was largely due to his self-sacrifice and firmness of purpose that the field was not abandoned by the Baptists of America. In the fruitage of his early toil. He died at Fitchburg, Mass., January 7, 1897.

**JEWS, The: Locality and Religious State:** In the time of Christ, Jewish communities had spread through all the countries bordering on the Mediterranean, and only a small part of Israel was still living in Palestine. This part was still further reduced, if not completely destroyed, by Titus in 70, Hadrian in 135 and part of the continent was conquered, and not until the 19th century did Palestine once more become the abode of a large Jewish population. As civilization advanced toward the north, Jews became domiciled also in Central Europe. In the Middle Ages they were chiefly settled in Spain and Germany. But persecution drove many Spanish Jews to the other Mediterranean countries, especially to Italy, Asia Minor and Palestine; and for the same reason many German Jews moved toward the East, into the Polish empire, at that time reaching from the Baltic to the Black Sea. Still earlier some migrations had taken place to Arabia, Persia, India and China; but as those sporadic settlements — with which must also be reckoned the Fallashas of Abyssinia, who had adopted Judaism — maintained regular communications with the main body of the people, they actually lost the knowledge of their own religion, and the revival which lately has taken place among them is due to the exertions of the Jews in Europe. The Jews also took part in the European colonization of America, going mostly to the northern part of the continent, less frequently to the southern and central; and recently both Australia and South Africa have received some smaller and less important Jewish colonies. The table below, based on the Jewish Year Book for 1902, gives a general view of the distribution of the Jews of the Jewish race. It being impossible to be inclusive, the table, however, that, as is stated below, such tables are estimates impossible of verification:

These ten and one-half million Jews are, as the table shows, very unequally distributed over the earth, and it seems apparent that the missionary activity developed among them should stand in some proportion to the density and strength of each single settlement. This, as long as there are countries which have only one missionary for every 50,000 Jews, new mission stations should not be established in countries which have a much smaller Jewish element in their population. Nor should the activity ever be concentrated to such a degree as is the case in Palestine, where there is a missionary for every one thousand Jews.

The medieval division of the Jews into Sephardim or Spaniards, Ashkenazim or Germans, and Moghrabim or North Africans, has lost to some extent its significance, as other distinctions have become more prominent than that of descent. Nevertheless in some connections it is still instructive.

Sephardim communities, numbering in all hardly more than 400,000 members, are found in Italy, Greece, Turkey and sporadically also in France, Holland and England. The Ashkenazim, who form the principal mass of the Jewish people and number over five millions, have their chief seat in Germany, Austria-Hungary and Russia, but make also the larger part of the Jewish population in France, Italy, England and Palestine. The North American Jews are almost without exception Ashkenazim. The Moghrabim, numbering about 160,000, live in North Africa and Palestine.

On account of their common German descent all the Ashkenazim use originally the German language, in an old and somewhat mutilated dialect, strongly mixed up with Hebrew words, and in Poland and Russia also with Slavic words. This language was by the Jews themselves called simply "Jewish," but by others either Judeo-German, or, by a mistake, "Judeo-Polish." In Germany it has now nearly disappeared. There, as in Hungary, England, France and America, it has, at least among the educated Jews, been wholly superseded by the language of the land. In Russia, Poland and Galicia, however, and among the numerous emigrants thence to England, North America and Palestine, "Jewish" is still the common speech, and a missionary among them must understand it. The Sephardim in the Orient have also retained their Spanish dialect. The Moghrabim generally speak the Arabic dialect common in the land in which they live.

All those classes of Jews—that is, so far as their members can be designated as belonging to the old faith—follow the rabbinical law such as it has been laid down in the Talmud, and afterward codified in the Mesechna, Thora and Schul-
chan Aruch. Their form of worship has a common basis, fixed in Babylonia between the 6th and 9th centuries. Through different additions and changes in the different countries, there developed from this common basis quite a number of different rituals, but most of these have after all given way either to that of the Ashkenazim or to that of the Sephardim.

In religious belief, however, there are, as above indicated, Jews of the old faith and Jews of the new faith. When toward the close of the 15th century the Jews began in great numbers to take part in the movement toward modern civilization, those concerned in the movement could not fail to recognize that the rabbinical law contains much which is superstitious and inhumane; that the divine service needed a reorganization, especially by the introduction of sermons in the language of the land; that the youth ought to have a fuller instruction in the Bible and the elements of doctrine and ethics; and, acting on this conviction, the natural result was that there arose a distinction between the Jews living in central and western Europe, or in the United States, and the Jews settled in Babylonia from Europe. The latter retained Judaism in its old medieval form; the former entered upon a development demanded by the times.

Among the Jews of the new faith there must further be made a distinction between the orthodox party and the party of the reform. The orthodox follow the rabbinical law, the purged from its extravagances; use Hebrew in their own worship, tho' with occasional sermons in the language of the land; and expect, through confidence in the promises of the Prophets, that all Israel shall some day return home to Palestine. The reformers reject the rabbinical law, use partially or wholly the language of the land in their divine service, and consider themselves genuine citizens of the state to which they belong. But most of them have given up confidence in the infinite development of the moral and religious truths contained in the law and the Prophets, and many of them have lost all religious conviction, and become absorbed in mere materialism.

In the 18th century there also developed two larger groups among the Jews of the old faith, namely, the Hasidim or Mithnagdim and the Chasidim. The Hasidim are followers of the Talmud, the Chasidim of a later form of the mysticism of Theosophy. This must not be understood, however, as if the Hasidim stood in no relation to the Kabbala, for the Kabbala has so thoroughly permeated medieval Judaism that it has left traces of itself on every leaf of it. Nor are the Chasidim in opposition to the Talmud; they only wish to keep the study of it within certain limits, in favor of prayer and contemplation. Characteristic of them is their reverence for holy men who through prayer and contemplation are said to have come into closer relations with God, and thereby to be able to give infallible counsel and to confer heavenly blessings on their adherents.

Violent controversies take place between the Hasidim and the Chasidim, between the orthodox and those of the new faith; one party accuses the other of having dealings with Gentiles (Christians) and the other turns off the accusation by scoffing at the superstitions of its antagonists. But they all agree in the profession of belief in one single God, with whose very essence the idea of a trinity is as incongruous as that of an incarnation, and in the conviction that Israel is specially selected to represent this faith among the nations of the earth. Thus, while the monotheism of the Old Testament is directed against polytheism, the essential basis of the latter is unitarianism—of modern Judaism is a protest against Christianity. No one of the four parties is any nearer to Christianity than the other three. The orthodox are prevented from accepting the Gospel by their strict but superficial legality, the reformers have been driven by modern religious sense, the Peruschim by their hair-splitting subtlety—the result of their Talmudic studies—and the Chasidim by their blind fanaticism.

Missions among them: The mission among the Jews is as old as the Christian Church, and the Church can never fully do justice to the last words of the Savior without preaching the Gospel unto the Jews. Alto the cross was a stumbling block to them, yet the first Christian community consisted entirely of Jews.

Commencing with the family of Jesus, Himself, we have Mary, Joseph, with their first unbending brothers, and onward, after all, as a result of the accord in prayer and supplication (Acts i: 14); James and Joseph and Simon and Judas (Matt. xiii: 55); further, Mary, the wife of Cleopas (John xix: 23), and, then, the greater number who were converted by the miracles of Christ on His travels (John viii: 20; x: 42). We must not omit Mary Magdalene (Luke viii: 2), Joanna, the wife of Chusa, Herod's steward (Luke viii: 3; xxvii: 10), Susanna (Luke viii: 3), Salome, the mother of the apostles John and James (Matt. xx: 20); Mary and Martha, the sisters of Lazarus of Bethany (John xii), and Mary, the converted sinner.

In the higher ranks we find Nicodemus, Jairus, one of the rulers of the synagog (Mark v: 22); the nobleman at Capernaum with his whole house (John iv: 46); Zaccheus, the chief among the publicans (Luke xix: 2); Joseph of Arimathias, an honorable counselor (Mark xv: 43; Luke xxiii: 50). To these are to be added the multitudes who were healed by Christ's miracles, and who therefore believed in Him—such as blind Bartimeus (Mark x: 46); the disciples of John, who were by him directed to the Lamb of God; the twelve and the seventy with whom Jesus traveled; the seventy disciples, who were appointed and sent forth after the twelve (Luke x: ). According to 1 Cor. xv: 6, Christ was, after His resurrection, seen of above five hundred brethren at once. When Matthias was numbered with the eleven apostles, there were about one hundred and twenty members of the congregation called together. By the preaching of Peter at the Pentecost three thousand souls were added (Acts ii). By the preaching and bold confession of Peter and John the number was increased to about five thousand, when it is said believers were the more added to the Lord, multitudes both of men and women (Acts v: 14), and the number of the disciples multiplied in Jerusalem greatly, and a great company of the priests were obedient to the faith (Acts vi: 7). At his last sojourn in Jerusalem Paul finds there "many thousands of Jews," or rather "ten of thousands" (Acts xxi: 20), which believed, altho the greatest portion of the congregation, after the murder of Stephen, were all scattered abroad by the great persecution, as far as Phenice, Cyprus and Antioch (Acts vii: 1; xix: 19).
The assistants of the apostles, who left Jerusalem in order to preach the Gospel were: first, Simon the Zealot; then, Joseph Barsabas, surnamed Justus (Acts i: 23); Joseph Barnabas, the Levite of Cyprus (iv: 36); Ananias, the disciple at Damascus (ix: 10); John Mark the Levite, evangelist, son of Mary (xii: 2; xv: 37); Timothy, son of the Christian Jews, Eunice (xvii: 1); Aquila, with his wife Priscilla (xvii: 2); Apollos of Alexandria (xvii: 24); Zenas, the lawyer who preached the Gospel in Crete (Titus iii: 13); Rufus and Alexander, the sons of Simon the Cyrenian (Mark xv: 21; Rom. xvi: 13).

Besides John, certain of the number of Jewish believers were prophets of the New Covenant; thus the daughters of Philip the evangelist (Acts xxi: 9); Judas and Silas (xv: 32); Agabus (xi: 28); Simon, Niger and Lucius of Cyrene and Macedonia (Acts xiii: 1).

It is stated that the inhabitants of Saran and Lydda turned to the Lord; one of them was Eneas (Acts ix: 33). At Joppa many believed in the Lord on the death of Tabitha being raised from the dead by Peter (Acts ix: ). At Cesarea Paul found many believers, among whom were Philip the evangelist (already mentioned) with his four daughters, and Māson, an old disciple (xxi: 10).

Beyond the boundaries of Palestine we find Christians in Antioch (Acts xiii: 43), and a great multitude of believers at Iconium (xv: 1). We may mention Jason, Aristarchus and Secundus at Thessalonica (xvi: 6; xx: 4); Sopater, of the flourishing congregation at Berea (xx: 4); Gaius of Derbe (xvi: 23); Tyrannus, who kept a school at Ephesus; Justus and Crispus, withfields, chief rulers of the synagogue at Corinth (Acts xviii: 7, 8, 17; 1 Cor. i: 1), and the numerous believing Jews at Philippi and Rome (Acts xxviii: 24).

The first nucleus of the seven apocalyptic churches consisted also of Israelites. Peter wrote the first epistle in the midst of a Jewish-Christian Church at Babylon, and addressed it to the strangers scattered throughout Pontus, Galatia, Cappadocia, Asia and Bithynia. James also wrote his epistle to the twelve tribes which are scattered abroad, and this proves that in the most remote countries there were believing Israelites.

It is but natural to assume that these believing Israelites were the means of spreading, if not the Gospel as such, yet the sayings of Jesus. Thus these sayings found their way into the Talmud, a fact overlooked by modern Jewish apologists who claim the priority of the Talmud to the New Testament, and make the latter the copy of the former.

According to Eusebius, up to the reign of the Emperor Hadrian (120) there were fifteen Jewish-Christian bishops at Jerusalem. Among the teachers of the ancient church who were of Jewish origin we may mention Hegesippus (150-180); Ariston of Pella, and especially Epiphanius, Bishop of Constantia, who also tells (Haeres. XXX) of the conversion of the Jewish patriarch Hillel, a descendant of the house of Jacob.

Without dwelling on the manner in which the Christian Church developed itself, which, on the one hand gave cause to the Jews for complaining of the great zeal of the Church in converting them, and on the other hand, to the Church for complaining of the great obstinacy of the Jews, we will glance at some of the most famous converts prior to the Reformation, who were especially animated to spread the Gospel among their fellow countrymen. But it is reported that these converts were only samples of a whole list of witnesses to the power of the truth—single ears selected out of a multitude of sheaves gathered into the garner of God.

Commencing with Spain we find in the latter part of the 4th century, the young bishop of Toledo (died 690), author of a work against the errors of Judaism concerning the coming of the Messiah, entitled: De sexta aetatis comprobatione contra Judaeos.

Between 1066 and 1108 flourished Pedro Alfonso, formerly Rabbi Moses of Huesca in Aragon, physician to King Alfonso VI., and author of an apologetical work against the Jews.

A contemporary of Pedro Alfonso was Samuel, by birth an African, but baptized in Toledo in 1085. He returned to Morocco, where he held a public discussion with a learned Arab on the truth of Christianity. Of other converts we mention John de Valladolid; also John de Podico of the 14th century; Joseph Hallorki, called after his baptism Hieronymus de Sancta Fide, of the 15th century, famous as Talmudist and physician.

But the greatest of all were Paulus of Burgos, and De Santa Maria, formerly Rabbi Solomon Levi of Burgos, and baptized with his four sons in 1390. He studied theology after his baptism and received from the University of Paris the degree of Doctor of Divinity. He was appointed Archbishop of Burgos, and subsequently Bishop of Carthagena and lastly Bishop of Burgos, where also he died August 25, 1440. Of his four sons, Don Alfonso, who for many years was archdeacon of Compostella, succeeded his father in the bishopric of Burgos. He took his seat at the Council of Basel in 1431, as a representative of Castile, and was treated with high honor on account of his great talents and distinguished excellence.

Without increasing the number, suffice it to say that even the Jewish historian Graetz, by no means a friend of the Church, still less of converts, must admit: “By the rise of educated, physicians, authors, poets, Judaism was deprived of many talents; some of them were possessed of a zeal for conversion, as if they were born Dominicans.” (Geschichte viii: 83.)

In France we hear, besides, of Nicolas de Lyra, professor of theology (1300-1340), who was of Jewish descent; of Philipp D'Aquin (died 1650), professor of Hebrew at Paris; Louis Compiègne de Véz and his brother Charles; Pierre Vignoles (died 1640), for fifty years professor at the College of Paris.

In Italy the Jews had to listen, since the time of Gregory XIII., once a week to a sermon, and many a one was thus led to Christ. Paul III. founded in 1550 a special institute for the conversion of the Jews. The 16th century is especially rich in Jewish converts, of whom we mention the following: Marco de Monte, Jehiel Pisaurenis, philosopher and physician, and his contemporary, Paul Eustachius de Nola, Hebrew teacher of Thomas Aldrobrandin, brother of Pope Clement

---

[1] For more particulars the reader is referred to my article on this and other converts in McClintock and Strong's Encyclopedia, Cyclop., including vol. xi., xii., forming the supplement volumes.
VIII.; Sixtus Senensis, author of the Bibliotheca Sancta (Venice, 1560); Alessandro di Francesco, friend of Clement VIII. and Bishop of Fort; Fabianus Fioghi, professor of Hebrew at Rome; Remigius Regem, bishop of the Premonstratensians at Rome; Emmanuel Tremellius, one of the most celebrated men of his time (said to have been converted by Marco Antonio Flaminio), who died in 1580; Paulus Conasso; also Paulus Paradisus, professor of Hebrew (died 1545); Felix Praehensius (died 1590), editor of the first Rabbinic Hebrew Bible; Raphael Agulisno, John Baptist Elias, and others too numerous to be mentioned.

In England the Jews had their vicissitudes. Yet in spite of the manifold troubles special care was taken of those who embraced Christianity. Special buildings, converts' houses, were created, in which the Gospel was not only preached to the Jews, but the converts were educated there, and many a dignitary in the State and Church proceeded from these houses. We shall again speak of England in the sequel.

In Germany the Jews had to undergo many sufferings. The inroads of the Tatars, the Crusades, more especially the Black Death, were causes for persecutions. Compulsory baptisms were the only means of escaping the fiercest persecutions, and it was in vain that some popes, and teachers like Bernard of Clairvaux, protested against such compulsory measures. Yet there were not wanting such among the Jews who could not resist the workings of the divine grace, and who of their own conviction joined the Church. Thus, especially in the diocese of Wurtz, the bishop of Cappenberg, who after his baptism entered in 1123 the order of the Premonstratensians and became abbot of Cappenberg in Westphalia. He, too, protested against compulsory measures, but in vain. In the 19th session of the Council at Basel in 1434 it was enacted that the bishops everywhere should see that the Jews were instructed in the Christian religion. The worldly powers showed a better disposition toward the Jews by protecting them, altho' this protection was bought at a great price. Yet, after all, sharply was the Reformation in Germany, a feeling to prevail in Germany, which had the good effect that many a Jew was brought to the truth as it is in Christ, without compulsion.

In our rapid survey we have come down to the Reformation period, with which a brighter morning came, tho', on the whole, the Reformation, whether in its early days or in later times, with all its great teachers and numerous adherents, effected little or no change in the disposition of the Christians toward the Jews. Luther appeared well disposed toward them in the beginning of his career as a reformer. But afterward he spoke very differently of the Jews, either from indignation at some theologians of Wittenberg, whom he looked upon as infused with the leaven of rabbinism, or from disappointment because the Reformation, by which he had promised a favorable influence over the minds of the Jews and their conversion to the Gospel, found no more favor or assistance than Romanism with this entirely singular nation.

Yet after all it cannot be denied that the influence which the Reformation exerted, especially by the more careful study of the Bible and its translation, had a salutary effect on the people in general and on the clergy, especially in speech and in writing, the preachers and teachers endeavored to impress upon the Jewish mind the truth as it is in Christ, and in this respect they were assisted by the writings of such Jewish Christians as Paul Staffelteiner, professor of Hebrew at Heidelberg; John Harzuge, who in 1540 published his translation of the New Testament in rabbinical type; Christian Gerson and Georg Philip Lichtenstein, both ministers of the Gospel; Vincen von Carben, a priest at Cologne; Paul Weidner, and others of the Roman Catholic Church.

A new impulse was given to the missions among the Jews in the 17th century, especially by the efforts of Esdras Edsard, of Hamburg. He had studied at different universities and had especially devoted himself to the study of rabbinic literature. Buxtorf, in Basel, and the Jewish rabbi of his native place, Cohen de Lara, were his teachers in Talmudic literature. In 1656 he took his degree as licentiate of theology at Rostock without entering upon the academical career. Being a man of means, he was able to associate and direct the work of a student at Hamburg, devoting his knowledge and time to the conversion of the Jews, and he succeeded in bringing a great many Jews to Christ. He not only preached the Gospel, but also helped those in a practical manner who had joined the Church, and endowed a charitable house, the interest of which was to be devoted to missions among the Jews. From all parts of Europe scholars flocked to Hamburg to hear from him how to converse with Jews and how to refute their arguments. After his death, in 1708, Edsard's sons continued the work of his father, and the sinking-fund founded in 1667, is now under the administration of the Hamburg Senate, still serving the original purpose. The good seed sown by Edsard bore its fruit in due season, and in many places houses were built for the temporal relief of Jewish converts.

Outside of Germany, the Christians of Holland showed an especial interest for the conversion of the Jews, to whom, toward the end of the 18th century, permission had been granted to settle again in Holland. The Synod, held at Dort in 1618, at which the Reformed Church of the United Provinces had its synods first established, in 1676 and 1775, passed resolutions concerning the spiritual welfare of the Jews. Men like Hugo Grotius, Labbadie, Isaac Vossius, John Hoornbeck, the two Spanhems, Cocceius, Episcopius, Hulsius, Witsius, Sarurias, and others, wrote with a view of converting the Jews, and many a Jew was received into the Church.

The Jews, formerly banished from England, were again allowed to settle there under Charles II. We have already spoken of the early missionary work among the Jews in England. Suffice it to say that after the resettlement of the Jews the work of converting the Jews was continued. Of the literary productions of this period we only mention Bishop Kidder's A demonstration of the Messiah, in which the truth of the Christian religion is defended, especially against the Jews, London, 1684-1700, and translated also into German by P. E. Rambach, Rostock, 1751. Another missionary work was Leslie's A short and easy method with the Jews, London (1698, and after).

But we return again to Germany, where with the 18th century a new era commenced for the Mission among the Jews.

The first quarter of the 18th century was a period of great religious excitement in Germany,
owing to the indefatigable labors of Spener and A. H. Francke (especially by the "collegia pietatis" of the former), which quickly spread far and wide, among high and low, poor and rich. The Bible, which had been entirely neglected and forgotten, was taken in hand again; and how extreme the desuetude into which the word of God had fallen may be gathered from the fact that Spener had to procure a special order from the Elector for the practical explanation of some part of the Bible at the universities. A fruit of this new life in the Church (and regeneration) was the foundation of the University of Halle. Bible and missionary societies were also called into existence. Nor were God's ancient people forgotten. An interest for the Jews was evinced to a degree exceeding anything known in former periods of the Church. It seems as if rulers, magistrates, professors, the clergy had been alike animated with zeal for the conversion of Israel, for we find that Reineccius, in one of his works, published 1713, says: "The general topic of conversation and discussion of the period was talk about the conversion of the Jews." This "mixed" interest for Jewish conversion was so great that we are told that many Christians learned to read Jewish-German in order to make themselves better acquainted with Jewish books and more efficient for conversation with Jews. Professor Callenberg lectured on that language and had an auditory of 150 persons.

The Rev. John Muller of Gotha, who very often came in contact with traveling Jews, and took a lively interest in them, wrote a tract for the Jews, entitled The Light of Eventide, in dialogical form, which was intended to prepare the Jewish mind for the reception of Jesus Christ the Messiah, and through the extraordinary exertions of Dr. Frommann, a physician and Jewish convert, it was published in Jewish-German for wider circulation among the Jews. This tract produced the greatest sensation. For soon it was not only reprinted and translated into Hebrew, but also a German (1736), Dutch (1735), Italian (1732), French (1748) and an English translation was published, the latter by the Society for Promoting Christian Knowledge, in the year 1734, and it is still used for missionary purposes.

The most brilliant effect of this movement interested, besides his conversion, and sent subscriptions for promoting it to Prof. Callenberg. This tract is the more remarkable because it became in part the foundation-stone for the well-known Callenberg Institution, or Institutum Judaeicum, established in 1728, the object of which was the conversion of the Jews, and also of Mohammedans. This institution, however, was closed in 1792. But the interest in behalf of the Jews was not confined to Germany alone; it also spread beyond the Continent, for the well-known Jewish missionary, Stephen Schultz, tells us in his Leben der Höchsten (v. 74), that when he visited England in 1749, he was told that there were many laymen in London zealous for the conversion of the Jews.

Next to Spener we must mention the early efforts made by the Moravian Brethren. It was in the year 1738 that Leonhard Dober, who had established the society among the Jews in the West Indies, felt an earnest desire to labor for the conversion of the Jews. For this purpose he repaired to Amsterdam and hired a lodging in the so-called Juden-Dörk. In 1739 Samuel Lieberkühn succeeded Dober in Amsterdam, who devoted himself entirely to the service of the Jews. On account of his knowledge of Hebrew and his love of Israel, the Jews called him "Rabbi." For thirty years Lieberkühn labored among the Jews with great success.

The Callenberg Institute, as we have seen, was closed in the year 1792, but in the providence of God another way was to be opened for the mission among the Jews. It was only a few years after the first great thunderclap of the French Revolution, that began in 1789, in whose hearts God had begun a work of grace, were assembled together for mutual consultation and direction, in a room in the metropolis of Northern Germany. They were pondering in their minds what they should do, and whether they should, go that they might go? they might be employed in the cause of missions. Berlin, their native metropolis, was at that time the stronghold of rationalism, the center of religious infidelity; and evangelical religion, or pietism, was above all things hated and almost universally spoken against. Where were the three German students to go? Pastor Jäncke and some few other pious Christians in Berlin, who had established a seminary where six or seven students were trained for missionary enterprises, were pinned to the ground in the interest of funds. Their cause met with little sympathy and they were almost in despair, when one day help came in time of need from another great metropolis, with a demand for three missionaries to occupy an important missionary post among the heathen Jews of Africa. In the autumn of 1801. Our three students went to London in order to enter the service of the London Missionary Society, and one of these was a Christian Israelite, C. F. Frey by name, who died in 1853 in America, a member of the Baptist denomination. During his stay in London it was put into his heart to visit his brethren after the flesh. He found them in a state of total darkness and bondage worse than that of their fathers in Egypt. He spoke to them of Christ and His salvation. He engaged a few Christian friends to feel a concern for their spiritual welfare. He made known to the directors of the London Missionary Society his earnest desire to be permitted to preach the Gospel to his own brethren. This application was favorably considered by the directors; they acceded to his request, and some three years having been consumed in the needful preliminary preparation, we find him, in 1805, commencing in earnest missionary work under the auspices of the London Missionary Society. It was soon, however, discovered that the work required distinctive and peculiar machinery. Accordingly, after the brief existence of a few years, in 1808 a separate society, which contemplated Jews exclusively as its object, the present London Society for Promoting Christianity among the Jews, was founded in the house of Lewis Way. The founder of this Society was the nobleman Lewis Way. It was in the year 1808 that Lewis Way, while riding with a friend of his in Devonshire, passed a park where some very fine trees attracted their attention. His friend told him that the owner of this park in her last will and testament, willed the cutting down of these trees until "the Jews would again have come to Jerusalem." These words so deeply impressed themselves on the mind of Lewis Way that he never forgot them. From
that day he devoted his large fortune as well as his talents to the conversion of the Jews. At the first the newly constituted society was composed both of churchmen and dissenters. In 1815, by the Duke of Kent, the dissenting members retired from its management, and its liabilities having been discharged by Way's munificent donation of £10,000, it entered on the present phase of its existence as a Church of England Society on the 11th of March, 1815. In the year 1815 the Duke of Kent, the founder of the Berlin Mission for the Jews, Queen Victoria of England, laid the foundation-stone of the Episcopal Chapel in Palestine Place, in which up to this day divine service is held in different languages. This Society, which was so small at the beginning, has not only its own printing establishment of Hebrew Bibles, etc., but also its stations in Europe, Asia and Africa, occupying 52 stations, with a staff of about 200 laborers, of whom nearly 100 are Christian Israelites. It has recently also opened a station at Montreal, Canada. We have reached the period in the last two-thirds of the mission among the Jews from which time on mission work is carried on systematically. In speaking of the missionary societies we must commence with England, as the motherland of the present Protestant Jewish mission. I. England: The London Society for Promoting Christianity among the Jews, founded in 1809, has over 50 stations, with 200 missionaries. It employs nearly 100 Christian Israelites, and has its stations in Europe, Asia, Africa and Canada. The London Society has different institutions, as homes for inquiring Jews, homes for converts, homes for learning a trade, schools, hospitals, churches and colleges. The "Operative Institution," founded in 1831, has admitted about 1,000 persons, of whom more than 100 have become converts. The "Wanderingers' Home" has received during the forty-five years of its existence over 2,500 Jews, most of whom were baptized. The Society records over 5,000 Jewish baptisms; the church record of Zion's Church, at Jerusalem, the oldest evangelical church in the East, show the mission among the Jews as having about 1,000 baptisms. The annual income of the Society amounted March 31, 1903, to over £18,000. It receives an annual contribution from the Emperor of Germany and from India, Sierra Leone, Australia and Canada.

The British Society for the Propagation of the Gospel among the Jews, founded in 1842. It has 34 missionary workers in 18 stations in England, Germany, Austria, Russia, Turkey and Italy. It has schools, medical missions and homes for aged converts. Whereas the London Society has distinct units the Hebrew New Testament of Delitzsch, the British Society distributes the Salkinson-Ginsburg version, both Christian Israelites.

The Presbyterian Church of England, founded in 1860, has 8 missionary workers in London, Amsterdam and a medical mission in Morocco.

The London City Mission (Jewish branch) employs 8 Hebrew Christians as missionaries to Jews and other foreigners.

The Parochial Missions to the Jews at Home and Abroad, founded in 1876, has 10 missionary workers in London, Manchester, Liverpool and Bombay.

The Barbican Mission to the Jews, founded 1879: The Hebrew Christian Testimony to Israel, founded in 1894; The Kilburn Mission to the Jews, founded in 1896; The Jerusalem and the East Mission Funds; The East London Fund for the Jews; The Wild Olive Mission; The East End Mission to the Jews; The Breach Lane Mission; The Hebrew Christian Mission to Israel; The Christian Chief Corner-Stone Mission to the Jews; The Prayer Union for Israel, and other small independent societies in London, Liverpool, and other English cities, are all concerned about Israel.

II. Scotland: The Jewish Mission of the Church of Scotland, founded in 1840, employs 40 workers in Smyrna, Salonica, Alexandria, Constantinople and Beirut, and has 10 schools.

The United Free Church of Scotland Mission to the Jews, founded in 1843, employs 80 workers in Edinburgh, Breslau, Budapest, Constantinople, Safed, and Tiberias, and has 8 schools.

The Scottish Home Mission to Jews, in Glasgow; The Jewish Medical Mission, in Edinburgh; The Bonar Memorial Mission, in Glasgow, and some small local societies all do good work.

III. France: The Jewish Mission of the Presbyterian Church in Ireland, founded in 1841, has 20 workers in Hamburg, Altona and Damascus.

The work in Hamburg is flourishing.

The Church of Ireland Jews' Society, founded in 1859, carries on work in Cork, Dublin and Belfast.

IV. Germany: Besides the Edzard Edzard Fund, mentioned already, we have:

The Society for Promoting Christianity among the Jews, in Berlin, founded in 1822. It has its stations in Berlin, Vienna and Stettin.

The Central Organization of Evangelical Lutheran Missions among Israel, founded in 1871, in Leipzig, is supported by the Jewish missionary societies in Saxony, Bavaria, Wurttemberg and Hannover.

The West German Association in Cologne, founded in 1842, carries on its work in Cologne, Frankfort and Strasbourg.

The Instituto Judaico, one at Leipzig, another at Berlin, help to prepare theological students for the work among the Jews by making the students acquainted with Rabbinic and Jewish literature.

V. Switzerland: The Society of the Friends of Israel, in Basel, has a station at Strasbourg and Prague.

VII. The Netherlands: The Netherlands Society for Israel, founded in 1861, has 2 missionaries at Amsterdam.

VIII. Norway, Sweden and Denmark: The Central Committee for Jewish Missions, in Christiansland, works in Braila and Galatz.

The Evangelical National Society, in Stockholm, employs a missionary in Hamburg.

The Society for Missions to Israel, in Stockholm, has 9 workers in Sweden, Hungary and Russia.

The Swedish Missionary Union has 2 missionaries in Sweden.

The Society for Missions to Israel, in Copenhagen, supports a missionary in Stanislav.

IX. Russia: Missionary work is carried on by Pastor Faltin, of Kischinew.
X. Africa, Asia and Australia: In Africa we have the Alexandria Jewish Mission; in Asia we have small local societies in Bombay, Calcutta, Hebron, Jerusalem, whereas 4 missionary societies are working in Australia.

XI. America: There are some 30 American societies, denominational and undenominational or interdenominational. As missionary work is also carried on by individuals, it is very difficult to give correct lists.

Of the denominational societies we mention:
2. The Board of Foreign Missions of the Presbyterian Church, founded in 1871, has been carrying on work among the Jews in Persia and Syria.

The Lutheran Church is represented by
5. The Norwegian Zion Society for the Jewish Mission of the Evangelical Lutheran Synod of Missions, Ohio and other States, founded in New York in 1885.

The Lutheran Church is represented by
5. The Norwegian Zion Society for the Jewish Mission of the Evangelical Lutheran Synod of Missions, Ohio and other States, founded in New York in 1885.

10. The Baptists founded in 1887 the Missionary Society of the Seventh-Day Baptists. Besides these missions, there are a number of independent workers and societies, which makes it impossible to give very accurate and complete statistics. Nevertheless, the work goes on everywhere. A German missionary has stated that during the 19th century about 300,000 Jews joined the Church; this number, if based upon records, is undoubtedly a conservative minimum, since it is very difficult to get access to the church records of the Roman Catholic and Greek Churches. Prof. Heman, in the third edition of the Protestant Encyclopedia, now edited by Prof. Hauck, of Leipzig, estimates that among the more than 10,000,000 Jews of the globe, more than 50 societies with about 500 workers do missionary work. According to the tables of the Rev. L. Meyer (see Appendix) this is a very low estimate.

The Rev. A. E. Thomson, in his book, "A Century of Jewish Missions," gives the following numbers:

<table>
<thead>
<tr>
<th>Country</th>
<th>Number of Societies</th>
<th>Number of Missionaries</th>
</tr>
</thead>
<tbody>
<tr>
<td>America</td>
<td></td>
<td></td>

<tr>
<td>Total</td>
<td>213</td>
<td>608</td>
</tr>
</tbody>
</table>

A very interesting table is given by Prof. Heman, son of the late H. W. D. Heman, an excellent Hebrew Christian, and for several years the director of the home for Jewish converts at Basel. He says:

Great Britain, with 200,000 Jews, has 124 workers.
France, 77,000 5
Germany, with 568,000 Jews, has 24 workers.
Austria-Hungary, 1,660,000 17
Belgium, 380,000 2
Denmark, 4,000 1
Greece, 5,800 2
Holland, 97,000 2
Italy, 50,000 3
Portugal, 4,700 2
Rumania, 300,000 11
Russia, 4,500,000 10
Sardinia, 4,700 2
Bulgaria, 31,000 1
Spain, 2,300 1
Sweden, 3,700 8
Switzerland, 12,500 1
Turkey, 128,000 21
Turkey in Asia, 150,000 103
Asia Minor, 40,000
Asiatic Russia, 30,000 10
Azerbaijan, 14,000
India and Ceylon, 12,000 5
Egypt, 22,000 12
Abyssinia, 50,000
Tripolitania, 58,000
Tunisia, 60,000 12
Algeria and Sahara, 48,000 2
Morocco, 100,000 2
Transvaal, 12,000
Cape Colony, 1,500
United States, 1,000,000 150
Brazil, 28,000
Antilles, 3,000
South America, 12,000
Australia, 17,000 2

It is impossible to give an accurate estimate of the Jewish population of the world.

Prof. Dalman, in his book "A Century of Jewish Missions," published in 1893, sets the total down as 11,404,250. In Israel, My Glory, published in 1892, Rev. John Wilkinson makes an independent estimate, the total of which is 9,706,500. The American Jewish Year-Book for 1901-1902 puts the number down at 10,766,780. A comparison of the figures with those of the Statesman's Year-Book for 1903 shows great differences. At the Zionist Congress, in London, in August, 1900, it was stated that "according to the latest statistics we muster about 12,000,000." From all it may safely be stated that the population is, perhaps, between 11,000,000 and 12,000,000. But whatever the number, Judaism is not a unit. It is divided and split up in parties. The great mass is indifferent and this indifference is especially seen in the number of mixed marriages. A Jewish writer in a pamphlet published in 1900 tells us that during the years 1891-1896, 2,087 mixed marriages took place in Prussia, and 985 in Berlin alone. In New South Wales, we glean from another source, as many as 361 mixed marriages took place, whereas 1,562 Jews married within their own religion. Many Jews belong outwardly to Judaism, but their children are brought up as Christians. The rich and influential Jews have no interest whatever in Judaism, and "Judaism" is to the ones a stumbling block, to others, looseliness. What the Jews need is the Gospel as the only power which can burst the chains in which their consciences lie stricken, and fill their unsteady hearts with that peace which passeth understanding.

The Jews like to say that there are no converts really convinced of the truth of Christianity; that they were all bought, somehow or other, etc. It would be a waste of time and of paper and ink to refute these assertions. It was a very easy matter to mention a host of professors, ministers, teachers and others, who were blessed with earthly means, and put became followers of Christ. If names count, we could fill page after page with names of Jewish converts who distinguished themselves in every sphere of life.
Beyond Missionary Union (1889), with (1900) 4 missionaries, 2 with their wives; 2 women missionaries, 2 native workers, 1 day school and a dispensary.

JILORE: A settlement in British East Africa, among the Garama tribe, situated in the valley of the Savaki River, about 75 miles S. of Mombasa. Station of the CMS (1890), with (1903) 1 missionary, 15 native workers, men and women; 13 outstations, 2 day schools and 161 professed Christians, of whom 50 are communicants.

JIMBA. See JUMBA.

JODHPUR: A town in Rajputana, India, capital of the native state of Jodhpur (also called Marwar). It is situated 98 miles W. of Ajmere. The town was built in 1549 and is surrounded by a strong wall six miles in circuit, with seventy gates. The Maharaja's palace stands on the crest of a hill overlooking the town several hundred feet below. Population (1901) 60,432, of whom more than three-fourths are Hindus. Station of the UFS (1885), with (1903) 1 missionary and his wife, 1 woman missionary, 3 native workers, a dispensary and a hospital. Name also written Jodhpur.

JOHANNESBURG: A town in the Transvaal Colony, S. Africa, situated 30 miles S. by W. of Pretoria, at an altitude of 5,600 feet, in the Witwatersrand gold fields. The climate is pleasant and healthful. The European population exceeds 40,000, and the whole population is (1890) 105,000. Station of the WMS, with (1903) 12 mission stations, 278 native workers, men and women; 99 preaching places, 9 elementary schools, 1 boarding school and 3,029 professed Christians. Station also of the Berlin Missionary Society (1887), with (1900) 1 missionary, 11 native workers, 7 outstations, and 395 professed Christians. Also of the ABCFM (1803), with 1 missionary and his wife and 1 woman missionary. Also station of the South Africa Baptist Missionary Society, with 1 missionary.

JOHNSON, Albert Osborne: Born at Cadiz, O., June 22, 1833; graduated at Jefferson College, 1852; logical at the Theological Seminary, 1855; ordained by Presbytery of Ohio in June and sailed July 17, same year, for India, as a missionary of the PN. He was stationed at Fatehgar. At the commencement of the Sepoy mutiny he with others attempted to reach Allahabad, a British station, but was made prisoner and put to death at Cawnpur by order of the rebel chief Nana Sahib, June 13, 1857.

JOKER: A settlement in British New Guinea, situated on the S. coast of the island, about 90 miles N. W. of Port Moresby. Station of the LMS (1894), with (1903) 1 missionary and 2 native workers.

JOKYOKARTA: A town in Java, Dutch East Indies, situated 55 miles south of Samarang. It is the capital of the Dutch residence. Population 59,000. Station of the Reformed Church of the Netherlands (1895), with (1900) 2 missionaries (one of them a physician) and their wives, 2 native workers, 2 outstations and 1 dispensary. Name written by the Society, Djokjokarta.

JOLFO LANGUAGE: One of the Negro group of African languages. It is spoken by a considerable number of tribesmen inhabiting the region bordering on the Gambia River in West Africa. It has been reduced to writing by mis-
sionaries, with use of the Roman alphabet. It is also called Wolof.

JROD. See ERODE.

JUDÉO-GERMAN, JUDÉO-SPANISH, etc., language: These and similar compounds are used to designate the form, when written with Hebrew letters, of the German, Polish, Spanish, etc., languages used by Jews to whom these languages (or some dialect of them) have become vernacular.

JUDD, Gerrit Parmelee: Born at Paris, N. Y., April 25, 1805; studied medicine with his father at Paris, and at the Medical College, Fairfield, N. Y.; sailed as a medical missionary of the American Board for the Sandwich Islands, reaching Honolulu March 31, 1828. In 1840 he accompanied Captain Wilkes in his exploring expedition through the islands. After fourteen years' faithful missionary work his connection with the mission ceased, and in 1842 he became recorder and interpreter to the Government of Kamchamah III. When Lord George Paulet took possession of the islands in 1843, Dr. Judd was appointed one of the joint commission to represent the Calamianes island. In 1845 his appointment was restored to Kamchamah July 31, 1843, he was invited by the king to organize a ministry, which he did, and this was the first Hawaiian cabinet. In 1844 he became minister of finance, which office he held till 1853. He extricated the government from its financial embarrassments and in many ways was eminently serviceable to the nation. He died at Honolulu, January 12, 1873.

JUDSON, Adoniram: Born at Malden, Mass., August 9, 1788; graduated at Brown University, first in his class, 1807. After graduating he taught school for a year, and published Elements of English Grammar and Young Ladies' Arithmetic. In 1808 he entered Andover Theological Seminary, not as a candidate for the ministry or a professor of religion, but as a person deeply in earnest on the subject, and desirous of arriving at the truth. In the seminary that year he was converted. The reading of Buchanan's Star in the East and his association with Mills, Richards and Hall, who had arrived at Andover from Williams College, led him to resolve to become a missionary to the heathen. The ABCFM having been formed in 1810, and its funds not being sufficient to justify the appointment of the six young men who wished to go on a foreign mission, Mr. Judson was sent to England to secure the cooperation of the London Missionary Society in the support of a mission in the East. On the voyage the English ship was captured by the French and he was thrown into prison at Bayonne. Released, he proceeded to England. Unsuccessful in the immediate object of his journey, he was, on his return, appointed by the American Board as a missionary to India or Burma; and, embarking February 19, 1812, reached Calcutta June 17. Having changed his views with regard to baptism, he severed his connection with the Board. Being forbidden to remain in the East India Company's territories, he went, with his wife, to Mauritius. Here he remained four months, laboring among the English sailors of the garrison, and then sailed for Madras. Fearing to remain in the Company's territory he embarked for Rangoon, Burma, which he reached July, 1813. He and his wife took up their residence in the house of Mr. Felix Carey, who was then absent, and who afterward resigned his mission in their favor. After six years' labor, the first convert, Moung Nau, was baptized. From 1824 to 1826, during the war of England with Burma, Mr. and Mrs. Judson endured terrible hardships. Suspected of being spies, he was arrested in 1825 and 1826, accompanied by an executioner, who seized him, threw him on the floor, bound him fast with cords and dragged him away from his wife. He was thrown into the death-prison, and for seventeen months confined in the loathsome jails of Ava and Oung-pen-la, being bound during this period with three and, during two months, with five pairs of fetters. His sufferings from fever, heat, hunger, and the cruelty of his keepers were excruciating. Mrs. Judson also suffered, though not imprisoned. By her persistent entreaties and large presents, and finally by the demand of General Campbell, he was, at the end of two years, released. In 1826 the headquarters of the mission were transferred to Amherst. But he was soon called to Ava to act as interpreter in the negotiation of a new treaty between the English and the Burmese government. In 1828 he visited the court at Rangoon. In 1829 he joined the Boardsmans at Maulmain, which became the chief seat of the Baptist missions in Burma. Desiring to carry the Gospel to Central Burma, Mr. Judson in 1830 made long tours in the interior, and spent three months in futile efforts to establish a mission in the adjacent city of Prome. Before returning to Maulmain he spent a year in Rangoon. At a great festival here he was applied to by thousands for tracts.

In 1831-32 Mr. Judson made three tours among the Karens, and with encouraging success. In 1834 he was married to Mrs. Sarah H. Boardman. During that year he completed the translation of the Bible into Burmese, which he had commenced seventeen years before in Rangoon. In 1838 he says there were above a thousand converts from heathenism formed into churches. In 1839, threatened with pulmonary disease, he took a short voyage, returning to Maulmain in two months with health somewhat improved. In 1842 he commenced, at the urgent request of the Board, the preparation of a Burman dictionary. In 1845 he embarked for America for his own health and that of his wife, accompanied by two Burman students to help him in his work of preparing a dictionary. Mrs. Judson died at St. Helena. He reached Boston October 15. Too weak for public speaking, he addressed crowded assemblies through an interpreter. Having again married, he returned to Burma in 1846, and resumed work at Rangoon on the dictionary. But the intolerance of the Burmese Government and the sickness of the missionaries caused him to leave Rangoon and return to Maulmain, which he reached September 5, 1847. Here he worked steadily at the dictionary, which he was compelled to leave unfinished, for his health had so utterly failed that in 1850 he set out for a long sea-voyage as the only hope of saving his life. He died April 12, 1850, scarcely three days out of sight of the mountains of Burma, and his body was committed to the deep. Dr. Judson was a man of great piety, a close student, and very thorough in his work. He was well known throughout India. The Crown Prince of Siam invited him to visit Siam at his expense. The English
Judson, Ann Hasseltine: Born at Bradford, Mass., December 22, 1789; taught for several years at the Alford Academy; married Dr. Judson and embarked with him for Burma February 19, 1812, and in July, 1813, reached Rangun. Her health having failed in a year and a half, she sailed for Madras January, 1815, returning after an absence of three months with health much improved. Several thousands of Siamese being in Rangun, she studied that language, and with the assistance of her teacher translated it into the Burman Catechism, a tract, and the Gospel of Matthew. She also translated a celebrated Siamese work into English. She had frequent seizures of the infant. In 1820 she became seriously ill, and was taken by Dr. Judson to Calcutta, partly for a voyage and partly to procure medical assistance. She returned with health improved, but soon was again prostrated, and August 21, 1821, embarked for America by the way of Calcutta and home in September, 1822. While there a history of the Burman mission, begun by her in London, was published in England. With health partially restored she returned to Burma with Mr. and Mrs. Wade, reaching Rangun December 5, 1823, and with Dr. Judson removed to Ava. There she soon had a school of native girls. But on the breaking out of war with England she was called to share in his sufferings. While he was fettered in the death prison, she was guarded in her own house by ten ruffianly men, deprived of her furniture and most of her personal effects. Being released the third day, she sought in various ways the comfort and release of her husband. "She followed him from prison to prison, ministering to his wants, trying to soften the hearts of his keepers, to mitigate his sufferings, interceding with government officials or with masters of the royal family. In a year and a half she thus exerted herself, walking miles in feeble health, in the darkness of the night or under a noontday sun, much of the time with a babe in her arms." After a treaty of peace was concluded, Dr. and Mrs. Judson were again at Rangun. March 21, 1826, having been absent two years and three months. The English having made the new town of Amherst their capital, Dr. and Mrs. Judson established the mission there. During his absence at Ava as interpreter for the English and Burmans, Mrs. Judson built a small bamboo dwelling-house and two schools-houses, in one of which she gathered ten children; in the other she herself assembled the few native converts for worship on the Sabbath. In the midst of these toils she was attacked with fever, and, after sixteen days' illness, died, October 24, 1826, in the 37th year of her age. She was a woman of mental endurance and love, much devoted to the care of her children and aged parents, and to literary pursuits. She gave much time to the preparation of the papers for President Wayland's Memoirs of Dr. Judson. She died at Hamilton, N. Y., June 1, 1854.

Judson, Sarah Hall (Boardman): Born at Alstead, N. H., November 4, 1803; married Rev. George Dana Boardman and embarked July 16, 1825, for Burma, but was detained in Calcutta by the war till 1827. After Mr. Boardman's death she determined, the urge by friends in America to return, to remain in Tavoy, and for three years of her widowhood she continued her husband's work, proclaiming Christ to Karen inquirers, conducting schools, making long tours, often in drenching rains, "through wild mountain passes, over swollen streams and deceitful marshes, among the craggy rocks and tangled shrubs of the jungle." In April, 1834, she was married to Dr. Judson. She was familiar with the Burmese language, having acquired unusual fluency and power in conversation and prayer, and writing it with accuracy. She conducted weekly prayer-meetings with the female church-members and another for the study of the Bible. She translated into Burmese the first part of Pilgrim's Progress, several tracts, twenty of the best hymns used in the Chapel Hymn-book, four volumes of Scripture Questions for Sunday schools and a series of Sunday cards, each containing a short hymn. She learned also the language of the Peguans, and superintended the translation of the New Testament and the principal Burmese tracts into that language. Her health having failed, she left for home with Dr. Judson April 26, 1845. She died on shipboard in the harbor of St. Helena, September 1, 1845 and was buried on the island, having spent twenty-one years in mission work.

Juiz de Fora: A town in Brazil, S. America, situated on the Parahiba River, 85 miles N. of Rio de Janeiro, at an altitude of 2,300 feet. Population (with the district) 15,000. Station of the MES (1884), with (1900) 3 missionaries and their wives, 3 women missionaries, 3 native workers, 2 outstations, 8 Sunday schools, 2 day schools, 1 boarding school, 1 theological training school and 328 professing evangelical Christians. Also called Parahibuna.

Ju-Ju, The Long: This was a fetish jealously guarded by the Aro tribe at a point not far from Cross River in Southern Nigeria. The Aro tribe has long been celebrated for slave-hunting, cannibalism, guardianship of this important shrine, and determined refusal to recognize the British rule or to permit foreigners in their land. In the heart of their country the Long Ju-ju was shrouded in mystery. Fierce and bloodthirsty guards surrounded the place, in a circle of villages where all had to settle who wished to consult the Ju-ju. Such visits were sometimes months in length, blindfolded, and led to the terrible place which no man of West Africa mentions without a shudder. Few who trusted themselves to the
guards of the Long Ju-ju ever returned. Those who did return were worn and prematurely aged, stripped of all possessions and unwilling to speak of what they had seen.

A case reached the ears of the British Government where 200 wretches from Nigeria, who had been charged by their tribes with various crimes, had sought to prove their innocence by the weary pilgrimage involved in an appeal to the arbitrament of the Long Ju-ju. A miserable remnant of 136 feeble and broken creatures was all that ever returned, and since the Aro country is in British territory, credit for the horrors of the great fetish was laid at the door of the English.

After much evidence that the place was a center of infernal rites and beastly cannibalism, the British Government demanded that the Aros suppress these practices. The demand having been insolently refused, a force was sent into the country in 1901 which broke the power of the Aros and captured the Long Ju-ju shrine.

The place of the shrine was a narrow pit-like crater seventy feet deep and 200 feet long, surrounded by dense brush. In the bottom of the crater was a singular, rent rock from which poured forth two large streams of water. This curious double stream pouring from rents in the solid sock, was the Long Ju-ju. It was shut in by a roof of human skulls and veiled by a curtain of cloth and matting. In front of the double water source were two altars foul with blood and covered with votive offerings and the recently stripped skulls of men. The water of the great double spring flowed away in a stream of some depth, and in the water were fish. There were numbers of fish—strange, yellow-eyed creatures, tame through confidence that abundance of blood and offal from human sacrifices would continue to fatten them as of old. All the approaches to this awful place were bordered by piles of human skulls.

It was the last stronghold of the infernal cult of fetishism which insists on human flesh for its sacrament. But one thing could be done with a place of such infamy and influence, and the English commander had the place blown up with dynamite.

**JULFA:** A town in Persia, lying on the Zende Rud, opposite Isphahan, with which it is connected by bridges as a suburb. It is peopled largely by Armenians, the descendents of captives brought by Shah Abbas from the Caucasus. Station of the CMS (1875), with 14 missionaries, men and women (including hospital nurses); 32 native workers, men and women; a printing house, 3 day schools, 2 hospitals and dispensaries and 246 professed Christians. Great extension has been given to medical work here, which has offered special channels of access to Mohammedans. There is also a sub-agency of the BFBS, with branch depots at Yezd, Shiraz and Sultanabad.

**JULLUNDUR.** See JALANDHAR.

**JUMBA:** A settlement in British East Africa, situated about 20 miles N. W. of Mombasa. Station of the Leipzig Missionary Society (1886), with (1900) 4 missionaries, one with his wife. Name also written Jimba.

**JUNGO:** A settlement in Uganda, Central Africa, situated on the northern shores of the Victoria Nyanza, about 32 miles S. W. of Mego. Station of the CMS (1895), with (1903) 109 native workers, men and women; 1 preaching place, 1 day school and 2,320 professed Christians, of whom 423 are communicants.

**JU-NING-FU:** A town in the province of Ho-nan, China, situated in the E. part of the province, about 100 miles east of Nan-yang. Station of the American Norwegian Church Mission Society (1899), with (1900) 1 missionary and his wife and 1 native worker. Name written by the Society Running Fu.

**JUNNAR:** A town in the Bombay Presidency, India, situated about 50 miles N. of Poona. Station of the CMS (1843), with (1903) 1 missionary and his wife.

---

**K**

**KABAKADA:** A settlement on the island of New Britain, or Neu Pommern, in the Bismarck archipelago, Western Pacific Ocean. It is situated at the northern extremity of the island, and is a station of the Australian Wesleyan Methodist Mission Society, with (1900) 1 missionary, 65 native workers, 4 outstations, 21 places of worship, 23 day schools, 1 theological training school and 331 professed Christians.

**KABANROE:** A town on the western coast of Sumba Island, Dutch East Indies. Station of the Reformed Church of the Netherlands (1892), with 1 missionary and his wife, 2 native workers and 281 professed Christians.

**KABAROLE:** A settlement in the Toro district of Uganda, Africa, situated 170 miles W. of Mengo. Station of the CMS (1899), with (1903) 4 missionaries, two with their wives; 2 women missionaries, 30 native workers, 1 village school, 1 female helpers' training class, 1 dispensary, 1 hospital and 2,209 professed Christians, of whom 645 are communicants. The Dutiful Church statistics are included with these.

**KABOEROEANG ISLAND:** The same as Kabuang in the Talaut Islands, Dutch East Indies.

**KABYLE LANGUAGE:** Belongs to the Hamitic family of African languages and is spoken by various tribes found in Algeria and Tunis. It is written with Arabic letters. It is also sometimes called the Kabail language, Kabail being the plural of Kabyle.

**KACHABARI:** A village in Lohardaga, district of Chota Nagpur, Bengal, India, situated 20 miles southeast of Lohardaga. A station of the SPG, with 9 native workers, 1 chapel, 3 day schools and 311 professed Christians.

**KACHIC:** A native state situated in the Bombay Presidency, India, between Kathiawar and Sindh. Its southwestern border rests upon the
Indian Ocean. Its habitable area is about 6,500 square miles, and its population (1901) 487,374. North and east of the state, covering an area of nearly 9,000 square miles (making the total area within the limits of Kachch over 15,000 square miles), stretches a salt desert, uninhabitable, untillable, and often in the rainy season impassable, known as the "Rann of Kachch." It is believed to be the bed of what was once an arm of the sea, but which has been raised above its original level and cut off from the ocean. During the rainy season it is often inundated, partly by the waves of the sea, driven against it by strong southerly winds, and partly by the rainfall from the adjacent region draining into it. During the dry season its surface is often encrusted and glittering with salt. The surface of Kachch as a whole is described as treeless, rocky and barren. It is cut by ranges of hills, rising at the highest point to an altitude of 1,450 feet above the sea. There is a fair proportion of good soil, the grain figures among the articles imported. Kachch is especially noted for its beautiful embroideries and for its manufactures of silverware. The population is about three-fifths Hindu and a little more than one-fifth Mohammedan; the Jains number about 67,000. The roads are poor, and during the rainy months the country is nearly impassable. Missionary operations have been undertaken by the Kurku Inland Mission at one point (1897), where is now a beginning of a Christian community.

KACHIWA: A town in the United Provinces, India, situated about 20 miles W. of Benares. Station of the LMS (1897), with (1903) 2 missionaries and their wives, 1 hospital and 1 dispensary.

KADAVELLY: A town in the N. W. part of Ceylon, India, situated about 40 miles S. of Jaffna. Station of the WMS, with 44 native workers, 7 outstations, 8 Sunday schools, 8 day schools and 76 professed Christians.

KADING. See Kiating.

KADIRI: A town in the district of Cuddapah, Madras, India, 88 miles N. N. E. of Bangalore. Population (1901) 13,000. 1,000 Hindus. Station of the LMS (1890), with (1903) 1 missionary and his wife, 20 native workers, men and women; 11 outstations, 11 Sabbath schools, 10 day schools and 293 professed Christians.

KAFIR LANGUAGE: Belongs to the Bantu family of African languages and is spoken in the Transkei district of Cape Colony, South Africa. It has been reduced to writing by missionaries of the WMS, the Roman alphabet slightly modified being used.

KAFIRLAND: A region in the eastern part of Cape Colony, South Africa, lying between the rivers Kei and Unzimkulu, once occupied by the Kafirs. It was also sometimes called Xhariafrica. It is now known by the names of the different districts into which it has been divided: Transkei, Tembuland and Griqualand East. The great attractions of the country, it being at once the most salubrious, fertile and beautiful embrocure region of South Africa, have helped to overcome the difficulties and dangers of colonization, and there is now a continuous zone of European settlements throughout the region.

KAFIRS: The Xosa, or Kafirs, are a tribe of Bantu blood found in the eastern part of Cape Colony. Their account of themselves is that they came gradually down from the northeast, some two or three hundred years ago, and settled in districts lying between the Kei and the Unzimkulu, one of their tribes claimed the weaker Hottentot and Bushman tribes. The name Kafir, which in Arabic signifies infidel, or those who do not hold the Muslim faith, was first applied by Arabs to the heathen tribes with which as traders they came in contact, along the East Coast of Africa, which would seem to give sanction to the above historic saying. And then, too, in the Kafir's practice of polygamy and the rite of circumcision, and especially in his proud bearing and martial spirit, in his somewhat Arabian features, and in his hue, not generally so dark as that of the pure Negro, many see proof of his having been for a time associated with the Arab race.

KAGOSHIMA: A town in Kyushu, Japan, situated on a bay on the S. E. coast, opposite the volcanic island of Satawa Shima, and about 88 miles S. S. E. of Nagasaki. One of the most ancient cities of Japan. It has a large number of potters and porcelain factories. Population 74,000. Station of the RCA (1893), with (1903) 1 missionary and his wife, 1 woman missionary, 5 native workers, 5 outstations, 1 chapel, 3 Sunday schools and 75 professed Christians. Station also of the CMS (1895), with (1903) 1 missionary and his wife, 1 woman missionary, 3 native workers, 3 outstation, 2 Sunday schools and 104 professed Christians, of whom 34 are communicants. Station also of the ME, with (1900) 2 women missionaries, 1 native worker, 1 chapel, 3 Sunday schools and 47 professed Christians.

KAI-FENG-FU: The capital of the province of Ho-nan, China, situated 110 miles E. of Ho-nan and about miles from the right bank of the Hoang Ho. It was the capital of the empire from 1250 to 1405 under the name of Tung King. It possesses the only Jewish colony in China, with an entire population of 100,000 people. Station of the CIM (1902), with 4 missionaries and 1 dispensary.

KAI-HSIEN: A town in Sze-chwan, China, situated 150 miles W. by N. of Kwei-chau-fu. Station of the CIM (1902), with 1 missionary and 4 outstations.

KAILANG: A village in the Punjab, India, situated in the Lahoul region, 45 miles northeast of Dharamsela. Station of the Moravian Mission (1856), with (1900) 3 missionaries and their wives, 4 native workers, 10 day schools, 1 industrial school. Name sometimes spelled Kialang.

KAIWARN: A city in Turis, N. Africa, situated in the center of a vast plain 31 miles W. S. W. of Susa. It was founded in 670. For two centuries it was the capital of successive Arabian dynasties. It has fine mosques, of which the largest is a second story building with 40 arched windows. Population 10,000. Station of the North African Mission (1897), with (1900) 1 missionary and his wife, 2 women missionaries, and a dispensary.

KAISARIYEH: A city in Asis Turkey, situated in the province of Angora and about 200 miles S. by W. of the City of Angora. It lies in a fertile plain at an altitude of 5,585 feet, near the foot of Mt. Ararat (Erciyes). It was in ancient times capital of Cappadocia, and is now the seat of an Armenian bishop. The climate is dry, pleasant and healthful, with a tendency to
extremes of heat and cold, however, owing to the altitude of the plain. Population, 72,000, of whom 45,000 are Mohammadans, 14,500 Greeks, 9,000 Armenians, and about 2,000 Evangelicals. A large number of the population furnish many enterprising business men who find their way into foremost places in Constantinople, Smyrna, Adana, etc., and have even made their mark in mercantile circles in London, Manchester and New York. Evangelistic work was begun in Ceylon in 1823 by Mr. E. Barker, Agent of the BFBS. The Scriptures which he distributed here were as seed falling into good ground. Later the persecution of Protestant Armenians in Constantinople had for one of its incidents the exile to Cæsarea in 1839 of a preacher, Hohannes der Sahagian, and of other Evangelicals in 1845. These all preached the Gospel wherever they were, with the result that a number of the people of the city, in 1849, sent to the ABCFM missionaries at Antab an earnest request for a preacher. In 1854 the ABCFM sent Rev. W. A. Farnsworth and his wife, followed in 1864 by a permanent station. It now (1903) has 3 missionaries and their wives, 6 women missionaries, 74 native workers, men and women; 35 outstations, 25 places of worship, 31 day schools, 2 boarding schools, 1 hospital, 1 dispensary, and 1,658 evangelistic workers. The place is commonly called Cæsarea by English-speaking people, the name Kaisariyeh being the Turkish corruption of this.

KAI-YUEN: A town in Manchuria, Chinese Empire, situated in the province of Liao-tung, 68 miles N. N. E. of Mukden. Population, 35,000. Station of the UFS (1896), with (1903) 1 missionary and his wife, 1 woman missionary, 17 native workers, 4 outstations, 18 Sunday schools, 1 hospital, 1 dispensary, and 838 professed Christians.

KAKONDA: A town in Portuguese West Africa, situated 140 miles S. E. by E. of Benguela in the district of that name. Altitude 5,500 feet. Station of the FCMS (1900), with 1 missionary and his wife.

KALABASTI: A town in the north Arecot district, Madras, India, 60 miles N. N. W. of Madras, on the Suvarnamukhi River. Population, 11,800. The town has large bazaars, and is a place for pilgrimage, as it contains one of the most famous temples of Siva. Station of the Hermannsburg Missionary Society (1873), with (1902) 1 missionary and his wife, 6 native workers, 2 outstations, 3 day schools, and 198 professed Christians, of whom 104 are communicants.

KALASAPAD: A town in the district of Nellore, Madras, India, situated about 62 miles northwest of Nellore. A station of the SPG (1861), with (1903) 1 missionary, 60 native workers, 3 chapels, 53 day schools, 2 boarding schools, and 4,732 professed Christians, of whom 1,477 are communicants. Name sometimes spelled Kalsapad.

KALGAN. See CHANO-KIA-KAU.

KALIBASI: A settlement in Nabil, S. Africa, 33 miles N. N. E. of Ladysmith. Station of the UFS (1897), with (1903) 1 missionary and his wife, 14 native workers, 14 outstations, 10 day schools, and 427 professed Christians.

KALIMPONG: A town in Bengal, India, situated on the borders of Bhutan and Sikkim, about 15 miles E. by N. of Darjiling, at an altitude of 9,000 feet. It is a strange meeting place of races and religions. The town has about 13,000 inhabitants, who are Nepalis, Lepches, Bhutias, and other hillmen, besides plague-stricken of various races. These may amongst them be seen Buddhists, Hindus, Spirit-worshippers, Mohammadans, and Christians, and all contrive to carry on traffic in spite of divergences of language and creed. Station of the Church of Scotland Foreign Missions' Committee (1873), and the C. of S. Women's Society's (1899) 1 missionary, 4 missionaries and their wives, 2 women missionaries, 12 native workers, men and women, and 1 dispensary. Another name of this place is Dalingkot.

KALITJERET: A town in the island of Java, Dutch East Indies, situated 30 miles S. W. of Samarang. Station of the Neukirchen Missionary Society (1885), with 2 missionaries, 11 native workers, 10 outstations, and 2 schools.

KALKA: A village in the Punjab, India, 23 miles S. W. of Simla. Altitude, 2,000 feet. Population, about 5,000. Station of the BMS (1888), with (1903) 3 missionaries, 1 missionary's wife, 15 native workers, men and women; 5 outstations, and 9 day schools.

KALKHAS LANGUAGE: A Mongolian dialect used in Chinese Mongolia. The alphabet is nearly the same as that of the Manchu.

KALLAKURCHI: A town in the Presidency of Madras, India, situated 58 miles S. E. of Cuddalore. Station of the Danish Missionary Society (1894), with 2 missionaries and 2 native workers. The station is called by the Society, Bethesda.

KALLAR: A village in the E. part of North Ceylon, India, situated about 20 miles S. E. of Batticaloa. A station of the WMS (1903), with 24 native workers, 12 outstations, 13 chapels, 12 Sunday schools, 12 day schools, and 121 professed Christians.

KALMUCKS. See MONGOLA.

KALMUNA: A town on the E. coast of Ceylon, India, situated about 26 miles S. E. of Batticaloa. Station of the WMS with (1903) 2 missionaries, 1 woman missionary, 35 native workers, 6 outstations, 7 chapels, 7 Sunday schools, and 178 professed Christians.

KALMA: A town in the district of Bardwan, Bengal, India, on the right bank of the Bhagirathi River, 42 miles N. of Calcutta. Population (1891) 9,700, of whom about 8,500 are Hindus. Medical station of the UFS, with (1903) 2 missionary physicians, 4 native workers and 4 dispensers. The church statistics are included in those given at Hugli.

KALUTTURA: A town in the western part of Ceylon, situated about 27 miles south east of Colombo. Population, 11,000. A station of the SPG, with (1903) 40 native workers, 3 chapels, 8 day schools and 189 professed Christians. The WMS also has a station at this place, with (1903) 2 missionaries, 35 native workers, 8 outstations, 8 chapels, 8 Sunday schools, 12 day schools and 169 professed Christians, of whom 126 are communicants. Name is also sometimes spelled Kalutara.

KAMAMET: A town in Haidarabad, India, situated 100 miles N. W. of Masulipatam. It is a station of the CMS (1888), with (1903) 1 missionary and his wife, 42 native workers, 1 chapel, 8 village schools and 1,464 professed Christians.
of whom 348 are communicants. Station also of the CEZ (1889), with (1903) 2 women missionaries, 28 native workers, 7 village schools and 1 dispensary. The name is sometimes spelled Khummame and Khummamatt.

KAMBIA: A town in Sierra Leone, W. Africa, situated near the frontier of French Guinea and about 25 miles from the sea. Station of the Ponggas Mission (1897), with 1 missionary and his wife.

KAMBOLE: A settlement in British East Africa, situated about 25 miles S. W. of the southern end of Lake Tanganyika. Station of the LMS (1894), with (1903) 2 missionaries and their wives, 6 native workers, 9 schools and 1 dispensary.

KAMERUN: A German protectorate in Western Africa, lying between Nigeria on the north-west and the French Congo on the east, extending to Lake Chad on the north, and having the Bight of Biafra for its western boundary, with a coast line of 199 miles. Its area is 191,130 square miles, with a population estimated at 3,500,000.

The coast mountains over against the island of Fernando Po, one peak of 14,000 feet, surpassed on the African continent only by Kenia, Kilima-Njaro, Simen (in Abyssinia) and the lately explored Ruwenzori. Its lower portions are covered with a luxuriant vegetation of palms, acacias, fig-trees, kokas, plantains and other trees and shrubs. At a height of 7,000 feet are found ferns, grasses and heather. Springs are rare, none being found above 9,100 feet. The summit is bare, except for a few trailing plants sheltered in the hollows. The surrounding country is well watered by small lakes and rivers, with their confluent and deltas. But little of the region has been explored or brought under the influence of its European masters. In the summer rainy season (May to August) the rainfall is very heavy, and the season of the winter rains is characterized by squalls, tornadoes and dense vapors. The chief station and seat of government is Buea, beautifully situated on the mountain.

Kameruns is a name applied collectively to a dozen populous villages on the east side of the Kamerun estuary.

The chief inhabitants are of Bantu origin and speech. These include the lively, intelligent and daring but very superstitious Bakwiru, between the coast and the mountains; the industrious and equally superstitious Bakundu of the northern slopes; the communist Balonga and trading Amba east of the Bakundu; the tom-tom beating and well-known Duulla of the Kamerun estuary; farther south the savage Bakoko and the Batanga, who are the most skillful boat-builders in Africa, and the Fangs, who are pressing to the coast from the interior.

In the northern portion of the territory the population is composed almost entirely of the Sudanese negroes.

The first missionary operations in this region were undertaken by the BMS in 1858, when its missionaries were driven from Fernando Po by Spanish bigotry. At that time the missionaries found danger from the savages on the mainland and less than that of the Europeans who ruled the island. They transferred their work to the Basel Missionary Society in 1886, two years after the German Protectorate was announced. The PN (1885) and the German Baptists (1891) also have stations. There are altogether in Kamerun 16 stations where missionaries reside, with 115 schools of various grades and about 2,500 native communicants and Christians.

KAMPITI: A town in the Central Provinces, India, 8 miles N. E. of Nagpur, and just below the confluence of the Kanhon with the Pench and Kolar Rivers. It has considerable trade in timber and grain. Population (1891), 43,000, of whom 28,500 are Hindus and 11,500 are Mohammedans. Station of the ME, with (1900) 1 missionary and his wife, 14 native workers, men and women; 5 day schools, an orphanage and 83 professed Christians.

KAMUNDONGA: A town in Angola, W. Africa, 245 miles E. of Benguela. Station of the ABCFM (1886), with (1901) 2 missionaries and their wives, 2 women missionaries, 7 native workers, 1 industrial school, 1 theological training class, 1 hospital, 1 dispensary and a printing house.

KANA: A settlement in the Transvaal Colony, S. Africa, 52 miles E. by N. of Pretoria. Station of the Hermannsburg Missionary Society (1867), with (1900) 2 missionaries, a missionary's wife, 9 native workers, 5 outstations, 5 day schools, and 1,467 professed Christians.

KANAUJ: A town in the United Provinces, India, situated in the district of Farukhabad, 49 miles N. W. of Cawnpur, on the right bank of the Kali Nadi, formerly bed of the Ganges. The change in the bed of the river ruined the town. Anciently it was a city of importance, capital of a great Aryan kingdom. It was the scene of several battles between the Turks and Hindus. Population (1891) 17,600, of whom 10,000 are Hindus. Station circuit of the ME, with (1903) 14 native workers, 14 Sunday schools, 5 day schools and 89 professed Christians.

KANAZAWA: A town in Japan, situated on the W. coast of the main island of Hondo, 125 miles N. N. E. of Kioto. It is celebrated for its manufactures of fans, pottery, and bronze-ware overlaid with gold and silver. Population 96,600. Station of the PN (1879), the PE and the Methodist Church in Canada (1891). Taken together these missions have (1900) 4 missionaries, 3 wives of missionaries, 6 women missionaries, 7 native workers, 12 native wives; 3 Sunday schools, 1 boarding school, 1 orphanage, 3 industrial schools, 5 places of worship and 3 Sabbath schools.

KAN-CHAU-FU: A town in the province of Kiang-si, China, situated on the Kia-kiang, 213 miles N. N. E. of Canton. It has somewhat important manufactures of Chinese ink and varnish. Station of the CTF (1893), with (1903) 5 missionaries, two of whom are accompanied by their wives.

KANDUKUR: A town in the Madras Presidency, India, 58 miles N. of Nellore. Population (1891) 7,600, of whom 6,000 are Hindus. Station of the ABMU (1903), with (1903) 1 missionary and his wife, 9 native workers, 21 outstations, 2 places of worship, 1 day school and 785 professed Christians.

KANDY: A town situated near the center of the island of Ceylon, built on the margin of an artificial lake 1,734 feet above the sea, 58 miles N. E. by E. of Colombo. It was formerly the capital of a kingdom called by that name, and con-
tains the tombs of the Kandian kings, together with many handsome temples. Population (1891) 20,400. It is the headquarters for mission work and instruction in the central part of Ceylon. Station of the CMS (1818) and CEZ (1889), with together (1903) 4 missionaries, three with their wives; 6 women missionaries, 279 native workers, 120 day school girls; 120 day schools, 1 boarding school, 1 college (Trinity College), and 5,050 professed Christians, of whom 1,788 are communicants. Station also of the WMS, with (1903) 1 missionary, 1 woman missionary, 48 native workers, men and women; 9 outstations, 9 places of worship, 11 Sunday schools, 12 day schools, 1 boarding school, 1 industrial school for girls and 223 professed Christians. Outstation also of the BMS (1844), with a self-supporting church under a native pastor.

KANG-HWA: A town situated on the west coast of Korea, about 30 miles northwest of Chemulpo. A station of the SPG (1893), with (1902) 4 missionaries, 6 native workers, 4 chapels, 1 high school and 24 Christians. Name sometimes spelled Kang Hoa.

KANG-PUL: A town in the province of Kwang-tung, China, 45 miles east of Canton. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 4 native workers, 4 outstations, 5 day schools, and 239 professed Christians, of whom 163 are communicants.

KANGRA: A town in Punjab, India, situated 90 miles E. N. E. of Amritsar. It was formerly called Nagarkot. Population, 5,200, of whom 4,000 are Hindus. It is a station of the CMS (1854), with (1903) 1 missionary and his wife, 12 native workers, 1 chapel, 1 dispensary, 3 village schools, 1 industrial school, and 99 professed Christians, of whom 44 are communicants. The church statistics of Dharmasala are included in the above.

KANGUNDO: A settlement in British E. Africa, in the Kikuyu region, about 15 miles from the Ft. Smith station of the Uganda Railway. Station of the Africa Inland Mission (1896), with 3 missionaries, 2 of them with their wives.

KANGRIJ: A town in the Madras Presidency, India, 74 miles N. N. W. of Negapatam. Station of the ABMU (1892), with (1903) 1 missionary and his wife, 91 native workers, 70 outstations, 31 Sunday schools, 62 day schools, and 8,577 professed Christians, of whom 3,641 are communicants.

KANNANUR. See CANNANORE.

KANO: A town in North Central Africa, situated west of Lake Chad and about 320 miles N. W. of Lokoto on the Niger. It lies in the territory of the British Niger Protectorate, commonly called Northern Nigeria. It is one of the most important commercial centers in Africa, having been known as an emporium for ivory, ostrich feathers and gum araloe as early as the 10th century. Up to the present time the ordinary currency used in trade has consisted of slaves. Kano is often spoken of as an important town of the "Hausa," but there is no people called locally by that name, Hausa being the name of a language spoken in a large area of northern Nigeria, of which those who are not by any means a coherent nation, altho the most of the Hausa-speaking peoples are dominated by Fulani Mohammedans, who rule the land in various independent states, of one of which Kano is the capital. In 1903 the British troops, to punish the Mohammedan Emir for the murder of a British official, attacked and captured Kano and deposed the Emir. This breaking of the Fulani yoke caused great rejoicing among the pagan majority of the population, whom the Fulani Mohammedans have long used as serfs. Kano has a population estimated at 50,000. The CMS will establish a station here at an early day.

KANYA: A settlement in Rhodesia, South Central Africa, situated about 60 miles N. N. W. of Mafeking. It is the chief town of the Bangwaletsi tribe and residence of the chief, Bateon. Station of the L.MS (1871), with (1903) 1 missionary and his wife, 40 native workers, men and women; 3 schools, and 2,400 professed Christians, of whom 642 are communicants. Name written by the Society, Kanya.

KAO-YU-CHAU: Town in the province of Kiang-su, China, situated on the Grand Canal, 40 miles N. of Chen-kiang-fu. It is the "Kai-yu" of Marco Polo. Station of the CIM (1888), with (1903) 4 missionary women, 3 native workers, 1 day school, and 1 boarding school. Name written by the Society, Kao-yu.

KAPASDANGA: A village in the district of Nadiya, Bengal, India, situated 20 miles N. E. of Krishnagar. Station of the CEZ (1885), with (1903) 2 women missionaries, 3 native workers, 1 village school, and 1 female helper to Christian girls. The central station has now been transferred to Ratnapur. The CMS has here (1903) 8 native workers, 750 Christians, 1 chapel, and 4 day schools. The work is now in charge of the local district church council.

KARACII: A town and the capital of Sind, India, situated 80 miles W. S. W. of Haidarabad on a small bay W. of the Indus. It carries on an important export trade in wheat. Population (1891) of 98,200, of whom 51,400 are Muslims and 42,000 are Hindus. Station of the CMS (1850), with (1903) 1 missionary and his wife, 4 native workers, 1 chapel, 3 day schools, and 95 professed Christians, of whom 53 are communicants. Station also of the CEZ (1880), with (1903) 3 women missionaries, 18 native workers, 7 village schools. Station also of the MS, with 1 missionary and his wife, 14 native workers, 1 chapel, 2 Sunday schools, 2 village schools, and 292 professed Christians, of whom 40 are communicants.

KARAITES: A Jewish sect, existing in Russia (chiefly in the Crimea), Austria (Galicia), Turkey, and other countries of the East, are distinguished by a strict adherence to the Biblical books, and the rejection, except as exegetical aids, of all oral traditions and Talmudical interpretations. They themselves trace their origin to the time of Shalmaneser, and since he carried the ten tribes of Israel to the north, they hold they must worship with their faces to the south. Karaite historians are now, however, greatly divided on the subject of this origin. The Karaites have produced a valuable literature, not only on Biblical interpretations, dogmatism, and other religious topics, but also on philosophy and mathematics, written partly in Hebrew and Aramaic, partly in Arabic and Turkish, which is a peculiar idiom of their own, in a region bordering on the Black Sea, and partly in the languages of the several countries which they inhabit. Their literature is, however, very little known to the Occidental world. Several of their
principal writings have been published at Eupatoria, in the Crimea. The name is also written Carasites.

**KARAITTIC TARTAR TURKISH.** See **TURKISH LANGUAGE.**

**KARAKAL: A town in South Kanara, Madras, India, 30 miles N. E. of Mangalore. Station of the Basel Missionary Society (1872), with (1903) 2 missouries, 1 with his wife, 13 native workers, 4 outstations, 5 elementary schools, and 188 professd Christians. The name as written by the Society is Karkala.

**KARASS LANGUAGE:** Name improperly given to the Nogai dialect of Turkish.

**KARATA: A settlement in Nicaragua, Central America, in the Mosquito Reservation, about 140 miles north of Bluefields. Station of the Mora-
vian Mission (1880), with (1900) 1 missionary and wife, 6 native workers, men and women; 1 chapel, and 1 day school.

**KARELIAN LANGUAGE:** A dialect of the Finnish which is spoken in the district of Tver in Russia. It is written with the Russian alphabet.

**KARENS:** The Karens include several related tribes, scattered over various portions of Lower Burma and extending into Northern Siam. All told they number probably not far from one million. Evidence seems to indicate that their ancestors came into Burma from western China. Indeed they bear a considerable resemblance to the tribals of Western China, or perhaps to a race of old Burman stock, carried by the Chinese Ya-yin or "wild people." The language of the Karens is of the monosyllabic class and Tibetan-Burman family. It was un-
written until the coming of the missionaries, who adapted the Burmese alphabet to its use. Its various dialects so far resemble each other that missionary work is carried on mainly through the use of two, the Sgau and the Pwo dialects. Dr. Mason has grouped the various Karen tribes concisely under three sub-divisions, viz., the Sgau, Pwo, and Bghais. With the Sgau proper he included the Pakus, Maungnghas, and the small tribe of the We-wan; while the Mopghas are classed with the Pwo. The total number of Pwoos and of Sgau has been given as 310,000 and 260,000, respectively. Both these tribes are scattered widely over lower Burma, between the eastern and western Yoma mountain ranges, over the deltas of the Irrawaddy and the Salwen, and on the extreme south of the prov-
ience of Tenasserim. The Sgau and allied tribes extend as far north as Prome and Taung-ngu, the Pwo being found in the southern portion of the Taung-ngu district, while the Maunepghas are east from Shwegwng. The Pwoos are possessed of rather stronger natural traits, and stand rather higher in the scale of civilization than the Sgau. Being more Burmanized, however, they are less accessible to the Gospel, and the transforming power of Christian education is seen chiefly among the Sgau. These tribes are somewhat low in stature, with olive complexion, and dark hair and eyes and gentle manner; attractive faces are common. In the plains the so-called villages are simply small groups of houses, usually from six to twenty, in the rice fields, a village of fifty houses being unusual. The people are chiefly agriculturists, those of the plains industriously raising rice in large quantities.

The Bghais, including several minor tribes, as the Geelgos, Padaungs and others, inhabit the mountains N. E. of Taung-ngu. They are fierce and warlike, except when modified by Christianity, locate their villages on elevations difficult of access. Each village consists of a single house, through which runs a long hall, with rooms opening off either side. The Red Karens, classed by Dr. Mason with the Bghais, receive their name from the color of their dress. They occupy a tralli of N. E. of Taung-ngu, separate from other tribes, and are the most war-like of the Karens, never having been conquered by the Burmese.

The Karens are notably simple-minded, and except for the wilder hill-tribes, are lovers of peace, and possess a character that is a complex mixture of timidity and courage. Timid and retiring ordinarily, on occasions, as during the Anglo-Burmese wars, they have risen to notable heights of courage, showing complete indifference to death. Nevertheless, the Red Karens adore their natural quietness of disposition, together with the smallness of their numbers, kept them in subjection to the Burmese, prior to the British occupation of lower Burma. With a certain stoicism under misfortune, they unite a good deal of the burman-like character of stubbornness.

They are both obstinate and tractable, it being a common saying that a Karen can be led anywhere, but driven nowhere. Petty lying is universal, treachery rare. Much inferior to the Burmese in personal cleanliness, they are also much less immoral. The extreme sensationalism is perhaps an outcome of their long oppression under the rule of other races. The Karens of the plains, however, have largely adopted the Bur-
inese mode of dress, while the use of the Burmese language is rapidly on the increase, especially among the Pwo-Karens. When instructed they develop a decided taste for music, excelling in singing. Under education, their mental processes are slow, but persistent and fruitful. The original nat, or spirit-worship, prevalent among the Karens, has never been modified among the Bghais than in any of the others. God has but little active concern in the world at present, and nothing is to be feared either from him or from good spirits. The Karens in general, therefore, give little thought to either, but concentrate their effort upon the wondrous, the undecipherable, the personal devil, in whom they believe, and the innumerable nats or evil spirits which swarm on every hand, in mountains, streams, trees, and in almost every natural object. Idolatry is found only among those Karens, chiefly Pwoos, who have adopted Buddhism.

The remarkable body of precepts and traditions handed down from the Karen elders has often arrested attention, and has led some to infer a Jewish origin for this people, many of the pre-
cepts possessing much beauty and moral elevation. A few condensed extracts from the traditions are here given:

"Anciently God commanded, but Satan appeared deceiving unto death.

The dragon beguiled the woman and Tha-nai. A white fruit took the great dragon, And gave to the daughter and son of God. They kept not all the law of God; were deceived— deceiving unto death."

The story of the creation of woman from the rip of the first man, and of the forbidden fruit, the woman first transgressing, then persuading
her husband, closely resembles the Scripture narrative. 

Some of estrangement from God, and an almost Missionary hope mingle in the following: 

"God formerly loved the Karen nation above all others, but because of their transgression he cursed them. 

God departed with our younger brother, the white foreigner. 

When God departed, the Karens became slaves to the Burmans."

In the midst of their suffering they remembered the ancient sayings of the Elders: 

"That God would yet save them, that a Karen king would yet appear. 
When he arrives there will be but one monarch, Everything will be happy; 
And even lions and leopards will lose their savageness 

Missionary work among these people has been much helped by the traditions of which these lines are samples: 

"Our ancestors said, that when our younger brothers come back, 
The white foreigners, (in ships from the west), 
Who were able to keep company with God, the Karens will be happy. 
Hence the Karens longed for those who were to come by water."

KARIB, or KARIF: The aboriginal inhabitants of Dutch Guiana, South America. 

KARIMGANJ: A town in Assam, 28 miles E. of Sylhet. Station of the Welsh Calvinistic Methodist Missionary Society, with (1900) 1 missionary and his wife, 1 woman missionary, an elementary school and a dispensary. 

KARIMNAGAR: A town in the native state of Haidarahad, India, situated about 85 miles N. E. of Haidarahad. A station of the WMS, with 1 missionary, 45 native workers, 19 chapels, 28 Sunday schools, 23 day schools and 1,495 professed Christians, of whom 373 are communicants. 

KARKALA. See KARAKAL. 

KARKLOOF: A village in Natal, S. Africa, situated in the Weenen district, 10 miles N. E. of Weenen. Station of the Maritburg Missionary Association, with 1 missionary and 480 professed Christians. 

KARNAL: A town in the Punjab, India, situated 50 miles south by east of Ambala. The city is of great antiquity. Population (1891) 22,000, of whom 17,000 are Hindus. A station of the SPG (1862), with 2 missionaries, 1 missionary woman, 10 native workers, 4 day schools, and 22 professed Christians. Name sometimes spelled Karnaul. 

KARNUL: A town in the Madras Presidency, India, situated in the district of the same name on a rocky point at the junction of the Hindri and Toong rivers confluence. It is the center of a large Telugu population. Climate on the whole malarious. Population (1891) 24,400, of whom 12,000 are Muslims and 10,000 Hindus. Station 25° 20' 55" E., 70° 9' N. (1903) 1 missionary and his wife, 41 native workers, men and women; 20 outstations, 10 day schools, 2 boarding schools and 1,036 communicants. Station also of the SPG, with (1902) 1 missionary, 51 native workers, men and women; 20 day schools and 2 boarding schools. Name written by the societies Kurnool. 

KARONGA: A post of the African Lake Corporation in Nyasaland, Africa, situated on the west shore of Lake Nyasa at the eastern terminus of the Stevenson Road. Station of the UPS, with (1892) 1 missionary and his wife, 59 native workers, 24 outstations and 27 elementary schools. 

KARRACHI. See KARACHI. 

KARS: A strongly fortified city of Turkey in Asia, historically important, and taken by Russia from Turkey in the war of 1877-78. Its population (12,000) is largely Armenian, and it was successfully worked as an outstation of Erzerum (ABCFM) up to 1879. After the city became Russian territory the Evangelical Armenian Church was officially recognized and protected by the government, but the missionaries were not allowed to visit it. The permanency and vitality of the missionary church at this place has been tested by this experience and has not failed under the test. 

KARSHUN LANGUAGE. See SYRIAC. 

KARSIUING: A town in Bengal, India, situated 12 miles S. W. of Darjiling. Station of the Church of Scotland Woman's Missionary Committee (1896), with 2 women missionaries and 2 native women workers. 

KARKODDAM: A town on the east coast of Ceylon, India, situated 38 miles S. S. W. of Batticaloa. A station of the WMS, with 1 missionary, 9 native workers, 2 outstations, 1 chapel, 4 Sunday schools, 4 day schools and 59 Christians. 

KARUR: A town in the district of Coimbatore, Madras, India, situated about 44 miles west north west of Trichinopoly. It is the capital of the ancient kingdom of Chera, taken by the English in 1801. Population 11,000, nearly all of whom are Hindus. Station of the WMS, with (1903) 4 missionaries, 38 native workers, 4 outstations, 5 chapels, 8 Sunday schools, 13 day schools, 1 high school, 1 industrial school, 1 orphanage and 219 professed Christians, of whom 130 are communicants. 

KASEGOD. See CASSEGODE. 

CASEGAR: A city in Chinese Turkestan, the most western city of the Chinese Empire, and capital of the province of Sinkiang. It stands at an altitude of 4,000 feet, at the confluence of several routes of travel, in a rich oasis. Population 50,000. Station of the Swedish Missionary Union (1894), with (1900) 3 missionaries and their wives, 2 native workers, a day school and a dispensary. 

KASHING. See KIA-HISING-FU. 

KASHMIR. See SHINAGAR. 

KASHMIR: A native state in India, lying among the great mountains of the Himalaya range north of the Punjab. Tibet touches it on the east, and after passing the great Karakorum range on the north, one enters soon the territories of Kashgar, wholly outside the limits of India. The country is for the most part an elevated valley, over 5,000 feet above the sea, surrounded by lofty mountains. Total area, nearly
81,000 square miles, with a population of 2,543,952. The ruler is known as the Maharaja of Kashmir-Cashmir, and, like the other native rulers of India, he is in political subordination to the British Government. The predominant religion is Mohammedanism, Hinduism being the religion of about one-third of the people. About one per cent. of the population are Buddhists. Missions have been conducted there with the utmost difficulty until within very recent times on account of the hostility of the native government (the Maharaja is a devout and intense Hindu) and also because the regulation debarring Europeans from permanent residence in the valley compelled the missionaries to break off their labors with the close of the season and leave the country entirely for a large part of each year. In 1854 and again in 1862 explorations and tours were made through Kashmir by missionaries of the CMS station in the Punjab, who made an unsuccessful attempt to establish a permanent mission in 1864. In 1865 Dr. Elmslie, a Scotch medical missionary in the service of that Society, reached Srinagar, and in spite of all obstacles had made a promising beginning when the labors were terminated by his death in 1872. The Society, however, has been able to carry on the mission since, and it has been of great benefit to the people, especially during the famine of 1880 and the distress following the great earthquake in 1884, and the cholera epidemics which swept through the land almost periodically. The CMS now has two mission stations in Kashmir.

KASHMIRI LANGUAGE: Belongs to the Indic branch of the Aryan family of languages. It is spoken in Kashmir and is written with Arabic letters slightly modified for the purpose.

KASUR: A town in the Punjab, India, situated 32 miles S. by E. of Lahore. Population (1891) 20,300, of whom 15,400 are Muslims. Station of the Zenana Bible and Medical Mission, with (1900) 9 women missionaries.

KATANA: A village on the west coast of Ceylon, situated about 25 miles north of Colombo. Station of the WMS (1903), with 1 missionary, 12 native workers, 3 outstations, 5 chapels, 5 Sunday schools, 5 day schools and 80 professed Christians, of whom 61 are communicants.

KATCHI CHI LANGUAGE: Belongs to the Indic branch of the Aryan family, being a dialect of SINDHI strongly affected by the Gujarati. The alphabet used is the Hindi, with some slight modifications.

KATHIWAR: A peninsula, nearly square in shape, which forms the western part of Gujarat (q.v.).

KATNI: A town in the Central Provinces, India, situated 50 miles N. E. of Jabalpur. Station of the CEZ (1897), with (1903) 1 woman missionary, 13 native workers, 1 outstation and 2 village schools. The CMS also has a station here, with (1903) 1 missionary and his wife and 1 outstation.

KAU: A settlement in the island of Balmaheira, Moluccas, Dutch East Indies, situated on Kau Bay in the east central part of the island. Station of when his labors were terminated (1885).

KAVALI: A town in the Presidency of Madras, India, situated in the district of Nellore, 33 miles N. of Nellore City. Population (1891) 5,000.

Station of the ABMU (1893), with (1903) 1 missionary and his wife, 2 women missionaries, 34 native workers, men and women; 20 outstations, 3 places of worship, 4 day schools, 1 boarding school, 1 dispensary and 1,200 professed Christians, of whom 331 are communicants.

KAWATARIA: A station of the Australian Wesleyan Methodist Missionary Society on the Trobriand Islands, lying off the E. shore of British New Guinea, South Pacific Ocean. It now (1900) has 1 missionary, 5 native workers, 2 outstations, 4 places of worship, 3 day schools and a theological training class.

KAWIMBE: A village in Nyssaland, Central Africa, situated at an altitude of 5,300 feet, about 21 miles E. S. E. of the southern end of Lake Tanganyika. Station of the LMS (1887), with (1903) 3 missionaries, 1 missionary's wife, 6 native workers, 13 schools and 1 industrial school.

KAYIN, or KAYINTOCHAU. See KIA-YING-CHAU.

KAZAK, or KAZAN TURKI LANGUAGE. See TURKISH LANGUAGE.

KEBOEMEN: A town in the island of Java, Dutch East Indies, situated about 75 miles S. W. of Samarang. Station of the Reformed Church of the Netherlands (1860).

KEDIRI: A town in the island of Java, Dutch East Indies, situated in a lovely valley 60 miles S. W. of Surabaya. Population 18,000. Station of the Netherlands Missionary Society (1849), with (1900) 1 missionary and his wife, 26 native workers, 15 outstations, 11 day schools and 1 industrial school.

KEDOENG PENDJALIN: A town on the northern coast of Java, Dutch East Indies, about 48 miles N. E. of Samarang. Station of the Netherlands Mennonite Board of Missions (1865).

KEETMANNSHOOP: A station of the Rhenish Missionary Society in German Southwest Africa, situated 180 miles E. of Angra Pequena, among the Namaquas. It has now (1903) 2 missionaries, 1 missionary's wife, 4 native workers, 1 day school and 1,329 professed Christians, of whom 8 are educational graduates.

KEGALLA: A town in Ceylon, situated 20 miles W. of Kandy. Station of the CMS (1880), with (1903) 1 missionary, 2 women missionaries, 3 native workers, 7 outstations, 1 village school and 1 high school. Name is sometimes spelled Kegalle.

KEHURUKO: A station in the Kikuyu district of British East Africa, situated near Ft. Smith, on the Uganda Railway, about 300 miles N. W. of Mombasa. Station of the CMS (1882), with (1903) 1 missionary, 1 woman missionary, 1 native worker, 1 day school and 6 Christians. The place is sometimes spoken of as Kikuyu.

KEITH-FALCONE: Jon: Born in Edinburgh, Scotland, in 1856. Died at Sheikh-Othman, Aden, Arabia, May 11, 1887. Born of noble lineage, surrounded by the most attractive social advantages, blessed by a strong body and vigorous mind, he, early in life, dedicated all of his powers to the service of his Lord. While pursuing his brilliant career at Cambridge, the missionary spirit burned in him and before leaving his native land for the foreign field he entered
upon varied forms of Christian service. He became the leader of a band of Christian students who, in an old theater, near Cambridge, carried on ragged school work and Gospel evangelism, and in after years he joined Mr. Charrington in his Tower Hamlets Mission in the East End of London. He passed his last examination at Cambridge, in 1850, he commenced his study of Arabic, including the Koran, and afterward, in order that he might acquire the colloquial language and learn the temper of the Arabic mind in following the Mohammedan faith, he went to the Nile, and, to Assiout, residing for several months, with the well-known missionary, Dr. H. W. Hogg. In the autumn of 1855 he went to Aden "to prospect," and as a result he determined to locate at Sheikh-Othman, within the territory but 10 miles from the town of Aden. While visiting Scotland in 1856 he laid his plans for a large work in Southern Arabia. He decided to establish a school, a medical mission and a depot for the distribution of the Scriptures. He was willing to put himself under a Scottish Foreign Mission Board with the understanding that he was himself to pay all costs of the mission. In the winter he laid the foundation of his mission, premises and work, and soon the impress of his consecrated life was felt among the Muslims. But the Aden fever proved a fatal foe, and in May, 1857, the "Martyr of Aden entered God's Eden." The Keith-Falconer Mission to Arabia has not died; it is carried on by the United Free Church of Scotland, and since its founder was buried new impulse has been given to the attempt to carry Christianity to the land of Ishmael.

KELE LANGUAGE: Of the Bantu family. It is spoken by tribes found in the Gabun district of the coast region of French Congo, W. Africa. Missionaries of the PN have made literary use of it, writing it with Roman letters. Also called Dikole.

KELLOGG, Samuel H.: Dr. Kellogg went out to India, as a missionary of the American Presbyterian Board (N.), in 1864, sailing from Boston on November 24. He had just graduated from Princeton College in 1861, and from the Princeton Theological Seminary in 1864. In 1876 Mrs. Kellogg died, and he was obliged to return home on account of his inability to arrange otherwise for his four motherless little children, all of them under ten years of age. Early in 1877 he became pastor of the Third Presbyterian Church of Pittsburgh, and in September of the same year succeeded Dr. A. A. Hodge in the Western Theological Seminary. On May 20, 1886, he became pastor of the St. James Square Presbyterian Church of Toronto, Canada, where he exerted a great influence until his resignation in September, 1892, when he returned to India to accept the appointment of the North India and British and Foreign Bible societies as one of a committee of three to translate the Old Testament Scriptures to Hindi. Dr. Kellogg was a man of great mental power and notable scholarship. In 1891-92 he was Stone Lecturer in Princeton Theological Seminary; and besides the section of Leviticus in the Expositor's Bible Series, a book on the Jews in History and Prophecy, and his last book on Comparative Religion, he had written a great deal, both in the way of books and articles. In his death, by accident, May 3, 1899, the mission cause suffered a profound loss.

KEMENDINE: A village in Burma, British India, situated 4 miles north by west of Rangoon, with a population of 5,000. Station of the SPG, with (1902) 1 missionary, 35 native workers, 3 day schools, 2 high schools, and 1,090 professed Christians, of whom 183 are communicants.

KENG TUNG: A town in Burma, British India, situated in the Laos or Shan states, about 240 miles E. by S. of Mandalay and 150 miles N. W. of Chiang Mai, in Siam. Station of the ABMU (1901), with (1903) 1 missionary and his wife and 3 native workers. Name locally pronounced Chieng Toong.

KENT: A town in Sierra Leone, Africa, situated on Cape Shilling 25 miles S. of Freetown. The church there has charge of religious work in the Banana Islands. Station of the CMS (1819), with (1903) 16 native workers, 6 stations, 1 chapel, 1 Sunday school, 7 village schools, and 958 professed Christians, of whom 347 are communicants. The work, however, is carried on by the local church.

KEPELL ISLAND: An island about 22 miles in circumference lying in the South Atlantic near West Falkland Island and a little to the N. of it. The South American Missionary Society occupied this island in 1855 in order to make of it a base for missionary operations in Tierra del Fuego. At the first they did not permit any natives to land upon the island, but after buildings had been erected an industrial and training school was opened with the purpose of preparing the Tierra del Fuego children for usefulness among their own people. The island is not at present retained on the Society's list of stations.

KERAK: A town in Syria, Turkey (Kir of Moab), formerly the capital of Moab. It has a citadel founded in 1131. The town was captured during the crusades, and is now the seat of the bishop. It is situated 5 miles E. of whom; 6,000 are Muslims. This town is the last on the road from Damascus to Mecca where Christians may live. It may be seen from Jerusalem, 50 miles away, since it stands on the mountains of Moab. It is rapidly growing in importance by reason of the Pilgrim Railroad now being built to Mecca. The Turkish Government hampers the mission there considerably, with especial vigilance against the entrance of Western ideas. Station of the CMS (1894), with (1903) 1 missionary and his wife, 1 native worker, 1 dispensary. The statistics are included under Es Salt.

KERBELA: A town in Mesopotamia, Asiatic Turkey, situated about 100 miles S. W. of Bagdad. It is famous for the tombs of Hassau and Hussein, the murdered sons of the Caliph Ali. Since these two men are regarded by the Shi'te Muslims as martyrs, the place of their burial is sacred. To the Shi'ites Kerbela is quite as important a place of pilgrimage as Mecca.

KEREPUNU: A settlement on the southern coast of British New Guinea, situated about 70 miles S. of Port Moresby. Station of the CMS (1877), with (1903) 1 missionary and his wife, 35 native workers, men and women; 21 schools,
and 1,400 professed Christians, of whom 644 are communicants.

Kerman: A town in the province of Kerman, Persia, situated 225 miles N. by E. of Bender Abbas. It stands on a plain surrounded by mountains, just at the confluence of several trade routes. It is a great trading emporium and has many lofty and well-built bazaars. Altitude, 5,680 feet. Population, 40,000. Station of the CMS (1897), with (1903) 1 missionary and his wife, 3 women missionaries, 1 native worker, 1 village school, 1 dispensary, and 7 professed Christians. The name is sometimes spelled Kirman.

KERR, John G., M.D.: Died at Canton, China, August 10, 1901. Dr. Kerr was born in Ohio in 1828, and was appointed by the PN a medical missionary to China in 1853; he remained on the field until 1876, when he came home to educate his children. He remained in the United States until 1878, during which time he was engaged in missionary work among the Chinese in California. He returned to his work at Canton in 1878, and with the exception of the usual furloughs in the United States, he labored with wonderful fidelity and success until his death, completing a service of over forty-four years.

During this period he published twelve works, of thirty-two volumes, in Chinese, on medicine and surgery, besides contributing to many other lines of Chinese literature. His great work was in the Canton Hospital, which he built up from a daily dispensary. During the last few years he was primarily interested in providing a refuge for the insane, and at the time of his death had a building accommodating fifty patients.

It is impossible in a brief sketch to give more than a glimpse of the life work of Dr. Kerr. He has gone to his reward, but his works will remain as monuments to his memory.

Keta: A town in the Gold Coast Colony, W. Africa, situated 150 miles E. of Christiansborg. Station of the North German Missionary Society (1853), with (1903) 3 missionaries, 1 with his wife; 3 missionary women, 17 native workers, men and women; 7 outstations, 9 day schools, 1 boarding school, 1 woman's training school, and 710 professed Christians.

Ketti: A settlement in the western part of Madras, India, situated in the Nilgiri Hills, about 25 miles N. W. of Coimbatore. Station of the Basel Missionary Society (1846), with (1903) 3 missionaries and their wives, 47 native workers, men and women; 26 outstations, 24 elementary schools, 1 normal school for teachers, 1 theological training class, and 473 professed Christians.

Khadaspur: See Mafi Phlang.

Khaigargh: A town in the Central Provinces, India, about 48 miles W. N. W. of Raipur. Station of the Pentecost Bands of the World (1901), with 1 missionary and his wife and 1 woman missionary.

Kamla: A town in the Central Provinces, India, situated near Bithoram, about 40 miles W. S. W. of Bhopal. Station of the Kerku Indian Mission (1889), with (1903) 1 missionary.

Kammamett: A town in the native state of Haidarabad, India, situated about 115 miles E. of the town of Haidarabad. Station of the CMS (1888) and CEZ (1889), with (together, 1903) 1 missionary and his wife, 2 women missionaries, 50 native workers, men and women; 10 village schools, 1 hospital, 1 dispensary, and 1,464 professed Christians, of whom 348 are communicants.

Khandala: A town in the Bombay Presidency, India, well known as a sanitarium, situated about 41 miles N. W. of Poona. Station of the Poona Indian Village Mission, with 3 missionary women and a dispensary. In 1904.

Khandwa: A town in the Central Provinces, India, headquarters of the district of Nimar, and situated 70 miles S. E. of Indore. The climate of Nimar district is, on the whole, good, tho the jungle parts inhabited by the hill tribes are extremely malarious. Population (1891) 15,500, of whom 10,000 are Hindus and 4,500 Muslims. It was once a famous seat of the Jain worship. Station of the ME, with (1903) 1 missionary and his wife, 1 woman missionary, 23 native workers, men and women; 18 Sunday schools, 2 day schools, 1 orphanage, and 689 professed Christians, of whom 79 are communicants.

Kharar: A town in the Punjab, India, 27 miles N. of Amritsar. Population (1903) 1,000. Station of the BMS (1890), with (1903) 1 missionary and his wife, 33 native workers, men and women; 16 outstations, 5 Sunday schools, 16 day schools, 1 boarding school and 530 professed Christians, of whom 281 are communicants.

Kharomat: A town in Bengal, India, 12 miles S. E. of Madnapur. Station of the PB, with 1 missionary and his wife and an orphanage. Name wrongly by the missionaries, Karmat.

Khetum: A town on the left bank of the Blue Nile, close to its confluence with the White Nile, founded by Mohammed Ali Pasha, Viceroy of Egypt, in 1823. It stands at an altitude of 1,273 feet, and has been a center of considerable commerce. For many years it was the capital of the Egyptian Sudan, and was the scene of the tragic death of General Gordon when it was captured by the Mahdi's troops in 1885. It was recaptured by the Anglo-Egyptian forces under General Kitchener, September 4, 1898, and was then found to be in a ruined condition. It has since been recovering its lost prosperity. Population (estimated) 25,000. Station of the UP (1900), with 2 missionaries, 1 physician. Station also of CMS (1902), with 1 missionary and 1 day school.

Khasi Hills: A range of mountains forming with the Jaintia Hills the border between Assam and Bengal. These mountains are inhabited by various hill-tribes,—the Garos, the Khasis, the Jaintias, Nagas, etc.,—who were very degraded, without books or a written language, and engaged mainly in hunting, and at times in robbery. In 1834 the British Government made a treaty with the kings of Khasi, providing for the establishment of a military post at Cherra and the construction of a road to Assam. In 1840 the Wesleyan Calvinistic Methodist Missionary Society sent out their first missionary to the hills, where now, in the seven districts, flourishing churches have been formed, with a membership of over 3,000; and within the day schools and Sunday schools about 10,000 pupils are gathered.

Khasi Language:属 belongs to the aboriginal and non-Aryan languages of Assam. It is written in the Bengali character. Dr. Carey in 1827.

Khasian Language: Belongs to the aboriginal and non-Aryan languages of Assam. It is written in the Bengali character.
adapted the Roman letters to its uses, and have taken steps toward the beginnings of a Khaisian literature.

**KHAITTOLO:** A village in Chota Nagpur, Bengal, India, situated 60 miles S. W. of Lohardaga,36 and annexed to the Gourner Mission Society, with (1903) 2 missionaries, 72 native workers, 33 places of worship, a day school, a boarding school, and 14,557 professed Christians. Name written by the Society, Khutitoli.

**KHED:** A town in the Bombay Presidency, India, situated 22 miles N. of Poona. Station of the Poona Indian Village Mission, with 4 women missionaries and a dispensary. Name written by the Society, Khed-Shiwapur.

**KHERWARA:** A town in Bombay, India, situated 90 miles N. E. of Ahmedabad, in the Bih country of Rajputana. Station of the CMS (1880), with (1903) 1 missionaries, 2 of them with their wives; 2 women missionaries, 15 native workers, 11 village schools, 1 dispensary, 1 orphanage, and 1,059 professed Christians. These statuses include Bilaria and Lusaria.

**KHOKAND:** A territory in Western Turkestan, annexed by Russia in 1876, and now called Ferghana.

**KHALRI.** See Kurai.

**KHUDAWANDPUR:** A station of the Kurku Indian Mission (1900), in the outskirts of Ellichpur, in the Central Provinces, India. It consists of the station buildings connected with an orphanage and a flourishing industrial enterprise for the instruction and support of the orphans. The name, which means City of God, was given to it by the missionaries.

**KULUNGA:** A town in Bengal, India, 78 miles east-northeast of Calcutta. It is a place of considerable importance, with a thriving trade, as all the boat traffic for Calcutta from the E. and N. E. passes by this point. Population (1891) 8,700, of whom 5,000 are Hindus and nearly 3,900 Mohammedans. Station of the BMS (1860), with (1903) 2 missionaries and their wives, 37 native workers, men and women; 15 outstations, 23 day schools, 1 boarding school, 1 dispensary, and 1,059 professed Christians, of whom 339 are communicants.

**KUMMAMET.** See Kamarapet.

**KURJA:** A town in the United Provinces, India, situated in the district of Bulandshahr, 50 miles S. by E. of Delhi. It is quite a center of trade and has a population (1891) of 26,300, of whom 14,800 are Hindus and 11,000 Mohammedans. Station circuit of the ME, with (1903) 12 native workers, 4 places of worship, 35 Sunday schools, 5 day schools, and 1,056 professed Christians, of whom 490 are communicants.

**KUHTITOLI.** See Khaittole.

**KIA-DING.** See Kiaoting.

**KIA-HSING-FU:** A town in the province of Che-kiang, China, situated on the Grand Canal, midway between Soo-chow and Hang-kau. Built in 897. It is an important commercial center, celebrated for its rice, tiles, and brass-work. Station of the FS (1893), with (1903) 3 missionaries and their wives, 1 woman missionary, 5 native workers, men and women; 2 places of worship, 3 day schools, 1 boarding school, and 1 dispensary.

**KIAH-CHAU:** A town in the province of Shan-si, China, 215 miles S. W. of Tai-yuen-fu. Station of the CIM (1895), with (1903) 1 missionary and his wife, 2 women missionaries, 4 native workers, and 1 boarding school. Name written by the Society, Kia-hchau.

**KIAI-HIU.** See Kie-hiu-Hisien.

**KIAK-CHAU:** A town in the province of Shan-si, China, situated on the Fen River 165 miles S. W. of Tai-yuen-fu. Station of the CIM (1898), vacant as yet (1903) since the massacre of missionaries during the Boxer troubles.

**KIAK-TSIN:** A town in the province of Szechwan, China, situated on the southern bank of the Yangtse River, 85 miles from Wu-sung. Population, about 200,000. Station of the PS (1899), with (1903) 2 missionaries and their wives, 1 native worker, 4 outstations, and 4 places of worship.

**KIAK-TING-FU:** A town in the province of Szechwan, China, situated 82 miles S. of Cheng-tu on the right bank of the Min River, at the confluence of the Tung-ho and Ya-ho. It is a center of the silk-weaving industry in that province. Population, about 25,000. Station of the CIM (1888), with 1 missionary and his wife, 2 women missionaries, 4 native workers, 1 day school and 1 dispensary. Station also of the Methodist Church in Canada (1892), with (1900) 2 women missionaries, 1 day school, 1 dispensary, and 1 hospital. Station also of the ABMU (1894), with (1903) 2 missionaries and their wives, 6 native workers, 10 outstations, and 11 places of worship. Name written by the Societies, Kia-ting.

**KIAK-YING-HUI.** A town in the province of Kwang-tung, China, among the Hakka people; situated on the Min River 68 miles N. W. of Swatow. Population, about 30,000. Station of the Basel Missionary Society (1883), with (1903) 3 missionaries (one with his wife), 7 native workers, men and women; 4 outstations, 1 boarding school and 357 professed Christians, of whom 261 are communicants. Station also of the ABMU (1890), with (1903) 2 missionaries with their wives, 8 native workers, men and women; 4 outstations, 3 places of worship, 3 day schools, and 455 professed Christians, of whom 105 are communicants. The name is written by the Societies Kayintscha and Kayin.

**KIBOKOLA:** A town in Angola, W. Africa, 280 miles N. E. of San Paolo de Loanda. Station of the BMS (1899), with (1903) 3 missionaries and 2 wives of missionaries.

**KIBUNZI:** A settlement in the Congo Free State, W. Africa, situated near the right bank of the Congo River, about 20 miles N. of Bansa Manteke. Station of the Swedish Missionary Society (1887), with 1 missionary woman, 12 native workers, 15 outstations, 1 boarding school, 1 orphanage, 1 dispensary, and 385 professed Christians.

**KI-CHAU:** A district in the province of Chi-li, China, lying about 200 miles S. W. of Tien-tsin.
Station field of the LMS (1888), with (1903) 4 missionaries and their wives (the missionary residence being at Hsiao-chang), 17 native workers, men and women; 33 outstations, 2 dispensaries, 1 hospital, and 950 professed Christians, of whom 704 are communicants. Name of district written by the Society, Chi-chow.

KI-CHAU: A town in the province of Shan-si, China, about 50 miles west of Ping-yang-fu. Station of the CIM (1891), with (1903) 1 missionary and his wife, 1 woman missionary, and 1 native worker. Name written by the Society, Kii-chau.

KICHELWE: A settlement in German East Africa, about 12 miles E. S. E. of Dar es Salaam. Station of the Universities' Mission (1893), with (1900) 1 native worker, 2 native women workers, 2 day schools, and 160 professed Christians.

KIDUGALA: A settlement in German East Africa, about 40 miles N. E. from the north end of Lake Nyasa. Station of the Berlin Missionary Society (1898), with (1903) 2 missionaries.

KIE-HIU-HSIEN: A town in the province of Shan-si, China, situated 60 miles S. W. of Tai-yuen-fu. Station of the CIM (1891), with (1903) 1 missionary and his wife, 2 women missionaries, and 1 native worker. Name written by the Society, Kial-hiu.

KIE-YANG-HSIEN: A town in the province of Kwang-tung, China, 25 miles N. W. of Swatow. Station of the ABMU (1896), with (1903) 1 missionary and his wife, 2 women missionaries, 22 native workers, men and women; 20 outstations, 14 places of worship, 7 day schools, and 2,600 professed Christians, of whom 630 are communicants. The name is written by the Society Kit-yang.

KIEL MISSION TO CHINA. See Germany; Missionary Societies in.

KIE-CHANG-HSIEN: A town in the province of Kiang-si, China, 42 miles S. W. of Kiu-kiang; Station of the German China Alliance (1898), with 2 missionaries and a native worker. Station also of the PB.

KIE-CHAU: A town in the province of Shen-si, China, situated about 40 miles N. W. of Hsi-nang-fu. Station of the CIM (1894), with (1903) 1 missionary and his wife and 1 woman missionary.

KIE-NING-FU: A town in the province of Fo-kien, China, situated 90 miles N. W. by N. of Fu-chau. Station of the CEZ, with (1903) 5 women missionaries, 1 native worker, and 1 hospital. The CMS also has a station there (1874), with (1903) 4 missionaries, 2 of them with their wives, 11 native workers, 1 chapel, 1 boarding school, 2 dispensaries, 1 hospital, 1 institute for lepers, and 260 professed Christians, of whom 98 are communicants. This Society writes the name Kien-Ning.

KIE-PING-HSIEN: A town in the province of Ngan-hwei, China, 65 miles S. S. E. of Nanking, 111 miles N. of Shanghai; Station of the CIM (1894), with (1903) 1 missionary and his wife, 2 women missionaries, and 1 native worker. Name written by the Society, Kien-p'ing.

KIE-YANG: A town in the province of Shen-si, China, 95 miles W. N. W. of Hsi-nang-fu. Station of the CIM (1897), with (1903) 1 woman missionary.

KIE-YANG-HSIEN: A town in the province of Fo-kien, China, situated 118 miles N. W. of Fu-chau. A station of the CMS (1891), with 3 women missionaries. Name is sometimes written Kien-yang.

KIFWA: A settlement in the Congo Free State, Africa, situated about 60 miles E. S. E. of Stanley Pool. Station of the ABMU (1890), with (1903) 2 missionaries (one with his wife), 35 native workers, 39 outstations, 4 places of worship, 39 day schools and 492 professed Christians.

KIH-CHAU. See Ki-CHAU.

KIH-YAN. See KI-NGAN-FU.

KIKUYU. See KERERUKO.

KILIMANI: One of the settlements on the Island of Zanzibar, situated S. of the town of that name. Station of the UM (1893), with 4 missionary women, 2 native workers, a day school and a boarding school.

KIMBERLY: A town in Cape Colony, S. Africa, situated in Griqualand West, 647 miles by railway N. W. of Cape Town. It is capital of the Kimberley District, and stands at an altitude of 4,000 feet a little to the east of the great diamond fields not far from the W. border of the Orange River Colony. It is lighted by electric lights and is furnished by aqueduct with good water. Station of the Berlin Missionary Society (1875), with (1903) 1 missionary, 2 missionary women, 8 native workers, 3 outstations, and 930 professed Christians, of whom 370 are communicants. Station also of the SPG (1881), with 1 missionary; also of the South African Wesleyan Methodist Society, with (1900) 41 native workers, 12 outstations, 9 places of worship, 5 day schools and 476 professed Christians.

KI-MBUNDU LANGUAGE. See MAUNDU.

KINCAID, Eugenio: Born at Wethersfield, Conn., 1797, graduated at Hamilton Literary and Theological Institution 1822, in the same class with Rev. Jonathan Wade. Appointed a missionary of the Baptist Triennial Convention for Burma; sailed May 24, 1830. On his arrival in Burma he preached to the English congregation at Maulmain, but soon entered upon work among the Burmese. Bold, brave, he determined to establish a mission at the capital, and in 1833 he went to Ava. There he baptized his first converts. In 1837 he undertook to reach Assam by crossing the mountains between Burma and that country, but was forced to turn back, and having been repeatedly taken prisoner and robbed, he reached Ava in extreme destitution, after a journey of thirteen days. After a short residence in Arakan he was obliged to leave Burma and the missionary service on account of ill-health. In 1850 he returned to Burma under the ABMU and won the confidence of the king, who showed him much favor. After his return to Burma the same year, he labored principally at Prome until 1863, when he took his final departure from the mission field. He was an energetic missionary, especially noted for his long journeys into unexplored regions of heathen territory. He died at Girard, Kan., April 3, 1883.

KIN-CHAU-FU: A town in Manchuria, China, situated about 75 miles W. N. W. of Niu-chwang. Station of the Presbyterian Church in Ireland (1891), with (1900) 2 missionaries and their wives, 2 missionary women, 27 native workers, men and women; 10 outstations, 11 places of worship, 7 day schools, 1 theological training
KINCOLITH: A settlement in Alaska on the W. side of Portland Canal. Station of the CMS (1869), with (1903) 1 missionary and his wife, 2 native workers, 1 Sunday school, 2 village schools, 255 professed Christians, of whom 75 are communicants.

KING, Jonas: Born July 29, 1792, at Hawley, Mass. His father was a farmer, noted for his love of the Scriptures and rigid adherence to their teachings. Under his instruction Jonas read the Bible through once between the ages of four and six, and then once yearly until the age of sixteen. His conversion occurred at the age of fifteen. Without funds or aid he determined on an education, learned the English grammar. After hoeing corn, read the twelve books of the Æneid of Virgil in fifty-eight days, and the New Testament in Greek in six weeks. He graduated at Williams College 1816, and Andover Seminary 1819. A skillful printer, his mind was strongly drawn toward foreign mission work, especially in the East, and he desired to go to Europe to study Arabic, and then enter whatever field of labor should be open—perhaps among the Arabs or Persians. He decided to go to Paris to study. In 1821 he was ordained to the ministry. On the eve of embarkation he was appointed professor of Oriental languages in Amherst College. Advised to accept the appointment, and the trustees approving his plan to study abroad, he sailed for Paris August 18, 1821. While engaged in this study he received an urgent invitation from Pliny Fisk—Mr. Parsons having died—to join him in mission work in the Holy Land.

Having served during three years in Syria and Egypt, he left Beirut for America in 1825, going overland to Smyrna, where he spent several months in the study of modern Greek. After his return home he was invited by a ladies' committee in New York to go to Greece to distribute aid to the people suffering from Turkish oppression. He resigned his professorship at Amherst, declared an Andover missionary, and in June 1828 sailed for Greece, residing in Athens and Syra, and visiting Athens, and arranged to reside there after the Turks had vacated the place in 1831, it became his permanent home. Here he built a school house, in which he had service in Greek every Sabbath till 1860. The establishment of schools was a prominent object with Dr. King, and he made it a condition that in them the Scriptures should be studied. At the "Evangelical Gymnasium," which he established, he gave religious instruction several times a week to about seventy pupils varying in age from twenty to thirty-five years. He also formed a theological class composed of Greeks and Italians, to whom he gave regular and frequent instruction. Some of these have occupied important positions as teachers or in the employment of great importance. In 1829 he was ordained to the ministry. At the influence of his preaching, his schools, and his persistent circulation of the Scriptures. At the instigation of the Greek Synod he was brought before the Areopagus, the highest court in Athens, with reviling the "mother of God" and the "holy images." He was not, however, tried. After many threats against his life, in 1852 he was again arrested, put on trial for blasphemy and condemned to imprisonment and expulsion from the country. This sentence was quashed through the influence of the United States Government.

Dr. King was never free from petty persecution until he died, May 22, 1869, in his seventy-seventh year. He was a thorough linguist, having studied eleven languages, and speaking fluently five. His original works in Arabic, Greek and French were ten in number, some of them being widely read, and translated into other tongues. He revised and carried through the press eleven others. He distributed 400,000 copies of Scripture portions, religious tracts, and school books in Greece and Turkey, besides what he scattered during his travels in other parts of Europe and in Palestine, Syria and Egypt. He left his impress on the Greek nation. To him preeminently is it owing that the Scriptures since 1831 have been so extensively used in the schools, and that in Greece the Word of God is not bound.

KING-CHAXT: A town in the province of Kiang-si, China, situated about 160 miles S. W. of Nanking, on the Yangtze River. Station of the CIM (1891), with (1903) 1 missionary and his wife, 1 native worker, and 1 opium refuge. Name written by the Society, Kian-fu.

KING-CHAU: A town in Kansu, China, situated on the Kiang River, about 45 miles E. S. E. of Ping-hang-fu. Station of the CIM (1895) with (1903) 1 missionary and his wife and 1 native worker.

KINGSBURY, Cyrus: Born at Alstead, N. H., November 22, 1756; graduated at Brown University 1812; Andover Theological Seminary 1815; ordained as a missionary of the ABCFM to the Choctaws and went to the Cherokee country in 1816, commencing a station at Brainerd. In June, 1818, he left Brainerd with Mr. and Mrs. Williams, to commence the mission among the Choctaws. They traveled in a wagon four hundred miles through the wilderness, to the place afterward called Eliot. In May, 1820, a new station called Mayhew was established, and in November Mr. and Mrs. Kingsbury made it their permanent home. Mr. Kingsbury continued in the Choctaw Mission, laboring with zeal and success until the ABCFM withdrew in 1859, and then continuing in the same field in connection with the Presbyterian and Southern Presbyterian Boards till his death, June 27, 1870. His period of missionary service was fifty-four years.

KING-CHSE-KWAN: A town in the province of Ho-nan, China, situated on the Tan River, about 25 miles W. of Sia-ki-chou. It is a frontier station, with a custom-house. Population about 10,000. Station of the CIM (1896), with (1903) 1 missionary and his wife and 1 native worker.

KING WILLIAM'S TOWN: A town in Cape Colony, S. Africa, situated 29 miles W. N. W. of East London, at an altitude of 1,300 feet. It has been an important center of trade for the Kaffirs, and of slave traffic. Station of the SPG with (1902) 1 native worker and 280 professed Christians. Station also of the South African Wesleyan Methodist Mission, with (1900) 39 native workers, 6 outstations, 10 places of worship, 6 day schools and 383 professed Christians.
Station also of the National Baptist Convention (1900), with 1 missionary, 2 native workers and 25 professed Christians.

KIN-HWA-FU: A town in Che-kiang, China, 75 miles S. S. W. of Hang-chau. Climate, tropical, 25°—95°. Population, 50,000. Natives outwardly very prosperous; morally low. Station of the CIM (1875), now (1903) vacant. Station also of the ABMU (1883), with (1903) 2 missionaries (one with his wife), 3 women missionaries, 8 native workers, 5 outstations, 3 places of worship and 354 professed Christians, of whom 159 are communicants.

KINKEL: A town in Chota Nagpur, Bengal, India, 58 miles S. S. W. of Lohardaga. Station of the Gossner Missionary Society, with (1903) 2 missionaries, one having a wife; 58 native workers, men and women; 21 places of worship, 2 schools and 7,258 professed Christians, of whom 1,348 are communicants.

KINKENGE: A settlement in the Congo Free State, 10 miles W. of Bansa Manteke. Station of the Swedish Missionary Society (1897), with (1900) 3 missionaries, two of them with their wives; 1 boarding school and 1 dispensary.

KINWA. See Kin-Hwa-Fu.

KIOTO: An important city of Japan, situated in the southwestern part of Hondo, the main island, and 329 miles by railway S. W. of Tokio, 5 miles from the S. end of Lake Biwa, with which it is connected by a navigable canal. It was founded in 794, and until 1868 was the capital of Japan. With its schools, hospitals, lunatic asylum, prisons, dispensary, almshouses, fountains, public parks and gardens, exquisitely beautiful cemeteries, and streets of almost pain­ful cleanliness, Kioto is the best arranged and best managed city in Japan. It is noted for its manufactures of crape, bronze goods, and porcelain. For a long time foreigners were jeal­ously excluded from this sacred city.

The town and the vicinity are crowded with objects of interest. The Mikado's palace covers 20 acres, and is a collection of very fine buildings. Among other objects of interest are the temple of 33,333 images of the Goddess of Mercy, and the bust of Buddha, 58 feet high. The climate is temperate. Population (1896) is 353,159. Station of the ABCFM (1875), with (1902) 5 missionaries (three with their wives), 2 women missionaries, 15 native workers, 29 outstations, 18 Sabbath schools, 1 boarding school, 1 theological class, 1 training class for women nurses, 1 hospital, and an important college known as the Doshisha. Station also of the ME$ (1898), with 1 missionary and his wife. Also station of the PE, with 4 missionaries (one with his wife), 2 women missionaries, a day school and a boarding school. Station also of the UB (1900), with 1 missionary and his wife. Also station of the PN (1890), with (1903) 1 missionary and his wife and 1 woman missionary. Also station of the German General Evangelical Missionary Society (1900), with 1 missionary and his wife. The YMCA has also established an agency there (1901).

KIRCHDORF: A village in Natal, S. Africa, near New Hanover. Station of the Lutheran Free Church of Hannover (1892), with (1903) 1 missionary, 1 native worker, 1 day school, and 200 professing Christians.

KIRGHIZ TURKI LANGUAGE. See Turkish Language.

KIRIN: A city in Manchuria, China, capital of the province of Kirin, situated 225 miles N. E. of Mukden, in a charming region encircled by hills on the north and by the Sungari River on the south. It stands at the head of navigation on this river, and many junks are built here. Population, 200,000. Station of the Presbyterian Church in Ireland (1894), with (1900) 2 missionaries, 1 with his wife; 22 native workers, 10 outstations, 11 places of worship, 8 day schools, 1 theological training class, a dispensary, a hospital, and 115 church members. The BFBIS has an agency here with a Bible depot.

Kirman. See Kerman.

Kirwina. See Kawatari.

KISAI, or Frere Town: A village in British East Africa situated on the E. side of the inlet bordering Mombasa on the E., and 2 miles N. N. E. of Mombasa. Station of the CMS (1874), with (1903) 5 missionaries, four of them with their wives; 4 women missionaries, 15 native workers, 1 chapel, 2 boarding schools, 1 theological class, 1 orphanage, 555 professed Christians, of whom 208 are communicants.

KISMAIYU: A settlement in the northern part of British East Africa, situated on the coast near the mouth of the Juba River. Station of the Evangelical Swedish National Missionary Society (1897).

KISSARAWE: A town in German East Africa, situated 30 miles S. W. of Dar es Salaam. Station of the German East Africa Missionary Society (1892), with (1903) 4 missionaries, 1 with his wife; 8 native workers, 7 outstations, 3 places of worship, 7 day schools, 1 industrial school, 1 theological training class, and 197 professed Christians.

Kissy: A town on the coast of Sierra Leone, Africa, situated 3 miles S. E. of Freetown, with a population of 2,000. Station of the CMS (1816), with (1903) 8 native workers, 4 day schools, and 1,714 professed Christians, of whom 1,194 are communicants. The congregation of this station is now under the care of the native church.

KITKAATLA: A settlement 20 miles S. by W. of Port Errington, British Columbia. Station of the CMS (1903), with 1 missionary and his wife, 2 native workers, 1 Sunday school, 1 village school, 241 professed Christians, of whom 59 are communicants.

KIT YANG. See Kie-Yang-hsiin.

KIU-CHAU. See Ku-chau-fu.

KIU-KIANG-FU: A city in Kiang-si, China, on the south bank of the Yangtse, not far from the outlet of Lake Po-yang, and 135 miles by river S. E. of Ham-kau. It was formerly the great center of the tea traffic. The climate is fairly good, hot in the summer, but bracing and cold in the winter. Opened to foreign trade in 1861. Population, about 35,000. Station of the ME, with (1903) 2 missionaries and their wives, 6 women missionaries, 19 native workers, men and women; 5 outstations, 5 day schools, 2 boarding schools, a college, a dispensary, a hospital, and 781 professed Christians. Station also of the CIM (1880), which serves as a center for the business transactions of the missionaries in the
province, with (1903) 2 missionaries and their wives and 1 native worker. Station also of the PB; outstation of the PE, with 1 native worker and a sanitarium for the missionaries of the Society. Name also written Ku-kiang.

KINGANI: A suburb of the town of Zanzibar on the E. coast of the island. Station of the Universities Mission (1870), with (1900) 6 missionaries, 1 missionary woman, 25 native workers, 1 day school, 1 boarding school and 1 dispensary.

KIUNG-CHAU: A town in the province of Sze-chwan, China, situated 40 miles S. W. of Cheng-tu-fu. Station of the CIM (1901), with 2 missionaries, one with his wife.

KIUNG-CHAU-FU: A town on the island of Hainan. China, 250 miles southwest of Hong-kong. Population, about 200,000. Station of the PN (1885), with (1900) 5 missionaries, 3 wives of missionaries, 2 women missionaries, 5 native workers, men and women; a dispensary, and a hospital. Name written by the Society, Kiong Chow.

KIUNGANI LANGUAGE: A dialect of the Marathi, which belongs to the Indic branch of the Indo-European languages. It is spoken by about 1,000,000 people of the Bombay Presidency living in the region between the Western Ghats of India and the shore of the Arabian Sea. It is written with the Marathi or Modhi character.

KLEIN POPO. See LITTLE POPO.

KLEINSCHMIDT, J. C.: One of the first missionaries of the Moravian Church to Greenland. He went to Lichtenau, near Kopenhagen, in 1777. After Kleinschmidt had worked in Greenland nineteen years he visited Europe, and after his return he completed the translation of the New Testament in June, 1821. All the missionaries joined in revising it, and it was sent to the British and Foreign Bible Society.

KLERKSDORP: A town in the Transvaal, Africa, situated about 123 miles southwest by west of Pretoria, and 7 miles north of the Vaal River. It is the oldest town in the Transvaal and the center of a small gold field. Population, 1,600. Station of the WMS, with (1903) 1 missionary and 4 native workers. 3 preaching stations, 32 chapels, 9 Sunday schools, 2 day schools, and 887 professed Christians, of whom 562 are communicants.

KLIPDAM: A village in the Transvaal Colony, S. Africa, situated 25 miles N. W. of Pieterburg. Station of the National Baptist Convention, with (1900) 2 missionaries and 1 native worker. Outstation also of the Berlin Missionary Society, its statistics being included in Kreuzburg, two miles distant.

KNIGHT, Joseph: Born at Stroud, Gloucestershire, England; educated by Rev. Dr. Williams at Stroud; ordained deacon September 21, 1817, and priest, 1818, by Bishop of Glasgow, on his return to the UK in 1829, he established the KIMS December 15, 1817, for Jaffna, North Ceylon; was stationed at Nellore. He was probably unsurpassed, if not unequalled, by any in India in his critical knowledge of the Tamil language. He was engaged for several years in preparing a Tamil and English dictionary, and made great progress in it when failure of health required him to leave for England in 1838. On his return in 1840 he died at Colombo, October 11, having been twenty-three years in the service.

KOBE: A city on the main island of Japan, 22 miles west of Osaka, on a small bay adjoining Hiogo Bay. It was opened to foreign commerce in 1878 at the same time as Hiogo, but owing to more favorable harbor conditions it has attracted foreign commerce more than Hiogo, and has grown so as to form with Hiogo one large city. The vicinity is beautiful and interesting. The climate is pleasant and healthful. Population of Kobe and Hiogo together, 104,000. Station of the ABCFM (1869), SPG (1876), ABMU (1881), MES (1886), PS (1890), with (1902) 43 all together and including outstations, 15 missionaries, 10 wives of missionaries, 17 women missionaries, 92 native workers, men and women; 22 places of worship, 41 Sabbath schools, 6 day schools, 5 boarding schools, 1 theological school, 1 training school for women workers, 1 dispensary, and 1,300 professed Christians. Special features of the missionary equipment here are the fine college for girls (ABCFM) and the vessel for missionary touring of the Inland Sea (ABMU).

KOCHI: A town on the southeast coast of Shikoku, Japan, situated at the head of a beautiful bay. Population, about 40,000. Station of the PS (1885), with (1903) 1 missionary and wife, 1 woman missionary, 3 native workers, 27 outstations, 8 Sunday schools, and 1,750 professed Christians, of whom 750 are communicants.

KODAKAL: A town in Madras, India, situated in the region formerly known as Malabar. 32 miles S. E. of Calicut. Station of the Basel Missionary Society (1857), with (1903) 4 missionaries, two with their wives; 37 native workers, men and women; 7 outstations, 8 day schools, and 1,387 professed Christians, 649 of whom are communicants.

KODAIKANAL SCHOOL FOR MISSIONARY CHILDREN: A school at a summer resort in the Madras Presidency, India, established in 1902 by the concerted action of missionaries of the ABCFM and the RCA and benevolent friends in the United States. The site is a mountain village, 50 miles N. W. of Madura, at an altitude of 7,000 feet, where the air is bracing and unaffected by the intense heat of the plains. The buildings belong to the ABCFM, and the school is under the management of a joint committee of the two missions interested. It designs to furnish instruction for missionaries' children between the ages of ten and fifteen years. While the school has been established for the children of members of the Madura mission and the Arcot Mission, children of other missionaries will be admitted.

Long experience has shown that white children cannot safely live in the hot plains of tropical India after they are nine or ten years old. This fact and the lack of suitable schools for American
children in outlying districts have led to those separations of children in tender years from their parents which are among the most wearing griefs of missionaries in that land. But it has now been shown that young children can safely stay at home during two or three months of the year. By the simple expedient of establishing a suitable school on that height, the missionaries can have their children near them some years longer than has been possible hitherto.

KODUR: A town in the Madras Presidency, India, situated 85 miles N. W. of Madras. Station of the Hermannsburg Missionary Society (1853), with (1903) 1 missionary and his wife and 10 native workers.

KOELLE, Sigismund Wilhelm: Born at Kleebrohn, Wurttemberg, in 1822; died in 1902. He was educated at Basel Seminary and C. M. College, at Islington, and, with marked success, he studied Arabic under Prof. Ewald at Tabinberg, which university conferred on him its Ph.D. degree. He was first sent by the CMS to Sierra Leone in 1847, and there he taught Hebrew to the Fourah Bay College students, with the result of enabling several negroes to read the Old Testament in the original. During his five years on the west coast he collected the materials for his great work, Polyglotta Africana, in which one hundred African languages and dialects were compared. This book was submitted to the French Institute, and Koelle was given the Volney prize. In 1855-59 he was attached to the Egypt and Palestine Missions, and in 1862 he joined Dr. Pfander at Constantinople in the mission started by the Society after the Crimean War. He held this position for twenty years, receiving many Mohammedan inquirers who came to him by night, and who were generally, after a time, caught by the Turkish police and disappeared. In 1880 Dr. Koelle's name was brought prominently into public notice. He and a distinguished Muslim Ulema named Ahmed Tewfik, who was assisting him linguistically, were arrested in the street by order of the minister of police. Koelle was soon released, but the Ulema was sentenced to death. The outrage produced great excitement in England, and it was only after an ultimatum had been sent to the Porte and an British fleet was ordered to the Dardanelles that the Sultan yielded and reprieved Ahmed Tewfik, who afterward embraced Christianity.

Koelle was one of the greatest linguists on the CMS Society's roll of missionaries. He was the author of Syllabic System of Writing amongst the Vei Tribe, Grammar and Vocabulary of Vei Language, Grammar of Kanuri or Bornu Language, Bornu Literature and Vocabulary, Polyglotta Africana, Kanuri Proverbs, Food for Reflection, Life of Christ, Prophecies Concerning Christ, The Death of Christ, and Mohammed and Mohammedanism. The last named work is a very severe analysis of the character of Mohammed as described by Muslim writers. It is too merciless for general acceptance, but is an admirable corrective when taken with the many works which err upon the side of unrestricted praise of the man of Mecca. For this work alone Dr. Koelle merits remembrance.

KOENIGSBERG: A settlement in Natal, Africa, 10 miles S. W. of Newcastle, and station of the Berlin Missionary Society (1858), with (1903) 2 missionaries, 12 native workers, men and women; 7 outstations and places of worship, and 510 professed Christians, of whom 213 are communicants.

KOFU: A town in Japan, situated on Hondo, the main island, 70 miles W. of Tokio. Station of the Methodist Church in Canada (1876), and of the Women's Society of the Church (1889), with (1900) 3 missionary women, 8 native workers, men and women; 15 outstations, 6 places of worship, 1 day school, 1 boarding school, 1 training class for women workers, and 360 professed Christians.

KOHIMA: A frontier post in the Naga hills, Assam, India, and the headquarters of the Brit-isher of the CMS, and the site of the CMS mission. It is at an elevation of 5,000 feet, and has a healthful climate. Population, 4,000; language, Angami Naga. Station of the ABMU (1879), with (1900) 1 missionary and his wife and 3 native workers.

KOI LANGUAGE: A dialect of the Gond, one of the Dravidian languages of Central India, and spoken by about 100,000 people. It has been reduced to writing by natives under the direction of the CMS, and is written with Roman letters.

KOIMBATUR. See COIMBATORE.

KOIS. See GONDS.

KOKSTAD: A town in Cape Colony, Africa, lying in Griqualand East, 65 miles W. of Shepherd's. Station of the Church of Scotland (1878), with (1900) 2 missionaries, 6 native workers, 3 outstations, 4 places of worship, 1 day school and 396 professed Christians.

KOKURA: A town on Kiushiu Island, Japan, fronting on the Inland Sea, and situated 100 miles N. E. by N. of Nagasaki. Population, 14,000. Station of the CMS (1869), with 1 missionary and his wife, 2 native workers, 2 outstations, 1 Sunday school and 64 professed Christians. Station also of the CMS (1898), with 1 missionary and his wife, 2 women missionaries, 6 native workers, 3 outstations, 1 chapel, and 242 professed Christians, of whom 119 are communicants.

KOLAR: A town in the native state of Mysore, India, situated 39 miles E. by N. of Bangalore. Population, 11,000. Station of the ME, with (1900) 1 missionary and his wife, 8 women missionaries, 37 native workers, men and women; 5 preaching places, 6 day schools, and an orphanage with industrial department.

KOLHAPUR: A town in the native state of that name, Bombay, India, situated about 97 miles W. of Bijapur, opposite a gap in the Sahyadri Hills. It is a picturesque town, and quite a flourishing trading-place. The people, who are mainly high-caste Hindus, together with the aborigines and low-caste, speak the Marathi and Hindustani languages. There are several ruins of the 3d century a.c. in the vicinity. Population (1891), 45,800. Station of the PN (1853). The work was commenced by Mr. Wilder, as an independent enterprise, and was taken over by the PN in 1870; the station has now 2 missionaries and 2 wives, 3 women missionaries, 13 native workers, 4 outstations, 5 day schools, and 1 boarding school. Station also of the SPG (1870), with (1900) 2 missionaries, 1 woman missionary, 17 native workers, 2 day
KOLLEGAL. See COLLEGAL.

KOLUPITIYA: A village in Ceylon, situated 3 miles southwest of Colombo. Station of the WMS, with 20 catechists, 4 outstations, 4 chapels, 6 Sunday schools and 115 professed Christians. The name is sometimes spelled Kolluputiyia.

KOLO: A settlement in Basutoland, S. Africa, 10 miles N. W. of Morija, and a station of the Paris Evangelical Mission Society, with (1903) 11 native workers, men and women; 3 outstations, 4 day schools and 633 professing Christians.

KOLOWGE. See KOROOWGE.

KOLS: Name of a collection of aboriginal tribes mainly occupying the mountain districts and plateau of the Chota Nagpur division of western Bengal, India, and found to a smaller extent in Orissa and in some districts of the Central Provinces. Chota Nagpur is of about the area of England. Kol is a generic word for the whole group of tribes who are linguistically within the word Kolarian, but it is usually applied to three principal tribes, the Mundah Kols, of the Lohardaga District; the Larka ("fighting") Kols or Hos, mostly of Lingbhum; and the Brumij Kols of Manbhum, one part of whom, however, has intermarried to the Mundahs, and the other to the Hindus. Another tribe, the Orangs, is scattered over Chota Nagpur, though not really such, are classed with Mundah Kols, as they live in amity and have many customs and most beliefs in common. But the Orangs will not intermarry with the Kols, to whom they regard themselves as superior. The census of 1891 gave Mundahs 362,000, Hos and Kols 393,000, Orangs 482,000, out of a population of 4,628,000 in Chota Nagpur, the majority of whom belong to diverse aboriginal tribes. The bulk of the Kol people live in little mud-but villages, less than five per cent. of the population of Chota Nagpur dwelling in towns. They follow the chase, do a very little in agriculture, engage somewhat in mining and washing for gold and many go to Calcutta and Assam to labor. Both sexes of the Hos are clothed with a loin cloth, and the women adorn themselves with a deflection from their earnings. They eat anything, including carrion. The Mundahs especially are ugly people, with thin, flat faces, high cheek bones and tawny skin. Monogamy is the rule, women being married not earlier than the 14th year. Dancing in connection with worship is a national institution, and is the occasion of licentiousness and drunkenness. Cheerfulness is a marked characteristic, and in cheerfulness and honesty the Kols compare favorably with the Hindus. The Kol language is a dialect of the Gond, and unwritten except as the missionaries have elaborated it.

The Kols are filled with superstitious fears and worship evil spirits. Belief in witchcraft is common and witches are severely treated. The Hos have the sun, moon and stars for their chief deities. The Mundahs use no idols. Sinhongu, the sun, is to them the supreme being, the beneficial creator and preserver, to whom they sacrifice fowls, goats and buffaloes, but they recognize secondary deities, mostly malevolent. Some of the richer Mundahs worship Kali.

To this rude, degraded people, four disciples of Pastor Gossner of Berlin went in 1845, and established themselves at Ranchi. The first convert was baptized in 1850, after which the expansion of the work was most remarkable, 700 baptisms taking place in the next seven years. The Sepoy Rebellion temporarily interrupted the work, and during a dispute between the Protestant missionaries and the Society in Berlin, after Gossner's death, the Society for the Propagation of the Gospel received a party of the missionaries and 7,000 of the converts and occupied the Gossner territory in active rivalry, which has since given way to a tolerable modus vivendi. At Ranchi the Gossner Mission has a beautiful, large church, hospital, schools, a divinity college and a large body of workers; Burju and Govindpur are also important centers, and there are many outstations and a well-developed church in rapid growth. Among the Oraons a Christian movement has embraced the whole population of many villages. According to Warneck (1901) 68,000 Christians, including candidates, belong to this mission. The following year 4,000 baptisms were reported. A branch mission to the Kols in Assam who have emigrated to Assam has been established.

The SPG, beginning in 1869 with the Gossner defection, has worked mostly in the Ranchi district, with some stations in the Hazaribagh district to the north and Lingbhum to the south. Schools of all grades are maintained. In 1901 the mission enrolled 16,261 Christians, scattered in some 500 villages.

The progress of the Protestant missions, especially the SPG, has been hampered by the violent prosecution of a Jesuit counter mission, which at one time baptized within a few days over 10,000 heathens without preparation, and boasted of 90,000 Catholic Kols. Catholic sources in 1901 reduced this number to 33,155, including 5,436 catechumens, and little is now heard of the Kol mission of which they formerly boasted so greatly. That so primitive and degraded a race should have been so lifted in half a century is one of the marvels of missions, and the promise of the future is bright.

Imperial Gazetteer of India, article Kols: Two Hundred Years of the SPG, London, 1902.

KOMAGGAS: A station of the Rhenish Missionary Society among the Nama or Namaqua people; situated in the N. W. part of Cape Colony, S. Africa, 60 miles S. E. of Port Nolloth. The station was founded by Mr. Schmelen, of the LMS, in 1824 and was transferred to the Rhenish Society in 1840. It now (1903) has 1 missionary and his wife, 6 native workers, 1 school, and 498 professed Christians, of whom 271 are communicants.

KONAKRY: A station of the Pongas Mission in French Guinea, W. Africa, situated on a small island off the coast. It was occupied by the mission in 1899, and has (1901) 1 missionary and his wife, 3 native workers, and 2 places of worship.

KONDOW. See LIVINGSTONIA.

KÖNIGSBERG. See KÖNIGSBERG.

KONKORDIA. See CONCORDIA MINN.

KORAPAT: A town in the Presidency of Madras, India; situated in the District of Vizagapatnam, 18 miles N. W. of Salur. Station of the Breklum Missionary Society (1884), with (1903) 2 missionaries (1 with his wife), 7 native workers, 10 outstations, 2 day schools, 8 places of worship, and 1,925 professed Christians.
KOREA: The kingdom of Korea, properly called Cho-sen (Morning Calm), comprises the peninsula lying between Japan and the mainland of China, together with a multitude of adjacent islands, separated from the Yellow Sea on the west and the Japan Sea on the east; on the north it is bounded by Chinese and Russian territory. Its surface is rugged and mountainous, being divided into two watersheds by an irregular range of mountains running from north to south near the eastern coast. The country is well watered, the largest rivers falling into the Yellow Sea. Considering the mountainous character of the country it is exceedingly productive. All kinds of cereals are produced, from wheat in the northern part to rice in the more temperate southern provinces. The pea, and far more, is reared almost side by side with the bamboo. The mineral wealth of Korea is very great; large deposits of gold, silver, and coal have been found; but the mineral resources have not yet been fairly tested. A few mining concessions have been granted to foreigners during recent years.

Government: Korea is an absolute monarchy of the paternal type. There is a written constitution which serves as a guide, in a loose way, to the administration of government, but this does not include anything like representation of the people in Government Councils. While the country is nominally independent, its position between China and Japan makes it liable to attack from either; and it has many times been a vassal state of either or both. It has also suffered several times as the battle-field on which China and Japan have settled their differences. In 1876 Japan invaded Korea and forced the king to sign a treaty opening certain ports to foreign commerce, and accepting in principle certain reforms of internal administration held to be essentials of development to the country. The United States had vainly attempted in 1870 to open negotiations with Korea, even going so far as to attack and capture a number of fortified ports in order to punish officials who fired upon the ships bearing the embassy. But the actual opening of diplomatic and commercial intercourse between Korea and the Western nations was accomplished by the treaty of 1876. In 1879 China undertook to encourage Korea in resisting reform, and to resume the protectorate which she had formally renounced. Japan declared war, drove the Chinese armies from the country, and having thoroughly broken the military power of China, dictated a treaty which embodied the independence of Korea was secured. In 1897 the king assumed the title of Emperor, the privileges of the aristocracy were abolished, and important reforms were introduced, among others the adoption of English and German principles of law and justice. A strong reaction against these radical changes did not fail to show itself; and Russia, which had acquired railway interests in neighboring regions in Manchuria, in 1900, began to take advantage of these reactionary tendencies to become a rival of Japan for the privilege of serving as tutor to the Emperor. The steady, onward march of Russian influence, interfering in Korean affairs at innumerable points, has been a potent factor in deciding Japan to take arms against such encroachments. The war opened in February, 1904, between Russia and Japan, whatever it decides, must trample down Korean territory once more and seriously retard the civilization and development of the country, that strangers may settle their differences with least inconvenience to themselves.

Population: The population of Korea is probably about 12,000,000, although the lack of a proper census renders an exact estimate impossible. This population is distributed unevenly over the eight provinces composing the kingdom, the most thickly settled portions being the southern and western provinces. The people of Korea are of undoubted Mongolian origin. Successive track-sweeping down from the north and overrunning the country, together with large numbers of Chinese who from time to time found in Korea an asylum from the oppression of their native land, have produced a conglomerate mass, of whose origin it is impossible to say more. The affinities of the people are Japanese rather than Chinese. But there is not much afflection for the Japanese among the common people.

Language: The language of the Koreans is distinct from that of their neighbors in its grammatical construction and idioms, but it has borrowed from the Chinese a large number of words, just as English has borrowed largely from the Latin. The Chinese character is used in all official and literary writing, and in fact in all writing on the part of the better class of people. The Korean language was reduced to writing about three hundred years ago. It has an alphabet whose simplicity, flexibility, and comprehensiveness compare favorably with those of any other known alphabet. It is as unlike the inflexible syllabary of Japan as it is unlike the unwieldy ideograms of China. The Korean written language is used only by the lower classes, who form, however, the vast majority of the population.

Religion: The religious history of Korea may be divided into five periods or movements. The first includes the early centuries of the kingdom, and terminates about 350 A.D. Of the religious history up to that time little is known. It is probable that there was no one form of religion prevalent throughout the different tribes and clans living in the land, but that each had its own religious observances and rites. But during the 4th century Buddhism, imported from China, made its way into the different parts of the country took place, and at the same time Buddhist missionaries appeared and taught their faith. It flourished, and in the space of a few centuries we find Korea a Buddhist nation, with numerous monasteries filled with people for its support. In the course of time the teachings of Confucius began to have their influence upon the people and gradually supplanted the religion of Buddha, and for many centuries past Confucianism has been holding sway over the masses of the people. Buddhism still exists, but is confined exclusively to a few monasteries, whose inmates are looked down upon by the people at large.

Near the close of the 18th century some of the members attached to the Korean Embassies to Pekin came in contact with Roman Catholic missionaries and brought back that faith to Korea. It took root almost immediately and spread with great rapidity. But the history of Roman Catholicism in Korea is one of persecutions from the very beginning of the 19th century. In 1854 the last king of the Yi dynasty died—a king under whom the Romanists were not only tolerated, but even allowed to obtain...
great deal of influence in the affairs of the kingdom. The reins of government fell into the hands of a regent who was intensely opposed to foreigners, and to the Romanists in particular. Soon after he took the lead of affairs Bishop Berneux and eight of his associates were seized and put to death, and an inquisition was instituted to extirpate Christianity from the land. It is not known how many native converts there were at that time, but there must have been not less than 60,000. Of these, 10,000 were put to death. In some localities whole communities and villages were put to the sword. The effects of this persecution were very widespread and permanent, and it is probable that the power of the Romanists has never rallied from the stroke it then received. The horrors of that time implanted in the whole people a dread of foreign religious which is as great a drawback to Protestantism as to Romanist mission work.

There is now a strong force of Roman Catholic missionaries in Korea. One of the greatest benefits that they have conferred upon the cause is the compiling and publishing of a complete lexicon and grammar of the Korean language.

**Protestant Missions:** The first Protestant mission to be done was by Rev. John Ross of the United Presbyterian Church of Scotland. About 1875 he came in contact with Koreans near the border between Korea and China. He took up the Korean language, and, although always having set foot upon Korean soil, he translated the whole of the New Testament into Korean and sent it across the border, together with large numbers of Chinese Bibles. He thus became the means of beginning a work of great importance in Northern Korea. When Protestant missionaries came to Korea later they found whole communities in the north professing Protestant Christianity, studying the Bible among themselves, and only waiting for some one to come and teach them. The treaty between Korea and the United States was signed in 1882, and then for the first time the eyes of the civilized world were turned upon Korea. The first movement made toward putting men in the field was the appointment by the American Presbyterian Board of Dr. J. W. Heron, M.D., as medical missionary to Korea in the spring of 1881. His coming was delayed, and in the summer of the same year Rev. R. S. McClay of the Japan Methodist Conference was sent to look over the ground and report on the advisability of sending missionaries. Before his favorable report was acted upon, Dr. H. N. Allen, M.D., of Chins, was transferred from that field to Korea, and he, arriving with his family in the autumn of 1884, became the first resident Protestant missionary. Meanwhile the report of Dr. McClay had been acted upon, and the Missionary Society of the Methodist Episcopal Church of America had appointed to the field Dr. Wm. B. Scranton and Rev. H. G. Appenzeller. The Woman's Foreign Missionary Society of the Methodist Episcopal Church appointed Mrs. M. F. Scranton. In November of the same year the Presbyterian Board appointed Rev. H. G. Underwood. In December of 1884, before any of these appointees had arrived in Korea, occurred the riot in Seoul during which Prince Min was severely wounded. The skilful and successful treatment of the case by Dr. Allen produced such a favorable impression that a general government hospital was founded by his majesty, and Dr. Allen was placed at its head. In this way a great impetus was given to the good feeling that had already begun to make itself manifest on the part of Koreans toward foreigners. In the spring of 1885 Rev. H. G. Underwood, who had been spending some months in examining the Korean language, arrived in Korea. For a time the object of his coming was kept from the Korean officials through fear that the interests of the missionary work might be endangered; but that fear proved to be groundless, and soon it became generally known that he had come, and that the object of his coming was something besides medical work. The Methodist Mission was opened the same year.

The first Korean was baptized in the autumn of 1886, and from the first the work took on a most encouraging aspect. Large numbers of inquiries came in from distant parts of the country, and it was not long before a little native church was organized. Korea is to-day thrown wide open to the Christian religion; the Emperor is the open friend of Protestant missionaries, and while respecting the destroyers of both a long a long standing, and in and about Seoul, and officially deposing the money annually squandered upon the worship of idols, he allows Christian churches, schools and hospitals to be scattered throughout the land. Christian literature in the vernacular and several mission periodicals are disseminating the truths; a Bible society, which sold 70,000 copies of the Scriptures in 1900, has been formed; and of the 70,000 Catholics and Protestants, 40,000 have been gathered in during the last decade. One of the Korean leaders recently remarked: "The only hope of the country is in the churches. There is no moral character in Korea. It is being created in the churches. To convert and educate the common people is the only hope of the land."

**KOROGWE:** A town in German East Africa, situated on the Panganji River, in the Usambara region, 55 miles by railway from Tanga. Station of the United Church Mission. It was opened in 1902, with 2 missionaries, 7 native workers, 3 out-stations, 4 day schools, and a boarding school.

**KÔSHI, Rev. Kôshi:** Born in February, 1825. Died in November, 1898. A Syrian Christian, who, after his education at Kottayam College, became, under the CMS, a catechist, translator and lay reader, being finally ordained. During his useful career he was stationed at Kottayam, Trichur, and other places, and was appointed one of the examining Chaplains to the Bishop of Madras. In 1885 he was made Archdeacon of Mavellicha, and in 1891 the degree of Doctor of Divinity was conferred on him by the Archbishop of Canterbury in recognition of his labors as a translator and litterateur. In his early days he was taught the Malayalam language, and afterward, under the ablest teachers, he studied to make himself proficient in this and other tongues. When quite a young man he was offered the post of Head Interpreter to the Tricannan in Jumma, a lucrative and honorable post, but he chose the poorer and more honorable work of the mission. As pastor, as archdeacon, and as vice-chairman of the Church Council, he exercised great influence and did
much to develop the spiritual and intellectual life of the native church; but his great work was associated with the Malayalam Bible Revision. He was regarded as one of the best Malayalam scholars in Travancore, and he was, for the most of the time, the only native delegate on the Revision Committee. What the late Mr. Baker, Senioy Puthanakaram, the Malayalam CMS Mission, does from a missionary point of view, Archdeacon Koshi was from the native—a valuable link with the past—and one regrets that he has left no history of the mission written from his actual knowledge. He spoke to one of his associates of the early days when portions of the Old Testament were first received at his home on the Rani River. The Syrian Christians would assemble round a lamp in the house of one who happened to possess a copy of the valuable document, and listen while chapter after chapter was read until the night grew into the morning; and then he lived to see the work develop into an orderly diocese with all the congregations ministered by pastors of their own race, and supported, in great part, by native contributions; and himself as archdeacon, and vice-chairman under the Bishop of a church Council embracing twelve pastures, and more than 15,000 Christians. He was the Chief Reviser on the Prayer-book Committee; and it was especially for this work that the Archbishop of Canterbury conferred on him the degree of D.D., on the recommendation of Bishop Speechly. Among his other works may be mentioned his translation into Malayalam of the Pilgrim’s Progress, James’s Anxious Inquirer,Doddriddles Rise and Progress, The Holy War, Pulleli Kunju, and his many articles in a periodical called The Treasury of Knowledge, which he conducted for seven years.

KOTA. See Kota.

KOTAHERI: A town in the Presidency of Madras, India, situated in the Nilgiri district, about 27 miles E. of Utkakamand. Station of the Basel Missionary Society (1867), with (1903) 1 missionary and his wife, 15 native workers, men and women; 8 outstations, 6 day schools, and 314 professed Christians.

KOH: A town in Rajputana, India; situated 120 miles S. of Jaipur, on the Chambal River. Pop. 20,000. Station of the CMS (1889), at present (1903) carried on by 18 native workers, men and women.

KOKOTA: A village in the British Nyassaland Protectorate, Central Africa, situated on the W. shore of Lake Nyasa. It is celebrated for its fine crops of rice, and was formerly an important center of Arab commercial operations in the interior. Station of the Universities’ Mission (1894), with (1902) 1 missionary, 2 missionary women, 5 native workers, 6 schools, a dispensary and 378 professed Christians, of whom 92 are communicants.

KOTGARI: A village in the Native Hill States, Punjab, India, situated 20 miles E. of Simla. A station of the CMS, with 3 missionaries and their wives, 6 native workers, 1 chapel, 2 village schools and 59 professed Christians, of whom 28 are communicants. Name sometimes spelled Kotgar.

KOTTAPAD: A town in the Presidency of Madras, India, situated in the Vizagapatam district, about 120 miles N. W. of the town of that name.

Station of the Breklum Missionary Society (1885), with (1903) 3 missionaries (one with his wife), 1 woman missionary, 23 native workers, men and women; 8 outstations, 3 day schools, 1 orphanage, 1 theological training class, 1 dispensary and 3,207 professed Christians, of whom 1,657 are baptized. Name also written Kotapad.

KOTUR. See Kothar.

KOTA-THAHYU: The first convert to Christianity from the Kares, a people among whom the labors of the Baptist missionaries in Burma have met with remarkable success. He was a robber and murderer in early life, and was the slave of a Buddhist Burman at Rangun, when he was redeemed and became a servant in the family of Adoniram Judson. He was converted after some time and was baptized by Rev. George Dana Boardman at Tavoy on May 16, 1828. He very soon began to manifest a wonderful zeal and power in winning his own people to Christ, and was constantly bringing them to the missionaries for conversation and instruction. He traveled to remote portions of the country preaching the Gospel. More than one thousand persons, it is estimated, were converted as a result of his labors. He was not highly educated and his preaching was not sought by the more intelligent Christian Karens, yet he had a power second to none of the races over a congregation of untaught Karens. He died in 1840 in Arakan, whither he had gone with the missionaries Abbott and Kineaud to provide a place of refuge for the persecuted Karens of Burma. He was certainly one of the most remarkable native evangelists that Burma has produced.

KOTTA: A town in Ceylon, India, situated about 6 miles S. E. of Colombo. A station of the CMS (1882), with (1903) 1 missionary and his wife, 1 woman missionary, 96 native workers, 48 village schools, 3 high schools and 1,375 professed Christians, of whom 315 are communicants. Name sometimes spelled Cotta.

KOTTAYAM: A town in the province of Travancore, Madras, India, situated 32 miles S, E. by 3 of the port of Quilon, in a population of 1,511. A station of the CEZ (1871), with (1903) 10 native workers and 2 day schools. Station also of the CMS (1882), with (1903) 4 missionaries (three of them with their wives), 2 women missionaries, 49 native workers, 1 printing press, 5 village schools, 1 high school, 1 theological school and 1 college. There are also in the Native Church Council of the district 172 native workers, 90 village schools and 20,645 professed Christians, of whom 5,194 are communicants. Name sometimes spelled Cottayam.

KOTZEBUE: A station of the AFFM on the N. shore of Kotzebue Sound, an inlet of Bering’s Strait, on the W. coast of Alaska. The station was established in 1898, and has a missionary and his wife and 1 woman missionary.

KRAPP, John Ludwig: Born in Württemberg, 1810; educated in the Basel Mission House; sent by the Church Missionary Society to join the Abyssinian Mission begun by Gobot in 1830, and conducted by Isenberg and Blumhardt. Two or three months after his arrival they were all expelled, through the hostile influence of two French Roman priests, who persuaded the Prince of Tigré that they themselves were more in accord with Abyssinian Christianity than the
Protestants. Having been invited by the King of Shoa to visit his country, Dr. Krapf left Suez with Mr. Isenberg, January 27, 1839, with the hope of entering Abyssinia by way of Zeila, and after many difficulties reached in May the kingdom of Shoa, lying south of Abyssinia, and in its widest sense including the whole of the Ethiopian highlands. The king received them favorably and promised his protection. Isenberg went in November to England to prepare to meet the Ahamar works, while Dr. Krapf remained, studying the Galla language and laboring among the Abyssinians. In 1840 he accompanied the king on an expedition to the Gallas, a brave, vigorous, and daring nation, inhabiting a vast extent of territory stretching southward nearly to Mombasa, and numbering from six to eight millions. The slave-trade was carried on by them. In a second visit he noted three places where a Galla mission might be established and had many opportunities of proclaiming the Gospel message. The population of Shoa is to a large extent nominally Christian, similar to the Coptic Church in Egypt, but the Gallas were heathen. The committee were so impressed with the providential openings, both in Abyssinia and among the Gallas, that they resolved to form the Abyssinians into a new mission, to be called the East Africa Mission. In 1841 the people of Shoa expressed great desire for the Word of God. Dr. Krapf spent three years among them, but in 1842 he was again excluded through Romish influence. He greatly desired to reach the Galla tribes. He translated the Gospels into their language. To devise a plan to reach them from the Indian Ocean he sailed down the coast in 1843, and visited Aden. Having received the approval of the committee, he sailed with his wife for the Zanzibar coast, landing January 3, 1844, at Mombasa, which, after visiting Zanzibar, he selected as the site of his mission. Here he and his wife were prostrated by fever, and in two months he and their infant child died. He now devoted himself with zeal to the mission, especially to the study of the languages of that region. He made excursions among the Wanika and Wakamba tribes, preaching and surveying the ground with reference to future operations. He found the natives extremely degraded, impenitent, and in the habit of selling his children to obtain the means of indulgence. He applied himself to the work of translation, and in three years after the founding of the mission had translated Acts, Romans, Galatians, Peter, 1 John into the Swahili language, and had completed a dictionary of 10,000 words of the Swahili, Wanika, and Wakamba languages. Repeated attacks of fever had greatly impaired his constitution. Yet he continued his missionary tours, gathering valuable information concerning the interior tribes and preaching the Gospel, which the natives who heard it would repeat to others.

In 1846 he was joined by John Rebmann, and together they established the mission station at Kisutilus in the Rabat district, fifteen miles inland. They were both laid aside for some weeks with fever, and before they had fully recovered their strength they set out for the new mission, the place more salubrious than Mombasa, but the people were deeply sunk in ignorance, superstition and sensuality. Continuing their explorations in the interior, they found wonderful openings, and came in sight of the Galla country, so long the object of Dr. Krapf's desire. Dr. Krapf visited Usambara and Ukamba, and sailed down the coast as far as Cape Delgado. In 1847 he proceeded to Ukamba, and then to the north, to visit the Wakamba tribes, numbering about 70,000 people. He went again the next year with the view, as instructed by the committee, of founding a mission among the Wakamba on the heights of Yata. But the plan failed. On this journey he received Mr. Brem. On the journey he was repeatedly in the greatest extremity from hunger and thirst, wild beasts and savage robbers. He continued the study of the language and the translation of the Scriptures. He came to the conclusion that from the Galla boundary to the Cape of Good Hope there is one family of languages, which he calls the Swahili stock, which stock, he thinks, judging from specimens he had received of West African languages, commences on the southern bank of the Gabun River. The missionaries in their tours obtained much geographical information. In 1850 Dr. Krapf visited England and Germany and on his return explored the interior, penetrating to Ukamba, but was forced to return by extraordinary sufferings, perils and enmity of the tribes. In later years he established and directed the remarkable "Pilgrim Mission," in connection with the St. Chrischona Institute, which was to begin the "chain of missions" from the north instead of from the east. Twelve stations were planned, embracing Egypt, Nubia and Abyssinia. He afterward visited Usambara and was well received by King Kmeri, who desired him to establish a mission on a mountain thirty miles distant, offering him his protection. In 1855 he returned to Europe, and the he went again twice to Africa on temporary missions, the great work of his later years was linguistic, in his quiet home at Kornthal in Wurttemberg, preparing dictionaries of several languages and translating the Scriptures into the East African tongues. He was found dead at his home, on his knees in the attitude of prayer, November 26, 1881, and on the 30th his body was buried in the presence of 5,000 people, assembled from all parts of the coast.

Claus (von W.) Johann Ludwig Krapf, Basel, 1882.

KRISHNAGIRI: A town in the district of Nadiya, Bengal, India, situated 55 miles N. of Calcutta. It has a population of (1891) 25,500, of whom 17,500 are Hindus. Station of the CMS (1831), with (1903) 2 missionaries and their wives, 21 native workers, 1 place of worship, 1 chapel, 4 day schools, 3 boarding schools and 320 professed Christians, of whom 119 were communicants. The CEZ also has a station there (1871), with (1903) 7 women missionaries, 21 native workers, 1 high school, 2 dispensaries, 1 hospital, and 39 Zenana pupils.

KRISHNAGIR: A town in Madras, India, situated in the district of Salem, 53 miles S. E. of Bangalore. Population (1891), 9,700, of
Kroonstad
Kudu

THE ENCYCLOPEDIA OF MISSIONS

whom about 7,000 are Hindus. Station of the German Evangelical Lutheran Synod, of Missouri, Ohio and other States. The station was opened in 1895, and it has (1900) 2 missionaries (one with his wife) and 3 native workers.

KROONSTAD: A town in Cape Colony, S. Africa, situated in the district of the same name, of which it is the capital, 96 miles S. W. of Johannesburg. Population, 2,900. Station of the South African Wesleyan Methodist Missionary Society, with 63 native workers, 37 outstations, 3 days schools, and 951 professed Christians.

KRUGERSDORP: A settlement in the Transvaal, Africa, situated 18 miles northwest of Johannesburg. A station of the Berlin Missionary Society (1899), with (1903) 1 missionary, 5 native workers, 5 outstations and 78 Christians. Station of the WMS (1903), with 1 missionary, 10 native workers, 11 outstations, 11 places of worship, 1 Sunday school, 1 day school, and 261 professed Christians, of whom 173 are communicants.

KUALA LUMPUR. See Wwala Lumpur.

KWANGCHI. See Kwanga-chi-Hsien.

KU-CHAU-FU: A city in Che-kiang, China, on the left bank of the Yangtze River, 106 miles S. W. of Hang-chau. It is a large and prosperous place, and considered one of the keys to the empire. Station of the CIM (1872), but as yet (1903) vacant since the Boxer troubles of 1900. Name written by the Society, Kiu-chau.

KU-CHENG. See Kiu-tien-Hsien.

KUCHING, or SARAWAK: A town in British Borneo, Malaysia, capital of the district of Sarawak; situated at the head of navigation of the Sarawak River, 18 miles from its mouth. Population, 25,000. A station of the SPG (1848), with (1903) 2 missionaries, 11 native workers, 4 outstations, 4 places of worship, 2 high schools, and 689 Christians.

KUDAT: A station in British North Borneo, Malaysia, situated on an inlet running west from Marudu Bay. A station of the SPG (1889), with (1902) 2 native workers, 250 acres of land, 2,900 communicants, 2 day schools, and 584 professed Christians, of whom 285 are communicants.

KU-DE: A town in the province of Fu-kien, China, situated 58 miles N. W. of Fu-chau. Station circuit of the ME, with (1903) 45 native workers, men and women; 15 places of worship, 20 Sabbath schools, 10 day schools, and 890 professed Christians, of whom 516 are communicants.

KUDELUR. See Cuddalore.

KU-DING: A town in the province of Che-kiang, China, situated about 50 miles north by west of Hang-chau. A station of the PS (1895), with (1903) 1 missionary and wife, 4 native workers, 3 outstations, 4 places of worship, 3 Sunday schools, 2 day schools, and 218 professed Christians, of whom 100 are communicants.

KUEI-LIN. See Kwai-Tien-Fu.

KUENG: A station of the Paris Evangelical Missionary Society in Basutoland, S. Africa, situated in the northern part of the territory, with (1902) 10 native workers, 3 day schools, 5 outstations, and 563 professed Christians, of whom 336 are communicants.

KU-HSIIEN: A town in the province of Szechwan, China, situated 48 miles E. N. E. of Shun-king-fu. Station of the CIM (1898), with (1903) 1 missionary and his wife and 1 woman missionary. Name written by the Society, Ku-hien.

KUH-TSIING-FU: See Kiu-tsing-Fu.

KUH-WU: See Ku-wu-Hsien.

KULBARGA: A town in the native state of Haidarabad, India; situated on an undulating plain in the district of the same name, of which it is the chief town, and 75 miles E. N. E. of Bijapur. It is the capital city of a powerful dynasty from 1347 to 1432, and its chief mosque is a copy of that in Cordova, Spain. Its fine palaces, however, are mostly allowed to decay uncared for. Population, 29,000. Station of the ME, with (1903) 1 missionary, 6 native workers, and an orphanage.

KULESA: A station of the Scandinavian Alliance (U. S.) in British East Africa, situated 30 miles N. W. of Witu.

KULLUKO: A village in Eritrea, East Africa, situated on the frontier of Abyssinia, about 135 miles W. S. W. of Massaus. Station of the Evangelical National Missionary Society of Sweden (1897), with (1900) 2 missionaries, 1 of them accompanied by his wife.

KUMAGAI: A town on the Honda, or main island of Japan, situated about 50 miles N. N. W. of Tokio. Station of the PE.

KUMAMOTO: A town on the island of Kiushiu, Japan, situated about 50 miles E. by N. of Nagasaki. It is the most populous city in the island and is the center of a large rice trade. It has a celebrated fortress built of enormous stones. Malaria prevails in the region. Population, 47,600. Station of the CMS (1888), with (1903) 2 missionaries (one with his wife), 4 native workers, 1 place of worship, 2 Sunday schools, and 284 professed Christians, of whom 109 are communicants. The ELMS also has a station there (1898), with 1 missionary and his wife. Also station of the SBC, with (1903) 1 missionary and his wife, 1 native worker, 1 Sunday school, and 15 professed Christians. Station also of the ME, with (1903) 2 missionaries, 4 native workers, 1 outstation, 1 place of worship, 3 Sunday schools and 160 professed Christians.

KUMASE. See Kumassi.

KUMASSI: A town situated 104 miles north by west of Cape Coast Castle, in the Gold Coast Colony, Western Africa. A station of the Basel Missionary Society (1896), with (1903) 2 missionaries and their wives, 5 native workers, 3 outstations, 4 day schools and 80 professed Christians. Station of the WMS also, with (1903) 1 missionary, 8 native workers, 35 outstations, 35 places of worship, 4 Sunday schools, 4 day schools, and 55 professed Christians. Name sometimes spelled Kumase.

KUMBAKONAM. See Combaconum.

KUMUKI DIALECT. See Turkish Language.

KUNDUKUR. See Kandukur.

KUNDI: A village in the eastern part of the native state of Rewa, Central India, near the Chota Nagpur frontier. A station of the WMS, with (1903) 1 missionary, 13 native workers, 7 places of worship, 7 Sunday schools, 7 day schools, and 444 professed Christians, of whom 57 are communicants.

KUNNANKULAM: A town in the native state
of Cochín, India, situated about 28 miles S. W. of Coimbatore. A station of the CMS (1854), with (1903) 35 native workers, 4 outstations, 7 day schools, and 97 professed Christians.

**KUNSAN** A village and seaport of Korea, situated on the western coast, about 150 miles south of Chemulpo and near the mouth of the Chang-po River. Station of the PS (1896), with (1903) 3 missionaries, two of them with their wives; 1 missionary woman, 3 outstations, 1 day school and 1 dispensary.

**KUNSO** A settlement in Sierra Leone, W. Africa, situated 120 miles N. E. of Freetown. Station of the Wesleyan Methodist Connexion of America (1890), with (1900) 2 missionaries and their wives, 1 missionary woman, 5 native workers, 1 place of worship and 1 printing house.

**KURAI** A town in the Central Provinces, India, situated in the district of Sagar, 78 miles N. E. of Biopah. Population (1891) 6,300, of whom 4,700 are Hindus, 3,200 are Parsees, and 200 are Christians. Station of the Evangelical National Missionary Society of Sweden (1900), with 1 missionary and his wife. The name is written by the Society Khurai.

**KURDS** To say that the Kurds are the Cerduchi mentioned with painful reminiscences by Xenophon, does not answer the question of their origin. Nor can one define their relations by saying that they are the people of Kurdistan. No definite territory called by that name exists, and the Kurds, wherever found, live as detached groups in the midst of other races. They abound in the regions extending from the Russian border at Erivan on the north to the fig-producing hills of the Sinjar in Upper Mesopotamia and the flower-gardens of Shiraz on the south, and from the plains of Urmia and Isphahan on the east to the Tigris, the Euphrates at Samesota, the Taurus at Marash, and the Anti-Taurus in Cappadocia and Pontus on the west. The districts where they are most numerous include the Turkish provinces of Erzerum, Van, Hekkiari, Mosul (cajon 4,700), and Bitlis. Station of the Evangelical Missionary Society of Sweden (1900), with 1 missionary and his wife.

The Kurds to-day are found in three great groups, the Kurmanj, the Guran and the Lur. The Lur are found in Persia, and the two first named groups in both Turkey and Persia. The language of each group is a separate dialect, and many of the tribes of each family have also their own dialect.

For various reasons exactness in statements of the numbers of the Kurds is simply impossible; the following tabulation gives only approximate estimates:

<table>
<thead>

As to mode of life the Kurds are of three classes: (a) Those who are purely pastoral are nomadic (called Gœchers) and oscillate between the mountains and the plains, occupying the former in summer and the latter in winter. (b) Those partly pastoral and partly agricultural occupy fixed abodes in winter, but in summer dwell in tents among pastures not remote from their harvest fields. (c) Those purely agricultural remain throughout the year in fixed abodes. Some Kurds also have taken up trades and live in cities as merchants and mechanics. Generally speaking, one-half, perhaps more, of the Kurds belong to class a, while the remainder are distributed between classes b and c in the proportion of 2 to 1.

The Kurds of these three classes are of two distinct types—the northern and the southern. The northern Kurd is bold, but not courageous, hospitable but full of theft and treachery, loudvoiced and brutal, lazy and degenerate, addicted to intrigue, feudatory. He is thrifty and likewise shiftless in regard to his person, dress and scenery beautiful, grand, weird, and wild by turns.

The region described above was inhabited, in the times of the Assyrian Empire, by a warrior race named "Gutu," i. e., warrior. The Assyrians called them Gardu and Kardu; the Greeks later called them Kardokas (Kardacs), and the Persians Korumian (Kurmanjian). After the conquest of Assyria the Gardu were absorbed by a still more energetic race (the southern Kurmanj), who claim to be lineal descendants of Madaj, the son of Japheth, and of the same stock as the Medians. The Kurds also claim that one of the tribes of the "Gutu" remaining in its early habitat produced Nebuchadnezzar and in the Babylonian Empire became imbued with Semitic qualities of blood. From this stock sprang the Guran tribes of southern Kurdistan. In a similar manner emigrations of Lurs from Persia and of Wends from Afghanistan brought in Aryan blood, so that the eastern Kurds have distinctly Aryan qualities. These various traditions of the Kurds conform to the truth in one particular, namely, that the Kurds of to-day are of mixed Aryan, Semitic and Turanian stock. But to seek to identify the various strains of blood or their source is useless in a land where the people have clung to their rocky heights where they have been trampled into many forms during fifteen centuries by conquering hosts coming from south and north and east and west.

The Kurds to-day are found in three great groups, the Kurmanj, the Guran and the Lur. The Lur are found in Persia, and the two first named groups in both Turkey and Persia. The language of each group is a separate dialect, and many of the tribes of each family have also their own dialect.
manner. He has black eyes and hair, is of fine physique and athletic, is temperate and of sturdier morals than his Turkish ruler. As a rule he is monomymous, and treats his wife more after the manner of Europeans than of the Turk. He is into procession, and dignifies the day by his ample dealings; ready to owe and acknowledge a debt, but slow to cancel it. The southern Kurds who has learned to dwell in a fixed abode is not less athletic, but of finer grain, more polite in his bearing, more quiet in his manners, and more careful of his person and dress than the northern type or the southern nomad Kurds. He has a more intellectual cast of features, and is brighter looking. The organization of the southern Kurds is more compact than that of the northern tribes, and there is among them the quiet consciousness of power. They obey Abdul Hamid more as Caliph than as Sultan. A considerable number of the southern Kurds have been educated in Arabic and Persian literature, and such are to be found in high office under the Turkish Government. In general, Kurds are the type of Turkish speakers and Persians—fond of freedom, but lawless in their use of it, thereby occasioning great uneasiness to both those powers. Claannishness and tribal feuds are powerful preventives of their racial homogeneity and political power.

All Kurds are Muslims. They are about equally divided between the Sunnis and the Shiites denominations. The Shiites Kurds are the Lur and Wend tribes of Persia and Afghanistan, the Kurmanj of Bohtan, Sert, and Bitlis, and the Gurans of the Dersim Mountains in Turkey. All Kurds are horse-keepers, and are fanatically attached to their Sheikhs, if not to their religion. Comparatively few of them have an intelligent grasp of Islam, which indeed is a foreign religion in a foreign tongue.

Missionary work among the Kurds does not exist, because neither Turkey nor Persia would tolerate organized work in their behalf; and their contact with the evangelistic efforts of the Eastern Turkey and West Persia missions for the nominal Christians residing in their midst is of the slightest. The evangelical churches of Turkey support a "Kurdish Mission," which is conducted from Harpoot; but it is for Kurdish-speaking Armenians, and not for the Kurds. In connection with this work a translation of the New Testament and also a small hymn-book have been published in Kurmanj Kurdish.

Some effort for Kurdish-speaking Syrians is now prosecuted by the Mardin station of the ABCFM. It would seem the intention of Providence to use these evangelized Kurdish-speaking Christians as an entering wedge for work among the Muslim Kurds when "all things are ready for such a movement. The Persian Mission of the PN and that of the CMS are also making efforts to reach this neglected people in many unobtrusive ways.

As a rule those who have come into close acquaintance with Kurds have accorded them respect for their sturdy and admirable qualities of heart, their mental abilities and their capacity for religious and political development. Not a few believe that through their progress in culture may be found a solution of the Eastern question.

KURDISH LANGUAGE: Belongs to the Iranian branch of the Aryan family of languages. Its immediate relations seem to be still unsettled, although there is reason to connect it with the Pehlevi. It is found in two distinct dialects—the Kurmanj and the Gurani, which are Western Kurdish; and the Lur and Wend, which are Eastern. These two groups are broken into many smaller dialects to the formation of which there seems to be no limit, such as is found in the existence of a literary class. Nothing in Kurdish has ever been printed except by strangers. The Kurds have a vast collection of materials for a literature, but they have not even an alphabet as yet, making use of the Arabic alphabet for correspondence, etc. Certain Armenians who speak Kurdish use the Armenian alphabet, and missionaries have printed some books for their use in Kurdish written with Armenian letters.

KURNOOL. See KARNUL.

KURSEONG. See KARSUNG.

KURUMAN: A town and district in the Bechuanaland protectorate in the northern part of S. Africa; situated 100 miles N. W. of Barkly West and 90 miles S. W. of Vryburg. Station of the LMS (1818), with (1903) 1 missionary and his wife, 13 native workers, 14 schools, and 666 communicants.

KUSAIE: The easternmost of the Caroline Islands, 1300 miles E. of the Sandwich Islands. It is used by the ABCFM as a center for work among the Micronesian islands. It is also called Strong Island and Ulan.

KUSAIE LANGUAGE: Belongs to the Micronesian family. It was reduced to writing by missionaries of the ABCFM working among the people of Kusaie, one of the Caroline Islands. They have done a certain amount of literary work in this language, writing it with Roman letters.

KUSHIRO: A town and the capital of the Kushiho province in Hokkaido, Japan, situated on the S. E. coast of the island, about 205 miles E. N. E. of Hakodate. Its exports are sulphur and coal. Station of the CMS (1880), with (1903) 1 woman missionary, 8 native workers, 2 outstations, 1 place of worship, 3 Sunday schools, 3 day schools, and 321 professed Christians, of whom 128 are communicants.

KUSHITIA: A town in the Nadiya District of Bengal, India, situated on the right bank of the Ganges, about 60 miles E. S. E. of Murshidabad. Population, 11,200, of whom 6,000 are Muslims and 5,000 Hindus. Station of the CMS (1901), with (1903) 1 missionary, 4 native workers and 26 professed Christians.

KU-TIEN-HSIEN: A town in the province of Fo-kien, China, situated about 50 miles N. N. W. of Fuchau. Station of the CMS (1881), with (1903) 1 missionary and his wife, 60 native workers, 2 outstations, 1 place of worship, 25 day schools, 1,780 professed Christians, of whom 682 are communicants. Station also of the CEZ (1889), with (1903) 3 women missionaries, 2 native workers, 1 boarding school. Station also of the ME with (1903), 2 missionaries and their wives, 2 women missionaries, 44 native workers, 2 outstations, 10 places of worship, 10 Sunday schools, 14 young people's societies, 9 day schools, 1 hospital, 1 dispensary, and 939 professed Christians, of whom 521 are communicants. Station of the Mission to Lepers in
India and the East (1892), with 1 place of worship and 1 hospital. Name sometimes written Kucheng.

KU-TSING-FU: A town in the province of Yun-nan, China, situated 68 miles E. N. E. of Yun-nan-fu. Station of the CIM (1889), with (1903) 2 missionaries and their wives, 3 women missionaries, and 1 native worker. Name written by the Society, Kuh-ting.

KU-WU-HSIEN: A town in the province of Shan-shu, China, situated 30 miles S. of Ping-yang-fu. Station of the CIM (1885), with (1903) 1 missionary and his wife, 1 woman missionary, 6 native workers, 3 outstations, 2 schools, 1 dispensary and 1 opium refuge. Name written by the Society, Kuh-wu.

KU-YU-SHU: A town in Manchuria, China, situated about 62 miles N. E. of Kirin. Station of the Presbyterian Church in Ireland (1899), with 1 missionary, 21 native workers, 4 schools, and 170 communicants (1900).

KWAGUTI LANGUAGE: A language belonging to the Pacific Coast branch of the North American family of languages, being spoken by Indians of Vancouver Island. It has been reduced to writing by missionaries of the CMS, the Roman alphabet being used for the purpose.

KWALA KAPUGAS: A station of the Rhenish Missionary Society, in Southeastern Borneo, Dutch East Indies, 30 miles N. by W. of Banjarmassin. The station was opened in 1866 and now (1903) has 1 missionary and his wife, 7 native workers, 15 Sunday schools, 6 day schools, and 668 professed Christians, of whom 303 are communicants.

KWALA LUMPUR: A town in the district of Selangor, Malay Peninsula; situated near the head of the Klang River. It is the capital of the British protectorate, and is destined to grow in importance as time passes. Station of the ME, with (1903) 1 missionary and his wife, 3 native workers, 2 Sunday schools, 1 day school, and 205 professed Christians.

KWANGA WAZA: A town in Natal, Africa; situated in the district of Eszahoe, 9 miles N. W. of the town of that name. Station of the Zulu land Diocese of the Church of England (1886), with (1900) 1 missionary, 4 women missionaries, and 2 native women workers.

KWAMER A: A mission station of the New Hebrides Missionary Society, on the southern part of the Island of Tanna, New Hebrides. It was established in 1858 and has (1900) 1 missionary and his wife and 2 native workers.

KWAMER A LANGUAGE: A dialect of the Measisi spoken in the Island of Tanna, New Hebrides.

KWAN-CHAU: A town in the province of Hon-nan, China, situated 70 miles S. E. of Ju-ning-fu. Station of the CIM (1899), with (1903) 1 missionary.

KWAN-CHENG-TSZ: A town in Manchuria, China, situated in the district of Kirin, 62 miles W. of that city. It has a considerable trade in indigo and opium. Population, 70,000. Station of the Presbyterian Church in Ireland (1891), with (1900) 4 missionaries (three with their wives), 25 native workers, men and women; 10 outstations, 11 places of worship, 1 day school, 1 theological seminary, 1 dispensary, 1 hospital and 120 church members.

KWANG-CHI-HSIEN: A town 75 miles southeast of Wu-chang in the province of Hu-peh, China. Station of the WMS (1905), with 1 missionary, 7 native workers, 5 chapels, 3 Sunday schools, 2 day schools, and 140 professed Christians.

KWANG-FENG-HSIEN: A town in the province of Kiang-si, China, situated 138 miles E. N. E. of Nan-chang-fu. Station of the CIM (1889), with (1903) 4 women missionaries, 5 native workers, 2 women, and 3 outstations.

KWANG-HSIEN-FU: A town in the province of Kiang-si, China; situated on the Kin River, 150 miles N. W. of Wen-chau and 135 miles E. of Nan-chang-fu. Station of the CIM (1902), with 2 women missionaries. Name is sometimes spelled Kwang-sin-fu.

KWANG-NING-HSIEN: A town in Manchuria, China; situated in the province of Liaotung, about 45 miles N. N. W. of New-chwang. Station of the Presbyterian Church in Ireland (1895), with (1900) 2 missionaries (1 with his wife), 27 native workers, men and women; 24 outstations, 10 places of worship, 4 day schools, 1 theological seminary, 1 dispensary, 1 hospital, and 300 church members. Name written by the Society, Kwangning.

KWANG-TU-HJEN: A town in the province of Ngan-hwei, China; situated 138 miles E. N. E. of Nag-kang-fu. Station of the CIM (1890), with (1903) 1 missionary and his wife. Name written by the Society, Kwang-teh.

KWANG-YUEN-HSIEN: A town in the province of Sze-chwan, China; situated about 124 miles N. E. of Cheng-tu-fu. Station of the CIM (1889), with (1903) 2 women missionaries. Name written by the Society, Kwang-yuen.

KWANG-ZI-HSIEN: A town in the province of Sze-chwan; situated on the Min River at the northwestern edge of the Cheng-tu plain and about 70 miles S. W. of the city of Cheng-tu-fu. Station of the CIM (1889), with (1903) 1 missionary and his wife and 2 native workers.

KWATO: A town at the S. extremity of British New Guinea. Station of the LMS (1891), with (1903) 1 missionary and his wife, 11 native workers, 15 schools, and 214 communicants.

KWEI-IWA-CHENG-TING: A town in the province of Shen-si, China; situated at an altitude of 3,600 feet in the N. W. part of the province, 60 miles N. W. of So-ping-fu and about 250 miles W. N. W. of Peking. The town is divided by gardens and public squares into two sections, the traders occupying one section and the military and the religious bodies occupying the other. It stands at the confluence of trade routes to the Kokonor region and Eastern Turkestan, being the southeastern terminus of a route across the desert of Gobi. Population, about 200,000. Station of the Christian and Missionary Alliance.

KWEI-KI. See KWEI-TSI-HSIEN.

KWEI-LIN-FU: A town in the province of Kwang-si, China; situated at the headwaters of the Kwei River, 230 miles N. W. of Canton. Station of the CMS (1899), with (1903) 2 missionaries (1 with his wife) and 1 dispensary. There was a station at this place. The name is sometimes written Kwei Lin.

KWEI-TSI-HSIEN: A town in the province of Kiang-si, China; situated about 90 miles E. S. E.
of Nan-chang-fu. Station of the CIM (1878), with (1903) 8 missionary women, 11 native workers, men and women; 8 outstations, 9 places of worship, 2 day schools, 1 boarding school and 246 professed Christians. Name written by the Society, Kweik.

KWEI-YANG-FU: A town in the province of Kwei-chau, of which it is the capital; situated 310 miles S. W. of Chang-te in Hunan, at the sources of important affluent of the Yangtse River. It has considerable commercial importance. Station of the CIM (1877), with (1903) 4 missionaries, 2 wives of missionaries, 2 missionary women, and 5 native workers.

KYELANG. See KAILANG.

KYOTO. See KIOTO.

LABRADOR: The easternmost portion of British America, on the Atlantic coast, comprising the region draining into the Atlantic bounded northeast and east by Hudson Strait and the Atlantic Ocean, southeast by the Strait of Belle Isle, and west by Ungava and Quebec. It is a dependency of Newfoundland and its area is about 120,000 square miles. The population is estimated (1901) at 3,947. The climate is very cold. The coasts are rugged and forbidding. Vegetation is scanty, because of cold, and only stunted trees, shrubs, and lichens grow well there. The people are chiefly Eskimos, with some descendants of early French adventurers. Their occupations are fishing in the summer, hunting and trapping in the winter. The important settlements are scattered along the shore of the Strait of Belle Isle, and on the ocean coast to Cape Webeek, just north of Hamilton Inlet.

The Moravians are the foremost Christian workers in Labrador.

Their stations are, from S. to N., the following: Rigolet (1901), Makkovik (1896), Hopedale (1782), Nain (1771), Okak (1776), Hebron (1830) and Ramah (1871).

The Labrador Medical Mission is also in the field. Dr. Grenfell, of the Medical Mission, in his hospital yacht, steams from point to point, healing the sick among the Eskimos and preaching the Gospel.

The CMS, through Mr. Peck, has accomplished good results in Labrador.

Grenfell (W. T.), The Vikings of Today, 1895.

LABUAN ISLAND: A small island off the N. W. coast of Borneo and about 6 miles distant. It belongs to the British North Borneo Company; is flat, well-wooded and has extensive coal mines, and produces sago flour in large quantities. It has an area of 30 square miles and a population of 6,000. Station of the SPG (1889), with (1903) 1 missionary, 4 native workers, 14 outstations, 2 places of worship, 1 day school and 114 professed Christians, of whom 46 are communicants.

LA CAROLINA: A village in the S. part of the State of Maranhão, Brazil, S. America, near the Tocantins River. Station of the South American Evangelical Mission, with 2 missionaries, one with his wife.

LACCADIVE ISLANDS: A group of 14 islands, only 9 of which are inhabited, lying in the Indian Ocean, about 200 miles off the west coast of Madras, India. Population (1891), 14,473, called Moplas. They are of mixed Hindu and Arab descent, and in religion are Mohammedan. The Malayalam language is spoken, but Arabic characters are used in writing. Coconuts are the principal agricultural product, and coir forms the principal article of trade. Its manufacture is carried on mainly by the women. The northern portion of the islands is attached to the colo negaterate of South Kanara, and the southern to Malabar district, for administrative purposes.

LACROIX, Alphonse Francois: Born May 10, 1799, at Lignieres, Switzerland; studied at Bakel, near Rotterdam; ordained August 11, 1820, as a minister of the Dutch Reformed Church; sailed for India, October 1, 1820, as a missionary of the Netherlands Missionary Society; was stationed at Chinsurah in the Dutch Territory. On the decision of the Netherlands Society to give up its missions in India Mr. Lacroix in 1827 became a missionary of the LMS, two years later removing to Calcutta, the scene of his life work. He was one of the most eloquent and effective vernacular preachers in India. He could always secure a large audience by the charm of his manner and voice, by a felicitous use of idiomatic Bengali, and by the beautiful imagery in which he clothed his ideas. He conducted through the press a new edition of the Gospels of Matthew, Luke and John in Bengali for the Calcutta Bible Society; and, in conjunction with Dr. Duff, superintended the printing of Isaiah in the same language. He also conducted a theological class. After an eminent mission service in Bengal of nearly forty years, he died July 8, 1859, having just completed the sixtieth year of his age. Mullens (J.), Life of A. P. Lacourx, London, 1862.

LAC SEUL: Station of the CMS in Keewatin, Canada, with (1903) 1 woman missionary, 2 native workers, 2 outstations, 4 day schools and 530 professed Christians, of whom 75 are communicants.

LADISMITH: A village in Cape Colony, Africa, situated 65 miles N. E. of Swellendam. Station of the Berlin Mission Society (1856), with (1903) 1 missionary, 12 native workers, 6 outstations, 2 day schools and 624 professed Christians, of whom 288 are communicants.

LADROKE ISLANDS: A group of about 20 islands in the North Pacific Ocean. The islands are of volcanic formation, mountainous, well watered and well wooded. Magellan discovered these islands in 1521, and named them Ladrones, from the thievish disposition of the inhabitants; they were afterward called the Lazarus Islands; and in 1667, when the Jesuits settled there, they were renamed Marianne, or Mariana, in honor of the Spanish queen. The islands formerly belonged to Spain. In 1998 Guam, the largest
of the group, was ceded to the United States. The next year (1899) the remaining islands were ceded by Spain to Germany. The present inhabitants of the islands are immigrants or the descendants of immigrants from the Philippines. Guam has an area of about 200 miles and a population of 9,000. Of these, two-thirds live in Agana, the capital. The ABCFM has a station here (1901). Spanish has been the language of the islands, but English is making progress in Guam.

**LADYSMITH:** A village in the Klip River district of Natal, Africa, situated 80 miles N. N. W. of Pentictonburg. Population, about 300 people. Station of the Maritzburg Missionary Association (1856), with 1 woman missionary. Station also of the South African Wesleyan Methodist Mission Society, with 77 native workers, 22 outstations, 14 chapels, 2 Sunday schools, 1 society for young people, 5 day schools and 1,228 professed Christians.

**LAGOS:** A town in Lagos Colony, West Africa, situated 45 miles S. of Abeokuta, on an island in a lagoon at the mouth of the Ogun. It is accessible to vessels of considerable size, and has water communication far into the interior. Since 1861 a British possession; often called the "African Liverpool," on account of its enormous exports of palm-oil. It is now the capital of the district. The name is Portuguese; the native name is Ago, or Eko. Population (1901), 41,847, of whom 10,636 are reported as Christians (233 Europeans) and 22,080 Mohammedans; only 9,000 of the town people are reported as pagan. The city is connected with Abeokuta and Ibadan by a railway (130 miles). Station of the CMS (1852), with (1903) 4 missionaries, one with his wife; 3 women missionaries, 36 native workers, 8 day schools, 2 boarding schools, 1,930 professed Christians, of whom 932 are communicants. It is also the field of the native church in connection with the CMS. Station of the NHC (1879), with (1900) 10 missionaries, 5 women missionaries, 4 native workers, 11 outstations, 19 chapels, 10 Sunday schools, 10 day schools, 1 theological college and 1,600 professed Christians. Station also of the SBC (1833), with 1 outstation, 1 chapel, 1 Sunday school, 1 day school and 1 theological college. The work is, however, in charge of the Native Baptist Church. Station of the WMS, with (1903) 1 missionary and his wife, 53 native workers, 17 chapels, 6 Sunday schools, 6 day schools and 1,736 professed Christians, 678 of whom are communicants.

**LAGOS:** A British Colony and Protectorate on the Gulf of Guinea, West Africa, between Dahomey and Southern Nigeria, and northward within undefined boundaries to the French possessions on the Niger. The territory comprises Lagos Island and about 140 miles of coast, containing altogether 3,460 square miles; the protectorate extends inland, with 25,450 square miles. The estimated population of all (1901) is 1,500,000.

Missions were commenced in this territory by Christianized negroes removing from Sierra Leone to Abeokuta about 1840. Their representations led to the establishment by the CMS of stations at Badagry (1845), Abeokuta (1846), Lagos (1852) and Ibadan (1852). The CMS has since occupied three other stations. The WMS, the SBC and the National Baptist Convention also have missionaries at some of these same stations, and altogether there are 89 missionary schools and about 7,500 native communicants.

**LAGUBOTI:** A village on the S. shore of Toba Lake, Sumatra. Station of the Rhenish Missionary Society, with (1903) 2 missionaries, one with his wife; 12 native workers, 13 outstations, 10 Sunday schools, 11 day schools and 3,245 professed Christians, of whom 870 are communicants.

**LAHAGU:** A village in the central part of the island of Nias, Dutch E. Indies, situated about 20 miles S. W. of Gunong Sitolo. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 1 day school, 1 Sunday school and 208 professed Christians, of whom 124 are communicants.

**LAHORE:** A town in Punjab, India; situated on the left bank of the Ravi River, 32 miles W. of Amritsar. Has several fine mosques and a number of Hindu temples. The surrounding country is covered with vast ruins, attesting the ancient magnificence of the city. Population (1901), 202,964. The city is inhabited by a very heterogeneous people, and is known for the many distinct languages, but Pashtu and Kashmiri are also spoken. Mission station of the CMS (1867), with (1903) 3 missionaries, 2 with their wives; 1 woman missionary, 2 native workers, 1 place of worship, 2 day schools, 1 theological class, 1 hostel, and 317 professed Christians, of whom 130 are communicants. Station also of the ME, with (1903) 1 missionary and his wife, 12 native workers, 2 chapels, 5 Sunday schools, and 620 professed Christians, of whom 60 are communicants. Station also of the PN (1849), with (1903) 6 missionaries and their wives, 3 women missionaries, 15 native workers, 10 outstations, 5 places of worship, 5 Sunday schools, 8 day schools, 2 boarding schools, 1 college, 1 dispensary, and 215 professed Christians. The YMCA (1899) and the YWCA both have agents here with branches of their respective associations. Station also of the ZBM, with (1903) 11 women missionaries, 12 native workers, 2 boarding schools, and 240 Zenana pupils.

**LAHUSA:** A village on the S. coast of the island of Nias, Dutch E. Indies; situated about 35 miles S. of Gunong Sitolo. Station of the Rhenish Missionary Society, with (1903) 2 missionaries, 1 with his wife; 6 native workers, 5 outstations, 1 Sunday school, 2 day schools, and 311 professed Christians, of whom 202 are communicants.

**LAI-AN.** See LAI-NGAN-HSIEN.

**LAI-NGAN-HSIEN:** A town in the province of Ngan-hwei, China; situated about 20 miles N. by E. of Choo-chau. Station of the CIM (1899). Name also written Lai-an.

**LAINGSBURG:** A village in the District of Prince Albert, Cape Colony, Africa; situated on the railroad to Kimberley, 213 miles from Cape Town. Population, 1,500. Station of the Berlin Missionary Society (1884), with (1903) 1 missionary, 11 native workers, 15 outstations, 2 day schools, and 880 professed Christians, of whom 284 are communicants.

**LAITYNKOT:** A village in Assam, India; situated 10 miles S. by W. of Shillong. Station of the Welsh Christian Methodist Missionary Society, with (1903) 1 missionary and his wife, 24 native workers, 14 outstations, 15 places of wor-
who many are Mohammedans. Station of the CIM (1885), with (1903) 6 missionaries, 2 with their wives; 1 woman missionary, 1 chapel, and 1 dispensary.

LANDAUR: A village and sanitarium in the District of Dehra Dun, United Provinces, India; situated 77 miles E. of Ambala. Altitude, 7,459 feet. Population (1891), 2,000. Station of the PN (1874), with (1903) 1 missionary and his wife, 1 woman missionary, and 1 boarding school. Station of the ZBM, with (1903) 2 women missionaries, 2 native workers, and 81 Zenana pupils. The name is sometimes spelled Landour. The place is also called Woodstock.

LANG-CHAU: A town in the province of Shen-si, China, situated 115 miles W. N. W. of Hsi-ghan-fu. Station of the CIM (1893), with (1903) 1 missionary and his wife, 1 woman missionary and 1 chapel.

LANGUAGES; Missions and the Unwritten: Christianity had its origin in the midst of the highest civilization of the times. It was not born in some obscure corner of the earth. It found its way at once into the imperial centers of the mightiest empire of the ancient world. It expressed itself as the outcome of the supreme language the human race has ever invented. The oracles out of which it sprang had already been translated into this tongue, and the new oracles of the New Covenant were given in the same speech. It is a significant fact that cannot be too often commented upon, that Christianity at once conquered the best and possessed it for the New Kingdom. It speedily also began to invade the other living languages of power and influence— the Syriac, which reached out eastward to the Euphrates and beyond, and the Latin, which was the speech of the civilization of the West. This could not take place without affecting the very life and forms of these languages, changing their vocabulary, enriching their content.

It would be interesting to trace the influence of Christianity—aggressive, conquering, missionary Christianity—on these languages, already the vehicle of polished thought. Without doubt the very language of Greece, in which the New Testament was first given form, received a new imprint from these holy writings.

So too the Scriptures, translated into the Vulgate, the common speech of the Latin peoples, had their modifying influences on the language of the Cazars. Except, however, in adding elevation of thought and in the gift of spiritual ideals it is doubtful whether Christianity really added anything to these already classic languages. When we come to another class of languages, another set of facts are to be considered. Christianity, ever restless and moving outward from its early centers, came in contact with the West with peoples that had already developed incipient literatures. They had created their alphabets and begun their progress. The new light of the Spirit appeared, proved a mighty heaven, and as we trace these origins of literature we find, in our earliest forms of English literature, the presence of the creative power of the Christian story. Even later in their development it is the power of the Bible translated by the missionaries. The church has known that its business in England and in Germany, or the power of a missionary soul that lifted it to its loftiest possibilities, as Dante, the tongue of Italy.
But this is not enough for Christianity. It is not satisfied to vivify existing literature, and give a meaning to the words of the sacred writers, but longs to do something for the souls of the people. The missionaries, therefore, have all had to do with the shaping and forming of these languages.

The work of the Moravians among the Delaware Indians was of the most important kind. The native language of the Delaware was previously known only to a few of the chief men, and even these were able to say only a few words. The missionaries, therefore, had to do with the shaping and forming of this language, and the work was of great importance. The missionaries, therefore, had to do with the shaping and forming of this language, and the work was of great importance.

The work of the Moravians among the American Board missionaries among the Dakotas and among the Chocuwas, all had to do with the shaping and forming of these languages. So much was it realized that this missionary work had been an important aid in the civilizing of the tribes that in 1887 the Dakota Indians appealed from the decision of the United States abolishing the use of the vernacular in their schools on the ground that the vernacular Bible had been a great and effective agency in their civilization.

Not only has missionary effort, especially in connection with the translation of the Scriptures, been a creative power giving shape and form to many unwritten languages, of which the above incidents are simply occasional examples, and giving an elevation and dignity to those that already had been reduced to writing, but in many instances the work of the missionaries has been the only influence that has given permanence to these languages. In some cases the official record of these languages that exists is the product of the labor of the missionary.

LAN-KI-HSIEH: A town in the province of Che-kiang, China, situated 75 miles S. W. of Hang-chau. It is an important commercial center. Population, 100,000. Station of the CIM (1883), 3 missionaries, 5 native workers, and 1 chapel. Name is sometimes written Lan-k’i.

LAN-TIEN-HSIEH: A town in the province of Shensi, China, situated 28 miles S. E. of Hsi-ngan-fu. Station of the CIM (1885), with (1903) 1 missionary and his wife, 1 native worker, 1 chapel, 1 Sunday school, and 1 day school. The name is sometimes written Lan-tien.

LAO-HO-KAU: A town and river port on the Han River, in the province of Hu-p’ei, China, situated 200 miles N.W. of Han-kau. Station of the CIM (1887), with (1903) 2 missionaries and their wives, 9 native workers, 1 outstation, 2 places of worship, 1 Sunday school, 1 day school, and 44 members. Station of the Norwegian Lutheran China Mission (1894), with (1900) 3 missionaries, 2 with their wives; 4 women missionaries, 1 day school, and 1 boarding school. Station also of the PB, with 1 missionary and his wife and 2 women missionaries. Name spelled by the Company Lao-ho-k’o, and also Lao-ho-keo.

LAO-LING: See LE-LING-HSIEH.

LAOS: The name Laos is the French method of writing the name Lao, given by the Siamese to a people of the Shan stock, often called Eastern Shans, and found in North Siam and in the French territories of Indo-China. The word has become naturalized in English through the adoption of the French spelling by writers in English. The northern limit of the Laos tribes have not yet been fixed, but they are said to form the majority of the population as far north as the southern part of the Chinese province of Yun-nan. The hill tribes of the Chinese island of Bai-nan also speak a dialect which can be understood by the Laos of Siam. The general theory of the Shan race is that they lived in China before the Chinese appeared, were crowded into the hills first, and so gained their name Shan (mountain), and were next crowded gradually southward, those who took the western river valleys becoming the Shans of Eastern Burma, and those who followed the eastern valleys becoming the Siamese and Cam-
bodians, the later comers becoming known to the world by the name Lao, applied to them by the Siamese, who call themselves "Tai," which means the free.

The number of these people is variously estimated at from five to ten millions. Estimate in any case is little better than a guess, since the northern regions of their domains have not been fully explored. Various hill tribes inhabiting the same regions as the Laos are often confounded with them because those of whom who write use the Laos written characters. But they are not of Laos blood and their languages are entirely distinct from the Laos dialects. Of these hill tribes several are found in Siamese territory, such as the MuSu, the Kamu, the Meo, the Yao, and Lwa. The first two of these hill tribes have been reached to some extent by missionaries. They are worshipers of ancestors or of spirits, and some of them are notable exceptions to the rule of laziness which governs the Laos. They also show considerable mechanical aptitude in a rude way.

In stature the Laos are rather short, averaging about five and a half feet in height. In complexion they are rather tawny, with brown eyes but black hair, and in their language, they have considerable pride of race. The peasants are attached in feudal style to some lord, but with considerable liberty to change their relations to a lord less severe. For this reason, perhaps, the feudal lords are somewhat restrained in exacting labors from their retainers. Slavery exists to some extent among the Laos. Slaves are handed down by inheritance, or purchased, or captured in war. In their slavery, too, there is some amelioration in the fact that the slaves are often allowed to live by themselves, merely answering when called upon for service for a few days or a week at a time.

The Laos treat women as equals, and upon marriage it is quite common for the husband to leave his father and mother and join the family of his wife. They are hospitable to strangers, rather inclined to laziness, and passionately fond of gambling. A curious custom in reference to the disposition of their dead, is that the body of a deceased friend is embalmed and kept at the house for weeks and perhaps months, as is done in some parts of China, and the final disposition of the body is by cremation. Mission work among the Laos of Siam was commenced by Messrs. McGilvary and Wilson of the American Presbyterian Board (N.) in 1867. After a careful exploration of the country, they selected Chiang Mai as the first station, and from the first marked success met them. The Laos mission of the PN is now in a very flourishing condition.

LA PAZ: A town in Bolivia, South America, and capital of the Republic. It has an altitude of 12,300 feet and a population of about 57,000.

Station of the Baptist Society of Ontario and Quebec (1899), with (1903) 2 missionaries and their wives and 1 native worker.

LAPLAND: The country where the Lapps live; has nothing for a distinct political or geographical existence, but is territory which is included in the dominions of Norway and Sweden and Russia.

The region belonging to Norway and Sweden lies in the northern and northeastern part of the Scandinavian peninsula, and includes the provinces of Norolland and Finnmark in Norway, and North and South Bothnia in Sweden. Russian Lapland lies in the northwestern districts of the empire, and is included in the grand duchy of Finland. In Norway the area of Lapp territory covers nearly 26,500 square miles, with 5,000 true Lapps; in Sweden, 50,600 square miles, 4,000 Lapps; in Russia, 11,300 square miles, 8,800 Lapps. In addition to the natives, Finns, Swedes, Norwegians and Russians are found in large numbers.

For the greater part of the year the climate is severely cold, tho that of the coast region is tempered by the Gulf Stream. During July and August the sun never sets for several weeks in the northern districts, and the heat is great. Forests of birch, pine, fir, and alder abound, but large tracts of country are utterly barren.

The Lapps or Laplanders belong to the same branch of the human race as the Finns and Esthoniens, and physically are undersized, with straight black hair, somewhat yellow skin, low foreheads, small eyes, and beardless chins.

The somewhat despised by their Norwegian neighbors, they have good mental powers and are manually dexterous. Honesty, a strong affection for their native land, and great religious depth and constancy characterize their best men.

The Swedish Church embraces, nominally, about the whole of the population of the country; but a large portion of the people, partly because of indifference and partly because of the distance from the churches, seldom participate in religious services. With an area of nearly 116,000 square kilometers, and with a population of 60,000, only seventeen churches hold services every Sunday.

LA PLATA: A town in Argentina, South America, situated 30 miles E. S. E. of Buenos Aires, and capital of the province of Buenos Aires. Population, 65,000. Station of the ME, with (1903) 3 native workers, 1 place of worship, 2 Sunday schools, and 123 professed Christians, of whom 53 are communicants.

LARACHE. See El Araish.
LARAISH. See El Araish.

LARANGEIRAS: A town in the State of Sergipe, Brazil, 19 miles W. N. W. of Aracaju; situated at the head of steam navigation on the Cotiminda River. Population, 3,490. Occupied as a station by the PN in 1884, and left in care of native workers in 1901, the missionary removing to Estancia.

LAURES. A town in Porto Rico, West Indies, situated 50 miles W. S. W. of San Juan, with a population of 17,100. Station of the American Missionary Association, with (1901) 1 missionary and his wife, 2 women missionaries, 1 Sunday school, and 1 day school.

LARNACA: A town on the S. coast of Cyprus, situated 23 miles S. E. of Nicosia. It is the chief commercial port of the island and has many ruins of antiquity. It is the ancient Culium. It is occupied by the British (1891), with (1901) 2 missionaries and their women, 1 place of worship, 2 Sunday schools, 1 day school, 1 dispensary and 22 professed Christians.

LAS FLORES: A town in Argentina, South America, situated 165 miles S. W. of Buenos
Aires. Station of the RBMU, with (1901) 1 missionary and his wife and 1 Sunday school.

LATAKIA: A town and seaport of Syria; situated 75 miles W. of Tripoli. It has the remains of the ancient Roman city of Laodicea ad Mare, and is the capital of the Latakia district of the Sanjak of Homs. Population, 12,000. Station of the RP (1859), with (1901) 3 missionaries and their wives, 3 women missionaries, 14 native workers, 4 outstations, 1 place of worship, 2 Sunday schools, 1 Sunday school, 1 boarding school, 1 printing press, and 110 Christians.

LEALUYI. See LIALULI.

LÈBÂK: A village of Java, situated 50 miles S. W. of Batavia. Station of the Netherlands Mission Society (1894), with (1901) 1 missionary, 2 native workers, 1 outstation and 1 hospital.

LÈBANON: A semi-autonomous province in Syria comprising the range of mountains of the same name, with an area of 2,500 square miles. It was given a constitution by the Turkish Government, under pressure from the great powers of Europe, who intervened to stop the massacres of 1860. The Governor of the Lebanon is not removable by the Sultan, nor can any but a Christian be appointed to the post. In consequence of these arrangements it is far more prosperous and progressive than any neighboring districts of Turkey.

LEGGE, James: Born at Huntly, Aberdeen- shire, Scotland, in 1815; graduated at King's College and University, 1835. After studying at Highbury Theological College, London, he was appointed in 1839, by the LMS, a missionary to China, and reached Malacca in December of the same year. In 1840 he took charge of the Anglo-Chinese college, founded by Dr. Morrison and Dr. Milne. In 1843 the Society decided to change the college into a theological seminary for the training of native ministers for China, selected Hongkong for the seat of the institution, and appointed Mr. Legge as its president. He did some of his best work in this school, altho he finally left it because he was not satisfied with the result of his work as a teacher. Some of the best and most useful native workers in the mission were trained by Mr. Legge. In 1867 he visited England, and while there was presented by the government of the colony with a service of plate "in acknowledgment of the many valuable services freely and gratuitously rendered."

The work of preaching to the Chinese was that which Dr. Legge loved best. But the work which has made him renowned over all the earth is the edition which he brought out of the Chinese classics, with the Chinese text, a translation in English, notes critical and exegetical, and copious prolegomena. For these and translations of other important Chinese works, he received, on occasion of its first award, in 1875, the Julien Prize from the Académie des Belles Lettres et Inscriptions of the Institute of France.

LEH: The capital of the Ladakh province, Kashmir, India, situated about 5 miles from the Indus River and 160 miles east of Srinagar. It is a commercial center for trade between Punjab and Tibet on one hand and Chinese Turkestan on the other. It is also a market for Turkestan sheep wool. Altitude, 11,530 feet. Population, about 4,000. Station of the Moravian Missionaries (1855), with (1903) 3 missionaries and their wives, 1 woman missionary, 1 outstation, 2 places of worship, 2 Sunday schools, 3 day schools, 1 printing press, 1 dispensary, 1 hospital, and 17 Christians; of whom 1 is a Chinese Christian.

LEIDENBURG. See LYDENBURG.

LEIPZIG EVANGELICAL MISSIONARY SOCIETY. See GERMANY; MISSIONARY SOCIETIES IN.

LE-LING-HSIEN: A town in the N. of the province of Shan-tung, China, situated 68 miles N. by E. of Tsi-nan-fu. Station of the Methodist New Connexion Missionary Society, with 3 missionaries and their wives, 2 native workers, 159 outstations, 189 places of worship, 10 Sunday schools, 1 book room, 26 day schools, 2 boarding schools, 1 female helpers' training class, 1 hospital, 1 medical class and 1,883 Christians. The name is sometimes written Lao Ling.

LENAKEL: A village in New Hebrides, Oceania, situated on the W. coast of Tanna Island.

LEON: A town in the state of Guanajuato, Mexico, situated 31 miles W. by N. of Guanajuato. There are considerable manufactures in this town. Altitude, 5,000 feet. Population, 50,000. Station of the ME, with (1903) 1 missionary and his wife, 1 Sunday school, 1 place of worship, 1 class of selected workers, and 2 professional interpreters. Station also of the SEC (1896), with (1903) 1 missionary and his wife, 1 native worker and 1 Sunday school.

LEOPOLDVILLE: A town in the Congo Free State, Africa, capital of the Stanley Pool District, situated on the left bank of the Congo River at the outlet of Stanley Pool. It is the most important trading post in the Congo Free State and is used as a business center for the missionaries in the Congo region. The climate is good and the water supply excellent. Station of the RBMU (1899), with 1 missionary and his wife.

LEPCHA LANGUAGE: A dialect spoken in Sikkim, north of Darjiling and on the southern border of Tibet. It belongs to the Tibetan-Burman linguistic group, and is written with the Pahari alphabet.

LEPERS: Special labor for: Previous to the year 1860 but little effort had been made toameliorate the condition of the lepers, or to take the Gospel to them in their isolation. As early as 1812 Dr. Carey of Serampur, India, witnessed

"The Notions of the Chinese concerning God and Spirits." The work of preaching to the Chinese was that which Dr. Legge loved best. But the work which has made him renowned over all the earth is the edition which he brought out of the Chinese classics, with the Chinese text, a translation in English, notes critical and exegetical, and copious prolegomena. For these and translations of other important Chinese works, he received, on occasion of its first award, in 1875, the Julien Prize from the Académie des Belles Lettres et Inscriptions of the Institute of France.
the burning of a leper and was so impressed by the helplessness of these outcasts that he established a hospital for them in Calcutta, probably the first founded in India. In 1830 he erected an asylum at Hemel en Aarde, and four years later a larger hospital was erected, and the Governor requested the Moravian Church, already working among the Hottentots, to send missionaries to the place. And the request was granted, and in 1836 after the spiritual as well as the material welfare of its inmates. In 1846 the establishment was removed to Robben Island, and was continued in the care of the Moravians till 1857, when the English Government appointed a chaplain of the Church of England, and the Moravians withdrew. As early as 1840 provision for lepers was made at Almora, India, through the efforts of a government official, and in 1849 the work was turned over to the LMS. In 1850 an asylum for lepers was established at Amble, Punjab, by missionaries of the PN, again aided and largely supported by a government official. But, with the exception of the one asylum in South Africa and the two institutions in India, practically nothing was done for lepers during the years previous to 1860. During the next thirty years Christians were slowly but surely awakening to a sense of the pressing need of these neglected classes, especially in India, where leprosy is so prevalent. Asylums were established at Chamba, Rawal Pindi, Lahore, and the Punjab, in 1860; at Agru, Allahabad, Almora, Banda and Chandigar, near Pittoragarh in the N. W. (United) Provinces; at Purulia in Bengal, at Ujjain in Central India and at Aleppie, Mungallur and Neyoor, in the south of Hindustan. The CMS established a leper settlement on the Zanzibar coast in Africa and the Norwegian Missionary society began work for lepers at two stations in Madagascar. In Jerusalem the Moravians established an asylum and home for lepers. While the various existing missionary organizations were directly or indirectly working for lepers, the expansion of the work during this period is largely due to the formation of the society called the "Mission to Lepers in India and the East," by Mr. Wellesley C. Bailey, who, while stationed in the Amur, returned to Siberia; at Ashburn, in India, and 1869 became much impressed with the condition of the lepers at the Ambala asylum of that mission. In 1874 he visited Great Britain and succeeded in forming a society for developing this special work. While as an organization it is independent, it cooperates with the various societies engaged in the work.

In addition to these, fourteen institutions for lepers, owned by various societies, are partly supported by the Mission to Lepers. Fourteen homes for the untainted children of lepers have been established. Missionary work is also carried on in the asylums established by the British Government in several important cities of India, and in institutions supported by private benevolence which are found in various parts of India. Perhaps the best known of these is the Missions for lepers in India is Miss Mary Reed, of the American ME Mission, who contracted the disease while working in India, and has lived among the lepers at Chandag, with no other associates than the afflicted natives, since 1890. The first asylum for lepers in Burma was opened in 1891 at Mandalay. At Singapore, a government leper colony is regularly visited by a missionary. At Lakanw, among the Laos people, the native Christians support twenty leper families. At Pak-hoi, in South China, in 1891 the CMS founded one of the numerous stations for lepers in the foreign field, and has since opened work for them at Hang-chau-fu, Fu-chau-fu, Kien-ning-fu, Lo-nongwong and Ku-tienhsien. In 1895 the first leper asylum in Central China, the "Mission Leper and Leprosy Home," was opened by the CMS. The American ME Mission has a work for lepers at Hsing-hwa-fu, and the Protestant Episcopal Church, U. S. A., has begun work at Nangan-king, on the Yangtse River. Work for the lepers of Japan was begun by the American Presbyterians in 1894 in a suburb of Tokio, and the CMS has a hospital at Kumamoto.

In Africa, besides the colony on Robben Island, the Moravian missionaries work among the lepers within the bounds of their mission north of Lake Nyasa. In the Transvaal, the Hermansburg Mission has a work at Ma-boka. The government asylum at Emajangana, in Kaffraria, is visited by a missionary of the Scottish Episcopal Church. Another leper colony is cared for near the town of Zanzibar. In Madagascar the LMS began work for lepers in 1885, about four miles from Flarantsoa. Manakavaly, the LMS, and in 1891 the United Missionary Society at Ambala, the LMS, has been taken over by the Paris Evangelical Missionary Society.

The Norwegian Missionary Society has a station for lepers at Antsirabe, and another at Fianarantsoa. The United Norwegian Lutheran Church in America also has a leper home and asylum in Madagascar. The French Roman Catholics have two hospitals for lepers in the island and also work for them at Port of Spain, Trinidad, and at Mandalay.

In Hawaii a leper settlement was established by the Government at Molokai, in which work is carried on by the Hawaiian Missionary Society and the Roman Catholics. This leper colony was the scene of the labors of Father Damien, who established the Roman Catholic Mission there in 1873, contracted the disease, and died at his post in 1889.

In the New Hebrides a leper colony has been established by the Melanesian Mission in one of the Banks Islands, and the LMS began work in 1897 among the lepers of Belep Islands.

The first work for the lepers of Persia was begun by the American Presbyterians at Tabriz in 1894. In 1896 the Moravian Missionary Society established an asylum at Surinam, in South America. Summary (1901) — Africa: 6 asylums and settlements, with 840 inmates. Burma: 2 asylums, with 162 inmates; 1 home for untainted children.

Totals: 71 asylums in 12 different fields; 6,528 inmates; 15 homes for untainted children, with 285 inmates.

LERIBE: A village in Leribe district, in the north of Basutoland, Africa, is the headquarter of the Paris Evangelical Society (1859), with (1903) 1 missionary and his wife, 20 native workers, 12 outstations, 1 place of worship, 1 Sunday school, 13 day schools and 1,137 professed Christians, of whom 752 are communicants.

LES CAYES. See AUX CAYES.

LEVUKA: A town on the island of Ovalau, former capital of the Fiji Islands, Oceania, situated on the coast and surrounded by hills. Station of the Australian Wesleyan Missionary Society, with (1900) 1 missionary, 87 native workers, 56 places of worship, 103 Sunday schools, 123 day schools and 1,091 Christians. The SPG also has a station there, with 1 missionary.

LILALUI: A village in the Barotsi valley, Rhodesia, Africa, situated on a low hill, 15 miles E. of the Zambesi River, with which it is connected by a canal constructed by the Barotsi chief Lewanika. Station of the Paris Evangelical Society (1892), with (1900) 2 missionaries, 2 outstations, 28 Sunday schools and 971 Christians.

LIALUI: A village in the Barotsi valley, Rhodesia, Africa, situated on a low hill, 15 miles E. of the Zambesi River, with which it is connected by a canal constructed by the Barotsi chief Lewanika. Station of the Paris Evangelical Society (1892), with (1900) 2 missionaries, 2 outstations, 28 Sunday schools and 971 Christians.

LILUALI: A town in the province of Kan-su, China, situated in a fertile plain, 180 miles from Lan-chau. The plain is often flooded by the Shwan-tai River. Altitude, 5,000 feet. Population, 20,000. Station of the CIM (1888), with (1903) 3 missionaries, 2 with their wives, and 1 woman missionary.

LILANG-CHAU: A town in the province of Szechwan, China, situated in the S. W. near the boundary of Yunnan, at the foot of the mountains of the same name. It is important for its deposits of a salt of lead used in the manufacture of porcelain ware. It is a station of the CMS (1852), with 1 woman missionary.

LIAO-YANG-CHAU: A town in the province of Liao-tung, Manchuria, China, situated 40 miles S. S. W. of Mukden. It is a mission station of the UFS (1880), with (1903) 4 missionaries, 2 with their wives; 4 women missionaries, 37 native workers, 16 outstations, 13 Sunday schools, 5 day schools, 1 dispensary, 1 hospital, and 650 professed Christians.

LIBERIA: A republic on the coast of Western Africa, including 500 miles along the coast, with an average breadth of 100 miles, and an area of about 35,000 square miles. It lies between Sierra Leone on the west and the Ivory Coast on the east, and is bounded on the north by French Guinea. A colony of negroes from America was planted here in 1816 by an American colonization society, with the object of giving the negro a chance for self-improvement. An unfortunate selection of locality caused the failure of the attempt, as the climate was fatal. A treaty made with the native princes in 1821 secured a more healthful locality. The land was portioned out; settlements sprang up, and the colony, named Liberia, was founded. Caldwel, Edina; new lands were acquired; neighboring chiefs were received into the colony, and hostile chiefs were conquered, until, in 1847, Liberia was declared an independent government, with a president, senate and house of representatives. A property qualification restricts the right of suffrage, and, for the time, whites are not allowed citizenship. Great Britain and other European powers recognized the republic. The original plan of the colony has not been fully carried out, since it draws its people more from the surrounding districts and native tribes than from the emancipated negroes in North America. In 1889 the kingdom of Medina, a rich and populous country, was annexed.

The people are estimated at 2,000,000, of whom 60,000 speak the English language. Sugar is the principal product of agriculture, the farming of all kinds is conducted with results in crops of cocoa, coffee, cotton, and rice. Trade is in gold-dust, ivory, palm-oil, coffee, and other products, but it is badly managed and languishes.

The inhabitants are the seafaring Kroos, between Cape Palmas and the Sinu River; the Bassas, the Barlins, south of the St. Paul; the Mandingan Veis, agriculturists; the fierce Golas, dwelling along the western affluent of the St. Paul; the war-like Pussis and Bussis; and, in the uplands of the interior, the powerful Mandingans. The Protestant faith prevails along the coast. The PE, the ME, the ELGS, and the African Methodist Episcopal Church have all missions in Liberia.

LIFAU: A town in the N. part of the province of Kwang-tung, China, situated about 130 miles N. W. of Canton. Station of the PN (1891), with (1903) 3 missionaries, 2 with their wives; 1 woman missionary, 7 native workers, 3 outstations, 4 places of worship, 3 Sunday schools, 1 day schools, 1 boarding school, 1 dispensary, 1 hospital, and 207 professed Christians. The name is sometimes spelled Lien Chow.

LIFU: The largest of the Loyalty Islands, Oceania. Station of the LMS (1843), with (1903) 1 missionary and his wife, 216 native workers, 28 Sunday schools, 1 boarding school, and 3,856 professed Christians, of whom 2,027 are communicants.

LIJDENBURG. See Lydenburg.

LIKHOEL: A village in Basutoland, Africa, situated about 18 miles S. E. of Hermon. Station of the Paris Evangelical Missionary Society (1880), with (1903) 1 missionary and his wife, 23 native workers, 7 outstations, 1 chapel, 1 Sunday school, 8 day schools, and 1,362 professed Christians, of whom 813 are communicants.

LIKOMA ISLAND: An island 5 miles long in Lake Nyasa, Africa. It is the headquarters of
the UM, with 5 missionaries, 4 women missionaries, 7 native workers, 3 outstations, 1 chapel, 5 day schools, 2 boarding schools, 1 theological class, 1 dispensary, 1 hospital, 1 printing press, and 555 professed Christians, of whom 416 are communicants.

LI-LONG: A town in the province of Kwang-tung, China, about 75 miles S. E. of Canton, on Mirs Bay. Station of the Basel Missionary Society (1852), with (1903) 3 missionaries, 2 with their wives; 9 native workers, 4 outstations, 1 theological class, 1 boarding school, and 397 professed Christians, of whom 229 are communicants.

LIMA: The capital of Peru, South America, situated in a valley 6 miles from Callao. It was founded in 1535 by Pizarro as the capital of the vice-royalty, and is the most handsome city in South America, with imperial palace, 32 churches, large manufactures of glass and gold laces. Its climate is pleasant, but not healthful, owing in part to bad sanitation. There is little or no rain, but dews and fogs are abundant in winter. It has an altitude of 565 feet, and a population of (1891) 103,000 people. Station of the ME (1891), with (1900) 1 missionary and his wife and 1 woman missionary.

LIMAO: A settlement in Bechuanaland, Rhodesia, Africa, situated about 10 miles W. of the railroad station of Ramotoua. Station of the Hermannsburg Missionary Society (1864), with (1903) 1 missionary and his wife, 2 native workers, 1 outstation, 1 chapel, and 2 day schools.

LIMON: A town and seaport on the E. coast of Costa Rica, Central America, situated about 80 miles E. of San Jose. Station of the Jamaica Baptist Mission Society (1888), with (1901) 4 missionaries, 3 with their wives; 7 outstations, 7 chapels, 6 Sunday schools, and 367 Christians. These statistics include Ebenezer or Porvenir. The town, with its Methodist Conference, has there (1901) 1 missionary and his wife, 22 native workers, 5 outstations, 6 places of worship, 1 Sunday school, 1 Young People's Society, 1 day school, 1 temperance society, and 281 Christians. Name is also written Port Limon.

LINARES: A town in Nuevo Leon, Mexico, situated 90 miles S. of Monterrey. Population, 10,000. Station of the PS (1857), with 1 missionary and his wife, 1 native worker, and 2 day schools.

LIN-CHING. See LIN-TSHING-CHAU.

LINDLEY, Daniel: Born August 24, 1801, in Washington County, Penn.; graduated at Ohio University and Union Theological Seminary, Va., in 1829. He preached three years in Charlotte, N. C., and, in 1834, was appointed missionary to Africa by the ABCFM. The disturbed state of the country made Mr. Lindley's first few years in Africa exceedingly dangerous and wearing. At length, in 1839, he established himself at Durban (then called Port Natal), and labored among the Zulus for thirty-five years. He not only preached to them the Gospel of Christ, but, the not a mechanic, he showed the native Christians who wished to improve their modes of life how to make brick, build houses, construct implements and furniture. He often defended the people with his rifle from the attacks of wild beasts, and in sickness ministered to them. In 1846 five commissioners were appointed by the Colonial Government to allot lands to the natives and to encourage them to industry. Mr. Lindley was one of these commissioners. He was always greatly honored and loved by the Zulus. The Dutch Boers used to say: "If there be a human name that warms the heart of a Natal Teck Boer, it is the ever-to-be-remembered name of Daniel Lindley." He returned home in ill-health in 1874, and died at Morristown, N. J., September 3, 1880.

LIN-KIAN-FU: A town in the province of Kiang-si, China, situated 195 miles S. E. of Han-kau. Station of the CIM (1808), with (1903) 1 missionary and 1 chapel.

LINOKANA: A village in the Marico District of the Transvaal, Africa, situated 15 miles N.W. of Zeerust. Station of the Hermannsburg Missionary Society (1859), with 1 missionary and his wife; 2 native workers, 2 outstations, 1 place of worship, 2 day schools and 1,113 professed Christians.

LIN-TSING-CHAU: A town in Shan-tung, China, situated on the W. border of the province, on the Wei-ho River, about 75 miles W. of Tsin-fan-fu. Station of the ABMU. Altho the mission work was broken up by the Boxer outbreak it is now (1902) being reorganized. There are 2 missionaries, 1 with his wife; 10 native workers, 5 outstations, 5 places of worship, 5 Sunday schools, 1 day school, and 60 Christians. The name is sometimes spelled Lin-ching.

LIQUOR TRAFFIC AND MISSIONS: It is an axiom in physics that without the application of force water will not rise higher than its source. In the light of this truth a glance at the use of ardent spirits in some Christian lands may show us what to expect in their commerce with heathen tribes. Belgium is a fair specimen of a papal country, and there 70,000,000 litres—a litre = 2.113 pints—are consumed annually. Every year between 5,000,000 and 6,000,000 of population spend eight times as much for liquor as for public instruction, and the amount that is drunk continually increases. The net revenue from the excise in Great Britain in 1902 was £31,997,962, all but £674,468 of it from the manufacture and sale of liquor.

Such figures prepare us for dark pages in the records of commerce with heathen, and we are not disappointed; the reality even exceeds the expectation. In 1887, 180,000 gallons were imported from Christian lands into Sierra Leone alone, and into the neighboring district of Lagos 1,231,302 gallons were sent annually. Rev. W. Allan states that the Niger Company imported 220,000 gallons in two years, and 500,000 gallons went with him in the ship Caliban from Liverpool. The Hon. and Rev. James Johnson, a native member of the government, who has labored there for eighteen years, states that packages of gin and rum were found everywhere. Large steamers loaded with liquor lay at anchor; warehouses were crammed with the article to the very doors; canoes were heavily laden with it; streets and lanes, highways and byways, the river banks, and even the bush were littered with demijohns. The very soil of Abeokuta seemed composed of broken bottles; and at Afarjupa, forty miles inland, the seats in the church were empty gin-boxes. The traders at Bonny complain that cotton goods remain on the shelf, and the only demand is for rum and
gin, which is sold for four and even threepence per bottle. Such prices seem fabulously cheap, but they follow the same principle of cheapness: A gorilla from the Gaboon River dines on board a steamer, and to preserve the body it was placed in a cask of this trade rum; but when it was opened at Liverpool, the hair and skin were found burned off as by vitriol, and the flesh in a state of horrible putrefaction. And this is the kind of liquor sold to be drunk by the natives! In 1885 more than 10,000,000 gallons of such liquor was sent to Western Africa. Of this flood of ruin England furnished 311,384 gallons, Germany, 7,823,042, Netherland, 1,096,146, the United States 737,656, Portugal 91,525, and France, of alcohol, 405,944. Germany here enjoys a preeminence that is by no means to be envied. The motive for such intense activity in evil is found in the enormous profits of this trade, amounting in some cases to 700 per cent., and to those greedy for filthy lucre 700 per cent. profit is a tremendous motive.

These lists of figures are full of mourning, lamentation, and woe, for while among us some can use intoxicating drinks for a long period with rare self-control, it is not so with savage races. They seem to lack the power to resist, and give themselves up at once and without reserve to the destroyer. The one thing they seek is to get drunk, to feel the thrill of intoxication; and soon property, health, and life itself are engulfed in the abyss. The red men of our own land are sad examples of this tendency; and the bondage, the lack of money and the strong hand of the master in their own gains held back the black man from this swift decline, in Africa his tendencies are uncontrollable. Missionaries give some very sad glimpses of the work of ruin, but neither pen nor pencil can do it justice.

Rev. H. Waller, F.R.G.S., does not confine himself to vague generalities, but sets the concrete ruin before our eyes when he testifies to seeing hundreds of young women lying beastly drunk round the wagons of the rum-sellers. If there were women, there were also men, and he declares that there is an element of abominations, and if any think Mr. Waller's experience exceptional, that comfort is wrested away from us when Dr. Clarke uses precisely the same words concerning young women in South Africa, only where Mr. Waller saw and knew it, he expresses for a very pandemonium of abominations; and if any think this insufficient, there is for a people in such a vortex of destruction? It corroborates this testimony of two witnesses in different fields when Mr. Moir, of the African Lakes Trading Company, says: "I have seen boys and girls of fifteen years of age getting their wages in rum,"—and such rum as has already been described. Rev. H. G. Guinness describes it as "infamously bad gin, scarcely fit to make paint with.

It may be said this is the testimony of missionaries; yes, and in it they are unanimous. Christ-like love for men neither disqualifies to see nor to describe the truth; but we are not confined to missionary testimony. Sir Richard Burton states: "It is my sincere belief that if the slave trade were revived with all its horrors and Africa could get rid of the white man with his powder and rum, she would be a gainer by the exchange." This is strong testimony from one who had himself seen the state of things which he thus describes. Some of these rum-sellers, without intending it or perhaps even being aware of his damaging concessions, has framed a story that is altogether incredible. Mr. Cummings, a shipping merchant of Sierra Leone, tells thus his story: "The liquor traffic destroys body and soul. It is a greater evil than the slave trade. I am myself a large dealer in spirits. I have on the road now thousands of gallons of rum, and several thousand gallons of gin. I am able to sell it all, and no man is sensible to the evil this traffic does to these lands and to commerce itself. And I regret it much. They have become slaves to the white man's rum. Rum and gin is their incessant cry."

The Rev. J. Johnson, already quoted, styles this "a criminal trade," and calls upon his people to protest with all their might against this deadly traffic of Europe with Africa. Let the guilt of ruining our land for gain be the guilt of strangers only, if they persist in their un-Christian course, and all good people in Christian lands say Amen. Again he says: "There has been no peace in Africa for centuries, but this drink traffic makes it worse. Negroes have survived the evils of the slave trade, cruel as they were, but they cannot withstand the terrible evils of the drink. If they go on, the extinction of the negro is simply a question of time."

Maike, King of Napé, wrote thus to Bishop Crowther: "Liquor has ruined our country. It has made our people insane. I favor all trade, except in liquor. We implore Crowther, the great Christian minister, to beg the great Priests (the Church Missionary Society Committee) to beseech the Queen of England to keep liquor out of this land. Let him help us in this for God's sake. He must not let our country be destroyed."

This evil is not confined to Western Africa, nor is the native opposition to it limited to that region. The Sultan of Zanzibar has forbidden the traffic, but he has no power to control Europeans, who are the leaders in this wrong, and so his own people are becoming demoralized in spite of all his efforts.

The natives of the diamond-fields in South Africa implored the Cape parliament to have the saloons made in English names and placards, setting forth the excellence of their wares, and heard an Egyptian speaker denounce in a large meeting the foreigners who introduced the traffic into his country.

Rev. W. Allan conversed with some of the owners of two lines of steamships to Western Africa, and they not only did not deny his statements, but informed him that the whole of their cargoes which they took out from Hamburg and Rotterdam consisted of nothing but rum and gin. He had heard this on the coast, and now it was confirmed at headquarters. The Secretary of the Hamburg Chamber of Commerce, in reply to a letter from Rev. Mr. Lang of the Church Missionary Society, says: "Merchants here interested in the African trade are of the opinion that measures for limiting this traffic (in liquors) are injurious to the development of trade with those countries, and that the importation of liquors as carried on at present has no injurious effect upon
the natives." We can understand the first part of this, but how to reconcile the closing sentence with truth, in the light of the testimony of Mr. W. S. Caine, that the missionary activity common in the course of missions depends upon use of the three means of influencing men for the soul-winning effectiveness which alone can justify its presence among the apparatus of aggressive activity. Each of them would be one-sided and uncertain if exhibited by men who rejected Christ, did it not command all three of these means of missionary expression. The place, then, of the written word of truth, that is to say, of literature, in the apparatus of missions, is at the very foundation, as one of the three means of witness for Christ upon which the ensuring effectiveness of the whole enterprise depends.

With respect to importance a sharp distinction must be drawn between the Bible and its subsidiary literature. Yet with respect to place in evangelistic effort, all writings which help the understanding of God's love for man and man's need of his Savior, which bind together faith and practise, or which illuminate the steady onward march of the Kingdom, are means of expression. From these the missionary selects, according to the needs of the mission on which that will carry his message beyond the range of his voice and penetrate where he cannot go. This is true whether such writings are his own words or those of the Bible itself. A point to be regretted in the past and avoided in the future is that the church and some missionary societies have tended, because of the supreme importance of the Bible, to think the place of literature in the scheme of missions filled so soon as the Bible has been issued in the language of any field. Thus the provision of a full literary equipment for the missionary has often been lost to the independent action, for which apology has sometimes been offered, of a weary and overloaded missionary suddenly brought face to face with the fact that without such an equipment he is a cripple. Missionaries now know that on the field the Bible is the textbook, the lesson-paper, the exposition and comment and illustration are as inseparable from the Sacred Book as the candle which illumines its pages in thick darkness or the lens which brings its writings within the range of defective sight.

This explanation of the Bible and other Christian literature, as to place in the equipment of missions, appears clearly in the practise of the pioneers. Ziegenbalg, when making for the whole Church of Christ his tentative essays in the science of missions in South India, wrote home, in
1708, as one of his first discoveries, "Great progress in Christianity cannot be expected until the people possess the Word of God in their own tongue." So Ziegenbalg straightforwardly fell to work—upon translating the Bible? No; before he began his translation of the New Testament he prepared a Tamil primer and grammar and dictionary. This work did no further need to be revised, and the missionary had much ado to collect the money, part from merchants in India and part from European scientists who could appreciate such an addition to their apparatus for linguistic study. Henry Nott of Tahiti, plain and honest as the man himself, became the one mighty man in that first band of English missionaries to the South Seas, because he alone saw the place which literature must take at the very foundation of all stages of missionary success. His message reached a whole nation because it was written, and it began with a tract-primer. Dr. Elias Riggs of Turkey was preeminently a Bible translator. Yet among his earliest, as well as his most important, works were primers and catechisms and hymns. As late as thirty-five years ago missionaries in China unitedly pled for the general Christian literature to be allowed a place by the side of the Bible, urging the Bible Societies to permit colporteurs to distribute tracts and religious books as well as the Bible, and repeatedly begging that the Bible be printed with notes needed to open the Scriptures to the comprehension of the ignorant and non-Christian reader. It was no mere burst of rhetoric which led some of the missionaries in Turkey, on issuing a primer, to print on the cover as its appropriate title: Key to the Bible. To an uneducated and equipped for work, every missionary must have within reach a printing press which can issue those essential works which Bible Societies cannot provide.

To the preacher the importance of such literature appears as soon as he begins to preach. Men of dull minds have listened to the preacher's words, but drift away from the congregation with hardly one complete idea of what it is all about. If such a one can be overtaken by a tract which repeats and explains words but half understood, in many cases that tract becomes the pivot on which turns that man's future relation to the missionary. Moreover, many persons have become interested in the message and have taken up the reading of the Bible, a thousand questions are at once suggested to each one. Alone, the missionary would be unable to attend to new cases because of the multitude of these questions. He is himself multiplied, so to speak, if he has booklets to give to inquirers. The same situation exists in the work of the medical missionary. One of his greatest needs is an invention for multiplying his means of expression to the people, who before the distinction had been lie through long days in the hospital. Such an invention is found in the text-cards, leaflets and books, which speak while the overworked staff are attending to the bodily ailments of others. The same is true of the woman evangelist. A woman of whom she has no little book here, a tract there, a picture card in another place. The heathen who has had his curiosity excited by one of those little printed works becomes instantly but unwittingly a worker for Christ by showing it to some friend and ensuite holding with him its strange message of peace and good will. A Band in the street or the Sunday school receives a leaflet or an illustrated paper. He is certain to carry it to his parents and to explain it, as far as he can. With lip and printed sheet together the child becomes a messenger of the Cross to a fortress garrisoned by superstition against any direct approach of the missionary. In Uganda this office of literature in evangelization used to be fully understood with efficiency by all. But they rejected the invitation of the Gospel used to be: "No, I do not wish to become a reader." To read was to commit oneself to respect the message of the missionary. Hence, to be a "reader" used to be the earliest mark of a follower of Jesus Christ. It is said to have conveyed through written words they said, "Let me be as good as men, because they, too, can speak."

The fundamental importance of literature to the educational work of missions is particularly hard to be realized in lands where books seem to grow on trees, and the reading of the Bible has been a birthright. In Christian lands the chief task seems to be to teach children to read books. In non-Christian countries the task of the missionary is to teach the children to read and also to make the reading sheets and the primers and the school books. For there books for the young either do not exist or they are as much to be shunned and dreaded as the heathen practices which they incorporate.

Let us look beyond the region of school books, however. After the people have been taught to read, what are they going to read? Those who leave the schools in the early part of the course, where their work has been largely that of the memory, ought to have books which it is worth while to remember. Those who have stayed at school long enough to gain some training in the several branches of knowledge need to have books which contain facts. But on the mission field, if literature exists, it is saturated with superstition, vice and the foolish science of the Dark Ages. If it does not exist, to those who leave school at twelve or fourteen years of age the world is almost a blank so far as stimulus to further growth is concerned. Men in Christian lands rely upon the library to be high school, college and university to the half-educated part of the community and even to act as an auxiliary force for the mental, moral and spiritual nurture of the families of those educated. But on the mission field there are no libraries for the common people, and books that will foster development can come from mission presses only, until the growth of the Christian community shall have made native Christian publishers one of the leading industries.

Such a situation compels us at this point to face the question of the completeness of our plans for forwarding the enterprise of missions. Let us not belittle the great work that has been done for the production of books by the various societies directly or indirectly missionary in aim. The total number of missionary printing houses
found in strictly non-Christian lands is 122. These are distributed as follows:

The power for good of these printing establishments is incalculable. It is well, however, to note that while they do not fill the need, first, for lack of proper equipment, not more than thirty of them being on a scale that would entitle them to the name of printing house in civilized lands; second, because a number of them were opened in a period when the necessity for cooperation in such matters was not understood, and some of the best equipped offices crowd each other while populous regions are without means of publication; thus of the 22 mission presses in China 14 are concentrated in four provinces; of the 45 printing establishments in India seven are in the United Provinces, and the four presses in Madagascar are all in one city. In the third place, the inability of these 122 presses to meet the need of the non-Christian field is because of the vast number of different languages which have to be dealt with. Missionaries are at work in somewhat over 300 languages, and altho some of the missionary printing establishments are on a scale that permits printing in several languages, one cannot pretend that these can meet the needs of the vast field of the world.

As matters are at present, the lonely worker in the mission field, weighed down by the knowledge that multitudes are not reached by his voice, longing to use the press as a means by which a few can sway the thoughts of masses of men, is eating out his heart in helplessness because the necessary means of expression are grudgingly supplied. The case offers special justification for the proposal of a witty friend of missions for the formation of a Society for the Prevention of Cruelty to Missionaries.

Some desirable things which ought to be done to improve the literary department of the missionary enterprise are: (1) For missionary societies to select and set apart qualified missionaries, men and women, for literary work. (2) To increase the number and especially to improve the quality of the periodicals published in native languages by missionaries on the fields. These periodicals have considerable influence in non-Christian lands. There are now about three hundred such periodical publications, varying in importance from the Sunday school lesson-paper, and the children's illustrated paper, to the family weekly newspaper and the monthly magazine. Improvement in the quality of these periodicals is of very great importance for the increase of their influence. (3) Plans should be made in a large way for the development of a permanent Christian kingdom in non-Christian lands. For this purpose discussion of the needs and the possibilities of the literary department should be a permanent feature in the programs of interdenominational conferences of missionary societies or of missionaries. Much can be accomplished by a wise cooperation between existing presses.

The task of providing books for masses of people is not so stupendous as it appears, since one powerful and good book in a land where a living literature does not exist is equal in point of influence to a hundred good books in the lands where each competes with multitudes of others for a hearing. The most sanguine optimist cannot, however, claim that provision has been made enabling mission presses to publish works for the nurture of communities already evangelized and seeking growth. The expenditure of great sums for the maintenance of schools and colleges is an accepted feature of the scheme of missions. But many a missionary revolts against teaching people to read when he must drop them, as they leave the school house door, into the morasses of doubt and corruption gladly made ready for them by non-Christian and anti-Christian writers.

Another unsupplied need which springs to light in this connection is the need to train and bring forward native writers to be the spokesmen of the native Christian element in each nation. Such writers cannot be developed in non-Christian lands until the missions have funds for encouraging their efforts and fostering the creation of an indigenous Christian literature. Until the missions receive a mandate from the homeland to engage seriously in literary work in non-Christian lands, Christendom will look in vain for Eastern champions to take the field as successors of the apostles. In the days of the missionary enterprise Christendom, and Christendom was the arrogance of unsalisifiable might. Before the end of the century the sceptre of world-sovereignty passed to Christendom, and now every non-Christian ruler throughout the world is dependent upon the tolerance of Christian nations for the privilege of maintaining a semblance of power. To the Christian there is solemn meaning in this change of the centers of domination. But this change has not been used by the Almighty to bring the educated Hindu and Chinese and Japanese and Turk and Persian under compulsion to examine its causes? Never before have missionaries in those lands stood upon the vantage ground of rank as repre-
sentatives of the world's progress. If they are
given means to publish, then by virtue of intellec-
tual and moral superiority they can hold that
position of influence while they clearly set forth
the causes which have lifted Christian peoples
to supremacy. If supplied with funds in time,
missionaries in all these lands can take leadership
in the approaching revival of literature, injecting
into the thought of many lands a strong Christian
element with all that this means of gain to the
people in justness of vision and elevation of
national ideals. At such a time, as Edwin
Greaves of Benares has said, "what we need is not
writers of Christian books, but Christian writers
of books."

It is true that as at present supported the
missionary societies cannot assume the expense
of book publication to the extent demanded by
the requirements of the growing opportunity
during years which must elapse before the people
of the various fields can fully sustain the Chris-
tian publishing enterprise. But some solution of
the problem of providing literature essential to
the full success of missionary effort should be
diligently and strenuously sought by all bodies
to which belong the discussion and improvement
of missionary methods. Some steps should be
taken of concerted accord, also, to bring before the
almoners of great wealth at home the fact that
in non-Christian lands books do not grow, but
for some time to come must be painfully provided
by the beneficence of those who appreciate their
permanent and penetrating and vitalizing power.

LITITZ: A mission station in the S. part
of the island of Jamaica, West Indies, situated
southwest 10 miles N. W. of New Broughton.
Station of the Moravian Mission Society (1839),
with (1900) 1 missionary and his wife, 41 native
workers, 1 outstation, 2 places of worship, 2
Sunday schools, 2 day schools, and 602 pro-
fessed Christians.

LITTLE-POPO: A village of Togoland, Africa,
situated E. of Porto Seguro. It has a
strong Roman Catholic mission. Station of the
WMS, with (1903) 1 missionary, 14 native work-
ers, 11 outstations, 11 places of worship, 7 Sun-
day schools, 6 day schools, and 367 professed
Christians, of whom 235 are communicants.
The German official name is Klein Poopo.

LIU-HO-HSIEN: A town in the W. part
of the province of Kiang-su, China, situated about
20 miles N. of Nan-king. Station of the AFFM
(1898), with (1901) 1 missionary and his wife, 1
woman missionary, 4 native workers, and 1 Sun-
day school. Name is sometimes written Luh-
hsien.

LIU-NGAN-CHAU: A town in the province of
Ngan-hwei, China, situated 48 miles W. of
Lu-chau. Station of the CIM (1890), with (1903)
1 missionary and his wife. The name is some-
times written Luh-ghan.

LIVERPOOL (Africa). See Lukolela.

LIVINGSTONE, David: Born in Blantyre,
Scotland, March 19, 1813. Died May 1, 1873.
His parents were religious, and he was early
impressed with the noble life of Jesus spent in
healing the body and instructing the ignorant.
At ten, part of his first week's wages as "piecer
boy" at a loom bought a Latin grammar. His
evening hours, often from 8 o'clock till midnight,
were spent in the study of Latin, Greek, botany,
and geology. At nineteen he resolved to be a
medical missionary. By "plain living" and
"high thinking," working as a spinner in the
summer and studying in Glasgow in the winter,
meanwhile "picking up as much of carpentry and
other useful trades as possible," he prepared
himself for his future life. After his acceptance as a
missionary by the LMS in 1838, he studied the-
ology, medicine, and science for two years in
London, and in 1840 was honored by the
College of Physicians and Surgeons in Glasgow, sailed
December 8, 1840, for Cape Town; thence pro-
ceeded to Kuruman, the station of Moffat and
Hamilton. For two years he traversed the
Bechuana country, visiting the Bakwanes and
other tribes in 1843, and settled, with success for
a mission station. Here a lion crushed his arm,
and nearly put an end to his life. A fearful
drought compelled Livingstone to seek a more
favored region, and the whole tribe followed him
to Kolobeng. While there he visited the Boers.
They regarded with hostility any visits of
men the natives, whom they looked upon as
"black property," and resisted every attempt to
found a mission near their settlements. The
river at Kolobeng, which had yielded him water
for irrigation, gradually failed, and in the fourth
year disappeared. Livingstone had heard of
"a great lake," surrounded by a manly tribe,
ruled by Sebituane, a powerful chief, friendly to
strangers. There he hoped to find a place for
future labors. Accompanied by Oswell and
Murray, English travelers, he left Kolobeng,
May 31, 1854, at St. Paul de Loanda, capital of
Angola, on the west coast.

In great physical prostration and mental
depression by disease, hunger and care, he was
kindly received by the British Commissioner.
The Portuguese merchants and officials were
most hospitable and courteous. From this place
he sent his astronomical observations to Maclear,
royal astronomer at the Cape, and an account of
his journey to the Royal Geographical Society
of England, which awarded him its highest honor,
the gold medal. Maclear, speaking of the num-
ber and accuracy of his astronomical and geo-

graphical observations, says: “You could go to any point across the entire continent, along Livingstone’s track, and feel certain of your position.”

Livingstone began his journey across the continent of Africa. In November, 1855, he discovered the famous Victoria Falls of the Zambesi. He arrived March 2, 1856, in an emaciated condition, at Tete, the most western outpost of the Portuguese East African colony. He reached Quelimane and the Indian Ocean, May 20, four years from the last departure from Cape Town, having traversed the continent from ocean to ocean and traveled on foot over 11,000 miles. He then embarked for England, December 12, 1856. He was received with great honor by the London Missionary Society, the Royal Geographical Society, the universities of Cambridge and Oxford, and by all classes of society. At Glasgow, Edinburgh, Dublin, Oxford and Cambridge his addresses were heard with great interest by learned and unlearned, old and young. While at home he published his Missionary Travels and Researches in South Africa. In his travels the atrocities of the internal slave-traffic had so revealed themselves to him, and the obstacles it presented to mission-work in Central Africa had so impressed him, that he was upon one occasion welcomed as “the uppermost idea in his mind.” Hitherto his explorations had aimed solely at opening fields for mission work; thenceforth they sought to open up the country to legitimate and productive commerce as a means of superseding the destructive and inhuman traffic in the blood of its natives. His motive appears in these words: “The opening of the new central country is a matter for congratulation only so far as it opens up a prospect for the elevation of the inhabitants. I view the geographical exploration as the beginning of the mission enterprise. I include in the latter term everything in the way of effort for the amelioration of our race.”

Having severed his connection with the LMS, he returned in 1858, appointed British consul for Eastern Africa and the districts of the interior, and to the completion of his expedition for exploring Eastern and Central Africa. He was accompanied by his brother Charles, Dr. John Kirk, and others. At Cape Town he was accorded a reception by the people and authorities of the Colony, the Governor presenting him with 800 guineas in a silver casket, as a testimonial to the value of his services. Most of the expenses were met by the party in exploring the Shire River and making the discovery of Lake Shirwa, April 18, and Lake Nyasa, September 16, 1859. Around the latter the missionary found the slave-trade rampant, “desolating the country and paralyzing all effort.” Returning to Tete in 1860, he fulfilled his pledge made three years before to his Makololo friends by taking them to their homes at Linyanti. In 1861, accompanied by his brother and Dr. Kirk, he made another trip to Lake Nyasa, and remained, exploring for several weeks. His wife, whom he had married only three months before, died April 27, 1862, at Shapungu, on the Zambesi.

The Universities’ Mission to Central Africa, proposed by Livingstone in 1857, was established in 1859. Archdeacon MacKenzie of Natal consecrated bishop for the mission in 1861, and the mission was settled at Bangueolo. In July, 1862, the bishop died from exposure and fatigue.

In the new iron steamer, the “Lady Nyasa,” the explorers steamed up the Shire; but before it could be carried over the cataracts his brother and Dr. Kirk were obliged to return. He then resolved to continue the explorations alone. An order from home recalling the expedition, he set sail for Zanzibar in 1864 in the “Lady Nyasa.” Needing funds and desiring to sell the vessel built with the avails of his book, he embarked with his wife on a trip to Egypt and Europe, himself navigating her to Bombay, which he reached after an adventurous voyage of a month. Thence he embarked for England. He published The Zambesi and Its Tributaries. When urged by Sir Roderick Murchison to relinquish the missionary work and attend only to discovery, he wrote: “I would not consent to go simply as a geographer, but as a missionary, and to do geography by the way.” In this spirit he accepted the commission of the Geographical Society to ascertain “the watershed of South Central Africa,” to “determine whether the ultimate sources of the Nile” were “among the hills or lakes” south of the point where Speke and Grant saw that river flowing from the Victoria Nyanza, and also to “settle the relation of the Nyasa with the Tanganyika.” He had also the appointment of British consul in Central Africa, but without pay. From Zanzibar he reached the continent March 24, proceeded up the Rovuma River as far as he could, and August 8 reached Lake Nyasa, a well-watered, fertile region, but largely depopulated by slave-hunters, the tokens of whose barbarities lay all along their march. Thence, baffled by inundations, hostile slave-dealers, treacherous attendants, want of supplies, and severe sickness, he proceeded northward toward Tanganyika, which he sighted April, 1867. Two of the men who deserted took with them his medicine-chest, and he was without means to control the attacks of fever and dysentery which prostrated him. When sufficiently recovered he passed westward, and in November discovered Lake Mero, and July 28, 1868, Lake Bangueolo, or Bemba, 150 miles long, 75 wide. “Constant reticulations,” wrote Livingstone, “intensified in the first time in nearly thirty years he was carried on the march.” Returning to the Tanganyika, he reached Ujiji March, 1869. On July 12 he started westward, and September 21 reached Banbarré, a town in Manyema. He struggled forward, accompanied by three faithfuls, Sus, Chuma, and Gardner, but was driven back to Banbarré by sickness. Disabled for three months by ulcers on the feet, and further delayed by the treachery of natives sent from Zanzibar with supplies, and by slave-hunters, it was only by indomitable persistence that he reached the town of Nyangwe, an Arab settlement, the western limit of his explorations of the Luapula. He had now traced the great river which, rising as the Chambeze in the uplands between Nyasa and Tanganyika, traverses a chain of lakes, issuing successively from Bangueolo as the Luapula, from Mero as the Luwvu, from Kamolondo as the Luabala, and had also suggested what later investigations proved true, that it enters the Atlantic Ocean as the Congo. He had ascertained also that the Tanganyika does not belong to the same drainage system as the Nyasa.
Nyangwe, "a ruckle of bones," as he said, to Ujiji, 600 miles, which he reached October 23, only to find that the rascal who had charge of his stores had stolen and used them all. While Livingstone was making this journey under compulsion to Ujiji from the western extremity of his explorations, a man named Stansfield, his trusted correspondent of the New York Herald, sent from America by Mr. James Gordon Bennett to find and relieve him, was urging his way from the east coast in search of him, and reached Ujiji five days later than Livingstone. Not in vain he explored the missionary in his extreme perils. "I commit myself to the Almighty Dispenser of events." He and Stanley together visited the north end of the lake, and settled in the negative the long disputed question whether the Tangan- yika was connected with either the Victoria Nyanza or the Albert Nyanza. At the end of the year 1871 they journeyed together to Unyam- yebe, where Stanley had left stores brought for Livingstone. Here they party March 15, 1872, Stanley bearing with him the precious journal of six years, which "contained a wealth of information about countries and peoples hitherto unknown to science," and the unexplored districts with renewed health and spirits, ready to pursue his work on the arrival of reliable men from Stanley. He started, August 25, 1872, to make another exploration of the Chambwe system. To Mr. Moffat he writes: "I set out on this journey with a strong presentiment that I shall never finish it." He was most of the time wading through "sponges" and wet with torrents of rain. Dysentery in aggravated form renewed its exhausting attacks, and his constitution could no longer withstand it. He had to be carried in a litter, by turns suffering excruciating pain and for hours insensible or fainting from loss of blood. Still he would at times ask regarding distant hills, or of the rivers crossed, whence they came and whether they flowed. Approaching Itala, on the south shore of Lake Bangweulu, men were sent in advance to build a hut for him, and he was laid upon his bed of sticks and grass. Next morning Chief Chitambo called, but he was too ill to talk. At about 1 A.M., May 1, he asked Susi for his medicine-chest. Selecting the calomel and asking for water, he added: "All right, you may go out now." Before dawn the boy who slept within the hut to be ready at his call, found him kneeling by the bed, his head buried in his hands upon the pillow. The spirit had departed. His faithful men, after embalming the body as well as they could, wrapped it in calico and barked, and carried it, with all his papers, instruments, etc., a year's journey, to Zaneshia. On April 15, 1874, accompanied by Susi and Chuma, it arrived in England, and was deposited in Westminster Abbey, the arm which had been crushed by the lion being a means of his identification. His journals kept during these last seven years' explorations were published in 1874 under the title of The Last Journals of David Livingstone in Central Africa. (2 vols.)

LIVINGSTONIA: A settlement in Nyassaland, British Central Africa. Station of the UFS (1875), with (1903) 12 missionaries, 3 with their wives; 3 women missionaries, 32 native workers, 1 chapel, and 87 professed Christians. The station was originally opened at the S. end of the Lake, was abandoned in 1883 for Bandawe on the W. shore, and later removed to Kondow, nearly 100 miles N. of Bandawe.

LOANZA: A settlement on the W. shore of Lake Mweri, in the southern part of Congo Free State, Africa. Station of the PB (1900), with 2 missionaries and 2 native women. The name is sometimes written Luanza.

LOBETHAL: A settlement in Kamerun, Africa, situated about 20 miles W. S. W. of Edea Falls. Station of the Basel Mission Society (1892), with (1903) 3 missionaries, 1 with his wife; 17 native workers, 21 outstations, 21 day schools, 1 boarding school and 962 professed Christians, of whom 824 are communicants.

LOEWENTHAL, Isidor: Born in Posen, Prussia, Poland, 1859, of Jewish parents; died at Peshawur in 1884. At an early age he showed great aptitude for language and philology. In 1851 he became a Christian, and in 1852 entered the Theological Seminary at Princeton, taking high rank in philology and writing important articles for the Biblical Repertory. He was tutor in Princeton College in 1855; ordained by the Presbytery of New York as an evangelist, and sailed in 1856 as a missionary of the Presbyterian Board for Northern India. He acquired a knowledge of Persian, Arabic, Kashmiri, Hindustani, and the Pushto, the language of the Afghans. He could speak Persian fluently. He completed a translation of the New Testament into the Pushto, which is now in circulation among the Afghans. He was shot one evening in 1864 in his own garden by his watchman, a Sikh, who alleged that he mistook Dr. Loewenthal for a robber. He had nearly completed a dictionary of the Pushto language, and left a collection of Pushto works in manuscript.

LOFTCHA: A town in Bulgaria, 20 miles south of Plevna, 80 miles northeast of Sofia. Climate, foggy, damp. Population, 7,020. Station of the ME (1857), with (1900) 4 women missionaries, 19 native workers, 3 outstations, 4 chapels, 6 Sunday schools, 1 boarding school, and 189 professed Christians, of whom 60 are communicants.

LOHARA: A village in the Central Provinces of India, situated near the E. border of Rewa, and about 65 miles N. by W. of Bilaspur. It is a mission station of the PB (1900), with 3 missionaries, 2 with their wives; 1 woman missionary, 2 native workers, 1 Sunday school, 1 industrial school, and 1 orphanage.

LOHARDAGA: A town in the Chota Nagpur district of Bengal, India, situated 155 miles S. by W. of Patna. Population, 7,100. Station of the Gossner Mission Society, with (1903) 2 missionaries, 1 with his wife; 55 native workers, 27 places of worship, 19 Sunday schools, and 4,137 professed Christians, of whom 2,029 are communicants. There is also a leper asylum, a home for incurables, 1 orphanage, and 1 dispensary. The Mission to Lepers in India has 1 chapel and 1 home for untainted children of lepers. The name is also written Lohardugga.
LOIKAW: A village in Burma, British India, situated about 100 miles N. E. of Taung-nu. The people are Kares. Station of the ABMU (1899), with (1903) 2 missionaries and their wives, 26 native workers, 19 outstations, 20 day schools, 14 day schools, 1 boarding school, 1 dispensary and 3,465 professed Christians, of whom 132 are communicants.

LOKOJA: A town in the district of Gando, Nigeria, W. Africa, situated on the right bank of the Niger, above the confluence with the Benue. It was occupied by the British in 1865, and a strong force of troops is kept there now. The climate is fairly healthful, but at the mouth of the Niger. The CMS has a mission station there (1865), with (1903) 2 missionaries, 1 with his wife; 2 native workers, 1 outstation, 1 chapel, 1 day school, and 179 professed Christians, of whom 27 are communicants.

LO-KONG: A village in the highlands of the Konya and his wife-ung, China, situated near Hsin-ning-hsien. Station of the Basel Mission (1901), with (1903) 2 missionaries, 7 native workers, 2 day schools, and 287 professed Christians.

LOLORDOF: A village in the Ngumba district of the Kamerun, Africa, and German official limit about 80 miles south of E. of Great Batanga. It is on the Government road to the interior and is a station of the PN (1897), with 2 missionaries and their wives, 1 place of worship, 1 boarding school, and 1 dispensary.

LOLOMBOLI: A settlement about 5 miles from Strombu, on the S. W. coast of the island of Nias, Dutch E. Indies. Station of the Rhenish Missionaries, with (1903) 1 missionary, 2 natives, 1 outstation, 1 Sunday school, 2 day schools, and 584 professed Christians, of whom 366 are communicants.

LOLOWUA: A settlement in the center of the Island of Nias, Dutch E. Indies. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 6 native workers, 1 outstation, 1 Sunday school, 2 day schools, and 584 professed Christians, of whom 366 are communicants.

LOMAS DE ZAMORA: A town in Argentina, South America, situated near Buenos Aires. Station of the ME, with 2 missionaries and their wives, 2 native workers, 2 chapels, 2 Sunday schools, and 260 professed Christians, of whom 66 are communicants.

Lombo: An island of the Dutch East Indies, lying between Bali and Sumbawa, to the eastward of Java. Its inhabitants are Malays and Mohammedans, and no regular missionary work is now carried on among them.

Lome: A village on the coast of Togoland, Africa, situated near the W. frontier of the colony. Station of the North German Mission Society (1896), with (1903) 2 missionaries, 1 with his wife; 8 native workers, 2 outstations, 4 day schools, 1 kindergarten, and 216 professed Christians, of whom 104 are communicants.

Lonnard: A village in the Poona District of Bombay, India, situated about 40 miles S. E. of Poona. Station of the Poona and Indian Village Mission, with (1901) 2 missionaries, 1 day school, 1 Sunday school, 1 theological class, and 1 dispensary.

LonDe: A village in the Congo Free State, N. E. from Matadi; station of the Swedish Mission Society (1892), with 2 missionaries, 1 with his wife; 2 native workers, 2 outstations, 1 place of worship, 1 Sunday school, 1 boarding school, 1 temperance society, 1 printing press, 1 dispensary, and 64 professed Christians.

LONDON MISSIONARY SOCIETY (1795): During the latter part of the 18th century the Revs. H. and G. Whitefield and others brought to the Christian Church a realization of its large responsibilities, and some people dropped their watchword of "England for Christ" for the larger one of "the world for Christ," and thus the great modern missionary movement had its genesis. An additional impetus was given by Carey's Essay in 1792, and his sermon on attempting and expecting great things from God, which led to the formation of the Baptist Missionary Society. These were fruit beyond the bounds of his own denomination, and associations of the Independent churches began to consider the question of missionary duty. Ministers belonging to several denominations united in 1793 in founding The Evangelical Magazine, for the purpose of arousing the Christian public from its prevailing torpor, and exciting a more clear and serious consideration of its duties and means for advancing the Redeemer's kingdom. The principal editor of the new publication was an Episcopal clergyman, the Rev. John Eyre, of Homerton; the Rev. Matthew Wilks, famous as the minister of Whitefield's Tabernacle, was also connected with the movement, and both men were afterward prominent in founding the Missionary Society.

Another clergyman of the Establishment whose writings aroused interest in missions was the Rev. Melville Horne, at one time chaplain to the colony of Sierra Leone, a quality which gave practical weight to his words. His views on what ought to be done found instant response in Dr. Hawkes' declaration that "only by a general union of all denominations can a broad basis be laid for missions." Dr. Hawkes caused an offer of £500 to be inserted in the Evangelical Magazine for the equipment of the first missionaries. The Rev. Dr. John Cockburn, of Holywood, pointed out through the same publication that the Independents alone were doing nothing in the line of foreign missions, and urged not only the equipment of missionaries, but also their appropriate mental and spiritual training in a seminary established for this distinct purpose. The result of this appeal was a meeting held November 4, 1794, at Baker's Tavern. The ministers who attended it were of various connections and denominations, but "glowing and harmonious" in their missionary zeal. These ministers sent out, in January, 1796, a circular to various persons in which it was proposed that a meeting should be held in London the ensuing summer for the purpose of organizing a missionary society. On the 15th of January a number of ministers convened in the city of London, and appointed a committee to ascertain the sentiments of ministers throughout the country in regard to the great plan under consideration. Accordingly, a circular letter addressed to ministers was drawn up acquainting them with the plan and object of the proposed Society; they were requested to make the matter known to their congregations and to send delegates to the convention, which was appointed for the 22d, 23d, and 24th days of September. On the evening preceding the meeting a con-
sultation of ministers was held. Interesting letters from ministers and “private Christians” were read, and an address delivered by the Rev. Dr. Haweis of Aldwinkle. Dr. Rowland Hill closed the meeting with prayer, and the assembly broke up with feelings of delight, “which the highest gratification of sensuality, avarice, ambition, or party zeal could never have inspired.”

The following day, September 21, a large congregation assembled at Spa Fields Chapel. Dr. Haweis preached an animating sermon from Mark xvi: 15, 16, and after the meeting a large number of ministers and laymen adjourned to the “Chapel of the Beloved.” Aldersgate Missionists also formed “The Missionary Society.” In the evening a sermon was preached by the Rev. G. Burder, and on the three following days successive meetings were held in different parts of the city. The cause of missions was pleaded with solemnity and earnestness, and the Christian world seemed to awake as from a dream, wondering that it could have slept so long while the heathen were waiting for the Gospel of Jesus Christ.

For the first time Christians of all denominations, forgetting their party prejudices and partialities, assembled at the same place, sang the same hymns, united in the same prayers, and felt themselves one in Christ. This unanimity of spirit, which time has only served to strengthen, is found embodied in the constitution of the Society, which has remained unchanged.

Constitution and Organization: “The Missionary Society” was largely assisted, in its early years, by Presbyterians and Episcopalians, but is now supported mainly by the Independent or Congregationalists, the other denominations directing their gifts in large measure to the societies since formed in their own communions. But the fundamental principle of the Society remains the same as at the outset, namely: “That its design is not to send Presbyterianism, Independency, Episcopal, or any other form of church order and government (about which there may be difference of opinion among serious persons), but the glorious Gospel of the blessed God, to the heathen, and that it shall be left (as it ought to be left) to the minds of the persons whom God may call into the fellowship of His Son from among them, to assume for themselves such form of church order for them as shall appear most agreeable to the Word of God.”

The sole object of the Society is to spread the knowledge of Christ among heathen and other unenlightened nations.

The condition of membership in the Society is an annual payment of one guinea.

A general meeting of members is held annually in London during the month of May, for the purpose of appointing a treasurer, secretaries, and directors; to receive reports and to audit accounts; and to deliberate on any measures which may promote the object of the Society. All matters proposed are determined by a majority vote of the members present.

The management of the Society is in the hands of a Board of Directors, annually chosen out of the members of the Society, not more than one-third of whom reside in the metropolis. The directors are employed to collect and receive all moneys contributed to the Society, and to expend the same in its behalf; to select and manage mission stations; to appoint, send forth, and fittingly maintain missionaries; to make, alter, and amend by-laws for the general conduct of business, and otherwise to carry out in a suitable manner the object of the Society.

The directors appoint the salaries of the secretaries, but themselves transact the business of the Society without emolument.

For greater facility and expedition in the conduct of business the directors are empowered to divide into committees, but no proceedings of committees are valid until ratified by the board.

It is interesting to note that the experience gained by this Society in bringing into existence and successfully carrying on an undenominational organization for missionary work led to the foundation of the Religious Tract Society, and the British and Foreign Bible Society. As the years passed many local missionary societies were formed in different cities, and their existence made it necessary that this “Missionary Society” have a more definite name. It soon, therefore, became known as the London Missionary Society.

The constituency of the Society being largely Congregational, the plan was adopted in 1889 of electing the majority of the directors from that denomination. In 1891 two crowded and earnest meetings five committees to consider the financial situation, with reference to deficiency of means and consequently of men. The directors decided to go forward, enlarge the existing missions, and attempt to add one hundred new missionaries to the working staff before the LMS centenary in 1895. An appeal for men and money was sent out, and the response was instantaneous, and a forward movement began by which the debt was paid, the work and workers increased, and a large balance remained in the treasury. Nevertheless, in 1894 the Society again faced a crisis and a large deficit. The centenary fund was now opened, and somewhat relieved the situation; nevertheless, the directors felt it necessary to issue a statement declining further offers of service until the finances improved.

The centennial of the Society was celebrated by a meeting in the Mansion House, on November 3, 1894, and on January 15, 1895, the meeting at the Castle and Falcon Inn was also commemorated. Both gatherings were attended by large and most enthusiastic audiences.

In 1902 the directors summoned a large and representative five committees to consider the financial situation, which had again become grave in view of the increasing pressure from the field for expansion. This committee, after carefully discussing the situation, decided that it is not desirable that any policy of withdrawal should be seriously contemplated. At the same time, recognizing that the Society had got so far in advance of its supporters that its position was critical, the directors resolved that “the Board give to the constituency of the Society the assurance that during the next five years they will not increase the average expenditure of 1901-2, unless additional contributions are provided, and then only to the extent of such additional contributions.”

Development of Foreign Work: Soon after the formation of the Society, its members were called upon to decide in what countries its work should begin. Like Carey, Dr. Haweis had become much interested in the South Sea Islanders from Captain Cook’s “Narrative of his Voyages in the Pacific Ocean,” and in an address delivered at Surrey Chapel drew such a picture of these “dark places of the earth” that intense
interest was excited, and the directors decided to establish a mission at Tahiti.

At the same time attention was especially called to Africa, where the Baptist Missionary Society had during the previous year made a steady advance westward. The London Missionary Society joined with the Glasgow and Scottish Missionary societies in 1796 in sending an expedition to Sierra Leone. This, however, not proving a success, and the recent conquest of Cape Colony directing public notice to South Africa, December 1796, Dr. Mackenzie left Cape Town, and his associates set sail for Cape Town. In 1798 a mission was sent to Calcutta, where he was not allowed to stay, and there was no definite mission established in India until 1804, when Messrs. Ringeltaube, Crane and Des Granges were stationed at Vizagapatam and Trivancore, and Mr. Voss at Colombo, Ceylon. It was not until 1816 that the North India Mission was definitely inaugurated. In 1800 the Rev. William Moseley, an Independent minister at Long Buckby, Northamptonshire, published a volume on the Importance and Practicalities of Translating and Publishing the Holy Scriptures in the Chinese Language.

He had discovered in the British Museum a manuscript containing a Harmony of the Four Gospels, the Acts of the Apostles, the Epistles of Paul, and the first chapter of the Hebrews in Chinese. It was a folio volume, and was lettered by mistake "Evangelica Quatuor Sinicæ." On a blank leaf, at the beginning of the volume, is the following note: "This transcript was made at Canton in 1737 and 1738, by order of Mr. Hodgson, who says it has been collated with care and found very correct. Given by him to Sir Hans Sloane, Bart., in 1739." It was this Memoir by Mr. Moseley which first turned the attention of the friends of missions to China, and in 1804 the Rev. Robert Morrison was engaged by the LMS to study the Chinese language. In January, 1807, he sailed from England for Canton, with a particular view to the translation of the Holy Scriptures into Chinese, inauguring thus the work of Protestant missions in China proper.

At the same time (1807) an urgent call from a Wapping Missionary gave the impulse for the founding of a mission in British Guiana, which afterward extended to Jamaica. Then followed the mission to Mauritius (1814) consequent on the occupation of that island by the British Government; and in 1818 was commenced in Madagascar a work that has been one of the marvels of the Christian church.

The Levant was not without its interest for England, and in 1816 a missionary of the LMS was stationed at Malta with a view to work in Greece. A few years later the Ionian Islands were occupied. This effort, however, was not continued, and the missionaries entered other departments of labor, one of them becoming an efficient agent of the British and Foreign Bible Society.

1818 saw the commencement of a mission to Siberia and Tartary, afterward closed by Russian edict in 1840, and of one to Malacca and the Dutch East Indies, since given over to the Netherlands Society.

Then followed a long period during which existing work was strengthened. The first new mission was the realization of an old dream when in 1869 the mission to Mongolia was established to reach Tartary from the east. In 1879 the LMS responded again to the call from the Dark Continent, and established a mission in Central Africa, taking as its district Lake Tanganyika. This closed the long story of effort with which the Society fixed at Tavoua. A point was now reached that if possible no nation should remain without the Gospel. The fields upon which the Society has concentrated effort are in Polynesia and the South Pacific, India, Africa, China, and Madagascar.

The Missions: 1. *Polynesia* (1796): A. Tahiti. *Samoa, etc.*: The Society purchased the full-rigged ship "Duff," of a little less than 300 tons burden, to convey its first expedition to the South Seas. Great public interest was felt in the enterprise, and important contributions of stores, furnishings and equipment were sent in by merchants and others, with high officials of government showing in many ways their good will. Captain James Wilson, a man bred to the sea and matured by hardship and by dangers of battle in America and the East Indies, offered his services gratuitously to command the ship. On the morning of August 10, 1796, the "Duff" hoisted the mission flag—three white doves with olive branches on a purple field—and sailed from London, having a crew of twenty men, and carrying a mission band of four ministers, one surgeon, and twenty-five artisans. The voyage proved prosperous, and after 208 days the "Duff" anchored safely in Matavai Bay, Tahiti. The missionaries were welcomed and protected by the notoriously savage and barbarous king, Pomare, and his wife, Ida, who never withdrew their friendly aid. A large bamboo house was placed at their disposal, and seventeen out of the thirty missionaries were soon settled in this dwelling. Everything seemed to favor them, yet one may well imagine the solemnity of the moment when they realized their position of isolation as the "Duff" sailed away to the Friendly, or Tonga, Islands.

The "Duff" arrived at the so-called Friendly Islands, twelve hundred miles west of Tahiti, in April, 1797, where nine unmarried missionaries were landed. Captain Wilson then took one missionary to Santa Christina, one of the Marqueses Islands, and after leaving him there revisited Tahiti, and sailed for England by way of China.

The story of the missionaries thus left at Tongatapu is of two and a half years of horror. The island was overrun by released convicts from Australia, who incited the savages to attack the missionaries and steal their property. One of the laymen belonging to the mission deserted his comrades and joined the natives. War breaking out among the islanders, one band chased five of the missionaries, and on capturing them stripped them of all their property, even to the clothing which they had on. Another band of savages attacked the other three missionaries and dashed out their brains. The five survivors buried the bodies of the three martyrs and contrived to live, tho in unspeakable wretchedness, until they attracted the attention of a passing vessel and were rescued. The "Duff" arrived at Tongatapu, and ended the first mission to the Friendly Islands.

The missionary who single-handed had under-
taken the establishment of a mission at Santa Christina was more kindly treated; but by a curious accident he was carried away from the island in an American vessel to which he had gone for water. This vessel was driven to sea by a gale. The Americans landed him on another island of the group. But after working there some months, he took an opportunity of returning to England to plead with the Society to give him associates in the work.

Meanwhile, a scheme had been made to strengthen the Polynesian Mission by sending out the “Duff” a second time, in December, 1798, with thirty more missionaries. But the ship was captured by a French frigate off the coast of South America and taken with all her belongings as a lawful prize of war. The missionaries after being carried about the ocean for some weeks were finally put ashore at Lisbon.

The party of missionaries landed at Tahiti at the first seemed to have promise of great prosperity. Two Swedish sailors, long resident in Tahiti, acted as their interpreters and helped them learn the language. They were won to favor the mission by the skill of the artisans. The missionaries encountered their first serious trouble when a merchant ship came to the island and several of her crew deserted. The missionaries tried to secure the runaways, but natives interfered to prevent this and knocked the missionaries about pretty roughly. The affair was not serious, but eleven of the missionaries, panic-stricken, fled to Australia; only one of them with his wife (Mr. and Mrs. Henry) afterward returning. Of the little group of seven men and one woman (Mrs. Eyre) who remained at Tahiti, one fell away and left the work, another lost his health and went back to England, and a third separated himself from his associates, married a native wife, and was murdered not long afterward. Including the two who returned from the flight to Australia, but five men and two women now remained of the band of missionaries landed by the “Duff” at Tahiti in 1797. They were reenforced in 1801 by the arrival of nine new missionaries, and a more hopeful spirit prevailed, especially as Henry Nott and Mr. Jefferson had now arrived. But the language was still knotty, and little more could be done in it, and, having reduced the language to writing, began making books, from which the children were taught to read. But the spirit of war seems to have possessed the whole world. Piracy made the long voyage from England uncertain and dangerous, and five years passed before either stores or letters reached the missionaries from England. Meanwhile their clothes dropped to pieces; their shoes wore out and they were left barefoot; their tea, sugar, and other household comforts were exhausted. They seemed to be abandoned by God; they were left without clothes, as well as by the Society which sent them out.

Some things, however, had been accomplished. It was a great thing to have acquired the language and to have reduced it to writing. But they had not won a single soul to acceptance of the Gospel, and they were in constant difficulties through wars between different parties of natives. King Pomare protected them as best he could, and so did his son (also called Pomare), after the death of the old king. But what made the mission’s young king their friend was interest in the ability to write his language. He was anxious to learn to write, but did not care to hear the Gospel. His power, moreover, was not supreme, and in 1808 he notified the missionaries that they were no longer safe under his protection. All but four single men of the missionary band now fled from Tahiti to Australia, and in the next year the rebel Pomare, with the help of Nott and Hayward, chose to remain, and took refuge in the islands of Huahine and Eimeo (now called Moorea). There Mr. Nott devoted himself to translating the Bible, which he was certain that the people would sometime accept.

The Society in London began to discuss abandoning so unprofitable a field. Some earnest friends of continuance of the mission appointed a day of prayer for the conversion of King Pomare and the triumph of Christianity. This was in July, 1812, and at the very same time King Pomare came to the missionaries at Eimeo, asking to be baptized. This was the turning point. Altho, naturally, the missionaries insisted that they must delay his baptism until he had received more instruction, he was, from that time, a changed man. Eight of the missionaries who had fled to Australia came back to Eimeo on his invitation, and the next year, two of the missionaries having ventured again to Tahiti, found, to their surprise, two Christians there. These men had remembered the teachings of the missionaries, and together had tried regularly to worship God as the missionaries had taught them. By the time that Rev. John Williams and William Ellis arrived at Eimeo in 1817, a church of native believers had been formed, the islands of Huahine, Raiatea, and Tahiti had destroyed their idols, not without fierce opposition from the priests, and peace, prosperity and progress had begun to rule. So long as the people were heathen they cared not to better their material condition. But as soon as they accepted the Gospel, they began to build houses and to learn useful arts. King Pomare built a great church at Tahiti, in which he assisted more than a score of years after the first missionaries reached the island. Grateful native Christians of the Society Islands sent a contribution to the LMS amounting to £1,700.

Mr. Williams now settled at Raiatea, and began that splendid career of evangelization among neighboring islands which gave him the title of the Apostle to Polynesia. Going out by boat to the next islands; sending out native workers, who were of like devotion with himself; building, without tools or lumber, a little ship; that he might go the further, Mr. Williams and his native co-workers evangelized the Hervey or Cook Islands, Samoa, began a work on Fiji Islands, and finally in the midst of the blessed work of building up and extending the kingdom, when he was about to enter the western ocean, 1,500 miles from his Samoan home, with the Gospel, he was killed by the cannibal inhabitants of Erramanga, November 20, 1839. In twenty-two years of arduous service he had visited and opened a great number of islands of the South Pacific to the Gospel. He had been drawn into the converted islanders in such a degree that they were unwilling in responding to calls for volunteers for dangerous
and seemingly impossible service. At his death a will went up from all parts of the Road Pacific, "Of the father Williamu!"

The devoted service rendered by the native workers sent out from the stations of the LMS, in preparing the way for the occupancy of the New Hebrides by the Nova Scotia Presbyterians and the present New Hebrides Mission, has already been described elsewhere. The same heroic devotion of converts to Christ opened the way for missionary occupancy of New Caledonia (1841), the Loyalty Islands (1841), the Tokelau Islands (1858), Niue or Savage Island (1830-1859), Ellice Islands (1865), and Gilbert Islands (1870). The progress of the mission in Polynesia has been injuriously affected, as elsewhere, by the coming in of European traders, bringing with them liquors and arms, which it is their determination to induce the natives to buy, as well as vicious practices quickly credited to Christianity by the islanders. But its most serious calamity fell upon it when the French Government in 1838-41 used force at Tahiti to make the islanders receive Roman Catholic missionaries, and in 1841 took possession of the islands. A similar attack by the French Government was made upon the mission of the LMS in Lifu (Loyalty Islands) in 1873. A French man-of-war entered the harbor and ordered the missionaries to cease teaching the people in the native language, for which French must be substituted. When the missionaries questioned the authority for such orders, the French marines destroyed the mission buildings and the native houses near them. The indignation caused in England by these proceedings led the French Government to modify its plans, and the work of the missionaries was resumed and carried on under restrictions. The suspicion and dislike shown toward the English missionaries led to the transfer of the work in the Society Islands and in Mare (Loyalty Islands) to the Paris Evangelical Society, which now has charge of the field of laborious efforts of the LMS during eighty-nine years. In the Loyalty Islands something like liberty has been granted to the workers, and chapel's have been erected and schools opened, with students eager for work. The French resident at Lifu is a Protestant, in full sympathy with the mission. Native workers from the French Government was made upon the mission of the LMS in Lifu (Loyalty Islands) 1873. During all these years since John Williams built the first missionary ship of the LMS the work in the island world has been done in a substantial vessel, which, happily, bears his name. The first missionary vessel, the "John Williams," was built by the children, and for twenty years sailed the Southern Seas. In 1894 she was wrecked, and the following year a second vessel was launched, only to go on the rocks at Niue twelve months later. In 1866 the third "John Williams" was built, and for a quarter of a century carried on the work. But a steamer was needed, owing to the vast area to be covered, and in 1893 the four-masted "Hottentot," was added.

Training institutions were established at Raratonga in 1839, and the Malua Institution of Samoa in 1845, where the native teachers, evangelists and pastors receive efficient training for their work.

B. New Guinea: In 1870 the LMS Directors sent Rev. S. Macfarlane of London, as a pioneer to New Guinea. At the May meeting of the Loyalty Islands Mission eight native helpers were consecrated for the work. In May, 1871, Messrs. Macfarlane and Murray, with the native helpers and their families, sailed for the new field of labor, landing on July 1 at Darnley Island, where the chiefs consented to try a teacher for a week. Native teachers were placed on other islands in Torres Straits and near the coast of New Guinea, Mr. Murray taking temporary supervision of the new work and making his headquarters at Cape York, in Australia. In 1875 three English missionaries began work in New Guinea itself, and several Rarotongan teachers were added to the native staff.

An institution for training Papuan preachers was opened at Murray Island, and, later, a similar institution was established at Port Moresby, where in 1881 the first church was formed and the first three Papuan converts in New Guinea were baptized. Since then other stations have been occupied by missionaries of the LMS, and native workers are laboring in several places on the southwestern coast of British New Guinea. The village church was opened at the islanders, all subverted into the language most widely used. On April 8, 1901, Rev. James Chalmers and Rev. Oliver Tomkins, with a native chief and several native youths, started out to explore the Aird River, one of the streams that are like roads promising to lead into the interior of the island from the northwest part of the Gulf of Papua. Near Goaribari Island, at the mouth of the river, they were attacked, killed, and eaten by cannibals. This terrible event made an impression upon Christians at home as profound as that produced by the murder of John Williams sixty years before. Plans were immediately made for reaching the men, who did this thing, with that Gospel of love which can change their savage nature. These plans are still under consideration and will certainly be carried out unless means fail. There are now 13 missionaries in the New Guinea Mission (10 with their wives), 114 native workers, 6 schools, and 1,500 professed Christians, of whom 813 are communicants.

In Polynesia, as a whole, including New Guinea, the LMS reports (1903) 57 English missionaries, 16 mission schools, and 23 mission houses. Of these native helpers, 49,920 professed Christians, of whom 18,605 are communicants; 272 schools, and 11,854 pupils. Native contributions, £5,162.

2. Africa. A. South Africa: Cape Colony in South Africa was a settlement of the Dutch East India Company, commenced in 1652. The Dutch settlers drove back the Hottentots, making slaves of a large part of those whom they did not destroy. Dr. Vanderkemp was the first missionary of the LMS, sent to Africa in 1789. He made a strong effort to establish a mission among the Kaffirs in eastern South Africa, but after some years was obliged to retire for safety to Graaf Reinet, where, meanwhile, other missionaries of the Society had settled. As soon as the mission at this place began to be successful the Dutch colonists raised an outcry that it was sheltering Hottentots, and that Dr. Vanderkemp went so far as to try to kill Dr. Vanderkemp for his friendship to the Negroes. The English Governor of Cape Town then advised him, in 1820, to establish his Hottentots upon a piece of land which the Government gave him near Algo
Bay (Port Elizabeth). Almost immediately after this the country passed again into the hands of Holland, and the Dutch Governor, on hearing complaints that he harbored robbers and murderers, persuaded Dr. Vanderkemp to give up his settlement and remove to another place less favorable to these misdeeds. This experience was a sample of what Dr. Vanderkemp had to encounter during his whole missionary life. He was champion of the rights of the Hottentots against grasping and conscienceless white settlers, and, at his death, after thirteen years of work of this nature, he had fairly won the hearts of many Hottentots and Kaffirs and so had prepared the way for those who were to follow him.

Messrs. Kicherer and Kramer were sent out by the LMS at the same time as Dr. Vanderkemp, and they went to the western part of South Africa, attempting to reach the Bushmen. While Hottentots and Griquas became Christians, the Bushmen would not listen to the missionaries, and Kicherer having resigned in 1806 in order to become pastor of a local (Dutch) church, the mission was abandoned. The Hottentots then brought the Bechuana to the knowledge of the Christian world. Another effort to reach the Bushmen was made at Colesberg in 1814, and with some success. This excited the enmity of the white settlers, and the missionaries were ordered by the Government to abandon this outpost and retire within the limits of the Cape Colony, where the work of the Society was steadily growing.

Messrs. A. and C. Albrecht were sent by the LMS in 1806 to work in Namaqualand, north of the Orange River. The region was infested by the outlaws led by Africaner. This chief was a Hottentot slave, who, driven by a mad desire to be revenged for punishment inflicted upon him by his master in Cape Colony, had fled to the wilderness; a price was set upon his head, and he was the terror of the whole country. The missionaries settled at Warmbad, about one hundred miles west of Africaner's place of abode. The outpost was friendly to the missionaries at first, but some other settlers at Warmbad having made an expedition against him, he became furious, and the missionaries were compelled to flee before him.

The next attempt in this direction was by Rev. Dr. Moffat, who, in 1817, established himself in the village where Africaner lived. It was but a short time before this terrible chief became a Christian, was baptized, and went with Dr. Moffat to Cape Town to express his willingness to live at peace with the colonists. This visit in 1818 was almost the first convincing evidence offered to officials and colonists of the advantage of missions. Messrs. Ander and Crane, two other missionaries of the Society, founded a station at Griquatown in 1820. This place is about one hundred miles west of the diamond fields of Kimberley, in Griqualand West. Their labors among the people were crowned with success, but after a few years the Governor of Cape Town, having sent a demand that the missionaries should send the best of their young men to serve in the army, the people became suspicious and hostile. This caused a withdrawal of the missionaries and the work was practically broken up.

To this place Mr. Moffat went in 1820, and reorganized the work. After seeing the enterprize in good hands he moved on to the Kuruman River, some distance to the northwest, where a LMS missionary named Hamilton had been working among the Bushmen tribes since 1819. The station took the name of Kuruman, which it holds to this day. The station center was moved about the natives in order to understand their language for the sake of translating the Bible. Not only did he learn the language, but he also learned the ways of the people, found his way to their hearts, and in 1829 the baptism of six converts took place. Dr. Moffat then prepared the way for mission stations farther north, in what is now Rhodesia. In 1838, having finished the translation of the Bible into Bechuana, he carried it to London for publication, and there his influence was a factor in the decision of Livingstone to offer his services to the LMS, in 1840, to go north from Kuruman, where the missions of the Society were opened in the eastern part of Cape Colony, among them one in 1813 at Theopolis, near Algoa Bay and on the border of Kaffirland, which was a very successful station until the Kaffirs undertook to destroy it as being an outpost of the whites. The Hottentots represented this attack and drove the Kaffirs out of the colony. The Government praised the Hottentots for their work, and then rewarded them by taking away their land for the use of white settlers. Another station was opened on the eastern shores of Lake Ngami in 1841 by Mr. Vanderkemp, who, in 1846, went to Paris to apply for funds to the Paris Evangelical Society.

Another station was opened at Brondby, about halfway between Cape Town and the site where Port Elizabeth now is. This station gave place to Hankey in 1852, founded as a refuge for freed slaves. After having been abandoned by the society in 1875, Hankey was reoccupied in 1891 as a place for training the children of converts from the northern tribes of Cape Colony and BechuanaLand.

The extension of the Society's work to the northward was prepared by Dr. Livingstone. He settled in the village of Ben Gil (now the northern part of Cape Colony). In 1846 he went northward to visit the chief, Seechele, who became a Christian and had great influence in forwarding the acceptance of Christianity among his people. In 1840 Dr. Livingstone moved still farther north and discovered Lake Ngami. This led the way for an advance of the missionary forces into what is now called Rhodesia. But this advance was not accomplished without serious losses. The mission was broken up for a time by the Boers, who in 1853 attacked the natives among whom Livingstone was working, and robbed the station, ordering the missionaries out of the land. After Livingstone's resignation a party of LMS missionaries set forth from Kaffirland in 1859 to go to the Makoilolo tribes in the direction of Lake Ngami, a distance of about one thousand miles. Within a week after their arrival at their destination several were taken sick, and one by one the whole party died, with the exception of one man, who returned to Kaffirland alone. About the same time a party of missionaries led by Moffat were sent to Matabilander (Rhodesia) to begin work in that region, establishing stations at Inyati.
and Hope Fountain. One of the most marked results of this mission is the development of such a Christian chief as Khama, whose influence for good throughout South Central Africa has been immense.

B. Central Africa: Three years after the death of Livingstone, in 1873, means for opening a mission in Central Africa came to the Society from Mr. Arthington of Leeds, who gave the Society $25,000 to purchase a site for a mission station at Tanganyika. The missionaries set out from Zanzibar to go to Lake Tanganyika in June, 1877, but before they had marched much more than one hundred miles, two-thirds of the oxen had died, and it was impossible to proceed. After enormous difficulties they succeeded in getting porters to carry their stores, and after a journey of fourteen months they reached Ujiji, on Lake Tanganyika, but not without great difficulties. One of the missionaries gave up the task as too hard. Another was sent to explain the situation to the Society in England, three died within a few weeks after reaching Ujiji; fever attacked others, two of whom died, and by the middle of the year 1882 one missionary only remained alive at the lake. But this was not all. Dr. Mullens, Secretary of the LMS, on learning of the unexpected difficulties, arranged to go to the spot and study how to overcome them, and in 1879, before he had covered one-half the journey from Zanzibar to the lake, he was taken sick and died by the roadside. In fact, all that could be pointed to as a result of four years' struggle and expenditure at this point was that God had been merciful in preserving the lives of some of the laborers. New workers reached Ujiji in 1883, and a steamer was sent out (in pieces) for use on the lake. It was put together and began to render its valuable service in 1886. Since that time the growth and prosperity of the mission has been uninterrupted, excepting in 1889, when a war broke out between the Germans and Arabs, causing the murder of one missionary, who happened to be on the road at the time, and cutting off all communication between the Society and the mission during the next two years. The war completed its success upon the mission permanency. As to the results of the work of the LMS in Africa the Society began early to urge the native churches in Cape Colony to prepare for independent existence. The Congregational Union of South Africa was formed and gave the mission an independent existence.

3. North India (1798): The first missionary of the LMS in India was Mr. Nathaniel Forth, who reached Calcutta in 1798, and who, not being allowed to establish himself there, labored for fourteen years at the mission in Chinsurah, a few miles north of that city. In 1809 Mr. May was sent out to aid in carrying on the work. He was enthusiastic in education of the children, and by 1812 he had succeeded in establishing thirty schools, obtaining from the Government support in aid of their support. These efforts at Chinsurah, continued throughout thirty years, were the foundations of the splendid work now carried on by the LMS in that district, the station having been transferred to the Free Church of Scotland in 1849. Two missionaries of the LMS were sent in 1816 to work among both English and natives in Calcutta. A native mission was locally raised and the Union Chapel was built in 1821, which has been a center of Christian influence ever since. Five schools for girls were opened the same year. This marks the beginning of work for women in India. A Miss Piffard of Calcutta voluntarily undertook the support of these schools, and, what is more, has defrayed their expenses. The work in the city and vicinity is now actively pressed in twenty-one separate centers, and has become very important in influence and extension.

A chapel was opened on the road to Bhawanipur, a southern suburb of Calcutta, in 1820. Mr. Lacroix in 1827 took charge of the work in the villages south of the city, and in 1837 took up his place of residence at Bhawanipur. He there opened a boarding school for boys, and the following year a girls' boarding school and an English school for native children. That English school afterward was developed into the present Bhawanipur Institution. When pupils were converted in 1843, the natives, panic-stricken, withdrew their children. But the desire for English education outweighed the fear of Christianity, and in 1845 branch schools had to be established, to relieve the pressure on the main institution; these were located at Behala and Ballygunge. The present noble Institution building was completed in 1875 at a cost of $20,000. When conversions continued among the pupils, the parents tried to force their own children to hold to Hinduism, and in some cases they sued the missionaries for abduction. These proceedings were resisted in the courts, and the result was that verdicts were given for liberty of conscience. The native church building was built in 1897 and paid for by the people. Bhawanipur is now the chief site of the LMS work in the city of Calcutta.

Surat, on the western side of the peninsula of Hindustan, was occupied by the LMS in 1816. Messrs. Fyvie and Skinner translated the Bible into Gujarati, and Mr. Skinner went to Bombay and learned printing in order to carry on a printing house. The enormous mass of publications issued from that printing house made Surat a center for Christian literature second to Carey and Ward's Serampore only. After thirty years of vigorous activity the mission there was transferred in 1847 to the Irish Presbyterian Church, which now carries it on. Benares was occupied for the LMS by Rev. M. T. Adam in 1819, who gave much of his time to translation and other literary work, and was the stimulus of much effective influence up to this time.

A station was opened at Almora by Rev. J. H.
Budden and wife in 1820, and from the beginning school work prospered. Two orphanages have been established there, but the most striking feature of the mission has been the Lepers' Asylum. Recently the work of the station has been extended to Bhot, in the extreme north of the district, where 2,292 have been reached, and a work have been established on the very frontier of Tibet. The years that immediately followed the Mutiny marked the beginning of Zenana work in North India by Mrs. Joseph Mullens, who was a pioneer in that work, if not the very first to grasp the possibilities in missions.

The work thus begun has spread among all classes of the people, Hindu, Mohammedan, and European, and includes medical, evangelistic, and educational work, the latter being particularly strong.

There are now in the North India section of the LMS Indian missions, 9 stations, 65 missionaries, men and women, including wives of missionaries; 212 native workers, 2,996 professed Christians, of whom 798 are communicants; 63 Sunday schools with 2,292 scholars, 104 other schools with 5,753 pupils.

4. South India (1805): Messrs. Cran and Des Granges of the CMS established a station at Vizagapatam in 1805. They began work among the English as well as the native population; translated the Gospels into Telugu, and established schools. A later missionary here, John Hay, laid the Church in India under inestimable obligation by his notable literary labors. But the station is still occupied the results have not reached great proportions. Mr. and Mrs. Loveless began work in Madras in 1806. This beginning has been followed up in the city in Blacktown and the suburb of Vepery, and in the district, where are twelve outstations. Mr. Hands established a station at Bellary in 1810, and by 1812 he had translated the first three Gospels into Kanarese. He could not get permission to print them until 1819. By that time he had the whole Bible ready. His labors were the beginning of a strong and blessed work here. Work began at Belgaum in Bombay Presidency in 1829. It has been slowly extending, but the Society has decided to give it up to some society having other stations in that region. In the same year missionaries went southward to Bangalore to open a station. No real foothold was gained, however, until 1827. Mr. Reeves then took up the work and the success of the station has been steady and important. Ten years later Mr. Benjamin Rice began work at Bangalore, and for twenty years was at the head of the Kanarese Seminary for training native workers. In 1857 the English Institution was opened for education of Hindus and Mohammedans. A theological class was conducted in connection with it, and the work continues quietly to progress to the present time. Cuddapah was occupied as a station of the LMS by Mr. Hands in 1822. Little fruit appeared from his work until 1858. When suddenly whole villages renounced heathenism and desired baptism. A new station was established at Nandyal in 1855, which was continued till 1881, when the missionary force was transferred to Gooty, thus bringing the stations of the LMS at Bellary, Gooty, and Cuddapah into line with Belgaum and Madras on the east, and forming a belt across India from sea to sea. At Gooty, because of its central position, a training institution for teachers and catechists has been opened.

South of the Nilgiri Hills and north of Travancore are three stations of Salem, Tripath, and Coimbatore. The work continues to gain in the outlying districts year by year, the interrupted progress of 1851 and 1852 having been followed by a period accompanied by famine of both food and water. School houses have been built, teachers supplied, and the missionaries as well as the native evangelists make long tours from village to village. Medical work is successfully carried on, with a well equipped hospital at Jammalamudugu. There are (1903) 14 stations and 382 outstations, 78 English missionaries, including wives and unmarried women; 691 native workers, 27,886 professed Christians, of whom 2,796 are communicants, and 356 schools with 14,534 pupils. The school fees paid by the pupils in 1902 amounted to £3,300 and other native contributions to the Society were £296.

5. Travancore (1806): Among the missionaries of the LMS who went out to India in 1804 was Mr. Ringeltaube. While his colleagues went to Vizagapatam he returned to Travancore. He had previously spent two years in India and experienced the difficulties of mission work for the Society for the Promotion of Christian Knowledge. He studied Tamil for a time at Tranquebar. In 1806 he undertook to begin his mission in the native State of Travancore. He was not permitted to reside in Trivandrum, and therefore began the Travancore mission from Palamav near a CMS station in Tinnevelly. The first foothold in Travancore was gained at Meiladi, sixty miles distant, where forty people were soon baptized and the first chapel was built, and by the end of 1812 Ringeltaube reported 677 communicants. In 1815 he broke down from overwork, and was succeeded by Mr. Mead in 1818. The quality of Ringeltaube's work was such that, tho left to themselves during three years, the native preachers and their churches were in vigorous life when the new missionaries came. Mead and Knill opened a station at Nagareoil and the Word grew mightily and prevailed. In 1822 the number of Christian adherents was found to be 5,000. The field was then divided, the eastern part being worked from Nagareoil, and a new station being opened at Neyoor as a center for the western district.

Quilon, in the north of Travancore, had been occupied in 1821, but the enterprise was not successful; another attempt was made in 1827, with some success in educational work. The first church was formed in 1837. Trivandrum was at last made a missionary station in the same year. The progress of Christianity has been steady and remarkable in Travancore. There was a sharp outburst of persecution in 1827-30, renewed in 1858 and 1859. The ostensible cause of the persecution was the course of Christian women in covering the upper part of the person as soon as their awakened sensibilities made them feel the indecency of going without covering. On the other hand, Hindu caste rules required that the women of the caste to which these belonged must wear nothing above the waist. It is characteristic of the debasing effect of Hinduism that even educated men saw no weak point in this, and demanded that Christian women should not wear the shoulder cloth. This was made the ground for a great destruction of Christian property and a vast amount of brutality.
toward Christians. At last the Travancore Government ordered that the Christian women be permitted to cover themselves provided their shoulder cloths were made of “coarse material.” The persecution served to spread knowledge of the Gospel, and great extension has resulted.

There are in Travancore (1903) 7 stations, 344 outstations, 27 missionaries, 4,459 native workers, 916 native helpers, 75,065 professed Christians, of whom 8,688 are communicants; 380 schools with 16,323 pupils, local contributions amounting to £1,948.

6. China (1807): The pioneer missionary of the LMS and of Protestant Christendom to China was Robert Morrison. Having met a young Chinaman in London he had studied the language with him, and had made considerable progress both in speaking and in writing. Landing at Canton on the 7th of September, 1807, he was at once beset with difficulties; Chinamen were forbidden to teach the language to foreigners under penalty of death; no one could remain in China except for trade, and the Roman Catholics, already there, stood ready to stir up the authorities against him. Amid untold deprivations, amid obstacles and with great physical suffering, Morrison preserved his integrity. In 1809 relief came; he was engaged by the East India Company as Chinese translator, with a salary of £500 a year. In this capacity he could go about freely with a recognized standing while in no way diverted from his real purpose in coming to the country. In 1812 his grammar of Chinese was finished and printed; then tracts, a catechism, the Acts, and the Gospel of Luke. An edict was then issued declaring the penalty for such publications to be death; but Morrison paid no heed, and at the end of 1813 the whole New Testament was printed. Mr. and Mrs. Milne joined Morrison and his wife at Macao in 1813, and five days later they were ordered to leave within eight days. They went to Canton, where the Morrisons followed them.

The next question was to find a secure place for a mission station. Mr. Milne spent the next few months in exploring Java and the Malay Peninsula, finally deciding to establish himself at Malacca. Morrison now formulated a scheme for establishing at Malacca an Anglo-Chinese college. He himself contributed £1,000 to the institution. Buildings were erected and students were sent to England. A flourishing work began. In consequence of the outbreak of war with England, nothing could be done in China; but on the conclusion of peace in 1814 the LMS missionaries to the Chinese at Batavia, Penang, Malacca, etc., decided to close their stations; and on scattered outposts, and to establish themselves at the newly opened ports of China. The Anglo-Chinese College at Malacca was removed to Hongkong, to serve as a training institution for native workers. Dr. Hobson removed to Hongkong and opened a hospital. Mr. Medhurst and Dr. Lockhart established themselves in Shanghai. In 1844 Messrs. Strochnach and Young opened a station in Amoy. The work progressed slowly during ten years, and then came a change. In the year 1854, seventy-seven converts were baptized. Outstations were rapidly established in the outlying districts, and new stations were established in the large towns. The church rose to a sense of its duty and became earnestly evangelistic. The one church grew to

eleven, nine of them self-supporting, and the work was extended to a center of vice at Pholam, up the North River. In 1851 the Tai-ping rebellion checked missionary enterprise. In 1859 and 1860 Griffith John went two hundred and fifty miles up the Yangtse River to the headquarters of the Tai-ping leader, at Nan-king, where he succeeded in getting the missionaries invited to work in the districts where the insurgents were in power. He then pushed on into the interior and established stations at Han-kau, Wu-chang, and Han-yang, the three cities facing each other at the junction of the Han and Yangtse Rivers. About the same time Messrs. Edkins and Lee began work in Tientsin, and Mr. Lockhart, after twenty years' service in Shanghai, volunteered to open a station in Peking. It was in 1879 that the power of the medical mission was illustrated in Dr. Mackenzie's help to the sick wife of Li Hung Chang, which won the friendship of that statesman, which continued until Dr. Mackenzie's death. The work at Tientsin progressed steadily until the riots of 1870, when eight chapels were burned, and heavy losses affected the church, the native Christians of most profound emotion only coming through the fire of persecution unscathed.

During the Boxer movements of 1900 the LMS in North China suffered with the others, one missionary, the Rev. J. Stonehouse, losing his life. In Peking the East City Church lost more than one-half of its numbers, and two chapels in Tientsin were left in ruins. But since the outbreak was suppressed, there has been a general advance.

There are in the China mission of the LMS (1903) 19 stations and 208 outstations, 112 English missionaries, men and women (including wives); 326 native workers, 17,782 professed Christians, of whom 9,983 are communicants; 113 schools with 2,904 pupils, 13 hospitals and dispensaries, native contributions to the general work, £159, and as fees to the schools, £857, making a total sum from the people of £1,016.

Mongolia: In 1819 the LMS commenced a mission to the Buriam or Mongol of southern Siberia. Messrs. Stallybrass, Swan, and Yuille were the missionaries sent out for this work, and they established themselves at Selenginsk, near the Chinese frontier, a little to eastward of the southern end of Lake Baikal. Russian territory was chosen rather than Chinese for this enterprise, because of the liberal views of the Czar Alexander I., then on the Russian throne. The Czar not only gave the mission a grant of land, but a considerable sum of money for erecting buildings. Messrs. Stallybrass and Swan translated into Mongolian and printed the Old Testament and the Gospels. They had a printing house, schools, and regular services in Mongolian, and were rejoiced by several converts, among them two Buriat nobles, who were Buddhists before conversion. In 1838 the Society reported satisfactory progress in the girls' school at Khodon, while at Onagen Mr. Swan was training ten Buriat youths "whose chief desire" was "to impart to their countrymen the blessings they so much prize." But after the Czar Alexander's death in 1825, his brother Nicholas I. came to the throne and made a point of destroying every vestige of the religion that Alexander had favored. The various evangelical missionary enterprises established in Russia under patronage...
of the late Czar were one by one suppressed. The turn of this hopeful mission of the LMS came in 1841, missionaries informed that their work must stop and they must leave the country "because the mission did not coincide with the form of Christianity established in the Russian Empire." Twenty-two years' accumulation of material was sacrificed, but we may not believe that the results of that long period of self-sacrificing labor were utterly lost.

After a lapse of nearly thirty years, the new relations established with China made it possible to resume efforts among Mongols from the Chinese side of the frontier. The LMS in 1870 assigned Rev. James Gilmour to this work. Mr. Gilmour, in the latter part of that year, set forth from Peking, crossed the desert of Gobi, and visited the former stations near Selenginsk, finding the graves of the dead from the mission families the sole relic of the enterprise.

The people whom Mr. Gilmour was to reach were therefore, of course, not easily taught, and they were Buddhists, and therefore not easily made to feel lacks in character or mental equipment. During twenty years Mr. Gilmour had for his sole object in life the evangelization of these people. He made his headquarters at Peking, to which he returned for a part of each year. But his long marches over the Mongolian plains, his life in Mongol families, and his earnest efforts to conquer Mongol suspicions, were the essentials of a missionary activity for the most part meeting with but slight return from this shy and undemonstrative people. It was not until 1884 that the first Mongolian was baptized. The eastern part of Mongolia, where the people led a more settled life, was the field of operations after that year, and in 1887 Chao-yan was occupied as a permanent center of work. Gilmour died in 1891. Others took up his work, but the effort to reach the Mongolians has practically failed. The missionaries in Eastern Mongolia succeeded in collecting a Christian church of about two hundred members, chiefly from the Chinese population. In 1901 the LMS transferred this to the American Presbyterian Church, which has extensive missions in Manchuria, and withdrew its missionaries to other stations in China.

7. British Guiana (1808): A Dutch planter named Post, living on the banks of the Demerara River, sent an urgent appeal to the LMS in 1807 for some one to instruct his negroes in Christian conduct. In response to this appeal the Rev. John Wray was sent to Guiana the following year. A church and a house for the missionary were built, chiefly by contributions from the planter and his friends, and a very encouraging work was begun, and, therefore, not easily taught, and therefore not easily made to feel lacks in character or mental equipment. During twenty years Mr. Gilmour had for his sole object in life the evangelization of these people. He made his headquarters at Peking, to which he returned for a part of each year. But his long marches over the Mongolian plains, his life in Mongol families, and his earnest efforts to conquer Mongol suspicions, were the essentials of a missionary activity for the most part meeting with but slight return from this shy and undemonstrative people. It was not until 1884 that the first Mongolian was baptized. The eastern part of Mongolia, where the people led a more settled life, was the field of operations after that year, and in 1887 Chao-yan was occupied as a permanent center of work. Gilmour died in 1891. Others took up his work, but the effort to reach the Mongolians has practically failed. The missionaries in Eastern Mongolia succeeded in collecting a Christian church of about two hundred members, chiefly from the Chinese population. In 1901 the LMS transferred this to the American Presbyterian Church, which has extensive missions in Manchuria, and withdrew its missionaries to other stations in China.

8. Madagascar (1818): The history of the development of this field of the LMS is so fully described in the article on Madagascar that its repetition in this place is needless. The Society now has in that field (1903) 17 principal stations, 57 missionaries, men and women, including missionaries' wives; 3,323 native workers, 72,000 professed Christians, of whom 24,716 are communicants; 630 schools with 31,770 scholars; 1 hospital and dispensary, and local contributions amounted to £5,522 in 1902.

LONGHEU: A town in the province of Kwang-tung, China, situated 8 miles N. E. of Li-liang. Station of the Basel Mission Society (1882), with (1903) 1 missionary and his wife, 8 native workers, 4 outstations, 1 boarding school, and 602 professed Christians, of whom 365 are communicants.

LOONGWONG: A town in the province of Fo-kien, China, situated on the coast about 30 miles N. E. of Fu-chau. Station of the CMS (1889), with (1903) 31 native workers, 12 day schools, and 1,021 professed Christians, of whom 318 are communicants. Station also of the CEZ (1898), with (1903) 3 women missionaries, 46 day schools, 6 outstations, 2 boarding schools, 1 dispensary and 1 hospital. Station also of the Mission to Lepers in India and the East (1891), with 1 chapel and a home for untutored children of lepers.

LOOMIS, Augustus W.: Died at San Francisco, Cal., July 26, 1891. He first went as a missionary with the Presbyterian Board (N.) to China in 1844, and was there until 1850. In 1852 he began mission work among the Creek Indians, and was with them about a year. In 1859 he was called to take charge of the Chinese work in California, in which department of Christian missions he spent the remainder of his life. Dr. Loomis published several important works in connection with Chinese missions, and his whole work has been of the highest values. He was a man of great intellectual attainments, and his Board will find it difficult to supply his place in their missionary force.

LORENCOS MARQUES: A town in Portuguese E. Africa, situated on the coast in the N. W. of Delagoa Bay, founded as a trading post of the Portuguese in 1544. Station of the MR (1889), with (1903) 2 missionaries and their wives, 3 women missionaries, 10 native workers, 8 outstations, 9 places of worship, 1 book room, 21 day schools, and 1,508 professed Christians, of whom 624 are com-
municsants. Station of the SPG (1894), with 1 missionary, 1 woman missionary, 7 outstations, and 475 professors Christians, of whom 101 are converts.

LOVEDALE: A town in Cape Colony, Africa, 700 miles northeast of Cape Town, near Alice. It is the site of a missionary institution, which is of absorbing interest, since its methods of work when it was commenced were novel, and have been proved to be successful—the Lovedale Mission. In 1841 Rev. William Wilberforce opened it as a missionary institute, and the place was called Lovedale, after Dr. Love, the first secretary of the Glasgow Missionary Society. The aims of the institution were these: 1st. To take young men of intellectual and spiritual qualifications and educate them to be preachers. 2d. To train young men and women as teachers for native mission schools. 3d. Industrial education in various arts, such as wagon-building, blacksmithing, printing, bookbinding, telegraphy and agricultural work of various kinds, was carefully to be given to the natives in order that they might be industrious and useful citizens. 4th. To give an education of a general character to all whose course in life had not yet been definitely determined. The two departments, industrial and educational, are carried on in two buildings, separate for the males and the others for the females. Each department has its own special aim, but the grand purpose of each and both is to Christianize, not merely to civilize; and the conversion of the individual is the great aim and the desired end of all the work that is conducted. The solution of the problem how to develop Christian character and energy amid the existing conditions surrounding barbarous and indolent races is fraught with many difficulties; and in order to Christianize successfully, it has been proved of great assistance to civilize at the same time. The principles which govern the management of the Lovedale Institution are: (1) It is non-sectarian and denominational. The United Free Church of Scotland supports it financially, but all denominations in the country have been represented in it at one time or another. (2) It is not founded on an appeal of the colored and nearly all tribes in South Africa and Rhodesia are represented. No influence is brought to bear upon the students to join the Free Church of Scotland in preference to the church with which they are connected. Even in the theological course those who are trained as agents for other bodies are not weakened in their denominational ties. (2) Bread Charity does not mean lax Christianity. Instruction in the Bible and in practical religion is the first work of the day in all the classes. Mourning and evening worship is held in the dining-halls. At noon every Wednesday a prayer meeting is held, and each workman drops his tools and takes part in the meeting, altho it involves a pecuniary loss by reason of the time taken from the week's work. (3) Self-support is the theory. In the two departments especially this principle is carried out.

In addition to these general principles other lesser ones are: The education is practical; habits of industry and activity are urged and encouraged, and promotion in the classes depends first upon the moral character, then upon the intelligence and activity.

The curriculum in the educational department includes three courses, each of which occupies three years. These are: The elementary school, the theological course and the theological course. The subjects studied are those usually taught in like institutions. In regard to the teaching of Latin and Greek to theological students, there has been some discussion, but the tendency now is to drop these studies from the course as not being essential to the equipment of the native pastor. The training of native teachers for elementary native schools is second in importance. Teachers who hold certificates from the educational department have a higher status, and can secure good salaries. A general education is given to all, and men in all the walks of life receive as much education as may be necessary or expedient for them to undertake. In the industrial department various arts are taught. The native apprentices, after a trial of three or six months, are indentured for five or six years, if satisfactory. In the evening they are given a part of the studies of their general education. In addition to their board and lodging they receive pay at rates varying from two to five dollars a month, of which a small part is retained each month in trust for them, and is paid to them at the end of their apprenticeship. No one is allowed to work who is not apprenticed. Those apprentices or engaged in other work are employed in manual labor about the fields and gardens. There is a farm of 2,800 acres connected with the institution. So attractive is the education provided at this institution that many Europeans have availed themselves of its advantages, and mingle freely with the natives in the classes.

The resources of the institution are native fees, government grants, and the produce of the farm and gardens. The receipts from the two first sources in 1902 amounted to $7,175, or $34,725. The government grants amounted to $2,200, or a little less than $11,000. It is a mission station of the UFS (1841), with (1903) 19 missionaries, four with their wives; 6 women missionaries, 16 native workers, 3 outstations, 2 places of worship, 4 day schools, 1 boarding school; 1 technical college, 1 printing press, 1 Young Men's Christian Association and 475 professing Christians.

LOWRIE, Reuben Post: Born at Butler, Pa., November 24, 1827; graduated University of New York, 1849; was tutor there in 1839, attending also a course of lectures at Union Theological Seminary, finished his theological course at Princeton; was principal of an academy at Wyoming, Pa., 1849-51; was a missionary a few months among the Choctaw Indians. He was ordained 1853, appointed to China as a missionary of the PN and sailed April 22, 1854. He was stationed at Shanghai 1854-60. He made rapid progress in the acquisition of the language, and within a year was able to conduct public exercises in Chinese. He also devoted much time to the completion of a dictionary of the Four Books, commenced by his brother Walter. He translated also the Shorter Catechism and a catechism on the O. T. history. When, enfeebled by constant work and the enervating climate, he was advised to visit his native land, he replied that he would not leave China "until he had looked death in the face." He had nearly finished a
commentary on the Gospel of Matthew, when he died at Shanghai of chronic diarrhoea, April 26, 1860.

LOWRIE, Walter Macon: Born at Butler, Pa., February 18, 1819; graduated at Jefferson College, 1837. He had been decided while in college to be a missionary to the heathen; graduated at Princeton Theological Seminary 1840; ordained November 9, 1841; sailed January, 1842, for China as a missionary of the PN. In August, 1846, he published several essays in the Chinese Repository. It is proper to say here that an edition of the Bible to be used in translating the name of God into Chinese. His views agree with those of Dres Boone and Bridgman, but differed from those of Medhurst and others. He commenced also the preparation of a dictionary of the Four Books, and decided to include also the Five Classics. These books contain the body of the Chinese language. This work, he thought, would require two or three years without interfering with more direct and important missionary labors. His plan would include biographical and historical notices of China from B.C. 2100 to B.C. 300, in a largearto volume. But he did not live to complete the work. In 1847 he was appointed one of the revisers for the revision of the Chinese translations of the Bible. While attending the meeting of the revisers committee at Shanghai he received a message requesting his immediate return to Ningpo. On the 19th of August while on this journey they were attacked by pirates armed with swords and spears. One of the boatmen who was near him states that while the pirates were maiming the sailors and ransacking the boat, Lowrie sat at the bow reading his pocket Bible, and as they were in the act of seizing him, he turned himself partly round and threw his Bible on the deck. Three men seized him and threw him into the sea. The Bible was a copy of Bagster's 12mo. edition in Hebrew, Greek and English, the same copy he had preserved with great difficulty in the shipwreck of the "Harmony." The death of Mr. Lowrie was a great loss to the missionary cause, since his natural and acquired preparation for important literary work in the Chinese language was of the first order.

LOYALTY ISLANDS: A group in the South Pacific, consisting of Uvea, Lifu and Maul and several smaller islands. Lifu, the largest, is about 50 miles long and 25 broad, and contains a population of about 6,000. The island is of coral formation, and the thin layer of soil is productive of vegetables and fruit. Mau has about 6,000 people. Uvea is a circle of 20 islets enclosed in a lagoon 20 miles wide, and has 2,500 inhabitants. The islanders belong to the Melanesian race, and each island has its own tongue. Christianity was early introduced into the islands by natives from Ratonga and Samoa. In 1841 the LMS dispatched its first missionaries to this field. The French Government instituted a commandant in the islands in 1864, considering it a dependency of New Caledonia. Under French rule the English missionaries were interfered with, but an understanding has been reached which permits freedom of worship. The work in the islands is carried on by the LMS Mission and the Paris Evangelical Society in 1891. There are (1902) two mission stations on the island, Ro and Netche, with 1 ordained missionary and 2 preaching places. The LMS has retained control of the work in Uvea (1856) and Lifu (1843), having (1902) 1 missionary on the last named island, and on both islands together 182 native workers and 2,300 church members.

LUANZA. See Luanza.

LU-CHAU: A town in the province of Szechwan, China, is situated on the left bank of the Yangtse River at the confluence of the To River, about 146 miles S. E. of Cheng-tu. It is an important salt market. Population 100,000 (estimate). Station of the CIM (1890), with (1903) 2 missionaries, one with his wife; 2 women missionaries, 3 native workers, 1 chapel, 1 Sunday school, and 1 day school.

LU-CHAU-FU: A town in China, situated near Chaohu Lake, about 85 miles N. by E. of Nanking-fu. Station of the FCMS (1894), with (1900) 2 missionaries, one with his wife; 1 native worker, 1 place of worship, 1 society for young people, 1 book room, 1 day school, dispensary, 1 hospital and 19 professed Christians. The Society spells the name Lu-chae-fu.

LU-CHENG-HSIEN: A town in the province of Shan-si, China, situated about 15 miles N. E. of Lu-ngan-fu. Station of the CIM (1889), with (1903) 3 women missionaries, 3 native workers, 1 outstation, 2 places of worship, 1 Sunday school, 1 boarding school and 2 refuges for opium victims. The name is sometimes written Lu-ch'eng.

LUCHEU ISLANDS: A chain of 37 islands in the North Pacific, between Japan and Formosa. Their surface is very rugged and the soil variable, but the islands abound in grass and trees, and are very picturesque and beautiful. The climate is hot, but the summer is never excessive, and then frequent injurious droughts and typhoons. Population, 170,000, consisting of two races, the Japanese and the Lu Chuan proper. These races are of the same stock and greatly resemble each other, the the Lu Chuan are more effeminate and less intelligent, and, unlike most other Mongolian tribes, wear a full black beard. Their book learning and religion are for the most part Chinese, and the higher classes are well educated. Their principal occupation is agriculture, but the mode of cultivation is primitive, the implements are rude, and the soil is generally stilted by hand. The land all belongs to the government, which lets it to large tenants, who sublet it to small farmers. The government is administered in the name of a king, and is in the hands of an aristocracy consisting (as in China) of the literary class, who appear to live in idleness, while the poor are greatly oppressed. About 400 years ago the principal island was divided into three kingdoms, which were subsequently united, and became subject first to China and then to Japan. The CMS, the ABM, the ME, and the BEJS carry on work on these islands largely through Japanese Christians, who work under their direction. Most of the New Testament has been translated into the Luchu dialect. The islands are also called Riu-kiu.

LUCKNOW: A city in the United Provinces, India, on the Gunti River, 42 miles from Cawnpur and 190 miles from Benares. It is the capital of a district, and formerly of Oudh. Viewed from a distance, Lucknow presents a picture of unusual magnificence and architectural splendor,
which fades on nearer view into the ordinary aspect of an Oriental town. Nevertheless, it is one of the most important cities in India, and many of its buildings are broader than most Indian towns, and the sanitation condition of the city is constantly being improved. It has a celebrated school of Mohammedan theology, manufactures silver and gold work and embroidery, and has extensive railway workshops. During the mutiny of 1857 it was besieged by the rebels for six months; when the garrison was saved by Sir Colin Campbell. Altitude, 369 feet. Population (1901), 264,000, of whom 146,000 are Hindus and 99,000 are Mohammedans. Station of the CMS (1857), with (1903) 4 missionaries, 3 with their wives; 14 native workers, 1 out-station, 5 village schools, 2 boarding schools, 1 dispensary, and 473 professed Christians, of whom 174 are communicants. Station also of the ME, with 6 missionaries, 1 with his wife; 9 women missionaries, 16 native workers, 2 chapels, 37 Sunday schools, 1 printing press, 17 day schools, 1 boarding school, and 2 colleges, 452 professed Christians and a deaconess' home. Station also of the WMS, with (1903) 1 missionary, 27 native workers, 4 chapels, 14 Sunday schools, 7 day schools, and 98 Christians. Station also of the ZDM, with (1903) 11 women missionaries, 27 native workers, 3 day schools, 1 dispensary, and 1 hospital.

LUDD: A town in Palestine, situated about 1½ miles S. E. of Jaffa, on the caravan road from Damascus to Egypt. It is the Lydda of the New Testament. St. George is said to have been born and buried here. Station of the CMS (1876), with (1903) 1 native worker, 1 day school. Name is spelled by this society Lydd. The Jaffa Medical Mission has (1898) 2 women missionaries, 1 native worker, 1 Sunday school, 1 dispensary. This Society spells the name Lydda.

LUDHIANA: A town in the Ludhiana District of the Punjab, India, situated about 3 miles S. of Sutlej River, and 73 miles S. E. by E. of Amritsar. Altitude, 812 feet. Population (1891), 46,300, of whom 30,300 are Muslims and 13,900 Hindus. Station of the CMS (1884), with (1900) 2 missionaries and their wives, 6 missionary women, 54 native workers, 9 outstations, 9 places of worship, 40 Sunday schools, 4 day schools, 2 boarding schools, 1 industrial school, 1 printing press, and 320 professed Christians. Society spells it Ludd. The Ludhiana station of the North India School of Medicine for Christian Women (1895), with (1901) 10 women missionaries, 6 native workers, 1 Sunday school, 1 Young Women's Christian Association, 1 female helpers' training class, 5 dispensaries, 2 hospitals, 1 medical class, 1 leper's asylum.

LUENO: A settlement in the Congo Free State, Africa, situated on the left bank of the Luene River at its confluence with the Luene River. Altitude, 1,350 feet. The climate is much better than in the lower lands. Station of the PS (1891), with 4 missionaries, 1 with his wife; 2 women missionaries, 10 native workers, 3 chapels, 1 Sunday school, 1 printing press, 1 day school, 1 dispensary, and 1,000 professed Christians, of whom 657 are communicants.

LUFILUFI: A settlement in Samoa, Oceania, east of Apia on Upolu Island. Station of the Australian Wesleyan Mission, with (1900) 2 missionaries, 101 native workers, 8 outstations, 20 places of worship, 29 Sunday schools, 29 day schools, 1 theological class, and 550 professed Christians.

LU-GAN. See LU-NGAN-PH and LU-GAN-GAU.

LU-GANDA: The Bantu term for the language spoken by the Wa-Ganda; the term might be rendered into English as Ugandan, q. v.

LU-HOH. See LU-HO-HSIEH.

LUKANOR ISLAND. See MORTLOCK ISLANDS.

LUKANG: A town in the province of Kwang-tung, China, situated about 28 miles N. by W. of Canton. Station of the Berlin Mission Society (1897), with (1903) 3 missionaries, 29 native workers, 19 outstations, 2 day schools, and 769 professed Christians, of whom 549 are communicants.

LUKOLELA: A settlement in the Congo Free State, Africa, situated on the left bank of the Congo River, surrounded by dense forests. Station of the BMS (1884), with (1903) 1 missionary and his wife, 1 native worker, 1 outstation, 1 day school. The station is also known under the name of Liverpool.

LUKUNGA: A town in the Congo Free State, Africa, on the Congo River, about midway between Stanley Pool and the station of the ABMU (1882), with (1903) 2 missionaries and their wives, 22 native workers, 19 outstations, 1,022 professed Christians, of whom 511 are communicants; 10 chapels, 1 Sunday school, 19 day schools, 1 boarding school, and 1 dispensary.

LU-LANGA: A settlement in Congo Free State, Africa, situated at the confluence of the Lulanga River with the Congo, about 50 miles N. of Equatorville. Station of the RBMU (1899), with 5 missionaries, 2 women missionaries, 1 native worker, 1 place of worship, 1 Sunday school, 1 day school, 1 dispensary. Society spells the name Lolanga.

LULL: Raymond: Born in 1235. Died in 1315. From Zwemer's biography of this first and, perhaps, greatest missionary to Mohammedans, we gather the following facts: Raymond Lull lived during a most eventful epoch. Five years after his birth the rise of the Ottoman Turks occurred, and before he was twenty Louis IX. had failed in his crusade, and the Inquisition had begun in Spain to torture Jews and heretics. As he was growing into manhood, the beneficial effects of the Crusades were being felt; physical science was struggling into feeble life; discoveries of distant lands were being made; the University of Oxford was founded, and the world as it is known, was the world of medieval legend and classic lore. The Mohammedan world was, with all Europe, in a state of ferment, and Raymond Lull was raised up to prove what the Crusades might have done if they had fought for the cross with the weapons of the Prince of Peace. Lull was a member of a distinguished Catalanian family, and when the island of Majorca was taken from the Saracens by James I., King of Aragon, Lull's father was rewarded with large estates in the conquered territory, for his distinguished services. A succession of twenty proud sovereigns, reigning from the year 1035 to 1516, and at such a court, probably in the capital town of Zaragoza (Saragossa), Lull spent several years of his life. He was a court poet, and a
skilled musician. Gifted with rare mental accomplishments, the heir to large wealth, he was a gay knight at the banquets of James II., before he became a scholastic philosopher and an ardent missionary. It was at Palma, when thirty-two years old, that he made his decision to forsake all and become a preacher of righteousness. His conversion reminds one of the experience of Saul on his way to Damascus, and of St. Augustine under the fig tree at Milan. He sold all his property, gave the money to the poor, and reserved only a scanty allowance for his wife and children. He determined to attack Islam with the steam of Christian truth and assuming the coarse garb of a mendicant, he made pilgrimages to various churches in the island, praying for grace and assistance in the work of his life. In the 13th century, Islam, the mistress of philosophy and science, had political influence and prestige; and against this mighty power this knight of Christ was to lead an attack with the weapons of love and learning, instead of the Crusaders' weapons of force and fanaticism. He entered upon a thorough course of study, mastered the Arabic language, spent much time in spiritual meditation, and at about the age of forty he entered upon the most useful part of his life, as author and missionary. His Ars Major was completed in 1275, and under the patronage of the King of Majorca this first book of his Method was published. Soon after the publication of this work, he persuaded James II. to found and endow a monastery in Majorca, where Franciscan monks should be instructed in the Arabic language, and trained to become able disputants among the Muslims. In 1276 such a monastery was opened, and thirteen monks began to study Lull's method and imitate his spirit. Lull now longed for a new Pentecost, and for world-wide missions. Fired with apostolic zeal, he went to Rome and Paris; and, altho in his fifty-sixth year, he determined to set out alone and single-handed and preach Christ in North Africa. On arriving at Tunis he invited the Muslim literati to a conference. He announced that he had studied the arguments on both sides of the question, and was willing to submit the evidences for Christianity and for Islam to a fair comparison. The challenge was willingly accepted, and after a long, fruitless discussion Lull's arguments, which strike the two weak points of Mohammedan monotheism: "Lack of love in the being of Allah, and lack of harmony in his attributes." Some accepted the truth and others became fanatical. Lull was cast into a dungeon by order of the Sultan, and, at the expiration of six months' sentence, he escaped death. After bitter persecutions he returned to Europe; but he made other missionary journeys, and in 1307 he was again on the shores of North Africa, fifteen years after his banishment. Altho he was now sixty-one years of age, despite the conditions of travel in the Middle Ages we find him visiting Cyprus, Syria, and penetrating into Armenia, striving to reclaim the various Oriental sects to the orthodox faith. In 1307 he set sail again for North Africa, and at Bugia, in a public place, he stood up bold and proclaimed Christian doctrines, that Christ and Christianity was the true faith; and once again violent hands were laid upon him. He was flung into a dungeon, and for six months remained a close prisoner, befriended only by some merchants of Genoa and Spain, who took pity on the aged missionary of the cross. He was banished again from Africa, with threats that his life would be taken if he ever returned, but with unshattered love and zeal he went there again in 1314. For over ten months this veteran of the cross dwelt in hiding, talking and praying with his converts, and trying to influence those who were still in darkness. Weary of seclusion, he, at length, came forth into the open market and presented himself to the people as the man whom they had expelled, and who desired still to preach Christ to them. He seemed to court martyrdom. He was seized and dragged out of the town, and by the weight of a Roman column which had formed part of the king, he was stoned to death. Lull's life-work was three-fold: he devised a philosophical or educational system for persuading non-Christians of the truth of Christianity, he established missionary colleges, and he himself went and preached to the Muslims, sealing his witness of Christ with his blood. There exists no complete catalog of his books, but he wrote on nearly every known subject, and in the first published edition of his works (1721) two hundred and eightieth titles are given.

LUMBIA BOLAN: A settlement in the Toba Lake region of Sumatra. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 1 native worker, 1 Sunday school and 1 day school.

LUNDU: A settlement in Sarawak, Borneo, situated on Datu Bay, about 40 miles W. of Kuching. Station of the SPG (1855), with (1903) 1 missionary, 3 native workers, 2 places of worship, 2 day schools and 60 Christians.

LU-NGAN-FU: A town in the province of Shan-si, China, situated in the S. E. of the province, about 100 miles N. N. E. of Ho-nan-fu. Station of the CIM (1889), with 2 missionaries, 3 native workers, 1 chapel, 1 Sunday school and 35 professing Christians. Name is sometimes spelled Lung-nan-fu.

LUNG-CHAU. See Llang-chau.

LUNG-TSUEN-ISEN: A town in the province of Che-kiang, China, situated about 95 miles W. of Wen-chau. Mission station of the CIM (1894), with (1903) 1 missionary and his wife, 4 native workers, 1 chapel and 1 Sunday school. The name is sometimes spelled Lung-chuen.

LUPEMBE: The name of a tribe found 100 miles E. of the north end of Lake Nyasa in German East Africa, among whom the Berlin Mission Society carry on work (1890), with (1903) 3 missionaries, 4 native workers, 2 outstations, 1 day school and 11 professed Christians.

LUTHERAN FOREIGN MISSIONARY SOCIETIES in the United States: The early Lutheran Church in the United States was predominantly German, tho with some Scandinavian and Dutch elements, and was chiefly confined to Pennsylvania. The lack of a regular ministry and the heavy struggle for a few years made the Church in earnest appeal to Europe for help. Francke, at Halle, was much interested, and at his request Heinrich Melchior Muhlenberg, who had been intending to go as a missionary to India, came to Philadelphia in 1742. While chiefly absorbed in the organization of the Church (which gave him
the title of Patriarch Muhlenberg) he kept missionary work among the Indians at home as well as that in foreign lands constantly in mind.

The first direct interest in foreign missions appears to have been aroused by the work of the Rev. C. T. E. Rhenius, a German Lutheran missionary of the CMS in India. In 1821 the General Synod at its first meeting resolved to form a missionary institute, and some aid was sent to the work of Rhenius in India. Contributions were also made to the ABCFM, then a distinctly undenominational organization. In 1833 the General Synod urged the subject upon the district synods, and in 1835 the Central Missionary Society was organized at Mechanicsburg, Pa., followed in 1837 by the German Foreign Missionary Society in the U. S. A. It was hoped that all would unite in this, but the German Reformed Church and several Lutheran churches held aloof. Soon the name was changed to The Foreign Missionary Society of the Evangelical Lutheran Church in the U. S. A. From this time until 1869 the greater part of the Lutheran churches contributed through this organization, but in that year the General Council organized its own missions and since then other Lutheran bodies have followed this example.

At first it was a question whether to begin work among the Indians in the United States or in India, but after some deliberation it was decided to commence operations in Southern India, in connection with the ABCFM, and the Rev. C. F. Heyer was appointed as missionary to that country in 1840. A year later, fearing complications from this proposed connection, he resigned and was appointed to the same field by the Synod of Pennsylvania, which had formed a separate missionary organization in 1836. He sailed from Boston October 14, 1841, and arrived in India the following spring. In June and July an exploring tour was made with a view of selecting a field for permanent residence and work. On July 31, 1842, he reached Guntur, where he commenced the work assigned him.

At the next meeting of the Foreign Missionary Society, held in May, 1843, the proposed union with the American Board was given up, and arrangements were made with the missionary society of the Pennsylvania Synod to send out another missionary with the ABCFM. In August, 1844, Walter Gunn received the appointment, and he and his wife reached Guntur June 18, 1844. They labored faithfully until July 5, 1851, when Mr. Gunn died; Mrs. Gunn soon after returned to the United States.

Meanwhile a new station had been opened in Palnad in 1849, and in 1851 the North German Missionary Society transferred the station at Rajamahendri, begun in 1845, to the American Lutheran Society, with two missionaries. Other missionaries were sent from America to reinforce the mission, but were soon obliged to return home. In 1857 Mr. Heyer, after 14 years of service, also returned to America. In 1861 a fourth station was opened at Samulcotta, and Rev. Mr. Long, who went out in 1858, was placed in charge of it and remained there until 1865, when he was obliged to go to Europe to recover his health, and was succeeded by Rev. W. M. Tennant, left with entire charge of the four stations—Guntur, Palnad, Rajamahendri and Samulcotta. It being utterly impossible for him to give proper attention to all, a proposition was made to transfer the Rajamahendri station to the Church Missionary Society.

Mr. Heyer was in Germany when he heard of this, but hastened at once to the United States and presented to the Synod of Pennsylvania an earnest protest. Negotiations with the General Synod made it evident that they would be glad to have the field remain in Lutheran hands and the CMS was entirely willing to be relieved of additional burdens. Overtures were made to the General Council, and at its meeting in Chicago, November, 1869, it formally accepted the responsibilities. During the same year the General Synod effected a reorganization of its work under a new name.

General Synod of the Evangelical Lutheran Church in the U. S. A.: Headquarters of the Board of Foreign Missions, 1005 West Lanvale St., Baltimore, Md.

The General Synod has worked through its own Board of Foreign Missions since the arrangement with the General Council in 1869.

I. India: That arrangement left under the care of the Foreign Missionary Society of the General Synod the Guntur and Palnad stations, embracing a territory about one hundred miles in length by sixty miles in width, with a population of about 1,000,000 souls, chiefly Telugus, among whom practically nothing had been done at that time. Rev. E. Unangst remained the only missionary on this field until 1871, when he was obliged to take his family to America. Remaining there only one year to recruit, he returned to India in 1872 without his family, accompanied by the Rev. J. H. Harpster. Since then the mission has been reinforced at various times, and a large force of native laborers has been raised up in the different departments of work.

At the close of 1902 there were 27 missionaries (including wives), 6 Eurasian assistants, 220 native evangelistic workers, including pastors, catechists, Bible women, etc., and 286 teachers.

The number of stations has increased to 7, while 449 congregations assembled regularly and the villages numbered 618. The buildings were 7 churches, 157 prayer and school houses, 11 mission bungalows, 1 hospital, 1 school and 1 printing house. The communicant membership was 8,386, and there were 9,163 inquirers and 35,926 under direct Christian influence. The baptisms in 1902 numbered 2,551. The Sunday school work has grown until there are 269 schools, with 465 teachers and 15,965 scholars.

Closely associated with this is the medical and Zenana work carried on by 5 missionary women, with 4 assistant women and 52 teachers. Of these, 9 are especially engaged in the home work, visiting 115 homes and instructing 150 Zenana pupils. In the hospital there are 650 patients, while the dispensary patients were 15,759.

In common with other successful missions in India, considerable attention is paid to education. The policy of the mission is to educate the children as far as the primary grade, when they are sent to the branch schools at Guntur, where are the college under the presidency of the Rev. L. B. Wolf, D.D., a boarding and training school for boys, etc. The report for 1902 shows in the college 7 Christian, 21 Hindu and 4 Mohammedan teachers, 73 Christian, 552 Hindu and 50 Mohammedan pupils, a total of 675. The year showed an increase of 87 in attendance and an income amounting to 88 per cent. of total ex-
penses aside from the missionary's salary. The total number of elementary schools is 232, with 286 teachers and 6,700 pupils, of whom 3,151 were Christians and 3,549 non-Christians; 4,404 boys and 2,296 girls.

2. Africa: In 1859, through the long-continued efforts of Rev. Morris Officer, a mission to Africa was decided upon, and Mr. Officer was appointed to superintend its establishment, and, with the Rev. Henry Heigerd, arrived in Liberia April 5. The location selected, and still occupied by the mission, is a high bluff on St. Paul's River, about thirty miles above Monrovia. A grant of one hundred acres of land was secured from the Liberian Government for a mission farm, as a reserve of two hundred acres more for future settlers about the mission. Suitable buildings were erected, and a short time afterward 40 children were secured from a large number of recaptured slaves that had been landed at Monrovia. These children were bound to the mission by the government, were then named after well-known women in the church at home, and thus the Muhlenberg Mission was begun, and the foundation laid of the Christian settlement which has since grown up around the mission. A native Christian church was organized in 1891, is self-sustaining, and there are two other churches and five outstations. The pastor was one of the slave children with whom the mission was started and a corps of native workers has been developed. The industrial department has always been one of the special features of this mission, and its coffee plantation was long relied upon to meet many of the current expenses. Difficulties in marketing the coffee emphasized the mercantile side so much that there was a general feeling that the distinctively missionary element was being crowded out, and of late the coffee farm occupies a minor place in the view of the missionaries. Meanwhile, educational and general evangelistic work is being pursued very vigorously, both in Liberia and in the surrounding districts, from which come appeals for teachers and preachers.

A Woman's Home and Foreign Missionary Society of the General Synod of the Evangelical Lutheran Church in the United States was organized in 1879 and carries on work in India, Liberia and the United States, employing 12 foreign missionaries. It publishes a children's missionary magazine and organizes missionary meetings. It has 20 synodical and 584 auxiliary societies, with about 20,000 members. Its headquarters are in Baltimore, Md.

A number of Lutheran bodies which have no separate missionary organizations contribute through the General Synod.

India: The foreign mission work of the General Council was commenced in 1869, when the stations of the North German Missionary Society at Rajamahendri and Samulcottta, Southern India, were transferred to its care by the General Synod. The work is now in charge of the Foreign Mission Committee of the General Council, and comprises the districts of Rajamahendri, Dowlaishwaram, Samulcottta, Tallapudi, Velpur, Jagurupad and Bhimavaram. There were (1903) 6 missionaries, assisted by 372 native pastors and 140 evangelists, catechists and teachers. The whole number of mission workers employed is 157, of whom 5 are Zanana Sisters, 2 devoting their whole time to dispensary and hospital work. Special attention is paid to educational work and there are over 4,000 pupils in the various schools established in 120 villages, those of the Zanana Mission being conducted at Peddapur. The extent of the evangelistic work is indicated by the number of baptized Christians (adults and children), given as 6,159, in the 210 villages where preaching is conducted.

Liberia: The mission was founded at Monrovia by Rev. J. A. Scherer, and is conducted by the Lutheran Church in America, with headquarters at 33d and Diamond Sts., Philadelphia, Pa.

United Synod of the Evangelical Lutheran Church in the South: Headquarters of the Board of Missions and Church Extension, 376 Spring St., Atlanta, Ga.

This society was organized in 1886, but did not commence distinct foreign work until 1892, when a missionary, the Rev. J. A. Scherer, was sent to Saga in Japan. There are now (1903) three ordained missionaries, one of them being Rev. R. B. Peery, Ph.D., author of The Gist of Japan, etc. There are also 3 native evangelists at work in Saga and Kumamoto and the 3 Sunday schools have 120 pupils. The number of church members reported is 77 and there are about 150 in the Christian community.

Several synods combine in this work, as also three organizations conducted by women.

LUXOR: A village on the left bank of the Nile, situated 2 miles S. of Karnak, on the site of ancient Thebes, and having magnificent ruins of temples in a rock-bound valley. The name is from the Arabic El Kuer (The Palaces). Station of the UP (1875), with 1 missionary and his wife, 1 woman missionary, 11 native workers, 5 outstations, 1 Sunday school, 1 boarding school, 3 day schools and a boat on the Nile for missionary work.

LYALPUR: A growing city in the Jhang district of India, situated about 100 miles W. S. W. of Lahore. Station of the Reformed Presbyterian General Synod, with (1900) 1 missionary, 2 native workers, 1 outstation, 63 professed Christians, 1 place of worship and Sunday school. The Synod has another station, Station of the UP (1869), with (1903) 1 missionary and wife, 4 women missionaries, 36 outstations, 4 Sunday schools, 4 day schools and 110 professed Christians.

LYDD, or LYDDA. See LYDD.
LYDENBURG: A town in Eastern Transvaal, Africa, south of the Limpopo River, northeast of Pretoria. Population, 2,000. Station, of the Berlin Mission Society (1866), with (1903) 1 missionary, 19 native workers, 9 outstations and 1,921 professed Christians, of whom 992 are communicants. Name also written Leidenburg and Lydenburg.

LYMAN, Henry: Born 1810, in Massachusetts; graduated at Amherst College 1829, Andover Seminary 1832; studied medicine and sailed with Rev. Samuel Munson, 1833, under the ABCFM, with instructions to explore the Indian Archipelago. Landing at Batavia, April, 1834, they visited Padang in Sumatra and the Butu group of islands, spending there a month, and collecting much valuable information. Thence they went back to Sumatra, intending if practicable to visit the Battas of the interior. They were advised, on account of dangers, not to attempt it.

But as others had visited the interior with safety they ventured to proceed, and June 23 set out on foot with a few native assistants, among them an interpreter. After five days' journey they came to Sacca, a region where war was raging between the villagers, and they were soon surrounded by two hundred armed men, and Mr. Lyman was shot and Mr. Munson pierced with a spear. A terrible punishment was inflicted on the murderers. The people of the neighboring villages having learned that the strangers were good men, who had come to benefit the Batta people, leagued together, burnt the village of Sacca, killing many of the inhabitants, and destroyed their gardens and fields. The death of these men produced a deep sensation throughout the Christian world. Mr. Lyman was the author of Condition of Females in Pagan Countries. Lyman (Miss), The Martyr of Sumatra, New York, 1859: Thompson, Rev. (W.), Samuel Munson and Henry Lyman, New York, 1859.

MABUMBU: A village on the highlands E. of the Zambesi valley, Africa, situated 13 miles E. by N. of Luluyi. Station of the Paris Evangelical Mission Society (1890), with (1903) 1 missionary, 1 native worker, and 1 day school.

MACAU: A town on an island of the same name in Canton River, China, situated 38 miles W. by S. of Hongkong. It is divided into two parts—Chinese and Portuguese. It was here that Camoes composed much of his Lusiad in 1559. The town was rented to the Portuguese in 1856, but the treaty was revoked in 1868, and the Portuguese now hold Macao with two adjacent islands as a colonial possession. Population (1896), 78,627, of whom 74,568 are Chinese. Mission station of the CA. The Canton College (PN) is temporarily established at Macao.

MACASSAR LANGUAGE: A Malayan dialect, spoken in the island of Celebes, Dutch East Indies. It is written with characters special to the dialect. The full form of the name is Maqasar.

MACEDONIA: Name given by foreigners to the Turkish provinces of Kosovo, Monastir, and Salonica, in the main coincident with a part of the ancient Macedonia. Mission work is carried on there by the ABCFM, the Church of Scotland missions to the Jews, and the BFBS.

MACEDONIAN-ROUMANIAN LANGUAGE: A dialect of the Rumanian, which is spoken by Wallachs settled in European Turkey. When written, the Slavic (Cyrillian) letters in their modern form, or modified Roman letters, are used.

MACFARLAN: A town of Cape Colony, Africa, situated 12 miles N. by E. of Alice. Station of the UFS, with (1903) 16 native workers, 6 outstations, 1 place of worship, 7 day schools, and 564 professed Christians.

MACKAY, Alexander M.: Born at Rhynie, Aberdeen, Scotland, October 13, 1849; a son of a minister of the Free Church. At three years of age he read the New Testament; at seven, Milton's Paradise Lost, Gibbon's Decline and Fall of the Roman Empire, and Robertson's History of the Discovery of America. His father taught him geography, astronomy, and geometry, stopping in their walks to demonstrate a proposition of Euclid, or illustrate the motions of the heavenly bodies, or trace the course of a newly discovered river of the Dark Continent with his cane in the sand. He listened with interest to letters and conversations of men of science, as Hugh Miller, Sir Roderick Murchison, and others, who were sometimes visitors at the manse, sometimes in correspondence with his father. He chose engineering as his profession, and for some time he was draughtsman and designer to a large engineering establishment in Berlin. In 1873, in response to an appeal from the CMS for a practical business man to go to Mombasa, he offered himself, but another person had been secured. Later in the year an offer of a highly lucrative secular position was made him, but he declined it, that he might be ready, when the Lord should permit him, to go to the heathen. Early the next year he was appointed by the CMS to go to the Victoria Nyanza, reaching Zanzibar May 29, 1876. In November, on the march through Ugogo, he was taken very ill, and was sent back by Dr. Smith, but recovered before reaching the coast. Instructed by the secretary not to return before the close of the rainy season, he constructed 230 miles of road to Mpwapwa. In November, 1878, he reached Uganda. Alluding to the kind treatment he had received from the natives, he says: 'Wherever I find myself in Stanley's track, I find his treatment of the natives has invariably been such as to win from them the highest respect for the face of a white man.' Mr. Mackay had acquired a knowledge of the Swahili language, and was able immediately to print portions of the Scriptures (cutting the type himself), and to read and explain them to the king and his people. King Mtess showed much interest in the truth.

In 1884 the native church consisted of 86 mem-
MACKENZIE, J. Kenneth, M.D.: A medical missionary of the LMS; was first appointed to Hankau; he took charge of the mission hospital there till 1878, when in the autumn he was transferred to Tientsin. A dispensary was opened in the Viceroy Li Hung Chang’s theater, with a female department, and large subscriptions were made by the Viceroy and other high officials toward the building of a hospital. In 1881 the hospital, on the premises of the London Mission, was opened by the Viceroy, and plans were adopted for a medical school, to which the students formerly sent to the United States of America by the government were sent to be trained as doctors, and a thorough organization of a medical staff for the Chinese army and navy was in course of formation. Amid his arduous duties Dr. Mackenzie found time to pursue evangelistic work, both among the poor patients and those “in Caesar’s household,” for the favor of the Viceroy secured him access to many of the high officials. The work at Tientsin grew and enlarged, so that in his last report, 1887, he gave the number in attendance at the dispensary as 33,799, in-patients in the hospital 591, and 9 medical students. He was called suddenly away from his work by death, April 1, 1888.

MACLEAG: A settlement on Lake Alexandrina, S.E. of Adelaide, South Australia; it was founded in 1858 by the Scotchman, Taplin, who translated parts of the Bible into Irriniryeri, wrote a grammar of the tongue, and made a careful study of 22 native dialects.

MACLEAR: A town of Cape Colony, South Africa, situated in Griqualand East. Station of the Episcopalian Church in Scotland (1896), and SPG, with (1900) 4 missionaries, 5 native workers, 3 outstations, 3 chapels, 3 day schools, and 116 Christians.

MACUATA: A settlement on the S. side of Vanua Levu, Fiji Islands, situated near Cacau-drove. Station of the Australian Wesleyan Mission, with (1900) 1 missionary and his wife.

MADAGASCAR: An island in the Indian Ocean nearly parallel with the eastern coast of South Africa, from which it is separated by the Mozambique Channel, which varies in width from 220 to 301 miles. Its northernmost point is 11° 57' 30" south latitude, and the southernmost is in 25° 38' 55" south latitude. Its breadth is at the widest point over 7° of longitude. Its extreme length is 975 miles, and its breadth varies from 250 to 350 miles. Its area is about 230,000 English square miles. It is the third largest island in the world, ranking only below Borneo and New Guinea.

Madagascar has a coast-line of over 2,000 miles, and on the north-western, northern, and north-eastern coasts there are many good and some excellent harbors; but south of latitude 13° there are very few roadsteads where a vessel can ride in safety, either on the east or west coast.

The island is of volcanic origin, and has many extinct volcanoes and some which, if not now active, have been so within the historic period. In general structure includes three or four ranges of mountains, not parallel, but extending from north to south, with many spurs; these are in the central portions of the island, the nearer to the east than the west coast. Some of the ranges extend nearly to the northern limit of the island, and others to the southern coast. This mountainous region constitutes the finest portion of the island. Immediately below this region is a forest region varying in latitude from 1,500 to 4,000 feet, and in breadth from 30 to 50 miles. From the forest belt to the coast extends the alluvial region, flat, low, and marshy, and from 20 to 30 miles wide on the east coast, but from 40 to 60 on the west coast. It is sickly and hot, the decaying vegetation producing fevers and miasmatic diseases.

The climate is temperate and healthful, in the highland provinces, the temperature rarely above 85° F. in summer, 40° F. in winter, in the mountains, where it sinks to 32° at night perhaps once or twice a year. In the forest belt, less healthful and more moist, and at times hot; in the more open timber the climate is delightful. In the littoral region the heat is intense, and the Madagascan fever prevalent, and very often proves fatal to those who are not fully acclimated.

Natural History and Products: Madagascar is remarkable in its zoology. There are no great beasts of prey. The lemur takes the place of the various families of monkeys; there are several species of ant-eaters, two or three civet cats, the aye-aye, an animal found nowhere else, and there are several rodents. Reptiles are numerous, but, except the crocodile and three or four species of pythons, are generally harmless. Birds are numerous, and many of them of beautiful plumage. About two-thirds of the birds are peculiar to the island.

The fish are plentiful, and many of them of edible species. Most of the domestic animals have been introduced, and cattle and sheep are raised and exported in great numbers. Wild dogs are the most numerous as to numbers.

The flora of Madagascar is abundant, and about 700 out of 3,000 species are peculiar to the island. Many of them are of exquisite
Madagascar

THE ENCYCLOPEDIA OF MISSIONS

beauty. It is a paradise for the orchids, more and more beautiful species being found here than in all other countries. The forests abound in peculiar and valuable timber.

Ethnology and Tribal Divisions: The origin of the Malagasy and their race affinities with the other Oriental tribes have led to great controversies among the most eminent ethnologists. It is generally agreed that the original inhabitants of the island were from some of the African races, and most probably Zulus or Kaffirs. The dark, they seem to have been negroites rather than negroes. Some small remnant of them were still living in 1843, and it is believed that a few are yet to be found in the southwest.

In regard to the present inhabitants of the island, known as the Malagasy, these facts are settled: They all speak the same language, the dialects differing no more than the Yorkshire and Lancashire do in England; and this language is of very close kindred with the Malay. There is a marked difference in color, features, and hair among the different tribes: some are of fine stature and physique, but very dark, with curly or frizzled hair; their complexion is more Polynesian than negro; others are of lighter complexion, with straight or very slightly curled hair, generally of good height, and well formed. The Hovas, who have been the ruling tribe, are generally somewhat below the middle stature, of a light-olive complexion, frequently fairer than the Spaniards, Portuguese, or Italians. Their hair is black, but soft, fine, and straight or curling; their eyes are hazel, their figures erect and, tho' small, well proportioned; the hands and feet small, and their gait and movements agile, free, and graceful.

The theory of their origin which is best supported seems to be that these tribes are of Malayan or Malay-Polynesian stock; that they came to the island at different times, crowding the aboriginal inhabitants beyond their means, and in the case of the Betsileo tribe south of Imerina, perhaps, intermarrying with them.

In 1810 the principal tribes of Madagascar were: 1. The Sakalava, divided into the northern and southern tribes, occupying the western coast, and including many smaller clans; their number was estimated at 1,500,000. 2. The Betenisimara, with several clans, and including the Betanimena, occupying the east coast, about 1,500,000 more. 3. The Shakanaka and Tanakana, northeast provinces; about 500,000. 4. The Bara and Tansala and some smaller tribes, in the southeast, 500,000. 5. Imerina, the land of the Hovas, then about 600,000; and 6. The Betsileo, 1,200,000. The last two were the highland provinces.

Social and Religious Conditions: They discovered in medieval times, no effort was made by Europeans to explore or colonize Madagascar till 1500, when the Portuguese, after some exploration in 1540, undertook to enslave and Christianize its inhabitants. They made repeated efforts to this end in the next hundred years, landing small colonies and establishing trading-posts, whence they sold the people who came under their power as slaves. These natives were Sakalavas, who did not choose to be the prey of European slave-dealers, and massacred the Portuguese colonists and priests in 1548, 1585, 1600, and 1615. The English and Dutch made several attempts to plant colonies at various points on the coast of the island between 1595 and 1640. Both nations were at that time engaged in the slave trade.

In 1642 the French undertook to colonize Madagascar, and within the next 170 years they had organized several great slave-trade stations, and planted many colonies, in which Lazarist and Jesuit priests were always conspicuous; but owing to their maintenance of the slave-trade, and their treacherous dealings with the natives, four or five of these colonies were attacked and massacred. The last of these societies was obliged, in 1686, to surrender its charter and its whole property to Louis XIV., King of France, who claimed, but never exercised, authority over it. For the next thirty or thirty-five years the northern part of the island was the most formidable rendezvous of pirates who infested the Indian Ocean. They treated the natives well, and several of the tribes were on friendly terms with them; but their rendezvous was finally broken up in 1723. It was not until 1754 that another attempt was made by the French to plant a colony on Madagascar, and this was broken up by a massacre; and during the war between France and England, in the year 1811, the only two remaining trading-posts, Tamatave and Foule Point, with a mere handful of men in each, were surrendered to the English, as the sole possessions of France in Madagascar.

In all these 170 years of French occupancy there is no mention of more than one Malagasy convert. He had been taken to France and educated, and was killed by his own countrymen with some French priests murdered in 1663. The social condition of these tribes at the beginning of the 19th century was deplorable. They were in continuous war with each other, taking captives to sell as slaves to any foreign merchant who was willing to buy. In fact, the staples of Malagasy trade being slaves and rum, the state of morals was as low as it could be.

The religious system of the Malagasy exercised no influence on their moral natures, and indeed made no pretense of doing so. It was simply supposed to confer upon them temporal benefits; why or for what service on their part does not appear. Their religious system was not as artificial as that of the Canaries or any other nations. They believed in a supreme being who ruled over all; they also had an idea of subordinate deities, who ruled over certain places, persons, or interests. They also paid a sort of homage to their deceased ancestors, but reared no temples or statues to them. There being no idol temples, there were few idolatrous processions, no priestly class in rich robes and exulting almost regal power.

In the place of priests were "medicinemen," who were masters of divination, and who professed to discover crime by the ordeal of administering poison to the suspected one. As to religious worship in public, on certain great feasts, such as the new year, the curious fetishes which served for idols were brought out and during five days were carried about in procession. Meantime all law was in abeyance and the most horrible licentiousness prevailed.

The government of the various tribes was by chiefs. It was not necessarily hereditary, tho' confined to the class of nobles (Andrianas), and was as often, perhaps, in the female as in the male line, and there was much intrigue, and
sometimes bloodshed, before the ruler was selected. Once on the throne, however, the chief's government was an absolute despotism, sometimes "tempered by assassination." There was no written language in any of the tribes; the decrees of the sovereign were promulgated by heralds. The government was feudal in its character; the chief and the nobles held the tribe in bondage; they owned all the land, and the people as serfs; the rulers were the nobles required by any work done, the clansmen were called out and required to perform the service, providing themselves with food and clothing for the time required. This forced service was called fanem-poama, and it existed in a modified form until some time after Madagascar became a French colony.

For the most part, during the 17th and 18th centuries, the Sakalavas, who were divided into two great tribes—the Northern and Southern Sakalavas—seem to have been in the ascendancy. The Hovas and Betsileo were at this time under the protection of the Portuguese, the French, the Dutch, nor the English had ever heard of them except in terms of contempt. They were the dogs, the slaves of the Sakalavas. But in 1758 an Andrian, or chief, of the Hovas, called Impomimerina (the desire of Imerina), succeeded in uniting the divided clans of the province of Imerina under his own authority, and by his superior abilities and diplomacy gained to his cause several of the smaller adjacent tribes; but while he proceeded to subdue most of the forest tribes, he was not compelled to pay tribute to the Sakalava of the western coast. Between 1808 and 1810 he died, and his son, trained in part by Arab teachers, and not over 17 years of age, was proclaimed as Radama, King of the Hovas.

Radama was a very remarkable man. It was his purpose from the day he ascended the throne to throw off the Sakalava yoke and make himself king of Madagascar. To carry out this purpose he negotiated a treaty with the English Governor of Mauritius, Sir Robert Farquhar, by which in return for a promise to suppress the export of slaves from Madagascar, the king was to receive yearly from the English Government money, arms, ammunition, etc., etc. This treaty was ratified after much difficulty October 11, 1820.

Meanwhile, early in 1818, without waiting for the final ratification of the treaty, the LMS sent two missionaries, Rev. S. Bevan and D. Jones, with their families, as their first missionaries to Madagascar. Messrs. Bevan and Jones landed at Tamatave August 18, leaving their families in Mauritius. They were kindly received by some of the chiefs, and collected together a number of children, whom they taught, and made some studies in the language. Two months later they brought their families to Andovoranto, on the coast, where a station was established. But soon all were attacked with the deadly Madagascar fever, and before two months had passed Mr. Jones was the sole survivor of the two families. Mr. Jones was obliged to go to Mauritius to recuperate, and did not return to Madagascar until October 4, 1820. King Radama welcomed him cordially, and gave the fullest permission for English Protestant missionaries to settle at his capital. The LMS, at a great opportunity, sent forward their missionaries, teachers, and artisans as rapidly as practicable, and very soon the mission work was actively prosecuted in all directions. The first work, of course, was the acquisition of the language and its reduction to writing. The missionary teachers were preparing books in the Malagasy language; the artisans were teaching the people carpentry, weaving, tanning, and blacksmith work; and a printing-press having been sent out, and fonts of Malagasy type cast in England, they were soon printing school-books of the portions of the Scriptures, and instructing the young and teachable Malagasy boys in the art of printing. No missionaries ever worked harder, and none had more evident manifestations of the divine blessing on their labors. Necessarily, the schools held a prominent position in their work for the first few years. Nearly 100 schools were established in the capital and its vicinity, and between 4,000 and 5,000 pupils of both sexes passed through them before 1828, having received the elements of a good education. The instruction in the arts and trades was also making great progress. A church was organized from the English residents in the capital, and the small in numbers, it was very active in Christian work, and those who understood the Malagasy tongue were encouraged to gather the young Hovas for religious instruction and singing. Two congregations of natives, for Christian worship were formed in Antananarivo, and very fully attended; others were formed in villages around the capital. In January, 1828, the Gospel of St. Luke in Malagasy was put to press, and other portions of the Scriptures were printed as rapidly as they could be properly prepared.

It was at this time, when the missionaries were beginning to feel encouraged at the great success which seemed to be within their grasp, that King Radama died, on the 27th of July, 1828. Radama was not a Christian, and his death, at the early age of thirty-six, was undoubtedly due to his excesses. But he had many good traits: he was patriotic, manly, and truthful; he was far-sighted; ambition led him to desire the improvement and elevation of his people, and without any convictions of the necessity of personal religion, he was persuaded that Christianity would be a better foundation for Bible than any other; and as he was a Christian of such a ruler, at such a time, seemed the severest blow which could be inflicted upon this infant mission. Radama had selected his nephew as his successor, if he left no son; but one of his twelve wives contrived to secure the throne, which she ascended as Ranavalona I. Her first official act was the putting to death of all the near relatives of the late king, and all the officers who had been most attached to him. Some of these were spared, but others of the highest rank, and among them the mother and sister of Radama, and his husband of the latter, were starved to death.

No one was left alive who could contest her claim to the throne. The British resident, Mr. Lyall, was ordered to leave the country at a few hours' notice, and his family were subjected to gross insults. The missionaries and their followers were naturally alarmed at these indications of a coming storm of persecution.

In 1829-1831 the queen was engaged in war with the French, whom she defeated. The revolution in France prevented a renewal of the invasion, and the queen turned her armies upon the coast tribes, ravaging their lands and slaughtering the inhabitants during three years.

During this period she found little time to
persecute the Christians, among whom she believed there were very few natives; while she hated the missionaries, she was disposed for a time to allow them to improve the minds of the people. Accordingly, at the end of six months after Radama’s death, the missionaries were permitted to resume their labors, and the schools, the translation of the Scriptures and other books and their printing went forward rapidly; the New Testament translation was completed and soon after, by the aid of the British and Foreign Bible Society, its printing was commenced. Through the children in the schools, and those who had gone out from them, these portions of the Scriptures were widely circulated; and when in 1832 all the boys above thirteen years of age in the schools were drafted into the army, large quantities of these and other good books were widely circulated. In 1833 not less than 15,000 copies of parts of the Scriptures were finished, and upward of 6,000 of them were sent out.

Meanwhile there were many converts. On the 29th of May Mr. Griffiths baptized twenty, and the first native church was formed. In the course of a few months there were several churches with nearly 2,000 members. Then the queen withdrew the permission to baptize converts, forbade the use of wine at communion, and those of her officials who had been baptized were put into inferior positions. Before 1833 the attempt was made to divest the education given in the schools of any religious character. In July, 1834, the queen forbade any native except those in the government service to learn to read or write. This and other proclamations indicated that the whole force of the queen’s displeasure was to be visited on the native Christians; and a few who had manifested some friendship with Christians (though not one of those who had received baptism) began to withdraw from them, and associate with the heathen portions of the community.

Ratsimanisa, who had been the commander-in-chief of the army, and about this time became prime minister to the queen, was the chief persecutor of her subjects and crueler than even her brutish nature demanded. It was clear to him that if Christianity was not arrested the idolatry of the country would be overturned, and the customs of their ancestors forgotten; and in January, 1835, at his instigation, a formal accusation was made against the missionaries, speaking of Rimahinian, before the chief judges of the Hovas, and the following charges were preferred: 1st. They despise the idols; 2d. They are always praying; 3d. They will not swear, but merely affirm; 4th. Their women are chaste; 5th. They are of one mind with regard to their religion; 6th. They observe the Sabbath as a sacred day. It seems that their enemies could allege nothing against them, “except it were concerning the law of their God.”

Five of the missionaries were now ordered to leave the island on the ground that their permits of residence had expired. On the 26th of February, 1835, several officers, headed by Ratsimanisa, entered the chapel at Ambatomanka in the capital and read a letter from the queen addressed to the missionaries, forbidding religious worship, the rite of baptism, and the assemblage of a society, to her subjects. The Europeans were permitted to follow their own customs and religious practices, but they could not be allowed to teach them to the subjects of Ranavalona. They would be allowed to teach such arts and sciences as were not sacrilegious or offensive to her subjects, but nothing beyond these.

A great mass meeting, or kabary, of all the people was now called for March 1. There was firing of cannon and musketry, and the soldiers surrounded the multitude to inspire them with terror, and then the principal judge addressed the people in kabary. He was reading a long message from the queen, calling upon all who had been baptizing, all who had worshiped and kept the Sabbath, or had entered into a Christian society, to come forward and accuse themselves, and confess such crimes, under pain of death. Ratsimanisa repeated the substance of the queen’s royal message, and some of the head men replied to it with severity. Others seemed reluctant to make reply, when Rainiharo, one of the queen’s chief officers, and for twenty-five years a prime minister, the bitterest of persecutors, said that unless the people rose forward within a month to accuse themselves, the officers and judges would go to their heads. The queen reduced the time for confession to a week. About two thousand confessed, and on the 9th of March, 1835, she pronounced sentence on them. Some hundreds of Christian officers were degraded and about 1,600 persons were in government service confined, while any Malagasy seen in company with a missionary was ordered to be put in chains. All portions of the Scriptures and other religious books were ordered to be given up, under the severest penalties; but many were concealed, and gave comfort to the persecuted ones in after years. All religious meetings were prohibited, and spies commissioned to hunt the Christians and their forbidden books.

Altho in June and August, 1835, Messrs. Cameron, Freeman, Chick, and Kitching left Madagascar by order of the queen, Rev. Messrs. D. Johns and E. Baker remained to give what comfort and help they could to the little band of faithful disciples. They also determined to complete the translation and printing of the entire Scriptures and of the Pilgrim’s Progress. Their Malagasy assistants and interpreters had been compelled to leave them, but the two told off, till they had completed both books, and printed an edition of about one thousand copies, which were soon absorbed by the Christians, who concealed them, as far as possible, from the government spies. Probably the large part were eventually confiscated, but a considerable number came to light after Ranavalona’s death. Being again ordered to leave the island, Messrs. Johns and Baker departed in July, 1836, but not till they had bid the converts an affectionate farewell, praying at great risk in the old chapel at Ambatomanka from the text, “Lord, save us; we perish.” They retreated to Mauritius, but Mr. Johns, at least, visited the island more than once, and in 1840 penetrated to the capital, where he found to his sorrow that many of the disciples had been called to suffer martyrdom, while nine at the time of his visit were put to death at Ambabipotsy. Mr. Johns made great efforts to secure the escape of some of the Christian fugitives to Mauritius. A few did escape but the strict watch kept up by the queen rendered it almost impossible for them to evade her spies. In 1849 Mr. Johns again visited the
French island of Nosi-Bé, near the northwestern coast of Madagascar, but succumbed to the fever, and died a martyr to his zeal for the rescue of the Malagasy converts.

Greatly to the astonishment of Queen Ranavalona, her plan for extinguishing Christianity in Madagascar signal success, and closed. She closed the schools; prohibited all religious meetings; sent away all the missionaries; confiscated all the Scriptures and religious books she could find; degraded, fined, and whipped the Christians, and threatened them with severer punishments; and yet their number was increasing every day. She determined upon severer measures, for she had sworn a solemn oath to root out Christianity if she had to put every Christian to death.

Early in 1836 Rafaravavy, a woman of high rank, was accused of Christianity, and was condemned to death; but the queen, being alarmed by a great fire in the capital, spared her life, but fined her heavily. The avowed executions for professing Christianity did not begin until August, 1837, when a prayer-meeting was discovered and broken up. The storm of persecution now increased in violence, and a large number of Christians were condemned to death. They were hanged or whipped, and suffered for Christ's sake, but none of them turned back to the vile life of the heathen; and, what was especially astonishing to the queen, there were scores of adherents to the new faith for every one whom she put to death. The persecution raged fiercely in 1839, 1840, 1841, and 1842.

The years from 1843 to 1848 were marked by a decided lull in the persecution. The queen was in difficulties with both England and France, and her attention was diverted from the Christians by the incidents of the war. In this lull of the persecuting spirit the Gospel made great progress. The queen's son, Rakoto (afterward Radama II.), took a great interest in the Christians, and it is said professed conversion; Prince Ramonja, his cousin, was already an active Christian, and had suffered for the faith, and, among others of noble rank, the son of Rainiharo, the prime minister of the queen, and the most violent persecutor among the Hovas, had joined the Christians. The native preachers preached and baptized almost openly in the suburbs of the capital, and very many were added to the church in a very short time. Suffering, however, continued in the early months of 1849. Some of the Christians were hurled over the cliffs; some were burned at the stake—many were crucified.

Every possible indignity was inflicted upon those who were condemned to death. These executions were continued till hundreds had perished. In addition to those who endured the extreme penalty of death by these various modes of destruction, a far larger number suffered in other ways, and in very many cases their sufferings terminated in death or helplessness. Thirty-seven preachers, with their wives and families, were consigned to a life of irredeemable slavery. Altogether, in the early spring of 1849 probably more than 2,000 were thus punished and tortured as Christians or friends of Christianity. This cruel persecution went on for years. Numbers fled to the mountains, or hid themselves in the depths of the neighboring forests, eking out a scanty subsistence, until want and exposure put an end to their lives. Others constructed hiding-places in their own houses, in their rice-pits, and on their own farms, and were there tended and supplied with food by their relatives for years, reappearing long after they had been accounted dead. All the testimony, both heathen and Christian, shows that not only was there no recantation among these converts to Christianity, many of whom were illiterate and but recently brought to Christ, but that they bore the gross indignities and the cruel and terrible deaths to which they were subjected with quiet heroism and unaltering trust in God. "Let us go and see how these Christians behave: they are said not to be afraid to die," were the words of the principal officers of the royal household. The same officers said afterward: "We were near, and saw all that took place. The Christians were not afraid, and did not recant."

Their fortitude and courage produced a deep impression on the minds of the people. Many said: "This is the finger of God; there must be something divine in this belief," and they were led to become Christians notwithstanding the peril to which it exposed them.

This persecution continued with great fury till 1852, when the death of Rainiharo, the prime minister of the queen, threw the influence of the persecutions into the hands of the queen, who was exalted in favor of Christianity; and of his cousin Ramonja, who was an active Christian—were instrumental in producing greater toleration.

During this period of comparative quiet, Rev. William Ellis, Foreign Secretary of the London Missionary Society, made three visits to Madagascar, in the hope of bringing comfort to the suffering, faithful disciples in Imerina, in 1853, 1854, and 1856. In these visits he was able to cheer and comfort many of the Christians, to distribute many copies of the Malagasy New Testament, and in his third visit to make the acquaintance of the young Prince Rakoto (later Radama II.). He was also presented to the queen, who treated him courteously, but coldly. Three months after his last visit, on the 3d of July, 1857, the last great persecution commenced. On that day the population of the capital were driven from their homes by the soldiers to a great National Assembly. The queen announced her determination to stamp out Christianity. All suspected persons were imprisoned, and daily meetings were held in the city and its neighborhood to denounce the Christians. It was believed that this was the most fatal of all the persecutions. A large number were sentenced to the tangena ordeal, by which many died, and many more were put in chains and reduced to slavery. This persecution was maintained for nearly three years. But in the autumn of 1856, the queen died. She had reigned thirty-three years, and twenty-five of those years had been marked by vain efforts to root out Christianity from the island. The result had been that those who were persecuted "went everywhere, preaching the Word." Christian life had attained a depth, power, and reality which would have been impossible in a time of ease and prosperity. Several thousands had been put to death in various ways. Yet the little company of believing men and women, left as sheep were before the wolf, since 1836, had multiplied at least twenty-fold in 1861.

On the 18th of August in that year, Prince Rakoto, the son of Ranavalona I., succeeded his mother with the title of Radama II. "The sun
did not set on the day on which Radama II. became King of Madagascar,” says Mr. Ellis, “before he had proclaimed equal protection to all its inhabitants, and declared that every man was free to worship God according to the dictates of his own conscience, without fear or danger.”

Within a month after the massacre eleven houses were opened for the worship of God in the capital and great numbers in the adjacent country, and churches were being erected everywhere, and filled Sabbath after Sabbath with rejoicing worshippers. Within a very few years memorial churches were erected on the chief places of martyrdom. Thus, Antananarivo became famous alike for its churches and palaces.

Radama II. invited the missionaries of the LMS, and especially his friend, Rev. William Ellis, to return. Mr. Ellis reached the capital in June, 1862, and was followed by three ordained ministers, a medical missionary, a teacher and a printer, who were all soon busy resuming the work laid down in 1836. Christianity had triumphed. The 2,000 adherents to the Christian cause, who then braved the rage of the persecuting pagans, numbered in 1866, only about one-fifth of them baptized believers, but all witnesses for Christ, and ready to suffer and die for Him. Back of these were more than 100,000 who, tho not believers, had rejected idols and were ready to embrace Christianity.

Radama II. was a man of fair abilities and of a kindly and amiable disposition. He had, in the later years of his mother’s life, been very heartily in sympathy with the Christians, and had boldly defended them, sometimes at the peril of his own life. He had never united with any of the churches, nor did he profess to be a Christian after he came to the throne. But he cordially invited religious teachers to come to the country, and extended the invitation to foreign traders, at the same time abolishing all export and import duties. The immediate result of this was that the cheap, vile rum of the Mauritius was poured into the island in immense quantities, and the great trade in bullocks and other commodities was paid for in this horrible stuff. The king now became intimate with a Frenchman named Lambert, who led him into intemperance and the vices. Meanwhile the king signed contracts conceding to Lambert over one-third of the arable land of Madagascar, the privilege of working all its mines, and of bringing in as many Jesuits as he wished. The king also surrounded himself with dissolute young men who controlled appointments and really governed the realm. The devotion of the king to these boon companions led to a revolution, and Radama II. was strangled, being succeeded by the queen, Rabado.

In all her relations with the missionaries and Christians, the queen, who took the name of Rasoherina, was a good and just ruler, and during her reign the churches prospered, and the mission work went on. She died April 1, 1868.

On the 2d of April, 1868, Ramona, a niece or cousin of the late queen, was proclaimed Queen of Madagascar under the style of Ranavalona II. The prime minister, Rainilairiany, a man of extraordinary ability, was not, probably, the first time a Christian, tho he had been for years a student of the Scriptures. One after another changes were now made, and it soon became understood that Madagascar was to be a Christian kingdom, and that Ranavalona II. was to be the first Christian queen of the island.

On the 3rd of September, 1868, the first public occasion when the sovereign formally appeared before the people took place. It was celebrated with great pomp and ceremony, and prayers were offered by one of the native pastors. On the 19th of February, 1869, the queen, following the example of former queens, was married to the prime minister, Rainilairiany. Two days later, after a very careful and thorough examination, the queen and queen-mother were invested in the worship of her ancestors. The language used was tolerable, and after a hasty consultation it was decided to burn the idols of the Royal Palace. This was done on the 8th of September, 1869, in the presence of many witnesses. The people followed the example of the queen, with many apprehensions of evil and disaster, and the greater part of the idols were destroyed.

In a few days requests came from all parts of the island: “You have destroyed our gods, and we know not how to worship according to the new religion; send us teachers.” So many requests of this sort came to the prime minister that he called the missionaries together, and after deliberation 126 teachers were sent out, all selected by the missionaries of the LMS.

Thus was the final blow struck which insured the supremacy of Christianity in the island of Madagascar. Fifty years before they were in the darkest depths of heathenism; forty years before there was not a native Christian among the millions of the Malagasy; now there were probably 50,000 communicants, 150,000 adherents, many thousand scholars in the schools, and a population of at least 1,500,000 asking for Christian instruction. Outside of Imerina, the Sakalava, the Bara, the Betaminena, the Betimisiraka, and many of the smaller tribes—that is to say, at least two-thirds of the whole population—were still savages and idolators of the worst sort, liars, thieves, bloodthirsty, and lustful; they persisted in making raids for plunder and slaves, until the queen’s firm and gentle management made them ashamed. Even of her own Hova and Betsileo people, nearly 2,500,000 in number, only about 150,000 were nominally Christians; and the rest, who their idols were华盛, were liable to lapse into idolatry again if they had a determined leader.

The queen, as soon as possible, sent missionaries and teachers among these tribes who were in darkness. Above all her other acts of patriotism were those relating to slavery. She, by her laws, was the first sovereign of Madagascar to liberate any slaves in Madagascar; and, finding these edicts evaded, she ordered that every Mozambique slave should be set free, and be at liberty
to return to Africa or remain on the island. As there were about 150,000 of these, the cost of this liberation was borne by her husband and herself from their own private fortunes. They had previously emancipated all their own personal slaves. They are well known for the good of her country, and to please God.

It was now settled that Madagascar would henceforth be a Christian country, ruled by a most devoted Christian. This is not the place to go into details of the later history of Madagascar, or of the attacks made upon it by France. What seems to have been an unpardonable crime, presented under the ill-grounded influence of Lambert and his Jesuit friends, finally became a stringent and formal demand, supported by the military force of a great nation. Queen Ranavalona II. died in July, 1883, in the midst of preparations to resist, by a patriotic uprising, the ultimatum which she deemed baseless, unreasonable, and outrageous. Her successor, Queen Ranavalona III., was an educated and active Christian. She carried on the war during two years, and then, defeated at all points, in August, 1885, was obliged to surrender the whole country.

In 1896 this protectorate became annexation to the French colonial establishment, and in February, 1897, the queen was deposed by the French Governor and the Malagasy nationality ceased to be.

The Church in Madagascar, just as in intercourse with foreign nations in Asia and Africa, and in the administrations of its colonies, is represented by officials who seem inclined to place their whole power at the disposal of the Jesuits and other Roman Catholic missionaries. Consequently, there was a period of five or six years when it seemed as if the evangelical church and school buildings in Madagascar would be transferred as captured property to the Roman Catholic Church, their pastors and teachers treated as public enemies, and their English instructors expelled. "This (French) occupation," says Professor Warncke, "gave the Jesuits, who, since the end of the fifties had been forcing their way into the country, the opportunity they desired of turning the hatred felt by the fanatical French colonial politicians toward the British to account, in order to procure, by skilful intrigue, the systematic oppression of the evangelical missions. Under the watchword, 'French is equivalent to Catholic,' the religious liberty which was proclaimed with so much display of rhetoric has been set at defiance. Evangelical Christians and native pastors have been suspected as rebels, imprisoned and put to death; many evangelical churches and chapels have been confiscated, and by the violent intervention of French many evangelical schools have been ruined, not to speak of the numerous conversions wrought by violence and cunning among the terrorized people." But there is light in the dark cloud. The Paris Missionary Society has come heroically to the rescue during these trying times; the Anglicans, the Quakers, and the Norwegians have suffered comparatively little from the violent counter-mission of the Jesuits; and a change for the better has taken place in the educational work. At the Ecumenical Conference of 1900, Mr. Cousins uttered these encouraging and significant words: "So far from lessening the number of workers in the various Protestant missions, the troubles of recent years have brought new workers into the field." At this writing there are nearly 200 Protestant European missionaries at work in Madagascar—a much larger number than ever before; and the societies working on the island, with their stations, are as follows: Friends' Foreign Mission Association, 5 stations; London Missionary Society, 12 stations; Paris Evangelical Mission Society, 14 stations; Society for the Propagation of the Gospel, 21 stations; Norwegian Missionary Society, 23 stations, and the Lutherans have 8 stations.

MADANAPALLI: A town in the District of Cuddapah, India, situated 45 miles N. by W. of Chittur, and 13 miles N. E. of the capital of the district. Population of the RCA (1865), with (1903) 1 missionary and wife, 71 native workers, 14 outstations, 12 chapels, 15 Sunday schools, 3 young people's societies, 13 day schools, 3 boarding schools, 1 dispensary, and 581 professed Christians, of whom 170 are communicants.

MADAPUR: A town and river mart in the district of Tadipatri, India, situated at the confluence of the Arikhan and Kumar Rivers, 40 miles S. W. of Dacca. Population, 13,800, of whom 9,100 are Hindus and 4,700 Muslims. Mission station of the BMIS (1886), with (1903) 2 missionaries and their wives, 43 native workers, 23 day schools, 29 Sunday schools, 4 young people's societies and 3,394 professed Christians, of whom 1,071 are communicants.

MADIUN: A town of about 18,000 inhabitants in Java, Dutch East Indies, situated 80 miles N. W. S. of Surabaya. Mission station of the Netherlands Mission Society (1854), with (1900) 1 missionary and wife, 3 native workers, 1 outstation, and 1 day school. The Society spells the name Madien.

MADRAS: Capital of the Madras presidency, and the third city in size and importance in all India, being outranked only by Bombay and Calcutta. It is situated on the east coast of the peninsula of India. Population (1901) 509,346. The first settlement was begun in 1639, when a grant of land was obtained by Mr. Francis Day, a servant of the East India Company, from the Hindu prince who possessed jurisdiction in that region. A factory or mercantile establishment of the Company and slight fortifications were at once erected, and the city has grown steadily from that beginning. The origin of the name is uncertain. The word "Madressa" signifies a Mohammedan school, and some scholars consider the name of the city to have been derived from that word. In 1653 Madras was made the seat of the local government or presidency of the East India Company's territory in South India. In 1746, during the time when the French power in South India threatened to eclipse the English, it was taken by the French commander La Bourdonnais, but was restored two years later by the treaty of Aix-la-Chapelle. Within a century of the first settlement Madras
had become the largest city in South India. Its growth since then has been less than that of Calcutta or Bombay, for its natural advantages are far less than those enjoyed by its sister cities. It has no natural harbor. The rivers are too far off at distances of a mile, more or less, from the shore, and for many years freight and passengers were transported between the shore and the ships in surfboats, for the skilful management of which, through the surf which breaks unceasingly on the beach, is a test for a Madras pilot. In 1862 a pier was constructed, which extends out 300 yards into the sea; and more recently still the construction was undertaken of an artificial harbor, consisting of two parallel breakwaters curving toward each other at the outer end. The city is by no means compact, but stretches along the shore of the Bay of Bengal for more than 9 miles, and its territory extends 3 miles inland. Of the population more than three-fourths are Hindus. The Mohammedans number only one-eighth; Christians nearly as many. Tamil is spoken by more than half of the entire population; Telugu by a little less than a quarter.

Danish missionaries had been operating at Tranquebar and other points south of Madras for a number of years early in the 18th century before any form of Christian work was attempted in Madras. In 1701, two missionaries with the help of the English chaplain at Madras, they commenced a Christian school, which, however, languished and soon ceased altogether. In 1726, Schultz, one of the missionaries at Tranquebar, made a journey to Madras; began the school work again, and formed the first Protestant mission in the capital of South India. A few years afterward the Society for the Propagation of Christian Knowledge, of England, undertook its support, Schultz continuing in charge of it. The missionary labored hard, preaching, teaching, translating and writing. Results were not slow in appearing. In the one year 1729 Schultz baptized 140 persons; by the end of 1736 the converts numbered 415. The mission was encouraged by the Madras Government. Other missionaries arrived from Europe, and the work went on apace. In 1746 the city by the French was the occasion of much distress to the mission; its work was interrupted, its buildings destroyed, and its church used by the French conquerors as a magazine. In 1748, when the city was returned to the English, the missionaries and Christians who had fled during the troubles came back, and operations were resumed—still under the fostering care of the government. By the end of the 18th century some 4,000 persons had been received into the Christian church. With all this the success of the first Protestant mission in India may be doubted if the real achievements were very great. These numerical results were not carried over into the present century; on the other hand, when the first converts died off there seemed to be no vital Christianity behind them, and it was the duty of the first generation all their devotion and industry the earlier missionaries did not use the best methods of labor.

With the beginning of the 19th century began the new era of missionary work in Madras and throughout all India. Of the great missionary societies which were formed near the year 1800 the Madras Mission Society was formed at the very ground at Madras in 1805. Their collegiate institution was begun in 1852, and has had a most successful and useful career. The CMS began work in 1814. From the first this mission paid much attention to education, as well as to preaching, and schools for both sexes were carried on with vigor. The CEZ began its work for women in 1876. The WMS came in 1816. About the year 1826 the American Board of Commissioners for Foreign Missions in the establishment by Schultze—the original mission of the Christian Knowledge Society was transferred to the care of the BAPC. The ABCFM entered the field in 1830, but withdrew in 1864 in order to concentrate its strength more effectively elsewhere. The Baptist Mission arrived at Madras in 1848. The Established Church of Scotland began a mission in 1837, and devoted its energies, as in Calcutta and Bombay, especially to the higher education, through the medium of the English language. The fervid eloquence of Dr. Duff of Calcutta and Bombay, especially after the disruption of the Scotch Church in the Madras mission, helped with the Free Church and their work is now carried on by the UFS. In 1843 another mission of a similar character was begun by the Old Kirk, and in 1893 the Church of Scotland Woman’s Committee formed the Strict Baptists have a small mission in Madras, begun in 1866, and the Danish Lutherans another dating from 1878. The Christian Literature Society for India has here its central station, its schools for the training of teachers are in other parts of India. The city has its hospitals, orphanages, dispensaries, homes for lepers, over 400 of whom were reported in the census of 1881. The usual missionary agencies are reinforced by the Bible and Tract Societies and by the Society for the Propagation of Christian Knowledge—the venerable organization which so long supported the mission started by Schultz, but which now works wholly through the press. The ME, under the lead of Rev. Wm. Taylor, began work in 1872, at first directing its efforts especially to unevangelized Europeans and Eurasians, the not neglecting persons of other races who might be brought under influence. The ABMU commenced its operations in 1878. The YMCA and the YWCA also have flourishing centers in the city. The Salvation Army has a strong post here.

Besides the mission churches, the city is well provided with Protestant churches for the accommodation of Europeans, and with Roman Catholic churches for persons of all nationalities who adhere to that form of Christianity. The usual institutions of a philanthropic or literary character which spring up everywhere in the path of enlightened and liberal government, such as hospitals, libraries and the like, are not wanting in Madras. Education is in a fair state of progress. Taking all of the societies together the Protestant missionary enterprise in Madras and its adjacent territory is so strong that in 1903 has 104 missionaries, 29 women and women; 766 native workers, men and women; 36 places of worship, 135 day schools, 18 boarding schools and higher educational institutions, 2 printing houses and 8,551 professed Christians, including baptized children and 4,608 communicants.

**Madras Presidency:** One of the general divisions into which British India is divided. It is ruled by a governor and council appointed by the crown under the governor-general and vice-
roy of India. This presidency covers the southern portion of the Indian peninsula—with the exception of the territory still under native princes. Its eastern boundary is the Bay of Bengal, its western the Indian Ocean. But the eastern limit is the coast of the former for some 1,200 miles, while its western shore line, along the Indian Ocean, extends only 540 miles. On the north and northwest it joins (proceeding from east to west) Orisa, a part of the Bengal presidency; then the Central Provinces; then the Nizam of Nizam at Haiderabad, and finally, as its boundary line nears the Indian Ocean, the presidency of Bombay. Near the center of this irregular triangular territory is the great native state of Mysore, including five smaller native states which are closely related to the Madras Government, and directly subordinated to it. The total area of the presidency is 149,092 square miles, and the population (1901) 42,400,000. The presidency may be divided, as to its physical aspects, into three well-marked areas. Along the eastern coast, the area between the range of hills known as the Eastern Ghats and the sea, is a broad strip of low country. A similar, though narrower and more diversified, strip of land extends along the western coast, between the Western Ghats and the Indian Ocean. The interior consists of a tableland, supported on its western edge by the Western Ghats and sloping down gradually toward the Bay of Bengal on the east, its boundary on that side being the eastern range just alluded to. Much of the high interior is occupied by the native state of Mysore. The mountains rise to greater heights as they go south; the highest peaks of Southern India are those of the Nilgiri and Anumalai groups, several of which are between eight and nine thousand feet high.

The population is chiefly Hindu. 37,026,471 Hindus, 2,732,931 Mohammedans and 1,934,480 Christians, with 673,905 Animists or spirit-worshippers, make up the list of religions in the census of 1901, whose adherents exceed 30,000.

The Hindus of this presidency, and some of the so-called aboriginal tribes also, belong to the so-called Dravidian stock. This subdivision is that now known as the Tamil. People of this race appear, in prehistoric times, to have occupied the Gangetic valley, and to have been pushed south by the invading Aryans as they moved down the valley and spread over the peninsula.

The language of the Dravidians still persists in the various languages of South India. Of these the Tamil is the most important and is spoken by over 12,000,000 in the presidency; the Telugu is used by almost as large a number; the Kanarese is spoken by about 1,300,000; the Tulu is preserved only by a remnant of the people among the mountains in the west of the presidency and is doomed doubtless to disappear as a spoken language. The Coorg and the Malayalam (2,400,000) also belong to this stock. The languages of the aboriginal tribes above mentioned are also Dravidian. The original religion of the Dravidians, before the coming of the Aryans, was probably some form of demon-worship, such as the jungle tribes still preserve.

Cochin must be said as the connection of the English with the presidency. Calicut and Cannanore on the west coast were occupied by the East India Company as places of trade in 1616. The Company had been preceded first by the Portuguese, and as their power waned, by the Dutch. But finally the former concentrated themselves at Goa, and the Dutch withdrew. On the east coast, Masulipatnam, north of Madras, was occupied by the English in 1615. The first English settlement on the site of Madras City was in 1639 (see Madras City). The French occupied Pondicherry, south of Madras, in 1672. It was not until the middle of the 18th century, when the English and French powers were in armed rivalry in Europe, that a possible rivalry for supremacy in India began to be realized. In 1746 Madras was overpowered and captured by the French commander La Bourdonnais, but restored to the English two years later, at the peace of Aix-la-Chapelle. But the country was occupied by the English and tottering dynasties of native princes. In their contests among themselves, the English would befriend one princeling and the French another. The strife between the Oriental principalities could not fail to extend itself to the European powers by whose military skill and skill in diplomacy for half a century the fate of South India hung undecided between the French and English.

Dupleix undertook to unite the native powers into one combination under French protection, but his plans were defeated by the military skill of Lord Clive, afterward Sir Eyre Coote, Haidar Ali, and his son Tipput Sultan, the only members of a Mohammedan dynasty which erected itself on the ruins of a Hindu principality in Mysore, withstood the progress of English power with a firmness which at one time threatened to stop it altogether. But in 1799 Tipput Sultan died in the breach at his capital, Seringapatam, the English entered the fort in triumph, and military opposition, from whatever quarter, to the English power in South India was at an end. Since then the English Government has had hardly any use for its Madras army, save for police purposes.

To the historian of Indian Christianity the Madras Presidency is the most interesting portion of India. Tradition says that the Apostle Thomas preached the Gospel here, and Mount St. Thomas, now called Cape Comorin, is the supposed place. Pantanmus found Christians in India in the 2d century. A branch of the Syrian Church settled on the west coast, near Cape Comorin, centuries ago, and this “Syrian Church of Malabar” preserves its ancient liturgies, and still acknowledges subjection to the patriarch of Antioch. Here also Xavier preached and baptized in the 16th century, and the Jesuit missionaries of Madura in the 17th. And here was the beginning of the Protestant missionary movement in India, by the hands of two young Danish missionaries (Bartholomew Ziegenbalg and Henry Plutschau), in 1705. Tranquebar (on the coast south of Madras) was the first station occupied. The Society for Promoting Christian Knowledge in a few years assumed support of the mission. But it was long before a distinctly English mission was founded. Schultze came in 1719, and in 1726 began the first really successful mission in Madras City. Kiernander came in 1740; but in 1746, when the French were besieging Cuddalore, where he was stationed, an English envoy, finding it impossible, he removed to Calcutta, and became the father of Protestant missions in the Bengal presidency. In 1750 Christian Frederic Schwartz
landed in South India, and until his death in 1798 labored uninterruptedly for the good of the people and the progress of the cause of Christ. No better or greater name adorns the history of Protestant India than those of Robert M. Clarke who labored in the East during the 18th century.

By the labors of these great and good men and their associates congregations were gathered, schools established and churches founded at Tranquebar, Madras, Trichinopoly, Tanjore and other places. Converts were baptized by the hundreds and thousands during the 19th century. Excesses of character, their piety and zeal, these men did not plant a self-sustaining, manly and vigorous Christianity. Their churches exist, but with diminished numbers and entangled strength. The churches gathered by them in many cases have been surpassed by those more recently organized, not alone in numbers, but in aggressive character and influence. For about a hundred years the work begun by the missionaries of the 18th century was subsidized by the SPCK, which to a large extent assisted the work of the missionaries themselves. 

Early in the 19th century this Society transferred the missions to the SPG, and in due time the personnel of the mission staff came to be recruited wholly from the English Church, even as the money came from the same source. The introductory labors of the missionaries of the 18th century were followed by work on a larger scale, more systematically and energetically than during the 19th century. We record here the principal agencies operating in this more recent era. The London Missionary Society leads the way. Two missionaries of this Society occupied Vizagapatam, on the east coast, far north of Madras, in 1805; during a period when the Indian Government, taught by the example of the East India Company at home, was bitterly opposed to the entrance of missionaries in India. The missionaries at Vizagapatam, however, were not molested, and when in 1814 Parliament, in the new charter granted that year to the company, inserted a clause favoring missionary emigrations, and the opposition of the government ceased in consequence, the LMS was all ready to establish a station in Madras City. Bellary, northwest of Madras, near the boundary line now separating the presidency of that of Bombay, had been occupied in 1810, and Comorant was occupied in 1830. The Church Missionary Society entered Madras City in 1815, and took over the Palamcotta station (in the Tinnevelly district) from the Danish missionaries, who had planted it in 1785, in 1817. In the same year the SPG began work at Coom- borah, and assumed, during the years 1820-29, charge, from the Society for Propagating Christian Knowledge, of most of the old Danish missions. The Wesleyan Missionary Society appeared upon the scene at Madras in 1816, and at Trichinopoly two years later. The Basel Evangelical Missionary Society began its work, which since has spread over all the western portion of the presidency, and into many of the Kanaree districts of the Bombay presidency, in 1834. The English Baptist Missionary Society planted a station in the Ganjam district, the most southern in the presidency, in 1837. The American Board of Commissioners for Foreign Missions, whose mission among the Tamil-speaking people of Jaffna, in North Ceylon, had been begun soon after 1820, colonized thence, first to Madura in 1834 and to Madras in 1836; Arcot was occupied by this Society in 1855, but its work there was a year or two afterward transferred to the Dutch Reformed Church (as it was then called) in the United States, by which church it has since been maintained with much vigor. The Church of Scotland came to Madras in 1837, and since the Disputation in 1843 two Scotch missions have worked there side by side, and to some extent also in the interior. The American Baptist Missionary Union began its work—now of large proportions and of extraordinary success—in Nellore and other parts of the Telugu portion of the presidency, in 1840. The Leipzig Luthers came in 1841 to Tranquebar and adjacent stations, where the Luthers of the preceding century had labored with such assiduity. There are also small German missions elsewhere in the presidency—that of the Hermannsburg Luthers at Nellore (1865), of the American German Luthers in the Krishna district (1842), and an independent German mission in the Godavari Delta, which dates from 1838.

The chief successes of this army of Christian laborers have been won in the Tinnevelly district, where the Christian churches and communities are very numerous, and where the native Christians are numbered by thousands. In the Telugu districts, also under the charge of the American Baptists, there have been gatherings of surprising vastness and power; the American missionaries in the Arcot and Madura districts have also been very successful. Probably in no other part of India has Christianity taken so firm a hold.

MADSCHAM. See MAJAM.

MADURA: A city (and district, the city being the capital of the district) in the Madras presidency, India, situated on the S. bank of the Vaigal River, about 275 miles south-southwest from Madras. The population of the city is (1901) 105,984, of whom 94,000 are Hindus. The language of the Hindus is Tamil, the with the progress of education the number of nates is more and more familiar with English. Madura has long been a most important place. It was the seat of an ancient dynasty of Hindu kings (the Pandyan), whose history stretches back into prehistoric times, and is adorned with the usual wealth of myth and legend. As the Mohammedan power stretched south in the 15th and 16th centuries this Hindu kingdom was overthrown, the no Mohammedan dynasty took its place; but on the ruins of the old state rose another Hindu dynasty—that of the Nayaks—which culminated in the 17th century, when most of the architectural works at Madura, which still attest the power and wealth of this line of princes, were completed. During the political chaos of the next century the Nayak kingdom in its turn crumbled. Mahatta and Mohammedan armies successively overran the region, until at last the British came, and in 1801 Madura passed into their possession. The religious history of the place chiefly concerns us now. It contains one of the most famous Hindu temples—that of the goddess Minakshi—in India. The temple, which is built upon the Braye of Bengal, in 1837. The American Board of Commis-
the priests and temple attendants. The conspicuous features of the temple are the great towers, 9 in number, which rise above its outer walls, in one case reaching to the height of 152 feet.

The Christian history of Madagascar is of much interest. The famous Roman Catholic missionary, Francis Xavier gathered a little church here in the 16th century. In 1606 a Jesuit mission was begun here by Robert de Noblis, who lived as an ascetic, was renowned for his sanctity and learning, and his complete mastery of the Tamil language. Following him were men of like spirit, notably John de Britto, who suffered martyrdom in 1635, and Beschi, who prepared the first Tamil grammar, and whose writings are regarded as models of pure Tamil style. The native converts in the region about Madura were estimated at a million or more, won largely by the great concessions to Hindism which the missionaries made. The number of Catholic Christians now in the district has greatly dwindled, hardly 70,000 being returned in the census of 1881.

The history of Protestant effort begins in 1834, when the place was occupied by Messrs. Todd and Hoisington, connected with the ABCFM mission in Jaffná, Ceylon, which had been founded in 1816. The work of the American missionaries has been carried on vigorously and successfully ever since. In process of time they occupied most of the important towns in the district round Madura as mission stations, established schools of different grades, gathered congregations of Christian adherents and founded churches, composed of such as gave credence evidence of piety. They have labored as preachers on their tours and in the churches, as teachers in their schools, as writers, and editors through the medium of the press, as physicians through their labors in hospitals and dispensaries. This Society now (1902) has at Madura 2 missionaries and their wives, 3 women missionaries, 140 native workers, men and women; 18 outstations, 14 preaching places, 13 day schools, 3 high-grade boarding schools, 2 hospitals, 2 dispensaries and 700 professed Christians. It is a station also of the Leipzig Missionary Society (1874), with (1903) 2 missionaries, one with his wife, 1 woman missionary, 22 native workers, men and women; 14 outstations, 10 places of worship, 5 day schools, 1 high-grade school and 702 professed Christians, of whom 697 are communicants. The RPG also has a native evangelist here.

Madurantakam: A town in Madras, India, situated about 50 miles S. by W. of Madras. Station of the WMS, with (1903) 1 missionary, 46 native workers, 10 outstations, 13 chapels, 21 day schools, 14 Sunday schools, 1 theological class, and 174 professed Christians, of whom 108 are communicants.

Mabrisi. See Mabrisi.

Mafeke: A town on the railway to Bulawayo, near the Transvaal boundary, and about 500 miles N. E. of Cape Town. Station of the WMS, with (1903) 2 missionaries, 118 native workers, 23 outstations, 155 chapels, 23 Sunday schools, 8 day schools, and 1,513 professed Christians, of whom 1,228 are communicants.

Mafube: A settlement in Griqualand East, S. Africa, situated about 90 miles N. W. of Shepstone. Station of the Paris Evangelical Mission (1884), with (1903) 1 missionary and wife, 22 native workers, 9 outstations, 1 Sunday school, 18 day schools, and 1,000 professed Christians, of whom 637 are communicants.

Magnala: A village on the Mosquito Coast, Nicaragua, Central America, situated 15 miles N. by E. of Bluefields. Station of the Moravian Missions (1855), with (1901) 1 missionary and his wife, 7 native workers, 1 outstation, 1 Sunday school, 1 chapel, and 37 professed Christians.

Magomero: A settlement in British Central Africa, situated in the Shiré region, about 25 miles N. E. of Blantyre. In 1861 Bishop MacKenzie, leader of the Universities Mission, on his way up the Zambezi met a gang of slaves. He liberated them, settled them at Magomero, and began their education. The insecurity of the region at that time made a change necessary in the locality where such waifs were to be taught, and in 1864 the whole colony was removed to Mbwani, on the island of Zanzibar.

Magoye: A settlement in German East Africa, situated in the district north of the N. end of Lake Nyasa, 14 miles S. E. of Blantyre. Station of the Berlin Missionary Society (1900), with (1903) 1 missionary, 1 native worker, 2 outstations, 1 day school, and 28 professed Christians.

Mahabelashwarw: A town in Bombay Presidency, India, situated on a long ridge 4,500 feet high, and 70 miles S. E. of Bombay. Station of the Poona and Indian Village Mission, with (1900) 7 missionaries, one with his wife; 2 women missionaries, and a rest home.

Mahica: A settlement in British Guiana, South America, situated on the Mahaica River, 40 miles S. of Better Hope. Station of the West Indies Wesleyan Eastern Annual Conference, with 1 missionary and his wife, 4 outstations, 5 chapels, 5 Sunday schools, 6 young people's societies, 3 young men's Christian associations, 5 day schools, 1 temperance society, and 422 professed Christians.

Maharoro: A town on the E. coast of Madagascar, situated about 90 miles S. E. of Antananarivo. Station of the SPG (1884), with (1902) 1 missionary, 1 woman missionary, 1 native worker, 1 day school, and 629 professed Christians, of whom 124 are communicants. Society spells the name Maharoro.

Mahasario: A suburb of Antananarivo containing the normal school (for Imerina) of the Paris Mission. Station of the Paris Evangelical Society (1899), with 1 missionary and wife, 1 missionary woman, 3 native workers, and 1 hospital. Society spells the name Mahasario.

Maha Island. See Seychelles Island.

Maheresa: A village in Madagascar, 125 miles W. of Tananarive. Station of the Paris Evangelical Mission Society (1898), with (1903) 3 missionaries, two of them with their wives; 102 native workers, 37 outstations, 7 Sunday schools, 3 societies for young people, 2 young men's Christian associations, 2 young women's associations, 37 day schools, 2 boarding schools, 1 industrial school, 1 dispensary, 2 orphanages, 1 theological class, and 850 professed Christians. Society spells the name Maheresa.

Mahitsy: A village and district in Imerina, Madagascar, lying to the N. W. of Antananarivo, on the Majunga road about 15 miles from the
MAHABA:
A town in the United Provinces, India, situated 87 miles S. S. W. of Cawnpur on the railway between Banda and Allahabad. Population, 8,500. Station of the CWBM (1895), with (1903) 1 missionary and his wife, 6 women missionaries, 3 native workers, 1 chapel, 2 Sunday schools, 1 day school, 1 orphanage, 1 church, and 87 professed Christians.

MAHONORO. See MAHANORO.

MAHOW. See MHOW.

MAIANA. See GILBERT ISLANDS.

MAIDZURU: A town in Hondo, Japan, situated near the coast about 40 miles N. of Kobe. Station of the PE (1895), with (1903) 1 missionary, 1 native worker, 4 chapels, 4 outstations, and 25 professed Christians.

MAIJAM: A town in Bengal, India, situated about 30 miles N. by W. of Raniganj. Station of the PB, with (1900) 1 missionary and wife and 1 orphanage. Society spells the name Mijijam.

MAI-MAI-KAI: A town in Manchuria, China, situated 120 miles N. N. E. of Mukden. Station of the UFS (1898). The work has not been fully reorganized since the Boxer disturbance, but is carried on (1903) with 14 native workers, 6 outstations, 2 places of worship, 5 Sunday schools, and 377 professed Christians.

MAIMANSINGH: A town of Bengal, India, situated by Nasibabad, 74 miles N. of Dacca; capital of the District of Maimansingh. Population, 11,600, of whom 6,500 are Hindus. Station of the Victoria Baptist Foreign Mission Society (1885), with 1 missionary and wife, 3 women missionaries, 6 native workers, 2 places of worship, 2 Sunday schools, 2 young people's societies, 2 day schools, 1 orphanage, and 23 professed Christians. Society spells the name Mymansingh.

MAIN: A village in the Transkei District of Cape Colony, Africa, situated 78 miles N. of East London. Station of the UFS (1876), with 1 missionary and his wife, 26 native workers, 12 outstations, 1 place of worship, 11 day schools, and 533 professed Christians.

MAINPUR: A town in the United Provinces of India, situated 40 miles W. of Fatehgahor; capital of the District of Mainpur. The town is in two sections, one of which is called Mukhamganj. Population, 18,600, of whom 13,800 are Hindus and 4,000 Muslims. Station of the FN (1843), with (1903) 2 missionaries and their wives, 11 native workers, 2 outstations, 1 place of worship, 14 Sunday schools, 5 day schools, 1 boarding school, and 220 professed Christians, of whom 44 are communicants. Society spells the name Mainpurie.

MAIRANG: Village in Assam, India, situated in the Khasia Hills, near Mao-phiang, with which its mission statistics are included.

MAJAM: A village in German East Africa, situated in the Wajaga region on the slopes of Mt. Kilima Njaro, 190 miles N. W. from the seaport of Tanga. Station of the Leipzig Mission Society (1893), with (1903) 1 missionary and his wife, 7 chapels, 4 day schools, 1 high school, and 40 professed Christians, of whom 19 are communicants. Society writes the name Madchame.

MAJAWERAM. See MAYAWRAM.

MAKAPAANSPOORT: A village in the Transvaal, South Africa, situated in the Waterberg district, at the foot of the Sefakolo Mountain. Station of the Berlin Missionary Society (1865), with (1903) 1 missionary, 13 native workers, 10 outstations, 1 day school, and 487 professed Christians, of whom 247 are communicants. The council at Pretoria, when the mission of Makapan was taken up, limited its residence at the station, prohibited his tribe, on pain of death, from intercourse with them, and what success the station has had has been won in the face of great obstacles.

MAKAPAN-STADT: A village in the Transvaal, Africa, situated on the Aspies River, in the Waterberg district, about 32 miles N. of Pretoria. Station of the WMS, with 1 missionary, 9 native workers, 14 outstations, 24 places of worship, 14 Sunday schools, 9 day schools and 1,771 professed Christians, of whom 1,497 are communicants.

MAKERE: A settlement in British East Africa, situated on the Tana River, about 60 miles N. of Golbanti. Station of the Neukirchener Mission Institute (1895), with 2 missionaries, one with his wife, and 1 day school.

MAKOTOPONG. See KRETZBURG.

MAKOULEAN: A settlement in Portuguese East Africa, situated in the extreme S. W. of the colony, about 60 miles S. W. of Lourenço Marques. Station of the Romande (French Switzerland) Mission Society, with (1903) 1 missionary and his wife, 2 native workers, 3 outstations, 4 places of worship, 4 Sunday schools, 4 day schools and 28 professed Christians.

MAKOWE: A settlement in Zululand, South Africa, about midway between Durban and Lourenço Marques. Station of the South Africa General Mission (1896), with 1 missionary and his wife, 1 woman missionary, 1 native worker, 1 chapel, 1 Sunday school and 1 day school.

MALA: A station of the New Hebrides Mission Society at the southern end of Espiritu Santo Island.

MALA: The island usually called Malayta, in the Solomon group, Melanesia.

MALABAR, Syrian Church of: Travancore and its sister kingdom, Cochin, which adjoins it on the north, are famous as the home of an exceedingly ancient branch of the Christian Church, usually known as the "Syrian Church of Antioch," Malabar being the name applied for many centuries to the strip of coast embracing the kingdoms named and the British district just north of them. The origin of this church is doubtful. The traditions current among the people go back to the preaching of Thomas, in the middle of the 1st century; but scholars suppose that a small colony from Antioch (Syria) may have landed here in the 4th century. The church is Syrian in doctrine and ritual, maintaining the Nestorian type of Christology, and is subject to the Patriarch of Antioch, tho the Romanists have tried hard to subject it to the Pope, and did succeed, in 1599, in detaching some 80,000 members from the patriarch, and in thus forming a Romo-Syrian community, which is still allowed, however, to retain the Syrian ritual and language. The remainder of the Roman Catholic population represents chiefly the results of Francis Xavier's missionary activity in the 16th century. The existence of this ancient Syrian Church attracted
the attention of Rev. Dr. Buchanan (then chaplain to the East India Company at Tinnevelly), and at his urgent suggestion the Church Missionary Society, in 1816, sent missionaries to labor among its members. At first the Syrian priests cooperated with them, but in 1838 signs of hostility appeared, which culminated in the Syrian Metron (or Metropolitan) dissolving all connection with the English missionaries. Since then the Church Mission has devoted its attention to the people at large, with the most gratifying results, drawing their converts from the old church in part, but very largely from Hindus, and especially from certain low castes. Gradually there has arisen in the Syrian Church a reform party which is in close relations with the CMS missionaries and appears to be gaining influence for the awakening of the long slumbering Malabar church.

**MALACCA:** A portion of the Straits Settlements of Great Britain, lying along the western coast of the Malay peninsula between Singapore and Penang; consists of a strip of territory about 42 miles in length and from 8 to 24½ miles in breadth. Its surface is hilly, but not mountainous; and it is drained by five navigable rivers, making the soil alluvial and rich. The climate is equable and healthful. In 1901 the population numbered 95,487, of whom 73,833 were Asiatics, 74 Europeans or Americans and 1,498 of mixed blood. There is no mission station in Malacca.

**MALAGASI LANGUAGE:** A language of the more civilized peoples of Madagascar. It is of the Malayan family and was reduced to writing by missionaries, being written with Roman letters.

**MALAN:** A village in the Transkei district of Cape Colony, South Africa, situated 13 miles N. E. of Butterworth. Station of the UFS (1875), with (1908) 1 missionary and his wife, 14 native workers, 15 outstations, 20 Sunday schools and 655 professed Christians.

**MALANG:** A village in the Loanda district, Angola, Africa, situated about 250 miles W. from San Paolo de Loanda, on the line of the railway from that place. Station of the ME (1885), with (1909) 1 missionary and his wife, 3 women missionaries, 1 place of worship and 6 professed Christians.

**MALAYALAM LANGUAGE:** One of the Dravidian family of Indian languages, spoken by the people of Malabar and Travancore in the southwest part of the peninsula of Hindustan. It is the vernacular of about three millions of people and is written with characters peculiar to itself. It is also called Malayalam.

**MALAYAN LANGUAGES:** A family of languages, of great simplicity of structure and of sounds, used by the natives of the Malay peninsula, of Madagascar, of the islands of the Dutch East Indies, the Philippines, Polynesia, and New Zealand. In the interior of the larger of these islands have languages generally classed as of independent stock, and the same seems to be true of the people of the Malayan Islands, altho they are often classed as Malayans. Australians have an entirely distinct language. In the case of those islands which we have named, the Malay characteristics are clearly evident, as tho the various dialects are numerous. The Malay language proper is the *lingua franca* of the East Indian Archipelago. Its most cultured dialect is that of the towns of Sumatra and Java. Its phonetic elements are simple, the grammatical structure is regular and its vocabulary, especially in nautical terms, is very copious. It has the five vowels, a, e, i, o, u, short and long, with one diphthong. The consonants are b, g, h, j, k, l, m, n, ñ, p, r, s, t, w, y, ng, ch. Malay is a disyllabic language, with the accent as a rule on the penultimate, except where that syllable is short and end. Derived words are formed by prefixes, affixes, infixes and reduplication. Much skill is displayed in the idiomatic use of the hundred or more derivative forms. There are no inflectional forms to distinguish number, gender or case. Number is denoted only when absolutely necessary by the use of the adjectives *sagala,* all, and *bēdak,* many, or by *sa* or *satu,* one, with a classifier. As in the Chinese language, classifiers are numerous, such as *orang,* used in speaking of persons; *kēping,* piece, for flat things. Gender is distinguished by the use of auxiliary words. Case is indicated by position. Verbs have no person, number, mood, or tense. Long sentence forms consist of the subject, then the verb, followed by the object, and qualifying words follow the words they qualify.

The Arabic alphabet is used for writing Malay, having been introduced at the time of the Mohammedan conquest. A great number of Arabic words have also been introduced into the vocabulary.

The literature of the Malays consists mainly of proverbs, and love poems of four lines. Their religious literature is remarkable mainly for its independence, and the fact that it does not show the influence of Islam.

The great branches of the Malay language are the Polynesian, found in the islands of the South Pacific, the Hawaiian, the Malagasi and perhaps the Fijian, found in the Fiji Islands. As said above, the evidence of a Malayan origin of the language of Fiji and the multitudinous dialects of Melanesia is not conclusive.

The earliest recorded use of a Malayan language for evangelistic writing was in 1602, when Brouwers, one of the Dutch Church ministers in Java, began a translation of the Bible, using Roman letters and writing it. Roman letters have become established as the alphabet for writing the Malagasi and the Polynesian Malay languages. But in the Malay Islands the Arabic letters having become naturalized long before the date above named, the use of Roman letters in writing Malay has not widely found favor.

**MALAYS:** 1. In its strictest sense this name is given to the inhabitants of the Malay peninsula, Penang and Sumatra, who belong to the Mongol race, modified by the mixture of other blood. In physical appearance they are of somewhat short stature; brown complexion—not so light as the Chinese or so dusky as the Hind; have straight, black, coarse hair; no beard; large mouth; flat nose; large, dark eyes; somewhat thick lips; small hands and feet, with thin, weak legs. In temperament the Malays are thoroughly Asiatic—tacturn, undemonstrative, cunning, treacherous, and at times cruel. Their passions are easily aroused, unduly reproved, and treacherous, and at times cruel. Their passions are easily aroused, unduly reproved, and
fervor, they reach a height of frenzy during which they run “amuck,” assailing violently all whom they meet.

We find three principal classes: the Orang *benua*, “men of the soil,” or hill-tribes; the Orang *laut*, “men of the sea,” who are the daring, skilful, adventurous sea-faring men of the Indian Archipelago, and the Orang *Malays*, or Malayans, proper, the civilized class, who exhibit more of refinement and are courteous and kind to their families and friends. The Malay sailors were the formidable pirates who formerly menaced commerce and were the dread scourge of the Indian seas. Their deeds of cruelty, treachery and cunning, aided by their daring, brave, audacious seamanship, are still the theme of stories of adventure. Even at the present time few ship captains care to have a crew composed entirely of Malays, who they form the largest part of the sailors on the Indian and Chinese coasts.

Mohammedanism was embraced by the Malas in the 13th and 14th centuries, the fierce, uncompromising, aggressive spirit of that religion finding quick response in their natural temperament.

2. In a wider sense the term is applied to the races inhabiting the Indian Archipelago and the islands south of Ceylon, and extends as far as New Zealand, perhaps 5,000 miles, from Easter Island to Madagascar and from New Zealand to the Hawaiian Islands. This widespread dispersion of the race has been the subject of much study and theory, but the causes of it, and proof as to the fact, are not within the limits of this article. A classification of this wider definition is as follows: (1) Malay. (2) Malay Javanese: the inhabitants of the Ladores, Formosa, Philippine Islands, the Dutch East Indies and Madagascar. (3) Melanesia, Fiji Islands, which, by the way, is not always admitted. (4) Polynesian: The Hawaiians, Marquessas Islanders, Tahitians, Roratongans, Samoans, Tongans, Maoris. To these Wallace adds the Papuans, who are the farthest removed from the Malays, yet whom he considers to be of the same stock. They represent the extreme difference in type, due to the mingling of other races with the Malays, and have frizzly hair, are tall and black, bearded and hairy-bodied. The mental characteristics of the Papuan are also different from the Malay type, and they are impetuous and noisy. Between the two extremes every gradation is found, varying with the preponderance of either the Malay or Papuan type.

In some of the provinces of China, in Formosa and Hainan, the aborigines, who seem to have affinity with the Shans and Laos, are also allied to the Malays. Mohammedanism does not accompany the Malays in their dispersion, and low forms of superstition, of fetishism and of demonolatry take its place. Christianity has made considerable headway, not only in Madagascar and Polynesia, but in the Malay Archipelago and even among Mohammedan Malays.

MALAYA ISLAND: One of the Solomon Island group in Melanesia, lying S. E. of Isabel Island. It has an area of 2,385 square miles. Station of the Melanesia Mission. Society spells the name Mala.

MALEGAO: A town in Bombay Presidency, India, situated in the District of Nasik, on the Gurna River, 64 miles N. W. of Aurangabad. Altitude, 1,460 feet. Population, 15,500, of whom 9,300 are Muslims and 5,600 Hindus. Station of the CMS (1848), with (1903) 1 mission-
3 native workers, 4 outstations, 4 places of worship, 7 day schools, 1 dispensary, and 64 professed Christians, 22 of whom are communicants.

MAMRE: A village in the Malmesbury District of Cape Colony, Africa, situated 28 miles N. of Cape Town. Station of the Baptist Missionary Society of the Moravian Missions (1808), with 3 missionaries and their wives, 36 native workers, 1 place of worship, 2 day schools, and 511 professed Christians.

MANAGUA: Capital of Nicaragua, Central America, situated 157 miles S. S. E. of Tegucigalpa, on Managua Lake, and connected by rail with Granada on Lake Nicaragua. Station of the Central America Mission, with 2 missionaries and their wives and 1 woman missionary.

MANAKALY: A village of lepers, in Madagascar, situated 3 miles N. of the LMS station of Isosaina, 12 miles E. of Antananarivo. It was built some ten years ago on the initiative of Rev. Mr. Peake (LMS), and its preacher and inhabitants are all lepers, maintained by the French Government, cared for by the deaconesses of the Paris Missionary Society, but aided in church and school work by the LMS. The Paris Evangelical Society has there 2 women missionaries, 1 married worker and 1 boy belonging to the French Government. There is also a home for untainted children of lepers. The LMS has 1 native worker and 1 place of worship, with 200 professed Christians, all lepers.

MANAMADURA: A town in Madras, India, situated 30 miles S. E. of Madura. Station of the ABCFM and the CMS, with 2 missionaries and their wives, 36 native workers, 36 outstations, 14 places of worship, 4 Sunday schools, 6 day schools, 2 boarding schools, 1 industrial school, and 153 professed Christians.

MANANJARY: A town in Madagascar, situated at the mouth of Mananjary River, on the E. coast. Station of the SPG, with (1903) 2 missionaries, 1 native worker, and 796 professed Christians. Society spells the name Mananjara.

MANANTENINA: A settlement on the E. coast of Madagascar, situated about 62 miles E. of Ft. Dauphin. Station of the Lutheran Free Church Mission Society (1895), with 1 missionary and wife, 10 native workers, 7 outstations, and 1 place of worship.

MANASOA: A village in Madagascar, situated about 63 miles E. of St. Augustine’s Bay. Station of the Lutheran Free Church Mission Society (1901), with 1 missionary and wife, 4 native workers, 4 outstations, and 1 place of worship.

MANCHU LANGUAGE: The language of Manchuria, Chinese Empire, and the court language of the present imperial dynasty of China. It belongs to the Tungusian branch of the Ural-Altaic family, and on the whole is the best-known of the Tungusian tongues. It follows the rule of all Tatar languages in observing the requirements of harmony in the vowels of words, insisting on the division of vowels into “hard” and “soft” classes. Naturally, it has received and adapted a certain number of Chinese words. It is written with an alphabet peculiar to itself, which, however, can be traced to the letters of the Syriac alphabet.

MANCHURIA: One of the divisions of the Chinese Empire lying north of China proper, between latitude 42° and 53° north. In accordance with the treaty of 1860 between Russia and China, the Manchurian province, known as the Amur on the south, which was given over to Russia, and the present limits are the Amour on the north, the Usuri and Sunga-cha on the east, Korea on the south, from which it is separated by the Shan-Alin range, and on the west the Khingan Mountains, the Sira-uren Range, and the district of Ussuri, which separates it from the desert of Gobi. Its area is about 365,000 square miles. The population of Manchuria is estimated by the Chinese as 5,500,000. Physically, the country is divided into the mountain ranges on the north and east, among which lie numerous valleys, the plain which stretches south from Mukden to the Gulf of Liaotung. The climate varies from 90° F. in the summer to 10° below zero in the winter. During four months of the year the rivers are frozen up; a short spring is followed by the heat of summer, and a few weeks of autumn usher in the snow and ice of the winter. Manchuria is gradually losing its native language and system of education under the influence of the Chinese. Until Russia's interference in 1890 the native Manchus had been used to reenforce Manchu garrisons in China, while a tide of Chinese had been pouring in. Russia has changed all this. The native Manchus are a finer race physically, mentally, and morally than the Chinese; they are of larger frame, lighter color, and have greater intellectual capacity. Mission work in this part of China is carried on by the Presbyterian Church of Ireland, and the UFS in the western and central districts, and the Danish Missionary Society in the coast regions of the south. Since the strategic points from Harbin to Port Arthur are mission stations, the military necessities of the Russian war with Japan have (1904) interrupted missionary work in what has hitherto seemed to be one of the most promising fields for Christian missions.

MANDALAY: A town in Upper Burma, British India, situated 386 miles by rail N. of Rangoon in a plain 2 miles from the Irrawaddy River. Part of the city is walled and is now a British military cantonment. There are large manufactures of silk goods. Population, 168,300, of whom 147,000 are Buddhists and 13,700 Hindus. Station of the ABM (1886), with (1903) 4 missionaries, three with their wives; 2 woman missionaries; 30 native workers, 279 professed Christians, 2 ladies in the women's asylum, 1 Sunday school, and 2 boarding schools. Station also of Mission to Lepers in India and the East (1890), with 1 place of worship and 1 home for untainted children of lepers. Station also of the Missionary
THE ENCYCLOPEDIA OF MISSIONS

Pence Association (1892), with 1 missionary and his wife, 1 native worker, 1 outstation, 1 place of worship, 2 Sunday schools, and 40 professed Christians. Also station of the SPG (1868), with 1 missionary, 1 boarding school, 1 temperance society, and 283 professed Christians, of whom 160 are communicants. Station also of the WMS, with 3 missionaries, 1 woman missionary, 21 native workers, 8 outstations, 6 Sunday schools, 7 day schools, 1 boarding school, 1 temperance society, and 166 professed Christians, of whom 137 are communicants.

MANDARI LANGUAGE: One of the non-Aryan languages of India; also called the Kol, and spoken by the Kolarian aborigines of Chota Nagpurl in Bengal. It has been reduced to writing by missionaries with use of the Roman letters.

MANDOMAI: A village in the island of Borneo, situated 35 miles N. W. of Banjermassin. Station of the Rhenish Missionary Society, with (1903) 1 missionary and wife, 1 woman missionary, 10 native workers, 5 outstations, 1 Sunday school, 6 day schools, and 449 professed Christians, of whom 211 are communicants.

MANDIRANO: A town in Madagascar, situated 50 miles S. W. of Antananarivo. Station of the FFMA (1888), with (1901) 1 missionary and wife, 1 woman missionary, 80 native workers, 40 outstations, 250 professed Christians, 40 places of worship, 40 Sunday schools, 1 Young People's Society, and 1 dispensary.

MARPY: A village in Aylow, situated 5 miles N. W. of Jakarta. Station of the ABCFM (1831), with (1902) 1 missionary and wife, 41 native workers, 4 outstations, 12 day schools, and 308 professed Christians.

MANGAI. See HERVEY ISLANDS.

MANGALORE: A town and seaport in Madras, India, and capital of the District of South Canara, situated on the W. coast of Hindustan, at the mouth of Nethravati River, 127 miles N. N. W. of Calicut. Much of the coffee grown in Coorg is exported here. Population (1891) 41,400, of whom 23,000 are Hindus, 10,000 are Christians, and 7,600 are Muslims. Station of the Basel Mission Society (1834), with (1905) 15 missionaries and their wives, 3 women missionaries, 77 native workers, 6 outstations, 1 Sunday school, 18 day schools, 1 kindergarten, 1 theological class, 1 boarding school, and 2,799 professed Christians, of whom 1,038 are communicants. Station also of the Mission to Lepers in India (1897), with 1 leper asylum. The Societies spell the name Mangalur.

MANGAMBA: A village in Kamerun, Africa, situated about 10 miles N. of Bonaberi. Station of the Basel Missionary Society (1889), with (1903) 3 missionaries and their wives, 29 native workers, 38 outstations, 29 day schools, 1 boarding school, and 442 professed Christians.

MANGAI: A village in the United Provinces, India, situated near Babatpur. Station on the railway, 14 miles N. W. of Benares. Station of the LMS (1874), with (1903) 1 missionary and wife, 28 native workers, 7 Sunday schools, 1 Young People's Society, 9 day schools, and 19 professed Christians.

MANILA: The principal city and capital of the Philippine Islands, situated on the S. W. coast of Luzon Island, at the head of Manila Bay. It has important suburbs on the N. bank of Pasig River. It was taken by the Spaniards in 1571, and by the U. S. in May, 1898. It has extensive commerce in sugar, hemp, tobacco, rice, and dyestuffs. It has been many times visited by earthquakes, and is subject to typhoons. The climate is hot, damp and unhealthful. Population, 300,000. Station of the ABS (1899), with 1 agent. Also of the BEBS, with 1 agent and 1 bookroom. Station also of the ME, with 3 missionaries and their wives, 3 women missionaries, 5 places of worship, 4 Sunday schools, and 1,489 professed Christians, of whom 597 are communicants. Also station of the PE, with 4 missionaries. Also station of the Peniel Mission Society, with 2 mission workers. Station also of the PN (1899), with 3 missionaries, one with his wife; 6 native workers, 1 place of worship, 1 Sunday school, 3 day schools, 1 dispensary, and 360 professed Christians. Station also of the United Brethren Women's Association (1901), with 2 missionaries. The YMCA (1900) also has a representative here and a Young Men's Christian Association.

MANISA: A town in Asiatic Turkey, about 50 miles east of Smyrna; the ancient Magnesia. It is still an important city. Population about 40,000, Muslims, Greeks and Armenians. For many years it was a station of the ABCFM, used as the capital of the returns in connection with the mission. Population 7,600. It is now (1903) an outstation of Smyrna, which is again the mission center for the field.

MANKAR: A town and railway station in Bengal, India, situated in the District of Bankura, 32 miles N. W. of Burdwan. Station of the CEZ (1856), with (1903) 2 women missionaries, 4 native workers, 1 day school, and 1 dispensary.

MANNARGUDI: A town of Madras, India, situated 24 miles E. S. E. of Tanjore. Population (1891) 20,400, of whom 19,300 are Hindus. Station of the Leipzig Missionary Society (1897), with (1905) 10 native workers and 5 day schools. Church statistics are included in Siddamkumar. Station also of the WMS, with (1903) 3 missionaries, 73 native workers, 4 outstations, 7 places of worship, 12 Sunday schools, 12 day schools, and 201 professed Christians, of whom 133 are communicants.

MANNING'S HILL: A village in Jamaica, W. I., situated about 7 miles N. W. of Kingston. Station of the GWM, with 1 missionary, 138 professed Christians, 1 place of worship, 1 Sunday school, 1 day school, and 1 Young People's Society.

MANONA: An islet of the Samoan Islands, situated 2 miles from the W. end of Upolu. It forms a natural fortress with the adjacent isle of Apolima, and has had great importance in local history. Station of the Australian Wesleyan Methodist Society, with 9 native workers, 2 places of worship, 3 Sunday schools, 3 day schools, and 67 professed Christians. Society spells the name Manono.

MANOW: A village in German East Africa, situated about 20 miles N. W. of the N. end of Lake Nyassa. Station of the Berlin Missionary Society (1892), with 1 missionary, 2 native workers, and 37 professed Christians.

MANSINAM: A village of New Guinea. Malay-
sia, situated on the W. shore of Geelvink Bay, near its mouth. Station of the Utrecht Mission Society (1864), with (1901) 1 missionary and her wife, 2 native workers, 1 day school, and 56 professed Christians.

MANSURA: A town in lower Egypt, situated on the right bank of the Damietta arm of the Nile, about 28 miles N. E. by E. of Tanta. It is an important commercial town and has a population of 26,900. Station of the UP (1866), with (1903) 2 missionaries, 1 woman missionary, and 200 boarders. Society says the name Monsurah.

MANUANE: A village in the Transvaal, South Africa, situated in the Marico District, about 27 miles N. W. of Zeerust. Station of the Hermannsburg Mission Society (1882), with (1901) 1 missionary and his wife, 6 native workers, 1 place of worship, 1 day school, and 1,392 professed Christians.

MANZANILLO: A town and seaport in Cuba, West Indies, situated on the E. side of a large bay, on the S. side of the island, 15 miles of San Diego. Population, 34,000. Station of the American Baptist Home Missionary Society (1889), with (1901) 1 missionary, 2 Sunday schools, and 42 professed Christians.

MAO-PHLANG: A village in the Khasia Hills, Assam, India, situated about 18 miles S. W. of Shillong and 60 miles N. W. of Karimganj. Station of the Welsh Calvinistic Methodist Mission, with (1903) 1 missionary and wife, 51 native workers, 114 outstations, 54 places of worship, 87 Sunday schools, 102 day schools, and 2,794 professed Christians, of whom 1,084 are communicants. Society says the name Maplangh.

MAORI LANGUAGE: The language of the aborigines of New Zealand. It belongs to the Polynesian branch of the Malay family, and is written with Roman letters.

MAORIS: The aboriginal inhabitants of New Zealand, who belong to the Malay family of mankind. They claim to have migrated to New Zealand 500 years ago from “Hawaki,” which is supposed to be either Hawaii or Savai of the Samoan Islands. They are a fine race, of average stature, with olive-brown skins, and their heads exhibit a high order of intellectual development. They are beardless, as a rule, but that is due in part to the custom of plucking out the beard and shells. Most of the race have long black hair, but some have reddish hair, and in others it is frizzy. Large eyes, thick lips, and large, irregular teeth are characteristic. The women are smaller than the men, and, generally, inferior to them. Tattooing was a universal practise prior to the introduction of Christianity. The custom of tattoo, which has given a word in universal usage among English-speaking people, was practised by the priests to make any person or thing sacred and inviolable. Such regard was paid to the sanctity of the tattoo that even in war time tabooed persons or things were not harmed. Cannibalism was practised by the heathen Maoris, but has disappeared, together with infanticide, slavery, and polygamy, under the enlightening influences of Christianity.

The Maoris, like most races in tropical climates, marry young, but they are not a very prolific race. The people are very fond of music and songs.

MAPIOUTSING. See BETHERDA (BASUTO-LAND).

MAPLES, Chauney: Second Bishop of Likoma, born February 17, 1831; died 1895. Sailed for Zanzibar in March, 1867; arrived there in 1877, he left Zanzihar for Massai, where, for some years, he was to labor. About a year after Maples’ arrival, a new station was founded at Newala, nearer the River Rovuma, where a number of native Christians from Zanzihar were settled; and from these the mission work gradually extended. From Newala, accompanied by a fellow-missionary and ten Massai men as porters, he took a journey south from the Rovuma River into the unexplored country lying between it and the Mozambique. He travelled for months along the coast, and established an important station. In the autumn of 1887 he left Likoma to visit the wild Gwangwara bands on the mainland. Among these “thieves, robbers, and murderers,” as he called them, he labored heroically, and never lost faith that “God’s grace is able to turn these savage hordes into the children of Christ’s Church.” He was consecrated Bishop of Likoma in St. Paul’s Cathedral in 1895, and with delay he set out again for Africa, where, nearly twenty years before, he entered upon his missionary career. When he reached Port Johnston, at the junction of Lake Nyasa with the Shire River, he found a small sailing boat belonging to the mission, and, not waiting for the German steamer, he decided to go by the boat to Likoma at once. On his way he got into difficulty by a storm. During the violent storm the vessel sank, and both Bishop Maples and Mr. Williams were drowned. Bishop Maples had a special facility for acquiring languages, and in the first four years of his sojourn in Africa he mastered Swahili and Yao, and enough Makua to begin the translation of the New Testament.

MAPOON: A settlement on the W. side of Cape York Peninsula, Australia. Station of the Federate Churches of Australia, with (1900) 2 missionaries, 1 with his wife; 1 woman missionary, 1 Sunday school, 2 day schools. Station also of the Moravian Missions (1801), with (1900) 1 missionary and his wife, 1 woman missionary, 1 place of worship, 1 Sunday school, 1 day school, and 8 professed Christians.

MAPUTA: A settlement in Portuguese East Africa, situated on the River Maputa, about 25 miles from its mouth in Delagua Bay. The territory between Maputa and the Bay is called one of the most pestilential districts of Africa. Station of the South African General Mission (1898), with 1 missionary, 1 native worker, 3 outstations, 1 place of worship, 1 Sunday school, 1 day school, 1 dispensary, and 3 professed Christians.

MAREKEL. See Gilbert Islands.
MARAKESH: A town in Morocco, N. Africa, situated about 120 miles E. of Mogador, the southern capital of the Empire. Station of the South Morocco Mission (1891), with 3 missionaries, 2 with their wives; 3 women missionaries, 1 day school, 1 dispensary, and 1 hospital. The place is also called Morocco by Europeans.

MARANHÃO. See SAO LUIZ DE MARANHÃO.

MARAPJNE. See NEU HALLE.

MARASH: A town in the Province of Aleppo, Asiatic Turkey, situated about 80 miles N. of Aleppo. Station of the ABCP (1854), with (1002) 2 missionaries, 1 with his wife; 3 women missionaries, 65 native workers, 15 outstations, 13 places of worship, 17 Sunday schools, 39 day schools, 1 boarding school, 1 theological college, 1 college, 2 orphanages, and 1,582 professing Christian. Site of the Asia Minor Apostolic Institute (1895), with 1 native worker, 1 Sunday school, 1 day school, 1 boarding school, and 1 orphanage.

MARATHI LANGUAGE: One of the Indo branches of the Aryan family, spoken by a large part of the population of the Bombay Presidency. It is a language of culture, and is written with the Devanagari character slightly modified. In trade and common life a special set of characters is used called the Modhi character. The modified Devanagari character used in writing Marathi is called Balbodh. Missionaries have attempted to introduce the Roman letters for writing this language, but without great success.

MARBURG: A village near the E. coast of Natal, South Africa, situated 70 miles S. W. by W. of Durban. Station of the Hermannsburg Mission (1867), with (1902) 1 missionary and wife, 2 native workers, 1 day school, 2 places of worship, and 128 professed Christians.

MARDIN: A town in the N. of Mesopotamia, Asiatic Turkey, situated about 50 miles S. of Diarbekir, with a population of 15,000. Station of the ABCFM (1858), with (1902) 2 missionaries and wives, 1 woman missionary, 43 native workers, 18 outstations, 20 places of worship, 12 Sunday schools, 1 boarding school, 1 hospital, and 346 professed Christians. The seminary furnishes evangelists and teachers to the CMS and the RCA in Arabia.

MARKAPUR: A town in Madras, India, about 18 miles N. E. of Cumbum. Station of the ABM (1893), with (1903) 1 missionary and his wife, 26 outstations, 7 places of worship, 9 Sunday schools, 10 day schools, and 4,060 professed Christians, of whom 2,700 are communicants.

MARIANNE ISLANDS. See LADRONNE ISLANDS.

MARIONES: The Mariotes of Syria take their name from John Maron, their political head, and religious patriarch, who died in 701. During the 6th and 7th centuries of our era the Monophysite controversy was raging throughout the Eastern church. Armenia, Syria, and Egypt, frontier lands of the Byzantine Empire, were deeply infected by the heresy. The Emperor Heraclius (610-641) was anxious to reunite the church that he rebuilt the Monophysite heresy into the Empire of the three southeastern provinces. With the help of Sergius, Patriarch of Constantinople, a Syrian, he arranged a compromise doctrine which he hoped would put an end to the rancorous theological dispute. The statement proposed was that, whatever might be said as to Christ having one (divine) or two (human and divine) natures, all ought to agree that He has but one will (divine, and therefore sinless). Honorius, Bishop of Rome, assented to this proposition, and many of the Monophysites agreed to accept it. But no impious doctrine could, of course, hold after a long controversy (during which the Saracens conquered Syria, Egypt, and all North Africa) the case was decided against the Monothelites (monos, one, thelo, to will), and Bishop Honorius (afterward called "Pope") was declared in error.

Among many who accepted the Monothelite heresy were Christians of Syria who fled to the mountains before the Saracen invader. John Maron was their leader. High up on the shoulders of Lebanon and Anti-Lebanon these vigorous people managed for five hundred years to maintain their independence in the face of Byzantine Greek and Saracen. Defended by tremendous ravines and snowy mountain passes, they were never seriously in danger. The long contest developed manly qualities and industry. They spoke Syriac, and used it in all their services. A sort of feudal system developed itself. The government was theocratic, the head of the state being styled "The Patriarch of Antioch and all the East." The episcopal residences at Aleppo, Ba’albek, Jebel, Tripoli, Eden, Damasass, Beirut, Tyre, and Cyprus. Village sheikhs were elected, as were all the officers, secular and religious.

The Crusaders brought to light this interesting people, so long cut off from Christendom. William of Tyre and Jacob de Nitré have left us accounts of the Maronites, who reputed themselves with the Crusaders, and in 1182 opened communications with the papal hierarchy. They gradually dropped their heretical tendencies, adopted the Arabic language as their vernacular, and in 1445, at the Council of Florence, were taken entirely under the wing of the Roman Church. They were allowed to retain their Syriac liturgy, the celebration of the communion in both kinds, the marriage of the lower clergy, their own fasts and days, their own saints. In 1596 the decree of Trent was accepted by them. Transubstantiation, prayers for the Pope, and other novelties were introduced. A special college was established at Rome (Collegium Maronitarum) for investigations of Maronite scholars, which gave to the world the learned Assemani. Schools for the clergy and printing presses were established in Syria. A papal legate was sent to Beirut, and to-day the Maronites are submissive followers in the Latin Church.

There are about 250,000 of this sect scattered all over the Lebanon range and the Anti-Lebanon. They are massed somewhat in the northern districts of Lebanon (Kessrawan and Baalbech), and have complete control of local affairs. They are found as far south as Mt. Hermon, in the heart of the Druse country. The hostility of Druse and Maronite, fostered by the Turks through policy, culminated in the massacre of 1860, in which thousands of Maronites were butchered. European intervention compelled the Sultan to organize the semi-autonomous province of the Lebanon, which is under protection of the great powers of Europe. The stronghold of the Maronites in the North Lebanon region is high up on the mountains, with
surpassing views over the Mediterranean to the west. It is a bit of the Middle Ages left over. The priests have complete control, and the people are frugal and industrious. They are illiterate, except for the priests and some of the merchants, and the women are illiterate. The raising of cattle, silk-culture and weaving, vineyards, cotton, maize, and potatoes are the main crops; rice also is grown in the southern portion of the island. The inhabitants are said to be predominantly Mohammedans, with a few Christians and Jews.

To the southeast of the island, on the coast of the Persian Gulf, is an island of the same name. It is a small, uninhabited island, and is covered with desert vegetation. The island is said to be rich in minerals, but no attempts have been made to explore the region.

The island of Marappa, which is mentioned in the Bible, is said to be situated near the mouth of the Tigris River. The island is said to be a small, uninhabited island, and is covered with desert vegetation. The island is said to be rich in minerals, but no attempts have been made to explore the region.

Colloquial Mediums of the Chinese. He was associated with Dr. Carey in preparing a Sanskrit grammatical and Bengali-English dictionary, and a public address to the latter. Raja Rammohun Roy having assailed the miracles of Christ in a work entitled The Precepts of Jesus the Guide to Peace, Dr. Marshman replied in a series of articles in the Friend of India, afterward published in a volume entitled A Defence of the Design of the Creation. To this Rammohun Roy replied. The degree of D.D. was conferred on Mr. Marshman by Brown University in 1811.

MARSOVAN: A town in the western part of the Province of Sivas, Asiatic Turkey, situated about 130 miles N. W. of Sivas, and 60 miles S. W. of Samsun, its port. Station of the ABCFM (1852), with (1902) 4 missionaries and their wives, 4 women missionaries, 51 native workers, 17 outstations, 12 places of worship, 32 Sunday schools, 18 day schools, 1 boarding school, 1 theological class, 1 industrial institute, 1 dispensary, and 1 hospital, all attended by converted Christians. The educational center of the Western Turkey Mission. Anatolia College, a flourishing institution whose buildings make the mission premises conspicuous through all the surrounding district, is the only establishment of its kind to be found within a radius of 250 miles.

MARTYN, Rev. Henry: Born at Truro, Cornwall, February 18, 1781; attended the grammar school of Dr. Carden in his native town; entered St. John's College, Cambridge, 1797; received in 1801 the highest academic honor of 'senior wrangler,' and also the prize for the greatest proficiency in mathematics. In 1802 he was chosen fellow of his college, and took the first prize for the best Latin composition. He was twice elected public-examiner. It was his intention to devote himself to the bar, but the sudden death of his father and the faithful preaching and counsels of Mr. Simeon, the university preacher, led to his conversion and dedication to the ministry. In 1802 a remark of Mr. Simeon on the good accomplished in India by a single missionary—William Carey—and a subsequent perusal of his works, induced him to devote himself to the work of a Christian missionary. He was ordained deacon October 22, 1803, then priest, and served as curate of Mr. Simeon. But his heart was still set on work in heathen lands, and he designed to offer himself to the Church Missionary Society. Financial discouragement made it necessary for him to take a position which would give him the means of supporting his sister, and he accepted a chaplaincy under the East India Company. In October, 1806, he went to his station, Dinapur. On the boat he studied Sanskrit, Persian, and Arabic, and translated the Parables. At Dinapur and Cawnpore most of his work in India was done in the space of four and a half months. He not only labored among the soldiers and English residents as chaplain, but preached to the natives in their vernacular, established schools, and spent much time in the work of translation. He studied Sanskrit, soon became fluent in Hindustani, and had religious discussions daily with the munshi's and pandits. In February, 1807, he finished the translation of the Book of Common Prayer in Hindustani, and, soon after, a Commentary on the Parables. In March, 1808, he completed a version of the New Testament in Hindustani, which was pronounced by competent judges to be idiomatic, and intelligible by the natives.

In April, 1809, he was removed to Cawnpore, 626 miles from Calcutta. He went in a palan-keen in the hotsnest of the season. In his journey of 400 miles from Chunar, the intense heat nearly proved fatal to him. On his arrival he fainted away. There being no church building at Cawnpore, he preached to a thousand soldiers, drawn up in a hollow square in the scorching air, with the heat so great that many were overpowered, the service was held before sunrise. At the end of this year he made his first attempt to preach to the heathen in his own compound, "amidst groans, hissings, curses, blasphemies, and threatenings," but he pulled his work among the hundreds who crowded around him, comforting himself with the thought that if he should never see a native convert, God might design by his patience and continuance to encourage other missionaries. He now translated the New Testament into Hindi and the Gospels into Judeo-Persian. Having perfected himself in the Persian, he prepared, by the advice of friends, with the assistance of the munshi Sabat, a version of the New Testament in that language. His health being seriously impaired, the doctors ordered him to take a sea voyage; and his version not being sufficiently idiomatic, he decided to go to Persia and correct it with the aid of learned natives, and also revise the Arabic version, which was nearly finished. After preaching in the new church, whose erection he had accomplished, he left Cawnpore October 1, 1810. Delayed at Calcutta a month, he left, January 7, 1811, for Bombay, and after a five months' journey reached Shiraz June 9, 1811, where, with the help of learned natives, he revised his Persian and Arabic translations of the New Testament. He made also a version of the Psalms from the Hebrew into Persian. He held frequent discussions with the mollahs and sufis, many of whom were greatly impressed. "Henry Martyn," said a Persian mollah, "was never beaten in argument; he was a good man, a man of God." To counteract the effect of these discussions and of his translation on the New Testament, a band of converted all the mollahs wrote an Arabic defense of Mohammedanism, to which Martyn replied in Persian. He had also a public discussion with a professor of Mohammedan law, and another with Mirza Ibrahim, in a court of the palace of one of the Persian princes in the presence of a large body of mollahs. Having ordered two splendid copies of his manuscript of the Persian New Testament to be prepared, one for the Shah of Persia, the other for Prince Abbas Mirza, his son, he left Shiraz for the Shah's camp to present them. The Shah refused to receive them without a letter from the British ambassador, and he proceeded to Tabriz to obtain one from Sir Gore Osley. On this journey he suffered much from fever, but after arriving at Tabriz he was tenderly cared for by the ambassador and his lady. Being too ill to make the presentation to the Shah, Sir Gore kindly performed this service, and received from his majesty a letter of acknowledgment, with appreciative mention of the excellence of the translation. After a temporary recovery, he found it necessary to seek a change of climate. On September 13, 1811, he left Tabriz on horseback, with two Armenian servants, for England via Constantinople, 1,300 miles.
distant. Tho the plague was raging at Tokat, he was compelled to stop there from utter prostration, and, after a week's illness, died, October 16, 1812, in the thirty-second year of his age, among strangers, with no friendly hand to care for his wants. His body rests in the Armenian cemetery. A monument was erected over the grave in 1813 by Mr. Claudius James Rich, the accomplished British resident at Baghdad, with an inscription in Latin. The East India Company had another constructed, bearing on its four sides an inscription in English, Armenian, Turkish, and Persian. The monument stands in the Armenian cemetery.

He published Sermons Preached in Calcutta and Elsewhere: a Collection of Controversial Tracts on Christianity and Mohammedanism (1824); Journals and Letters (1837). The great work of Martyn's life was the translation of the Bible. His versions of the New Testament in Hindustani and Persian, spoken by many millions of people, are enduring monuments not only to his scholarship, but to his Christian zeal.

MASASI: A village in the fertile Rovuma region of German East Africa. Station of the UX (1877), with (1863) 3 missionaries, 18 native workers, 1 place of worship, 13 day schools, 1 boarding school, and 1,129 professed Christians, of whom 942 are communicants.

MASCAT: Town and capital of Oman, Arabia, situated on the south coast of the Gulf of Oman, on a bay closed in front by a small island, and bordered E. and W. by high rocks with fortifications. It is an important commercial center in trade between Arabia, Asia, and Europe. The climate is very hot and malarious. Population, 40,000, mostly Arabs. Station of the RCA (1883), with 1 missionary, 1 native worker, and 1 boarding school. Society spells the name Muscat.

MASCURU: A village in Basutoland, Africa, situated on Caledon River about 100 miles N. N. E. of Aliwal North. Station of the Paris Evangelical Society, with (1902) 10 native workers, 2 outstations, 1 place of worship, 1 Sunday school, 3 day schools, and 555 professed Christians, of whom 351 are communicants. Society spells the name Massatu. Also station of the SPG, with 1 missionary.

MASITSI: A village in the S. part of Basutoland, Africa, situated near the Orange River, 63 miles N. N. E. of Aliwal North. Station of the Paris Evangelical Mission Society (1886), with (1863) 1 missionary and his wife, 31 native workers, 11 outstations, 1 place of worship, 1 Sunday school, 12 day schools, 1 industrial school, and 1,660 professed Christians, of whom 1,106 are communicants. Society spells the name Masitisiti. Station of the SPG (1857), with 1 missionary. Society spells the name Masiti.

MASON, Rev. Francis: Born York, England, April 2, 1799. Died at Rangoon March 3, 1874. He was appointed by the American Baptist Missionary Convention as a missionary December 17, 1829, ordained May 23, 1830, and sailed May 26 for Burma. After spending a short time at Maulmain he was stationed, January, 1831, at Tayoy. The province contained fifty Burmese villages. He was met at the wharf by Mr. Boardman. He accompanied Mr. Boardman on his last tour among the Karens, and witnessed his death. Being appointed to the work in his new field, he labored earnestly among the Karens, visiting them in their jungle homes, preaching, organizing churches, establishing schools. The rainy season was occupied in translating the Scriptures, and instructing in the theological seminary established for training Karen preachers.

Mr. Mason was not only a preacher among the Karens; he was also a man of science and a linguist. He translated the Bible into the two principal dialects of the Karen, the Sgau and Pwo. He also translated Matthew, Genesis, and Psalms into the Bghai, another dialect. He wrote and printed a grammar of the first two for the use of missionaries. Wishing to give the pupils of his theological school some scientific knowledge, he wrote an original treatise on Trigonometry, with its Applications to Land Measuring, etc. He was also one of the team that translated the Karen, and the government paid for an edition in Bghai Karen. At the request of English residents at Maulmain he prepared and had printed a work on the natural productions of the country, entitled Tennesserim; or, Notes on the Flora, Fauna, Minerals, and Nations of British Burma and Pegu, of which The Friend of India says: 'It is one of the most valuable works of the kind which has ever appeared in this country, not only for the complete originality of its information, but also for the talent exhibited in collecting and arranging it.' His motive in investigating these subjects was the more accurate translation of the Scriptures, having observed that incorrect renderings of words used to designate natural objects often made the sense obscure or absurd. He studied medicine after reaching Burma, and wrote a small work on Materia Medica and Pathology, in three languages. His greatest literary work was a Pali Grammar with Chrestomathy and Vocabulary, which was received by scholars with great favor. In 1842 he started a Karen periodical, the first native paper published east of the Ganges, which continued until the next year. The Karens had no books but many traditions, among which were many remarkable Scripture traditions, all of which Mr. Mason collected. Those relating to Scripture were published in an appendix to his Life of Ko-Thah-Bya. In 1846 he yielded to the advice of the mission to return for rest to America. On arriving in Calcutta with health improved, he concluded to return to Burma and work on the translation of the Old Testament, stopping at Maulmain in order to have the advice of the missionaries there. The translation was finished in 1853, and, returning to Tayoy, he had the entire Bible printed. In appreciation of his marked literary and Biblical attainments the degree of D.D. was conferred upon him in 1853 by Brown University. After the printing of the Karen Bible he took his final departure from Tayoy for England and America. On reaching Maulmain with health improved, he decided to visit Taung-ngu, the ancient capital, and begin a new mission. He started, with Mrs. Mason, in a canoe, and found the people, who had never heard the Gospel message, would eagerly listen. Dr. Mason continued to labor until utter exhaustion compelled him to leave. He
returned to Taung-ngu in 1837. There, living next to the printing office, he learned the printer’s trade after he was sixty years old. In 1847 he set out for Calcutta to see one of his works through the press, but was attacked with fever at Rangoon and died after 46 years of missionary labor.

Besides the works mentioned, he published a memoir of his second wife, Mrs. Helen M. Mason, Life of Ko-Thah-byu, the Karen Apostle, a collection of Karen hymns, and The Story of a Workingman’s Life, an autobiography.

MASSAU: A town and seaport, capital of Birtrea, Africa, on a coral island in the Red Sea, 200 yards from the mainland. It is connected with the mainland by an embankment, which also carries an aqueduct. It is the chief trading exchange for Abyssinia. Its climate is unhealthful, dysentery and fever being prevalent. Its population is 20,000 and is very mixed. It has a strong Roman Catholic mission.

MASULIPATAM: A city and seaport in Madras, India, situated in the District of Kistna, 143 miles N. E. by N. of Nellore. Population, 38,800, of whom 33,500 are Hindus. The name means Finshtown and its port is called Mashlibandar (Fishport). This gives the official name to the town, which is Bandar. Station of the CEZ (1875), with 900 6 women missionaries, 53 native workers 10 day schools, 1 boarding school, 1 industrial school, 1 orphanage, and 1,072 Zanana pupils. Station of the CMS (1841), with (1903) 5 missionaries, four of them with their wives; 77 native workers, 1 outpatient, 1 place of worship, 1 working men’s Christian association, 43 day schools, 2 boarding schools, 1 college, and 4,675 professed Christians, of whom 867 are communicants.

MATADI: A trading post in the Congo Free State, Africa, on the left bank of the Congo, opposite Vivi, just below the lowest falls. It is the starting point of the Congo Railroad. Station of the BMS (1898), with (1903) 1 missionary and his wife, 1 native worker, and 1 day school. Station of the RBMU (1889) for forwarding stores to other stations.

MATAIEA: A village on the S. side of Tahiti Island. Station of the Paris Evangelical Mission Society (1886), with (1902) 1 missionary and wife, 1 place of worship, 1 Sunday school and 135 professed Christians.

MATALA: A village in the Transvaal, South Africa, situated about 22 miles N. W. of Pietersburg. Station of the Berlin Missionary Society (1865), with (1903) 1 missionary, 12 native workers, 4 outstations, 1 day school and 304 professed Christians, of whom 116 are communicants. Society writes the name Ga Matale, the meaning being “At (chief) Matale’s.”

MATALE: A town in the central province of Ceylon, situated 12 miles N. of Kandy. Population, 5,000. Station of the BMS (1897), with (1903) 1 missionary, 5 native workers, 5 outstations and 2 day schools. Station of the FFMA (1896), with (1901) 2 missionaries, one with his wife; 17 native workers, 4 outstations, 7 places of worship, 6 Sunday schools, 8 day schools and 1 dispensary.

MATAMOROS: A town in the state of Tamaulipas, Mexico, situated on the Rio Grande del Norte, 185 miles E. by N. of Monterey. Population, 13,000. Station of the AFFM (1871), with (1900) 1 missionary and wife, 2 women missionaries, 5 native workers, 1 place of worship, 1 Sunday school, 1 day school, 1 boarding school, 1 temperance society and 100 professed Christians. Station of the PS (1874), with (1903) 1 woman missionary, 1 native worker, 1 outpost, 1 Sunday school, 1 day school, 1 boarding school and 30 professed Christians.

MATANZAS: A town and seaport on the N. coast of Cuba, situated 48 miles E. of Havana. It has a large trade in sugar. Its climate is malignant. Population, 27,000. Near by are some very fine stalactite caves. Station of the American Church Missionary Society (1883), with (1900) 2 missionaries, one with his wife; 4 women missionaries, 7 native workers, 1 place of worship, 1 Sunday school, 1 day school, 1 industrial class, 1 orphange. Station of the MES, with (1902) 1 missionary, 2 women missionaries, 1 native worker and 1 day school.

MATARA: A town on the S. coast of Ceylon, situated 24 miles E. S. E. of Galle. Population, 8,600. Station of the SPG (1841), with (1903) 1 missionary, 38 native workers, 6 outstations, 7 places of worship, 7 day schools, 1 boarding school and 280 professed Christians, of whom 110 are communicants. Station of the WMS, with (1903) 2 missionaries, 2 women missionaries, 53 native workers, 7 outstations, 2 places of worship, 13 Sunday schools, 15 day schools, 2 boarding schools and 109 professed Christians.

MATATIELA, or MATATIELE: A settlement in Cape Colony, South Africa, situated in Griqualand East, 110 miles W. S. W. of Pietermaritzburg. Station of the ECS (1878), with (1900) 3 missionaries, 18 native workers, 7 outstations, 9 places of worship, 7 day schools and 372 professed Christians.

MATAUTU: A settlement in Savaii, Samoa. Station of the LMS.

MATEHUALA: A village in the state of San Luis Potosi, Mexico, situated 22 miles W. S. W. of Culoteca. Station of the AM (1890). Station of the LMS, with (1900) 1 missionary and wife, 3 native workers, 1 place of worship, 1 Sunday school, 1 Young People’s Society, 1 printing press, 1 day school, 1 temperance society and 30 professed Christians.

MATHER, Robert Cotton: Born November 8, 1808, at New Windsor, Manchester, England, educated at Edinburgh, Glasgow, and Hambledon College; sailed July 9, 1833, for India, as a missionary of the LMS. He was stationed at Benares for four years, and then removed with his family to Mirzapur, founding a new station. In 1844 he went to England for his health. Returning in 1846, he continued his work in and around Mirzapur, and prepared Christian vernacular literature. He again visited England in 1857, where he resided during three years, at the request of the North India and the British and Foreign Bible Societies, engaged in making a revision, with marginal notes, of the whole Bible in Urdu. This was carried through the press, and the New Testament in English and Urdu was reprinted. He reembarked for India November 20, 1860, with Mrs. Mather. In 1862 he received the degree of LL.D. from the University of Glasgow. In 1869 he left Mirzapur for Almora, seeking to benefit his health. He aided
in mission work while carrying on his literary work, and editing a new edition of the entire Bible in Urdu printed in Roman letters. He commenced work on an edition in Urdu printed in Arabic characters with references. He returned to Mirzapur in 1870. In 1873 he left India on his final return to England. At the request of the Religious Tract Societies of North India and London, he undertook to prepare and carry through the press a Hindustani version of the New Testament portion of the Tract Society's Annotated Paragraph Bible. This was completed in two years. He then undertook the preparation of a similar version of the Old Testament portion of the same work. Unable to resume foreign missionary work, he thus continued in England to work for India with his pen. He died at Finchley, near London, April 21, 1877.

MATOUTOENE: A settlement in Portuguese East Africa, situated about 40 miles S. by W. of Lourenço Marques. Station of the Swiss Reformed Church, commenced (1903) 1 missionary and his wife, 7 native workers, 15 day schools, 10 outstations, and 353 professing Christians, of whom 46 are communicants.

MATSUMOTO: A town in Hondo, Japan, situated 135 miles S. W. of Niigata. Population, 21,000. Station of the Church of England in Canada (1894), with (1901) 1 missionary and his wife, 1 woman missionary, 4 native workers, 1 outstation, 1 female helpers' training class and 19 professing Christians. Also station of the Methodist Church in Canada (1900), with 1 native worker, 1 place of worship, 1 Sunday school and 5 professing Christians.

MATSUYAMA: A town and seaport on the N. W. coast of Shikoku, Japan, situated 155 miles W. S. W. of Kobe. Population, 24,600. Station of the ABCFM (1876), with (1900) 1 missionary and his wife, 24 native workers, 5 outstations, 3 places of worship, 6 Sunday schools, 1 boarding school and a hostel for girls. Station also of the MES (1888), with (1900) 1 missionary and wife, 2 native workers, 3 outstations, 2 places of worship, 4 Sunday schools among young people's societies, 1 Young Men's Christian Association and 63 professing Christians. Station also of the PE, with (1903) 1 native worker, 1 place of worship, 1 Sunday school and 14 professing Christians.

MATSUYE: A town on the W. coast of the main island, Japan, situated about 70 miles N. W. of Okayama. Station of the CMS (1891), with 1 missionary, 4 native workers, 4 outstations, 1 place of worship, 1 day school and 307 professing Christians, of whom 174 are communicants.

MATTOON, Rev. Stephen: Born at Champion, N. Y., U. S. A., May 5, 1816; graduated at Union College 1842, at Princeton Theological Seminary 1846; sailed for Siam as a missionary of the Presbyterian Board July 23, 1846, reaching Bangkok March 22, 1847. Bitterly opposed at first, he soon won the confidence of the people, and carried forward the missionary work with great success. He was the first to translate the Gospels into the Siamese tongue, and his last great work before returning home was the revision of the entire New Testament in that language. He was a leader in all the enterprises connected with the mission. and his prudent counsel was sought and his advice accepted by all. He resided and labored mainly in Bangkok, and was pastor of the First Presbyterian Church in that city from 1860 to 1866. In the latter year, on account of the failure of Mrs. Mattoon’s health, he returned home. He was in the pastorate and in educational work in the United States, never neglecting the opportunity to preach until he died in 1889.

MAUBIN: A town in the district of Thongwa, Burma, British India, situated 32 miles W. of Rangoon. Population, 5,500, mostly Karens, and of close 10,000 are Burmese. Station of the ABMU (1879), with (1903) 1 missionary and his wife, 1 woman missionary, 27 native workers, 17 places of worship, 4 Sunday schools, 6 day schools, 1 boarding school and 879 professing Christians.

MAULVI: One of the Hawaiian Islands, between Hawaii and Oahu. The inhabitants, 12,106 in number, are all nominally Christians. Station of the Hawaiian Evangelical Society.

MAULMAIN: A town and seaport on the left bank of the Salwin River, Burma, British India. Low hills run north and south through the town with European quarters on the west and native on the east of the hills. Population (1901) 58,446, of whom 27,000 are Buddhists and 13,500 are Hindus. Station of the ABMU (1827), with (1903) 4 missionaries and their wives, 8 women missionaries, 125 native workers, 38 outstations, 37 places of worship, 4 boarding schools, 1 dispensary and 1 hospital, 43 Sunday schools, 42 day schools and 5,300 professing Christians, of whom 2,542 are communicants. Station of the SPG (1859), with 1 missionary, 1 woman missionary, 27 native workers, 2 day schools, 2 boarding schools and 109 professing Christians. The name is also written Maulmein.

MAULVI BAZAR. See Mulvi Bazar.

MAURITIUS: An island lying in the Indian Ocean, 500 miles east of Madagascar. Area, 708 square miles. Together with its dependencies, the Seychelles group, Rodrigues and Diego Garcia (total area, 172 square miles), it forms a colony of Great Britain. Climate tropical, and very malarious and unhealthful on the coast. Population in 1901 was nearly 576,000; of this number 109,000 are Indians, 19,000 are Africans, mixed races, and whites. The Chinese number 3,935. The people are divided in their religious belief as follows: Hindus, 206,000; Roman Catholics, 113,000; Mohammedans, 41,000, and Protestants, 6,644. State aid is granted to both Roman Catholic and Protestant churches. English, French, and the languages of the different races represented are spoken there. The island was originally a French colony, and a stronghold of pirates in the Indian Ocean. In 1810 the English took possession of it, and in 1814 the 90,000 negro slaves were emancipated. The island is one of the foremost sugar-producing places of the globe, and the emancipation of the slaves necessitated the importation of labor from China and India, with the resulting conglomerate population. Education is conducted partly by governmental and partly by mission schools. There is also a Royal College. Missionary work was commenced here in 1814 by the LMS. After the Society gave up the mission in 1832 Mr. Le Brun, their missionary, returned to the island and took the pastoral care of the people, and the church of 50 members. When persecution in
Madagascar (1836) drove out both Christians and missionaries, one of the latter, Mr. Johns, went to Mauritius, and continued to labor among the Malagasy. A plot of land was procured, and a congregation of Malagasy refugees was gathered together in 1845, after Mr. Johns' death, and theological instruction was given to young men from Madagascar, to prepare them for work, as soon as the persecution ceased. In the meantime Mr. Le Brun continued his labors among the natives, and in 1850 there were 173 church-members at the stations of Port Louis and Moka. The SPG and the CMS are practically confining their efforts to the immigrants from India, who are engaged in work on the sugar plantations. These form two-thirds of the population.

The language difficulty is a very serious one. A missionary writes that a class of thirty received instruction in five languages—the English, French, Creole, Tamil, and Hindi. Even in this difficult field harvests have been gathered, and the CMS has received over 5,000 in the course of its work.

Mauritius-Creole Language: A dialect of the French which has become the medium of business in Mauritius and is the society language of the Creoles of the island.

Mavelikara: A town in the native state of Travancore situated 25 miles N. of Quillon. Station of the CEZ (1893), with (1903) 2 women missionaries, 8 native workers, 1 young women's Christian association. Station also of the CMS (1839), now under charge of the local Church Council, with 143 native workers, 78 day schools, and 1,245 professed Christians, of whom 3,706 are communicants.

Mawla: A village in Assam, India, situated in the Khasi Hills, 8 miles S. W. of Shillong. Station of the WC, with (1903) 1 missionary and his wife, 9 native workers, 8 outstations, 6 places of worship, 6 Sunday schools, and 659 professed Christians.

Mawphlang. See Mao-phlang.

Maya language: A South American language, spoken by about half a million Indians of Yucatan. It has been reduced to writing with the use of the Roman letters.

Mayaram: A town in Madras, India, situated in the district of Tanjore, 28 miles N. N. W. of Nagapatam. Population (1891), 25,800, of whom 22,209 are in the schools of the Indian Missionary Society (1845), with (1903) 1 missionary and his wife, 39 native workers, 14 outstations, 9 places of worship, 12 day schools, 1 boarding school, and 1,370 professed Christians. Society spells the name Majawaram.

Mayebashi: A town in Japan, situated 70 miles N. W. of Tokio, having an important silk trade. Mayebashi silk being among the best of raw silks. Population, 20,000. Station of the ABCFM (1894), with (1902) 1 missionary and his wife, 2 women missionaries, 11 outstations, 4 places of worship, 9 Sunday schools, 1 boarding school, and 1 orphanage. Station of the PE (1888), with 1 missionary, 1 woman missionary, 1 native worker, 2 places of worship, and 46 professed Christians. The name is also written Maebashi.

Mayhew, Experience: Born Martha's Vineyard, Maas., 1673. Died in 1788. He was the eldest son of Rev. John Mayhew, and great-grandson of Gov. Thomas Mayhew. In 1694, at the age of twenty-one, he began to preach to the Indians, having the oversight of six congregations, which continued until his death, a period of sixty-four years. He learned the Indian language in his infancy, and having afterward thoroughly mastered it, he was employed by the Commissioners to make a new version of the Psalms and the Gospel of John. This was accomplished in 1709, in parallel columns of English and Indian. He was offered the degree of Master of Arts by Cambridge University, which he declined; but it was conferred at the public commencement July 3, 1723. He published in 1727 Indian Converts, comprising the lives of 30 Indian pawners at the New south, and converts; also a volume entitled Grace Defended.

Mayombo: A settlement in British East Africa, situated 8 miles from the Uganda Railway station for Kikuyu, about 150 miles S. E. of the railway terminus at the Victoria Uganda, and 338 miles N. W. from Mombasa. It is in a fine forest district at an altitude of 6,900 feet, and has a population of one healthy Chinese. Station of the CMS (1901), with 2 missionaries and 1 missionary's wife. The station at Fort Smith has been removed to this place.

Mazagan: A town and seaport on the W. coast of Morocco, in a fertile district, which gives it commercial importance. The climate is not unhealthy. Station of the South Morocco Mission Society (1891), with (1900) 2 missionaries, one with his wife, and 1 dispensary.

Mazatlan: A town on the W. coast of Mexico, situated 100 miles S. W. by W. of Durango. It is a trade center for the mining district of Sinaloa. The climate is healthy from November to May, but hot, wet, and unhealthy the rest of the year. Population, 20,000. Station of the MES (1890), with (1903) 1 missionary and wife, 1 native worker, 1 outstation, 1 Sunday school.

Mazeras: A settlement in British East Africa, 15 miles W. by S. of Mombasa. Station of the United Methodist Free Church (1893), with (1903) 1 missionary, 3 native workers, 2 outstations, 2 places of worship, 2 day schools, 2 Sunday schools, and 163 professed Christians.

Mazizini: A village on the W. side of Zanzibar Island; a suburb of the town of Zanzibar. Station of the UM (1889), with (1900) 2 missionaries, 6 native workers, 1 place of worship, 1 day schools, 1 Sunday school, 1 theological class, and 10 professed Christians.

Mbeya's: A settlement, in Africa, of a chief whose tribe is found about 75 miles E. N. E. of the north end of Lake Tanganyika and 9 miles S. of Mpongwe. Station of the Berlin Missionary Society (1899), with 1 missionary and 19 professed Christians.

Mbundu language: An important African language belonging to the Bantu family, and spoken in Angola, Portuguese West Africa, and as a trading language over a wide region to the eastward. There are two principal dialects, the Ki-Mbundu and the U-Mbundu; indeed, some consider these as separate languages, whose differences are radical and permanent. It is to be hoped, however, that they will follow the general laws of language under civilised environment, and tend to become one. The Ki-Mbundu was reduced to writing by Roman Catholic missionaries in 1842, and grammars and dictionaries of it in Portuguese have long existed.
odist missionaries (U.S.) have done good work in studying its peculiarities and compiling a Christian literature in it. In Bihé the ABCFM missionaries are doing the same kind of work in the U-Mbundu branch.

MBWENI: A village on the W. side of Zanzibar Island, a little S. of Zanzibar town. Station of the UM (1874), with (1903) 2 missionaries, 6 women missionaries, 15 native workers, 1 out-station, 2 places of worship, 3 day schools, 1 boarding school, 1 industrial school, 1 dispensary, and 460 professed Christians, of whom 203 are communicants.

McALL MISSION: Known in France as the Mission Populaire Évangélique. Headquarters, 36 rue Godet de Mauroy, Madeleine, Paris. Founded in 1872 by the Rev. Robert W. McAll, then a pastor in Hadleigh, England, in response to the remark of a Parisian workingman to the effect that the people of France would have nothing to do with missions. "They would be 'ready to hear' if any one would teach them "a religion of freedom and earnestness." These words, spoken August 18, 1871, moved Mr. and Mrs. McAll, after taking counsel with eminent Parisian pastors, to devote themselves to the evangelization of the working people of France. The requisite permission was obtained from the police commissioner, and on January 17, 1872, the mission was opened in Belleville, the communistic quarter of Paris. Its opportunities at once became evident. Calls for new stations came from many quarters, and volunteer service was freely offered, especially by French pastors and laymen. It was several years before any unaided worker was added to the staff, and Dr. and Mrs. McAll never received any stipend from the mission.

By 1888 the number of mission halls was twenty-two in Paris and its environs, and 108 in provincial towns and cities, including Corsica, Tunis, and Algiers, with 20,000 sittings and an aggregate attendance of 1,555,600. The number of mission halls has since been gradually reduced by nearly one-third, although the number of persons reached is greatly increased. The smaller number of mission halls is in part due to financial necessity, but mainly to development in the activities of the French Protestant churches, which have taken over one or more of the mission halls. Thus the McAll Mission is becoming more and more a pioneering agency and feeder to the churches. Its halls, however, are still centers of a great variety of activities: Sunday and Thursday Bible schools, mothers' meetings, Christian Endeavor, temperance work, dispensaries, lending libraries, domestic visiting, and an extensive circulation of tracts and of the Scriptures. But all these works are tributary to the evangelistic purpose of the mission, evangelistic meetings being held in every hall at least twice, and in many, seven times a week.

The teachings are purely evangelical, no criticism or comment upon other forms of teaching or worship being allowed. No effort is made to win converts from the church of Rome, and many which have been grafted there to the mission, however, are from free thinking and atheistic ranks—that immense multitude that have shaken off allegiance to Roman Catholicism.

Except in one or two cases of extreme urgency the Mission invests no money in buildings and founds no churches. Its halls are hired shops, and converts are sent to unite with some neighboring church, or if none can be found, quitted through his regular work in the mission hall. It has often occurred that the majority of new members of a church in any given year are from the nearest mission hall.

The expenses of the Mission (which average less than $1,000 annually per hall) are met by voluntary contributions from the French, British, and American Protestant, Protestant, European, and American Protestant; the United States, Canada, the descendants of the Huguenots in South Africa, and, in ever increasing amount, from the Protestants of France. The American McAll Mission Association, founded in 1883 to collect funds for the Mission, has 67 auxiliary societies and provides more than a third of its income.

An important work was carried on in the three exposition years, 1878, 1889, 1900, by the Mission, in cooperation with the British and Foreign Bible Society and the Religious Tract Societies of London and Paris. Halls were opened near the exposition gates, with unceasing services, opportunities for religious conversation, and an enormous distribution of tracts and Scripture portions. In 1890 a citizen of New York provided 10,000 copies of the "Marked New Testament" in French, which were put to judicious use. Many remarkable conversions were due to this work in the exposition.

About 1885-1888, a missionary ship having been lent to the Mission by Mr. Henry Cook, of the English Seaman's Mission, an important work was carried on in the seaboard towns of Brittany and Normandy, and up the Seine to Paris, resulting in the founding of several important stations. The chief advantage of the method was that the vessel, being commissioned and equipped to hold meetings, encountered no delay in obtaining local permits or suitable halls for the purpose. This suggested a similar mission along the inland waterways of France. Two chapel boats, expressly designed for the work, now carry the Gospel along these "silent highways." "Le Bon Messager" was commissioned in 1890, and "La Bonne Nouvelle" (mainly the gift of an American woman) in 1902. This pioneer work has been singularly fruitful. Municipal and communal authorities almost invariably, and parish priests not infrequently, show hearty sympathy with the work. Many in the "hard core" of the empire have been converted in two and often three successive services evening after evening. An increasing number of permanent works follow the boats, established by French Home Mission Societies or by resident Protestants.

In January, 1892, the Mission celebrated its twentieth anniversary, and Dr. McAll's seventy-third birthday, with many tributes of honor and gratitude. In these the French Government joined by conferring upon Dr. McAll the cross of the Legion of Honor. On May 11, 1893, worn out with excessive care and labor, Dr. McAll went to his reward, being buried with military honors in the cemetery of Fère La Chaise. He had already called to the Honorary Presidency a prominent business man of Paris, M. Louis Saüter, and to the active direction of the work the Rev. C. C. McCall, Dr. McAll's son, who is himself a convert in his own eyes. Since then the success of the Mission has been unabated, its importance increasingly recognized by French Protestants. The most important events of recent date (1903), besides the growing success of the boat work, are
a remarkable awakening in nineteen mountain villages in the south of France, due to itinerating work from Grasse as a center, and a still more notable revival in Corsica, where, after many years of suffering from the jealousy of Missionaries, the people of Aulié have abandoned the Church of Rome, provided funds to build a church and asked the Government to send them a Protestant pastor.

McALL, Rev. Robert Whitaker: The founder of the McAll Mission, Paris, began his ministry in 1848 at Sunderland, and had successive pastorkates at Birmingam, Liverpool, Manchester, and Hadleigh. Mr. McAll was known as a keen student of natural history, being an accomplished botanist, and becoming a Fellow of the Linnean Society. The three subjects, architecture, botany, and geography, were specially interesting to him, and he turned them all to good account in his pastoral work, and later on in his mission work in France.

In the summer of 1871 Mr. and Mrs. McAll crossed the Channel for the first time for a short visit to France. Taking with them a supply of French tracts, they made a point of distributing them wherever they went, and on the last evening of their stay in Paris, August 17, 1871, they found their way to the populous quarter of Belleville, where the people had so terribly suffered during the war, and began to give away their tracts among the crowds of working people that were thronging the streets.

While Mrs. McAll was giving the tracts around, inside of a café on the Boulevard de Belleville, Mr. McAll was accosted by an intelligent workingman, who said: "Am I a Catholic, sir? I have something to tell you. Throughout this whole district, containing tens of thousands of workers, we cannot accept an imposed religion. But if anyone would come to teach us the religion of another kind, a religion of freedom and reality, many of us are ready for it."

Could it be that this was a call from God for them to go over and try the experiment and take the Gospel to the people of Paris? After much thought and prayer, and after consulting friends at home and in France, especially Pastor Georges Fischer and Pastor Theodore Monod, the important decision was made, and in October Mr. McAll resigned the pastorate of the church at Hadleigh, and December found him in Paris, with a small sum in hand for current expenses, and his slender patrony on which to subsist.

On the 18th of January, 1872, the first "McAll Mission Hall" was opened on the rue Julian Lacroix, Belleville, the first of a long list. Friends rallied round him, and Pastors Fischer, Monod, Bersier, de Pressensé, Appia, Vallette, Recolin, Dhombres, Holland, and many others were his warmest supporters. The importance of the work accomplished, from a purely philanthropic point of view, was recognized by two societies founded in 1871, the Société Nationale d'Encouragement au Bien, and the Société Libre d'Instruction et d'Education Populaire. The government of the Republic made Mr. McAll a knight of the Legion of Honor in July, 1872.

In 1892 Dr. McAll's health failed, and he resolved to go to England for a change, but after a winter of severe suffering he returned to Paris, where, in his 72d year, on Ascension Day, the 5th of May, 1893, he peacefully passed away.

McMULLIN, Robert: Born at Philadelphia, Pa., November 30, 1832; graduated at the University of Pennsylvania 1850, and at Princeton Theological Seminary 1854; ordained July 27, 1856, and sailed for China in the same year, as a missionary of the PN. He was stationed at Fategarh. A few months before his capture by the Sepoy rebels he wrote: "We are trying to be calm and trustful, but this cloud is fearfully dark. No matter whether our lives be preserved or not, we are doing a sacred purposeful work, which will sooner or later be made manifest." When the mutiny broke out he, with other missionaries, endeavored to reach Allahabad, a British station, but was made prisoner, and put to death at Cawnpur by order of the rebel chief, Nana Sahib, June 13, 1857.

MEDAK: A town in the native state of Haidarabad, India, situated on a branch of the Maniara River, 48 miles N. by W. of Haidarabad. Population, 7,000. Station of the WMS, with (1903) 1 missionary, 4 women missionaries, 14 outstations, 137 native workers, 10 places of worship, 27 Sunday schools, 27 day schools, 1 boarding school, 1 dispensary, 1 orphanage, 1 hospital, 1 missionarial school and 1,552 professed Christians, of whom 724 are communicants.

MEDELLIN: A town and the capital of the state of Antioquia, Colombia, situated at the foot of Mt. Santa Elena on the Force River, 150 miles N. of Bogota. It is a mining center and the supply depot for large regions. It was founded in 1675 and is next to the city of Bogota in importance. It has railroad connections with the Magdalena River at Porto Berrico. Altitude, 5,000 feet. Population, 18,000. Station of the PN (1889), with (1903) 1 missionary and his wife, 1 woman missionary, 1 Sunday school, 1 day school and 23 professed Christians.

MEDHURST, Walter Henry: Born at London, England, 1796; learned the trade of a printer; was educated for the ministry, and, having decided to be a missionary to the heathen, was appointed by the LMS, and sailed as its missionary in 1816 for Malacca. He was ordained there in 1819. In 1822 he was established at Batavia, in Java, remaining there eight years, during which time, and for several years afterward, he performed missionary work in Borneo and on the coasts of China. Having spent two years in England, he was stationed at Shanghai after the conclusion of the war in 1843. There he remained until his final return to England in 1856. This was the earliest Protestant mission in that city. The printing press owned by the LMS, which had to this time worked at Batavia, was now removed to Shanghai, and was under the charge of Mr. Medhurst. The University of New York conferred on Mr. Medhurst in 1843 the degree of D.D. In 1847 delegates from several missions convened in Shanghai for the revision of the Chinese versions of the Sacred Scriptures. After the completion of the New Testament Messrs. Medhurst, Milne and Stronach, by instruction of the directors, withdrew from the general committee, and prosecuted the work of revision of the Old Testament. This was completed in 1853. The result of this revision was a virtually new version of the Bible, very correct in idiom and true to the meaning of the original.

Dr. Medhurst left Shanghai in 1856 in impaired condition.
health for England, and died two days after reaching London, January 24, 1857. A remarkable linguist, he was a proficient in Malay, well versed in the Javanese, Javarese, and other Eastern languages, besides Dutch and French, in all of which he wrote.

**MEDICAL MISSIONS:** "The history of Medical Missions is the justification of Medical Missions."

One of the oldest Buddhist writings recognizes the close connection between body and soul, and the doctor who aided the sick was also a missionary. We find the following expression: "No physician is worthy of waiting on the sick unless he has five qualifications for his office: 1. The skill to prescribe the proper remedy; 2. The judgment to order the proper diet; 3. The motive must be life and not greed; 4. He must be content and willing to do the most repulsive office for the sake of those whom he is waiting upon; and 5. He must be both able and willing to teach, to incite, and to gladden the hearts of those whom he is attending by religious discourse.

In view of the fact that healing was made so prominent in the Apostolic Church, we cannot but wonder at the extent to which, in the ages after the apostles, it dropped out of the Church's work.

The Roman Catholics of the 16th and 17th centuries used medicine largely as an aid to mission work. It is to them chiefly that we owe the use of cinchona, which has rendered mission work possible in fever-stricken lands; as well as ipecacuanha and many other remedies which we probably should not have known so soon had it not been for their labors.

America has been the foremost nation in this cause. Her sons, and later her daughters, have been among the earliest to enter the field. The first medical missionary to leave the United States was Dr. John Scudder, who, with his wife, sailed in 1819 from New York for India, where he labored until his death in 1855. In 1849 there were just forty medical missionaries in the world—26 from America, 12 from Great Britain, 1 from France, and 1 from Turkey or Arabia, at Jaffa. It was not until 1879 that the value of this agency for reaching the outcast and the large cities of the world was sufficiently to lead to action. In this particular Great Britain has taken the lead, forming a large number of separate medical missions.

In 1876 Dr. William H. Thompson, with the desire of aiding medical missionary students, succeeded in establishing seven scholarships at the University of the City of New York, U. S. A. In April, 1879, Mr. E. F. Baldwin opened in Philadelphia the first organized medical mission in America, which was followed in 1881 by the International Medical Mission Society in New York City.

The power of medical missions is now universally recognized.

In all the heathen world the practice of medicine in marked by the densest superstition and characterized by the most extreme cruelties.

Even the Chinese have no doctors worthy of the name; they have absolutely no reliable knowledge of anatomy, physiology, chemistry, physics, surgery, or of obstetrical practise, and their "doctors" often do more harm than good. The sick are often left to die in the streets and not even a drink of water is given to the wounded after a battle, who, if unable to drag themselves away, are abandoned to perish. In India charma and incantations, Javar°se and the thick are dosed with putrid Ganges water, and patients are suffocated with charcoal-fires.

The Arab resorts with the greatest confidence to the most ridiculous, severe, or disgusting remedies. A slip of paper, containing certain written words, is swallowed with avidity; the sickness in the last stages of consumption takes a prescription directing him to feed, for a fortnight, upon the raw liver of a male camel, and fresh liver not being attainable, he continues the use of this diet in a putrid state until he dies; while the Arab's most common remedy for all diseases is the "kei," or the burning of the skin, entirely around the seat of pain, with a red-hot iron.

To every missionary a knowledge of medicine is of essential importance, for he may find himself removed many days' journey from a physician, even as magnificent roads are opened in the empire 2,000 miles. Let missionaries possess medical education, to enable them (1) to look after their own health; (2) to relieve the physical suffering around them; (3) to obtain ready entrance for the Gospel; and (4) to enable them to support themselves as far as possible. At Melange, in Africa, 400 miles from the coast, Mr. Heli Chatelain, a few days after his arrival, was offered by a trader a home in his house and $1,200 a year to look after his family alone, and he was assured that others in the town would increase the sum to $5,000 per annum if he would consent to remain.

**Advantages and Benefits:** The benefits of medical missions may be well nigh placed beyond computation in value. "It will not strike you with surprise," said Dr. J. L. Maxwell of Formosa, "when I tell you that again and again the lives of valued missionaries in China have escaped destruction at the hands of evil and fanatic mobs just because they were providentially recognized to be the associates of the mission doctor at this or that missionary hospital. During the Afghan war the two hospitals of the War Department, at Jellalabad and of Tank, and even the government hospital, but spared the mission hospital of the Church Missionary Society, because of their esteem and affection for the medical missionary. In the Chinese village of Na-than, 100 miles to the north of Swatow, a most remarkable work has been carried on without the agency of a resident missionary. It is the dwelling-place of a leper who, after having visited the hospital at Swatow, where he was converted, returned to his home and gathered about him a congregation of men and women whom he instructed in the Word and in the worship of the living God. In South Formosa I could point to four different congregations which lie far removed from each other, and at a distance from the mission headquarters, each of which sprang from men who had received their first religious impressions in the mission hospital, and these congregations have established flourishing schools."

We may sum up these benefits as follows:

1. Medical missionaries, as far as possible, become self-supporting, and go out on an unsectarian basis.

2. This plan does not conflict with the work of the regular mission boards, but, on the con-
3. Where a dispensary has been located a church has soon been formed.

4. Medical mission work destroys caste. In the 1890's Dr. Peter Parker may be seen, day after day, sitting side by side, the Brahman, Sudra and Shanar, the Pulayar and Pariah, the devil-worshiper, the worshipper of Siva, the Mohamm edan, the Roman Catholic, and Protestant; men, women, of all castes and creeds, while sitting together attentively to the reading of God's Word, and the preaching of the Gospel, thousands of whom, otherwise, would never have an opportunity of hearing the tidings of salvation.

5. Medical mission work secures protection and provision. Dr. Summers, with thirty-six carriers, penetrated Africa 1,500 miles in a direct line, securing from his grateful patients all the means and material which they needed upon the long and difficult tour, and during his whole career of three and a half years he did not receive one dollar from any home society.

6. Medical missions are far-reaching in their results. As many as 1,200 to 1,400 towns and villages have been represented in a single year among the in-patients of one hospital, who, returning to their homes, carry with them some of the truth received.

7. Medical mission work is lessening the anti-foreign feeling, is diminishing the power of superstition which connects disease with evil spirits, and is giving constant proof of the unselfish character of the Christian religion.

8. "One thing is perfectly certain," said Dr. Post of Syria, "namely, that medical mission work never fails. Other work may fail, but this affording of relief for physical suffering goes on the debit side of Christianity in all cases, and opens the way for other work to follow." As it is impracticable to notice in detail the growing work of medical missions in foreign lands, it may be well to give some account of the service performed by these missions on one or two fields, thus illustrating the power and possibilities of this factor in Foreign Missions.

The published reports of 1899 show that China has the largest number of medical missionaries, missionary hospitals and dispensaries. In that land there were, in 1901, 128 hospitals, 245 dispensaries, which during the year treated 1,674,571 patients; and more than 150 foreign physicians were in this service. In 1895 the men doctors were fourteen per cent. of all the missionaries, the women doctors were four per cent., and for each doctor there were more than 4,000,000 of the population of China. The need of medical missions in this vast field is appalling. The Chinese doctors are quacks of the worst type; their medicines are mostly decoctions of herbs, mixed with certain vile substances; their materia medica is, perhaps, the worst on earth; their ignorance of the simplest principles of physiology is marvelous; and the "medicine man" is deceitful and unscrupulous in playing upon the credulity and superstition of these people. While nearly all diseases are common in this thickly settled country, smallpox is the most common. Vaccination was discovered during the last decade of the 18th century; and, soon after its discovery, Dr. Alexander Pearson, surgeon to the East India Company, introduced it into China. It has been said of him that he "opened China to the Gospel at the point of the lancet." But Dr. Peter Parker is known as the first medical missionary of China, and, commencing his work under the American Board in 1835 in Canton, he brought physical blessings to millions, and great influence of other means of grace can compare with the facilities afforded by medical missionary operations." Dr. Parker's hospital at Canton still continues to exert a wide influence throughout Southern China, and until 1899 it was under the care of Dr. J. G. Kerr. It belongs to the Canton Medical Missionary Society, and, while the largest hospital work in China is at Swatow (English Presbyterian), this Canton hospital comes first in importance, for it is the first institution which combined the alleviation of human suffering and the extension of Christianity. It was one of the pioneers of modern medical missions. In this hospital, during 1898, more than 26,000 patients were treated, and over 1,000 operations took place. By Dr. Kerr and under his supervision some 700,000 patients have been treated, and about 40,000 operations performed; and in addition to this active practise, he published thirty-two books on surgery and medicine. The writer of these words concluded, after visiting the foreign mission fields in 1895 and 1896, that no institution in China was accomplishing more good than the hospital of this society.

It was largely through the influence of a physician that India was opened to English trade. As far back as 1636 Dr. Gabriel Broughton, an Englishman, while practising at the court of the Great Mogul, cured a princess who was badly burned, and, as his only reward, requested that his countrymen might have the privilege of trade with India. The Danes established a medical missionary work at Tranquebar and Madras in 1730-32. Through the skill of Dr. Thomas, who went out with Carey as a medical missionary, and Krishna Prasad, one of his converts, thousands were converted and was the first Hindu baptized. The first woman medical missionary from any land was Dr. Clara A. Swain, sent by the American Methodists to Bareilly, India; and they also began the first medical class for women at Naini Tal in 1869. In 1900 there were 111 missionary hospitals and 255 dispensaries in India. The native practises are barbarous; the death rate in British-India is almost twice that of the United States; cholera and small-pox are more or less prevalent among all classes of the natives; the millions of demon-worshippers retard by their ignorance and superstition the work of the physician; and it is estimated that of 67,000,000 of the people who have but little of British superstition, hardly two per cent. of them live within twenty-five miles of a European doctor. At Neyyar, under the London Missionary Society, is the largest medical mission in the world. In 1901 there was here a hospital with fifteen dispensaries, and eighteen native medical evangelists; and in 1899 there were 109,029 cases treated. In describing the opening of a new dispensary at Sangi, a writer says: "The patients began to arrive at daybreak, continuing to come
Medical Missions

Medieval Missions

The transcription of the document content is as follows:

"God had only one son and He gave Him to be a medical missionary," exclaimed Dr. Livingstone; and we recall the impressive fact that this Great Physician sent forth His first disciples to heal as well as to teach. Only a few hundred Christian physicians has America sent forth to the billion of suffering people across the seas; but we predict that the first decade of this century will witness a great awakening on this important question.

The conversion of Ireland in the 4th century was the real foundation of Medieval Missions. To Ireland, much more certainly than to Rome, the Christianization of England, Scotland and Germany was due.

South Britain, under the Romans, shared in the general Christianity of the Empire; but when the heathen English came over from northern Germany and Jutland, they, in their slow, stubbornly contested advance, swept the land as clean of its civilization and historical remembrances as of its religion. The still unconquered Britons, retreating into the Welsh mountains, with difficulty maintained there a Christianity which the conquering English utterly despised. And when, in 897, the Benedictine abbot Augustine, and his companions sent by Pope Gregory the Great, reached the hermitage of Kent, the people of which from Kent spread among the West, East and Middle Saxons, the Middle and Northern English remained but little affected. The real Christianization of Northumbria came from Ireland. Columba, a youth of the royal blood of Ulster, having, as a penance for a civil war kindled through his fiery Celtic temper, been required to exile himself to Caledonia, and to spend the rest of his life in laboring for the conversion of the Picts, founded the famous monastery of Iona in the Hebrides, from which he and his disciples spread out with irresistible zeal and with complete success over the lands of the Northern Picts, the Southern Picts being already largely Christian. They were aided by the fact that western Caledonia was largely occupied by Christian Scots of Irish extraction. The Scottish kings, succeeding through intermarriage to the Pictish throne, gave the name of Scotia to the whole land, and withdrew it from Ireland, which was the original Scotia. From Iona came the humble and zealous bishop, Aidan, to Northumbria, where he labored with great success. But the full Christianization of the country was accomplished through his disciple Cuthbert. Of simple habits, dauntless courage, strong sense, ready wit, tenderness of heart, deep devotion, and of a missionary zeal inflamed by the example
of his Irish masters, he became the Apostle of the North. The Mercians likewise gave up the old gods with one consent, and England was now Christian from the Firth to the Channel, being bounded by the Christian Scots on the north and the Christian Welsh on the west, which latter, however, in their implacable animosity against their conquerors, had refused to take the slightest share in the work of conversion.

In all this Rome had comparatively little share, so far as direct influence was concerned, and yet her merits in the conversion of England are not small: (1) she initiated evangelization after the early centuries; (2) she was the main convert of the Saxons, as distinguished from the Anglians; (3) she introduced the Gospel among the Anglians; (4) she undertook and carried through, with general consent of the English, that to which the Irish were everywhere utterly incompetent, namely, the organization and practical conduct of the English Church, which she thus held in unity with the general body of Christendom, and preserved it from eratic developments and from final disintegration and anarchy, such as befell the Irish Church, and finally induced every other to submit herself to the organizing skill of Rome.

The Irish Church was, during the early Middle Ages, equally zealous and equally effective in the work of conversion on the Continent. She was, indeed, the great Missionary Church of this era. The reception of the Gospel in Ireland, although it did nothing to control the intertribal anarchy and to remove the moral rudeness of the people generally, evoked unbounded enthusiasm in thousands of elect spirits, who gathered around their abbots in multitudes of monasteries, surrounded by pious families, and gave themselves up to an extravagant asceticism, but also to noble intellectual pursuits, and a deep study of the Scriptures. While Irish piety had a very imperfect control over the passions of anger and wrath; was deficient in that moral dignity which was congenial to Roman, and still more to the higher English piety; on the other hand, it was ethereal, full of tender and delicate sentiment and pervaded with the glow of a fiery enthusiasm, which, finding insurmountable obstacles at home in an anarchy which it knew not how to control, poured irresistible flood upon Western and Middle Europe. The Irish at this time were incomparably superior to the Romans in point of knowledge, while the Irish temperament and the Irish mind had an extraordinary power of communicating its convictions. The Irish monks, caring little for the secular clergy, allowed them to marry. They honored an abbot vastly more than a bishop. But they themselves, in their unsparing asceticism, presented to the wretched Continental populations of that era, succeeding the fearful devastations of barbarian conquest, the impressive spectacle of men living, by their own free will, a more wretched life than the wretched peasants, and yet making not the least account of this destitution of earthly comforts. They were listened to with profoundest reverence, and contributed largely to the regularization of their fellow-Celts (of the Cymric branch), the rural populations of Gaul, and to the rooting of the Gospel in Switzerland and in various parts of Germany, especially the south.

The great Irish missionary on the Continent was Columbanus (not to be confounded with the earlier Columba, of Iona), who established his monastery in 590 among the Vosges Mountains in Eastern Gaul. His rule was severe but practical, combining ascetic self-discipline, manual labor in various forms and study, especially of the Scriptures. He laid great stress on the inward state, and subordinated all observances to this. But his courageous opposition to the wickedness of Queen Brunehild caused his expulsion from Frankish Gaul into what is now Switzerland. His enemies, however, following him up, expelled him after three years from his missionary labors here also. He withdrew into Italy, where he died in 613, in the monastery which he had founded at Bobbio, near Pavia.

He left behind, however (detained by sickness, like St. Paul, among the Galatians), a beloved pupil, a young Irishman of good family, named Gallus. Gallus sought out a retreat in the deep woods of Eastern Switzerland, where he founded the monastery famous for so many centuries as St. Gall, the nucleus of the present canton of that name. It became a great center of population, civilization, learning and Christianity for Eastern Switzerland, the Tyrol and Southern Germany. Saint Fridolin, laboring in Alsace, Switzerland and Swabia, and the Irish Thudpert (whom the Germans call St. Hubert), laboring in the Black Forest. The Irish Cilian, after 630, labored in West Thuringia, toward the middle of Germany. And these are only shining examples of an endless succession of missionary monks that poured out for two or three centuries from Ireland into Gaul, Switzerland, Southern and Middle Germany. Before Boniface began his labors, about 720, Southern Germany seems to have been mainly, and Middle Germany largely, Christianized. The Saxons, who filled the great northern plain of Germany, gave not the slightest heed to the Gospel, the acceptance of which they regarded as the mark of subjection to their rivals, the Catholic Franks.

From old, along the Rhine and the Danube, and even farther in the heart of Germany, there had been Christian congregations. And the these had been ravaged and trodden down in the tumultuous movements of the migration of the nations which overthrew the Roman Empire, thus still offered a good many points of attachment for the Irish missionaries. The most illustrious of these were, on the Danube, Severinus, whom some held to be a North African and some a Syrian, and, near the Rhine, Eligius, of an old Christian family of the Franks, originally a goldsmith, afterward a bishop. Both these men distinguished themselves by boundless compassion and works of mercy, sometimes redeeming captives, sometimes interceding successfully for the wretched people with their barbarian conquerors, and thus laying foundations for the success of which still subsisted when the Irish missionaries subsequently began their labors. Eligius, indeed, was later than the earliest of these missionaries.

There was, however, the same difficulty with Irish missionary work on the Continent that there was in Ireland, namely, a want of unity and of organizing power. In Ireland itself, beyond a general deference paid to the abbey and bishopric of Armagh, there was no ecclesiastical unity. The priests had no defined parishes, the bishops no defined dioceses. The abbots were the real ecclesiastical rulers, but every
abbot only of his own monastic sept. And this confusion and jarring individualism was reflected in the Irish work abroad. Ireland, moreover, having been for a long while cut off by the wall of English heathenism from the rest of Western Europe, had diverged in various particulars, not so much of doctrine (for both parties stood on the foundation of the great councils, including the Council of Orange) as of ecclesiastical usage in discipline, worship and polity, points which necessarily occasioned a perpetual friction. Especially was it intolerable that while the Romans had adopted a corrected Easter cycle, the Irish still adhered to the earlier, unreformed cycle. Thus, before Osuwi of Northumbria had wisely decided to accept the Roman discipline, the Northumbrian kings had sometimes been holding the Easter rejoicings while their Kentish or Saxon queens were still in the sadness of the Passion-week.

Germany, therefore, compelled like England to commit her Christian future either to the erratic uncertainty of Irish impulse or to the steady, the certainly much harder, hand of Roman discipline, decided, and doubtless on the whole decided wisely, for the latter. Many Irish ecclesiastics supposed that conversions were, it is true, compelled to give way for a time. But in reality the Irish national spirit was as distinctly alien from Germany as the Roman. And, except in some casual particulars, the spiritual depth and evangelical freedom of the future Protestantism were no more anticipated in Celtic than in Latin Christianity. Protestantism was, as to its human source, an entirely original creation of the Teutonic genius, which first really apprehended the full significance of the apostolate of Paul. That Rome prevailed, and Ireland gave way, in the final settlement of the German Church, cannot, therefore, be regarded on the whole otherwise than as a providential good. The more we learn of the Middle Ages, the more fully we become aware that there were never absent from them seething forces of spiritual and social anarchy, which, great as they were, hardly with the Ireland, herself anarchical, could not have controlled at all. There were, moreover, still latent in the Saxons of Northern Germany, and yet more terribly in the brooding cloud of Scandinavian piracy that was one day to burst forth over Europe, aggressive forces of heathenism, which could not have withstood by any fabric less firm than that great organism owning Rome as its center, which finally extended to the very Orkneys, and at last took in Ireland herself, and grappled with the most formidable enemy by incorporating the Scandinavian North. Neander, regretfully as he recounts the ultimate prevalence of Rome, acknowledges that the rude nations needed a rigorous discipline of centuries before they would be ripe for spiritual and national independence.

The conference at York, in the year 664, before King Oswiu, between Bishop Colman, of the Irish use, and the Presbyter Wilfrid, of the Roman use, decided the Northumbrians and Mercians to join with the Saxons and Jutes of Southern England in accepting Rome, rather than the more pensive and future spiritual metropolis. It decided no less the ecclesiastical destiny of Germany. For it was an Englishman that was finally to bring Germany into conformity with Rome, and away from conformity with Ireland.

Winfrid, as he was properly called, was born in Kirton, Devonshire, in the year 680. His father, a man of wealth, destined him for some secular profession, but, humbled by a reverse of fortune, yielded at length to his son's ardent desire for a monastic life. In this Winfrid developed the same qualities of fervent piety, deep disinterestedness, unqualified courage, practical skill, monkish narrowness of mind, and intolerant orthodoxy which distinguished him subsequently when acting, under the name of Boniface, as the papally invested missionary archbishop of Germany. As a Saxon he had, of course, an affinity of race with the Germans, which doubtless came into play in his long contest with the Irish missionaries of the Continent. To him the Roman discipline and the Roman supremacy were of the very essence of the Gospel. He was incapable of making the slightest concession to the Irish monks, altho they had converted so much of Germany, for in his eyes the Irish hardly deserved to be called Christians at all, and he suffered grievous troubles of conscience that he could not altogether avoid an intercourse of social civility with them.

He began his missionary labors in 715, among the Frisians of the German coast. His elder countryman, Willibrord, after twelve years of study in Ireland, had begun a mission in Friesland, aided by various other Englishmen. Willibrord, altho of Irish education, yet, as an Englishman, conformed to the Roman discipline and visited Rome to solicit the papal sanction on his new mission. He was there ordained by the pope himself bishop of Utrecht, where he died after thirty years of not ineffectual work. Winfrid first went to Friesland during one of the many intervals of adversity in the mission. He afterward, however, returned and labored for three years under Willibrord with encouraging results. Declining the aged bishop's offer to consecrate him as his successor, he journeyed to Thuringia, in Middle Germany, where he baptized two princes and duple Christian subjects and at least 100,000 persons to the Church. In Hesse, his boldness in felling the sacred oak of Donar (whom the Scandinavians called Thor) so appalled the heathen that large numbers forsok the worship of gods who seemed unable to defend their own Bparen. He had already twice visited Rome, and at his second visit, in 723, had been ordained reginary bishop by the pope, with what we might call a roving commission, taking an oath of obedience and conformity to the Apostolic See, which became the keynote of his whole subsequent policy. Turning away from his nearest German kinsmen, the Saxons (who were, indeed, at this time wholly insensible to Christianity), he spent most of the rest of his life in incessant, sincere, intolerant and finally successful efforts to bring Middle and Southern Germany under the Roman obedience. His double controversy with Virgil, the learned Irish abbot, subsequently bishop of Salzburg, was, it is true, unsuccessful. Rome, tho a great admirer of her servant Boniface, decided both points against him, not without some gentle quizzing of his hyperbole and hyperbole. He came under the new system, and after his death was impartially canonized by the Apostolical See. 29
In 738 Boniface visited Rome a third time, and received the fullest legatine powers, as archbishop of the city, and with their support at length by Pepin, who, having been authorized by Pope Zachary to set aside the outworn Merovinian line and to assume the royal dignity for himself, was then, in the pope's name, anointed by Boniface, and thus stood consecrated to the closest union with Rome. Henceforth Boniface had good assurance of complete success in his effort to transform the German Christianity from the Irish to the Roman type. His veneration for Rome, however, had in it nothing of the slavishness of modern Ultramontanism. He did not apprehend the pope as Universal Bishop, but as the court of highest instance in a graduated scale of episcopal preeminence. He himself meant to establish the German primacy at Cologne, but, being disappointed of this by an intrigue, fixed it, less suitably, at Menta. He also founded the renowned Benedictine abbey of Fulda, which for 1,000 years was the Monte Cassino of Germany. In all his organizing plans and administrative acts, his unsympathetic, heresy-hunting, Romanizing orthodoxy was accompanied by a large forecast of cool statesmanship, which in him decidedly prevailed over enthusiasm. Not even his most admiring disciples, says Neander, ascribed to him a single miracle. It is the judgment of one who has given much attention to his course that the deepest instinct of his heart was, after all, not that of the ecclesiastical administrator, but that of the monastic missionary. To this his early life agrees, and much of his middle life, and, above all, his end. For in 755, abandoning his great see of Mentz, he set out for his early mission field of Friesland, and there, having fixed a day on which many of his baptized converts should return to him for confirmation, was, on that very day, surprised by a heathen band, and, in his seventy-fifth year, with many of his companions, joyfully received the crown of martyrdom.

It may be significant, in view of the earlier successes of Ireland, whether we have a right to call him the apostle of Germany. Nor can we be blind to his deep defects, or at least to his narrow limitations. Yet after all he stands forth as one of the great characters of Christianity between German and English, and of missionary history.

Germany was now two-thirds Christian. Its full Christianization, in the abandonment of heathenism by the mighty Saxon race of the northern plain, was accomplished, not by the missionary, but by the crowned soldier, Charles the Great. His spiritual adviser, the English abbot Aeluin, bitterly remonstrated against his unevangelical employment of force, and against his imposition of the tithe. But Charlemagne persisted, being convinced that his empire could never be German until the Saxons and Franks were entirely Christianized. He held numerous synods, into the national and spiritual communion of his great realm. And thee they were thus compelled into the Church, yet, so soon as the national pride of their adherence to paganism had been broken, they rapidly assimilated Christianity, and soon became perhaps the most staunchly Christian of all the German tribes. And when the fulness of the time had come, at the Reformation, for the complete emancipation of the Gospel, it was in Northern Germany that the adult Christianity of Protestantism found its home. Luther himself, it is true, tho called a Saxon, was only such by that curious territorial lapse which had transferred the ancient name from its proper seat, and made it the designation of a Middle German race.

The conversion of Northern Germany laid the basis for the Christianization of the three Scandinavian realms. The Apostle of Scandinavia, St. Ansgar, is a character of peculiar beauty. He was a native of the Frankish kingdom, having been born in the diocese of Amines, A.D. 697. The delicacy of his imagination, and the sweet courtesy of his character, make it probable that he was a Roman rather than a German Frank; in other words, that he was a Frenchman proper. The early letter, a monk in the neighboring Corbie, under the abbot Adalhard and later teacher, Paschadius Radbert. But when Charles the Great (Charlemagne), having forcibly converted the Saxons, wished to instruct them in their new religion, and removed a colony of monks from Corbie to the Weser, calling the daughter-abbey Corvey, Ansgar was one of the colonists. He had early been sensitive of a vocation to the missionary life, and his whole life showed that he "was not disobedient to the heavenly vision. The pious and statesmanlike Fulbe, archbishop of Rheims, having sent to Christianity King Harold of Denmark, on a visit to the Emperor Lewis, deputed Ansgar to accompany the king on his return to his fierce heathen subjects, a journey then so much dreaded that Ansgar could only find a single monk, Authbert, to go with him. Who, soon dying, left him alone. After two years of residence, and some initial successes, he and King Harold were both expelled. But now better prospects began to open in Sweden. Seeds of Christianity he began to germinate there. Ansgar, therefore, during some two years residence found much encouragement. His favorable report, on his return from Sweden, induced the Emperor Lewis to establish the archbishopric of Bremen-Hamburg as the basis of the Northern missions, and to dispatch Ansgar to Rome, where he received episcopal consecration and was invested with the archiepiscopal pallium. During many years, from the basis of his metropolis see, with a flexible patience that knew no discouragement, that availed itself of every opportunity, all his predecessors, having every show of heathen aggression, such as once laid his own diocese waste, Ansgar steadily pursued his great purpose. He was aided by suffragan bishops in Denmark and Sweden, whom he supported as occasion required by personal visits. At last, the heathen having already become accustomed by many instances of deliverance after invoking the name of Christ, to regard Him as a mighty deity, Ansgar visited the national assembly of Gothland, in the south of the peninsula, and that of Sweden proper, in the middle, and obtained from each a decree that the preaching and acceptance of the Gospel should be freely permitted. Ansgar, having made arrangements for the more effective prosecution of the missions, returned to Bremen. There were many subsequent vicissitudes, especially in Denmark, but the Gospel seemed to cohere more intimately with the nature of the milder and perhaps more thoughtful Swedes, who, moreover, are of a deeply devotional turn. But the foundations laid by Ansgar remained. Danish conquest in England, moreover, reacted for the evangelization of Denmark, especially through the influence
of the mighty Canute. The process of conversion was slow but steady. By the year 1100 it is doubtful whether any traces of avowed heathenism remained in either Denmark or Sweden.

After more than thirty-four years of labor for the salvation of the heathen nations of the north, when past the age of sixty, he was at last attended by a severe fit of sickness, from which he died.

His character seems to have the effectiveness of Boniface without his hardness, and the zeal of the Irish missionaries without the wrathful impatience adhering to some of them—a most winning example of that mixture of energy qualities so often required in a Christian missionary. The Christianization of the Mongolian Finns resulted in part from the conquest of Finland by St. Eric, the first Swedish king of that name, but still more from the evangelical labors of St. Henry, the first bishop of Abo. St. Henry's Day is still a conspicuous festival of the Lutheran church of Finland.

The introduction of Norway within the Christian pale resembles in its earlier stage a chapter of Muslim and, in its later stage, of Buddhist, propagation more than any chapter of genuine Christian missionary effort. It seems to have had very little root in the religious instincts of the people, altho genuine Christian influences are by no means absent. But the kings who finally subdued the whole of Norway under them, and rooted out the power of the petty local monarchs, being convinced that effective government could only rest on the foundation of a wider and richer civilization, and that this could only be supported by Christianity, really forced Christianity on their subjects at the point of the sword. And when these were once baptized, the Roman missionaries unfolded the utmost magnificence of their ritual—here again like the Buddhist missionaries in Japan. And as the Norsemen, says Herder, had the profoundest faith in the efficacy of magical rites and regarded the Roman ceremonies as merely a more exalted and purer kind of magic, they finally surrendered themselves to the new worship without any further thought of resistance. But the fact that so few Norwegian kings or heroes have cared to be buried in the metropolitan cathedral of Trondheim, is noted by Mr. Froude as signifying that they were still more heart in their efforts. It seems to me that until the Reformaion gave them a form of it which they could really believe. Lutheran Norway is now a genuinely and zealously Christian country. But the religious development of Sweden, both under Latin and under Lutheran Christianity, has been (as is natural, in view of its much greater population) a far richer and more conspicuous one. In the 14th century St. Brigitte, the widowed Swedish princess, may be regarded as "the bright consummate flower" of the Scandinavian race, showing it is said, almost equal vigor of the practical, the poetical and the prophetic instinct, and, under the veil of an extravagant devotion to the Virgin, revealing many deep evangelical perfections, true harbingers of the Reformation. And altho her asylum was Rome, and not Stockholm, as in the case of Roman calendar, yet her prediction is on record that "the throne of the pope shall yet be cast into the abyss." By this time Germany, France, Great Britain, Denmark, Sweden and Norway were all included within the pale of Latin, and Russia within that of Greek, Christianity was tolled in Bohemia and the other Slavonic countries were thus morally certain, sooner or later, to yield to the irresistible influence of what was becoming the religion alike of Southern and of Northern Europe. Moravia and Bohemia, indeed, the two principal Slavonic countries of Middle Europe, rather antedated than followed the conversion of Scandinavia. By an unusual evidence, they had been Christianized by two Greek missionaries, Cyril and his brother Methodius. These had already been active among the Bulgarians, who also received missionaries from the pope, but after some wavering settled down under the patriarchal rule of Constantinople, and succeeded, according to the Mongolian Chazars, in the Crimea, with a good deal of success. They then came up into Central Europe, among the Moravians, not far from the year 850, and therefore while Ansgar was still laboring in the north. German missionaries sent out by the Archbishop of Salzburg had already effected a good many conversions. But their foolish obstinacy in adhering to the Latin liturgy was in the way. Methodius (for Cyril soon became a monk in Rome), with his more flexible Greek character, boldly introduced Christianity and his Slavonic liturgy. The German bishops murmured; but the pope, who had already consecrated Methodius Archbishop of Moravia, stood forth as his defender. Bohemia, then dependent on Moravia, was Christianized from it. The Germans still wrangled with Methodius over his independent jurisdiction and his Slavonic liturgy, so that at last he went to Rome, and seems to have followed his brother Cyril into retirement. But the Christianizing impulse had now become so strong among the Slavonic that, by some unknown means, the whole Slavonic race from Bohemia to the Adriatic is found to be Christian. It is interesting to note that, after long interruption, the use of the Slavonic liturgy has lately been conceded again, by Pope Leo XIII., to the Slavonic Illyrians.

The propagation of Christianity among the Slavonic Wends, between Bohemia and the Baltic, is a confused history of genuine missionary successes, of armed proselytism by over-zealous princes, and of violent and persecuting heathen reactions. It is marked out ultimately by Christianity prevail'd over by an historical necessity. Poland, like its great Slavonian sister and rival, Russia, was Christianized mainly from above, not far from the year 1000. But while Russia took Constantinople for her spiritual capital, Poland, as might have been expected from her more westerly position, chose Rome. The Teutonic order of military monks had much to do with the suppression of paganism along the Baltic.

The Magyars, of Mongolian race, who wrought fearful devastations in Germany in the earlier Middle Ages, but were finally subjugated to their new kingdom of Hungary, of which they still form the dominant race, were found after this check not altogether inaccessible to German missionaries. St. Adalbert, Archbishop of Prague, who afterward died a martyr among the Slavonic Russians (near Poland), spent some time in Hungary. Prince Geisa and his wife were baptized, but remained about as much pagan as before. Their son Stephen, however, (St. Stephen) was a thorough and zealous Christian. He married a Greek princess, received the rank of a bishop, and the Christian Emperor Otto, and succeeded in impressing on the kingdom of Hungary that deep character of medieval
yet kindly Catholicism which it still retains. Protestantism is there powerful, and honorably considered; but nowhere in Europe does the ecclesiastical magnificence of the Middle Ages remain so little disturbed. The Archbishop of Gran, the Primate of Hungary, is the only prime in the Christian Church. And at a coronation the lines of splendid horsemen wearing the insignia of mitred abbots show that in Hungary the illustrious Benedictine order still retains its ancient preeminence. The Hungarian Christianity, which glories in the monarch, not in the divinity of the prince, has been an anvil that has worn out the Muslim hammer of the kindred Turks. But this Mongolian Christianity has shown its zeal rather in the field of war than of spiritual achievement, in which the Mongolian race has seldom been preeminent.

The Christian mission of a whole European nation to the profession of Christianity took place in 1384, when Ladislaus Jagiello, Grand Duke of the then very extensive and powerful principality of Lithuania, obtained the hand of Hedwig, Queen of Poland, and went over, with all the people of paganism, to the Church.

Such were the missions, proselytizing crusades, and proselytizing compacts of Catholic Europe, Eastern and Western, between the year 500 and the year 1500. The principles of the Gospel seem to have been most thoroughly carried out in the Christianization of England, Switzerland, Southern and Middle Germany and Sweden, and to have been the farthest departed from in the cases of Northern Germany and Norway, the former of which, however, became soon, and the latter ultimately, sincerely and zealously Christian. Not even the Gospel, accepted in this wholesale way as a national creed, could avoid large complications with uncivilized rudeness, with violence, and with selfish policy. The Reformation brought in that sifting process which is ever depressing. But there is great occasion to thank God that over so large a proportion of medieval Europe so great a number of humble and self-devoted men of God secured the genuine conversion of so many individuals and nations to the Gospel of Christ.

While these movements were dynamic Northern Europe, or, as it was known, on the south there arose the conflict with Islam. The crusades were scarcely missions, and yet there was a distinctly missionary spirit in the desire to overcome Islam by Christianity as well as to rescue the Holy Sepulcher. So, too, the monastic orders which arose in this period. Augustinian, Carthusian, Cistercian, Carmelite, Franciscan, Dominican and others, while specially organized for the development of a devotional type of piety, had a direct relation to the centralization of the Church, and were not divested of the missionary function in the Latin Church. This became manifest when they came to their full fruitage in the succeeding period. Francis of Assisi, when he forced his way to the presence of the Sultan of Egypt and preached Christianity in his court, was but the predecessor of Xavier and his associates. There was, however, one missionary of this type who has won a high place among the laborers for the spiritual extension of the faith. The story of Raymund Lull is like a romance of modern missions. Turning from the scientific studies in which he won great renown, he applied himself to the task of overcoming Islam. In this work he sought the favor and of the King of Majorca, of the pope, of the Council of Vienne, of England. Every effort to arouse the Church having failed, he went himself once and again to Cyprus, Asiatic Turkey and Tunis, where at last his life was a sacrifice to his zeal.

In considering the character of this period it becomes evident that it is but the development of the close of its predecessor. The Church as a whole had no interest whatever in the extension of Christianity. A comparatively small number of individuals, by superlative devotion, saved Europe and laid the foundations of the development in the century that followed. In the educational institutions to which Germany and England owe their preeminence, in political and intellectual as well as spiritual life. It was the missionaries of the Middle Ages to whom the modern European owes much of the best life that he enjoys. In the degree that Southern Europe failed to share their influence, it fell below their standard.

So far as methods were concerned, there was little of what may be called popular influence through these missions. The missionaries sought the leaders, relying upon them to bring with them their followers. Even in the case of the great enterprises it was to the possible leaders that they gave attention. The era of the common people had not yet come.

So, too, the motive was inadequate. It was very largely the Church, its aggrandizement, its victory. Even in the case of Raymund Lull, the grand ambition was not so much the salvation of Muslims as the defeat of Islam. It remained for the Reformation to find for the individual soul its proper place in the scheme of a world's salvation.

M.), Missionaries and Missionary Apostles, Jesuit and Protestant, London, 1854; Barnes (L. C.), Two Thousand Years of Missions before Carey, New York, 1901; Zwemer (S. M.), Raymund Lull, New York, 1902.

MEDENGIN: A village in the Zoutspanberg District of Transvaal, Africa. Station of the Berlin Missionary Society (1881), with 1 missionary, 19 native workers, 8 outstations, 5 day schools, and 1,121 professed Christians, of whom 619 are communicants.

MEERUT: A town in the Punjab, India, capital of the district of Meerut, situated 39 miles N. E. of Delhi. It is the headquarters of a British military division, with extensive camps. The mutiny of 1857 began at Aligarh, 437 feet. Population (1891), 73,600, the city being divided between Muslims and Hindus. Station of the CMS (1815), with (1903) 2 missionaries and their wives, 2 women missionaries, 58 native workers, 7 outstations, 1 place of worship, 17 day schools, 2 boarding schools, and 1,401 professed Christians, of whom 116 are communicants. Station also of the ME, with (1903) 1 missionary and his wife, 2 women missionaries, 36 native workers, 38 Sunday schools, 1 college, 10 day schools, 1 boarding school, and 1,275 professed Christians, of whom 305 are communicants. Station also of the RPS, with 2 native workers, 1 outstation, 1 college, 1 Sunday school, and 55 professed Christians.

MEESTER CORNELIS: A village in the island of Java, situated 10 miles S. E. of Batavia. Station of the Netherlands Missionary Society (1880), with (1903) 1 missionary, 5 native workers, 3 outstations, 3 day schools, and 258 professed Christians, of whom 142 are communicants.
MEIGS, Benjamin Clark: Born at Bethlehem, Conn., August 9, 1789; graduated, 1809; spent two years and a half a maritime life. While there he determined to devote himself to a missionary life. He was ordained June 21, 1815, and sailed October 23 following as one of the original founders of the ABCFM in Jaffna, Ceylon. There he labored forty years. Failure of health in 1858 compelled him to relinquish the mission work. He died in New York City, May 12, 1862, aged sixty-three.

MEIKTILA: A growing town, military and railroad station in Burma, British India, situated 80 miles S. by W. of Mandalay. Population, 7,200 (1902). Station of the ABMU (1890), with (1903) 1 missionary, 3 native workers, 1 place of worship, 1 Sunday school, 1 day school, 1 outstation, and 14 professed Christians.

MELANESIA: The name given to that part of the islands of the Western Pacific Ocean which lie south of the Equator and between the Fiji Islands and New Guinea in the northwest. The people are a branch of the Papuan race, and much darker than the true Polynesians. They are also more savage and have less advancement in such simple arts as have been naturally developed among the Pacific islanders. The language of the languages of the islands has passed through several stages, and has given rise to a number of dialects in the different groups. The islands are mostly of volcanic origin, but rest on a coral foundation, and are sometimes surrounded with coral reefs. The principal groups included in this division are the Bismarck archipelago, Solomon Islands, the Louisiade archipelago, and the New Hebrides. New Caledonia, New Guinea, and the Fiji Islands are ethnologically connected with the same division of Oceania.

Mission work was begun in the New Hebrides by the visit of the Rev. John Williams of the LMS to Erromanga in 1839 at the expense of the United Presbyterian Church of Scotland. John Williams was killed by the islanders, and the effort to evangelize the islands was continued by the LMS, the East London Mission, the London Missionary Society, and the London Missionary Society of New Zealand until 1848. In that year the Rev. John Geddie, sent out by the Presbyterian Synod of Nova Scotia, established himself on Anetium, and after terrible hardships succeeded in his work, so that over his grave is written: "When he came to the island in 1848, there was not a single Christian; when he left in 1872, there was not a single heathen."

From that beginning the work has spread through more than 20 islands. It is now carried on by a society composed of a sort of federation of Presbyterian bodies, known as The New Hebrides Mission. The organization now has 50 missionaries in the islands. The total of professed Christian adherents is about 17,000.

The northern part of the New Hebrides and the Solomon and Santa Cruz islands are occupied by the Melanesian Mission, founded by Bishop Selwyn in 1849, and made fruitful by the blood of martyrs. This mission has its headquarters, and a fine training school for native workers, at Norfolk Island, and has gradually extended its work through the northern islands of Melanesia, with a total of 25 missionaries and a very large force of native workers, with about 15,000 professed adherents.

The Loyalty Islands were entered by the LMS in 1841. Since 1891 the Paris Evangelical Mission Society has taken over the work on the island of Maré, in deference to the susceptibilities of the French officials. The LMS has found it possible to continue their work through native workers in New Caledonia, from which their missionaries are excluded by the French Government. The whole number of professed Christian adherents under the LMS and the Paris Society in this group is about 10,000, and the aggregate native Christian population was estimated probably over 40,000. What this means, as a testimony to the power of the Gospel, can be realized by those only who know the condition from which these converts have risen.

MELANESIAN MISSION: Headquarters, Norfolk Island.

The diocese of the first Anglican bishop of New Zealand embraced a large number of the islands of the South Pacific, and a suggestion was made to Bishop Selwyn, on his consecration in 1841, that he should establish an Island Mission apart from that of New Zealand. He took up the idea with great interest, and in 1847-1849 Bishop Selwyn made several voyages to neighboring regions. After having, in the first place, taken the missionaries and the books, he went to the islands between New Zealand and the Santa Cruz group and visited, little by little, the confidence of chiefs and leading men was gained. Thus, the islands of Melanesia were opened to mission work, and a movement of the bishops of Australia, held in Sydney in 1850, this part of the island world was adopted by them as the mission work of their churches.

By contributions from Australia, the "Border Maid," a schooner of 100 tons, was furnished for the mission; and in 1851 Dr. Tyrrell, the Bishop of Newcastle, New South Wales, who had been Bishop Selwyn's companion in the Cambridge University boat, accompanied him on a voyage, seeing for himself the admirable way in which Bishop Selwyn dealt with the savages.

In 1855 the King Joes' Island and Patteson joined the mission at his own charges, in 1861 was consecrated Bishop of Melanesia and was joined by Rev. R. H. Codrington, of Oxford. The chief sphere of Bishop Patteson's labors was in the Northern New Hebrides, the Banks, and the Solomon groups. Between the latter are the Santa Cruz and Swallow Isles, where he eagerly sought openings; and it was in the Swallow group that he, with Rev. J. Atkin and a native teacher, was murdered in 1871. Dr. Codrington, while declining the bishopric, continued the mission, which now owes more than can be said to his labors in every field of the work, but especially to his management of the school at Norfolk Island and to his unwarried researches into the philology of the island languages and his application of them to their new work of translations. In 1873, Rev. J. R. Selwyn, a son of the pioneer bishop, and Rev. John Still volunteered for the work, and the former was, in 1877, consecrated Bishop of Melanesia. The present field of the Melanesian Mission embraces groups of islands from the northern part of the New Hebrides to the Solomon Islands.

From the earliest days of the mission the Bishop of New Zealand hoped to work these islands by means of native teachers and a native ministry. To use his own phrase, "The white
corks were only to float the black net.” To carry out this purpose, the islands are divided into districts, each headed by a white clergyman or member of the staff, and from these districts boys are selected to enter its huge mission schools, where they are trained. The school work breaks up in April, when the island voyages begin, and is not taken up again till they are over, in November. These winter voyages are the most arduous part of the work connected with the mission, and are precariously undertaken in the continual hardship and danger over seven months of the year and 18,000 miles of sea; but without them and the mission vessel, the “Southern Cross,” the mission could not be maintained.

The income of the mission is derived from subscription or apparent entity, Australia and New Zealand, and from an endowment fund, a large portion of which was bequeathed by Bishop Patteson, and which produces about £1,500 a year. In New Zealand the mission is adopted as a work of the Church, and collections are made for it in every parish. In Australia the help is less definite, and comes largely from Sunday schools, which support scholars at the mission.

Mission fields: 1. New Hebrides: As the Presbyterian New Hebrides Mission increased in strength it removed its headquarters from the islands, the Melanesian Mission confined its labors to the most northern islands, while extending its efforts toward Santa Cruz and the Solomon Islands. Its present stations in the New Hebrides are on Maewo, or Arorae, Opa or Lepeis Isle, and Malaita Island, all were visited by Bougainville, who took possession of them in the name of the King of France, and by Cook. All had a bad reputation, but the reception accorded to Bishops Selwyn and Patteson was, in the main, friendly, and where there was opposition private letters could be traced to treachery or abuse by Europeans.

2. The group of islands, discovered by Mendana in 1568, and called by him the Solomon Isles, because he supposed them to be the source of King Solomon’s “gold, ivory, spices, peacocks,” lie about 200 miles to the northwest of the New Hebrides group. They were first visited by Bishop Selwyn and Mr. Patteson in 1857, and from that time until his death, in 1871, Bishop Patteson put forth every effort for them, with the result that stations and schools are now established upon most of the islands of the group. At Isabel, the most northerly of the Solomon Isles, there are three schools, and Christianity has gained a great hold on the people. Other islands upon which many schools and churches have been established are San Cristobal, Ulawa, and Malaita.

3. The Banks Islands, lying to the north of the New Hebrides, have been the most successful field. Mota is a Christian island, under the charge of a native pastor, as are also Mohlai and Ra. Schools well attended and well taught forlornly enliven its barren coast. These two islands, so near to the people almost everywhere have an opportunity of attending one or other of them within reasonable distance. The Santa Cruz Islands have for three centuries borne a tragic relation to European life. Mendana in 1565, Capt. Carteret’s expedition in 1717, Perou in 1728, and D’Estrees and La Perouse in 1798 all suffered at the hands of the islanders, and it was near them, while planning for them, that Bishop Patteson was murdered in 1871. Rev. J. Alkin, a native teacher, and later Commodore Goodenough, also died by their hostile arrows. Still a hold has been secured even there.

The report of the Mission shows, in 1900, 28 missionaries, about 400 native workers, 14 stations, 1,700 communicants, about 170 day schools with 15,000 pupils, 2 higher schools with 280 pupils.

MELOLO: A settlement on the E. coast of Sumba Island, Dutch East Indies. Station of the Netherlands Reformed Church (1850), with 1 missionary and wife, 1 native worker, 1 outstation, and 137 boys in the matriculated Church.

MELESETTER: A town and county seat in S. E. Rhodesia, Africa, situated 25 miles N. by W. of Mt. Silinda, and 150 miles W. by S. of Beira. Station of the ABCFM (1902), with 1 woman missionary and 1 day school.

MELUR: A village in Madras, India, situated 20 miles N. E. of Madura. Station of the ABCFM (1857) with 1 missionary and wife, 31 native workers, 10 outstations, 8 places of worship, 10 Sunday schools, 8 day schools, 1 boarding school, 1 Young Men’s Christian Association, and 119 professed Christians.

MEMIKAN: A village west of Urmia, Persia, on the border of Turkey. At various times missionaries have been sent to it, but the work is usually conducted by the native church and pastor.

MENDO: A town in Minahassa, the northeastern peninsula of Celebes, Dutch East Indies, noted as a great coffee empresium. From 1850 to 1874 it was the chief seat of the Netherlands Missionary Society, which worked with great success among the heathen Alifures. Difficulties arising from the different languages spoken by the Alifures were overcome by the introduction of the Malayan language in church and school, and in the peninsula there are now 147,000 Christian Alifures as the result of this mission. Lack of money compelled the missionaries to enter the service of the state church in 1870, and the Society supports a printing house and a few schools only, the support of pastors, as well as their appointments and living with the Colonial Government. The Batavia Committee for the evangelization of the Sangir and Talaut islands use Mendo as a supply station for their mission.

MENDI LANGUAGE: An African language of the Negro, as distinguished from the Bantu group. It is spoken by a small part of the population of Sierra Leone in West Africa, and has been reduced to writing by missionaries with use of Roman letters.

MENDOZA: A town in Argentina, South America, capital of the state of Mendoza, situated 95 miles S. of San Juan and 620 miles W. by N. of Buenos Aires. Its altitude is 2,550 feet. Its climate is dry and temperate. All its finest buildings were destroyed by earthquake in 1881. Population 18,000. Station of the ME, with (1903) 1 missionary and wife, 1 place of worship, 1 Sunday school, and 73 professed Christians, of whom 72 are communicants.

MENOANAPURAM: A town in Madras, India, situated in Tinevallur, about 25 miles S. of Tuticorin. Station of the CMS, with (1903) 2 women missionaries, 1 Sunday school, 2 boarding schools, and 23 native workers. The church is entirely self-supporting and independent, and its statistics are no longer given by the Society.
MENGO: A town in Uganda, Africa, capital of the native kingdom, which is a province of the British Uganda. It is situated to the N. of Lake Victoria Nyanza. Station of the CMS (1887), with (1903) 8 missionaries, 3 of them with their wives; 5 women missionaries, 225 native workers, 1 Sunday school, 1 theological class, 1 male helpers' training class, 1 industrial school, 1 dispensary, 1 hospital, 1 medical class, and 12,058 professed Christians, of whom 3,310 are communicants.

MEQUINEZ: A town in Morocco, situated 36 miles W. by S. of Fez. It stands on the side of a high mountain in a fertile valley, and is the summer residence of the Sultan. Altitude, 1,755 feet. Population, 30,000. Station of the Gospel Mission Union (1895), with (1901) 1 missionary and his wife. Station of the PB, with (1901) 1 missionary and his wife.

MERCEDES: A town in Argentina, South America, situated 60 miles W. by N. of Buenos Aires. Population, 9,500. Station of the ME, with (1903) 2 missionaries and their wives, 8 native workers, 3 places of worship, 2 Sunday schools, 1 day school, 1 theological school, and 164 professed Christians, of whom 100 are communicants.

MERMONGA: A town on the N. coast of Java, Java, situated about 15 miles W. by N. of Surabaya. Station of the Netherlands Mennonite Mission Society (1849), with (1903) 3 missionaries (two of them with their wives), 12 native workers, 4 outstations, 3 places of worship, 4 day schools, 1 boarding school, 1 dispensary, and 194 professed Christians.

MERIAM, MELGAREDJA: A town in the Netherlands East Indies, situated about 10 miles W. by N. of Surabaya. Station of the Netherlands Mennonite Mission Society (1849), with (1903) 3 missionaries (two of them with their wives), 12 native workers, 4 outstations, 3 places of worship, 4 day schools, 1 boarding school, 1 dispensary, and 194 professed Christians.

MERMARIA: Born Princeton, Mass., U. S. A., September 15, 1830; graduated at Harvard University, 1855; Andover Theological Seminary, 1858; ordained November 28 of that year; sailed as a missionary of the ABCFM January 17, 1859, for Turkey. After spending a few months at Adrianople in studying Turkish, he went with Mr. Clark to the new station of Philippopolis, where he remained till his death. Returning from Constantinople with his wife in July, 1862, he was met by five mounted brigands, who shot him as he was slitting from his horse. His head was almost instantaneous.

MERRIKA: A town in the native State of Coorg, India, of which it is the capital; situated 64 miles E. E. S. of Mangalore. Altitude, 3,605 feet. The climate is very damp. Population, 7,000, of whom 5,000 are Hindus. Station of the Basel Mission Society (1870), with (1903) 3 missionaries (two of them with their wives), 6 native workers, 4 outstations, 1 day school, and 156 professed Christians, of whom 90 are communicants.

MERSINE: A town and seaport in the province of Adana, Asiatic Turkey, situated 36 miles by rail S. E. of the city of Adana. Population, 9,000, of whom 5,000 are Muslims and 3,500 Christians. Station of the RP (1883), with 1 missionary and wife, 2 women missionaries, 1 native worker, 1 outstation, 1 primary school, 2 Sunday schools, 3 day schools, 2 boarding schools, 1 dispensary, and 72 professed Christians. Outstation also of the ABCFM. Statistics included in Adana.

MESOPOTAMIA: Originally the country "between the rivers," i.e., the Tigris and the Euphrates, which was a political division, and the term is used differently by different writers, but in general it may be said to include the whole plain of the valley of the Tigris from Mardin in the north to Bagdad, or even Bassora, on the south, and from the Euphrates on the west to the Zagros Mountains of the Persian border on the east. The land is extraordinarily fertile, and even now, if properly cultivated, would yield a wonderful crop. The native population is chiefly Mohammedans and Christians of the Jacobite and Chaldaean sects. Nomad Kurds, living on the mountains, come into the plains for their winter pasturage.

METHODIST CHURCH IN CANADA: Missi- onary Society of the: The Missionary Society of the Methodist Church was organized 1824. At that time, in addition to work among the white settlers, some efforts were being made to reach the scattered bands of Indians in Ontario with the Gospel message, and it was with a view of extending the work thus formed. There are now six departments: Home, Indian, French, Chinese and Japanese in British Columbia, and Foreign. The home work (called Domestic Missions) embraces all the dependent fields of the Church among the English-speaking people that are not at the Dispersal Mission, or living in the West, and Bermuda. These fields are 450 in number, with 350 missionaries, 69 assistants and 34,826 communicants.

The Indian missions are in Ontario, the Northwest, and British Columbia. They are 65 in number, with 33 missionaries, 14 native assistants, 15 teachers, and 7 interpreters, or a total missionary force of 75. The number of communicants is 5,505.

The results of mission work among the Indians have been of the most encouraging kind. Whole tribes have been reclaimed from barbarism and superstition, and many of them walk worthy of their high calling as followers of the Lamb. A significant illustration of the value of these missions is found in the fact that not one member or adherent of the Methodist Church among the Indians, nor, so far as is known, of any Protestant mission, was implicated in the revolt that occurred a number of years ago.

The French missions are entirely in the province of Quebec. They are 6 in number, with 6 missionaries, 8 teachers, and 100 communicants.

The Foreign work of the Society is in Japan and China. The former was begun in 1873, the latter in 1891.

The work in Japan is in the districts of Tokio, Shizuoka, Tamanashi, Kanasaawa and Nagano. There are 27 stations, 44 missionaries, 1 assistant, and 1 teacher. The number of communicants is 2,750. The Japan mission of this Society has been an earnest advocate of a union of Methodists in Japan, corresponding to that of the Presbyterian and Reformed churches. The mission in China is located in the province of Szechwan, two stations being occupied, Chentu and Kiating. While there was temporary suspension during the Boxer troubles, there was little actual loss, and the hospitals in the two places were not disturbed. The Press of the mission has also done excellent work. The ten missionaries (men) are devotedly laboring in the two stations, but the Society does not see fit to publish statistics of their work and its results. By careful searching of the reports one may gather, however, that there are 2 hospitals, a training establishment, one Sunday school, and at least 60 or 70 professed Christians.

ORGAN: The Missionary Outlook, monthly.
METHODIST EPISCOPAL CHURCH IN U. S.; Missionary Society of the (1819): The conversion of a colored man by the name of Stewart, and his subsequent work among the Indians, profoundly stirred the Methodist Episcopal Church, and was the first impulse toward the formation of a missionary society. The church had been organized in the new country only a few years when the African Methodist Episcopal Church was established in 1816, and a Missionary Society in the church of which they were members. The subject having been fully discussed, the formation of such a society was resolved upon, and Messrs. Clark, Nathan Bangs, and Freeborn Garrettson were appointed a committee to draft a constitution, which was approved by the Board of Managers, and subsequently submitted to a public meeting of the members of the church and friends of the missionary cause convened by the Preachers’ Meeting, and held in the Forsyth-street Church, on the evening of April 5, 1819. The society organized and assumed the double character of a Bible and Missionary Society. This met with some opposition, and the new organization had but a precarious existence for the first year. In May, 1820, at the meeting of the General Conference, the Society was heartily endorsed, and the constitution amended so as to make it a purely missionary society.

Until 1844 the Society represented all the churches of the denomination. In that year, however, a division was made, and the Methodist Episcopal Church (South) was formed, and established its own Missionary Society. The Missionary Society of the Methodist Episcopal Church (in the U. S.) is really the Church itself acting through its various forms of organization.

The General Conference for the prosecution of its missionary work appointed a Board of Missions, and afterwards a Board of Managers, and the other a General Missionary Committee.

The Missionary Committee is composed of the bishops, as ex officio members, one representative from each of fourteen districts, and the secretaries of the bishops; also fourteen members of the Board of Managers.

The Board of Managers is composed of the bishops as ex officio members, thirty-two laymen, and thirty-two traveling ministers of the church elected by the General Conference.

The General Conference meets once in four years, the General Missionary Committee once every year, and the Board of Managers monthly, or oftener, as may be required. Honorary managers and patrons, by virtue of donations, have the right of attending the meetings of the Board of Managers, but do not vote. The appropriation of money and the selection of fields rests entirely with the General Missionary Committee, except that the Board of Managers may provide for any unforeseen emergency that may arise in any of the missions, and meet any demands to an amount not exceeding $25,000. Wherever a foreign mission is organized into a conference it receives notice of appropriations directly from the General Missionary Committee. Wherever missions are not thus organized as a conference, they receive their information of appropriations through the Board of Managers.

For the prosecution of missionary work, the Board of Managers acts simply as the executive body of the Missionary Committee. All funds, however, for all missions pass through the hands of the Board of Managers, who account to the General Missionary Committee, and that body to the General Conference.

Each mission, whether it be organized as a conference or not, is divided into districts, over which certain ministers are appointed as bishops, or presiding elders, who superintend the work of that district and are in a sense sub-diocesan bishops.

In 1839 the Board of Managers, to celebrate the centenary of the Methodist Society in London, collected a fund for a mission house, and the first building in New York City was dedicated in January, 1848. At the centenary of American Methodism in 1866, and the Missionary Jubilee in 1869, the fund was greatly increased, a new building secured, and in 1887 the present building on Fifth avenue and 26th street, New York, was erected, the Society owning one-third, free of encumbrance.

Development of Work: The first field entered by the Society was Africa, in 1833. Three years later came the opening of the missions in South America (1836), followed by China (1847), India (1850), Japan (1872), Mexico (1873), Korea (1885), Malaya (1885). During the same period work was undertaken in a number of European countries, Germany (1849), Norway (1853), Sweden (1854), Switzerland (1856), Denmark (1857), Italy (1871), Finland (1882).

The Missions. 1. Africa: (1) Liberia: In 1824 the General Conference decided as soon as the funds permitted to send missionaries to the colony established by the American Colonization Society in Africa. In 1831 the Rev. Melville Cox was appointed to Liberia, his support being guaranteed by the Young Men’s Missionary Society. He sailed in 1832 and reached Sierra Leone in 1833, welcomed cordially by the Wesleyan Missionaries and also by the Governor. Soon after reaching Liberia he succumbed to the fever; but others followed; the next year a more healthy location was found, and by 1836 the different Methodist churches were recognized as the Liberia Annual Conference. Three years later the Conference seminary was opened, and the work extended to several outstations. Industrial work was encouraged by the very start.

In 1851 there was reorganization, both of the Conference and the seminary, and from 1857, for 20 years, no white missionary was sent out.

To meet the difficulty of ordination, Francis Burns was elected bishop and ordained in the U. S. in 1859. He pressed for extension of the work into the interior, as did his successor. In 1876 the visit of a deputation, including Bishop Haven and Dr. J. T. Gracey, resulted in the appointment of Rev. Joel Ogood to press the interior work. The obstacles, however, were such that little was accomplished, and at the opening of 1884 there were no foreign missionaries or well qualified teachers on the field. The school buildings were dilapidated, ministers unordained, and the conference in need of superintendence.

In May, 1884, Bishop William Taylor was elected Missionary Bishop of all Africa. Bishop Taylor arrived at Monrovia in January, 1885, and, having general jurisdiction, was able to harmonize the different enterprises while carrying on his own
work, already begun in Angola. He made extensive journeys with special view to the development of his scheme of self-supporting missions, and by the end of 1888 there were stations along the banks of the Cavally River for 100 miles.

The scheme of self-supporting missions proved impracticable, however, and as soon as this became evident, it was given up. As now organized the Liberia Conference embraces the western coast of Africa north of the equator, and is divided into three districts: Cape Palmas and Sinu, covering a strip along the St. Paul River. In Monrovia there is a strong self-supporting church, and the Methodist College of West Africa is located here. The mission press is established in the capital, from which is issued The New Africa, a thirty-two-page monthly, and Sunday-school literature, tracts, and other publications. There are (1905) 52 stations, 25 American missionaries, 62 native helpers, 2,798 church members, 2 high schools, with 295 students, and 25 other schools with 431 pupils.

Central Africa: On the 20th of March, 1885, a company of missionaries, which numbered more than forty, consisting of women and children, arrived at St. Paul de Loanda, the capital of the Portuguese colony of Angola, under the care of Bishop Taylor. Their objective point was the Tushalange country, some twelve hundred miles inland. It was decided to proceed slowly, by founding a chain of stations, beginning with St. Paul de Loanda. Here a site was purchased, and a building erected for church, school, and residence. Other stations occupied were Ndondo, 200 miles distant, at the head of steamboat navigation on the Congo River; N'hamue, 51 miles over the mountains; Pungo Ndongo, 39 miles farther on, and Malange, 60 miles beyond. In 1886 a new plan was adopted by the bishop, who decided to attempt to reach the Tushalange country by way of the Congo and the Kasai, going by the latter river to the interior. He secured a small steamer, but it being found impracticable at the time to obtain portage around the falls, the steamer was used on the Lower Congo. To reach the Congo District from Malange, the last station in Angola, involved a most hazardous journey, about 120 miles of rough country; stations occupied were Kimpoko, at Stanley Pool; Issinga, on the Lower Congo; Vivi, Natombi, Kabinda and Massubi. With the retirement and death of Bishop Taylor and the appointment of Bishop Hartzell in 1896, a change was made in the principle of support, and the burden of gaining a living in a savage country was lifted from the missionaries. The burden of building has been materially lightened, also, by regular appropriations and special gifts for this purpose.

In 1900 the Congo Conference was divided. The West Central Africa Mission Conference lies on the west, from St. Paul de Loanda about 350 miles inland; with it are included the Madeira Islands. Organized in 1902 it reports 11 stations or circuits, 22 American missionaries, 25 native workers, 87 church members, 14 day schools, with 209 pupils.

(3) East Central Africa: This Mission Conference includes the stations in East Africa south of the equator, and was formally organized by Bishop Hartzell in November, 1901, at Umtali, Rhodesia. There are two principal centers of work in Portuguese East Africa, one at Inhambane and another at Beira. At Umtali a third center has developed, with work among the white population. Here is a self-supporting academy with five departments. An industrial mission is proving beneficial in the work among the (1,000) stations or circuits, 14 American missionaries, 15 native workers, 62 church members, 1 high school with 95 students, and 1 day school with 75 pupils.

II. South America (1836): The Rev. Fountain E. Pitts sailed July, 1835, to South America with a view to founding for the Methodist Episcopal Mission of missions at Rio de Janeiro and Buenos Aires, where the American and English residents had especially encouraged the work. At Rio de Janeiro Mr. Pitts formed a small society of religious people, with a promise that a pastor should be sent at no distant day. Rev. Justin Spaulding, by appointment, went to Rio, sailing in March, 1836, and Rev. John Dempster, appointed to Buenos Aires, sailed in October.

There were indications of an improvement in the general conditions. A large English-speaking population needed the missionaries; the Bibles could be distributed, and the American and British and Foreign Bible Societies supplied Spanish and Portuguese Bibles and Testaments, the people eagerly receiving a book which, until recently, had been interdicted.

Mr. Spaulding was joined by Rev. Daniel P. Kidder and R. M. McMurtry, who entered upon extensive itinerations, preaching and scattering Bibles and tracts. In Rio the work grew, a Sunday-school was begun, and larger accommodations were needed. The hostility of the Roman priests was awakened, and the missionaries subjected to every possible annoyance and blunder. But these efforts were short-lived and served to advertise the mission. The missionaries claimed their rights under the toleration act of the constitution. So eager were the people for the Scriptures that it was at first feared there was a general plan to secure copies to destroy them, but it was found that nearly every copy was appropriately used. Work for seamen and tours through the country showed good results, but through financial embarrassment the Board abandoned Brazil at the close of 1841, and the work was discontinued. In 1847 the British and Foreign Bible Society again entered the field, occupying Para and later Maranhai, Pernambuco, Bahia and Rio de Janeiro. The Rev. (afterward Bishop) William Taylor endeavored to inaugurate self-supporting stations, but with no great success. Still, the work advanced and the Brazil Conference was organized in 1839.

In 1836 Mr. Pitts took up the work in Buenos Aires, which the Presbyterians had left, and was joined by the Rev. John Dempster. They could only secure permission from the governor to preach to the foreign population, and this restriction lasted till 1852. Meanwhile, work had begun in Montevideo, and was prospering when political disturbances caused orders to be issued to discontinue the mission. An earnest protest from the foreign residents and a pledge of financial help resulted in the withdrawal of the order, and there followed a most interesting period when all religious restrictions were removed, and the work took a new start at Montevideo and extended to Esperanza, Rosario, and Cordova. In 1850 the General Committee changed the name of the mission in the Rio Plata region to
"Southeast South American Mission." The name "Western South America" was used on their lists for the stations established by William Taylor in Peru, at Callao, Lima, Mollendo, Arica, and Tacna; Padre Ricci, at Chillén and Surco in Peru; Baldomero in Valparaiso and Mollendo; in Bolivia at Antofagasta and Arequipa, and at Calendula Copiapo, Coquimbo, Valparaiso, Talcahuana and Concepcion. The stations in the basin of the Amazon and adjacent regions at Para, Pernambuco, and Manaus; and at Colon on the Isthmus of Panama, were known as the "North-eastern South American Mission." The "Southern South America Mission" was, however, restored two years later. Missionaries made exploring tours over an immense territory extending 300 miles up the Parana River and from the Uruguay River to the sea, and in 1882 Bishop Foster passed along the coasts of the continent studying the work at Buenos Aires, Montevideo, and Rosario, in its far-reaching relation to the south-eastern part of the continent. With the withdrawal of Bishop Taylor from the supervision of the self-supporting stations established by him, in 1880, the work was placed under the control of the "Transit Building Fund Society of Bishop Taylor's Self-supporting Missions." In 1893 the Transit and Building Fund Society offered their entire property in Chile to the Missionary Society, on condition that the work be still conducted on the self-supporting basis. The offer was accepted and these stations passed into the care of the Society. The same year, after full discussion had taken place, all the stations of the Society in South America were organized into five districts, each under a missionary, until the "South American Mission" was divided into eight districts. There are (1892) 45 American missionaries, 261 native workers, 10,672 church members, 1 theological school, 9 high schools, 133 day schools, 2,916 scholars. The "South America Mission" includes the Republics of Argentina, Uruguay, Paraguay, Brazil, and Bolivia east of the Andes; and the Republics of Chile and Peru. The American mission stations include the entire Republics of Argentina, Uruguay, Paraguay, Brazil, and Bolivia east of the Andes; and the Republic of Chile. The South America Mission has 26 stations or circuits, 29 American missionaries, and 139 native workers, 5,713 church members, 6 high schools with 387 pupils, and 14 day schools with 1,182 pupils. The Western South America Mission has 18 stations or circuits, 43 American workers, 21 native helpers, 1,848 members, and 32 day schools with 2,839 pupils. ((1847): As early as 1835 the Missionary Lyceum of the Wesleyan University at Middletown, Conn., warmly advocated a mission to the Chinese Empire, and $1,460 was raised as the beginning of a fund for such a mission. The matter was held in abeyance, however, until 1846. In that year at the annual meeting of the Society. Dr. W. C. Palmer proposed to be one of thirty to give $100 a year for ten years to support a mission in China. The General Committee accepted, and the following year Rev. M. C. White and Rev. J. D. Collins were appointed to China, where they labored at the mission station at Kiu-kiang, and in 1848 proceeded to Fu-chau, where the missionaries of the ABCFM welcomed them and opened to them a house which had been rented for one of their own missionaries. Thus, Methodism was at last planted in China. Schools were opened the next year and a church erected in 1855. The foreign population joined in the movement, and by 1858 the entire organization of a Methodist Episcopal Church in China was in process of being perfected with its annual conference, quarterly meetings, and collections. The work of the mission in 1859 began to extend westward. This year the To-cheng appointment, about fifteen miles northwest of Fuchau, began with a class of thirteen members; this year also the native workers were licensed and employed. In February more reenforcements joined the mission, notable among whom were the Rev. and Mrs. Stephen L. Baldwin. In November a school for girls was established on a broader and more permanent basis than had therebefore been attempted. Other places were entered, among them Kiu-kiang (1867), Peking (1869), Tientsin (1874). In 1881 the Anglo-Chinese College at Fuchau was organized, followed a few years later by the printing press, in which publication, the Fohkien Christian Advocate; medical work at Fuchau (1880), and a theological school at Hing-hwa, which had been made a station in 1885. In 1901 a Home Missionary Society was organized. (1) The Fuchau Conference is divided into eight districts. There are (1902) 45 American missionaries, 261 native workers, 10,672 church members, 1 theological school, 9 high schools, 133 day schools, 2,916 scholars. (2) The Hing-hwa Mission Conference (1896): This includes the prefectures of Hing-hwa and Ing-chun in Fokien Province, and consisted of a part of the Fuchau mission till 1896, when it was organized as a separate conference. The theological school, boys' and girls' boarding schools, and graded schools are well attended. The Hing-hwa Conference is divided into five districts, with 12 American missionaries, 265 native workers, 3,823 church members, and 8 day schools with 125 scholars. (3) Central China Mission (1869): Missionaries connected with the Fuchau Mission began work in Central China in 1867, and two years later it was set apart as a separate Mission. In 1870 Mr. Hart at Kiu-kiang was reinforced; others followed, circuits were organized, including Hwang-me, Nan-kang, and Shin-chang; the Fowler Institute, at Kiu-kiang, was opened (1881); Wu-hu, Nan-kang, Chin-kiang, and Nan-chang were occupied. In 1891 the anti-foreign riots caused some disturbance, but resulted in the work being established on a firmer basis than ever before. The special feature of 1892 was the opening of a press building on the Kiu-kiang Institute premises, and the mission closed the first quarter of a century of its history in 1893 with large encouragement. The mission suffered in common with others in the Boxer movement of 1900, and this was followed by floods in the Yangtse Valley. The central station of the Central China Mission is now (1902) Nan-kang. There are 30 stations or circuits, 38 American missionaries, and 34 native helpers, 1,420 church members, 4 high schools with 299 students, 26 day schools with 412 pupils. (4) North China Mission (1869): This Conference includes the Provinces of Shan-tung and Ho-pei, and was begun by missionaries from Fuchau in 1869. The riots in Tientsin (1871) did not hinder as much as was feared, and in 1877 the work in
both cities was well organized, and extended both north and south. The famine of 1878, followed by pestilence, opened many doors, and the illness of the hospital of Intermediate schools were established at the mission. The establishment of medical work at Tientsin, and the opening of the Isabella Fisher Hospital for Women in 1881. Then followed Peking University (1885), at first known as Wiley Institute, and a dispensary at Tsun-hwa, the beginning of the hospital of Intermediate schools were established at Peking, Tientsin, Tsun-hwa, Tai-an, and Lan-chau, and day schools were formed wherever possible. In spite of floods and famines the work progressed. Yet appropriations were cut down until in 1902 they were twenty-five per cent. less than ten years before. The Boxer movement paralyzed the work, the fortunately no missionaries of the society lost their lives, and the work has been taken up again with renewed energy. The report (1902) shows 6 districts, 49 stations, 28 American missionaries, 91 native helpers, 2,784 members, 1 college, 7 high schools, and 19 day schools, with 801 pupils in all.

(5) West China Mission (1881): This is confined almost wholly to the Soo-chwan province. When the General Committee met in 1880 they appropriated $140,000 to inaugurate a Wesleyan mission contingent on a like amount being given. This was pledged by the Rev. John J. Goucher, D.D., of Baltimore. The Rev. L. U. Wheeler, D.D., accompanied by the Rev. Spenser Lewis, arrived in Chung-king in December, 1882. There was no difficulty in organizing schools for boys, while numerous applicants appeared for entrance to a prospectives girls' school. Public preaching was commenced in February, 1883; in October of the same year a girls' school was opened, and a similar one for boys in 1884. In consequence of an anti-foreign riot, which destroyed the buildings in 1885, the mission was discontinued for a year, but in 1887 the Rev. Olin Cadly recommenced the work, which increased rapidly. In 1890 Chen-tu was occupied, and the cholera was followed by the political disturbances culminating in the Boxer movement, the growth was phenomenal. There are (1902) 11 circuits or stations, 25 American missionaries, 56 native workers, 1,252 church members, and 17 day schools with 396 pupils.

IV. India (1856): As early as 1852 the General Committee resolved that "a fund be created and placed at the discretion of the Board and bishops for commencing a mission in India," and $7,500 were appropriated for this purpose. It was not, however, till 1856 that the work was begun, Rev. William Butler arriving at Calcutta with his family in September. After careful investigation, Mr. Butler located in the Northwest Provinces, with the Rehikhand and Oudh as his particular field. The territory which comprised the mission field of the M. E. Church extended from the Himalayas on the north, on the west and south to the Ganges, to a point between Cawnpur and Benares, and on the east to the boundaries of Oudh. To man this district Mr. Butler asked for eight men for Lucknow, four for Bareilly and Moradabad, respectively, three for Faizabad, four for Shahjehanpur, Budaon, and Filibbit each. Religious services were carried on once opened at Bareilly, but before much could be accomplished the Sepoy rebellion broke out, and the work was interrupted. The headquarters at Bareilly were destroyed, and when the work was resumed in 1858 Naini Tal and Lucknow were visited and became the basis of operations. The services were resumed at Cawnpur, the school for boys was started in the Naini Tal Bazar and another for girls in the mission house. In January, 1859, work was begun in Moradabad, and the following month Bareilly was again occupied. In July of that year the first convert was baptized. Reenforcements were sent from Calcutta, who proceeded at once to Lucknow, where a general gathering of the missionaries took place. Among the newcomers were Revs. James M. Thoburn, J. W. Waugh, E. W. Parker, J. R. Downey, and their wives. It was decided to occupy Shahjehanpur, which was occupied in 1859, followed in the next three years by芊Muttra, Budaon, Pilibhit, Oudh, and Hardoi, and the publishing office was established at Bareilly and publication was begun—the foundation of the Book Concern at Lucknow, to which city it was removed in 1866. Schools and orphanages for both boys and girls were established, and during the next decade the work was carried on by a large number of trained native teachers, men and women, a remarkable revival through the following years. Among the special features of the mission work are the Anglo-vernacular Girls' Boarding School at Haidarabad, and the pub-
lishing house at Madras. Zenana work under the special care of the Woman's Foreign Missionary Society has had good fruit. The report (1802) shows 37 missionaries, 218 native workers, and 2,206 members. 4. Bombay: This Conference, including the districts of Bombay and Gujarat, and the Central Provinces, was set apart from the Bombay and Bengal Conference in 1891. Then, as in South India, the work received its impulse from the visit of Mr. Taylor in 1876, and enjoyed much support from the Rev. George Shumla. As the work progressed the extent of territory covered and the exigencies of superintendence compelled the division, so that what was at first one general conference of South India became three conferences. The special features of the work in the Bombay district are: the publishing house at Bombay, seamen's rests at Bombay and Kimari, a Mission Institute at Nadiad, medical work at Poona, and general educational work. The report (1902) shows 43 missionaries, 459 native workers, 12,576 members, 240 schools, with 7,500 pupils. 5. Bengal: This Conference, including the districts of Calcutta, Calcutta Bengali, Assansol and Tirhooit, was set off from the South India Conference and organized in 1888. At first it included Burma and the Straits Settlements, but these were afterward separated and organized. A special feature of the mission is the Methodist weekly paper, the Indian Witness, which ranks as the foremost religious paper in India. A training school for girls, orphanages, a seamen's rest, boarding and day schools, as well as general educational and evangelistic work, make up the record of missionary effort. The report (1902) shows 27 missionaries, 121 native workers, 2,339 members, 45 schools, with 2,916 pupils. 6. Burma: This Conference, organized in 1901, to include the Burma district of the Bengal-Burma Conference, carries on its work chiefly in Rangoon, where there are missionaries in Pegu and Thanadaung. In Rangoon the work is among the Burmees, English, Tamils, and Telugus. An English girls' high school and an industrial training school at Thanadaung are doing good work. The report (1902) shows 13 missionaries, 38 native workers, 583 members, 8 schools, with 184 pupils. V. Bulgaria: In 1854 Rev. Elias Riggs, of the ABCFM at Constantinople, wrote a letter to the Society, urging it to take up work in Bulgaria, since there was an opportunity which his own Society felt unable to use. Accordingly in 1857 Rev. Albert L. Long and Rev. Wesley Prettiman, M.D., were sent out and opened stations at Varna and Shumla. Subsequently Tarnova and Tulchta were occupied, work in the latter city reaching the Molokans, a body of Russian dissenters. The work met with both success and discouragement, and in 1864 Dr. Long removed to Constantinople and commenced the publication of a weekly paper, the Zornita, which afterward passed into the hands of the ABCFM, and exerted a great influence among the people. In 1871 Dr. Long joined the staff of professors in Robert College, where he remained until his death, always interested in and identifying himself with work for evangelizing and elevating Bulgarians. For a time the difficulties were so great and success apparently so little that (1871-1875) the mission was practically suspended. In 1873, however, it was taken up again and extended so as to include all the section north of the Balkans. Several Bulgarians, educated in the U. S., were added to the missionary force, and prospects were brighter, when the Russo-Turkish war, following on the Bulgarian massacre, darkened the prospects. The establishment of the principality of Bulgaria brought a measure of religious liberty, but worked adversely, in that the Bulgarians looked upon those who left the Bulgarian Church as traitors to their nation. Still the work has continued, and in 1892 a mission conference was organized. Several times since then there has been question of discontinuing the mission, but the Society has held on, and in 1902 reports 4 missionaries, 42 native workers, 314 members, 2 schools, with 25 pupils. Especially encouraging is the girls' school at Lofticha. VI. Japan: The heavy demands made by other missions delayed the General Conference in entering on work in Japan, but in 1873 a party, including Messrs. R. S. Maclay, John C. Davison, Julius Soper, and M. C. Harris, arrived in Yokohama. They were followed by others and in August the mission was organized in Yokohama. The stations at first occupied were Yokohama, Tokio, Hakodate, Matsumai and Nagasaki. From the first there were most cordial relations with other missions, especially with that of the Canada Methodist Church, and arrangements were made to cooperate so far as possible. This has developed until plans are maturing for a union of all the Methodist missions in Japan. In 1882 a fine girls' school was opened at Nagasaki, and in 1886 the Philander Smith Bible Institute was completed at Yokohama. In 1884 the Mission was organized as a conference, and in 1898 divided into two, the Japan and South Japan conferences. 1. The Japan Conference includes the districts of Tokio, Yokohama, Hakodate, Hirohoko, Nagoya, Sendai, Sapporo, and Shimano. The mission has shared in the various experiences attending the work in Japan—the advance, the period of depression, and the more recent forward movement. The report (1902) shows 47 missionaries, 236 native workers, 5,272 communicants, 11 schools, with 1,427 pupils. The total enrollment in the units of the Institute (Ansei Gakuen) was 259. The press work shows 9,357,800 pages printed during the year, including 19,114 volumes, 242,000 tracts, 363,000 S. S. periodicals. 2. The South Japan Conference includes the districts of Fukuoka and Nagasaki. The naval station at Sasebo and the government works at Mitsu Bishi furnish peculiar opportunities for work among sailors and laborers, and the Chingei Seminary at Nagasaki is a finely equipped school. The report (1902) shows 20 missionaries, 31 native workers, and 1,289 communicants. VII. Mexico: In 1873 the General Conference sent Dr. William Butler, who had served in India and as secretary of the American and Foreign Christian Union, to Mexico. In company with Bishop Haven he visited Vera Cruz, Puebla and Mexico City, and finally located in the capital, Geronimo, which was originally occupied by a palace of the Aztec sovereign Montezuma, and later by a Roman Catholic monastery, which had been seized by the Mexican Government. Dr. Butler was joined by others, some of whom, knowing Spanish, were able to begin work immediately.
The success attending their efforts aroused the bitter opposition of the Roman Catholic priests, resulting in several outbreaks. Dr. S. C. Hayes, of New York, was one of the principal victims. The paper was suppressed and was extended so that in 1884 the mission was organized as a conference. The report (1902) shows 5 districts: Central (Mexico City), Oaxaca, Orizaba, Hidalgo, and Mountain. Among the special features are the Methodist Institute and the publishing house at Mexico, the medical work and the schools. The press issued over 5,000,000 pages of Christian literature. There are 31 missionaries, 156 native workers, 5,502 members, 58 schools, with 3,553 pupils.

VIII. Korea: In 1883, the year after the treaty between Korea and the U. S. was made, Dr. John F. Goucher offered to the Missionary Society $2,000 for the purpose of starting a mission in Korea, and $3,000 toward the purchase of a site. The Missionary Committee accepted it, made an additional appropriation, and in 1884, Dr. R. S. Maclay, who had already been identified with pioneer work in China and Japan, arrived at Cheumpo, secured a favorable reception from the Bishop, W. B. Benton, and Rev. H. G. Appenzeller, commenced the work at Seoul. Dr. Benton's medical skill proved most advantageous, and Mr. Appenzeller secured some pupils for his school, which soon received official recognition. Later, the work was extended to Wonsan, Pyeong-yang and Koseju. Wonsan, however, was afterward handed over to the M. E. Church South. Medical work is still confined to Pyeong-yang, but urgent need is felt of extending it to other stations. In educational matters there is cordial cooperation with the M. E. Ch. South, as there is hearty sympathy in other lines of work. The success attained by the mission is seen in the figures of the report (1902), 26 missionaries, 26 native workers, 5,855 communicants.

IX. Malaysia: The Malaysia Mission had its origin in appeals that went from Singapore to Dr. J. M. Thoburn at Calcutta in 1879. He made special appeals to the Bishop and the Bishop Hurst, at a meeting of the South India Conference, made such representations resulting from a visit to Singapore, that the Rev. W. F. Oldham was appointed to commence work in that city. He reached his station in the spring of 1883 and soon acquired such influence among the Chinese that they contributed liberally to schools and a church. Work was also established among the Tamil coolies. In 1889 the mission was organized which developed into the Malaysia Mission Conference in 1893, and the Malaysia Annual Conference in 1902. In the Malay Peninsula the chief places occupied are Singapore and Penang, but to these was added the work in the Philippine Islands, commenced in 1899. Services are conducted in English, Malay, Tamil and Chinese, and the school facilities for all classes are good. At Singapore there is also a mission press.

In the Philippine work has been undertaken at Manila, Malolos, San Fernando and Gerona. There is a small but complete publishing plant and the Philippine Christian Advocate has commenced publication. The report (1902) shows 28 missionaries, 72 native workers, 3,403 communicants, and 8 schools, with 1,166 pupils.

X. European Missions: The work of the Society in the Protestant lands of Europe had its origin in the conversion in America of some who had come from Europe who desired to return and give to their own people the new conception of spiritual life that had come to them. Thus the work in Norway and Sweden was begun by Olof Gustaf Hedstrom in 1845, and that in Germany by Rev. Ludwig S. Babel. These and other workers commenced the work in Denmark, Finland, and Switzerland. From these, missionary effort has extended over the whole of Northern Europe. The Society employs no American missionaries, but gives some assistance to the native churches. The reports (1902) show work in Norway 63 ordained and 39 unordained preachers, 6,690 communicants; in South Germany, 75 ordained and 151 unordained preachers, 10,412 communicants; Switzerland, 47 ordained, 5 unordained preachers, 8,803 communicants; Norway, 41 ordained, 68 unordained preachers, 5,894 communicants; Sweden 93 ordained and 30 unordained preachers, 17,077 communicants; Denmark, 19 ordained, 21 unordained preachers, 3,465 communicants; Finland, and St. Petersburg, 13 unordained preachers, 1,012 communicants. In Sweden are reported a considerable number of other helping, including teachers.

In 1832 Dr. Charles Elliott commenced to press upon the Methodist churches the feasibility of a mission in Italy. For some years his plan was scarcely treated seriously, but in 1850 it was taken up with some earnestness. It required, however, 20 years more of consideration before the mission was fairly inaugurated, and in 1871 Dr. Leroy M. Vernon arrived in Genoa. After a careful survey of the field he recommended Rome for the headquarters of the mission, with other stations at Naples and Genoa. There followed an earnest protest from Father Gavazzi, of the Free Italian Church, against the introduction of Methodism into Italy, but in 1872 it was decided to proceed, but to make Bologna the headquarters. Subsequently Rome was again chosen, and has been the center of work ever since. In 1874 an exceptionally fine church was offered for the mission purchased, and St. Paul's M. E. Church was erected and consecrated on Christmas Day, 1875. In 1881, the Italian Annual Conference was organized, and the work steadily progressed, not a few representatives of prominent families joining the churches. In the Rome district is included work in Northern Italy and Switzerland. The report (1903) shows 10 missionaries, 40 Italian workers, 2,716 communicants, and 11 schools.

Women's Foreign Missionary Society of the Methodist Episcopal Church: About ninety years after the organization of the Miss. Soc. of the M. E. Church (July, 1819), a woman's auxiliary was formed, in New York City. It was not very active, however, and by 1855 had largely been crowded out by other organizations. Meanwhile (1847) a ladies' China Missionary Society had been formed in Baltimore, but on the organization of the women's Union Missionary Society in New York in 1860, a number of Methodist women joined in that Society. There arose, however, a feeling that there should be a church society, and in 1869 the present organization was completed. The constitution, as adopted by the Executive Committee, which meets regularly, but really has no headquarters, except an office at 150
Methodist Episcopal

THE ENCYCLOPEDIA OF MISSIONS

Fourth Ave., New York City, where literature is distributed. The secretary is Mrs. J. T. Gracey of Rochester. The funds, work, and work of these and other bodies in China, Japan, and India; very few in Africa. They are included in the statistics given above under each conference. The total appropriations for the year were $431,111, while the total for Foreign Missions by the Missionary Society was $683,942. It appears, thus, that the WYMS represents about two-fifths of the foreign mission work of the church.

The work of the young people for missions has, in the M. E. Church, been very fully developed under the Epworth League organization. Mission study classes have been organized at home with a view to training a force of missionary workers as well as givers. On the field, too, this organization has been most effective.

**Methodist Episcopal Church, South (U. S. A.); Board of Missions:** At the first General Conference of the Methodist Episcopal Church, South, held in 1846, a Home and Foreign Missionary Society was organized. Its operations were committed to a Board of Managers, who, in conjunction with the Bishops, determined the fields that were to be occupied, selected the missionaries, and apportioned the amount to be collected among the annual conferences. The home and the foreign fields were under the management of the same board.

In 1866 the General Conference placed the work of the Missionary Society under two boards, one having charge of the foreign and one of the home field. In 1870 the missions of the church were again placed under one board, and in 1874 the Constitution was again changed, bringing the work in foreign lands under the Board of Missions and that in the home field under the Annual Conference Boards of Missions.

The General Board has charge of the foreign missions and all others not provided for by the Annual Conferences. It consists of a president, vice-president, two secretaries, and twenty-five members; the Bishops and treasurers are by virtue of their office members of the board. The Board meets annually to determine what fields shall be occupied, and the number of persons to be employed in each; to estimate the amount that may be necessary for its missions; and to divide the same among the annual conferences.

The first work of the Board was among the colored people and Indians of the United States, and then it launched out into a larger field, opening work in the Chinese Empire.

**China:** The offer made by Charles Taylor, of the South Carolina Conference, in 1843, to go to China as a missionary, was the origin of the action of the first General Conference held in Petersburg, Va., in May, 1846, when it was decided to commence a mission to China. Mr. Taylor was appointed, studied medicine, and in April, 1848, was ordained. In December, Mr. Benjamin Jenkins, sailed for China with their families. Shanghai was selected as the best location for the mission. On arriving at Hongkong, after a four months' voyage, the illness of Mrs. Jenkins prevented her from going many places; and Dr. Taylor began work in Shanghai in September alone. Nine months later Mr. Jenkins and his wife arrived, and as soon as a sufficient knowledge of the language had been acquired the two missionaries opened a chapel for preaching, attracting many who came in those days through the more curious. Some Christian books were published in Chinese at that time and the work was largely that of talking to the people by the wayside and preaching to them in front of temples and as they were gathered in street chapels; but as the language was acquired more perfectly, converts were made and a nucleus of a church was formed. The first convert was greatly a man from the upper middle class—Liew Sien Sang. His name has been familiar to Southern Methodists ever since. He was an eloquent and useful native preacher whose vigorous mind, quick apprehension, ready and fluent utterance, and noble piety made him universally beloved and heeded.

The mission was strengthened in 1852 by the arrival of Rev. W. G. E. Cunyngham and his wife; but the work and the climate began to tell on the pioneers, and Drs. Taylor and Jenkins, with their families, were soon obliged to return home. The Tai-ping rebellion was in progress, and in that year Shanghai was captured and remained in the hands of the insurgents for eighteen months. Little work could be done. Fire and sword, and the plagues of the contending armies arrested evangelistic work; misfortunes culminated in the burning of the only chapel and the two mission houses.

The mission was reenforced in 1854 by three married missionaries, Revs. D. C. Kelley, J. W. Lambuth, and J. L. Belton; but the war continued, and the constant nervous strain and unsanitary conditions brought on sickness, and the withdrawal of two missionaries. Despite difficulties, however, inquiries increased, and several were received into the church.

In 1859 two more missionaries were sent out, and others followed later, but several were compelled to withdraw. In 1869 the record of the work during the twenty-one years of its existence showed that eight missionaries with their families for that period, and twenty-six had been sent out; death had removed one missionary and two missionaries' wives; one had withdrawn from the work, four had returned to the United States, and two were left in the field, Messrs. Allen and Lambuth. About sixty natives had been baptized, and among the converts there were two native preachers of great gifts and usefulness. In 1870 three stations had been occupied—Shanghai, Soochow, and Nantziang, of which Shanghai remained the principal station, having substantial mission houses and two chapels. Faithful work was beginning to have its effect and the mission was becoming strong and aggressive. The full significance of this work appears in the fact that for ten years, or from 1860 until 1870, the missionaries were not supported by their Board—the Civil War in the United States having destroyed the resources of the South. Messrs. Lambuth, Allen and Wood sustained themselves as well as they could, the last named remaining in Soochow, while the other two in Shanghai, having lost his wife.

J. W. Lambuth, ably seconded by his wife, in
addition to efforts at self-support by interpreting and teaching, both his energies were spent in the strengthening of the native church. Native helpers and Bible women were trained and put to work, itinerating tours were made into the surrounding country, a church was gathered together at each of the three stations, boarding and day schools were opened and the work grew in importance. Dr. Lambuth's boat became a familiar object within a radius of fifty miles around Shanghai. On the streets, in the temples, or in the little rented chapels of Taing-pu, Nantziang, Kin-tih, and many other places, he could be seen, the center of a wondering crowd. His life was as powerful as his words, and to him was due largely the credit of laying the foundations for the extensive evangelistic work which now reaches far into the interior of the province.

An early and urgent need of the mission, and in fact of the entire missionary movement in China, was men capable of producing an acceptable and effective literature. China is a nation of students. He who seeks to catch and hold the attention of her literati must conform to their high standard of style and clothe his arguments with the skill of a master. Cut off from home supplies, Dr. Young J. Allen, while maintaining himself by his teaching and translating in the Kiang-Nan arsenal, was constantly thrown in contact with that bright and more advanced class of Chinese officials who had been entrusted with the management of the difficult problem of intercourse with foreign nations. Finding Dr. Allen a man of wide and varied information who sought his counsel and gave him their confidence. He conceived the idea of a periodical that should give the Chinese in their own language the salient facts of a Western religion, philosophy, science, and politics, and such general information as should, in a measure, prepare them for the constantly increasing contact with Western civilization. From this grew the Wan Kuok Kong-Pao (World's Magazine). It immediately became popular, and it now circulates over the Straits Settlements, Japan, Korea, and the Pacific Coast, as well as throughout China. In addition, a number of newspapers have come from Dr. Allen's pen. His History of the Chinese-Japanese War received the acknowledgment of three emperors. Kang-yu-wei, chief advisor of the Emperor of China in the reforms of 1898, and the leading Chinese patriot, while a refugee from the Empress Dowager, said, "I owe my conversion to reform, and my knowledge of reform, to two missionaries—Rev. Timothy Richard and Dr. Young J. Allen."

The pressing demand for trained native preachers was more and more making itself felt in the mission. Moreover, the children of the converts were growing up and the missionaries were face to face with the necessity of providing for them the means of a Christian education. In the autumn of 1875 Dr. A. P. Parker, now President of the Anglo-Chinese College in Shanghai, joined the mission. He was appointed to Soochow, a newly opened station, and placed in charge of a few boys who had already been gathered by J. W. Lambuth into a school in Shanghai. Soochow, the second station of the mission, was one of the most important and one of the most difficult fields of the Empire. The large number of Confucian scholars, literati, great officers, vice-royals, and other high officials that have gone forth from its walls have won it first rank as a literary center. Under the conditions of life which prevailed there, any prejudice encountered among the literati, it was necessary that the preaching of the Gospel should have associated with it some phase of Christian work which should incarnate the spirit and ministry of Christ. It was with this purpose that the Board of Missions decided to open mission work under Dr. Walter R. Lambuth in 1882, having associated with him Dr. W. H. Park, who successfully carried on the medical mission after his colleague was appointed to Japan in 1886.

During 1878 the Woman's Foreign Missionary Society entered the field, sending out Miss Lochie Rankin as its first missionary. At a later date a hospital was opened in Soochow under its auspices. Slowly a foothold has been gained and prejudice overcome. No agency in the mission has been of more value than the work of the women, especially in the educational and medical departments.

The work of the M. E. Church, South, owing to its location in Central China, suffered little from the storm of 1900. The cloud in the north growing out of the Boxer movement threatened destruction, but it passed over, and renewed impetus seems to have come upon the work. One remarkable fact is worthy of note: While the Legations were besieged in Peking the Chinese friends of the medical and educational work in Soochow—and among them were some of the highest officials—were paying their subscriptions pledged for the establishment of the Soochow University under the able presidency of Dr. D. L. Anderson.

The statistics of the mission for 1902 are as follows: Missionaries, including their wives, 35; missionary women, 17; native preachers, 15; Bible women, 66; communicants, 1,944; Sunday schools, 34; scholars, 1,809; Epworth Leagues, 22; members, 725; organized churches, 52; boarding schools, 8; pupils, 476; day schools, 41; pupils, 1,170; hospitals, 3; patients treated, 23,700; total value of mission property, $231,409.

Mexico: The work of the M. E. Church, South, in Mexico is conducted in three sections:

1. Central Mexican Mission Conference: The conversion of an educated Mexican soldier, Alejo Hernandez, was the providential beginning of the work in Mexico. Bishop Marvin, in 1871, appointed him to the territory bordering on the Rio Grande River between Laredo and its mouth. He was reappointed to the same field for 1872. Bishop Keener visited the City of Mexico in 1873, purchased property, organized a mission, and sent Hernandez to this new field. Later the Bishop appointed Rev. Joel T. Daves of the Louisiana Conference, Superintendent of the mission. In 1879 the work had extended from the City of Mexico to the cities of Leon, Guanajuato, Queretaro, Toluca and Orizaba. Guadalajara was included in 1883, and the work was carried well down the western coast.

2. Mexican Border Conference: This mission was also the outcome of the work of Hernandez in the valley of the Rio Grande. In 1874 there were two stations, the one at Brownsville, Texas, and the other in Rio Grande City. Two schools were opened in 1882 under the charge of missionaries of the Woman's Foreign Missionary Society and the other at Laredo. The latter has become as large an educational plant as is found in any
mission. Including its day school feeders, there were last year over one thousand children under instruction. In 1883 the evangelistic work had extended two hundred miles south into Mexico, and of the twenty-three places occupied nine were in Texas, four were on both sides of the Rio Grande, and ten were on the south of it. In 1886 the mission was formed into an Annual Conference.

(3) Northwest Mexican Mission Conference: This was organized in 1890 and extends as far north as Phoenix, Arizona, reaches down the Gulf of California below Mazatlan, and on to the east from El Paso, until it touches the Mexican Border Conference. It also includes the important cities of Chihuahua, Torreon, and Durango. In the first and the last cities the Woman's Board has two flourishing schools. The missionaries engaged in this field have had the difficulty of vast distances to travel, the invertebrate prejudice of Roman Catholics to encounter, and the climatic influences of life in high altitude. But they have wrought well, as the following statistics will indicate: Missionaries, including wives, 36; missionary women, 21; native traveling preachers, 45; communicants, 5,507; Sunday schools, 118; scholars, 3,921; Epworth Leagues, 42; members, 1,462; organized churches, 149; boarding and day schools, 14; pupils, 1,020; Bible women, 19; hospitals, 1; patients treated, 1,417; total collections, $5,871. In addition to the foregoing, special mention should be made of the hospital work in Monterey under Dr. U. H. Nixon, and the Instituto Laurens, supported by the "Rose-buds of Virginia.

(3) Brazil: In 1875 the Board of Missions constituted Rev. J. E. Newman, for some years a resident in Brazil, its first missionary, and early in the following year Rev. J. J. Ransom joined him. The province of São Paulo was first occupied, but in 1877 work was begun in Rio de Janeiro. In 1881 two missionaries went out under the Woman's Board, and in 1887 an annual conference was organized, under the Presidency of Bishop John C. Granbury. The Brazilian mission is perhaps the most aggressive and successful one of the church. Notwithstanding its great area, its small force of trained workers, and meager appropriations, very great results have been secured. In the extension of circuits, in creating and circulating Christian literature, in placing the educational work upon a secure basis, and in unceasing labors to reach the people with the Gospel, no body of men and women have accomplished more than these workers in Brazil.

The statistics for 1902 show that this mission has the largest increase in membership, the largest collections on the field, and more self-supporting churches than any other mission of the church. The new building for Granbury College at Juiz de Fora is approaching completion and when thoroughly equipped will prove an inducement to the youth. Already it has gained an enviable position in the state. Missionaries, including their wives, 29; missionary women, 16; native traveling preachers, 19; communicants, 3,893; Sunday schools, 74; scholars, 2,555; Epworth Leagues, 12; members, 548; organized churches, 377; self-supporting, 7; boarding and day schools, 12; pupils, 358; Bible women, 9; total collections, $8,352.00.

4. Japan: In 1886 Bishop H. M. McIntyre, then in charge of the China Mission, appointed J. W. Lambuth, W. R. Lambuth, and G. A. Dukes, who were engaged in missionary work in America, to open a mission in Japan. On the 25th of July Dr. J. W. Lambuth and wife and Dr. Dukes landed in Kobe and found a field of most inviting character around the great Inland Sea open to their efforts. Joined later on by Dr. W. R. Lambuth, the inauguration meeting of the new mission was held on the 17th of September, 1886, just thirty-two years after the landing of the senior Lambuth in Shanghai, China. At the close of the first year six members of the church were reported, including one Chinese and one Japanese.

Dr. W. B. Palmore, of St. Louis, visited Japan about this time, and pledged $100 annually for a supply of sound religious literature. Out of this gift grew the Palmore Institute, which, by influencing young men through the teaching of English and the Bible, has been one of the most helpful feeders of the church. A Sunday school of twenty scholars was opened; a weekly collection for a church building was started. The wives of the three missionaries entered fully into the work, and sixty women of good families were soon gathered for Bible reading and study. The whole length of the Inland Sea was repeatedly visited. Circuits were mapped out and addresses delivered in many towns from which appeals had come for instruction. Incessant activity characterized the early years of this mission and tested the strength and resources of the missionaries to the utmost. During the first year of their work a converted Japanese pilot, by the name of T. Sunamoto, offered his services. He had just returned from San Francisco with his heart yearning to bring his own people to a knowledge of Christ. Proceeding to his native city of Hiroshima, a Buddhist stronghold and the military center of western Japan, he urged the missionaries to cooperate with him and was the means of planting the Gospel along the northern shore of the Inland Sea in the very towns and cities where, years before, he had piloted rice junks into the inner sea and spread the spirit of revelry and dissipation. With his help, and that of two or three others of similar zeal, the church in Japan sprang quickly into a position where the open doors offered opportunity far exceeding the power to occupy.

The Girls' school in Hiroshima is the largest Christian school for girls in the Empire, and commands an enviable reputation among all classes. Every department is filled to overflowing and applicants are constantly turned away, while the Lambuth Bible and Training School in Kobe is doing an equally important work in training Bible women and others for Christian service.

The Kwansei Gakuin at Kobe, under the presidency of Rev. Y. Yoshioka, and the leadership of Dr. S. H. Wainwright, has collegiate and Biblical departments which are doing advanced work. The ideals held up in this institution for young men, both as regards religious and intellectual culture, are of the highest, and already the college has sent out men into the ministry and into professional life, who are contributing their influence to the unfolding of a Christian empire. It takes a foremost place among the educational institutions in private hands. The statistics for 1902 are as follows: Missionaries, including their wives, 39; native traveling preachers, 14; communicants,
MISSIONARIES, KOREA: Havana, female member, Adelaide, the Canada, mission farmer and clergyman, Bishop, 65,000 members; 312 organized churches, of which 17 are entirely self-supporting; 101 boarding and day schools, with 4,482 pupils; 8 hospitals and dispensaries, which have treated 27,342 patients, and $21,716 has been collected in the field for a purpose designated by the General Board.

The receipts of the General Board from all sources were $366,180, and of the Woman's Board, $112,458, making the total receipts of both Boards $478,638.

Oroban: Review of Missions, Women's Missionary Advocate.

METHODIST NEW CONNEXION MISSIONARY SOCIETY: The Methodist New Connexion, the earliest offshoot from the stem of the parent Wesleyan body in 1707, took its first steps in missionary enterprise in 1821. Attention was first directed to Ireland, and in 1826 a mission was established in Belfast and contiguous towns.

In 1835 Canada was suggested as a sphere for missionary operations, and in 1837 the Rev. John Reid was sent to Canada as the first agent of the Connexion to the Dominion. The mission expanded until in 1875 it united with the other Methodist bodies in Canada, and became the Methodist Church of that country. When the union took place the Mission comprised 396 churches, 7,661 church members, 187 Sunday schools, and 9,250 scholars.

In 1859 a long-cherished wish of the Connexion was realized by the formation of a mission to the heathen. China was selected as the field of labor, and Revs. John Innocent and William N. Hall were the first agents of the Society sent there. They worked at Shanghai for a time, and eventually settled in Tientsin.

In 1862 a mission to Australia was commenced and churches were raised in Adelaide and Melbourne. In 1887, these churches not having developed resources to make their own missionary efforts, and the energies of the Society being demanded by the increasing claims of the Chinese work, they were given up. The church in Adelaide united with the Bible Christians, and that in Melbourne, with the Wesleyans.

The Society is managed by a committee, consisting of a president, a treasurer, and a secretary, with 16 ministers and 16 laymen, appointed annually by the Conference.

The mission in China has three circuits. The first and earliest, in Tientsin, has a fine establishment in the British compound, consisting of a college for the training of young men for the native ministry, also a female college for the education and training of native girls and women for Christian work. There are two chapels in the city where daily preaching of the Word is carried on, and the English Church, in which united services are held, stands on ground owned by the Society. In addition to these, there are a chapel and native church in Taku, and the same in Hsing-chi, a city to the west of Tientsin. This society was the first to enter this great city, but it has recently been opened since by the agents of several other societies.

The second circuit, in the Shantung Province, resulted from the visit to the mission of a farmer from the village of Chu-chia-tsa, 149 miles south
of Tientsin. Under the influence of a marvelous dream he had traveled to the great city to listen to the foreign teachers of religion. He became an earnest believer in Jesus, and went to his home carrying with him Bible, hymn-books, and other Christian publications. He invited his neighbors to headquarters to hear him preaching to them his conversion and reading to them the Bible. A great awakening took place in the village, which spread by degrees over the district, with the result that a pressing appeal was sent to Tientsin for a missionary to come down and take charge of the great movement.

In recent years a third sphere of labor has been occupied in the neighborhood of Kai-ping, north of Tientsin. Near this city extensive mines are worked by a syndicate of Chinese mandarins, who applied to the Society for a medical missionary, offering to afford facilities for the teaching of Christian doctrine among the workmen. An extensive circuit is worked round the headquarters of the Tang-san colliery, extending to Yung-ping-fu, an ancient and important city near the old wall.

The attention of the Society has been heavily at the time of the Boxer outbreak. Aside from the one chapel in the compound at Tientsin, there was not a single property left in the Tientsin circuit in which the Christians could gather for worship, while in the Shantung and Kai-ping circuits the situation was about the same. In Tientsin the Provisional Government granted the mission the use of a Buddhist temple, and afterward of a military Yamen in the heart of the city. In Tang-shan the mission suffered not a little inconvenience at the hands of the German troops who occupied the premises, and seemed disposed to vacate until appeal was made to Count von Waldsee. The question of indemnity proved a difficult one, but was in a fair way of settlement, and the outlook for this Society, as for others, was most encouraging. The faithfulness of the native workers, and the devotion of the great majority of the Christians, was an indication of the substantial character of the work done, and an earnest of future success.

The mission reports emphasize the necessity of more attention to education than has been given in past years. The statistics of members and probationers are also spoken of as probably within the truth, in view of the number who have not yet had the courage to return to their homes. There were reported in 1902, for the three circuits, 8 missionaries, 93 native helpers (with Sunday school workers a total of 102), 100 churches, 211 chapels and preaching places, 3,479 members and probationers. The school returns were incomplete on account of reorganization.

METHODIST PROTESTANT CHURCH; Board of Foreign Missions of the; For many years the missionary interest of this denomination was directed to assisting the work of other churches. Some of the funds collected went into the treasury of the Woman's Union Missionary Society of New York and were applied to the support of Miss L. M. Guthrie in Japan. The mission suffered a subsequent visit to America, went to Pittsburgh, Pa., and met some of the ladies who had become interested in her work. The result was the formation of the Woman's Foreign Missionary Society of the Methodist Protestant Church, in 1879. Three years later the General Conference organized the Board of Foreign Missions, and the two societies have continued to work together.

The interest first aroused in regard to Japan made it natural to establish the mission there, and to Yokohama was sent. Subsequently, Nagoya and Shizuoka were also made stations, and the work was fully organized.

The report for 1902 shows 19 charges, served by 15 pastors, 4 foreign and 11 native; 8 churches, 619 members. The Nagoya Anglo-Japanese College reports 90 students, more than half of whom are Christian, while none can be called anti-Christian. At the meeting of the Conference in 1902 action was taken accepting the basis of union proposed for the Methodist missions in Japan.

The Woman's Foreign Missionary Society has 5 missionaries in Japan, engaged chiefly in educational work. The school at Yokohama numbers 70 and there is a kindergarten with about 40. Sewing circles, mothers' meetings, YFSC and other organizations are developed in good degree.

The mission has also addition a mission work in Hu-nan, China, at Chang-te, and has 2 missionaries working in alliance with the mission of the Cumberland Presbyterians.

The headquarters of the Society are in Pittsburgh, Pa.

METHODS OF MISSIONARY WORK: Methods adopted in missionary work may be considered as 1st, Evangelistic; 2d, Pastoral. The first has primary reference to the conversion of men, the second to their development into a likeness to Christ.

To use the language of a secretary of the CMS, we have: "1. The preaching of the Gospel to the unconverted; 2. The building up of the native church as it is pictured to us in the concluding chapter of St. John's Gospel, where Christ's servants are represented in figure, first as fishers casting the Gospel net, and then as shepherds feeding and tending the flock. Education is a part of each. For the heathen and the Moslem it is an evangelistic; its benefit to converts is rather incidental."

I. We now mention first methods that are common to both evangelistic and pastoral work, not undertaking to be exhaustive in the statement of them, but rather to indicate the lines along which the missionary works.

1. Personal Conversation: The prime element in all missionary work is the personal. Men are drawn to men. Just as it was Christ's personality that drew men to Him, so it is largely the personality of the missionary that draws men to him, and through him to the Savior. This has been most markedly shown in the lives of the great leaders, Henry Martyn, Judson, Livingstone, Goodell, Hannington and others. Indeed, almost all who have had success in missionary work have found their greatest power in his, intimate, personal relation of personal communication, personal contact, where the needy soul felt the touch of the full soul, drew strength from it, and was satisfied; where the hard soul felt the power of the
magnetic soul, and despite itself was drawn away into a higher life; where the cold, indifferent soul felt the heat of a soul on fire with the love of God, and expanded into a nature purer far than it had dreamed of.

It is no easy thing for an Occidental to come in contact with Oriental ideas, prejudices and habits, and to exert such influences as shall bring about change without doing harm. It is easier to go into the street, to harden than to soften, especially in public. Men are swayed by the power of the mass of their follow-men. A single soul in a multitude may be overwhelmed; in private conversation it may be developed.

Thus the fundamental method of missionary work in every land is intercourse with persons. Not only is this true of the inception of any work, but also of its continuance. It is just as important and universal to-day as when mission work was commenced. It is employed by every different agency, foreign and native, missionary, pastor, catechist; especially by Zenana workers, and is, in almost every case, adapted to every class, and is almost the only means of reaching some.

In the pastoral division of missionary work the element of personal influence is, if anything, stronger than in the evangelistic—certainly so far as the work as a whole is concerned; and it is here that personal genius makes itself felt most markedly. It not infrequently happens that to a passing traveler the missionary appears to be doing little missionary work. He seldom preaches; he may not be an educator or a translator. Hour after hour and day after day he is in his study, or among the people, talking, talking, talking. Could the observer hear and understand the conversation, he would marvel at the range of topics, covering every department of human life and every phase of religious doctrine. Shall time be given? How shall a church be organized? What is a Christian's duty toward an unjust, tyrannical government? The following, jotted down in a few moments by a missionary, will give an idea of the keenness of the questioners: 'Why has Christian civilization not accomplished the work that you preach? Is it fitted to accomplish it? Why are your Indians so bitter against you, and repulsive only because? 'If friends pray for us on earth, why should their hearts be dried up and their mouths be stopped when they go to heaven?' "Can a man be a believer who has not been an infidel? Must he not first challenge, then establish, then believe?"

Any missionary can give instance after instance where he has had to call up every line of study that he has ever pursued, to meet the difficulties that occur to the minds of those he seeks to help. But as one sees he has to meet personal peculiarities. The missionary must be a statesman. Church quarrels occur on mission ground as well as in Christian lands, and it is often owing chiefly to the missionaries' personal power that they are overcome. Conflicts with persecuting relatives furnish some of the most difficult cases. But instances need not be repeated to show that personal influence of one who is full of the Holy Spirit is the effective instrumentality in modern missionary work.

2. Public Preaching: This is the development of personal conversation—is, in fact, personal conversation on a somewhat extended scale. It is not oratorical, but conversational; not instructive, so much as hortatory. And it is universal. Not a few have the idea that preaching is taking a secondary place in the mission work. In the large cities, schools, colleges, Bible houses, printing presses, are often more prominent than the preaching places, and many a traveler passes through and reports that mission work, which is primarily concerned with saving souls, has become a means of diffusing education, civilization, etc.—all good, but a departure from fundamental ideas. Thus a Christian man visited the city of Constantinople, saw Robert College, the Bible House, the American College for Girls, the school and dispensary of the Scotch Free Church Mission, etc., and said he was glad to see such good work being done, but was sorry to see so little preaching! The missionary said: "Come with me on Sunday." Then he took him from one end of the city to another, and in Stamboul, Scutari, Galata, Hascouey, showed him gathering after gathering, where preaching by laymen, Harper, Clarke, was going on in Turkish, Armenian, Greek, Spanish and English. The traveler went away, satisfied that missions had not made a new departure in that line. The same thing is true of every mission station in the world. Comparatively few of the missionary societies report the number of preaching places, partly for the reason that accurate statistics are almost impossible, partly because there is such a wide divergence of usage. If we take the term preaching place to mean a place where divine service is held regularly, whether conducted by a pastor, preacher, evangelist or catechist, the number will considerably exceed the number of stations and outstations. For there are a large number of places where preaching services are held with regularity in connection with evangelistic tours, and in many sections of India and China there is not a little of public street preaching. The fact, too, that there are fully 4,000 to 5,000 ordained preachers, and a very much larger number of unordained evangelists, catechists, etc., whose chief work is preaching, shows that preaching is really uppermost. If the chief aim of the missionary is to impart an adequate knowledge of the Gospel within the reach of men.

Passing to the pastoral division, we find the preaching assuming more the character of that in our home churches. It is less conversational, more rhetorical; less hortatory, more educational. Its range of topics widens, and it touches upon every and all the various needs of society and the nation, as well as of individuals. Yet always and everywhere, it is intensely personal; the man is never lost sight of in the community.

3. Sunday Schools: These need no special description. They are carried on in much the same way as in home lands, exert much the same influence, and hold much the same general position, both in their evangelistic and pastoral use. An idea of the universality of their use is gained in the fact that in the reports of many societies they are not classified apart from the churches and attendance, the rule being that wherever there are services there is a Sunday school, with not far from the same average attendance. The fact that they do not appear in most of the reports is by no means an indication that they are not widely used as an evangelizing agency. The chief hindrance lies in the lack of competent teachers, but that is constantly
diminishing in force. According to Rev. Dr. Dennis' Centennial Survey the number of Sunday schools connected with the Protestant foreign mission enterprise throughout the world is 25,889, and the number of attendants 1,227,594.

4. Education: In the earlier stages of missionary enterprise this form of work was not regarded as a method of evangelization and was often held to be inconsistent with the strictly evangelistic aim of the missionary enterprise. Later it became readily recognized as an essential. Converts implied churches; churches needed pastors, and the contrast between pastor and missionary must not be so great that the people should not be willing to look to the former as their leader. Education as a direct means of evangelization, as has been shown in the article on Education, has come to hold a more and more prominent place in the minds and plans of missionaries.

1st. It is an essential to the reading and understanding of the Bible, and upon the knowledge of the Bible conversion must depend in a great degree. Illiteracy in mission lands involves not merely ignorance of letters, but of words, as expressive of ideas. The child in a primary school who has learned to read has a better understanding of truth than his fellow by far.

2d. It corrects false ideas, thus opening the mind to receive the truth. In many cases it is almost an absolute prerequisite to such appreciation of truth as must precede conversion.

3d. It secures a positive religious influence upon the individual, whether child or adult, by which the old prejudices may be softened and new ambitions and hopes aroused. This is one of the most important elements in the influence of education as an evangelizing agency.

Looking now at education as it is actually conducted, it is so similar to that in Christian lands as to scarcely need description. The concomitants of rooms, seats, floor, walls, windows, etc., are often different; but the text books are much the same, the methods are very similar. The kindergarten has not been confined to the Occident but the Christian element in every form of modern advance in style of instruction is adapted to the needs of Arabs, Hindus, Japanese and Kafirs.

Grading is conducted on much the same principle as in other lands. Small villages have little more than the primary school, where children (and sometimes grown people) learn to read and write, and get some idea of the great realm of knowledge that opens before them. The larger towns and the cities have every grade up to the high school. Boarding schools are established for those who, having passed the lower grades in village schools, are anxious for higher education, or may be fitted for work as teachers. Colleges, too, with courses of study comparable with those of England and America, are found everywhere. In the same general line is the movement for Industrial education.

It is, however, in the nurture of the Christian community that the value of education in missions is seen in its fullest degree. Without undertaking to give a detailed statement of the extent to which higher education is carried by the different societies, it is sufficient to say that it has been developed in direct proportion to the appreciation of this second part of missionary work. When it became evident that the only salvation for the convert himself lay in his opportunity and ability to grow, and that this opportunity could not and would not be given or the ability developed unless the society lent a helping hand, then the high schools and colleges sprang up on every side. The tendency now is, also, to make these higher schools more nearly self-supporting.

We now note some of the advantages gained through the higher educational institutions in missions. 1. The furnishing of an educated ministry, which not only takes the place of the missionary, leaving him free for the work of superintendence, but enables the churches to be placed upon a more substantial basis of development for aggressive work. 2. The supply of support to the ministry in the form of an educated laity, able to hold its own in matters of faith, resist any undue desire for ministerial authority and exert influence in the community at large. 3. Solution of questions of social customs by bringing the community in contact with the best results of social development in other lands. This has its dangers as well as its advantages, yet it is a positive necessity. Customs of social life a people must have. If heathen ones are discarded, something must be provided to take their place. It is chiefly through higher education that the best Christian social usages reach the people of non-Christian lands. 4. The establishment of womanhood in proper relations in the home, the church and the community. The occasion for the development of the American College for Girls at Constantinople was the feeling expressed by parents of the wealthier classes, that they wanted a Christian education for their daughters, which should fit them, not only for teaching, but for presiding in their homes. Any one who would accurately judge the value of the work of the institution should follow those young ladies, not only to the village life of Asia Minor and Bulgaria, but to the more pretentious homes of the cities. 5. Proving intelligibly to the great mass of the indifferent in mission lands, that the Gospel takes in the whole man and develops the powers of the individual. It is chiefly through higher education that the telegraph and easy communication, Christianity is judged by its ability to develop as well as to impart. Islam and Buddhism are losing their hold upon men largely by reason of their failure in this very regard, and Christianity is being watched most closely to see whether it meets the need.

5. Publication: As an evangelizing agency the preparation and dissemination of Christian literature have always held a foremost place. The place of the publication work in the mission scheme has been sufficiently discussed in the articles Bible Distribution and Literary Work in Missions. For evangelistic work, tracts, leaflets, helps to Bible study, hold a first place next to the Bible itself. The weekly papers and other periodicals also have a high value. They have more of secular matter, but are always notably evangelical, but evangelistic in tone and reach multitudes who hold aloof from direct missionary influences.

In pastoral work, missionary publications include theological and other text books and general literature. There is not as much of this as there ought to be, chiefly because not merely evangelical, but evangelistic in tone and reach multitudes who hold aloof from direct missionary influences.
provides mature minds among the natives, this want is being supplied more fully.

II. Turning now to those missionary methods which are distinctively evangelical or pastoral, we notice, as belonging to the former class:

**Attention to physical and social needs**, including especially medical work. The relief of physical suffering, the supplying of social wants, is a department of missionary work where, except in the single item of medical work, classification is impossible. Acting upon the general principle that the state of the body affects most vitally the condition of the mind, missionaries in every land have adopted the various means now used so freely and successfully in the large cities of Europe and America. The gospel of a clean shirt," or even of any shirt at all, has proved in many cases a most powerful one in lands where social customs were of the lowest. But, even in communities where that particular form of evangelization was not called for, there has almost invariably been need of more or less attention to these wants and to other means to secure entrance to, and appreciation of, divine truth.

In the earlier history of missions, far more than now, persecution took a form that left the convert without even the means of subsistence. An excommunication that forbade the baker to sell him bread, meant more than the literal starvation to the man who was bold enough to accept the new faith. In such circumstances the missionary was compelled to meet the emergency in such way as he best could. Of recent times that has not been so true; but the need has come in the form of widespread distress from deluge, famine and pestilence. India, Turkey, Persia, and notably China, have repeatedly furnished instances where the supplying of material food has prepared the way for the reception of the spiritual, and hunger, cold and nakedness have unbarred many a door hitherto held tight closed by prejudice and hostility.

Undoubtedly there is danger in this, and none are so quick to recognize it as the missionaries. How to give help without pauperizing, how to avoid the appearance of a bribe to accept Christianity, has required the most careful judgment.

3. The physician is often able to exert an indirect influence in favor of evangelical work by winning the favor of influential men. Notable instances of this have occurred in the Mohammedan lands.

The distinctively pastoral methods of mission work are chiefly connected with organization and superintendence, and have been treated in the article on the Church in the Mission Field.

The culture of converts, so that their insensible influence shall become a power, is worth emphasizing in this connection. The daily life of the convert is an instrument of evangelization of which missionaries should never lose sight.

Family life has always received the attention on the mission field which has only recently been given to it in Christian countries as a direct agency for proving the truth of the claim of the Gospel to renew mankind, and for arresting the attention of those who have not heard of Jesus Christ. This is true in almost every land, but is especially marked in purely heathen countries. The relations and mutual duties of husbands and wives, parents and children, form not only the theme of much earnest thought on the part of the missionary, but of much careful council. To raise the wife from the position of a slave to that of an associate; to develop in the husband and father the sense of responsibility for something real and permanent in the life of those dependent upon him; to educate the children to a genuine reverence rather than the obedience of fear; to give the home character as a center of pure and godly life—these are some of the problems which can only be solved by recognizing the foundations of a right family life is a true agency of pastoral work for the community at large.

**Social life**, or the relations of families with each other, may, perhaps, be considered as one of the problems rather than a method of missionary influence. It is, however, gaining increased importance from the latter point of view in the eyes of those who are watching the development of Protestant Christianity in foreign lands. A man leaves his old faith and accepts the new one. He cannot, however, break away entirely from his old associations, which may include those dependent upon him—certainly those to whom he has duties. He meets them daily in home, in business, in the social circle; is bound together with them in many ways. He cannot if he would isolate himself from them. It is the old question of the times of the Apostles, and creates as much perplexity now as then. To meet it wisely, and place the settlement on a firm, enduring basis, requires that the missionary make a specialty of its study in all its bearings, and be able, not merely to show where the old is wrong or weak, but to present something that shall commend itself to all as clearly preferable. That this is being done increasingly is evident to all who watch carefully the discussions of missionary methods.

**Community and national life** are but the development of the social. There are fields, however, where that involve questions of greater perplexity. Wherever Church and State are united, and political privileges depend upon ceremonial observances, such questions arise. In some cases practically new states have been formed, with their entire paraphernalia of offices and officers. When this has not been the case, still the new Christian community has invariably had a dia-
tinct if not a corporate existence, which has come to be recognized as having an important influence in rendering the position of the Church complete and permanent. Here the missionary meets the questions of the influence of missionaries in this and the demands of unchristian governments. Each case cannot be settled merely upon its own merits: the foundations of a Christian’s relation to the “powers that be” must be thoroughly thought out and clearly stated. Most marked instances of the influence of missionaries in this have been given in the article on the International Service of Missions.

The Christian state, not so much as an accomplished fact, but as an ideal, is a most practical and important element in the methods by which Christianity is to be ultimately established. Many tongues will occur to those intimately acquainted with the methods of missionary work which might have been mentioned. If, however, the impression shall have been given that Christian propaganda should be no mere haphazard sum of charitable acts, that it is a noble impulse, but a calm, determined, well-considered effort on the part of the churches through their representatives to establish Christian faith, worship and life on a permanent and natural foundation in every section of the globe, the chief end of the writer will have been attained.

METLAKAHTLA: A village on the W. coast of British Columbia, occupied by Christianized Tsimshian Indians. Station of the CMS (1856), with 1 missionary and wife, 4 women missionaries, 4 native workers, 2 day schools, 1 boarding school, 1 hospital, 1 dispensary and 244 professed Christians, of whom 47 are communicants.

MEXICO: Capital of the republic of Mexico. It is beautifully situated on a plateau 7,500 feet above the level of the sea, in the Tenochtitlan valley, a far from lake Tezcuco. In the midst of lofty mountains, the climate is temperate and healthy. The older parts of the city, however, being on marshy ground, are subject to malaria. The streets are well paved, broad, and well lighted, and raised paved roads, called paseos, which lead up into the countryside, the streets or on either side by fine trees, add much to the natural beauties of the place. The Roman Catholic religion is the state religion, but other religions are tolerated. In addition to the many churches, monasteries, convents, and other religious or benevolent institutions are plentiful. Schools and colleges, theaters and the buildings for the government offices give the city an attractive appearance.

This city was founded by Cortez in 1522 and stands on the site of a sacred Aztec high place. Population (1900), 344,721. Protestant missionary work was begun in the city by the PE in 1870, its aim being care for the spiritual needs of Protestant residents quite as much as for the native Mexicans. The PN followed in 1872, the ME and MBS in 1873, the Baptist Home Missionary Society in 1883, and the SDA in 1894. The societies together have now (1903) in the city 35 missionaries, men and women; 161 native workers, men and women; 16 places of worship, 21 elementary schools, 7 higher or special training schools, 1 hospital and dispensary, 3 printing houses and 2,172 professed evangelical Christians.

MEXICO: In form Mexico is shaped like a cornucopia, whose mouth opens toward the United States. It anticipated the United States as a European colony by about a century. Yet eighty years ago it was glad to copy our national institutions, and from that time to this, in spite of the restrictions of foreign governments, more than two-thirds of which are on the Pacific and the great Gulf of California. It has no navigable rivers. The east coast is peculiarly lacking in good harbors. It is, moreover, low-lying, and as a rule insalubrious. Mexico can boast but view islands, and those are insignificant in character or extent. The mountain ranges, which seem to form a sort of vertebral column throughout this hemisphere from Alaska to Patagonia, are prominent in Mexico, the cut off from the South American chain by the low-lying Isthmus was thrown up the high tableland intervening between the eastern and western branches of this great mountain range constitutes an admirable highway for railroad development and for international traffic—a fact which did not escape the eye of the great explorer and philosopher Humboldt who, in his "Natural History of the Earth," wrote that this region is "an area rich in water to the extent of its capacity, and capable of forming a great lake," and that the Gulf of Mexico, with its "little lake" and "our great lake," is "the true Mediterranean of the New World." It is the largest lake in the world, and in Mexico's climate the water of the lake is a blessing, and the climate itself is a great blessing. With the establishment of artificial harbors and breakwaters, access can be found for maritime commerce, both on the Pacific and on the Gulf of Mexico. Yet the whole situation indicates that the chief commerce of the country must be carried on with the United States.

In the northern portions of the republic there are great barren expanses, which, the sufficiently level for tillage, are so lacking in fertility as to promise but a slender reward to agriculture. Farther south, and along the east coast, however, there is an abundance of fertility; and altho the climate is often unhealthful, the fruitfulness of the country is such as to supply a large population, if need be, and a lucrative commerce. In Michoacan and other still more southern States there are extensive forests of all the most valuable timber-trees.

The country is in many places volcanic, and from an elevated position in the City of Mexico one can behold several greater or smaller cones which are manifestly of volcanic origin, and near them extended plains of flinty lava. About the middle of the last century the mountain known as Jorullo, in the State of Michoacan, was thrown up on the 1,160 feet above the plain by volcanic action.

The mines of Mexico, especially those of silver, have long been regarded as the richest in the world. It is said that for two or three centuries Mexico has produced at least one-half of the entire yield of silver possessed by mankind. From 1537 to 1860 the total yield of this metal is said to have been nearly three thousand millions. The yield of gold in the same time has been nearly one thousand millions of dollars.

The entire area of the country is 763,804 square miles. The population (in 1900) is nearly 14,000,000, of whom 19 per cent. are of pure or nearly
pure white blood, 43 per cent. of mixed race, and 38 per cent. of Indian race.

The American Indian population is of two races: the Mexican Indians and the true Mexican race. They are a different race. The Mexican Indians are docile and industrious; they engage in agriculture, in mining, and in such rude arts as are practised in countries which do not enjoy the advantages of modern transportation. In all the wars in which Mexico has been engaged the Indians have constituted largely the rank and file of her armies. They are now enfranchised citizens under the laws of their country, and to the extent to which they are taxed they enjoy equal political rights with those of the Spanish race. While the Indians and the inhabitants of mixed blood comprise the mental class, yet from the ranks of the aborigines have sprung men of mark—men who have risen to distinction in science, in arts, in letters, in educational employments, in the church, in military life, and in the conduct of state affairs."

The Ancient Inhabitants: The Toltecs, who preceded the Aztecs in the valley of Mexico, are supposed to have migrated from the north. Like other Indian races on the Western Hemisphere, they probably passed over the narrow channel known as Bering's Straits from northern Asia, and were attracted southward by more friendly climates and more abundant supplies of food. Ehrard has given good reasons for supposing that other migrations also occurred—perhaps in some instances by accident—from Japan across the Pacific, and from Europe and Africa across the Atlantic. The Aztec civilization and that of the Mayas of Yucatan have many things in common with Eastern cults, and particularly with the hieroglyphic inscriptions of ancient Egypt.

The Toltecs were in some respects more highly civilized than the Aztecs, who finally conquered them. Their strength lay in the arts of peace, as that of the Aztecs was developed by war. The terrible system of bloody sacrifice was essentially linked with the war spirit of the Aztec conquerors. The Tezcuans, who entered into a triple league with the Acolhua and the Aztecs, and were finally betrayed and conquered by the latter, presented the highest perfection of the ancient Mexican civilization. One of their kings was one of the grandest figures in history.

The Aztecs were characteristically a warlike race; and, like the Lombards in the Roman Empire, they took on the culture of the vanquished peoples. Like the Venetians, who, when driven by Indian barbarians into the Adriatic, built upon the very lagoons and marshes a mighty dominion—more invincible because built upon the marshes—so the Aztecs, harassed at first by other tribes, took refuge upon a small island in the shallow lake of Tezcuco. This, gradually enlarged by drained piles and the dredging of their canals, became the impregnable stronghold from which they at length dictated terms to all their neighbors, till they had built up a great empire, extending from sea to sea.

No writer of history is more pathetic than that which describes the invasion of this empire by Cortez and his followers in the early part of the 16th century. The combination of prowess and treachery, and the heartless cruelty inflicted in the alleged name of the Cross on so many millions, has left an indelible blot upon the Christian name, and the Aztecs, in spite of their bloody religion, have the sympathy of mankind.

The three centuries which followed the conquest are historically a barren waste.

The Dawn of Political Liberty: This condition of arrested development continued until the spirit of liberty and independence was awakened in a comparatively recent period. It seems wonderful that Napoleon I. should have been the man to strike at last the keynote of liberty among all Spaniards on both hemispheres; but so it was. There had been in all the colonies a sort of chivalric loyalty to the sovereigns of Castile, however severe their oppression. But when in 1808 Napoleon sent his armies into Spain and deposed Ferdinand VII., placing the scepter in the hands of a Bonaparte, the spell of loyalty was forever broken. In 1810 the standard of independence was raised, a patriotic priest leading the movement. By the year 1821 the independence of Mexico and several other Spanish-American States had been won, and by the year 1828 all the Spanish colonies in both hemispheres had become free republics. But the work of reform was as yet only partial—religious liberty had not been achieved. We come now to another series of providences in relation to Mexico, and those, too, which have to do with our own history.

In the year 1835 Santa Anna, then President of Mexico, brought about a coup d'état, by which the governments of the different States were abolished, and all the power was concentrated in the central government under his dictatorship.

Yucatan on the south and Texas on the north at once rebelled, and so grave was the Texan rebellion that Santa Anna himself was compelled to take the field. His armies attacked and dispersed the Texan Legislature, and prisoners of war whom they captured were mercilessly shot by his orders, thus rendering the reconciliation of the people of Texas forever impossible. At the battle of San Jacinto, Santa Anna was vanquished and taken prisoner by General Houston, and for nine years Texas maintained her independence. In 1846 Texas applied for admission to our union and was admitted, and Mexico thereupon declined war with the United States. The oppressive acts of the Mexican dictator were considered a first-rate pretext. And, besides, the fashion of our English cousins in making conquered nations pay the expense of conquering them was also thought to be the right thing to do; and so we concluded to defend Texas all the way from the Gulf of Mexico to the Pacific.

General Taylor appeared on the battlefields of Matamoras and Monterey. General Scott marched triumphantly from Vera Cruz to Mexico city. General Kearney was heard from in Arizona, and Fremont in California.

The Advent of Religious Freedom: Up to the year 1867 there was no religious liberty in Mexico. It is true that the Liberal party had in 1857 drafted a constitution demanding liberty of faith, abolishing conventual establishments, and confiscating ecclesiastical properties in the main; but they were not able to enforce them. As Napoleon I. had unconsciously promoted
the political independence of all the Spanish-American states a half-century before, so Napoleon III. became the unconscious cause of the later movement for religious freedom and political consolidation. He also attempted the dispensing of crowns and scepters. The War of the Rebellion in the United States had furnished the opportunity. A Swiss banker had an exaggerated financial claim against the Mexican Government, which by the adoption of the banker as a citizen of France furnished the emperor with a pretext. England and Spain also had claims, and an alliance was formed for an armed intervention.

In 1862 the united fleets appeared at Vera Cruz with their contingents of men. But England and Spain soon withdrew from the enterprise. The French army under Generals Forey and Bazaine fought their way over the Cordilleras to the capital, where they established a provisional government known as the "Reign of the Empire." This virtually French Assembly submitted the choice of a ruler to the patronizing French emperor, who was politic enough to give the crown of Mexico to the house of Austria. The Archduke Maximilian accepted and, with his young wife accompanied by a changed destiny. On the 10th of April, 1864 amid all the pomp of royalty, this ill-starred couple left their charming abode and embarked for Mexico. They arrived in May at Vera Cruz. Their journey to Mexico City was one series of omissions from the clerical party. Having proceeded first of all to the great cathedral to celebrate mass, they were escorted to the old vice-regal palace, amid the ringing of bells and the rejoicing of the Reactionists that the republic was dead, and an empire was once more established.

But General Sherman was already on his march to the sea; and within four months General Grant received a sword presentation at Appomattox which attracted the attention of France, and of all the courts of Europe. From that day everything went wrong with the French power in Mexico. It was patent to all men that the empire would prove a failure; and the French people especially were vexed at the stupendous blunder of their ambitious and meddling emperor.

Meanwhile, Maximilian and Carlotta had both sincerely endeavored to conciliate the people—he by special franchises, she by indefatigable charities.

But in July, 1866, matters had assumed so grave an aspect that the young empress, then only twenty-six years of age, set out with a few attendants to visit the court of France and remonstrate with Napoleon against the withdrawal of his support.

The spring of 1867 brought the beginning of the end. Maximilian's chief forces, with himself among them, were at Queretaro under siege. In an attempt to escape he was betrayed by one of his generals, placed under arrest, tried by a military tribunal, and, with Generals Miramon and Mexia, was sentenced to be shot. Meanwhile the republic which for ten years had existed, we might almost say in the person of a single man—Benito Juarez—returned from its exile and took to the abode of the mushroom empire.

With the establishment of the republic under Juarez in 1867 that religious liberty which had been proclaimed in 1857 was fully realized, and, notwithstanding the efforts and the bitter persecutions of the Roman Catholic clergy, it has been maintained till the present time.

The Record of the Papacy in Mexico: Even by the judgment of candid Roman Catholics, the religion of Mexico from the very beginning of the Spanish conquest has been a mixture of Christianity and heathenism, the latter often prevalent. An eminently opportunistic Church, claiming as genuine that of the Roman Catholic Church was known in Mexico. When the republic was established in 1823, and thence onward to the proclamation of religious liberty in 1857, an express provision in the constitution declared that the Roman Catholic faith was the religion of the state, and that no other could be tolerated.

One-third of the real property of the republic came at length into the possession of the hierarchy. Conventional establishments for either sex were greatly multiplied. Mexico City might almost have been said to be a city of convents at the time when religious liberty was established. The people, wearied with the long domination of an unscrupulous hierarchy, and remembering that the church had been implicated in all the measures designed to overthrow the popular liberty, carried reform to an opposite extreme of intolerance. It was the mass of the people who, through the clamors of property, silenced the clangor of convent-bells, which the public patience had so long endured, ordered the long robes and shovel-hats and other insignia of the priesthood and other sacred orders to be laid aside when appearing upon the public streets, and suppressed all public processions and various childish pageants. The Jesuits were banished from the country, as they had been at various times from so many nations of Europe. It is difficult for any who desire to be entirely candid to decide whether the papacy, as it existed in Mexico fifty years ago, was on the whole a blessing or a curse.

It can hardly be doubted that altho the Virgin Mary was almost made to take the place of Deity, yet enough of Christ was communicated to many souls to save them from sin and death. Yet the influence of the priesthood was declared by many who were residents in the country to be positively corrupting to the public morals. The licentiousness of their lives was scarcely disguised, and their exactions for the performance of the marriage ceremony were so oppressive that a large extent of time was consumed in the preparation of the rite altogether, and, with the poor, consubstantiality became the rule. The Bible was strictly kept from the people, or if found in their possession was burned as a poisonous and pestilent thing. In the desecration of the Sabbath the priesthood, by example, as well as by law, might be said to take the lead. The funeral ceremonies of the morning mass once over, they were among the promptest and most enthusiastic at the bull-fights. Gambling was a favorite pastime within the monasteries, and that excessive wine-drinking took the place of vigils and of fasting was too plainly indicated by the rotund figures and sodden faces of the padres whenever they appeared in public.

This easy-going life was not inconsistent with the most fiery zeal for dogma, and the bitterness that could persecute men unto death.

The priesthood of Mexico was in touch with the priesthood of Spain in the palmy days of the Inquisition. This institution was established in Mexico by Philip II., and the spirit of the infam-
ous Torquemada did not fail to stamp itself upon the new continent, as upon the old.

When the Northern Methodist Mission purchased a confiscated monastery in Puebla in 1872, and proceeded to adapt it to their missionary uses, they found in the substructure skeletons of Christian martyrs who had been walled into their cells to perish from the sight and memory of men. Juárez was from the first in favor of the more enlightened influence of Protestantism, and every president since 1867 has exerted his influence for freedom of opinion. Among those of liberal sentiments there have been two classes—some undoubtedly mere freethinkers, who cared for no religious faith, but were staunch supporters of freedom. Others, even the Catholics, have advocated liberty of thought, and welcomed Protestantism, not only because such freedom is the dictate of wise government, but because they believe that the disintegration of the one central mass of the papacy is more favorable to national liberty. Of this class was General Esquivel, who in 1879 was heard to express his satisfaction at the introduction of Protestantism, because he believed that its influence, even its rivalries, would prove a benefit to the Mexican Catholic Church, and make it more like the Catholic Church in the United States.

The Present Status of the Republic: A great advance in industrial and commercial resources has been made since the more complete establishment of the republican government in 1867, at the close of the Maximilian empire. The cause of public education has also greatly advanced since the separation of Church and State. It certainly is not creditable to the Roman Catholic Church, which for more than three centuries had held dominion over the country, that the breaking of its dominion was the signal for a great advance in the education of the people. In the year 1857 the University of Mexico was abolished, and was replaced by special schools of law, medicine, letters, agriculture, mines, science and a military college.

The country has so long been exempt from serious political disturbances that the confidence of capitalists has been fully established, and the wealth which springs up with stable government has of itself become a strong conservative factor, and a new warrant for future prosperity.

The capitalists of the country cannot afford the luxury of the old-time pronouncement, and they are now a more influential class than the impetuous adventurers who follow political revolution as a profession.

The Catholic party have not ceased to reecho the old cry of "patriotism" as a means of opposition to Protestant influence, and all American influence, but the most enlightened statesmen have learned long ere this that Protestantism is a better friend to Mexico than the papacy. Nothing is more foreign to the purpose of Protestant missions than to promote annexation to the United States. The more free thought and general enlightenment of the people are promoted, the better are they prepared to maintain their independence. Such a result is the desire and hope of all Protestant missionaries for Mexico.

The Era of Protestant Missions: For the beginning of the Protestant movement we must go back to a period anterior to the proclamation of religious liberty. The seed-sowing of the truth followed immediately the rude plowshare of the so-called Mexican war. The Bible was borne into the country by General Scott's army. This divine talisman, that had wrought such marvels in the civil and religious institutions of the Northern republic, was a stranger on Mexican soil. It was as novel as a falling meteor from another planet. The simple truths of the Gospel were received by the people with a sort of holy gaiety.

The American Bible Society had from an early period cherished a deep interest in Mexico, but almost nothing could then be done for the spread of the truth. But after the Mexican war direct effort was made to introduce the Word of God.

Rev. Mr. Thompson was employed as a Bible agent in Brownsville, Tex., in 1860. Bible distribution was carried on in connection with the missionary work of Miss Melinda Rankin in Brownsville, in 1854. In 1866 she established a school in Monterey, Mexico. As an example of the way in which this word found its way and began to work like leaven, we may cite Ville de Cos, a mining community in the State of Zacatecas.

An "ecclesia" like those of New Testament times was formed in a private house where people met to read the Word of God in secret. The proclamation of liberty of thought in 1857 gave them courage, and the little company grew in numbers and in knowledge. Sending to Monterey for a clergyman, they received the rite of baptism, and organized themselves into a church.

They appointed one of their own number to conduct services and administer the sacraments. They were instructed and variously assisted from time to time by Dr. G. W. Provost, an American physician of Zacatecas. By the year 1872 they had erected a church, and the number of communicants had risen to over a hundred. In 1861, Rev. James Hickey, a Baptist minister residing in Texas, being adverse to slavery and unwilling to be drawn into the impending conflict, crossed the Rio Grande to Matamoras, where he acquired some knowledge of Spanish, and began to preach to the Mexicans. From there he went to Monterey in November, 1862, where, in January, 1864, the first Baptist church was organized, which to-day is one of the strongest evangelical bodies in Mexico. He died in 1866. For about three years the work was maintained by the little body of believers until 1869, when the American Baptist Home Missionary Society appointed a missionary to that field. Since that time the Society has prosecuted its work successfully in the republic, as stated in the article on Home Missions.

Another example of the use of Bible-distribution was found years later in Zitacuaro, in the State of Michoacan. A Presbyterian native preacher, Rev. Mr. Forcada, on commencing missionary work at that point in 1877, learned that a Bible depository had been opened there by a Mexican six years before, and that four hundred Bibles and many religious tracts had been sold. Thus the way had been prepared for an unexpected welcome to the missionary, and a most gratifying success. At present, within a radius of forty miles, there are sixteen congregations of Protestant Church. Undenominational Missionary Work: Through the influence of Miss Rankin at Monterey, the
attention of Rev. Henry A. Riley was called to Mexico as a promising missionary field, and in 1869 he proceeded to the capital, where he found the harvest ripe beyond his expectations. He began his labors under the auspices of the American and Foreign Christian Union, and he succeeded in purchasing at a low price a valuable confluence of the Rio Pecos. The important movement had already begun in the City of Mexico, where a few prominent priests openly avowed their renunciation of the Roman Catholic dogmas and corruptions.

The first was Francisco Aguilas, a man of great eloquence. Alarmed at his boldness and success, a fellow-priest, Manuel Agus, set out to prepare himself to refute the teachings of Aguilas, who had already been joined and encouraged by Mr. Riley. While Agus pursued his investigations in search of arguments, he himself became a convert, and a most successful preacher of the Gospel. Unfortunately for the cause which they had espoused, both of these eloquent men died after a brief career. The converts who were gathered by Father Agus were organized into a church based on the ideas and order of American Episcopacy, and known as the Church of Jesus.

The Protestant influences that have been introduced into Mexico have come largely from North America, and the following societies have accomplished most effective results: The Northern and Southern Presbyterian Boards; the Associate Reformed (South); the Cumberland Presbyterian; the Northern and Southern Methodist Boards; the American Baptist Home Mission Society; Independent Baptists of the South; the Foreign Mission Board of the Southern Baptist Convention; the Protestant Episcopal Board; the American Board (Congregational); the Christian Woman’s Board of Missions; the Friends’ Work; the American Bible Society; the Seventh Day Adventists and their medical work; and the American Christian Temperance Union. The Plymouth Brethren of Great Britain, and the Junta Missionera, of Mexico, are also engaged in active service for the redemption of Mexico.

H.), About Mexico, Philadelphia, 1887; Lumrins (C.F.), Awakening of a Nation. New York, 1898; Rankin (M.), Twenty Years Among the Mexicans. Cincinnati, 1875.

MEYER, Philip Lewis Henry: Born at Neuweid-on-the-Rhine, Germany, November 13, 1826, of earnest Christian parents. Died at Marburg, Germany, August 2, 1876. At his confirmation in 1840 the love of Christ mightily took possession of his heart. Successfully a cabinet maker, a school teacher, a student of medicine, he was thus variously qualified for missionary work. Meanwhile an invitation came to South Africa in 1854. He reached Cape Town November 3 of the same year. He found the mission station at Shiloh and Goshen in ashes by a recent Kafir war, and commenced rebuilding at once, studying the Kafir language, teaching the natives handicraft, and inculcating Gospel truths. In 1859 he founded a new station, not far from Shiloh, in a plain watered by the River Engotti, and called it Engotina. In 1869 he received an invitation to teach a Kafir tribe 240 miles from Engotina. War having scattered the tribe, Mr. Meyer and his family were left alone. But he followed the Kafirs to pray to them in their mountain fastnesses. After peace was restored the people began to come to the station to hear the Gospel, and soon church and school were built and a church was organized. Mr. Meyer was permitted to found one more mission, but his health failed, and he was obliged to return to Europe. After his death, the Mission was carried on by his wife and she was succeeded by her son, who also died. At the time of his death he was in the midst of a large Kafir mission.

MICRONESIA: Certain groups of small islands in the Pacific Ocean, mostly north of the equator, and between the meridians of 130° and 160°. This part of the Oceania includes the Gilbert (Kingsmill), Marshall (Mulgrave, the Raddack and Relikch chains), and Caroline Islands, the Marianas (or Ladrones), and Bonin Island, and many other smaller groups. Of these islands the Manangas are the southernmost, and as far in the north as the Marianas, the islands are low atolls of coral formation. The groups vary in extent—from the single islet of the Marshall Islands of about 100 feet to the islet of 2000 feet to the northernmost of the Gilberts. The largest islands are those of the Gilberts, which have an area of about 1000 square miles. They are all volcanic in origin, and have been elevated to an average height of about 100 feet above sea level.

The high islands, one of volcanic origin, have the physical peculiarities of the atolls, only that the lagoon is replaced by elevated land. The people resemble the brown Polynesian race, but they are evidently of mixed blood; and their language is not the true Polynesian, but distinct and split up into separate languages in the different groups. They are simple in construction, easily acquired, yet quite difficult to reduce to writing because of the shading of sounds, and also on account of the presence of close consonants at the end of a word. Five of these languages have been reduced to writing. Portions of the Bible, hymn-books, and various school-books have been printed. Some of the dialects are very expressive, and tho not having extended vocabularies, are rendered flexible by the use of pronominal suffixes, verbal directives, and terminations to indicate place and
to express comparison. Degraded in past usage, the introduction of Christian ideas means resuscitation to the language no less than life to the people.

The religious of the islanders used to be not greatly unlike modern spiritism, and their social usages imposed no family ties. Polygamy was tolerated among the chiefs, but not very extensively practised. Children belonged to brothers and sisters of the parents as much as to the mothers.

The people wore little, if any, clothing, tho the habits of different groups show great variety. In the Gilbert Islands men had no covering of any kind; the women wore a fringed skirt 10 or 12 inches long, the children both; the Marshall Islands men wore a fringe skirt 25 to 30 inches long, and the women two mats, about a yard square each, belted about the waist. Upon the Caroline Islands some covering was used. The dwelling-houses were mere shelters of simple construction, tho the council-houses were large.

The forms of government varied, but were all founded on the idea of the aggrandizement of the chief rather than the good of the subject. Human life was slightly regarded, and even petty chiefs sent many a victim to the executioner.

Missionary work was begun on Ponape and Kusaie (Caroline group) in 1852 by three American missionaries (L. H. Gulick, A. A. Sturges, and B. G. Snow) with their wives. They were accompanied by two Hawaiian missionary helpers with their wives. The first five years were discouraging. Many times the enterprise seemed ready to fail. Opposition of foreigners (self-exiled and more degraded than the natives), small-pox on Ponape, insurrection on Kusaie, disastrous results of contact with the whale fleets, and the dense paganism of the natives themselves had all to be overcome by the faith of earnest men. The year 1857 saw Apaiaing (Gilbert Islands) and Ebon (Marshall Islands) opened.

During the next five years (1857 to 1862) the harvest began. During the last twenty years there has been a constant increase of both hearers and converts.

The changes which have been wrought through the efforts of the missionaries are truly wonderful. The transforming power of the Word of God has never been more manifest than in this field. There has been a marked development of stability in the character of the natives. Formerly they were dishonest and untruthful. There was a belief among them that the Great Spirit used deceitful means for the accomplishment of His plans or for maintaining His authority, and the people accordingly cultivated deceit. Ships were often pillaged and the crews murdered. But the Gospel has in many islands effected a complete revolution. Social ideas have been changed. The family has been built up, and the ceremony of marriage is becoming more and more common. The practice of family-worship has done much to purify and crystallize social ideas, and a strong sentiment of his duty to guard the household and defend his family from the lust of even the chiefs is rising in the mind of the head of the household.

Better dwellings, greater personal cleanliness and tidiness have also followed the moral reformation. Intellectual progress is quite marked. The schools are well attended. Native teachers have done very efficient work. The mother-tongue has become the vehicle of blessing. From the first a missionary spirit has been cultivated, and the young convert has been taught to keep in view the prospect of becoming a teacher of the new doctrine on his own island, or, if need be, on other islands. When the work was to be pushed westward from Ponape it was done by native missionaries, furnishing one of the most interesting chapters in the annals of missionary work. Going forth to a people of diverse tongue these men and women prepared themselves for the work, and soon gathered in large numbers of converts.

The American Board has training schools at Kusnie and at Ruk. There are 51 churches, with over 6,000 communicants. The LMS has a flourishing work in the southern islands of the Gilbert group.

MIDDLEDRIFT: A settlement in the Transvaal, S. Africa, situated on the S. side of Limpopo River, about 130 miles N. by E. of Pietersburg. Station of the NBC (1897), with (1900) 1 missionary and 5 native workers; 25,000 and 4 places of worship, 9 Sunday schools, 3 day schools, 1 temperance society, and 340 professed Christians.

MIDNAPUR: A town in Bengal, India, situated 65 miles W. by S. of Calcutta, with which it is connected by canal. It is the center of a silk and indigo industry and has a population (1891) of 32,500, of whom 24,700 are Hindus and 6,800 Muslims. Station of the Free Baptist Missionary Society (1863), with (1903) 3 missionaries and their wives, 3 women missionaries, 54 native workers, 6 outstations, 1 place of worship, 6 Sunday schools, 2 boarding schools, 16 day schools, 1 theological class, 1 dispensary, and 213 professed Christians, of whom 125 are communicants. The Society spells the name Midnapore.

MIDONGY: A village in Madagascar, situated 70 miles W. of Fianarantsoa. Station of the Norwegian Mission Society (1894).

MIEN-CHAU: A town in the Province of Szechwan, China, situated on the Fu-kiang, 62 miles E. by N. of Cheng-tu-fu. Population, 70,000. Station of the CMS (1894), with (1903) 6 missionaries, 2 with their wives; 2 women missionaries, 1 native worker, 1 place of worship, 1 dispensary, 1 day school, and 8 professed Christians. A general reorganization after the Boxer outbreak is now under way. The Society spells the name Mien-Choe.

MIEN-CHU-HSIEN: A town in the Province of Szechwan, China, situated 45 miles N. of Cheng-tu-fu. Population, 50,000. Station of the CMS (1894), with (1902) 2 missionaries, 1 with his wife; 1 woman missionary, and 5 Christians. The Society spells the name Mien-Chu.

MIHJAM. See Malajam.

MILDMAK INSTITUTIONS AND MISSIONS: The Mildmay Conferences were inaugurated in 1856 by the Rev. William Pennefather, Vicar of St. Jude's, Mildmay Park, at Bermet. The chief purpose, to persuade members of various Christian Churches openly to acknowledge their spiritual union, seemed to many fraught with danger of an actual exhibition of disunion and confusion. In fact, they were so successful that in 1869 the corner-stone of a large Conference Hall was laid at Mildmay, and the institution became a center of union for Christians of all
denominations, and has facilitated the prosecution of a variety of evangelistic and missionary enterprises.

The Conference Hall is used not merely for the annual conferences, but for weekly evangelistic services, and there are special rooms for Bible classes, mothers' meetings, tea meetings, etc. Closely connected with it are a deaconess house, a training home for lady workers for home and foreign missionary work, called 'The Willows,' a nurses' home, a Memorial Cottage Hospital and orphanage, while a mission hospital at Bethnal Green, and a convalescent home at Ossulston are under the same management. Special interest attaches to the Pennefather Memorial Home for Mildmay workers who are disabled by sickness or accident. It is in a cherry tree in a corner of the Park, under which it has been the custom to gather afternoon meetings during the conferences.

The three departments especially connected with foreign mission work are the Bible class for men in Conference Hall, which has sent out a large number of workers, ordained and lay; the Deaconess House, and the Willows Training School. The Bible class is represented in the Church of England, Free Church pastorate, on the foreign fields in China, India, Persia, South America, and Africa, and in work for the Jews. The Deaconess House is the administrative headquarters for the three branches of its work: medical, home, and foreign missions. The graduates are found in every part of city work as well as on the foreign field, including some of the most difficult sections, as Arabia, Kashmir and Central Africa. For the most part Mildmay workers go in connection with the regular missionary societies, and in the training institute there is a special class in preparation for the CMS. The organization is made closely in charge of work among the Jews, particularly in London and Eastern Europe, and the Jaffa Medical Mission and Hospital is closely affiliated with it. The City Mission work includes rescue work, house-to-house visitation by the deaconesses, and any phase of benevolent work that seems important.

The whole organization is under the care of a board of trustees and council, including representatives of the Church of England and the Free Churches.

MILLER: A village in Cape Colony, S. Africa, situated in the Transkei district, 33 miles S. E. of Clarkebury. Station of the UFS (1887), with (1903) 2 missionaries and their wives, 8 native workers, 8 outstations, 2 places of worship, 1 Sunday school, 4 day schools, 1 dispensary, and 37 professed Christians.

MILLS, Samuel John: Born at Torrington, Conn., April 21, 1783, the son of a minister. He entered Williams College in 1806 and graduated in 1809. After entering college he was accustomed to meet with a few students in a grove for prayer and religious conference, and on a memorable afternoon, when driven by a thunderstorm to continue their conference under a haystack, he first suggested the idea of personal responsibility for sending the Gospel to the benighted portions of the earth. The young men later formed a society with 15 members and the idea to send 'the Gospel in the persons of its members a mission to the heathen.' In 1810 Mills entered Andover Theological Seminary, where he found Hall, Newell, Judson, and Nott deeply interested in the same subject, and he proposed that they unite in an appeal to the General Association of Massachusetts, soon to meet at Bradford. This memorial led to the organization of the American Missionary Association. Mills, after his graduation, was active in organizing Bible and other benevolent societies in different parts of the United States, and was sent to Africa by the American Colonization Society to choose a site for a colony of negroes from America. There he contracted a fever from which he died on shipboard June 16, 1818.

Tso not permitted to engage personally in a foreign mission he accomplished much for the conversion of the world. From the mind of Mills arose plans for the American Board of Commissioners for Foreign Missions, the American Bible Society, the United Foreign Missionary Society, and the African School under the care of the Synod of New York and New Jersey, beside impetus given to Domestic Missions, to the Colonization Society, and to the general cause of benevolence in both hemispheres.

The Encyclopedia of Missions, page 476.
Besides the works mentioned, he published 'Retrospect of the Protestant Mission in China.'

**MILLPORT HARBOR:** A settlement in British New Guinea, situated on the S. coast, about 80 miles W. of Kwato. It is a lovely situation on a hill with a bay on each side. Station of the LMS (1890), with 1 missionary.

**MING-CHIANG:** See MIN-TSING-HSIEN.

**MINGRELLIA:** A district of Asiatic Russia, in the Caucasus, lying between Tiflis and the Black Sea. Area, 2,600 square miles. Surface generally mountainous, sloping toward the south. Climate warm and damp; fevers are prevalent; soil exceedingly fertile, and vegetation rapid. The mountains are covered with magnificent forests, and much good land lies waste. The district is without external improvement, and has a savage and deserted appearance. Population, 240,000, most of whom belong to the Georgian race, but are generally inferior in appearance to the mountainineers of the Caucasus. The dominant religion is that of the Greek Church. Mingrelia corresponds with ancient Colchis. It was long a part of the kingdom of Georgia, was afterward held under Sardis, then under the princes, and became subject to Russia in 1804, but its prince remained nominally sovereign till 1857, when he sold all his rights to the emperor of Russia for 1,000,000 roubles.

There is no distinctive mission work carried on among the Mingrelians, the colporteurs of the British and Foreign Bible Society go through the country occasionally.

**MIN-TSING-HSIEN:** A village in the province of Foo-kien, China, situated on the Min River 28 miles N. W. of Fu-chau. Station of the M.E., with (1903) 3 women missionaries, 25 native workers, 7 outstations, 19 places of worship, 17 Sunday schools, 14 day schools, 1 boarding school, and 1,457 professed Christians, of whom 784 are communicants. The Society spells the name Ming-chiang.

**MIRAJ:** A town in Bombay, India, situated 70 miles W. of Bijapur and 32 miles E. N. E. of Kolhapur. Population (1901) 26,100. Station of the PN (1892), with (1903) 5 missionaries, four of them with their wives; 2 women missionaries, 7 native workers, 1 place of worship, 2 Sunday schools, 3 day schools, 2 boarding schools, 1 dispensary, 1 hospital, 1 medical clinic, 27 preachers, and 13 professed Christians. The Mission to Lepers in India and the East supports a leper asylum here, in connection with the Presbyterian Mission.

**MIRAT:** See MEERUT.

**MIRZAPUR:** A town in the United Provinces, India, situated on the right bank of the Ganges, 30 miles W. S. W. of Benares. Population of class (1901) 75,000, of whom 13,500 are Catholics. Station of the LMS (1837), with (1903) 2 missionaries, 1 with his wife; 2 women missionaries, 16 native workers, 1 outstation, 6 Sunday schools, 9 day schools, 1 boarding school, 1 orphanage, and 137 professed Christians, of whom 46 are communicants.

**MITLA:** A town in India situated 65 miles N. E. by N. of Toko. Has a large fish export trade. Population, 19,600. Station of the ABMU (1899), with (1903) 1 missionary and wife, 1 woman missionary, 5 native workers, 5 outstations, 3 places of worship, 5 Sunday schools, and 93 professed Christians. Station also of the APM (1888), with 1 missionary and wife, 2 native workers, 1 Sunday school, 1 industrial school, 1 orphanage, and 1 dispensary. Station also of the PE (1901), with (1903) 1 missionary, 1 native worker, 2 places of worship, 1 day school, and 1 hospital.

**MITSIDI:** A settlement in the Shire district of British Central Africa, situated 30 miles W. by N. of Blantyre. Station and plantation of the Zambesi Industrial Mission (1900), with 5 missionaries, two of them with their wives; 1 woman missionary, 1 outstation, 1 place of worship, 2 Sunday schools, 2 day schools, 1 industrial farm, 1 dispensary, 1 hospital, and 30 professed Christians.

**MITYANI:** A village in Uganda, Africa, situated in the district of Singo, 40 miles W. of Mumbo. Station of the CMS (1893), with 2 missionaries, one with his wife; 76 native workers, 1 printing press, 1 theological class, 1 dispensary, and 2,350 professed Christians, of whom 598 are communicants. Society spells the name Mityana.

**MIYAZAKI:** A town in Kiushiu, Japan, situated near the E. coast, about 100 miles E. S. E. of Nagasaki. Population, 5,000. Station of the ABCFM (1894), with (1902) 1 missionary, 1 woman missionary, 8 native workers, 25 outstations, 3 places of worship, 7 Sunday schools, 1 Young People’s Society, and 1 orphanage.

**MIJOZI:** A settlement in Pondoland, Cape Colony, Africa, situated near Mount Ayliff and about 45 miles S. E. of Kokstad. Station of the South Africa Baptist Mission Society, with 1 missionary and his wife, 1 outstation, 1 place of worship, and 3 professed Christians.

**MKUNAZI:** A village on the W. coast of the Island of Zanzibar, Africa, and one of the suburbs of Zanzibar town. The UM has its headquarters here. Statistics given under Zanzibar.

**MLANJE:** A village in British Central Africa, situated on a range of hills 25 miles S. of Lake Shirwa. Altitude, 8,000 feet. Station of the CSFM (1857), with (1900) 2 missionaries, one with his wife; 7 native workers, 2 outstations, 1 place of worship, 3 Sunday schools, 1 boarding school, 1 industrial school, and 19 professed Christians.

**MLENGANA:** A parish in the W. of Pondoland, Cape Colony, Africa. Station of the Episcopal Church of Scotland (1892), with (1902) 2 missionaries, 5 native workers, 5 outstations, 5 day schools, 1 place of worship, and 307 professed Christians, of whom 112 are communicants. The Society calls the parish St. Barnabas.

**MODERN PROTESTANT MISSIONS:** For two centuries after the Reformation there was practically no missionary activity in the Protestant churches. Erasmus taught the duty of world-wide evangelization, but as something for the future rather than the present. Luther seemed careless of everything but the preparation of his own community for the “last days,” and the settlement of the violent controversies that were the inevitable attendant upon the sudden enfranchisement of individual opinion. There were, however, a number of enterprises, individual or political: the Calvin-Coligny colonies in Brazil and Florida (1555-64), more political than religious in character, and all failures; a mission to Lapland (1559) under the auspices of Gustavus Vasa; an
effort by the Dutch to introduce Christianity among the natives of Java (1619), following the establishment of a college for the training of missionaries at Leyden (1612), and extending to the Dutch colonies in the Indian Ocean. The Mayhews and others, resulting in the granting by the Long Parliament of the first charter to a missionary society "for the promoting and propagating the Gospel of Jesus Christ in New England and all other parts of the world," was the forerunner of the "New England Company.""-

With the middle of the 17th century commenced a new movement, inaugurated, not by the clergy, but by the laity, and including some prominent jurists of Lubeck. One, Peter Heiling, restored his field, Abyssinia. In 1664 an Austrian baron, Von Welz, issued an earnest appeal for the conversion of the heathen, to which Ursinus in Ratisbon responded that Greeks were responsible for the Turks; the Danes and Swedes for the Greenlanders. But that it was absurd, even wicked, to cast the pearls of the Gospel before the dogs of cannibals.

Two years before this, however, Spener had been made pastor at Frankfurt, and with his friend, Francke, led the German Pietists in giving a new direction to the church. The University of Halle, while in 1700 the philosopher Leibnitz urged upon the Berlin Academy the duty of propagating "the true faith and Christian virtue among the remote and unconverted nations," especially China. The first action under the new impulse was the founding of the Danish Tamil Mission by King Friederich IV., of Denmark, in response to the representations by Court Chaplain Dr. Lütken, and the sending of Ziegenbalg and Plütschau to Tranquebar in 1705 (see Danish Missions).

The Danish movement led to the Moravian movement. Count Zinzendorf, who had given the persecuted Bohemian Unitas Fratrum a home on his estate at Berthelsdorf, visited Copenhagen in 1731, and saw and heard of Foreign Missions. The result was that, in 1732, two Moravians went to St. Johnsborg, W. I., and in 1733, two more to Greenland, and within four years other Moravian missionaries went to Dutch Guiana, to South Africa, to the Indians of Pennsylvania and Georgia. This last enterprise became the link connecting with Germany still another chain of missionary endeavor.

In 1729 the Oxford Club, of which the Wesleys were prominent members, was founded, and six years later the two brothers went with General Ogilthorpe to Georgia, and came in contact with a Moravian missionary. This led to a visit by John Wesley to Herrnhut in 1738, and to acquaintance with Zinzendorf and Francke, whose influence in Methodism has been great. It was not, however, till some time later that the distinctively missionary feature of the movement became apparent.

During this period, with the exception, in a degree, of the Moravians, the dominant idea was the colonial. England, Holland and Denmark had reached out to enlarge their commercial relations. The needs of the colonists were uppermost in the thought of the home churches, and the laity in the colonies in the minds of the leaders was not considered enough from the political than from the spiritual standpoint. Under the influence, however, of the revival spirit which spread through England and the United States, and which brought to the front the Wesleys, Whitefield, Wilberforce, the Countess of Huntington, Henry Venn, Thomas Scott, Philip Doddridge, John Watts, Hannah More, Jonathan Edwards, and others, a stern sense developed of Christian duty toward a world lying in sin. In 1746 a prayer concert was continued during seven weeks, in which Jonathan Edwards had a share. But no practical application of this new conception was made to the work of missions until Carey's famous "Inquiry," and his two sermons, "Expect Great Things from God," and "Attempt Great Things for God," in 1792. From these resulted the Baptist Missionary Society, which inaugurated the era of aggressive Protestant missions.

From this period the missionary idea was rapid and multiflora. Chronological statement becomes confusing, and the topical presentation of progress on the whole gives a clearer view. Three divisions stand out prominently: 1. The development of the missionary idea in the church; 2. The occupation of the field; 3. The results achieved.

1. Development of the Missionary Idea: It is an interesting fact that the first influence of the missionary spirit has always been to subordinate denominational or national feeling, and the distinctively evangelical element in England felt the power of the initiative of the Baptists, and three years later a number of representatives from the Independent (Congregational), Wesleyan, Presbyterian and Episcopal bodies met and organized "The Missionary Society for Propagating Christian Knowledge," which afterward was known as the Independent Missionary Society. That afterward they separated was due to no lack of sympathy with each other, but to the simple fact that they felt they could accomplish more for the great work by developing their own particular fields. Thus, in 1799, the Evangelical churchmen formed the Church Missionary Society, in 1814 the Wesleyans established their own organization, and later the Presbyterians did the same. But the influence of these societies was by no means confined to their own circles. Two Church of England, and one Society for Promoting Christian Knowledge, founded as early as 1698, and the Society for the Propagation of the Gospel (1701), which had hitherto confined their attention almost entirely to the home and colonial needs, broadened their outlook and their efforts, and became, in their own sphere, distinctively missionary societies. So, also, the General Baptists (Arminian or Free Will) followed the lead of their Particular (Calvinistic) Brethren, and in 1816 established their own society. The other Methodist societies, known as The London Missionary Society, did not come into existence until later, with the exception of the Bible Christians' organization, which dates from 1821.

Parallel with this movement in England was a similar one in Scotland. There, too, as early as 1709, a society for Promoting Christian Knowledge had been formed, which established a board of correspondents in New York in 1741, and assisted in supporting workers among the Indians, among them David Brainerd. Following on the organization of the Missionary Society in London, similar societies were formed in Edinburgh and Glasgow, and Calvinistic societies in New England and the enterprises of the Established, Free, and United Churches.

It was characteristic of the broad view of the leaders in the evangelical and missionary move-
ment that great emphasis was laid from the beginning on the necessity for the fullest of information and the best direction of thought and study. Besides the two Societies for Promoting Christian knowledge already mentioned, there were formed (1793) the Religious Book and Tract Society of Scotland, (1799) the Religious Tract Society in London, (1804) the British and Foreign Bible Society, followed by similar organizations in Scotland, afterward united in the National Bible Society of Scotland.

In America, up to the time of Carey, the evangelistic thoughts and action of the churches had been almost entirely, if not exclusively, devoted to sending missionaries to Africa. The sailing of Carey and the formation of the LMS aroused great interest, and a number of societies were formed in New York and New England, in 1796-97, primarily for work among the Indians, but in some cases with special mention of the needs of foreign lands. Several magazines were founded and funds were raised for foreign enterprise. 

The foundation of Andover Seminary (1806) had special reference to the preparation of preachers for mission work. As in England, individual enterprise had a great influence, and the munificent gifts of Robert Ralston and others, of Philadelphia, helped to arouse the interest of the churches.

The special initiative for active work was furnished by three students in Williams College, Samuel J. Mills, Gordon Hall, and James Richards. At the famous haystack prayer meeting in 1806, they pledged themselves to the work, and on entering Andover Seminary in 1809, pressed the matter upon public attention so earnestly that the General Association of Congregational Churches, at a meeting in Bradford, Mass., considered the question of a society. As a result, in June of that year, the American Board of Commissioners for Foreign Missions was organized. As in the case of the LMS, different denominations, chiefly Presbyterian and Reformed, united with the Congregationalists. The Baptists continued to send their gifts to Scarsdale until the new of the change of views on the part of Judson and Rice aroused them to the opportunity for a work of their own, and the American Baptist Missionary Union was formed in 1814. The Methodists established their work in 1819, and the American Bible Society (1816) was followed or attended by various tract societies united in The American Tract Society in 1823.

On the continent of Europe, the influence of the movement in England was felt at once both in Holland and in Germany. In Holland the sending out of Van der Kemp by the LMS and the organization (1797) of the Netherlands Missionary Society, at first as an auxiliary to the English work, but later independent in its labors. In Germany the missionary interest in Halle had practically died out; a new movement at Basel, in Switzerland, however, took its place. As in the case of Judson they had been forced for the development of evangelical life, and its members were in close touch with the movements in England. This resulted in 1815 in the establishment of the Basel Missionary Institute. In Berlin, too, a similar movement was inaugurated by Pastor Vaniček, in 1800, and in 1824 the Berlin Missionary Society was organized.

The Foreign Missionary enterprise inaugurated by Carey, and undertaken in the United States, Holland and Germany, passed through a period of severe trial. Early years of such enterprises are years of seed-sowing rather than of reaping, and the new organizations had all they could do to hold their own. After the first flush of novelty there seemed to come a new impulse to the work. One after another of the churches that had been content to act the part of assistants assumed the position of principals. Thus, in England, the Welsh Calvinistic Methodists (1840), the Presbyterian (1841), Primitive (1842) and United Methodist Free Churches (1857), Methodists New Connexion (1859), and Friends (1866), established their own work; while in the Church of England, the South American Missionary Society (1844), Universities Mission to Central Africa (1855), led the impulse to special work which developed in a number of minor societies. In 1865 the China Inland Mission marked almost an epoch in missionary enthusiasm, and in 1872 was formed the East London Institute, since reorganized with some others as the Missionary and Religious Society for the Propagation of Christianity in the Japanese Islands (1876). In the United States a similar impulse was felt. The Episcopalian (1835), Presbyterians (1837), Lutherans (1838), led the way, and other branches of the Church followed, until scarcely any, even of the smaller denominations, are without a regular missionary organization.

The same development occurred in Europe; and Germany, Holland, Denmark, Norway, Sweden, Switzerland and France joined the ranks of Christian missions. (See articles on these countries for details.)

It is to be noted, however, that the activity of the Church was by no means confined to what may be called its regular organizations. Innumerable associate movements were started. There were missions to the Jews, missions for seamen, missions to lepers, and the like. There were more or less catalogue of the societies of one name or another in England, the United States and Europe, more or less closely connected with mission work, would outrun the limits of this article.

Three movements, however, have been so prominent and so extended as to call for special attention: 1. Work for women; 2. Work for young people by young people; 3. Work independent of the regular organizations, based upon a belief or feeling that there was too much of machinery in them.

1. Women's Work for Women: The first distinctively woman's society was formed in 1825, in England, for promoting education in the West Indies. Nine years later, in response to an earnest appeal by the Rev. David Abeel, an American missionary in China, the Society for Promoting Female Education in the East was established. The next step was the organization of societies in connection with those already representing the different churches, and there are also independent societies, either for specific departments of work, or for denominations, but affiliated, rather than organically connected, with the various general church societies. In the United States women were directly interested in the
work of the Boards, and it was not until 1861 that the Woman's Union Missionary Society was organized, representing six denominations. In 1868 the Congregational Woman’s Board connected with the ABCFM was formed, and since then the several denominations have, the on a much larger scale, combined their efforts in the work of foreign missions of which the Woman’s Board is a part. In 1880, the World’s Sunday School Convention was also organized, and has since that time been of the utmost importance in the work of foreign missions. The different denominations have entered the field of foreign work in an ever-increasing manner, and the result has been a great extension of the work of the Board.

3. Faith Missions: The first faith missions were established in the United States by the Young Men’s Christian Association (YMCA) in 1852. The YMCA was organized to provide a place for young men to study and work together. The first YMCA was established in New York City in 1852. The organization quickly spread to other cities in the United States and eventually to other countries around the world. The YMCA has always been a leader in the field of faith missions, and its work has helped to spread the message of Christianity to millions of people around the world.

4. The New Era: The new era in the history of faith missions began in the late 19th century with the establishment of the American Board of Commissioners for Foreign Missions (ABCFM) in 1810. The ABCFM was the first national denomination to have a foreign mission board. The board had the task of organizing and supporting foreign missions for the different denominations. The ABCFM was successful in its work, and by 1850, it had established missions in more than 100 countries. The ABCFM played a key role in the development of foreign missions and set the stage for the expansion of missionary work in the 20th century.

5. Conclusion: The history of faith missions is a story of growth and expansion. From the earliest days of the church, faith missions have been an important part of the work of the church. The history of faith missions is a story of faith and commitment, and it is a story of the power of God to change lives and communities around the world.
Important as are these indirect results, they are far less significant than those manifest in the life of the Christian. Of those, perhaps, the most prominent is the organization of mission work. (See also articles on Finances, on Study classes, etc.) There is to-day no more thoroughly organized enterprise in the world than the work of foreign missions, and not a year passes but some detail is perfected in the effort to bring not merely every church, but every member, and even every attendant, into touch with the work that links America and Europe to every part of the world.

To some, these boards, committees, officers, branches, and cradle rolls, periodicals, study classes, hampers the system, and makes poor pathy giving, cent-a-day mit societies, and so on, savor of too much machinery, yet not a single factor but has come into existence because of some evident need. It was a comparatively simple matter for the Baptist ministers to hand over to William Carey their £13 2s. 6d. It is a very different thing to gather from thousands of churches and hundreds of thousands of individual givers millions of dollars, and to send them in all sorts of currencies by every conceivable means to the farthest corner of the world, and to have record of the use made of every cent. Yet this is but one of the many departments of the home organization.

Turning to other departments of church life, it is noticeable that everywhere the work at home shows growth in proportion to the work abroad. Home missions, in their various phases, are the result of foreign missions. This is, of course, a general statement, to which exception may be taken in details, but it remains unquestionably true that the foreign missionary work of the Church has lead the way, and marked for pathy for its activities in very nearly every direction.

Other results are manifest in the number of books, not to speak of periodicals, leaflets, etc., published each year, that have a direct relation to missions, either descriptive of them, or suggested by them, all of which indicate what a hold missions have upon the public interest. The early trac societies were organized to supply, through benevolence, those books which the ordinary publisher could not afford to print. To-day the most enterprising publishers are glad to get good trac societies; and, whereas, they are on various questions of international importance. Through this and through travel, largely under the lead of missions, the Church has come into a sane and wholesome relation and sympathy with the people it seeks to reach with the Gospel.

The word "heathen" is fast following the word "barbarian" into oblivion, not because the sin and evils of heathenism are any less real, but because the individual heathen is coming to be looked upon as a man and not as little more than a beast. (See also the "International Service of Missions.

Even more marked, however, have been the results of the foreign mission enterprise upon the character and life of the Church at home. The individual Christian has been inspired and lifted into a higher spiritual life by the influence of those who have been as their representatives to the foreign field. Brainerd, Carey, Judson, Livingstone, Moffat, Selwyn, Paton, Goodall, Hannington, among the pioneers, and even in recent years, the noble army of martyrs in China have been a power for individual consecration. The development of such leaders as Henry
Venn, Rufus Anderson, and others, has been no small service to the cause of Christian work. To foreign missions, too, is very largely due expeditions in the cause of Christ. It is not merely that they practically originated organized systematic giving for work outside the bounds of the local community, but they still lead the way in broadened sympathies that seek to mitigate the horrors of famine and pestilence in other lands.

The one line of growth, however, which is more distinctly the result of foreign missions than any other in this field, is that which abates the rigors of rivalry between different branches of the Church, promoting harmonious and cooperative action. Differing in effort in organization and government, and even differences in creed, inevitably diminish in importance in the foreign field before the tremendous problem of making men feel the need of Christ and learn the beauty of truth, purity, and love. For close contact with sinners, unselfish workers breeds mutual respect and fellowship, and walls of partition cannot remain barriers when mutual helpfulness has opened breaches in them. Not that missionaries have been or are disloyal to their own, but they recognize the essentials of unity in Christ. (See Cooperation.)

In fact, wherever we look in the life and activity of the Church, we find the work of foreign missions in its various departments always identified with progress and growth, until the whole Church is becoming what the Methodist Church has been described as a new creation organization for Christian missions, using the term in its broadest sense, to denote the whole enterprise of building up the kingdom of God at home and abroad.

Abroad: The most common representation of the results of missions effort in foreign lands is in the form of tables of statistics. These statistics are found in detail in reports of societies, and an abstract of their essentials will be found in the appendix to this work. Their most important meaning, however, is not always visible to a casual reader.

As at home, so abroad, mission work is thoroughly organized. The mission organization is not a mere aggregation of missionaries and converts—it is a mechanism, sufficiently closely reticulated to give it efficiency, and yet so elastic as to give it an unlimited power of adaptation. Just this mechanism is now seen a most important result of years of labor. The native church is becoming less a mere company of converts, led by the missionary; more a responsible agency for aggressive work and a center for an independent community, a national life which shall be Christian. (See Church on the Mission Field.)

Another result is that with this broader conception of the purpose and function of missions has come in foreign lands, as at home, the adoption of varying methods, with this significant difference: that whereas in Christian lands very much of the general training for citizenship is secular, in mission fields it is, for the most part, distinctly Christian. The schools, industrial enterprises, hospitals, asylums, etc., are not merely for the purpose of mental and physical development, but do all these as assisting men toward Christian life, and forwarding the establishment of the kingdom of God. These different departments of labor are described in detail in other articles, Medical Missions, Education, Literature in the mission field, work for the Blind, for Lepers, and Relief Work in times of calamity. It is significant of the far-reaching and statesmanlike views of the pioneers of missions that even the most modern evangelistic work in the foreign field escaped their notice or failed of their approval. The various phases of work have simply been improved and developed into their proper relations to the general science of missions. They are not too vigorously viewed apart, but on the parts of the whole: the wheels, cogs, arms, pulleys, bands of a vast mechanism, which is a result of missions, and which is increasing in power and effectiveness every year.

The efficiency of these various departments of missionary work becomes apparent to the most casual observer on observing any of their lines of influence upon the peoples outside of the Christian community in the mission field. It is not too much to say that the existing educational movement in China, Africa, the Pacific islands, Turkey, India and Japan was initiated and is fostered by Christian missions. The establishment of mission schools has been in some cases the first glimmer gained by the people of such a thing as culture and growth. In other cases where education was known in theory but neglected in practice, the establishment of mission schools has compelled the non-Protestant communities to establish schools of their own rather than let their children be taught by strangers. Even where, as in India, Japan and elsewhere, governments have placed education on a secular basis, the original impulse, and not a little of the subsequent direction, has been provided by missionaries. It is impossible to measure the results in this direction of the labors of Verbeck of Japan, Miller of India, Hamlin of Turkey, or Stewart of South Africa. It is another inestimable result of missions that to-day scarcely a people in the wide world has not either in its own vernacular or in some kindred dialect a portion, at least, of the Bible. The Bible has led the way for other Christian literature, and books, papers and leaflets have been scattered broadly where Christian teachers could not go. To do such a work, missionaries have reduced to written and grammatical form the illiterate tongues, and have mastered the languages whose literatures have classical antiquity. If it is true that mission schools have trained the leaders, it is no less true that mission literature has helped to train those whom they have led, and without whom their leadership would have been vain. (See Intellectual Uplift.)

As in education, so in intellectual life outside of the schools. Islam, Buddhism, Hinduism have been stirred to their depths and compelled to meet treatise with treatise. The intellectual seething of modern times in Asia is to be traced directly to the influence of Christian missions.

Another result of missions is their general influence for genuine spiritual life in the surrounding communities. Church rolls and community lists do not include all those who are truly Christians. Especially is this true in lands like the Levant, South America, Mexico and Spain. The original purpose there was not so much to organize a Protestants, but to give new life to the Oriental and Roman Catholic Churches to a more spiritual life. This first plan proved impracticable, owing chiefly to the hierarchies, who resisted the growth of individual and independent thought. But in all these lands, and in each
church, there has been, in consequence of the missions, a growth in spiritual life which gives good hope for the future. In the Oriental church, men in the priesthood, accept the preaching of much genuine Christian preaching, teaching and living. The same thing is true, in some degree, in countries where Protestant missions have been established among Roman Catholics. Not merely do many laymen of the Roman Church, but many in the priesthood, accept the preaching of evangelical teaching, and are grateful for the influence it has exerted for a higher spiritual life; but they remain in their own communion, that they may use their best endeavors to spread the same truth there. The same thing is undoubtedly true, tho in a lesser degree, in non-Christian communities. There are not a few Muslims, Hindus, Buddhists and others who at heart accept the Christian faith and seek to live its life, but for one reason or another do not make public profession. It is not well to judge such too harshly, for lacking in courage. It is difficult of us to realize what it means, not merely to themselves, but to those they love and who are dependent upon them, to break openly with a faith inherited from ancestors extending back to the earliest periods of history.

The intellectually convinced men in the ranks of Hinduism and Mohammedanism recalls to mind the vast numbers of others who have partly adopted Christian ideas. In Hinduism the Brahmo Samaj, the Arya Samaj and other groups who are trying to adapt Christian ideas to their conceptions of what their own religion ought to teach, or who have adopted the doctrine of one only God and are seeking to make their ancient religious writings support the teachings of monothelism, point to another result of missions. In Mohammedanism the doctrines of the Babis and of the liberal Muslim party in India, which proposes to modify Mohammedan worship, ritual, fasts, etc., so as to “agree with the requirements of modern civilization,” point to the same result. The long years of missionary effort have brought us at last to some of the intellectual phase of Christian teaching which preceded the downfall of heathenism in the Roman Empire. There the heathen philosophers tried to adapt doctrines which they learned from Christians to their own use, claiming that their own religion had always taught love and purity and spiritual life. They did not know that thus they destroyed their own religion. The crowning result of the teaching of the Gospel must ever be the undermining of the ancient and pagan beliefs. This crowning result of Christian missions is beginning to appear in India, and, perhaps, in some parts of China.

To pursue inquiry into the results of missions through the social, industrial and political life of the world would unmanageably lengthen this article. The elevation of woman, the suppression of cannibalism, human sacrifice and cruelty, like the sutee of India; the loosening of the chains of caste; the breaking of the bands of ecclesiasticism, and the opening up of new opportunities through the light that is newly dawning in Asia, Africa, and the Pacific Islands, are changes in which missions have had an important part. The work of the late Doctor Van der Kemp in Africa, and that first company in the South Seas. Other influences have had their share; missionaries have not held a monopoly in the general uplift of peoples long submerged that characterizes the opening of the 20th century. It is, however, unquestionable that in most cases missions furnished the initial impulse, and they have always been in the forefront of every advance.

Denino (J. S.), Christian Missions and Social Progress, Vols. I. and II. (Vol. III. in preparation), New York, 1897, 1899; (as the Missionary of Foreign Missions, New York, 1902; Beach (H. P.), Geography and Atlas of Foreign Missions, New York, 1903; Warneck (G.), History of Protestant Missions, translated by G. Webster, from 7th German edition, Edinburgh and New York, 1901.

MODIMOLLE: Native name of the point at which the Berlin Missionary Society established its station of Waterberg, in Transvaal, South Africa.

MODJO-WARNO: A town in the island of Java, Malaysia, situated about 25 miles S. W. of Surabaya. Station of the Netherlands Mission Society (1848), with (1903) 5 missionaries, 3 of them with their wives; 15 native workers, 10 outstations, 10 day schools, 1 industrial school, 1 hospital, 1 medical class and 1,411 promised Christians.

MOENA SIPONGI: A village in Sumatra, Dutch East Indies, situated in the mountains, 115 miles N. by W. of Padang. Station of the Netherlands Mennonite Mission Society (1891), with (1903) 1 missionary and his wife, 2 native workers, 1 place of worship, 1 day school and 30 promised Christians.

MOFFAT, Robert: Born at Ormiston, East Lothian, Scotland, December 21, 1795, of humble parentage. Died at Leigh, near Turbridge Wells, August 9, 1883. His mother had carefully trained him in the Bible, and told him much of the early Moravian Brethren. Having resolved to be a missionary, he offered himself at the age of nineteen to the LMS, was accepted, and after spending some time in special study, sailed from England for South Africa October 31, 1816, and arrived at Cape Town in 1817. His request to proceed inland being refused by the governor of Natal, he remained several months at the Cape, studying in the meantime the Dutch language, then much in use among Europeans in South Africa. At length Moffat was allowed to set out forNamaqualand, in the Orange River country, and especially for the district controlled by Afrikaner, a chief who had been outlawed for barbarousness, so that his name was a terror to all the region. But he had become a convert to Christianity. The farmers did not believe the reported conversion, and predicted Moffat’s destruction. After incredible perils and difficulties he reached a mission station called Warm Baths, where the native Christian teacher and the people insisted on his remaining. But a party of Afrikaner’s men appeared and carried him on to the kraal of Afrikaner, beyond the Orange River. He arrived January 26, 1818, and was cordially received by the chief, who ordered some women to build a house for the missionary. In this hut he remained six months, maintaining regular day schools and preaching services; exposed to the sun, rain, dogs, snakes and cattle; doing his own sewing and cooking; often having nothing to cook and dissolving himself with his violin and the Scotch Psalm Book. Afrikaner was a regular attendant, and proved himself to be a true Christian, very docile, a firm friend and efficient helper of the mission. In 1819 Moffat visited the Cape for the double purpose of getting supplies and introducing Afrikaner to the governor. The governor
received Africaner with great kindness, and expressed his pleasure at seeing one who had been the scourge of the border colonists." He was also much struck with this result of missionary enterprise. The colonists, too, were much astonished at Africaner's mild demeanor and his knowledge of the Scriptures. In 1821 Moffat, having married, commenced a mission at Kuruman, where for many years he labored, preaching, teaching, without seeing the people converted. In 1829 he visited the Matabele tribes living south of the Zambesi. About 1830 he completed a translation of Luke, and printed it at Cape Town, himself learning the printer's art and taking back with him to Kuruman a press and its equipment. After this the mission greatly prospered. He made frequent excursions into the interior to visit other tribes, where, amid great perils and strange adventures, he made known the Gospel, and prepared the way for other laborers. By 1838 the entire New Testament was translated, and in 1857 he completed singlehanded the translation of the whole Bible into Bichuana, which was printed at his press in Kuruman. The first church was formed in 1839, at Kuruman. In 1870, enfeebled by age, peace, Mr. Moffat returned to England. Mrs. Moffat, who for more than a half century had been a sharer of his labors and trials, died in 1871. In 1872 Moffat received from the University of Edinburgh the degree of doctor of divinity, and a testimonial of about £2,500. When he entered upon his work Moffat found the people murderous savages. When he died he left them with a written language of their own and able to appreciate and cultivate the habits of civilized life. It was his genial humor, his heroic faith and his strong will that enabled Moffat to overcome a press and every difficulty.

MOGADORE: A town and seaport on the W. coast of Morocco, situated 125 miles W. by S. of Morocco City (Marakesh), on a fertile promontory surrounded by sandhills. It is in three sections, like most Moroccan towns, each enclosed by walls, one being the city proper, another the fortified official residence quarter, and the third the Jews' quarter. It was founded in 1750 and has eight mosques and a large market. Population, 19,000, of whom 8,000 are Jews and 10,000 Muslims. Station of the London Society for Promoting Christianity among the Jews (1875), with (1901) 2 missionaries, one with his wife, and 1 native worker. Station of the Southern Morocco Mission Society (1889), with (1901) 1 missionary and his wife, 1 woman missionary and 1 dispensary.

MOHALLES HOEK: A settlement in Basuto-land, S. Africa, situated in Kornet Spruit district, not far from the Orange River. Station of the SPG, with 1 missionary and 300 professed Christians.

MOHAMMEDANISM: I. The Problem: Islam is the greatest organized opponent of Christianity. Geographically it has an unbroken field from the Philippine Islands on the east to the Sierra Leone on the Atlantic, and from the snows of Siberia to the equator. It has been successful with every race type—Semitic, Aryan, Turanian. It has won to its banners polytheists, pantheists, Jews and Christians. It has steadily grown in war and peace for over a thousand years, and to-day controls the religious life of two hundred million human beings. It has a common religious language (Arabic), which is rich and expressive, and which is the medium of a literature of wide range and enduring power. It is the language of commerce throughout two-thirds of the continent of Africa, and is preparing for the way for the extension of a Muslim civilization. There is a simplicity of practise in Islam which easily adapts itself to its environment wherever it has gone. Altogether Mohammedanism has always tended toward despotism, there is running through it all a democratic spirit which recognizes the brotherhood of man, and which places all believers on a common level. Its doctrinal code is lofty and pure as contrasted with all extra-Biblical religions, being based on the Biblical standards. The ethical theory, too, is often put into practise with quite as much success as is found in many degraded forms of Judaism and Christianity. It develops strong individuality, and yet binds the faithful together as few religions have been able to do as effectively. In the earliest days Islam was a political as well as a religious unit. As a type of the ancient life which followed those of the ancient conquerors, Islam was a success for centuries; but under the new conditions, when nations are being more and more fashioned on the industrial principle, it can never succeed politically. Muslim powers are steadily weakening as civilization advances. In the endeavor to imitate the vitality of the progressing nations, Muslim rulers invariably impoverish their lands to the last degree and make industrial progress impossible. Muslims flourish best under Christian rule or under a controlling Christian influence. Syria under the Sultan is growing poorer every day, while Egypt under English guidance is growing richer.

But while the political power of Islam is weakening, and as far as civilization is concerned may be counted as dead, the last few years have witnessed a great religious revival in the Muslim world, especially in Turkey, India and Africa. Steamship lines make Mecca more accessible, and religious zeal, fanned to a white heat at the pilgrim festivals, is winning adherents to the party that cries out for union in Islam. Loss of some of their power of conversion into an engine for the spread of the unity of religious life to the Mohammedan world, the like of which has not been witnessed since the Ommeiades from Damascus ruled an unbroken territory from the Indus to the Atlantic. Islam is throwing itself with all its combined forces upon the inferior races of Asia, Australasia and Africa, and is winning them to its faith. It is its last opportunity.

Mohammed, by accepting Jesus as the promised Messiah of the Old Testament, seems to have allied himself with Christianity rather than with Judaism. He professed to give all credit to the Old and New Testament Scriptures, and his rejection of the crude tri-theistic Christianity about him merely indicates the natural vitality of his religious instinct. Nevertheless, he was chiefly moved by Judaistic influences, and a vigorous religious revitalization is now in full play "return to the faith of Abraham." The minutiae of detailed ceremonial in Islam were unquestionably the result of Jewish influences. Probably the same is true of the idea of making Muslims a chosen people, and of the further idea of the
relation of conquest to conquered as the ideal relationship between God's chosen people and all other nations. The Jehovah of the Jews and the Allah of Mohammed in the last days made it reasonable that Mohammed should claim to be the successor of Jesus who failed, and to prove by his triumphs that he himself was the prophet foretold from the beginning. In short, the genius of Mohammed caused the precious and other relics at his hand and put his own image and superscription upon the mixed resultant.

In 627 A.D. Mohammed sent from Medina the following letter to Heraclius, Emperor at Constantinople. It was his first strictly foreign missionary effort:

"In the name of God the Compassionate, the Merciful. Mohammed, who is the servant of God, and is His apostle, to Heracleus, the Caesar of Rum; peace be on whoever has gone on the straight road. After this I say, verily, I call you to God's submission to God. Embrace Islam, and God will reward you twofold. If you turn away from the offer of Islam, then on you be the sins of your people. O people of the Book (submission to God). come toward a creed which is fit both for us and for you. It is this—to worship none but God, and not to associate with God. Therefore, O ye people of the Book, if ye refuse, beware! But we are Muslims, and our God is One God. [Seal]"  
Mohammed, The Apostle of God.

This letter reveals the thought in the mind of any Muslim sovereign to-day as he looks over into the Christian lands of wealth and power. It is not unlike the letter sent by the Mahdi of Khartoum to Eimin Pasha. It is a thought of peace—an offer of peace—on condition of submission to, or adoption of, Islam, but as its keynote thought is coupled with a grim suggestion to beware of Islam's sword, those who understand who have felt its edge.

Happily in this day none but the isolated fanatics of Africa are ignorant enough to imagine it expedient to indulge in such language toward Christian governments.

Mohammed's admissions respecting Jesus as the "Word of God" and in regard to the Scriptures in the hands of the Jews and Christians form the open door for the Christian apologist. Our task is to prove to these 200,000,000 vetraries of Islam that we do "worship none but God," and that we do not "associate any with God" nor "call others God." It was a misconception from the first (natural enough when we consider the phase of Christianity presented to Mohammed), and it was a misconception emphasized by a thousand years of contact with half-idolatrous Christian sects in a state of decadence. The problem before the Christian Church is to take away this misconception, to present the Gospel in its simplicity and to lead this great unitarian disaffection back to the truth. The doctrine of the Trinity is vitally involved, and the Arian controversy must be fought all over again.

Recent controversy over the usefulness and power of Islam has called attention away from the true issue. Muslims can never be won over to Christianity by a series of wholesale maludsions, nor by a weak yielding of the vital facts of a true faith. The truths contained in the Koran should be readily acknowledged, since they are derived from the Bible; but it must be understood by way of caution that truths may be so confused that the result may be a great falsehood. Good bricks may be used in putting together useless structures. Islam has happily been characterized as a broken "cistern"—so badly broken that it must be all torn down, and many new bricks added before it may hold water; but it is a cistern still. There cannot be a question but that Mohammed and his early followers looked with horror upon the heretical neighbors and kinsmen. From the first that peculiar relationship has been admitted, also, on the Christian side. Dean Stanley calls special attention to this when he says: "Springing out of the same Oriental soil and climate, if not out of the bosom of the Oriental church itself, Islam part under its influence, in part by way of reaction against it, Mohammedanism must be regarded as an eccentric heretical form of Eastern Christianity. This, in fact, was the ancient mode of regarding Mohammed. He was considered not in the light of the founder of a new religion, but rather as one of the chief heresiarchs of the church." Dollinger agrees with this, and says: "Islam must be considered at bottom a Christian heresy, the bastard offspring of a Christian father and a Jewish mother, and is indeed more closely allied to Christianity and Schism, which is reckoned a Christian sect." Ewald calls it "the last and most powerful offshoot of Gnosticism." John of Damascus, who did his work early in the 5th century, at the very seat of the Ommeid dynasty, did not consider Islam a new religion, but an offshoot of Christianity. The same was true of Samonas of Gaza, Bar-tholomew of Edessa, Peter, Abbot of Cluny, Thomas Aquinas, Savonarola, and most of the medieval writers. Radulfus de Columna, who wrote about 1300 A.D., says: "The tyranny of Heresius has provoked a revolt of the Eastern nations. They could not be reduced, because the Greeks at the same time began to disobey the Roman Pontiff, receding, like Jeroboam, from the true faith. Others among these schismatics (apparently from the idea of strengthening their political revolt) carried their heresy further, and founded Mohammedanism."

The very errors in this statement are instructive. Dante consigned Mohammed to the company of heresiarchs in the "Inferno." Turning to the early Protestant exposition, we find statements that regard Mohammedanism as a mere offshoot from the Church. The Augsburg Confession condemns as heresies Manichaeism, Valentinianism, Arianism, Eunomianism, Mohammedanism, and all similar to these. The second Helvetic Confession joins Jews, Mohammedans, and all those heresies teaching that the Son and the Spirit are not God.

Doubtless there has been a tendency to carry this idea of the identity between Islam and Christianity too far, and we are in a reactionary period just now. But without a certain sympathy and an open acknowledgment of the truth in Mohammedanism, the missionary can never hope to win Muslims. When once the principles of higher criticism are understood in the Mohammedan world, Mohammed's admissions as to the inspiration of the original Christian Scriptures will be used with effect, for we have manuscripts of the New Testament older by several centuries than the rise of Islam. His admission of the miraculous birth of Jesus, of His miraculous power, of His deathlessness, and that He will be the Judge at the last great day, will also play an important part in the controversy. Already a Muslim writer in India has seen this and has declared that Christianity cannot be overthrown until the deathlessness of Jesus is exploded.

The great difficulty is that Islam erects barriers against sympathy of feeling among its adherents.
by making belief in Mohammed a condition absolute of the brotherhood of man, for an essential quality of devotion to God, supplanting of Judaism and Christianity; justifying the most extreme views on this point by claiming divine appointment and obligation to exterminate all other religions, if need be by force, that it may be alone in the world. In its view fanaticism is an essential ingredient of its historic sense, the example of pure lives and a Christlike self-denial must at last open to the striving of the spirit these hearts of flint.

11. Pre-Islamic Arabia: Arabia, cut off from the rest of the world by deserts and seas, unoccupied by Assyrian, Babylonian, Persian, Egyptian, Greek, or Roman, was the last place to which a prophet would have looked for the rise of such a phenomenon as Islam. It was not always thus isolated, for the latest research gives evidence of a very ancient civilization, which was the connecting link between Egypt and Babylonia, the source of many valuable articles of commerce. The tribes were for the most part independent, or were loosely bound by confederacies. There was no nation of Arabs until the genius of Mohammed welded together the heterogeneous mass and gave Arabia a distinct mission, which harmonized with a latent pride and love of conquest.

In the earliest days commerce seems to have been a predominant occupation in Arabia. The caravan trade furnished occupation to a large proportion of the inhabitants. At that era commerce was almost entirely confined to the land. The influence of Rome, and the development of a merchant marine under government protection and patronage, and the disturbed condition of the Persian frontier, broke up the monopoly of the Arabs, and many tribes were permitted to hold on to the old nomad life. We have traditions of great emigrations from the more crowded south northward, which occurred before the historic period, which removals were doubtless caused by the interruption of the caravan trade.

The story of Arabia until the period of Mohammed is confused. Putting aside conjecture, which has taken great license with the mysterious peninsula, we learn of a number of kingdoms which wielded considerable power. The Himyarites in the southwest formed the most prominent political combination in Arabia.

Their king, Abd Kellâl, who reigned about 275, is said to have been converted to Christianity by a Syrian saint, and during his reign are said to have been converted to Islam. It was when the Byzantine emperor, about the middle of the 4th century sent an embassy to the Himyarites, wishing to strengthen his alliance with them and to attract them to Christianity. Two hundred Cappadocian horses of the purest breed were sent as a present, and Bishop Theophilus undertook the mission work. Churches were built at the capital, Tzafar, at Aden, and one on the Persian Gulf. Arabian historians make no mention of this mission. A little later the Himyarites began to decline, and became a sort of dependency of Abyssinia, a Christian kingdom across the Red Sea. Between 490 and 525 Dhu Nowas, in the district of Najran, took the reins of power in his hands. He was a recent convert to Judaism, and persecuted Christians bitterly in that region. They were offered Judaism or death, and twenty thousand massacred, that is to have been said. One intended victim, Tholaban, escaped to Hirs, and, holding up a half burnt copy of the Gospel, invoked, in the name of outraged Christendom, retribution. Justin I. sent a message to the Abyssinian monarch, asking him to inflict punishment on the usurper. Dhu Nowas was defeated and the Najran became an Abyssinian dependency. A zealous Christian, Abraha, had become Abyssinian viceroy somewhat later in Yemen. Bishop Gregentius was sent by the Patriarch of Alexandria to assist in pushing the interests of Christianity. A cathedral was built at Sana, and an attempt made to make it the Mecca of the peninsula. The Meccans were displeased, and killed one of the Christian missionaries. A Koreishite from Mecca defied the cathedral at Sana, whereupon Abraha set out on an expedition, about 570, to destroy the Kasba. His army was destroyed, and the episode has come down in Mohammedan story as the affair of"The Elephant." Mohammed was born a few months after. By the aid of the Persians the Abyssinians were finally expelled in 630, and Southern Arabia became entirely dependent upon that eastern rival of the Byzantine empire, until it was absorbed, in 634, by Muslim conquest.

Along the Persian frontier was another considerable political power—the kingdom of Hira. It was founded in the 2nd century of our era, and having political autonomy until the spread of Islam. It looked to Persia for help in its various wars, and tended more and more toward a dependent condition. Along the Syrian border, and more or less under Byzantine influence, was the kingdom of the Ghassanid, which early came under the influence of the Western civilization. Christianity had a strong following in this region from the first, and the whole kingdom was under Christian influence. The kingdom of the Khinds, in Central Arabia, was another political unit, not much wealthier than the kingdom of Mecca we find the powerful Koreish tribe, which had control of the Kasba, the religious center of native Arabian religion.

The religion of Pre-Islamic Arabia may be called heathen, with constant tendencies in the
nobler minds toward a conception of one supreme God. Mohammed speaks of the era before him as "the times of ignorance," which he came to do away with. At the Kaaba there were said to have been three hundred and sixty-five images of the gods or goddesses whose aid he desired or whose vengeances he wished to avert. And to these shrines and grimages, punctiliously attended to, made up a large part of religious life and worship. There was a considerable stir of literary life, and renowned poets contested at the annual fairs for preeminence. The successful poems were displayed on the walls of the Kaaba. These poems, some of which have come down to us, show the lowest grade of morals. Drunkenness, gambling, gross love intrigues, vengeance, theft, the loosest possible family ties, the degrading of woman to a mere animal existence—all these traits were common throughout Arabia, make plain the bitter inadequacy of the prevailing faith to elevate the life. Add to this the widespread tendency toward atheism and indifference.

Such a state could not last long. Serious minds turned in every direction for help. There arose an esoteric fraternity who called themselves Hanifs (penitents). They sought to go back to the simple faith of Abraham, whom they styled the first Hanif. They proclaimed themselves as seekers after truth, and adopted the life which had been set before them for centuries by Christian hermits, whose rigid vigilas had impressed the Oriental mind. Amury, these Hanifs were Obeidullah, own cousin of Mohammed; Waraqah and Othman, cousins of Khadijah, all three of whom found their way to Christianity. Said ibn Amr, an aged Hanif, was seen leaning against the Kaaba, and sadly stretching his hands upward, and praying: "O God, if I knew what form of worship is most pleasing to Thee, so would I serve Thee; but I know it not." Mohammed was touched when this was reported to him, and said: "I will pray for him; in the resurrection he, too, will have a place in the community." It may be said that these Hanifs were Jews or Christians, yet they could not have arisen without these two religions as forerunners. They anticipated the central idea contained in the word "Islam" (resignation), and their conception of God was summed up in the word "Judgment." We shall see later how Mohammed became a Hanif, and gave shape, proportion and continuity to a half faith which was floating about Mecca and Medina (Yathrib), and how he originated a church policy in closest union with a political organization, the combination of which was destined to make him the moral ruler over more human beings than have ever been controlled by any other man.

The whole question of Christianity in Arabia is very obscure. Christians fled for refuge from the Roman persecutions to the oasis of the Syrian desert in the early days of Christianity. Paul himself spent three years among Arabs, whether on the Sinaic peninsula or along the border of the desert south of Damascus. A local church council at Bosra shows a large growth of Christianity east of the Jordan before the close of the first century. There as soon as the two races were first reached, and bishops were appointed to follow the wandering tribes in their migrations. The faith penetrated the desert south and east along caravan routes, and we may be sure that by the middle of the 3d century Christianity was well known in many parts of Arabia. We shall see how the Hymys were spread through the Syrian desert in the close of the 1st century. Hira, and Kufa, along the Syrian frontier, about the same time, learned of Christianity through Nestorian missionaries. A king of Hira was converted in the 6th century. Other tribes, such as the Beni Taghib of Mesopotamia, the Beni Haris of Nayarim, the Beni Ghanim, who may have been the group Medina (Yathrib), became nominally Christian. Ali Saad sneeringly said: "The Beni Taghib are not Christians; they have borrowed from Christianity only the custom of drinking wine." In the first wars between the Persians and the rising Muslim power they were into the territory of the Christian tribes of the north-eastern frontier joined the Persians. But in spite of this spread of Christian knowledge throughout the peninsula, it did not seem to take any vital hold. It was swept away at the first onset of Islam. The nomad life in the desert was not receptive to Christianity. The haughty nature of the Arabs could with difficulty accept the humble and forgiving spirit of the Gospel. The Abyssinians, altho making a powerful Christian kingdom, were of negro blood, and hence unchristianized. In fine, says Muir in summarizing this subject, "By and by the religious aspect of the surface of Arabia had been now and then gently ruffled by the feebler efforts of Christianity; the sterner influence of Judaism had been occasionally visible in a deeper and more troubled current; but the tide of indigenous idolatry and of Islamite superstition, setting from every quarter with an unbroken and unebbing surge toward the Kaaba, gave ample evidence that the faith and worship of Mecca held the Arab mind in a thraldom rigorous and undisputed. Yet, even amongst a people thus enthralled, there existed elements which a master mind, seeking the regeneration of Arabia, might work upon. Christianity was well known; living examples of it were amongst the native tribes; the New Testament was respected, if not revered, as a book that classed itself as divine. In most quarters it was easily accessible, and some of its facts and doctrines were admitted without dispute. The tenets of Judaism were even more notorious, and its legends, if not its sacred writings, were familiar throughout the peninsula. The worship of Mecca was founded upon a ritualistic system believed to be coeval with the Arabian common stock from which both to Christianity and Judaism. Here, then, was a ground on which the spiritual fulcrum might
Jews had made their homes in the Arabian peninsula in the earliest times. From the days of Solomon the Red Sea was the avenue of a thrifty commerce, and Hebrews had probably located at the trading ports. Later the conquests of Byzantines, Persians and Egyptians, Greeks and Romans had sent waves of Jewish immigration into the desert. The fall of Jerusalem and the rebellion of Bar Cochba had driven thousands of Jews in the footsteps of their brethren. A number of native Arab tribes embraced Judaism, and in the time of Mohammed we find this people scattered all over the peninsula, in small, compact colonies. There were a large number of colonies near Medina, and from their teachers Mohammed drew much of the material found in the Koran. At first he hoped to win them to Islam, and contemplated making Jerusalem the Kibla. Their obstinacy changed his temper, and in the conflicts that ensued thousands of Jews were butchered, and most of the others submitted to Islam. Communities of Jews are still to be found in Southern Arabia who have clung to their faith all these centuries.

III. The Life of Mohammed: Into this world of conflicting dogmas Mohammed was born in the year 570, at Mecca. This city, situated on the caravan route between Yemen and Syria, had for centuries been famous for the Kaaba, which contained the sacred Black Stone and formed the religious center of the Arabian peninsula. The leading tribe had for years been the Koreish, and Mohammed sprung from the Beni Hashim, a noble tho somewhat waning branch of this tribe. His father's name was Abdallah. Returning from a mercantile trip to Syria, Abdallah was taken sick at Medina, and died some months before the birth of Mohammed. His mother, Amina, according to the prevailing custom, put the infant out to nurse with Halima, a woman of the Beni S'do, one of the Bedawin tribes, where he remained for four or five years. In that year the manners and the pure tongue of the nomads. His Bedawin nurse was more than once alarmed by epileptic symptoms in her charge, and at the age of about five years he was given back to the keeping of Amina. The following year, while traveling toward Medina with her boy, Amina died, and the orphaned Mohammed was taken up by his uncle, Abu Talib, who became his faithful guardian. At the age of twelve years Mohammed accompanied his uncle on a mercantile trip to Syria, when he first came in contact with the rites and symbols of Oriental Christianity. At a youth he lived for the most part quietly, keeping the flocks of Abu Talib, and at the age of twenty-five, his uncle being poor, he entered the service of a rich widow named Khadija. He was sent by her on a mission to Byzantium, and subsequent to this event the caravan, Khadija was delighted with her agent's service, and the almost double his age, soon became his wife. She bore him four daughters and two sons. Both sons died. The youngest daughter, Fatima, married Ali, and thus became the ancestress of all the Muslim nobility.

When approaching his fortieth year Mohammed began to retire from his family for the purpose of meditation. The gross idolatry of Arabia oppressed his mind. He was aroused but not satisfied by his slight knowledge of Judaism and Christianity. For days at a time he would continue in a lonely cave on Mount Hira. Restating his works on his revelations, and he finally came to believe himself called to be the reformer of his people. After a period of silence known as the jahra, these revelations continued with more or less frequency till the end of his life.

Khadija was his first convert. The first three years of his preaching resulted in the conversion of some forty of his relatives and friends, among whom were Ali, Zeid, Abu Bekr, and Othman. His teaching against idolatry developed fierce opposition, in which Mohammed was safe under the protection of Abu Talib, but others suffered persecution, and in 615 eleven men fled to Abyssinia. In 620 Abu Talib and Khadija died. Mohammed afterward married other wives, none of whom survived him. Proceeding to Taif, he was unsuccessful in his appeal to the people there, but returned strengthened by a dream of a journey to heaven. In 621 his cause was greatly advanced by the addition of twelve pilgrims from Medina, and the following year the band was increased to seventy, who were pledged to receive and defend the prophet in Medina. His brightest hopes now centered about the northern city. Abandoning Mecca, he and 150 followers in little bands fled to Medina. This date marks the era of the Hegira (migration), 622.

At Medina Mohammed built a mosque, instituted rites of worship, and declared war against unbelievers. The Jews rejecting his claims he became their bitter foe. In 623 the battle of Bedr resulted in a signal victory for the Muslims over the Meccans. A year later he was defeated by the Koreish at Ohod, and Medina was unsuccessfully besieged by 4,000 Meccans. About this time Mohammed, with 1,500 followers, made a pilgrimage to Mecca, but was refused admittance. A truce was signed at Hodeibia, near the city, suspending hostilities for ten years, and granting permission for a pilgrimage the following year. Discontent was allayed among the Muslim converts by an expedition against the Jews of Khiber, yielding rich booty.

His plans now widened, and the same year he sent written demands to the Persian king, Chosroes II., Emperor Heraclius, the Governor of Egypt, the Abyssinian king, and several Arab tribes.

Chosroes tore up the letter and Muta killed the envoy. To revenge this insult Mohammed fought what proved to be a losing battle at Muta, on the Syrian border, where his friend Zeid was killed.

A breach of the truce at this time by the Koreish gave grounds for attack, and Mohammed at the head of 10,000 men entered Mecca in triumph in 630.

In the course of that year Taif submitted, and this ended opposition in the peninsula. In 632 Mohammed with his wives and 40,000 adherents performed the "Farewell Pilgrimage" to Mecca. The rites of pilgrimage are still scrupulously followed. Three months later Mohammed fell sick and died in the house of his favorite wife,
Ayesha, after having liberated his slaves and distributed alms to the poor. He was buried in the room where he died, which is now included within the Great Mosque.

The person of Mohammed was attractive. The little above the ordinary height, his presence was startlingly by some not beautiful. But the expression was always pensive and contemplative. His eyes and hair were black, and a beard reached to his breast. His gait was quick, and is said to have resembled a man descending a hill.

As to his character, up to the end of his life in Mecca he was not guilty of any moral or religious fault, and his conduct seems beyond reproach. He believed himself to be the divinely appointed messenger for the overturning of idolatry, and he suffered for years the taunts of a nation with apparently no ulterior motive but the reformation of his people. Secular history can furnish no more striking example of moral courage than that of Mohammed bearing patiently the scorn and insults of the Koreish. From the beginning of life in Medina temporal power and the acquisition of wealth and glory mingled with the Prophet's motives. Cruelty, greed, and gross licentiousness were justified by the name of "revelations." His conduct during the last ten years of his life seems to bear out this estimate of his character, "that he was delivered over to the judicial blindness of a self-deceived heart."

IV. The Koran: Like Christianity, Islam centers about a book. This book is the Koran ("reading" or "that which is to be read"). The Koran is the foundation of Islam. The orthodox believe that the original text exists from all eternity, or at least was the earliest creation and is inscribed in the highest heaven and is "well-guarded Tablet." By a process of "sending down," one piece after another was communicated to the Prophet, who in turn proclaimed them to his immediate circle of followers, and so to the world. The angel charged with conveying these portions is generally called "Gabriel," who dictated the words directly to Mohammed. This being the origin and nature of the Koran, all Muslims hold to its absolute verbal inspiration, and regard it as the rule of faith and practice, from which there can be no appeal.

The name given to the Muslim world in is Arabic, a volume slightly smaller than the New Testament. It is divided into 114 chapters or suras, of very unequal length. This collection constitutes the Revelation proclaimed by Mohammed as received during the last twenty-three years of his life. The suras are not spoken of by number, but by a title peculiar to each, derived from its contents or some special quality. The heading of each sura, indicating whether it was revealed at Mecca or Medina, is the work of commentators, and forms no part of the inspired text. Every sura is in turn divided into verses, these subdivisions are not numbered in manuscript copies.

The 114 chapters are arranged seemingly in a most artless manner, without regard to chronology or doctrine, the only order discernible being that the longest are placed first, with the notable exception of Sura I., called the Fatiha. So far as is known, Mohammed himself never wrote anything down, and if he was acquainted with the arts of reading and writing (which some have disputed), it seems that he found it more convenient to employ an amanuensis whenever he had anything to commit to writing. At the time of his death the revelations existed only in scattered fragments, on bits of stone, leather and flat bones. The great repository of truth was in the minds of his followers. With the marvelous tenacity of the Arab memory, large numbers of Muslims at the time of their Prophet's death could repeat the principal suras, and soon after some are mentioned who could recite them without an error. With Mohammed's death the canon was closed, but up to this time no attempt had been made to systematically arrange or even to collect the contents. In the second year after the event a vast number of the best reciters of the Koran were slain at the battle of Yamman, and Omar became convinced that the divine revelation ought to be put on a less precarious footing. The attention of Abu Bekr being called to the matter, he speedily appointed Zeid, the chief amanuensis of the Prophet, to make to collect and arrange the Koran.

Zeid worked diligently, and brought together the fragments of the Koran from every quarter, gathering them from palm-leaves, stone tablets, the bones of sheep and camels, from bits of leather, "but most of all from the breasts of men." The tablets of the Koran were burnt at that time the reliable source of much of the revelation. The manuscript thus formed remained during the caliphate of Omar the standard text.

As transcripts of this original were made variety crept in, and in the caliphate of Othman, some time a little later than 33 A.H., Zeid was appointed to make a recension of his former text. With a committee of three Koreish to act as final judges in disputed cases, the new collection was made in the pure Mecca dialect, which Mohammed himself used. The former copies were called in and burned, and the recension of Othman has remained down to the present day unaltered. All the facts warrant us in supposing that the Koran as now existing contains the very words as delivered by the Prophet. Various readings are practically unknown.

One source of the Koran's power is its sonorously musical diction. Another is the simplicity of its doctrine. The unity of God, Judgement, and Islam (that is, submission to His will) are the fundamental teachings. The whole substance of the religion is comprehended under two propositions, which are sometimes spoken of as the Mohammedan "Confession of Faith," viz.: "There is no God but God, and Mohammed is His Prophet." The former sweeps away idolatry, and the latter at once lends divine authority to every precept of Mohammed. The portion of confession pertaining to faith embraces six branches: Belief in God; in His angels; in His scriptures; in His prophets; in the resurrection and the day of judgment; in God's absolute decree, and predestination of both good and evil. In practice five things are necessary: (1) Confession of Faith, (2) Worship, (3) Alms-giving, (4) The Fast and (5) a Pilgrimage to Mecca. The last, called the Hadj.

Salvation, according to the Koran, is by free grace and is not a thing to be won by merit. But the gracious gift from God depends upon Confession of Faith. Whoever confesses belief in God and His Prophet will be finally saved from hell although his sins may be punished there. On the other hand, he who completely denies the one God, if he does not declare belief in Mohammed
emed as the Prophet of God he cannot be accepted by God. The believer is bound also to do good works, that is to say, to observe the ordinances with strict fidelity. Large portions of the Koran deal with the narratives and Christian Scriptures, showing that Mohammed had come in contact with the corrupt forms of these religions then in Arabia. The Old Testament characters, especially the Patriarchs and Prophets, and Our Lord Himself, are regarded with the greatest reverence. These were the narrative forms drawn from the Talmudic traditions, which Mohammed perhaps supposed to be the O. T. Scripture, and from the Christian apocryphal Gospels. It is often said that the Koran is the most widely-read book in existence. In one sense this is true, since the mere reading of the place, without understanding, is commonly held to exert a magical influence for good. But it should be remembered that the Koran is not understood by readers outside of Arabia (even where Arabic is vernacular), excepting in the limited circle of all Muslim adherents.

V. The Hadith, or Traditions: The Koran prescribes an ethical code which is obligatory on Muslims, since all regard it as the only revelation of the Divine will. But along with the Koran, Mohammed recorded other well-authenticated sayings of the Prophet as authoritative comments on religious, ethical and ceremonial subjects. These traditions are in fact considered as inspired sayings, handed down by men liable to error. They inform us not only what Mohammed said and did, but also what he allowed to say and do unrebuked. Mohammed was much afraid that he would be misrepresented, and commanded his adherents as follows: "Convey to other persons none of my words except those ye know of a surety. Verily he who represents my words wrongly shall be punished in the fire." How poorly this injunction was followed is evident from the fact that Abu Daud received only 4,800 traditions out of 500,000. Thus it appears why there is such a diversity of opinion among Mohammedans. Various canons of tradition have been laid down by learned Muslims by which these traditions may be sifted—such as the integrity of the persons transmitting the saying, the number of links in the chain of narrators, the style of composition, etc. The first attempts to collect these traditions were made in the 8th century. The work of Imam Malik is held in the greatest esteem. The six standard collections (out of 1,465 in all) are by (1) Mohammad Ismail al Bukhari, A.H. 256; (2) Muslim ibn'l Hajaj, A.H. 261; (3) Abu Isa Mohammad al-Tirmizi, A.H. 276; (4) Abu Da'urs as-Sajistani, A.H. 275; (5) Abu 'Abdi'r-Rahman an Nasa'i, A.H. 303; and (6) Abu 'Abdi'l lah Mohammad ibn Majah, A.H. 273.

All the Muslim sects receive the traditions aloth disapproving as to their number and their authenticity, and following a few characteristic sayings of Mohammed:

"I am no more than a man, but when I enjoin anything respecting religion, receive it, and when I order anything about the affairs of the world, then I am nothing more than a man." (Sunna) of his prophet. "Some of my injunctions abrogate others."—"My sayings do not abrogate the Word of God, but the Word of God can abrogate my sayings."

The following is a specimen of the way a tradition was handed down in the collection of at-Tirmiz:

"Abu Kuraib said to us that Ibrahim ibn Yusuif ibn Abi Ishaq said to us from his father, from Abu Ishaq, from Tultaha ibn Musarif, that he said, I have heard from Abdu'r-Rahman ibn Ausaaj that he said I have from Bara ibn 'Azib that he said I have heard that the prophet said, "Whoevergives in charity a milk-cow, or silver, or a leathern bottle of water it shall be equal to the freeing of a slave."

VI. Muslim Worship: The forms of worship have so much importance in Islam, both as a means of acquiring merit before God and as shaping the religious ideas of the Muslim, that it may be well to illustrate what this worship is. Five times every day every Mohammedan man or woman must recite the prescribed litany in Arabic in a specified manner. Each of the five services or exequiae consists of a certain number of "rounds" or repetitions of the litany; one service differing from the other in the number of "rounds" rather than in variety of the words used. The example here given is the service of morning worship, either in the congregation at mosque or alone in the house.

We confound the directions from one of the books of instruction in use among the Sunnite Mohammedans:

The morning worship consists of four rounds (rakat), two of which are obligatory and two are of usage (following the custom of Abraham). The worshipper, having performed ablution, stands facing in the direction of Mecca.

1. He must declare his purpose inaudibly, saying, I purpose to perform the first obligatory (or usage) round of morning worship.

2. He then lifts both hands, palm to the front, until the thumbs touch the lobes of the ears; then he says, "God is most great!"

3. Folding the bands across the stomach, the right hand over and clasping the left, he says, "Glory to God! Praised and blessed be Thine name, O Most High, and there is no other God but Thee! I take refuge in God from Satan the accursed!"

4. The worshipper now bows, saying "God is most great!" and placing his hands upon his knees, taking care to keep the line of the fingers and back of the hand straight and in a horizontal plane.

5. Remaining in that position he says: "Praise God the Lord, the Lord of the Monarchies three times, (if he is able to say it five or seven times the merit is greater.)

6. Saying, "May God attend unto his praise," the worshipper rests in the upright position.

7. He now drops upon his knees, sitting upon his heels, and then, saying, "God is most great!" he touches his forehead to the ground once, his hand being on each side of his head, palm downward upon the ground.

8. In this prostrate position, the worshipper says three times, "Glory to the Lord on High!"

9. Saying "God is most great!" he recovers position on his knees.

10. Saying, "God is most great!" he touches his forehead to the ground again.

11. In this prostrate position he repeats three times, "Glory to the Lord on High!"

12. Saying, "God is most great!" the worshipper now recovers position upon his knees again.

This completes one round of worship, and the worshipper rises to his feet and begins the second round, which consists of a repetition of the first.

After the four rounds are completed, and indeed at the end of every service, no matter of how many rounds the worshipper, standing, repeats, "Glory to God," thirty-three times, and, "Praise be to God," thirty-three times, and, "God is most great," thirty-three times. He
may then, if he chooses, abandon the Arabic language, and in his own tongue, as best he knows how, he may ask of God anything that his heart desires.

Whatever the service is (whether morning, noon, mid-afternoon, sunset, or evening) must be distinctly expressed at the beginning, as well as whether the round is to be obligatory or of usage. If the worshipper does not do this, his worship is defective. Whatever is prescribed for any particular posture or any particular "round" of worship must be exactly said. If Korânic, too little is said, the worship is defective. In such cases the "round" must be done over from the beginning, or a special form for the correction of defects must be gone through.

It is hardly necessary to remark that these rules of worship go for much in that severance of religion from morals which one sometimes notices in Mohammedans. The effect of fixing the litany in the Arabic language, which is not understood by a vast number of Muslims, and of having the services of worship consist of a great number of repetitions, the result is, to settle in the worshipper's mind the idea that religion is an outward form. The result of making the acceptableness of worship turn upon precision in posture and in utterance, is to turn the thought during worship upon self instead of upon God; while the doctrine that the greatness of merit is measured by the number of perfect repetitions of these sentences, gives to the worshipper who can repeat them glibly a greater self-complacency than is found among the adherents of any other religion.

VII.—Islam and the Bible: Mohammedans profess to regard the Old and New Testament Scriptures, as well as the Korân, as the revealed Word of God. Mohammed and his immediate followers seem to have considered the Korân as being in perfect harmony with the Bible. When the antagonism between the two was pointed out somewhat later, the learned Muslim doctors claimed that the current Scriptures had been corrupted since Mohammed's time. They claim that the Korân was in perfect accordance with the original Scriptures to which their prophet had access. The existence of texts of the New Testament older than Mohammed's time has seriously weakened that argument. When once Mohammedans are compelled to admit the gulf that exists between antiquity their manuscripts, they will be compelled to show reason for the discrepancies.

The Korân gives a large part of the Old Testament history in a garbled and legendary form as from hearsay. Adam, created out of earth, the "chosen one of God," was the first man. Eve, his wife, was created by God from a rib of Adam's left side. Iblees (Satan) tempted them; they fell and were cast out of Paradise. The story of Abel and Cain is embellished with rabbinical additions. Noah, the Prophet of God, was saved of God, as the account in the New Testament, which we have, declares. The Korân affirms that Jesus did not die, but ascended to heaven miraculously, and another victim was, unknowingly to the Roman soldiers, substituted for Jesus on the cross (iii. 47-50; xxviii. 144). An angel appeared to Mary Magdalen and told her it was Jesus. (xxviii. 1.)

The Korân affirms that Jesus did not die, but ascended to heaven miraculously, and another victim was, unknowingly to the Roman soldiers, substituted for Jesus on the cross (iii. 47-50). After he left the earth his disciples disputed as to whether he was a prophet, like Moses or Isaiah, or a part of the Godhead, making up the Trinity as "The Father, the Mother, and the Son." (xxviii. 1.)
come after him who should carry out his mission, and Muslim theologians affirm that Mohammed was that person. Mohammed himself calls himself “Ahmad” (Sura lx. 10). The Praised is another title used by Christ which Muslims claim had been perverted from “Paraclitos” to “Paracletes,” because the former, meaning “the Praised,” clearly designated Mohammed (“The Praised”).

Sir William Muir says: “After a careful and repeated examination of the Koran 1 have been able to discover no grounds for believing that Mohammed himself ever expressed the smallest doubt at any period of his life in regard either to the authority or the genuineness of the Old and New Testaments as extant at that time. He was profuse in his ascriptions that his system entirely corresponded with both, and that he had been foretold by former prophets; and as perverted Jews and Christians were at hand to confirm his words, and as the Bible was little known among the generality of his followers, there was reason to suppose that interpolated readings were introduced.”

VII. Mohammedan Conquests: At the time of Mohammed’s death (June 8, 632, in the 11th year of the Muslim era) the whole of the Arabian peninsula had embraced Islam, with the exception of a few southern tribes which preferred Mohammed’s son-in-law, the Ommiady Abu Bakr, to his own favorite, Ali. Of those tribes the most stubborn was the Quraish, the tribe of Mecca itself. The Ommiady son-in-law, Abu Bakr, then proceeded against the Quraish, and after a hard and bloody struggle, finally won a complete success over these implacable enemies of the new faith, and the name of Ommiady was henceforward put in the place of that of the ancient Quraish. Henceforth Abu Bakr was universally acknowledged as the new civil and religious leader of the whole of the Arabian Peninsula, and the title of Caliph was given to him, in token of the sovereignty which had been divested from the former rulers of Arabia, the pagan, and subsequently the Christian, kings of Mecca. Abu Bakr was succeeded by his son-in-law, Omar, who held the caliphate for nine years, and then by Othman, the son of his sister’s son, later called Othman ibn Affan. Othman was a Russian by birth, and yet as he afterwards proved himself a man of great ability, the latter title was conferred on him as a mark of respect by the more august of the leaders of Islam. Othman was assassinated in 656, and Ali, cousin of the Prophet, was at last raised to the caliphate. A rebellion was put down at the battle of the Camel, fought at Basra, November, 656. The murder of Othman aroused the Kureish faction. Mo‘awiya of this tribe, the Sasanian governor, did not recognize Ali as caliph, and Ali saw it was a hopeless task to admit him. The strength of Ali was in Kufa. The Syrians gained the battle of Siffin by fastening copies of the Koran to their lances (657). Disaffection arose among the caliph’s forces, and he was murdered in January, 661, becoming a martyr in the eyes of a large part of the Muslims, and occasioning that great split in the faith which has ever since divided Shi‘i (Ali’s faction) from Sunni (traditionists). Mo‘awiya was proclaimed caliph by his soldiers. Muslim Persia proclaimed Hassan, a son of Ali, as caliph; but on being defeated at battle, Hassan retired from the struggle. Hussein, another son of Ali, was not so tractable. The Syrian caliph showed great statesmanship in the management of his empire, which was expanding in every direction. Armenia, Cyprus, Cos, and Crete were conquered, and even the boundaries of the Byzantine Empire passed beyond the Oxus. In the 4th year of his reign (661), Mo‘awiya died at Damascus, which he made the capital of the Ommiady dynasty, of which he was the founder, 680, and was succeeded by his son, Yezid I. This voluptuous caliph ordered the project of Medjina to strike off the head of Hussein, a son of Ali, if he would not yield. Hussein fled toward Kufa with all his family. The Ommiady army met him in the plain of Kerbela, near Kufa, and surrounded his little company. Hussein declared himself ready to renounce all pretensions to the throne of his ancestors, and would resign himself a simple man,服 from the desire to attack his person, he and all his followers were cut to pieces. The Shi‘ites observe the 10th of Moharram as a day of public mourning. The news of this bloody ending of the son of Ali spread consternation far and wide. The Revolts were with difficulty put down. Ali, son of Hussein, wisely refused to put himself at the head of the opposition. Medina was plundered, and Mecca was in a state of siege, when news came of the death of the caliph at Damascus (November 11, 683). Mo‘awiya II., Merwan I., Abd el Melik, al Walid, and the other caliphs in the Ommiady dynasty saw Islam extend in every direction. Tarik crossed the strait, ever after called from him Jebel Tarik (Gibraltar), into Spain in 711; Roderick, the last of the Visigothic kings, lost his crown and life in the battle of Xeres; Malaga, Granada, Cordova, Seville, Toledo, Saragossa, Barcelona, and the whole Spanish peninsula, except a few mountain retreats, were rapidly conquered. In 731 Abd-Rahman crossed the Pyrenees and swept up as far as Tours, where his host was defeated by Charles Martel in 732.

In the meanwhile the Ommiady dynasty at Damascus began to decline. Ibrahim, great-grandson of Abbas, the uncle of the Prophet, of the house of Hashem, put himself at the head of a revolt, and after his death his son Abd Allah Abu-Abbas, the “Blood-shedder,” was successful. The Ommiady dynasty gave place to the Abbasides, and the newly built city of Baghdad became the capital of Islam.
The year 750 was the turning-point in Muslim history. There were still further conquests to be made in Central Asia, India, and Central Africa, but the unity of the Muslim world was broken never again. Christians were treated with great leniency by the Fatimids and Ghazis, with whom the Crusaders made peace. The fall of Jerusalem excited the Crusades, which held the attention of Europe from 1065 to 1291, and which resulted in checking the power of the Seljuk Turk, but left Syria a prey to discord. A little later the Ottoman Turk appeared, and by 1500 had established himself in the Byzantine empire. After absorbing the Seljukian domains and all the Greek territory in Asia, the Ottoman armies entered Europe in 1354; Constantinople fell a century later (1453), and the whole Balkan peninsula was under the crescent. The armies of the sultans pressed northward into Poland and westward as far as Vienna, their footing in Europe not becoming precarious until well into the 18th century.

Islam obtained a firm foothold in India as early as 1000. An attempt to conquer Sindh in the 9th century had failed, but not until the Turk adopted Mohammedanism that Islam made headway. Seventeen invasions and twenty-five years of fighting under the leadership of Mahmud of Ghazni (1001-1030) had reduced only the western portions of the Punjab. Bengal was won in 1024, but in 1300 was lost. As a result of the barbarous conquests of three centuries, there was a powerful Mohammedan rule in Northern India. The story of Islam in India is one of constant revolts, or uninterrupted invasions and steady aggrandizement. It is a large and important branch of the Mohammedan world and is treated in a separate section.

With the downfall of the Omeyyad dynasty at Damascus Arabia lost political power in the Muslim world. The Abbassides at Baghdad were non-Arab in tendency. The subtle skepticism of Persia brought a looseness and indifference in sharp contrast with the strict and fanatical Arab type. Founded in 750, this dynasty existed until 1258. For a hundred years it ran a brilliant career. Baghdad was the resort of learned men from every region. Greek letters and philosophy were cultivated. Haroun or Kaid (766-805) lived at his court an assemblage of the wisest and Wittiest minds in his empire. Arabic literature expanded under his patronage. He sent an embassy to the court of Charles the Great, and gathered information from every quarter. But the first century of Abbasside rule was followed by four centuries of decay. The Karmathian revolt in Arabia greatly weakened the central organization. Turkish mercenaries at Baghdad, called in as a body-guard of the caliph, acquired more and more power, and the last caliphs were mere puppets in their hands. Province after province was dismembered. In 1258 Hulagu, grandson of Genghis Khan, overthrew Baghdad and extinguished the Abbasside rule.

In 909 the Fatimite dynasty was founded in Egypt by Obeidallah, a supposed grandson of Ali and Fatimissi, Cairo was founded and made the capital. The story of the rule of the extravagant Sufi mysticism there is revolting in the extreme. Saladin put an end to this dynasty in 1171.

In the meantime Islam had been pushed steadily westward. Great bodies of Turks and Tatars were converted. The Seljuk Turks appeared as an independent body of marauders as early as 1055, conquered Persia and pushed south and west to the Mediterranean. They then set up a powerful kingdom in Central Asia Minor, threatening destruction to the Byzantine empire. Their abuse and murder or enslavement of Christians especially in Palestine and Jerusalem excited the Crusades, which held the attention of Europe from 1065 to 1291, and which resulted in checking the power of the Seljuk Turk, but left Syria a prey to discord. A little later the Ottoman Turk appeared, and by 1500 had established himself in the Byzantine empire. After absorbing the Seljukian domains and all the Greek territory in Asia, the Ottoman armies entered Europe in 1354; Constantinople fell a century later (1453), and the whole Balkan peninsula was under the crescent. The armies of the sultans pressed northward into Poland and westward as far as Vienna, their footing in Europe not becoming precarious until well into the 18th century.

Islam obtained a firm foothold in India as early as 1000. An attempt to conquer Sindh in the 9th century had failed, but not until the Turk adopted Mohammedanism that Islam made headway. Seventeen invasions and twenty-five years of fighting under the leadership of Mahmud of Ghazni (1001-1030) had reduced only the western portions of the Punjab. Bengal was won in 1024, but in 1300 was lost. As a result of the barbarous conquests of three centuries, there was a powerful Mohammedan rule in Northern India. The story of Islam in India is one of constant revolts, or uninterrupted invasions and steady aggrandizement. It is a large and important branch of the Mohammedan world and is treated in a separate section.

The spread of Islam in China, Australasia and Central Africa cannot here be traced in detail. Having conquered the Mediterranean coast of Africa in the year 606, Mohammedanism pushed up the Nile valley and across the Sahara. Abyssinia alone has been able to withstand the Muslim onset, and remains like an island in a sea of Islam. The native terminology of the government of the equator is Arabic. Misr (Egypt), Sahara, Sudan, Bahor el Abyad (White Nile), Bahor el Asrak (Blue Nile), Bahor el Ghasel, are specimen names. The Arabic has penetrated south beyond the Zambesi River, as is shown in "Kaff" (infidel, unbeliever). In Zanzibar and throughout Central Africa the Swahili dialect of the Arabic is the language of commerce. Islam has spread in Africa by three agencies—the sword, commerce, and the mission-
ary, but wherever it has gone the principle of action has been the same—to ruin whatever it cannot rule.

The Extent of Islam To-day: It is impossible to estimate accurately the numerical strength of the Mohammedan world. For many years it was reckoned at 100,000,000, but the latest investigation pushes it up nearly to 200,000,000.

The following table is drawn from the most recent data:

<table>

193,550,000

Let us examine more in detail the various countries. Rumania, Servia, Montenegro, and Greece have nearly rid themselves of the Turks. Those who remain are scattered about as landowners and merchants. It is said that they are moving toward Asia Minor slowly, and before long will not be an appreciable part of the population. In Bosnia, Herzegovina, and Bulgaria, over a million Muslims still remain. Turkey in Europe has two million Mohammedans, scattered from the Adrian to the Bosphorus. These are more stationary, altho there is a constant movement toward Asia, as European civilization more and more gives equal civil rights to unbelievers in the Balkan peninsula. It should be remembered, however, that by far the greater number of the Muslims of European Turkey, etc., are not Turks, but natives of the land who accepted Islam. What course they will take is by no means certain.

Mohammedanism in European Russia is largely confined to Southern and Eastern Russia—territory which for centuries has been occupied by "Tatars," etc., who are neither more nor less than Turks of near kin to the Ottomans. There are said to be 20,000 muftis, mollahs, and other teachers in European Russia. A majority of the population of the Transcaucasia district are Muslims, as might have been expected. As Russia has pushed down toward the Persian and Afghan borders she has taken in more and more tribes under Muslim Mohammedanism. Arminius Vambéry, an intelligent the not unprejudiced witness, in writing of these Muslim portions of the Russian Empire, has said:

In the cities of Central Asia, where Islam has taken much firmer root than in the Caucasus or the other parts of the Mohammedan world, there can be no probability of the old and knotty trunk of religious education being soon shaken. The whole, however, is in a state of expansion. We see in India, where, in spite of the zeal of the Christian missionaries and the millions spent in their support, the conversions to Islam become daily more frequent. We see this, too, in Russia, where statistics prove that the number of mosques has considerably increased in the course of this century, and that the heathen among the Ural-Altaic people are more easily converted by the mollah than by the pope.

Bokhara will still long continue to boast of being the brightest spot in Islam, and her colleges will not soon lose their attraction for the studious youth among the Muslims of India.

The British Empire is the greatest Mohammedan power in the world, in that it rules over more followers of the Prophet than does any other one sovereignty. The statistics for India are elaborately worked out. The figures given in the table are those for 1901. It is evident that Mohammedanism is making rapid growth. But the census does not bear out this theory. In speaking of the growth of Islam in India, Sir William Hunter says: "Islam is progressing in India neither more quickly nor more slowly than the rest of the population. If you take an average view of India and add up totals, you will find that Islam now has a great many more followers than it had ten years ago. But you will find that the whole population has increased." This statement has been confirmed by the census figures of Mohammedans in India during the decade 1891-1901 has been a little less than 9 per cent, which is also about the rate of increase of the population of India as a whole.

The extent of Islam in China must remain conjectural for many years, but it is probable that 30,000,000 of Muslims is a conservative estimate for China.

The wide spread of Mohammedanism in Malaysia is becoming more and more evident. It is spreading among the whole Malay race, and is assuming a peculiar type. It established itself, in the Malay Peninsula, in the 14th century, and crossed into Sumatra, Java, and adjacent islands in the 15th century, thus anticipating the Portuguese by only a few years. There are large numbers of Malay Muslims on the Malay Peninsula and the native states, and under the English flag. Sumatra has a population of whom 70 per cent. are strict Mohammedans. Java before 1478 was Hindu in religion. In that year Islam overthrew the chief Hindu principality of Majapahit, and the conversion of the whole island was rapid. Most of the states formed within the century. The Celebos, with a population of over 800,000, is largely Mohammedan in religion. Islam had just been introduced when the Portuguese landed in 1525. It spread in a hundred years over all the districts it now occupies. The south part is divided into many small Mohammedan states, which form a kind of Bugis confederacy. They are in alliance with the Dutch.

North of this is a smaller Mandar confederacy of states, only partly Mohammedan. There are Muslims also along the north coast of Celebes.
altho we have a Christian majority in the Minahassa peninsula. Concerning Islam in the Dutch possessions, the Rev. Dr. Schreiber of the Rhijnland Society has this to say:

"Wherever Mohammedans and heathen are in contact Islam is winning ground; sometimes slowly, sometimes more speedily. . . . Only a small portion of the whole popula- tion remain, however, Islamic, and it is a fact that the village blacks are convicting village Muslims more and more. There are some strong and unmistakable signs of the influence of Islam in the Dutch islands. Accordingly, the official statements there is a steady increase in the number of pilgrims to Mecca. . . . Those Mohammedan sects which are most hostile and aggressive tendencies make them so dangerous as more and more supplanting the Mohammedans of the religion. The Turks, especially, have been constituting the Mohammedans of Dutch India, especially of Java. Another hardly less ominous sign is the astonishment growth of Mohammedan schools. In 1882 there were in Java 10,913 of those schools, numbering 104,967 pupils; in 1885 we are told there were 16,760 schools, with not less than 225,145 pupils; thus, within three years, an increase of not less than 55 per cent. Even in the residency of Tapanaedi in Sumatra, where the whole of Mohammedanism is of comparatively recent date, we find 210 such schools and 2,479 pupils."

Turning eastward from the Dutch possessions, we find Mohammedanism constantly pushing forward. The large islands of Butu and Muna are inhabited by Muslim Malays. The coast villages of Buru, west of Ceram, are inhabited by semi-civilized Mohammedans. In Ceram we have a Mohammedan settlement. In Melo, the Ambonese, Bandar, Goram, Manowolke, Kali, Mysoal and Sunbawa there are considerable numbers of Muslims. Bali and Lombok are the only islands in the Malay Archipelago which maintain their old Hindu religion. The Sultan Archipelago, belonging to the Philippines, leads the 150 islands, inhabited by Mohammedans of the Malay race, speaking a peculiar language, which they write with the Arabic character. Taking all these facts into consideration, the figures set down in the table for Islam in Malaysia may be too small.

Turning to Africa, we find ourselves in still greater difficulty. The data for Egypt, Zan- dibar, Algeria, Tunis, and Tripoli are correct enough. For the interior we are obliged to use the guesses of officers engaged in press ing forward the interests of the various European govern- ments. The figures in the table are no more than estimates. It should be said, however, that the more the Niger region is explored the more clear does it become that we have been overestimating the number of Mohammedans among the tribes, many of whom are Mohammedan subjects, but have not even been invited to accept the Mohammedan religion. Crossing the Atlantic to South America, we find the Protestant missionaries asking for Arabic Bibles to use with Muslims who have immigrated for purposes of trade.

X. Sects in Islam: It is related that Mohammed said: "Verily it will happen to my people as it did to the children of Israel. The children of Israel were divided into seventy-two sects, and my people will be divided into seventy-three. Every one of these will go to hell except one sect." If the number was put too low for the Christian sects (probably confused with the Jews), the corresponding number is far too low for the Muslim world, and the bitterness of feeling induced by the traditional utterance of the prophet holds true generally among Muslims. The prophet himself, in the name of Allah, is the head of Islam. Sheikh Abdoul-Kadir says there are 150 sects in Islam; but there are infinite shades between them which make them practically innumerable. The two grand divisions of the Muslim world are Sunni and Shi'ites. Upon the death of Mo- hammed (A. H. 60), Yazid obtained the position of Imam or caliph without the form of election, and hence the greatness to the present day in Arabia, which is as strong to-day as ever, between the Sunni and the Shi'i Muslims; the Sunni, being close observers of the traditions as to the example of Mohammed, and the Shi'i considering many of the traditions too uncertain to be binding. The first six successors of Mohammed, the Abul Baha, Ma'mar, Ali, and Othman, are held as legitimate caliphs. The Sunni embrace by far the larger part of the Muslim world, and this article is written rather from their standpoint. They are divided into four parties or sects: (1) Hanafi, in Turkey, Central Asia, and Northern India; (2) Shafi'y, in Southern India and Egypt; (3) Malakiyy, in Morocco and North Africa, and (4) Hambaliyy, in Eastern Arabia and Eastern Africa. These four divergencies of practice, however, are not considered as forming any break in the unity of Islam, and have been discussed and agreed that the divergence is permissible.

The division between Sunni and Shi'i is of a different nature, involving a bitterness that is quite unappeasable, since the Shi'i reject the first three caliphs and exalt Ali, the nephew and son-in-law of Mohammed. They hold that the cut of the Prophet was the only legitimate caliph, and as nearly the equal of Mohammed in the sanctity of his calling. The peculiarities of the Shi'i Muslims must, however, be discussed in a separate article.

Other sects of Islam are the Dervish orders, who have so introduced into Islam everywhere foreign elements from India, Greece, and Persia under the name of Sufism (Tesawwuf or Theosophy); and the Babis of Persia, who have carried to an extreme some of the Sufi doctrines, and used them to exalt the doctrine of the Mahdi. In Arabia we find the Wahhabis, founded in 1691, by Mohammed, son of Abdu'l Wahhab. This sect went out of the Hambaliyya sect. Its founder was the Luther of Mohammedanism, calling Muslims back to the original scriptures of Islam. He proposed to do away with all, and to reject the Koran, the Mahdi. The Wahhabis call themselves "unitarians," and claim that any man who can read the Korán and sacred traditions can judge for himself in matters of doctrine. They forbid prayers to any prophet, wall, pit, or stone. The Wahhabis hold that at the end of the world Mohammed will obtain permission of God to intercede for his people. They forbid the illumination of shrines, or prayers, and ceremonies in or about them, not excepting Mohammed's shrine. Women must not visit graves, because they were introduced violently. This sect has always been fanatical. The sword was appealed to. Abdu'l Aziz, the leader after 1765, pushed his conquest to the limits of Arabia. He was assassinated in 1803. His son Sa'ud carried the victorious banner beyond the peninsula, and threatened Syria and Turkey. The country was conquered in 1803. All sorts of ornaments and pipes were burned. Tobacco was prohibited on pain of death. Sa'ud sent commands to Mohammedan sovereigns in every direction that pilgrims to Mecca must conform to these puritan regulations. Many pilgrims who went to Mecca were occasioned in Northern India. A little later, Mohammed Ali of Egypt sent a strong force into Arabia under Ibrahim Pasha. The Wahhabis were thoroughly subdued, and Mecca released from the strict rule of this Protestant
phase of Islam. The sect since that day has made little if any progress, altho its tenets have found adherents among the Dervishes of the Sudan.

In India some call Sikhism a sect of Mohammadanism. This is hardly correct, altho it is a mixture of Hindu and Mohammadan ideas, and has its chief strongholds in the Punjab. There are, however, in India several new sects of Mohamadans. One seeks to improve the religion by adapting it to modern requirements, like the Aligarh movement. In Africa the great Senoussiyyé movement is in fact a new sect in Islam. To what it may grow is not as yet clear, but it represents force, and fanaticism, and such appeal to the consciences of Mohammedans that it has swept through the Barbary states with tremendous vigor of popularity.

XI. The effect of Missions on Islam: Such being the state of the Muslim world, what success has up to this time attended the efforts of the Christian missions with Mohammedans? We must believe that God has some beneficent aim in view even when He allows Islam to arise and spread from the Pacific to the Atlantic. Could we fully understand, we should probably see some underlying scheme of Providence which is being worked out before our eyes, even tho the conversion of idolaters and fetish-worshippers to Islam seems to fill them with a perennial satisfaction in themselves which resists Christianity far more successfully than does heathendom itself. Mohammadanism has undoubtedly some elevating influence upon the heathen it wins. It develops a strong individuality, it theoretically and most frequently practically frees from drunkenness, cannibalism, and other degrading heathen practises. It elevates womanhood and the family to a certain degree. It gives a regular order of life, and has introduced letters to some extent wherever it has gone. It leaves the people stranded at its own own level, and its use of the word to bring them to that level recalls to some the method by which Christianity made its largest territorial conquests in Germany, Spain, South America, Central Africa, etc. The answer to this suggestion is that such conquests were never universally approved in the Christian Church, nor were they continued century after century, nor with the widespread and wilful devastation of territory that has been a usual accompaniment of Mohammedan conquests. We have only to look at the English government reports from the Hauza and Fulani regions in Nigeria to discover that so lately as 1902 the Mohammadan advance, in that part of Africa, loudly proclaimed as most peaceful, is accompanied by the spectacle of armies sweeping through a peaceful land to carry off herds of slaves for the uses of the Mohammadan territory, and to force the survivors into submission and tribute-paying. Because of this contrast in methods the fact is startling that, altho Christian missions have been in contact with Islam for so many years, so little real progress has been made in winning individual Mohammadans to Christ. The task has appeared so formidable, even in lands like India, under Christian control, that no great missionary society has been organized with the object of reaching them, altho we have several societies for the conversion of the Jews, who number at most eight millions as contrasted with two hundred million Muslims. The number of Mohammadans who have been won to Christ is comparatively very small. In the Sudan the Christian forces there are only; and it is a whole power to prevent Muslims from embracing Christianity. Nevertheless, some have done so and have proved their sincerity by useful and unspotted lives. A few in Africa have become Christians, but a larger number of nominal converts to Christianity have fallen away to Islam. In Persia, Mohammadanism seems to be disintegrating through internal forces. That country stands midway in the Mohammadan world. Over a hundred conflicting Muslim sects are found among the seven or eight millions of Aryan races dwelling between the Caspian Sea and the Persian Gulf. Persia is a strategic point in Islam. If it could be won to Christ, Asiatic Islam would be cut in two. The naturally speculative Persian mind is open to new influences, and a few Persian Mohammadans have become Christians. In India, converts from Islam have been more numerous, and in some cases men of great weight in the community have been converted and have become preachers of Christ, with power. But the most interesting successes have been achieved in the Dutch East Indies, where some 40,000 Muslims have become Christians, nearly half of that number in Java alone.

It should be noted, however, that in all Mohammadan lands thousands of copies of Scriptures are sold to Muslims every year, and it is rare that the sale is due to mere curiosity. Nevertheless, it is impossible to avoid the conviction that the Christian Church is dealing with Islam incidentally. The best that can be said is that up to this time it has been laying foundations, and perhaps this is all that could have been done, for the obstacles are very great.

XII. Obstacles and the means used to overcome them: (1) The Mohammedan religion contains truth that has come from God. The heart which desires to find God recognizes this truth, and clings to the error that goes with it with all the power of a faith that is hungry to be fed. (2) The Mohammadan is taught that God's decrees comprehend all things, and that he is an elect from the foundation of the world. If he can cherish the thought of fighting against such a decree of the Most High, his pride in being one of the chosen people holds him back from listening to Christians who are not given this high favor by God. (3) In European and Mohammadan land the law makes belief in Islam with fidelity to it a condition of civil rights, of liberty, and even of life. The man who turns from Islam after once having believed in it is an outlaw, dead in the eye of the law, and without a right that any one is bound to respect. (4) Access to Mohammadans is obstructed because the Koran forbids intimate relations between Mohammadans and Christians. In Muslim lands the government will prevent social relations with Christians by police interference; and in lands where the police cannot be used for this purpose those of a man's own household, as well as the whole Muslim community, will intervene to prevent the formation of any such intimate relation of friendship as would imply opportunity for quiet conversation in private. (5) The Mohammadan religion as a whole allies itself with the natural and less noble impulses of man. Its essence is an outward
form; it has a glittering theory of lofty ethical aims, and at the same time it regards God as too merciful to insist on putting these noble theories into practice. The key to Islam is that it offers no man the problem of yielding to selfish and sensual impulses and at the same time retaining the favor of God as a model of religious devotion.

As to that which has been done toward overcoming these obstacles: In the first place the Christian Society for Research on Mohammedans and the Christian and Muslim Missionary Societies have put into the sacred language of the Korâne, and into all the other languages vernacular to any considerable masses of Mohammedans. The Bible thoroughly circulated in Mohammdan regions is far more effective than an army of missionaries sent forth without the Book ready to hand. The second great agency for reaching Mohammedans with Christian truth is the long array of Christian colleges and schools of less importance, which are now scattered over the larger part of the Mohammdan world. Without considering the permanent effect of ideas implanted in the minds of the young, social, ethical, or political institutions credited for a power of polemic that is gauged by the difference of level between the science of the time of Mohammed and that of this century. Mohammdanism is hopelessly entangled with the science of the 7th century. A third greatagency for reaching Mohammedans is the establishment of Christian homes, and to some extent bodies of truly Christian people, where Mohammedans are forced to see them and to draw comparisons and conclusions. Of the whole number of Mohammedans converts to Christianity it is probable that nine-tenths have been convinced by the powerful example of some native Christian neighbor.

Without attempting to exhaust the catalog of agencies in use in reaching Mohammdans, we will mention lastly Protestantism or evangelical Christianity as the only phase of Christlikeness likely to be successful in this great work. Pictures and images used in the service of the Greek Orthodox, Roman Catholic, Coptic, Nestorian, Abyssinian, and other decayed forms of Christianity are utterly revolting to followers of Mohammed, and such movements toward Mohammedanism make headway among Mohammdans. The simple Gospel simply proclaimed must be the effective weapon.

On the whole, there is everything to urge the Western Christian Church to move forward upon this its greatest organized enemy. In the near future the battle must be squarely joined. Civilization is slowly but surely opening the way. Before long all political opposition to the propagation of Christianity in Muslim lands will be over. The followers of Christ never had a more serious undertaking on hand when looked at from the theological, social, ethical, or educational standpoint. It calls for the keenest minds and the most consecrated hearts. We must undertake the task at whatever cost.

"Deus vult."

MOHULPAHARI: A village in Bengal, India, situated in the Santal Parganas, about 135 miles N. W. of Calcutta. Station of the Indian Home Mission to the Santals, with (1901) 1 missionary and 2 native workers.

MOI-LIN: A village in China, situated 58 miles W. N. W. of Swatow. Station of the Basel Missionary Society (1889), with (1903) 2 missionaries and their wives, 17 native workers, 8 outstations, 7 day schools, and 583 professed Christians, of whom 437 are communicants. The Society spells the name Motlim.

MO-KAN-SHAN: A town in the E. part of the province of Che-kiang, China, not far from Wen-chau. Station of the CIM (1900), with 1 missionary and his wife.

MOKNEA: A village in Algeria, Africa, about 50 miles S. E. of Algiers. Station of the Committee of the Mayor Mission (1883), with 1 missionary and his wife, 1 day school, and 1 Sunday school.

MOK-PO: A town and treaty port in the S. W. part of Korea on the Krumsun River, about 8 miles from the mouth of the river. Station with (1903) 3 missionaries, two of them with their wives; 1 woman missionary, 2 native workers, 1 place of worship, 1 Sunday school, 1 day school, 1 outstation, 1 dispensary, and 33 professed Christians.

MOLETSCH: See Malitzi.

MOLOPOLOLE: A village in the N. E. of British Bechuannaland, Africa. It is the chief town of the Bara tribe and headquarters of Chief Sebele, who is a Christian. Altitude, 4,020 feet. Climate, temperate. Station of the LMS (1866), with (1903), 1 missionary and his wife, 1 woman missionary, 10 native workers, 4 Sunday schools, 3 day schools, and 800 professed Christians.

MOLOTE: A village in the Transvaal, Africa, situated 22 miles S. W. of Johannesburg. Station of the Hermannsburg Missionary Society (1898), with (1901) 1 missionary and his wife, 4 native workers, 4 outstations, 1 place of worship, 4 day schools, and 688 professed Christians.

MOLUCCA ISLANDS (also called Spice Islands): A group of islands scattered over the sea from Celebes on the east to Papua on the west, and lying S. E. of the Philippines. Area, 42,946 square miles. The number of these islands is said to be several hundreds. Many of them are small and uninhabited. The large islands are Ceram, Jilolo or Halmahera, and Buru. Nearly all are mountainous. The climate is hot, but not excessively so. The population is about 430,000 natives and 2,600 Europeans. The native population consists of two races, the Malays and the Papuans. The Malay is the common language, and the Arabic character is employed in writing it. Mohammdanism is the prevailing religion, but some few profess Christianity. The laws

MOLUCCA ISLANDS (also called Spice Islands): A group of islands scattered over the sea from Celebes on the east to Papua on the west, and lying S. E. of the Philippines. Area, 42,946 square miles. The number of these islands is said to be several hundreds. Many of them are small and uninhabited. The large islands are Ceram, Jilolo or Halmahera, and Buru. Nearly all are mountainous. The climate is hot, but not excessively so. The population is about 430,000 natives and 2,600 Europeans. The native population consists of two races, the Malays and the Papuans. The Malay is the common language, and the Arabic character is employed in writing it. Mohammdanism is the prevailing religion, but some few profess Christianity. The laws
are chiefly founded on the precepts of the Koran. The chief power is in the hands of the Dutch. Missionary work was commenced in 1859 by the Netherlands Missionary Society. The 45,000 Christians in Ceram, Ambon, Banda, and other islands are now treated as part of the established Church of Holland, and the Government appoints and supports their pastors. The Government also supports a theological school which was founded in 1835. The Utrecht Missionary Society has stations on the islands of Halmahera (Jilolo) and Buru, with about 1,700 professing Christians.

Pfieger (A.), Smaragdinseln der Sudeen, Bonn, 1901; Lith (Dr. P. A. van dut), Encyclopedie van Nederlandse Indië, Leiden, 1895.

MOMBASA: A town and seaport, and capital of British East Africa, situated on the N. side of a small island, 3 miles long and 2 miles from the mainland. The island is mentioned as early as 1391 and was visited by Vasco da Gama in 1497. It was occupied by the Portuguese in 1529. It has a considerable trade in ivory, gums, and produce. Population, 15,000. Station of the CMS (1844), with (1903) 4 missionaries, 2 of them with their wives; 5 women missionaries, 7 native workers, 1 station, 277 professed Christians, 1 place of worship, 3 day schools, dispensary, and 1 hospital.

MONASTIR: A town in Turkey in Europe, situated near the ruins of ancient Harkokia, 87 miles W. N. W. of Salonica. It is capital of the province of the same name and railway terminus. The name is derived from the Turks for a neighbor- ing monastery. In the Bulgarians call the place Bitoli and it is sometimes mentioned by English writers as Bitolia. Altitude 1,700 feet. Population, 50,000, of whom 20,000 are Muslims and 30,000 Christians of various creeds, and Jews. Station of the ABCFM (1873), with (1903) 1 missionary and his wife, 2 women missionaries, 9 native workers, 3 outstations, 3 places of worship, 3 Sunday schools, 3 day schools, 1 boarding school, and 79 professed Christians.

MONE. See Mongnai.

MONGHYR: A town in Bengal, India, situated on the S. bank of the Ganges, 34 miles W. N. W. of Bhagalpur. It has manufactures of firearms and porcelain. The Bulghars call it Yomi. Station of the BMS (1816), with (1903) 2 missionaries, 1 with his wife; 5 native workers, 1 outstation, 4 Sunday schools, 6 day schools, and 185 professed Christians, of whom 25 are communicants. Station also of the BZM (1870), with (1903) 2 women missionaries, 6 native workers, 1 Sunday school, 5 day schools.

MONGNIAI: A town in Burma, British India, situated 175 miles S. E. of Mandalay. It is the chief town of the Shan States. Station of the ABMU (1892), with (1903) 2 missionaries with their wives, 1 woman missionary, 9 native workers, 3 outstation, 3 Sunday schools, 2 day schools, 1 dispensary, 1 hospital, and 60 professed Christians. The name is also written Mone.

MONGOLS: A term given to a large branch of the human family which has been designated Turanian by ethnologists. It comprises, in its proper limitations, the tribes of Buriats, Bashkirs, and Kalmyks, and more widely, the Chinese, Indo-Chinese, Tibetans, Burmese, Siamese, Japanese, Eskimos, Samoieds, Finns, Lapps, Turks, and Magyars. In very ancient times they inhabited the Russian Empire, but they are the characteristic nomadic people. Another offshoot settled in the plains of China at a remote period. To the Greeks the Mongols were known as Scythians, to the Romans as Huns. Under Genghis Khan, in the 13th century, they overran and conquered China, Korea, and parts of Russia and Hungary in Europe. It should be noted, however, that the Turks weighed for much in this irruption of Genghiz. The Mongols proper are divided into three branches: the East Mongols, the West Mongols, and the Buriats. Of the East Mongols the Khalkas inhabit the region north of the Gobi, the Shara Mongols are found south of the Gobi along the Great Wall, and the Shairagut are found in Tungut and North Tibet. The West Mongols are found in Kokonor, Kansub, on the eastern slope of the Thianshan Mountains, and many of them under the name of Kalmucks are under the rule of Russia. The Buriats are in the Russian province of Irkutsk, around Lake Baikal.

The original Mongolians are thus described by Dr. Latham: "Face broad and flat; the cheekbones stand out laterally and the nasal bones are depressed. The eyes are usually sunken and the areola between them is great, and the carunculae are concealed. The iris is dark, the cornea yellow. The eyebrows form a low and imperfect arch, black and scanty. The complexion is tawny, the stature low. The ears are large, standing out from the head; the lips thick and fleshy, forehead low and flat, and the hair lank and thin." In the more civilized nations of Mongolia these original characteristics have been modified. In the western Turks, for example, one seeks Mongol features in vain.

MONGOLIA: The land of the Mongols is a vast part of the empire of China, lying in the interior of Asia, comprising 1,300,000 square miles of territory between latitude 37° and 54° north and longitude 85° and 125° east. On the north it is bounded by Siberia, on the east by Manchuria, on the south by China proper, and on the west by East Turkestan and Jungaria. Its population is estimated at 2,500,000, one-fifth of whom are Chinese Turfus. At an elevation of above sea-level, occupies the greater part of the region. In the center is the Desert of Gobi, where sand and stones, dust in summer and snow in winter, render habitation unbearable. The northern part is occupied by ranges of mountains forming part of the Altai chain. On its slopes rise the Selenga, the Kerlow, and Onon, which form the Amoor. In the south are rich meadow-lands, which afford food for cattle. Chinese have introduced agriculture to some extent. Mountain ranges are again found on the west. On the southeast is a strip of fertile land. On the coast is a great mountain range of Alashan, which reaches in some places the height of 15,000 feet above the sea. Along its hills pasture-land is found. The climate is in general cold, subject to sudden changes, and in summer intolerably hot. With the exception of the wall, the early representatives of the LMS, who labored in the north, the southern portion of Mongolia has been practically the only field occupied by Protestant missionaries. The ABCFM is the most prominent force on the field.

Gilmour (J.), Among the Mongols, New York, 1883. More About the Mongols, New York, 1893.
Mongolian Languages: A family of languages of a low order of development spoken by various peoples on the northwestern frontier of Asia, and deemed by many sufficiently described by the term Turanian languages. They certainly have the Turanian peculiarity of never obscuring the root, of vowel euphony, and of making words by agglutination. But on the other hand, this is so arbitrary that this test hardly applies unless the term Turanian is taken in the wide sense of non-Aryan.

The language of the people of Chinese Mongolia, of the Khalkas of the Gobi desert, of Manchuria to some extent, and of the Buruts of Siberia, and the Kalmucks of Eastern Russia, is all Mongolian in character. Recent investigations seem to point to a closer relation between the Mongol and Turkish languages than has been commonly known; but the subject is not clearly defined, and it is safer to rate the Mongolian and Turkish languages as distinct until the relation certainly existing between them has been more accurately defined. In general literature great confusion has been produced by the use of the term Mongol for any of the languages spoken by nomads in Siberia and Mongolia. There is a literary Mongol which is written with characters parallel to which the Manchu characters are the most fully developed form. These Mongolian characters are placed in perpendicular lines, under the powerful Chinese influence. But nevertheless they are a monument which has endured more than a thousand years to the Christian missionary spirit, being based on the Syriac alphabet taught by ancient Nestorian missionaries to these wanderers of northeastern Asia.

Monkullo: A settlement on the mainland N. of Massaua, Eritrea, Africa. Station of the Swedish National Evangelical Mission Society (1877), with (1900) 1 missionary, 1 native worker, 1 outstation, 1 place of worship, 1 day school, and 4 professed Christians.

Monrovia: A town, capital of Liberia, Africa, situated on the Mesurondo River near the coast. Population, 4,000. Station of the African Methodist Episcopal Mission Society. Station also of the ME (1899), with (1900) 9 missionaries, 4 of them with their wives; 1 woman missionary, 21 native workers, 12 outstations, 13 Sunday schools, 1 printing house, 1 boarding school, 1 college, and 3,357 professed Christians. Station also of the FE (1859), with (1903) 4 native workers, 2 outstations, 3 places of worship, 2 Sunday schools, 1 day school, 1 boarding school, and 178 professed Christians.

Monseme: A settlement in the Congo Free State, Africa, situated about 100 miles N. by E. of Equatorville on the Congo River. Station of the BMS (1891), with (1903) 4 missionaries, 3 of them with their wives; 12 native workers, 1 outstation, 14 professed Christians, 2 day schools and 1 dispensary. Society spells the name Monsembi.

Monsurah. See Mansura.

Montego Bay: A village in Jamaica, West Indies, situated on the N. coast, 18 miles W. of Falmouth. Station of the West Indies Wesleyan Methodist Mission Conference, with (1903) 1 missionary.

Montemorelos: A town in the State of Nueva Leon, Mexico, situated 52 miles S. E. of Monterey. Population, 10,000. Station of the American Baptist Home Missionary Society, with (1898) 1 missionary, 2 Sunday schools, 1 day school and 83 professed Christians. Station of the PS (1900), with (1903) 1 woman missionary and 1 native worker.

Monteregno: An independent principality in the W. of the Balkan Peninsula. It is bordered on the east, south, and southeast by Turkey, on the north by Herzegovina. A narrow strip of Austro-Hungary separates it from the Adriatic on the west, excepting a seacoast of 28 miles in length on the Adriatic. The entire area is estimated at 3,630 square miles, with an extreme length of 100 miles and a width of 80. The population is estimated at 236,000.

The government is a limited monarchy, according to the constitution dating from 1852. The prince holds the executive authority, and practically the will of the prince is law.

The religion of the kingdom is that of the Greek Church, under the direct influence of the prince, who appoints the bishops. Nominally, Church and State are independent, but virtually not so. The number of adherents is 222,000; the Mohammedans number 10,000, and the Roman Catholics 4,000. Elementary education is compulsory and free, the government supporting the schools. In 1901, 4,000 male and 500 female pupils attended 96 elementary schools.

The Montenegrins are Slavs of the Servian stock, and have many noble characteristics. A dialect of the Servo-Ilyrian Slavonic is the language spoken. Agriculture is the leading occupation of the people, and live-stock of all kinds are reared. There are no missionary societies at work in Montenegro.

Monterey: A town, the capital of the State of Nueva Leon, Mexico, situated 240 miles N. by N. of Zacatecas, on the San Juan River. It is surrounded by mountains and is the center of a silver mining district. It was founded in 1586. Altitude, 1,600 feet. Population, 50,000. Station of the American Baptist Home Missionary Society, with 3 women missionaries, 4 native workers, 3 outstations, 1 day school, 5 Sunday schools, and 215 professed Christians. Station also of the ME (1857), with (1900) 1 missionary, 1 woman missionary, 15 professed Christians, 1 day school. Station also of the MES (1883), with (1903) 3 missionaries and their wives, 2 native workers, 6 outstations, 1 place of worship, 8 Sunday schools, 1 day school, 1 theological class, 1 hospital, 1 dispensary.

Montevideo: A seaport and the capital of Uruguay, South America, situated on the N. side of the Plata River, 120 miles E. by S. of Buenos Aires. One of the handsomest cities in South America, built on the seaward side of the bay, with good light system, broad streets, and good parks. A large live-stock, hides, and preserved meats. It was founded in 1725. Its climate is healthy and agreeable. Population (1892), 238,000, including many Italians, Spaniards, and French. Station of the ME, with (1903) 1 missionary and his wife, 2 women missionaries, 15 native workers, 3 outstations, 912 pro-

Montgomery: A town on the N. W. part of
Tobago Island, West Indies. Station of the Moravian Society (1827), with (1900) 1 missionary and his wife, 30 native workers, 1 place of worship, 3 Sunday schools, 4 day schools, and 610 professed Christians.

MONTGOMERY, Giles Foster: Born at Walden, Vermont, U. S. A., November 8, 1835; graduated at Middlebury College (1859); License Theological College, Philadelphia, 1863; served as a missionary of the ABCFM, and reached Aintab, Turkey, December 23, 1863. He was sent to open a station at Marash. Three times he was driven away with fierce violence by the Armenians, and in 1865 he was almost killed. He was a good business man, a powerful preacher and unusually successful in influencing men. After fifteen years of labor at Marash he left it for Adana, two strong, self-supporting evangelical churches having been formed from the very men who had once sought his life in their blind outburst of furious bigotry. At Adana Mr. Montgomery's high qualities again made themselves felt in healing a breach in the church and stirring up the church members to Christian work. In 1887 a terrible famine threatened to decimate the population of Adana and the region round about. Mr. Montgomery appealed for aid to Europe and America and devoted himself to its distribution, largely by means of relief work where those able to work could earn their bread. The tremendous strain of this work in the hot summer months had a terrific effect on him, but after a period of illness he died December 4, 1888. He had literally given up his life for the people of Adana, and all sects and denominations mourned his death.

MONSERAT: One of the Leeward Islands, West Indies, 10,083 inhabitants. Mission station of the Baptist Missionary Society (England); 3 missionaries, 2 native teachers, and 67 church members.

MONYWA: A town in Burma, on the left bank of the Chindwin River, 53 miles W. by N. of Mandalay. Population, 6,300. Station of the WMS, with (1903) 1 missionary, 21 native workers, 1 place of worship, 5 Sunday schools, 6 day schools, and 37 professed Christians, of whom 25 are communicants.

MOOSE FACTORY: A post of the Hudson Bay Company, in Ontario, Canada, situated on the W. side of an estuary of the Moose River, Hudson Bay. It is the seat of the Bishopric of Moosonee. Station of the CMS (1851), with (1903) 1 missionary and his wife, 7 native workers, 3 outstations, 1 day school, and 350 professed Christians, of whom 35 are communicants.

MOOSEHIDE: A settlement in the Yukon Territory of Canada, close to Dawson City, in the Klondyke region. Station of the CMS (1897), with (1903) 1 missionary and his wife, 1 place of worship, 1 day school, and 81 professed Christians.

MORADABAD: A town in the United Provinces of India, and capital of the Moradabad District, situated 50 miles N. W. of Bareilly, on a ridge on the right bank of the Ramganga River. It has manufactures of fine metal work. Population (1901), 75,000, of whom 39,000 are Mus- lims and 31,000 are Hindus. Station of the ME, with (1903) 3 missionaries with their wives, 3 women missionaries, 294 native workers, 21 chapel, 178 Sunday schools, 105 day schools, 2 boarding schools, and 14,566 professed Christians, of whom 6,031 are communicants.

MORAV: A town in the State of Gwalior, Central India, situated on the Morar River, in an alluvial plain, 34 miles E. of Gwalior. Population (1891), 24,500, of whom 18,000 are Hindus. Station of the PN (1874), with (1903) 1 missionary and his wife and I native worker.

MORAVIAN HILL: A station of the Moravians in Cape Town, Cape Colony, South Africa, established in 1856 to watch over the spiritual welfare of native Christians attracted to the city by hope of employment.

MORAVIAN MISSIONS (Missions of The Unitas Fratrum, or the Unity of Brethren, 1732): In 1722 Augustine and Jacob Neisser and their families, descendants of John Huss, followed Christian David to Saxony, where they founded the town of Herrnlor, head-quarters of the new Moravian Church, which had offered them asylum. Other descendants of the Brethren emigrated from Bohemia and Moravia, and joined them at Herrnolt. Count Zinzendorf became the leading Bishop of the revived Moravian Church, and gradually came to devote his means as well as his time to the spread of the kingdom of Christ through the agency of the Brethren. He established on the continent of Europe, in Great Britain and in America exclusively Moravian settlements, in which the "world" was shut out, and in which was fostered the highest form of spiritual life. At the same time members of the Moravian body undertook extensive missions in heathen lands, established many schools for young people not of their communion, and began the so-called "Diaspora" Missions among members of the State churches of Europe. The exclusive system still continues in Germany in a modified form; in England, also, there are a few Moravian settlements, but the last vestige of it in America disappeared in 1856. The following year at a general synod held at Herrnhut, the constitution of the Unitas Fratrum was remodelled, the new development being completed at the General Synod of 1899. The Moravian Church now consists of four provinces, the German, British, and the American, North and South, which are united only in regard to doctrine, ritual, discipline, and the work of foreign missions. Each province of the Moravian Church has a synod as its legislative body, composed of ministers and laymen, and an executive board elected by and responsible to it. The executive boards of the four provinces form the Directing Board of the Brethren's Unity. A General Synod, composed of elected delegates from the several provinces, and certain ex officio members, meets every ten years. In this synod the missions are also represented. It supervises the life, doctrines and activities of the entire Moravian Church, which forms one organic ecclesiastical body throughout the world. A Mission Board, composed of five members, three of whom are chosen from the German, British and American direct synods, is elected by the General Synod, and is responsible to that body for its administration. This Mission Board appoints and directs missionaries and superintendents and has full charge of the finances. Subordinate officers are the treasurer of the missions, the secretary of the missions, the treasurer of the missions, in London, and America, and the various agents of missions in Germany, Eng-
land and America, all of whom are appointed by the central body.

The president of this Mission Board is the financial committee of the missions, composed of four business men elected by the General Synod, one of whom is the manager of the financial office of the missions. All important financial measures, investments, etc., must go before this committee before final action is taken by the mission board, which must be guided by them.

Finally, the General Synod, constituted of representatives of the entire church and acting by commission of all its provinces, institutes a searching inquiry into the financial management and the entire administration of the affairs of the missions. It formulates and amends the regulations, determining the relations of the missionaries to the board; reviews and revises the constitutions of the several mission provinces, determines the principles governing salaries, furloughs, retirements, pensions, and the education of missionaries’ children, and indicates the general spirit in which the mission work shall be conducted. In the last resort, the missions stand directly under control of the General Synod, and therefore also of the entire Moravian church, which looks upon it as a necessary auxiliary missionary society. There are also several auxiliary organizations: e.g., The Brethren’s Society for the Furtherance of the Gospel, founded in 1741, in London, and constituted wholly of members of the Moravian church, the British Provincial Elders being ex officio directors, provides for the current expenses of the mission in Labrador, in part by trade. The society of the united brethren for propagating the gospel among the Heathen was reorganized at Bethlehem, Pennsylvania, in 1787, the original association having been founded at Lancaster, Pennsylvania, in 1745. Chartered in 1788, its directors are the trustees of a fund bequeathed by Godfrey Haga of Philadelphia in 1825. The provincial elders of the American Moravian church, in fact, a separate society, looking upon it as a necessary auxiliary society, with the aid of the American congregations, has assumed the financial support of the mission in Alaska, besides being specially obligated to aid the missions among the Indians of North America. The Brethren’s Missionary Society of Zeist was established in 1789, and devotes its energies especially to the support of the enterprise in Surinam. The London association in aid of the missions of the united brethren occupies the unique position of a missionary evangelical alliance which devotes its entire income to the support of Moravian missions. Established in 1817 by friends who sympathized with the church in its embarrassment caused by losses sustained during the Napoleonic wars, it consists exclusively of members of other churches than the Moravian. During the decade preceding the General Synod of 1832, this association contributed $475,000. The missionary union of north Schleswig, founded in 1843, has rendered aid especially to missions in Danish colonies. Besides these, there are a number of women’s, young men’s, and juvenile societies, generally in connection with these enterprises.

Of these, two exercise administrative powers in accordance with agreements with the mission board, the society for the furtherance of the gospel in London having charge of the Labrador work, and the society for propagating the gospel in bethlehem having charge of the Alaskan and Indian missions in North America.

Development of Mission Work: A memorable day of general and public conference was held at Herrnhut on February 10, 1728, when zinzendorf and his brethren discussed the possibility of a forward movement. Distant lands were to be won for Christ—Turkey and Africa, Greenland and Lapland. But it is impossible to find a way of doing this, it was objected; ‘or else the Lord will give grace and strength for this,’ was the reply of zinzendorf. On the following morning twenty-six unmarried men came together, and solemnly declared themselves ready to go, at the call of the lord. The missionary purpose was there, and already the Lord was preparing to use it. In July of the same year zinzendorf returned from a visit to Copenhagen, accompanied by a negro from the west indies, who described the great need of the slaves in the Islands to such purpose that two young men, messrs. dober and leopold, offered to go to them as missionaries. At the same time the needs of assistance for the work of hans egede, a Danish lutheran missionary in greenland, were made known by two eskimos, and two other young men, messrs. stach and boehnisch, offered to go to this relief.

But zinzendorf deemed it best to delay their departure that their fitness for these undertakings might be thoroughly tested. In August, 1832, dober set out on foot from Herrnhut, accompanied by David nitschman. With two duets and three women, three of these men undertook the journey of several thousand miles to Copenhagen, whence they sailed on October 8, 1732, arriving at st. thomas on December 13 of the same year. On April 10, 1732, matthew and christian zinzendorf, cousins, and christian david sailed from Copenhagen for Greenland, where they were warmly welcomed by egede. About a mile distant from his colony they established their mission, which they called new herrnhut. The following year the new mission was reinforced by the arrival of frederick boehnisch and john beck.

Coincident with the preparation of the mission in greenland, the attention of zinzendorf and the brethren had been called to the laps, but their missionaries on setting out learned that a danish lutheran mission had been begun among the Lapps in Norway. Accordingly andrew grasmann, daniel Schneider, and john nitschman, jr., spent the winter of 1734 in Stockholm, and in the spring went to Tornea, and thence inland, but finding the people under the nominal supervision of the state church, they at once withdrew.

That same year arrangements were made with the dutch Surinam Company by which the Brethren were allowed to settle in Surinam, and messers. Piesch, Berwig and larish left Herrnhut March 7, 1735, their primary purpose being a preliminary and for the purpose of ascertaining this to be possible. This led to the founding of a mission which was placed on a permanent basis in 1745. During the years 1733 and 1738 work was begun among the indians and negroes in the American colonies, a work directly linked with the founding of the Moravian Church in America. The labor of the next undertaking came in 1736, for missionaries to work among the Hottentots in Cape Colony. As soon as the call reached Herrnhut, george schmidt volunteered to go. Within a week he started for holland to study dutch before sailing.
He left for Cape Town on March 17, arriving on the 9th of July, 1737, and settled among the Hottentots on the Zonderend River, about 10 miles west of what is now Genadendal.

In 1737-38 Messrs. Gruaumann, Schmieder and Michel went to work among the Samoyedes and other heathen tribes on the Russian shores of the Arctic Ocean, but were arrested as Swedish spies, and after an imprisonment in solitary confinement were sent back to Germany with word that they were not to be kept.

In 1739 Abraham Richter learned of the need of the slaves in Algeria, and was sent to them by the Church, arriving in Algiers in 1740, but in less than six months he died of the plague. At this time prospective missions in Ethiopia, on the Madagascan coast, in China, in Persia, in Constantinople, and in Wallachia were discussed. A severe check was received when Russia's welcome to Lange, Hirschel and Kund, on their way to Mongolia and China, took the form of imprisonment. In 1747, almost coincident with the commencement of their feters, Messrs. Hocker and Ruffer went as missionaries to the Guerees in Eastern Persia, but found it impossible to penetrate beyond Ispahan; they learned, however, that most of the Guerees had been massacred or exiled, and so started on their return journey. Rüffer attempted work among the Guerees, but landed, the home church in 1750, and, undeterred by what he had encountered, in 1752 he returned to Egypt with the intention of proceeding to the Copts of Abyssinia, but political disturbances prevented his doing so. He made another effort in 1758, taking passage with one associate on an Arab vessel on the Red Sea. Wrecked on the Island of Hassani, the missionaries lost all their valuable medical supplies, and again the enterprise failed. Eight years later, in 1760, Hocker again sought Egypt, accompanied by Messrs. Danke and Antes. It was impossible to proceed to Abyssinia, but Danke pushed on to the Coptic settlement at Behnesa in Egypt, where he died in 1772.

In 1762 Hocker also died, and the absolute inhibition of labor among the Mohammedans that had been caused by the Moslem Code finally caused the abandonment of the enterprise.

In 1754 two members of the Church in England asked for missionaries to instruct their slaves on the Island of Jamaica, and, with two companions, Z. W. Carpenter, were sent for this service, longing for the new field in October of that year. This year, 1754, distinctively termed "the colonial year" by the Moravian writers, was of significance also for the mission in Surinam, which had already had a beginning in the tour of exploration twenty years previous.

In 1760 Messrs. Volker and Butler, with eleven artisans, inaugurated the Moravian Tranquebar Mission, with the approval of the Danish Government. They purchased a tract of land in the vicinity of the town, and named the little settlement on the bank of the river. The Society had the little mission in Greenland begun to approach success than the Brethren turned their attention to Labrador, urged by the men working in the former country. The proposition was not approved by Zinzendorf, but in 1792 merchants who were members of the London congregation fitted out a ship for trade and colonization on the coast of Labrador, and in July of the same year the first four pioneer missionaries reached their destination, naming the bay in which they landed Nisbet's Haven, in honor of James Nisbet, an active promoter of the enterprise. Owing to the treachery of the natives, however, the mission was abandoned, and it was not until 1777 that it was finally established on a permanent basis.

In 1768, six Brethren were sent to establish a mission on the Nicobar Islands, more colonists joining them the following year, but owing to the mortality the colonial project was abandoned. In 1777 the work was extended to Scramper in Bengal, and in 1778 a station was opened on the Ganges, which and seven years later a new station was opened at Patna. The whole mission proved so discouraging that in 1786 the Unity Elders' Conference sent a deputation to investigate its prospects, with the result that the mission at Patna was at once given up, and in 1795, the Conference decided to withdraw entirely from the East Indies. A visit of two of the members of this deputation to Cape Town in 1787 led to the renewal of the mission in that colony, which place and has been in-...
The missionary work of the Moravians at Tobago dates from 1787, when Mr. and Mrs. Montgomery, after a visit to a planter named Hamilton, reported an open field, and commenced work in 1788. The work was interrupted by fierce outbursts of soldiers and people against the Government and by a disastrous hurricane a month or two later. Before the end of the year Mrs. Montgomery died, and soon after Mr. Montgomery returned to Barbados, only to die. For eight years no attempt was made to reopen the mission, chiefly on account of uncertain political conditions.

During the ensuing years the Moravian Mission in the West Indies was intimately connected with the movement for the abolition of slavery. In May, 1792, the Danish King fixed a date for the slave trade to cease in the Danish possessions. At the same time repeated requests came from land owners on St. Thomas to the Unity Elders' Conference that the Brethren should assume the religious and civil education of the children of slaves. The work was greatly hindered by outbreaks of savage violence; but by the end of 1792 new stations were occupied and a widening of educational activities characterized the work. On the Danish Islands, on December 24, 1830, the work of the Brethren was put on an equal footing with that of the Church. By the close of 1834, after a little more than a hundred years of labor, the missions on the Danish Islands numbered 10,321 members; St. Thomas 1,998, St. Croix 6,682, St. John 1,641. That same year, by an act of Parliament, slavery was prohibited throughout the British colonies. The connection of the missions with trade in the support of the work was gradually dropped. A system of education was established by the Government, and in 1839 Governor-General Van Scholten, at the instance of the King of Denmark, visited Herrnhut and laid before the Brethren his plan for elementary schools, proposing that a beginning be made at St. Croix, and that the mission supply the teachers, while the Government erect the buildings and aid financially. In 1841 the first school was opened on Great Princess Plantation; there were established on the island of St. John, and in 1847 the system was extended to St. Thomas. The same year a normal school was established in Antigua, a similar one being already in operation at Fairchild, Jamaica. In 1864 a training institution for women teachers was established at St. Johns, in Antigua. In 1856 the ordination of John Buckley as a deacon at St. Johns marked an important step in West Indian development, for with him began the line of Moravian ministers of African blood.

In 1872 a General Conference was convened at St. Thomas, when self-support, a native agency, local management, and education were discussed. Jamaica fell into line except for the outlay for buildings and the traveling expenses of missionaries. The Danish Islands, with St. Kitts and Tobago, were to have a gradually decreasing grant for a decade, in the hope that in the interval local resources might attain a sufficient development. Antigua and Barbados were unable at once to make the change.
But such happy anticipations were interrupted. Cholera, yellow fever and a hurricane compelled the missionaries to turn their houses into hospitals. In spite of this, work proceeded steadily on, and in 1869 steps were taken for the gradual emergence of the West Indian congregations from the status of missions, so that they might be made a fourth federated province of the Brethren's Unity. Earthquakes and tornadoes of repeated occurrence involved losses from which it has taken years to recover. One important measure was the founding of a theological seminary at Fairfield, in Jamaica, in 1876. In 1879 a conference of ministers and delegates met at Nisky, St. Thomas, to take steps preparatory to the appointment of a General Synod, and which should prepare the way for provincial autonomy. At this time it was decided to divide the work into two provinces. General mission conferences were appointed in both missionary provinces for every five years, at which three executive members were to be chosen. In each case the election of these executive members must be approved by the Board of Missions. At this time a second theological seminary was opened in St. Thomas.

In 1884 the church in Jamaica was recognized as an independent, self-supporting, corporate body, with title to the mission property being vested in the Provincial Conference of the island together with the President of the British Provincial Elders’ Conference and the Mission Secretary in London. This year the one hundredth anniversary of Moravian missions in the Eastern islands was commemorated by the erection of a memorial church at St. Thomas. In 1899 the two provinces were granted practical independence with certain restrictions. A fixed annual grant, normally of $5,500, was to be voted out of the legislature for each year, together with certain specific donations. The cost of maintaining one theological seminary on the islands, and the expenses of the foreign Brethren then in the field, were to be borne by the Mission Board. Foreign missionaries thereafter appointed were to receive one-half their expenses from the Board and the other half from the province. Since then Jamaica has averaged contributions amounting to $41,184, and has drawn from the general treasury $2,534; the Eastern division averaged $4,109 each year, and required a special grant of $3,552. The situations are (1903) 45 stations and 23 outstations, 86 European and American missionaries, 813 native helpers, 40,107 church members, 108 day schools with 23,368 pupils, 3 other schools with 34 students.

2. Dutch Guiana (1735): Arrangements having been made with the Dutch Surinam Company for the Brethren to settle in that country, a preliminary tour was made in 1735 by Messrs. Piesch, Berwig and Larisch. Arrawak, Warrau, and other Indian tribes, free Bush negroes, and negroes were made up the bulk of the population, while the country was as unoccupied as its inhabitants. After the exploring party returned in 1738 Messrs. Daehne and Gültnner were sent out by invitation of a planter on the Berbice River. They established Pilgerhut, about one hundred miles inland; the following year’s work was begun at Paramaribo, but such was the hostility that the missionaries removed to a small plantation on the Cottica, where they remained till 1745, when this was also given up and the working force returned to Pilgerhut, where in 1748 the first convert was baptized. In 1754 the good will of the authorities at Paramaribo was secured, and permission was given for the founding of mission colonies. In 1756 Sharon on the Sara-macca, and Ephrathim on the Corentyne, were successfully established for work among the Indians. Repeated wars, the nomadic tendency of the tribes and their proclivity to intoxication caused the work to progress but slowly. In 1761 and 1763 the Bush negroes rose in rebellion and threatened the extinction of the mission, and in 1766 work was begun among these Bush negroes. Slowly a congregation was gathered, and in 1773 a settlement was formed at Bambeey, in the interior. In 1776 the first convert was won at Paramaribo, and in 1778 the first church building was completed. In 1785 a mission a tract of land, and Sommelsdyk was established. In 1793 permanency was given to the mission by the formation in Zeist, Holland, of the Zendigenen- acht der Broedergemeente, for the special support of the Brethren’s work in the Dutch Colonies. The same year the mission at Hope, on the Corentyne, was removed to a more fertile spot on Aulibissi Creek; industrial work was vigorously inaugurated, and before long a mission boat was regularly used to carry produce to Berbice. In 1799 the first Brethren’s Press was opened near the mission. In 1818 a Brethren’s Missionary Society was formed at Zeist, and in 1821 a Brethren’s Missionary Society was formed at Zeist. In 1818 the Dutch Society for the Promotion of Christian Knowledge among the Negroes of Surinam was founded. The spiritual care of prisoners and slaves in the forts of New Amsterdam, at Paramaribo, and the suburban towns was transferred to the Brethren’s Mission. The mission made marvelously rapid strides. Station was added to station—Worsteling Jacobs in 1838, Salem in 1840, Beekhuizen in 1843, Rust-en-Werk in 1844. Lilendal became an independent station with the consecration of its church in 1848; Annasport was made a mission for work among the plantations on the Warappa and Mattapica creeks in 1853. In 1855 Catharina Sophia on the Saramacca; Heerendyck in 1856. The first attempt to train negro lads for teachers was made in 1844, and in 1851 a normal school was established at Paramaribo. In 1856 the Government placed in the care of the Brethren the non-Catholic inmates of the leper hospital at Batavia. Then followed Beerheba, Waterlo and Clevia. In 1861 John King was baptized at Paramaribo, and returned to Maripos to do evangelistic work among his own people, and from this beginning he made long evangelistic tours in all parts of Surinam. In 1863 the slaves of Surinam were emancipated, each ex-slave being required to declare himself either a Jew or a Christian to obtain the royal favor.

Education now became a marked feature of the Moravian missions; in 1866 the normal school was transferred to the capital, and supplied well qualified teachers. In 1875 a primary school was also established at Paramaribo. In 1882 Rust-en-Vrede was established, and Wanika in 1886. At this period the “native helpers” began a movement for a higher standard of discipline, and in 1893 the colonial government materially aided the mission by altering the laws which had impeded true marriages of the negroes. The
work spread among the Bush negroes of the interior, tho it was impossible for a white man to permanently endure the climate. In 1891 the first Chinese helper was appointed for work among the natives. In 1890 a foundation-stone of the training institution for native workers was laid at Paramaro. There are (1903) 18 stations and 25 outstations, 93 European and American missionaries, and 364 native helpers, 29,200 church members, 27 day schools with 2,896 pupils, 1 training school with 6 students.

4. South Africa (1737): The first Moravian missionary, George Schmidt, arrived in Cape Town in July, 1737, and located among the Hottentots on the Zonderend River; but the following year the mission was transferred to Baviaans-kloof, where the first convert was baptized. The following year Schmidt was summoned to Holland to report as to the validity of his proceedings, and was not allowed to return. In 1748 John Martin Schlawbeer volunteered to take up the work at his own expense, and remained at Baviaans-kloof till 1756, when he died during an epidemic. In 1789 Bishop Reichel visited Cape Colony, and advised that another attempt be made. Accordingly in 1792 two men were sent out, and the Government donated the place where Schmidt had labored for the new mission premises. In March a school was commenced, and industrial work was begun. But the Boers saw with alarm the improvement of the people under the instruction of the Moravians, and even the friendly inspector yielded to the opposition. The Moravians must withdraw to the Bush country. In 1794 no native was allowed to settle at Baviaans-kloof without written permission from a Boer. Then a paper was circulated demanding the expulsion of the missionaries and the enslavement of the Hottentots and Bushmen. A climax was reached in 1795 when the British fleet took possession of Cape Colony, and the missionaries were assured protection. Then the mission grew apace. In 1800, after the restoration of the Colony to Holland, the name of the station was changed to Genadendal, at the suggestion of the Dutch governor, who was impressed by the improved condition of negro converts. In 1808, two years after the Colony had again become a British possession, a new station was established at Groenenkloof (Mamre), forty miles north of Cape Town. In 1815 a third center was established at Enon, as a basis of work among the Kaffirs, but owing to the violence of the latter the place was abandoned in 1819. In 1823 the Government hospital for lepers at Hemel-en-Aarde came under the care of the Moravians; the following year Elim was established about forty miles southeast of Genadendal. In 1828 Shiloh in Kaffraria was occupied, and early the next year the first converts were baptized. In 1834 slavery was abolished, and a remarkable revival occurred at Genadendal. In 1838 the corner-stone for a training school for Hottentots was laid, and reached in 1839 when British students were received. In 1839 the work was extended to some fugitive Kaffirs at Zitzikamma, where in 1840 a great awakening took place. Extension became the order of the day, and in 1845 a missionary society was organized at Genadendal; in spite of frequent wars and famine new stations were established. In 1858 the work was extended to the Kaffirs; in 1860 the frontier was extended eighty miles north of Cape Town, in the valley of Goedverwacht, but the uncertain tenure of the land decided the purchase of the neighboring farm of Wittewater as the center of operations. During the next years the printing press came into the hands of the missionaries, and a number of tracts, periodicals and other literature were published.

The gradual advance into Kaffraria gave special importance to a conference of missionaries engaged in the eastern group of stations, held at Shiloh in 1865, a first step in the direction of a separation into a distinct missionary province. In 1867 the Moravian missionaries withdrew from the oversight of the leper hospital, which had been removed to Robben Island, and it passed into the care of the Anglican Church.

In accordance with the resolution of the synod in 1869, the South African Mission was divided into the Eastern and Western Provinces. In the Western Province special attention was paid to the normal school at Genadendal. Mamre, distinguished as the point of extension in the Western Province through its sub-station, Johanneskerk or Pellem, was given up to the control of its religious life, and a revival at Elim in 1876 gave promise of a bright future. The churches at Enon and Clarkson were enlarged and new schools established at Mamre and Elim, without drawing on the mission treasury.

In the two provinces there was an extension of labor among the "red" Kaffirs called forth all energy. In independent Kaffraria, Bazuya formed a vantage point for the extension of the work. In 1870 a mission was established among the Hubis at Emtumasi. By August, 1870, there were thirteen converts; outstations were soon required. The following year, by the request of a chief, Entwanazana was founded on the Umbani River. But new perplexities thickened. The mission was refused a grant of land at Emtumasi. Moreover the British Government ordered the withdrawal of the missionaries from a tribal standpoint. Then came a Kaffir uprising against the British rule. But in the meantime the older stations in the Eastern Province were taking a more distinctly Christian character. In 1887 a theological department was added to the normal school at Genadendal. The Kaffir mission, embracing the three older posts in the Colony proper, Shiloh, Goshen and Engotini, with the two widely separated groups in Tembuland and East Griqualand, experienced fluctuations, the former the whole expansion prevailing. In both divisions of the South Africa field difficulties arose in relation to the title to the stations and mission property. Negotiations began with a view to secure a permanent decision in the Colonial Parliament, and in 1888 seemed favor able to the Boers in the Bloomberg. In 1890 the Plettenberg range, near St. Helena Bay, was steadily toward self-support. In 1896 a training school for native teachers was established at Muyenane, in the Eastern Province. A theological seminary was also established in Kaffraria. In 1902 the mission Board was directed by the General Synod to make a report to the government of the Western Province only in case of extraordinary need. The great work of the missionaries is firmly to establish the congregations and make them self-supporting. There are (1903) 22
stations and 26 outstations, 86 European and American missionaries, with 483 native helpers, 16,615 church members, 54 day schools with 3,807 pupils, 2,047 members in the Sunday School. Hopedale (1770): In the fall of 1751 Messrs. Stach and Drachart, of the Moravian Mission in Greenland, urged a similar mission in Labrador, and suggested that trade be combined with evangelization. Zinzendorf did not favor the proposition, but members of the London assembly located, in 1752, 152d, fitted out a ship for trade and possible colonization on the coast of Labrador, James Nisbet promoting the scheme. Erhardt and other Brethren took passage in her, and on July 31 reached their destination, which they called Nisbet's Haven. Here four prospective missionaries landed and prepared to build a house, calling it Hopedale, while Erhardt sailed northward, but with his companions was murdered by the natives, and the captain of the schooner persuaded the Brethren at Hopedale to abandon their enterprise. In 1764 a second attempt was made by Jens Haven, and the following year, accompanied by Drachart, they made a tour of exploration, going some distance into the interior. In the autumn of 1767 turmoil in Labrador itself hastened the founding of the mission, and in May, 1768, an adult portion of the Council of Prussia, sanctioned the undertaking and granted to the resuscitated Society for the Furtherance of the Gospel, which had been founded in London in 1741 by Spangenberg, one hundred thousand acres of land on the coast of Labrador. In March, 1770, a small brig, the "Jersey Packet," was purchased, and on May 5 of the same year the missionary party sailed for Labrador, arriving the 10th of August, and locating about 180 miles north of Hopedale. Friendly relations with the natives were soon estabished, and the missionary work was prosecuted. In 1773 the founding of two additional stations was sanctioned by the Unity Elders' Conference. The following year a tour of exploration was made northward, which resulted in the occupation of Okkak, 150 miles north of Nain, in 1775. In 1786 the outlook was most discouraging, owing to the influence of European traders, but in 1804 an awakening began and by 1818 six hundred people were gathered around the mission stations. During 1836-1837 a famine raged at Nain, Okkak, and the newly organized station of Hebron, and the missionaries strained every nerve to help their people. During the next twenty years occasional tours were made and preaching services held in various parts of Labrador, but the main efforts of the missionaries were spent in strengthening the existing missions. In 1864 the station of Zoar was founded, to the south of Nain. In 1865 an orphanage was established at Okkak. Two years later another attempt was made to explore the country, and attempts were made to establish stations at Saeglek, Nachwak and Nullatatok Bay, but in each case the Hudson Bay Company interfered and the missionaries withdrew. In 1871 a second and successful attempt was made at Nullatatok Bay, the new station being called Ramah. From the beginning the Labrador mission had carried on trade, the profits going in part to regular missionary work, but the difficulties inevitable to a mingling of the two led to a complete separation between the spiritual and temporal administration in 1886, and this separation was continued till 1876, when a partial return to the old basis was made, but the perplexities it entailed seriously handicapped the missions. In 1893 at Ramah, and in 1896 Makkovik was founded, south of Hopedale, and arrangements were made for another station at Rigolette, still further south. There are (1903) 6 stations, 38 European and American missionaries, 38 native helpers, 1,273 church members and 8 day schools with 242 pupils.

6. Mosquito Coast (1847): At the request of Prince Schönberg-Waldenberg the Moravian Church commissioned Messrs. Pfeiffer and Reinke of the Jamaica Mission to make a tour of exploration in Central America. Proceeding via Grey-town they reached Bluefields in May, 1847. The "king" urged them to establish a mission on land for it in Bluefields. The Germans desired stated services in their language and the British Consul promised hearty cooperation. The new mission was inaugurated in March, 1849, and in 1856 the first convert was baptized. In 1855 a new station was established at a marshy place called Magdala, and two years later a church was built at Rama Key. In 1888 the work was greatly helped by the gift of a small schooner from friends at Zeist. Two years later Ephraim was founded at Wauanta Hallor. In addition to this, a native settlement was established in Corn Island among the negro population. In 1864 Bethania, at Tasbapauni, was made an independent station. The following year a terrific hurricane devastated the Mosquito coast; everywhere the missions suffered, but deep sympathy led to larger gifts from the homeland, and the missionaries were enabled, to some extent, to rebuild and start afresh. In 1871 it became necessary to abandon Joppa, on Corn Island, chiefly because of the lack of men. In 1875 a gift was received for a mission station on Karata, on the Wawa River, and another outstation was established at Kukallaya, some distance inland. In 1876 the missions again suffered from the violence of a hurricane, Bluefields, Rama, Magdala and Bethany suffering severely. In 1878, A. I. and Magdala, which spread to all the surrounding villages, as well as to the other stations of the mission. Indians, Negroes, Creoles and Spaniards were alike aroused; several hundred heathen asked for instruction and baptism; chapels were erected in buildings not regularly occupied, and three outstations were added. In 1888 the translation of the New Testament into the Mosquito-Indian tongue was completed and printed at the expense of the Herrnhut Bible Society. The year 1894 was critical in the extreme for the Mosquito Mission, when the Reserve was wholly incorporated into the Nicaragua Republic. Business was unsettled, the regulations altered, and the expenses of the mission materially increased. Nevertheless, there was a steady advance, the number of stations and outstations being increased by five, and the membership by nearly two thousand. There are (1903) 16 stations and 11 outstations, 34 European and American missionaries, 99 native helpers, 5,433 church members, and 9 day schools with 319 pupils.

7. Aboriginal Mission (1858). The aborigines of Australia claimed the attention of the church in the years following the synod of 1848. In Herrnhut, Niesky and other German congregations, Australian associations had been formed, looking
toward a future mission. Messrs. Tager and Spiescke were sent out as pioneers, arriving in Melbourne February 25, 1859, where they were cordially welcomed by the Lieutenant-Governor. To his influence mainly was due the favorable report which the missionaries in their new home in the "Mallee" or scrub.

Permanent work was begun in October, 1851, on a reserve in the Lake Boga District. In 1856 the missionary superintendent abandoned the field, without consulting the faith of the original two, and at this time the missionaries, being in poor health and tried by the rush of gold diggers into the district and the resulting difficulties. The Conference condemned this hasty action, and two years later the Moravian missionaries were again in the field, and decided to locate in the Wimmersa District, near Antwerp, a station belonging to Mr. Ellerman, who gave land for the new mission and aided in every possible manner. The new site was called Ebenezer. In 1860 the first convert was baptized, and from that time the progress was rapid. The first convert was a native of Freshwater, Australia, to offer to supply funds for another station, if the Moravians would undertake the work. On a reserve near Lake Wellington, and on the banks of the Avon, the new post was founded in 1863, and called Ramahyuk. Here the first convert was baptized in 1866. A vigorous school soon came into existence. A third station was attempted near Cooper's Creek, in the wilderness, 800 miles north of Ebenezer, in 1866, and at Yorke's Peninsula, about 100 miles west of Adelaide, but after varying success both stations were abandoned. At Ebenezer and Ramahyuk industrial work proved a help to the mission. In 1876 an orphanage was established at Ramahyuk, in charge of native Christians.

There were 9 (1903) 4 stations, 12 European and American missionaries, 106 church members, 3 day schools with 172 pupils.

8. West Himalaya (1853): When on a visit to Herrnhut, in 1850, Dr. Gutzlaff, of China, persuaded the Moravians to try and enter the Chinese Empire from the west. Messrs. Pagell and Heyde were selected for the new undertaking and arrived at Calcutta in November, 1853; their first destination was Kotgarh, where some time was spent in linguistic study under a Tibetan lama. In April, 1855, they made an investigating tour; at Leh, in Ladak, they were most unwelcome, nor was the prospect brighter in Chinese territory. The following winter was spent in Kotgarh, and the first station was founded among the Tibetan-speaking Buddhists of Lahul, as near as possible to the frontier of Chinese Tibet. Land was secured in 1856 in the valley of Bhagar, sixty miles from the border, near Kailang. Before winter the mission house was completed—a solitary outpost of Christianity amid the Western Himalayas, over against the fortress of the Dalai Lama. Early in 1857 the future leader of the new mission, Mr. H. A. Jaeschke, arrived, and a new stage of work began. In 1859 a printing press was established, and Jaeschke began to distribute broadcast his translation of the Harmony of the Gospels. In 1865 a second station was established at Poo, in Kunwar, nearer to the border which they wished to cross. That year the first convert was baptized. Meantime, vaccination; smallpox was making fearful ravages in Chinese Tibet. In their extremity the people of Tso-tso sent to Pagell to stay the scourge by vaccination; but, his work being accomplished, he was forced to return to Poo, where a second convert was baptized in 1868. At Kailang also a few others were added to the little church, and indifferent to the part they were invited to, little hostility. In 1872 an ex-lama from Lhasa was baptized, and in 1876 the conversion of a Mohammedan teacher in the school at Kailang was followed by the conversion of five of his pupils. Mission tours were frequently made, and large numbers of tracts and parts of the New Testament were distributed.

In hope against hope the mission was continued. In 1886 a station was established in Leh, the capital of Ladak, an important town near the western border of Tibet, permission being granted when a medical missionary was sent to care for the hospital and dispensary in the city. Two years later, in 1888, a church was dedicated. In the meantime the entire New Testament had been printed in Tibetan, and the Old Testament was well under way. During the closing years of the century, as few signs of help were manifest; new outposts were established at Chot and Gui, near Kailang, and at Szech, near Leh. In the schools some few of the senior students were taking theological studies, the work of the native assistants holding hope of the future. There were (1903) 8 stations and 1 outstation, 22 European and American missionaries, 9 native helpers, 110 church members, 10 day schools with 266 pupils, 1 training school.

9. British Guiana (1878): The migration of West Indians to Demerara was the origin of the work to this South American colony. The proprietor of the Bel Air estate offered to provide the salaries of a missionary and an assistant who should teach school, for five years. The offer was accepted, and in November of 1878 work was begun at Cummings Lodge. The following year, Mr. Quintin Hogg, the proprietor, asked that a missionary be sent to the Plantation Reclamation, near the Essequibo, and Mr. Pilgrim was sent to open the work in April, 1879. In 1882 a further extension was followed, when fifty-seven people who had left the Congregational Church at Beterverwachtung asked to be taken into the Brethren's Church, and regarded as constituting an outstation of Graham's Hall. Both these stations grew rapidly in numbers, while Reliance was abandoned; the work not proving successful. At the end of 1884 the proprietor gave notice that he would be unable to largely to sustain the work in Demerara as heretofore. In 1896 a new beginning was made at Georgetown and an attempt was made to work among the coolies and Chinese, who were pressing into the colony. In 1902 land was purchased and a church and parsonage erected in the Queenstown ward of the City of Georgetown.

There were (1903) 2 stations and 1 outstation, 29 native missionaries, 912 church members, 2 day schools with 208 pupils.

10. German East Africa (1890): This mission originated in the receipt of a large legacy, and an appeal from Mackay of Uganda, conjointly with Bishop Parker of Equatorial Africa. The directors of the East Africa Colonial Company in Berlin promised cooperation. Accordingly, in the spring of 1890, Messrs. Meyer, Richard, Martin, and Häfner set out for the country north of Lake Nyasa. Martin's grave paved the way for the advance at Kararamu, but Rungwa...
Moravian Missions
Morrison, Robert

THE ENCYCLOPEDIA OF MISSIONS

was founded among the Konde people in August. Rutenganio and Ipiana were established in 1894, and Utengela, among the Safaus and Sangos, in 1895.

There are (1903) 10 stations and 1 outstation, 41 European and American missionaries, 63 native helpers, 9 day schools with 562 pupils.

11. Southern California (1890): The destitute condition of the mission Indians, former pro- letaries of the Roman Catholic church, appealed to the Woman's National Indian Association, who applied to the Moravian Church, and Mr. Weinland was sent to open work among them. He established at Potrecio the "Ramonia Mission," and in 1896 Martines, in the desert, was occupied. Other stations have since been established at Rincon and La Jolla, and an outstation at Yuma, in Arizona.

12. Alaska (1885): At the annual meeting of the Society for Propagating the Gospel Among the Heathen, held at Bethlehem, Pa., in 1885, an appeal was made for Dr. Sheldon Jackson that the Moravians establish a mission among the Indians and Eskimos in Alaska. Messrs. Weinland and Hortmann were commissioned to make an exploring tour, arriving in Unalaska in May, 1884, and thence proceeded across Bering Sea to the island of Sitka. On reaching the Kuskokvim, they traveled up this river beyond Kolmakovsky. On returning to Bethle- ham they recommended that a mission be established on the Kuskokvim River, about eighty miles from its mouth. In the spring of 1885 the pioneer band, consisting of Messrs. Weinland and Kilbuck and their wives, and Hans Torgersen, a carpenter, were en route to Bethel, as the new station was to be named. On June 19 they reached the Kuskokvim, but before their goods had all been unloaded the mission Torgersen was drowned, and the two young and inexperienced couples were left alone to face the rigors of an Arctic winter; but they persevered and by October 10 had their house built and ready for habitation. In the summer of 1886 a second station was founded on the Nushagak River, near Fort Alexander, and named Carmel. During the ensuing two winters the stations were beset with hardships on every hand. But dawn was at hand. During Passion Week, 1888, the Moravians, in common with the Brethren throughout the world, held daily services. An awakening resulted, and in September the first converts, eight Eskimos, were baptized. The same year Mr. Weber was sent to the assistance of Mr. Kilbuck, Mr. Weinland having been compelled to retire because of ill health. On the arrival of Weber, Kilbuck started for Carmel, to consult with the missionaries about the work, but after an absence of seventy-three days he returned home, more dead than alive, suffering from the extreme cold. During his absence his wife became seriously ill from overwork, and it seemed as if she must give up the work. Both stations needed reinforcements, and a call was sent out for volunteers. Fully nineteen persons responded. In 1889 Mr. Schoechert was sent to Carmel, and Miss Delterler to Mrs. Kilbuck's assistance at Bethel, while Mrs. Bachman, with her husband, was sent to the Kuskokvim to spend a year. By 1899 the membership numbered 987. Ougavigamute was founded, eighty miles up the Kuskokvim from Bethel. The latter station had 6 outstations, Carmel 3, and Ougavi- gamute 2, while more than 20 natives rendered efficient service.

There are (1903) 3 stations, 18 European and American missionaries, 11 native helpers, 596 church members, 2 day schools with 51 pupils.

MORELIA: A town and the capital of the state of Michoacan, Mexico, situated on 125 miles W., 4,000 feet above sea level, 188 feet above the river, in a valley surrounded by high mountains. It has a fine aqueduct dating from 1788. Altitude, 6,400. Population, 30,000. It was formerly called Valladolid. Station of the Moravian Mission, 1846. With (1903) 1 missionary and his wife, 6 native workers, 8 outstations, 2 places of worship, 2 Sunday schools and 112 professed Christians.

MORGENZON: A village in the Transvaal, South Africa, situated in Rustenburg district, 68 miles W. of Johannesburg. Station of the Hermannsburg Mission Society (1876), with (1903) 2 missionaries with their wives, 1 boarding school. Society spells the name Mor- genzoon.

MORIAH: A town on the N. coast of Tobago, West Indies, in the eastern part of the island. Station of the Moravian Mission Society (1842), with (1901) 1 missionary and his wife, 26 native workers. 1 place of worship, 2 day schools, 2 day schools, and 522 professed Christians.

MORJIA: A village in Basutoland, South Africa, situated 88 miles N. E. of Aliwal North. Station of the Paris Evangelical Mission Society (1853), with (1903) 4 missionaries with their wives, 38 native workers, 17 outstations, 2 places of worship, 3 day schools, 1 printing press, 1 college, and 2,029 professed Christians, of whom 1,379 are communicants.

MORIOKA: A town on the main island of Japan, situated 85 miles E. by S. of Aomori. Population, 23,000. Station of the RCA (1887), with (1903) 1 missionary and his wife, 1 native worker, 2 outstations, 1 place of worship, 1 Sun- day school, and 79 professed Christians. Also station of the ME, with 1 native worker.

MORLEY: A railroad station in Alberta dis- trict, Canada, on the C. P. R. R., 882 miles W. of Winnipeg. Station of the Methodist Church in Canada (1873), with (1901) 1 missionary and his wife, 2 outstations, 1 boarding school, and 302 professed Christians.

MOROCCO: A Mohammedan empire in the N. W. of Africa, bounded north and west by the Mediterranean and Atlantic, and east by a con- ventional line separating it from Algeria. It extends southward into the desert to a greater or less extent, according to the activity and power of the reigning Sultan. Its area can only be estimated and is probably for the most time as much as 220,000 square miles; the population, also very indeterminate from year to year, is perhaps 6,000,000. It consists of three states, subject to the Sultan-Sheriff: the kingdoms of Fez, in the north, Morocco in the southwest, and the oasis of Tafelit, besides several semi-inde- pendent tribal territories of the desert. The Atlas (Deren) range, from 4,000 to 13,000 feet, traverses the country from northeast to south- west. For the rest, the surface is occupied by rolling steppes diversified by mountain spurs, and merging into the lowlands of the Sahara and the Atlantic shores. The rainfall is greater than that of the other Mauritania states, as
also the number and size of the rivers, none of which, however, is capable of floating any but very light crafts. The flora is that of Southern Europe, most resembling that of Spain. The same may be said of the animals except the lynx, the panther, and the ostrich, not yet extinct in Morocco. The climate is mild, equable and very salubrious. The government is an Oriental despotism, cruel and barbarous, and the country is infested by lawless bands. There are no proper means of transportation in the interior, which is largely unknown to Europeans; agriculture is of the most primitive kind, and the rich resources of the country remain undeveloped. In Tangier there are about 5,000 Europeans and other Christian residents, engaged in trade for the most part, and, outside of Tangier, not 1,000 can be found in all of the rest of the empire.

The Berbers, original inhabitants of the country, form two-thirds of the population, and are divided into several groups, as the Kabyles of the north, the Shellahas of the southern slopes of the Upper Atlas range, the Harzans of the south. The Shellaha language is that most extensively spoken. Arabic is also largely diffused, especially in the north. The Arabs are called Moors in the towns, where they form the majority of the population. The Jews, still calling themselves "Exiles from Castile," number over 100,000. They speak Spanish and to some extent Arabic. The negro population, pure and half-caste, are constantly recruited by the slave trade with the Sudan. Mohammedanism is the religion of the empire. Morocco ranks next to Arabia in the Muslim mind as an orthodox and noble country; and the Sultan-Sheriff is to the Western Mohammedans what the Turkish Sultan is to those of the East. There is great and conscientious intolerance toward all who are not of the state religion, and travel in the interior of the land is impossible for this reason.

Missions in Morocco have been addressed to the Jews in the main. The North Africa Mission, the Gospel Missionary Union, the Southern Morocco Mission, and the PB, however, are endeavoring to reach the Berbers and other Mohammedans. Medical work is here found an especially effective means of access to the people. Nevertheless, little has been accomplished beyond what one missionary calls "gathering up the stones" preparatory to feeding the ground.

MORRISON, John Hunter: Born in Walkill Township, New York, June 29, 1806; graduated at Princeton College 1824, and Theological Seminary 1837; sailed for India as a missionary of the FN in 1838. He was stationed at Allahabad, Agra, and Amritsar, and was characterized by great earnestness and boldness in the presentation of truth. On account of his fearlessness in dealing with men in that fanatical region, he was in mission circles styled "the lion of the Punjab." Yet no one was more affable than he, more genial in personal intercourse. Dr. Morrison's name should be cherished, since it was he who, after the Sepoy mutiny in 1857, proposed to the Lodianna Mission to call upon all Christians to observe an annual week of prayer for the conversion of the world. That one thought of this missionary in India has done more toward breaking down denominational reserve among Christians than any other influence in the 19th century. He died of cholera at Dehra Dun, September 16, 1851, in the thirty-sixth year, and in the forty-fourth year of mission work.

MORRISON, Robert: Born at Morpeth, Northumberland, England, January 15, 1782, of humble Scotch parentage. He was an apprentice learning to make lasts and he studied while at work. At the age of fifteen he joined the Scotch Church. As early as 1801 he began the study of Latin, Hebrew and theology with the minister of Newcastle, and after fourteen months he entered the Independent Theological Academy at Hoxton, to prepare for the ministry. Soon after his admission he decided to become a missionary to the heathen. In May, 1804, he was appointed the first missionary of the LMS to China, and he thus became one of the first Protestant missions in China. Entering the Mission College at Gosport, he spent two years not only in special preparatory studies, but also in acquiring Chinese. He sailed for China January 31, 1807, but the Chinese being hostile to the English, he was obliged to go via New York instead of going direct from London. Reaching Canton September 7, he adopted the Chinese dress, diet, and habits, but soon resumed his usual mode of life. An edict being issued about this time by the Chinese Government prohibiting the printing of religious books and the preaching of the Gospel, Mr. Morrison set himself at once to study the language and translate the Bible. His health having suffered from incessant study and too rigid economy, he left Canton for Macao, where he remained a year in consequence of political troubles which made residence in Canton unsafe. In 1809 he was offered the position of translator to the East India Company's factory at Canton. This he at last secured for him a permanent residence in China, ready access to all the people and time for the translation of the Scriptures and preparation of his Chinese dictionary. He held this office to the day of his death—twenty-five years. To the end he had the confidence of the East India Company, and they advanced large sums for seventeen years for his various works. The much occupied with official work, he found time for Bible translation and the preparation of religious books. In 1810 a revised and amended version of the Acts of the Apostles, based on his copy of the manuscript in the British Museum, was printed—the first portion of the Scriptures in Chinese printed by any Protestant missionary. In 1812 the Gospel of Luke was printed. Early in 1814 the whole of the New Testament was ready, and the East India Company furnished a press and materials, and helped to superintend the printing. In this year, seven years after his arrival in China, he baptized Tsi-A-Ko, the first Chinese convert to Protestant Christianity, a sincere believer, who continued steadfast in his faith till his death in 1818. In 1815 a Chinese grammar of 200 quarto pages was completed in 1809, was printed at the Serampur press. In 1817 he published A View of China for Philological Purposes. In this year the University of Glasgow conferred upon him the degree of doctor of divinity. In 1818 the translation of the entire Bible was completed, in part with the aid of Dr. Milne, and was printed in...
THE ENCYCLOPEDIA OF MISSIONS

1821. This version is said to be too literal, and not idiomatic. But it was the first attempt, and the Chinese is set off in columns. Neither the necessity of a thorough revision, nor hoped to be able to revise the work. The Old Testament formed 21 volumes 12mo. His laborious literary work was the Chinese dictionary, published in 1821 by the East India Company at an expense of £15,000. Neither the Chinese is set off in columns. nor its stupendous difficulty in that stage of the missionary enterprise can be overstated. In 1824, for the purpose of recruiting his health and awakening an interest in the mission, he visited England, where he spent two years. Everywhere he went, being treated with distinction by civil and religious bodies. He had an audience with George IV., to whom he presented a copy of the Sacred Scriptures in Chinese. In 1826 he returned to China. Not vigorous, he continued his public labors for nine years more, devoting himself more than ever to the missionary work, preaching, translating and distributing printed works among the Chinese. He conducted religious services on the Sabbath, both in English and Chinese. In 1832 he writes: "I have been 25 years in China, and am now beginning to see the work prosper. By the press we have been able to scatter knowledge far and wide." He accompanied Lord Napier to Canton as interpreter in negotiating a treaty with the Chinese Government, and died there August 1, 1834. Among the good works of his life was his work with Dr. Milne in founding the Anglo-Chinese College at Malacca (now at Hongkong). For the buildings of this college he subscribed £1,000 and for its maintenance £100 each year.

Besides the works mentioned, he published 'Hesperid' a translation of the popular literature of the Chinese, and 'Chinese Miscellaneous.'

MORSI: A town in Berar, India, situated 31 miles N. by N. of Amraoti. Population, 7,000, of which 5,700 are Hindus. Station of the Kurku Indian Hill Mission (1895), with (1902) 1 missionary and his wife.

MORTLOCK ISLANDS: A group of Micronesia, formerly included in the Carolines. They have been partly Christianized and the work there is under the supervision of the ABCFM station at Ruk, and the workers are in the main supported by the Hawaiian Evangelical Association. The largest island in the Mortlock group is Lukanor, and there are about 900 Christians. The Bible was translated into the Mortlock language in 1884 by missionaries of the ABCFM.

MOSCHI: A village in German East Africa, situated in Majagga region on the S. slopes of Mt. Kilima Njaro. Station of the Leipzig Mission Society (1896), with (1903) 4 missionaries, one with his wife; 4 places of worship, 1 boarding school, 2 day schools, 1 printing press, and 501 professed Christians.

MOSETLA: A village in the Transvaal, South Africa, situated in the Bushveld about 30 miles N. of Pretoria. Station of the Hermannsburg Mission Society (1867), with (1901) 1 missionary, 2 native workers, 4 outstations, 2 places of worship, 3 day schools, and 758 professed Christians.

MOSUL: A town in Mesopotamia, Asiatic Turkey, capital of the province of Mosul, situated on the right bank of the Tigris River, 220 miles N.W. of Baghdad. The site of ancient Nineveh lies on the opposite side of the river. The climate is hot and trying to Europeans. Population, 61,000. It was occupied as a station first by the ARCFM, then transferred to the CMS, and by it transferred to the CMS, who now have (1903) 1 missionary and his wife, 2 women missionaries, 6 native workers, 3 day schools, 1 dispensary, and 76 professed Christians, of whom 26 are communicants.

MOSQUITIA, or MOSQUITO COAST: A department of Nicaragua, Central America, bordering on the Caribbean Sea, and inhabited by Mosquitos, a mixed race with both African and Indian blood. For a long time it was known as the Mosquito Reservation, under the protectorate of Great Britain. It was ceded to Nicaragua in 1860, but maintains the native form of government under supervision of that country. The population about 15,000. Missionary operations are carried on by the Moravians at 14 stations.

MOTIHARI: A town in Bengal, India, capital of the Champaran district of Behar, situated on Buri Gandah River about 48 miles N. of Muzaffarpur. Population, 8,000, Hindus and Muslims. Station of the RBMU (1901), with (1903) 2 missionaries and their wives.

MOTIVE OF THE MISSIONARY ENTERPRISE: That the motives which prompt to missionary effort are powerful is evident. No weak motives would lead thousands of earnest men and women to spend their lives among uncivilized people, far from the associations and the opportunities of home and country, nor would weak motives induce the Christians of Europe and America to give millions of dollars annually for the maintenance of the missionary enterprise. In fact, various motives are involved. Some operate upon one class of minds and some upon another, and all of them no doubt have a force to do with the person. For convenience, they may be divided into two main classes, primary and secondary, tho this classification is arbitrary, and the there may be differences of opinion as to the class to which certain motives properly belong. Something depends upon the viewpoint.

1. The following motives, which are influential with many Christian people, may be classed as secondary:

(a) The philanthropic motive: This is stirred by the consciousness of human brotherhood, and the natural desire to relieve the appalling suffering and ignorance which prevail throughout the heathen world. Christ is the Great Physician, now as of old. As we see the prevalence of disease and misery, the unslumbering ills, the sightless and the blind, which the eye and which the eye might be light, the pain-sickled limbs filled with hot needles to kill the alleged demon which causes the sufferings, and the fevered bodies which are made ten times worse by the superstitious and bungling methods of treatment, our sympathies are profoundly moved, and we freely give and
labor that such agony may be alleviated. Medical missions, with their hospitals and dispensaries, strongly appeal to this motive, as do also educational missions, with their teaching of the principles of better living. The Gospel itself is essentially a dispensation of health and a motive, for it is plain that the sufferings of men are diminished, and the dignity and the worth of life increased, by the application of the principles of Christianity to human society.

(b) The intellectual motive: Missionaries have vastly increased the world's store of useful knowledge. They have opened to view hitherto vaguely known lands. They have probably done more than any other class of men to extend knowledge of the earth's surface and its inhabitants. Geography and ethnology, entomology and zoology, botany and kindred sciences, gratefully enroll the names of missionaries among their most successful explorers, and many thoughtful men appreciate this and give their sympathy to the cause which the missionaries represent.

(c) The commercial motive: Some business men frankly assign this as the reason for their gifts. The missionary in the typical heathen land is the representative of a higher civilization. His teaching and his manner of living incidentally, but none the less really, create wants and introduce goods. He lights his house with a lamp and straightway the house of the natives become dissatisfied with a bit of rag burning in a dish of vegetable oil. So foreign lamps are being used by millions of Chinese, Japanese, Siamese, and East Indians. The missionary marks time with a clock, and German, English, and American firms suddenly find a new and apparently limitless market for their products. He rides a bicycle on his country tours, and the result is that to-day the bicycle is as common in the cities and many of the villages of Siam and Japan as it is in the United States.

(d) The medical motive: This is closely allied to the preceding motives. In the ways that have been indicated, and in others that might be specified, the missionary is "the advance agent of civilization." As the product of centuries of Christian civilization, with all its ethical and social ideals, he appears in a rude village in Africa. He opposes slavery, polygamy, cannibalism, and infanticide. He teaches the boys to be honest, sober and thrifty, the girls to be pure, intelligent and industrious. He induces the natives to cover their nakedness, to build houses, to till the soil. He deals with the intellectual, moral and civic virtues. His own home and his treatment of his wife and daughters are an object lesson in a community which had always treated women as a slave. The inertia of long-established heathenism is hard to overcome, but slowly it yields to the new power, and the beginning of civilized society gradually appears.

(c) The political motive: If public opinion be the main motive, for it will probably be the most successful missionary of all time. The British officials in India have been outspoken in their praise of the civilizing influence of missionaries in that country. Darwin's testimony to the usefulness of missionary work in the South Seas is another classic illustration, and hundreds of others might be cited. Dr. James S. Dennis has collected a vast mass of facts bearing on this subject in his noble volumes on Christian Missions and Social Progress, and the cumulative power of this class of evidence is doubtless a large factor in the growing respect for missionaries, and for public opinion in favor of missions.

(e) The historical motive: With many people of the utilitarian type, this argument from results is the most decisive. They want to see that their money accomplishes something, to know that their investment is yielding some tangible returns. The missionary has failed to substantiate their interest in apparently unproductive fields, but comparatively easy to arouse enthusiasm for fields in which converts are quickly made. The churches are eager and even impatient for results. Fortunately, in many lands results have been achieved such a magnitude as to satisfy this demand. But in other lands, not less important, weary years have had to be spent in preparing the soil and sowing the seed, and hard-working missionaries have been half dishartened by the inistent popular demand for actual results of baptisms before the harvest time has fairly come.

There is, apparently, a growing disposition to exalt this whole class of motives. The basis of missionary appeal has noticeably changed within the last generation. Our humanitarian, commercial, and practical age is more impressed by the physical and temporal, the actual and the utilitarian. The idea of saving men for the present world appears more strongly than the idea of saving them for the next world, and missionary sermons and addresses give large emphasis to these motives. We need not and should not undervalue them. They are real. It is legitimate and Christian to seek the temporal welfare of our fellow-men, to alleviate their distresses, to exalt women and to purify society. It is, moreover, true and to the missionary entailed that one of the areas of the world's useful knowledge, introduces the conveniences and necessities of Christian civilization, and promotes wealth and power; while it is certainly reasonable that those who give should desire to see some results from their gifts and be encouraged and incited to renewed diligence by the inspiring record of achievement. But these motives are, nevertheless, distinctly secondary. They are effects of the missionary enterprise.
rather than causes of it, and the true Christian would still be obliged to give and pray and work for the evangelization of the world, even if not one of its motives. In fact, the missionary enterprise is not the only source of the church's power; he can preach the law of God.

What, then, are the primary motives of the missionary enterprise? The following may be briefly enumerated.

(a) The soul's experience in Christ: In proportion as this is genuine and deep will we desire to communicate it to others. The man who feels that Christ is precious to his own heart and that He has brought strength and blessing into his own life, is immediately conscious of an impulse to give these joys to those who do not have them. Expansion is a law of the spiritual life. The inherent and permanent susceptibilities must be cultivated. A living organism must grow or die. The church that is not missionary will become atrophied. All virile faith prompts its possessor to seek others. That was an exquisite touch of regenerated nature and one beautifully illustrative of the promptings of a normal Christian experience which led Andrew, after he rose from Jesus' feet, "to find first his own brother, Simon, and say unto him, 'We have found the Messiah.'"

No external authority, however commanding, can take the place of this internal motive. It led Paul to say: "Would God that I were like a man, under solemn obligation to preach the Gospel." It made him plead "with tears" that men would turn to God; to become "all things to all men, that he might by all means save some;" to speed from city to city, the burden of his preaching ever increasing. "We pray you in Christ's stead, ye be reconciled to God." Because this is one of the primary motives of missions, the cause chiefly depends, humanly speaking, upon the piety of the Church. Other motives may and often do help for longer or shorter periods. But the real and permanent susceptibilities must be cultivated. A spiritual experience with Christ so rich and joyous that it makes missionary effort the natural and necessary expression of its life.

(b) The world's evident need of Christ: The fact that the heathen are morally and spiritually deluded is not, of itself, sufficient to begin an overmastering and enduring desire to help them. But the fact that they need Christ, and that we have Christ, does beget such a desire in a rightly constituted mind. If we have any knowledge which is essential to the welfare of our fellow-creatures, we are under solemn obligation to convey that knowledge to him. It makes no difference who that man is, or where he lives, or whether he is conscious of his need, or how much inconvenience or expense we may incur in reaching him. If we can help him, we must get to him. That is an essential part of the foreign missionary impulse. We have the revelation of God that is potential of a civilization which benefits man, an education that fits him for higher usefulness, a scientific knowledge that enlarges his powers, a religious knowledge that elevates his suffrage, a moral above all, a relation to Jesus Christ that not only lends new dignity to this earthly life, but which saves his soul and prepares him for eternal companionship with God. "Neither is there salvation in any other. Therefore, we must convey this Gospel to the world. Christ has commanded us to go, but we should have had to go anyway. The missionary impulse in the breast of every true disciple would have stirred him to spontaneous action. Christ simply voiced the highest and holiest dictates of the human heart when He summoned His followers to missionary activity and zeal. We do not hear so much as our fathers heard of the motive of salvation of the heathen. That consideration appears to be gradually drifting into the background of our thoughts. We dwell upon the blessings of faith rather than upon the consequences of unbelief. And yet, if we believe that Christ is our life, it is difficult to avoid the conclusion that without Christ is death. Various statements and figures are used in the New Testament to express the condition of one who know not Christ, but whether they are interpreted literally or figuratively, their fundamental meaning is as plain as it is awful. Jesus came "to save," and salvation is from something. Nothing is gained but much is lost by ignoring facts, and the more, whether Christ to be with us or without Christ is a motive of the first magnitude for trying to save them.

(c) The command of Christ: "Go ye into all the world and preach the Gospel to every creature." If this were the only motive, foreign missionary work would be a mechanical performance, of stern duty, the missionary merely an obedient soldier. But taken in connection with the preceding motives, it adds to them the impressive sanctions of divine authority. For Christ's word is not a request. It is not a suggestion. It leaves nothing to chance, but is an order, covers extensive, unequivocal, ending all argument, silencing all cavil—a clear, peremptory, categorical imperative "Go." Such a command dispels all possible uncertainty, removes any misgiving, and, for those who need it, reduces the question of missionary effort to one of simple obedience to our Lord and King.

These are and ever must remain the supreme motives of the missionary enterprise. They have inherent and independent force. Whether men are civilly organized or not, whether they have, or as yet have not, whether present results are few or many, the Christian Church must continue its missionary work. The results of a hundred years of missionary effort are most encouraging, but if they were not, it would make little difference. The man who knows that he is working with Him, for God, and in obedience to God, is not controlled by worldly ideas of success. He is content to leave results with God, knowing that His Word will not return unto Him void. After Judson had been toiling for years in Burma without making a single convert, some one wrote to him regarding what the prospects were, and he flashed back, "As bright as the promises of God!" When ten years of labor in Bechuana had failed to accomplish any visible result, Mrs. Greaves, of Sheffield, wrote to Mary Moffat asking what she needed, and that heroic woman answered: "Send us a communion service." Temporary defeat has no power over the true missionary. With Lincoln, when taunted with the defeat of his plans, he exclaimed, "Defeat! if it were not one but one hundred defeats, I would still pursue the same unchanging course." To his own generation, Christ's life was a failure. So was Paul's, and Peter's, and Stephen's. But later generations saw the rich fruitage. Like them, the true missionary toils from motives which are independent of present results. If Jehovah is the only true God, the whole world ought to be told about Him. If Jesus Christ is our salvation, He can be the salvation of others, and it is our imperative duty to carry or send the good news to them. There may be questions as to method, but no objection lies against the foreign missionary.
enterprise which does not lie with equal force against the fundamental truths of the Christian religion.

The foreign mission cause is at some disadvantage as compared with the other enterprises in which the church is engaged in that it cannot make so strong an appeal to patriotism or self-interest. The foreign missionary impulse is really the Christ impulse. It is prompted by no selfish motive. It summons us to toil and sacrifice for races which are beyond our sight and touch, and for which we naturally feel but little concern; or they may be clinging to the old faiths and sometimes resent our well-meaning efforts. In these circumstances, foreign missions can effectively appeal only to those motives of spiritual experience and unselfish love and glad obedience which prompted Christ to seek a lost race. Indeed, the Master plainly declared to His disciples: "As the Father hath sent me into the world, so send I you into the world." But to these motives it does appeal as the wretchedness and guilt of old appealed to the heart of infinite love. The missionary advocate makes a grave mistake when he bases his appeal solely on financial needs. The fact that an enterprise wants money is not a sufficient reason why it should receive it, nor is the begging argument apt to secure anything deeper than the beggar's temporary desire. Our appeal should be based on those high motives which center in our relation to the Savior's love and presence and command. Paul said, "We preach not ourselves, but Christ Jesus the Lord; and ourselves our servants for Jesus' sake." "For Jesus' sake!" That is the spring of all holy living, of all noble endeavor, of all labor and achievement. "For Jesus' sake!" the missionary goes into distant lands. "For Jesus' sake!" he toils and prays for the salvation of his fellow-men. And "for Jesus' sake!" Christians at home ought to sustain those who go. The searching and tender words of Christ to Peter comprise the whole matter, "Lovest thou me? then feed my sheep." "Moukden. See Moukden.

"Mouilmen. See Maulmain.

"Mount Ayliff: A settlement in Cape Colony, South Africa, situated in Griqualand East, 105 miles S. W. of Pietermaritzburg. Station of the Episcopal Church in Scotland (1888), with (1903) 1 missionary, 1 native worker, 2 outstations, 2 places of worship, 2 day schools, and 29 professed Christians.

"Mount Frere: A settlement in Cape Colony, South Africa, situated in Griqualand East, 155 miles S. W. of Pietermaritzburg. It is also called Mbonda. Station of the Episcopal Church in Scotland (1890), with (1903) 1 missionary, 17 native workers, 12 outstations, 8 places of worship, 8 day schools, and 598 professed Christians. Station also of the UFS (1894), with (1903) 1 missionary and his wife, 29 native workers, 24 outstations, 1 place of worship, 8 Sunday schools, 11 day schools, and 760 professed Christians.

"Mount Silinda: A settlement on the eastern edge of Matabililand, Rhodesia, South Central Africa, situated in Melscotter district, about 150 miles W. S. W. of the Portuguese seaport of Beira. Station of the ABCFM (1893), with (1903) 3 missionaries with their wives, 2 native workers, 4 outstations, 1 day school, 1 Sunday school, 1 boarding school, 25 professed Christians, and 1 dispensary. It has also an industrial enterprise with 27,000 acres of land.

"Mount Tabor: A settlement in Zululand, Natal, South Africa, situated on the St. Lucia River, at the entrance to St. Lucia Lake. Station of the South Africa General Mission (1899), with (1903) 2 missionaries, one with his wife; 3 women missionaries, 1 native worker, 1 place of worship, 1 Sunday school, 1 day school, and 2 professed Christians.

"Moymambu: A village in Sierra Leone, W. Africa, situated in the Mendic country, about 25 miles S. E. of Rotifunk, on the railway from Freetown to Bo. Station of the UB, with (1901) 1 missionary and his wife, 1 woman missionary, 2 native workers, 1 place of worship, 1 Sunday school, 1 day school, and 1 Young People's society.

"Mozambique: Formerly called the Portugeuse West Africa. It is situated on a small coral island in latitude 15° 2', south, and was the original homeland of the Portuguese, having three strong forts. Since the abolition of the slave-trade, its export trade, principally with India, is of little importance. Population about 6,000, of whom about 300 are Europeans and as many more Arabs. Education and religion are under the control of the Roman Catholics, and are at a very low ebb.

"Zaafarpur. See Muzaafarpur.

"Mpangile: A station of the Berlin Mission Society in German East Africa, situated about 35 miles E. by N. from the northern extremity of Lake Nyasa. Statistics given under Mbyeyla's.

"Mpaupa: A settlement in German East Africa, situated in the Usagara region, about 32 miles W. by N. of Mbangwe Station. The CMS (1878), with (1903) 2 missionaries, one with his wife; 10 native workers, 8 day schools, 1 dispensary, and 219 professed Christians, of whom 66 are communicants. Society has spelled the name Mpwapwa, but, at the request of the local officials, in 1904 adopted the spelling Mpaupa.

"Mphome: A town in North Transvaal, Africa, south of Limpopo River. A station of the Berlin Mission Society (1878), with (1903) 1 missionary, 34 native workers, 15 outstations, 3 day schools, 1,801 professed Christians, of whom 1,180 are communicants.

"Mponda's: A village in British Central Africa, situated in Nyasaland at the issue of the Shiré River, from Lake Nyasa. The climate is healthy. Station of the UM (1896), with (1900) 4 missionaries, two of them with their wives; 2 native workers, 2 outstations, 2 places of worship, 2 day schools, 1 boarding school, and 27 professed Christians.

"Mpongwe Language: An African language belonging to the great Bantu family, and spoken by a large number of people in the coastal regions of the French Congo. It has been reduced to writing by missionaries with use of the Roman letters.

"Mputoli: A village in Cape Colony, South
Africa, situated in the Transkei district on the Indwe River, 28 miles S. E. of Queenstown. Station of the South African Baptist Mission Society, with 1 missionary and his wife and 1 woman missionary. Name sometimes written Mputola.

MALAWA. See Mwapa.

MALABANI: Station of the UM in German East Africa, situated in the Usambara region, about 30 miles W. S. W. of Tanga. It was established in 1875 and has been called Magila. The name Magila having now been applied to the whole district, the station has been renamed Malabani, which means "at the Cross." At present (1903) it has 4 missionaries, 12 elementary and 2 higher schools, and 1,071 professed Christians.

MAKAPERI: A settlement in German East Africa, in the Konde District, N. of Lake Nyasa, about 25 miles N. W. of the northern end of the lake. Station of the Berlin Missionary Society (1893), with (1900) 1 missionary, 4 native workers, 1 Sunday school, 1 dispensary, 1 day school, and 57 professed Christians. Name sometimes written Musakalei.

MUANG NAM: A town in Siam in the Laos district, situated on the Me Nan, about 125 miles E. of Cheung Mai. Station of the PN (1894), with (1903) 3 missionaries and their wives, 3 native workers, 1 Sunday school, 1 dispensary, 1 day school, and 57 professed Christians. Name sometimes written Nan.

MUANG PRAA: A town in Siam, in the Laos district, situated on the Me Yonz, about 65 miles S. E. of Lukawn. Station of the PN (1893), with (1903) 1 missionary and his wife, 2 native workers, 1 Sunday school, 1 dispensary, 1 day school, 1 boarding school, 1 dispensary, 1 hospital, and 220 professed Christians, of whom 120 are communicants. Name sometimes written Pre.

MUDEN: A village in Natal, South Africa, situated in the Weenen district on the Mooi River, about 12 miles N. W. of Greytown. Station of the Hermannsburg Missionary Society (1859), with (1903) 2 missionaries, one with his wife; 9 native workers, 3 places of worship, 3 day schools, 2 outstations, and 593 professed Christians, of whom 178 are communicants.

MUFINDI: A settlement in German East Africa, in the Kivu district on the N. of the Ngololo River, about 120 miles N. E. of the northern end of Lake Nyasa and about 420 miles S. W. of Dar es Salaam on the shore of the Indian Ocean. Station of the Berlin Mission Society (1899), with (1903) 2 missionaries, one with his wife and 15 professed Christians. The station will be removed soon to a more populous district.

MUHANGA: A settlement in German East Africa, situated on the Lukosse River, about 50 miles N. E. of Mufindi. Station of the Berlin Mission Society (1899), with (1903) 1 missionary and 4 outstations.

MULENBERG: A settlement in Liberia, West Africa, situated on the St. Paul’s River, about 46 miles N. E. of Monrovia. Station of the ELGS (1860), with (1903) 5 missionaries, two of them with their wives; 2 women missionaries, 6 outstations, 6 day schools, 2 boarding schools, 1 dispensary, 1 industrial school, and 110 professed Christians.

MUĐEN: A town, the capital of Manchuria, China, situated in the province of Liao-tung, on the Hun-ho, 110 miles N. E. of New-chwang. It was the former residence of the present reigning dynasty of China, dating from 1625. The streets are broad and straight. Population, 250,000. Station of the UFS (1875), with (1903) 5 missionaries, three of them with their wives; 2 women missionaries, 21 places of worship, 10 Sunday schools, 11 day schools, 1 female training institute, 1 dispensary, and 1,540 professed Christians. Station also of the Presbyterian Church in Ireland (1889), with (1901) 1 missionary and his wife, 2 women missionaries, 2 native workers, 4 outstations, 6 chapels, 1 Sunday school, 2 day schools, 1 theological college, and 79 professed Christians. Work in the college is supported conjointly with the UFS. Societies spell the name Mukden. The BFBS has an agent at this place.

MUKIMVIKA: A village in Angola, Africa, situated on the left bank of the Congo River at its mouth. Station of the ADMU (1882), with (1903) 3 missionaries, one with his wife; 2 native workers, 1 place of worship, 1 Sunday school, 1 day school, 1 hospital, and 1 dispensary.

MUKIMBUNGU: A settlement in Congo Free State, Africa, situated on the right bank of the Congo River. Station of the Swedish National Evangelical Miss. Association (1882), with (1901) 3 missionaries, one with his wife; 2 women missionaries, 17 native workers, 15 outstations, 1 place of worship, 1 Sunday school, 1 boarding school, 1 college, 1 dispensary, and 392 professed Christians.

MULANGO: A settlement in British East Africa, not far from Mt. Kenia. Station of the Leipzig Mission Society (1901), with (1903) 2 missionaries and their wives, 27 native workers, 3 Sunday schools, 7 day schools, 1 boarding school, and 800 professed Christians, of whom 436 are communicants.

MULLENS, Joseph: Born in London, England, 1820; entered Coward College, 1837; graduated, 1841, at the London University; ordained, 1843, and embarked the same year for Calcutta as a missionary of the LMS. In 1865, after visiting the missions in India and Ceylon, he sailed for England to be assistant secretary with Dr. Tidman. On Dr. Tidman’s death he became foreign secretary of the LMS. In 1870 he visited the United States as delegate of the London Society to the American Board. In 1873 and 1874 he visited Madagascar, and in 1875 he was engaged in missionary work. In 1875 Dr. Mullen accompanied several missionaries to assist in the organization of a mission on Lake Tanganyika, Central Africa. But at Mwapa he was overcome by exposure and fatigue and died of peritonitis July 10. The degree of doctor of divinity was conferred upon him in 1851 by Williams College, Mass., and in 1868 by the University of Edinburgh. He published Twelve Months in Madagascar, A Brief Review of Ten Years’ Missionary Labor in India between 1852 and 1863, London and Calcutta. Compared in their Heathenism, Privilege and Aspect.
190 miles S. W. by W. of Lahore, about 7 miles from Chenab River. The commercial center of the region. It has silk, cotton and carpet manufactues. A very ancient town existing at the time of Alexander the Great. Altitude, 420 feet. Climate warm and rainfall light. Population (1901), 87,394, of whom 43,000 are Muslims and 34,000 are Hindus. Station of the CMS (1856), with (1902) 2 missionaries, 4 women missionaries, 9 native workers, 1 place of worship, 1 day school, 1 boarding school, and 115 professed Christians, of whom 37 are communicants. 

MULTANI LANGUAGE: An Aryan language of the Indic branch, used by the people of Multan and Dernar, of Musaffargarh, and of the state of Bhawalpur. It is also spoken by the Kheth tribe in the territory behind the Suleimani Mountains. Altogether about two and a half millions of the people of Northwestern India speak Multani. They themselves call it Jagdalli or Jatki, the name Multani being given to it by neighboring tribes. The language is allied to the Punjabi and to the Sindhi. The Arabic character is used in writing it.

MULVI BAZAAR: A village in Assam, India, situated in Sylhet district, about 30 miles S. W. of Sylhet. Station of the WCM, with (1903) 1 missionary and his wife, 15 native workers, 1 boarding school, and 15 professed Christians. Name sometimes written Manvi Bazaar.

MUNGELI: A town in the Central Provinces, India, situated 135 miles S. E. by E. of Bilaspur. Population, 5,000. Station of the FCMS (1887), with (1901) 1 missionary and his wife, 10 native workers, 1 outpost, 10 Sunday schools, 1 place of worship, 1 female training school, 1 dispensary, 1 hospital, 1 medical class, 1 lepers' institute, and 90 professed Christians. Station also of the Mission to Lepers in India and the East (1897), with 1 place of worship and 1 lepers' home for untainted children of lepers.

MUNSON, Samuel: Born at New Sharon, Me., March 23, 1804; graduated at Bowdoin College 1829; president of the Theological Seminary 1832; ordained October 10; sailed June 10, 1833, as a missionary of the ABCFM, with Rev. Henry Lyman, as under instructions to explore the East Indian Archipelago, and reached Batavia September 30. In April, 1834, they undertook to visit the Batta country by Sumatra, and were both killed. For an account of their expedition and death, see the article on Mr. Henry Lyman.

MURHU: A village in Bengal, India, situated in Chota Nagpur, 30 miles S. by W. of Ranchi. Station of the SPG, with (1903) 22 native workers, 1 place of worship, 6 day schools, 1 boarding school, and 2,071 professed Christians, of whom 1,028 are communicants.

MURRAYTOWN: A village in Sierra Leone, Africa, situated about 5 miles W. of Freetown. Station of the UMFC (1891), with (1901) 1 missionary and his wife, 12 native workers, 1 outpost, 2 places of worship, 2 Sunday schools, and 511 professed Christians.

MUSCAT. See Mascat.

MUSF: A city of Eastern Turkey, 83 miles southeast of Erzeroom, in a large plain, one of the most populous of the white men. The population is Kurdish and Armenian. The Kurds are very fierce, and treat the Christians most oppressively. The district of Sassun, notorious as the scene of horrible massacres of Armenians in 1893, and again in 1904, lies S. W. of Muf in the same administrative division. The name is also written Musayf.

MUSIC AND MISSIONS: Missions touch music at two points: 1. The missionary as a man of culture studies the poetry and songs of the people among whom he labors. 2. After a mission has become successful the newly formed churches are helped in their worship, especially in the department of Praise, and this demands a thorough knowledge of the foundation principles of music.

As to the study of the music of savages by missionaries we may cite some examples. Rev. A. L. Riggs has made a very interesting study of Dakota music, publishing specimens of songs of love and war, songs of sacred mysteries and social songs. They are extremely simple, and abound with the repetitions so natural to untutored minds. A widow's lament expresses the deepest heartweariness and despair. Their music is also very simple. It consists of melody alone, with rude accompaniment, mainly for marking time. The men sing, while the women sound one single falsetto note ai, ai, ai, keeping time with drums. They do not appreciate harmony. The minor key is their favorite, the major key occurs in their war songs. They use the instrument of the rattle, and pipe. The drum is more than a foot in diameter, and from three to ten inches deep. The rattle is made of segments of deer hoops tied to a tapering rod of wood. The conjurer uses a gourd shell with a few pebbles inside. The usual pipe is made of a sumac flag-socket, nineteen inches long, with a diameter of five-eighths of an inch. A peculiar partition forms the whistle. Six notes are burnt on the upper side, and a brass thimble forms the mouthpiece. The pitch is A prime, changed to G prime by a seventh hole. Sometimes the pipe is extreemely long as the long wing or thigh-bone of a crane or swan. Dakota music is rude, but its power is measured by the adaptation of its wild melody to savage life in the wilderness, where in the misty moonlight the night air bears the plaintive sounds, with the hollow bass of the drum-beat, the tense notes of the reedy whistles, and where each bush may hide an enemy.

Dr. S. Wells Williams has given in his Middle Kingdom a graphic description of Chinese music and musical instruments. However small their attainments in both theory and practise, no nation gives to music a higher place. Confucius taught that it was essential to good government, harmonizing the different ranks in society, and causing them all to move on in unison. The Chinese have a strong desire to develop instrumental rather than vocal music.

The names of the notes, ascending regularly from the first line of the staff to the third space above it, are as follows: first line, ho; first space, z; second line, chu; second space, chung; third line, fan, lin, tu; third space above, chi. From this the twelve tones are given, the last being on the third space above.

The real tone cannot be represented by our staff. The second octave is denoted by affixing the sign sin, a man, to the simple notes. No chromatic scale exists—at least no instrument is made to play it. Flat and sharp are taken as separate tones.

There are two kinds of music in China—the northern and the southern. The octave in the former seems to have had only six notes, while the eight-tone scale prevails in more cultivated circles. Music is written for only a few in-
struments, and the notation good for one is useless for another, because marks meaning to push, fillip, hook, etc., are added to denote the mode of playing; indeed, the combinations are so complicated that the Chinese usually play by ear. All music is in common time; no triple measures are used in machine or in popular among the natives. The ti kin (crowning lute) has a coconut shell for its body, and is even more dissolvent than the last. The yang kin is an embryo piano, consisting of brass wires of different lengths, tuned at proper intervals, and fastened on a sounding board. The sounds are very attenuated. The sang, in like manner, is an embryo organ, a cone-shaped box, with a mouthpiece to blow in, and thirteen reeds of different lengths, inserted in the top, the valves of some opening upward and others downward. They are provided with holes also that may be opened or closed by the player. It is very ancient. Some think it the organ invented by Jubal (Gen. iv: 21). The Chinese think it more curious than useful.

Their wind instruments are numerous. The hwaung tih (flute) is twice the length of our pipe, and made of bamboo, and pierced with ten holes. The two near the end are not used. The mouth hole is one-third of the way from the top. The shu tih (clarinet) takes the lead in musical performances. It has seven holes, but no keys. Its tones are shrill and deafening, and therefore unpopular. A street musician fits a small clarinet, to his nose, slings a small drum under one shoulder, hangs a frame of four cymbals on his breast, and with a couple of monkeys sallies forth, a peripatetic choir and orchestra. The stem of the horn is retractable, like a trombone. There are other varieties, however.

The lo (gong) is the standard type of Chinese music. A crashing harangue of rapid blows on this, with a rattling accompaniment of drums, and a cracking symphony of shrillness from clarinet and cymbal, is their best ideal of music. They have heard good Portuguese music for ages, but have never adopted either an instrument or a tune.

A Chinese band makes the European think of Hogarth's "Enraged Musician." Each performer seems to have his own tune, and in an evening concert an harmonious blend of these tunes, when they keep good time, only two of them are tuned on the same key.

The Rev. Dr. Eli Smith, of the American Syria Mission, found that hymns composed in Arabic measures could seldom be sung in our tunes, and our musicians were puzzled by the intervals in Arab music. On the other hand, Arabs could not repeat our scale. A treatise on Arab music by Michael Mishakah of Damascus explained the difficulty; and from that, with Rosegarten's edition of Isaiah's Book of Odes, and Parry on Ancient Arab Music, Dr. Smith wrote a valuable paper which was published in the Journal of the American Oriental Society. The principles are quite near to those of Persian and Turkish music also. He says that sounds are naturally divided into groups, and rhythmic intervals are tuned in fours, as fourths to each other, and their sound is low and dull. The yeuh kin, or full-moon guitar, has four strings in pairs that are unison with each other, with an interval of a fifth between the pairs. It is struck briskly, and used for lively tunes.

The two-stringed fiddle is merely a bamboo split stuck into a bamboo cylinder, with two strings fastened on pegs at one end of the stick and passing over a bridge on the cylinder to the other end. They are tuned at intervals of a fifth. As the bow passes between the two strings much care is needed in playing not to scrape the wrong string. The harsh grading of this wretched instrument is peculiar among the natives.
The first of the third octave is remel tāty, the response to navaa. The next octave is the response to the response of navaa, and so on ad infinitum. Sometimes the instrument used is the bagha, from which they say the base to jeghārāg, to sīghāh, and so on through the list, then the base to the base of jeghārāg, etc. The intervals between these notes are unequal. They are divided into two classes, one containing four quarters and the other three.

The first class contains from jeghārāg to āshēran, from rest to āshēran, and from jeghārāg to āshēran. The latter from āshēran to ārak, from ārak to rest, from ārak to sīghāh, and from sīghāh to jeghārāg. The first class then has three intervals with twelve quarters, and the second four intervals with twelve quarters. The modern Greeks divide the intervals into sets of six, making three classes. One class, corresponding to the first of the Arabs, divides the interval into twelve semitones; the second class divides it into nine semitones, and is from ārak to sīghāh, and from ārak to āshēran. The third class, from sīghāh to jeghārāg, and from āshēran to ārak, has six semitones each. So their octave contains seven intervals and sixty-eight seconds. The Arab and Greek scales coincide only at four out of the sixty-eight seconds.

This is the substance of only four of the thirty-five pages of the paper. Chapter II. describes Arab melodies now in use, and Chapter III. is devoted to musical rhythm, and Chapter IV. to musical instruments, describing stringed instruments like el ud (literally the wood, whence our word "flute") the Arab guitar, the kemènej, or Arab fiddle, with a coconut shell for its body, like the Chinese ti kín; the tambur, a kind of mandolin, and the kamán, corresponding to the yang kín of the Chinese orchestra, only, it would seem, a better instrument. Then of wind instruments, the nay or flute, kercít, mizmar, sanúlì, urghán (organ, see Chinese sang), and yēnāh.

In India, music was formerly much more scientific than at present. There idolatry has degraded music, and the martial music of the country has changed with its government. Its religion now has little to do with music, except in the weekly or monthly services, the chanting of hymns or the bells of the large temples. Operas are unknown, and theatrical music is of a low order. Marriages furnish the chief occasions for musical display. There are many kinds of musical instruments, as drums, trumpets, horns, cymbals, hautbois, and violins, but the performers have little skill and less taste. The wedding orchestra varies from six to twenty performers. Singing is an accomplishment of women of doubtful morality, who are much employed for this purpose by the wealthy.

Christianity is changing all this, not generally. It is true, but gradually and permanently, for the native convert must give vent to his new joy in songs of praise, and they do this not only in the church, but also in their families and when alone. Even before conversion, music does much to prepare the way.

A favorite and most successful mode of introducing the Gospel in western India is the kirtan, t. e., solo singing by native evangelists with orchestral accompaniment. In September, 1889, Rev. Mr. Bruce of Satara visited Wai with his kirtan choir. The people crowded to hear, especially the women and children, and hundreds stood outside of the building in the rain, and listened for the first time to the way of salvation through a Redeemer. The whole city was moved, and Christ was the great topic of conversation for many days.

Rev. H. Ballantine, called the Dr. Watts of the Mahatta Mission, prepared a hymnal for the churches and schools of the province which met with great acceptance among the people.

Rev. E. Webb was an enthusiast in his researches into the laws of Tamil poetry. It is extremely elaborate in its rhythmical construction. In 1853 he published a Tamil hymn-book, containing hymns in native meter, children's hymns and chants with music, but the largest part of the volume was made up of hymns in native meters. Many copies were taken at once by the English missions in Tanjore and Tinnevelly, and singing was introduced in congregations of the American missions in places where it had been unknown before. An edition of 2,000 copies was soon exhausted, and a new one was issued in 1858. The people hear listlessly the most important truth in prose, they give eager attention to the same truth when versified and sung. In October, 1860, Mr. Webb gave an account of Tamil versification to the American Oriental Society, defining the two kinds of syllables, then the feet and the stanzas in which they were combined. The natives could see no measure in our verses, or melody in our music, yet hymns written in their own mode and sung to their melodies are extremely popular. He read some of them in Tamil with elaborate rhyme assurance and alliteration. He described also the music of the Hindus, known all over India under the same Sanskrit titles, and indicated its relation to the classical period and to the present. Many of the tunes have appeared for centuries, those of the best periods still exist, and for these the hymns were composed.

Tho in other missions there may not have been the same zeal for native music, yet in them all, as soon as men receive the light of the knowledge of the glory of God in the face of Jesus Christ, they feel impelled to praise the name of the Lord, and missionaries are glad to assist the effort to praise as soon as the spirit of praise appears.

It is interesting to look over the record of the beginnings of work on this line in the various missions. In Turkey, tho at that time they had few hymns ready for use, yet they could not wait to prepare more, but in 1850 issued an Armenian hymn-book of only 55 pages. This was followed in 1853 by one in Armeno-Turkish, t. e., Turkish in Armenian letters, of 112 pages, and the next year saw an Armenian Hymn and Tune Book of 300 pages, so rapidly grew their hymnology. That same year (1854) the Greek hymn-book appeared, of 100 pages, the 16 pages of hymns had been printed as early as 1833. All these were 16mo, but in 1855 appeared a work on church music, in Armenian, of 44 pages, 8vo. Then in the same language a hymn and tune book, and a children's was published in 1860, 40 pages 8vo. This was followed by 24 8vo pages of additional hymns and music in 1865. It seemed as tho good men kept on composing hymns, and, as fast as they did so, the churches could not wait, but had them printed for use at once. Next year (1866) appeared a hymn-book in Arabic-Turkish, t. e., Turkish in Arabic type. The following year four hymns were printed on one 8vo sheet, and in 1866 a supplement to the Armeno-Turkish hymn-book, of 88
pages 16mo, made its appearance. Next came an Armenian Sunday-school hymn-book of 134 16mo pages, followed next year by a Sunday-
school hymn and tune book in the same language, of 128 pages, and another in 1887 of 32 pages, a volume of
Armenian hymns and prayers of 192 pages 16mo.
The same year welcomed a Greek-
Turkish hymn-book of 264 16mo pages, and a second vol-
ume of 210 pages.
1887, the Armenian hymn-book had grown to 426 pages, and four years later a second edition con-
tained 430 pages. This was followed by a sup-
plement of 56 8vo pages to the Armenian hymn
and tune book in 1877, and as tho that was not
enough, an appendix of 16 pages more was issued
the same year. Such a list of publications indicates an abound-
ing spiritual life that made what would otherwise be the driest of statistics
an occasion of great joy to all who love the prosper-
ity of Zion. In Bulgarian, three pages of
hymns and tunes were printed in 1861, the year
following a hymn-book of 24 12mo pages, and in
1865 a hymn and tune book of 64 8vo pages.
The hymn-book in 1872 had grown to 154 16mo pages.
In Syria, while the mission was still
under the care of the American Board, 200 pages
of versified Psalms were printed about 1868. The
same year gave 200 pages of children’s hymns to the
missionaries, the book and before the mission passed
into the hands of the Presbyterians a hymn-book
appeared, first of 300 pages, and after that of 500.
About 1874 a hymn and tune book was printed,
containing an introduction teaching how to read
the classics. This was afterwards printed separately, 30 pages 8vo. Since then
hymns have been prepared to suit the Arabic tunes,
and are now published with the tunes. A curious
feature of these hymns and tune books is that the
music has to be reversed to suit the Arabic system
of writing from right to left. In 1822, the Psalms in verse were printed for the use of the United
and Reformed Missions, hymns alone, 400 18mo pages;
with tunes, 500 12mo pages; and with
lyric Sol Fa notation, 600 12mo pages. In 1885 a
new 8vo hymn and tune book, containing 327
hymns and tunes, was prepared by Rev. Samuel Jessup and Rev. George Ford, and a sec-
ond edition was called for in 1889. A hymn-
book without tunes appeared in 1885, of 418
pages 18mo. This advanced to a second edition in 1887, and a third in 1889, showing a very
encouraging demand for such a work.
In the Persian Mission the hymn-books have
gone through several editions. The last, issued in
1886, has about 300 hymns, mostly transla-
tions, but adapted to the expression of Christian
feeling in Persian, as also to the wants of the young in their Oriental homes.
Music has been taught by the missionaries.
The popular tunes are those used in congrega-
tions in the United States. The chants of the
ancient Syrian and ancient Armenian are used in
regular worship, and are very popular. The
words, of course, are in the vernacular, and so the
congregation can join. They are used espe-
cially in chanting the Psalms, and also some other portions of the Scripture, such as are found in
books for responsive reading at home.
MUSKOKI. See Creek.
MUSOOREE: A town and sanitarium in the
United Provinces, India, situated in the district
of Dehra Dun, 78 miles E. of Ambala, and 7 miles
N. E. by N. of Dehra, forming practically one
station with Landaur. Population (1891), 5,100.
Station of the CMS (1894), with (1903) 2 mission-
aries, one with his wife; 1 native worker, 1 place
of worship, 1 day school, and 81 professed Chris-
tians. Station also of the ME, with (1902) 1
missionary and his wife, 10 native workers, 2
places of worship, 2 Sunday schools, 1 theological
class, and 282 professed Christians, of whom 126
are communicants. Societies write the name
Muskouri.
MUTTRA: A town in the United Provinces,
India, situated on the right bank of the Jumna
River, 23 miles N. N. E. of Bhartapur. This
place was mentioned by Ptolemy as Modouo
of the gods. Population (1901), 60,042, of whom
48,000 are Hindus and 10,500 are Muslims.
Station of the CMS (1893), with (1903) 1 mis-
missionary and his wife, 10 native workers, 1 out-
station, 3 Sunday schools, 2 day schools, and 35
professed Christians, of whom 18 are commu-
icants. Station also of the CMS (1878), with
(1903) 2 missionaries, 2 women missionaries, 20 native
workers, 1 place of worship, 2 day schools, and 64
professed Christians, of whom 28 are communion-
cants. Station also of the ME, with (1903) 1
missionary and wife, 2 women missionaries, 44
native workers, 4 places of worship, 2 Sunday
schools, 8 day schools and 731 professed Christians,
of whom 454 are communicants.
MUTUNGO: A village of Uganda, Africa, situ-
ated near Mengo, Uganda. Station of the CMS
(1902), with 2 missionaries and 1 industrial
institute.
MUYALAPAD: A town in Madras, situated
30 miles N. E. of Jamulamadugu, on a branch
of the Penner River. Station of the SPG (1855),
with (1902) 1 missionary, 80 native workers, 43
places of worship, 33 day schools, and 2,893 prof-
essed Christians, of whom 951 are communicants.
MUZAFFARNAGAR: A town of Muzaffarnagar
district, United Provinces, India, situated 30
miles N. of Meerut. Population, 18,200, Hindus,
Mohammedans, Jains, and a few Christians.
Climate formerly very unhealthy and malarious,
but lately, owing to modern sanitary improve-
ments, it has been made much more salubrious.
Station of the ME, with (1903) 28 native workers,
1 place of worship, 4 day schools, 16 Sunday
schools, and 1,656 professed Christians, of whom
319 are communicants. Station of the Reformed
Presbyterian Church of Scotland, with (1901) 1
missionary, 3 native workers, 2 outstations, 1
place of worship, 1 Sunday school, 1 lepers’ asy-
ium, and 195 professed Christians.
MUZAFFARPUR: A town in Bengal, Indis, 35
miles north-northeast of Patna. Population,
49,000, of whom 35,000 are Hindus. It is well
built and clean, with good schools, temples, cour-
tehouses, and other public buildings. Has a large
trade. Station of the Gossner Mission Society,
with (1903) 1 missionary, 1 native worker, 1 Sun-
day school, 1 day school, 1 orphanage, and 90 prof-
essed Christians. Society spells the name
Muzaffarpur. Station also of the ME, with (1903)
16 native workers, 3 places of worship, 7
Sunday schools, 2 day schools, and 328 professed
Christians, of whom 238 are communicants.
MVENYANE: A settlement in Cape Colony,
South Africa, situated in Griqualand East, 23
miles W. of Kokstad. Station of the Moravian
Missions (1888), with (1903) 3 missionaries, two of
them with their wives, 18 native workers, 1 place
of worship, 1 Sunday school, 3 day schools, 1 theological class, and 102 professed Christians.

MYUMI: A settlement in German East Africa, situated in the Chigogo District, about 26 miles W. by N. of Mpasswa. Station of the CMS (1883), with (1903) 1 dispensary and his wife, 1 native worker, 2 outstations, 5 day schools, and 2 professed Christians.

MWENA: A settlement in the Congo Free State, Africa, situated near the headwaters of the Cualaha, about 25 miles S. W. of Lake Mwena. Station of the PB, with 2 missionaries, one of whom is his wife.

MWENZO: A settlement in British Central Africa, situated on the Stevenson Road, about 100 miles W. by N. of Karonga, on the W. shore of Lake Nyasa. Station of the UFS, with (1903) 1 missionary and his wife, 2 native workers, 4 outstations, 5 day schools, 1 dispensary, and 14 professed Christians.

MYINTGAN: A town in Burma, British India, situated on the left bank of the Irawadi River, 60 miles N. W. of Meiktila, with which it is connected by railroad. Population, 19,000, of whom 17,000 are Buddhists. Station of the ABMU (1887), with (1903) 2 missionaries and their wives, 8 native workers, 1 Sunday school, 1 day school, 1 dispensary, 1 hospital, and 27 professed Christians.

MYITKYINA: A town in Burma, British India, situated in the Kachin region at the extremity of the railway, 75 miles N. by E. of Bhamo. Station of the ABMU (1894), with (1903) 1 missionary with his wife, 5 native workers, 2 outstations, 2 places of worship, 1 Sunday school, 1 boarding school, 1 day school, and 150 professed Christians, of whom 60 are communicants.

MYMENSINGH. See MAINANSING.

MYPURU. See MAINPURU.

MYOSORE: A large and important native state in South India. Its territory is entirely surrounded by the British dominions belonging to the presidency of Madras. It lies at the point where the ranges of the Western and Eastern Ghats come together, and most of its territory is on the elevated plateau lying between these ranges. Its limits of north latitude are 11° 40' and 15°, and of east longitude 74° 40' and 78° 30'. The area is 29,444 square miles, and the population, 5,539,399, according to the census of 1901. Its surface is much broken by rocky hills and ravines; the drainage of the country is almost wholly to the east; in the northwest one river falls in a fine cascade over the precipitous wall of the Western Ghats, and seeks the Indian Ocean. Otherwise the streams all reach the Bay of Bengal through the Tungabhadra on the north, the Kaveri on the south, and several smaller rivers between these two more important streams. These rivers, like almost all those of India, while useless for navigation, support large systems of artificial irrigation. Mysore was included in the territories ruled from time immemorial by old prehistoric Hindu dynasties of South India, whose existence can dimly be traced in the uncertain light of early Indian times. The last of these dynasties was overthrown by the Mohammedans in 1565. As the latter in turn began to lose their power a Hindu chief seized the fort of Seringapatam in 1610, and became the founder of the present Mysore principality. The Hindu rulers were displaced by Mohammedans under Haider Ali in the latter part of the 18th century. But after the English finally defeated his son, Tippu Sahib, in 1799, they replaced the old Hindu family on the throne of Mysore.

Of the entire population the Hindus amount to nearly 95 per cent., Mohammedans to a little less than 5 per cent. The total number of Christians is given as 34,402. Of these, 28,600 are native converts. About one-fourth of the Christians are Protestants, the others Roman Catholics. The language almost universally used is Kanarese. The cultivation of the Kanarese is greatly indebted to the missionaries; grammars and dictionaries, a translation of the Bible and the beginnings of a worthy native literature are due to missionary labor.

The first Protestant mission in Mysore was that of the Society for the Propagation of the Gospel, established at Bangalore in 1817. In 1820 the London Missionary Society planted a station at the same city. The Hindu government seems to have been unfriendly to the work of the missionaries, and opportunities for preaching in Kanarese, the vernacular of the people, were at first greatly curtailed by this fact. The first few years of the mission were not prosperous, but since its earlier difficulties have been overcome, it has had a career of much success. The Wesleyans also entered Mysore, planting their principal station in the city of that name; shortly after the London Society entered Banga lore. Both these missions have now many stations throughout the state.

MYOSORE: A town, capital of the native state of Mysore, India, situated 10 miles S. W. of Seringapatam. In 1542 a fort was built here. Population (1901), 68,111. Station of the CEZ (1892), now temporarily vacant. Station also of the WMS, with (1903) 4 missionaries, three of them with their wives; 11 native workers, 8 outstations, 12 places of worship, 7 Sunday schools, 27 day schools, 2 boarding schools, 1 theological class, and 270 professed Christians, of whom 211 are communicants.

NAAS. See NASS.

NABLUS. See NASS.

NABLUS: A town in Palestine, Turkey, situated in a verdant vale, 30 miles N. of Jerusalem and between Mt. Ebal and Gerizim. It stands on the site of Shechem of the Old, and Sychar of the New Testament Scripture. Population, 16,000. Station of the CMS (1876), with (1903) 1 missionary and his wife, 2 women missionaries, 12 native workers, 4 outstations, 1 hospital, and 328 professed Christians, of whom 153 are com-
municants. Some write the name Nabulus. Station also of the BMS (1888), with (1903) 1 missionary and his wife, 8 native workers, 4 outstations, 1 day school, and 129 professed Christians.

NAIDI. See NARIAD.

NAGANO: A town in Hondo, Japan, situated 94 miles W. by N. of Nikko. It is near a great Buddhist temple, which stands in much the same relation to the town as the temple of Diana did to Ephesus, since the prosperity of the place depends upon the number of pilgrims to the shrine. Population (1898), 31,519. Station of the Church of England in Canada (1892), with (1901) 3 missionaries, 1 with his wife; 1 woman missionary, 10 native workers, 6 outstations, 50 professed Christians, 1 place of worship, 1 dispensary, 1 hospital. Station also of Canada Methodist Missionary Society (1891), with (1901) 3 native workers, 4 outstations, 5 places of worship, 3 Sunday schools, and 63 professed Christians. Station also of the RCA (1894), with (1903) 1 missionary and his wife, 3 native workers, 2 outstations, 1 place of worship, 4 Sunday schools, and 80 professed Christians.

NAGARKOIL: A Christian village in Travancore, India, situated 40 miles S. W. from Nainool, and 62 miles from Kottayam. Station of the LMS (1899), with (1903) 3 missionaries and their wives, 2 women missionaries, 163 native workers, 77 outstations, 1 printing house, 89 day schools, 1 boarding school, 1 college, 1 orphanage, 11,336 professed Christians, of whom 2,055 are communicants. Post of the Salvation Army also. The name is also written Nagarekoil.

NAGASAKI: A town on the island of Kiu-shiu, Japan, the principal seaport of the western coast. It is picturesquely situated at the head of a small inlet four miles long and a mile wide. It has thus one of the finest harbors in the world. The surrounding hills, 1,500 feet high, and the numerous small islands with which the harbor is dotted add greatly to its beauty. The city is laid out with great regularity, in rectangles. A stream of water flows through it. There is a foreign concession, south of the main city, by an arm of the bay. For more than 200 years this was the only port where foreigners were allowed to land. A hospital was established here in 1861—the oldest now in Japan, and there is a fine government school, in which hundreds of young Japanese are instructed in European languages and sciences. The city is noted for its temples and the magnificence of its festivals. It is also an important coaling station. The climate is salubrious, and the city is a pleasant one in which to live. Population (1898) 107,422. Station of the CMS (1898), with (1903) 1 missionary and his wife; 3 women missionaries, 9 native workers, 1 outstation, 1 place of worship, 1 Sunday school, 1 boarding school, and 163 professed Christians. Station also of the ME (1899), with (1903) 2 missionaries and their wives, 2 women missionaries, 12 native workers, 3 outstations, 2 places of worship, 2 Sunday schools, 2 boarding schools, 1 theological college, and 570 professed Christians, of whom 366 are communicants. Station also of the RCA (1859), with (1903) 2 missionaries, 2 women missionaries, 18 native workers, 3 outstations, and 125 professed Christians, 1 place of worship, 3 Sunday schools, 2 boarding schools, and 1 college. Station also of the SBC (1896), with (1903) 1 missionary and his wife, 1 native worker, 2 outstations, 1 Sunday school, and 12 professed Christians.

NAGERCOIL. See Nagarkoil.

NAIAD: A city on the main island of Japan, situated on the railroad midway between Tokio and Kioto. It is in the midst of a broad, fertile plain, surrounded by thriving towns and villages, and is connected with Gifu by an almost continuous street of 20 miles. Population (1898), 244,145. It is the central point of the Nagoya district, and its importance as a base of operations is fully recognized. Such a strategic position for missions was early availed of by the Reformed (Dutch) Church (U. S. A.), but there is no representative of that mission there at present. Station of the PS (1887), with (1903) 2 missionaries and their wives, 2 women missionaries, 15 native workers, 28 places of worship, 11 Sunday schools, 1 boarding school, and 500 professed Christians, of whom 375 are communicants. Station also of the Methodists Protestant Church (1885), with (1903) 2 missionaries with their wives, 2 women missionaries, 8 native workers, 9 outstations, 1 place of worship, 12 Sunday schools, 1 theological school, and 600 professed Christians. Station of the CMS (1896), with (1903) 1 missionary and his wife, 2 women missionaries, 6 native workers, 2 outstations, 1 place of worship, 1 Sunday school, 2 day schools, and 1 kindergarten. Station also of the ME, with 3 women missionaries, 22 native workers, 7 outstations, 7 places of worship, 11 Sunday schools, 1 boarding school, and 516 professed Christians, of whom 338 are communicants.

NAGPUR: City in Central Provinces, India, 42 miles east-northeast of Bombay. It is a large city, but not a very fine one, although there are many relics of its former greatness still to be seen, and the handsome tanks and gardens outside the city and the pretty scenery give the place a very attractive appearance. Climate, healthy. Population (1901), 127,794, of whom 99,000 are Hindus and 21,000 Muslims. Station of the UFS (1845), with (1903) 4 missionaries, 3 of them with their wives; 50 native workers, 2 outstations, 1 place of worship, 10 day schools, 2 higher institutions, 1 orphanage, and 249 professed Christians. Name also written Nagpore.

NAMIBUROU: A village in Sumatra, Dutch East Indies, to which has been removed the Rhenish Mission station of Sigompulin. It lies in the Batang Toru Valley, about 20 miles E. N. E. of Siboga. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 47 native workers, 7 outstations, 7 Sunday schools, 9 day schools, and 2,990 professed Christians, of whom 1,403 are communicants.

NAIDPET: A town in Madras, India, situated on the Suvarnambudi River, about 15 miles S. of Gudur. Station of the Hermannsburg Mission Society (1867), with (1903) 3 missionaries, 2 of them with their wives; 21 native workers, 10 outstations, 7 Sunday schools, 1 theological school, 1 industrial school, and 950 professed Christians. Some write the name Nayudupeta.

NAIHYATI: A municipality in Bengal, India, situated on the Hugli River, about 25 miles N.
of Calcutta. Population (1891), 29,700, of whom 24,800 are Hindus. Station of the CEZ (1891), with (1903) 1 woman missionary, 11 native workers, and 4 day schools.

NAIN: A town in Labrador, situated on the E. coast. Has a good harbor. Station of the Moravian Missions (1771), being the first place occupied by them in Labrador. It now (1901) has 4 missionaries with their wives, 16 native workers, men and women; 1 day school, 1 place of worship, and 110 communicant Christians.

NANGOLAN: A settlement in Sumatra, Dutch East Indies, Malaysia, situated on the S. coast of Toba Island in Toba Lake. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 2 native workers, 2 day schools, 1 outstation, 1 Sunday school, and 43 professed Christians.

NAINI TAL: A town in Kumaon district, United Provinces, India, picturesquely situated on the banks of a lovely little lake which nestles among the spurs of the Himalayas. Favorite summer resort of Europeans from the plains. Altitude, 6,400 feet. Population (1891), 7,900, chiefly Hindus. Station of the ME, with 3 missionaries and their wives, 11 native workers, 1 place of worship, 2 Sunday schools, 3 day schools, 2 boarding schools, 1 society for young people, 1 Young Women's Christian Association, and 116 professed Christians.

NAKANONYI: A village in Uganda, Central Africa, situated 30 miles N. E. of Mengo. Station of the CMS (1895), with (1903) 1 missionary, 103 native workers, 1 day school, and 2,890 professed Christians, of whom 1,068 are communicants.

NAKAWN: A village in the Malay Peninsula, Siam, situated near the E. coast about 500 miles S. of Bangkok. Population, 10,000. Station of the PN (1900), with (1903) 2 missionaries, 1 with his wife; 3 native workers, 3 outstations, 93 professed Christians, 1 place of worship, 1 dispensary, and 1 day school.

NAKKO: A small group of islands belonging to the Malaysian group, W. of Sumatra, Dutch East Indies. Station of the Rhenish Mission, with 1 missionary and his wife and 300 professed Christians, of whom 62 are communicants.

NALGONDA: A town in the native State of Haidarabad, India, situated 57 miles E. S. E. of Haidarabad City. Station of the ABMU (1890), with (1903) 1 missionary and his wife, 1 woman missionary, 34 native workers, 20 outstations, 1 place of worship, 6 Sunday schools, 4 day schools, 1 boarding school, 1 hospital, and 964 professed Christians.

NAMACHA: A sanitarium and settlement in Portuguese E. Africa, situated in the Lebombo Mountains and serving for the missionaries occupying stations near the coast, as at Inhambane, etc. Station of the SPG, with 4 missionaries, 3 of them with their wives; 1 native worker, 1 boarding school, 1 day school, and 50 professed Christians, of whom 12 are communicants.

NAMAQUA LANGUAGE: A very difficult language of the African family and the Hot-tentot group, spoken in the German Southwestern Africa, north of the Orange River. The difficulty of the language is largely due to its containing four curious smacking sounds which Europeans do not readily understand or imitate. The language has been reduced to writing by German missionaries with use of the Roman letters. Many call this language the Nama, rather than the Namaqua language.

NAMKHAM: A town in Burma, British India, situated among the Shan, 56 miles E. S. E. of Bhamo. Altitude, 2,630 feet. Station of the CMU (1883), with (1903) 1 missionary with his wife; 15 native workers, 3 outstations, 3 places of worship, 2 Sunday schools, 1 day school, 1 boarding school, 2 dispensaries, 1 hospital, and 160 professed Christians, of whom 62 are communicants.

NAN. See MUANGAN.

NAN-CHANG-FU: A town in the Province of Kiangsi, China, on the right bank of the Kiang, 173 miles S. E. by S. of Hankow, the emporium of the porcelain manufacture E. of Lake Poyang. Station of the CIM (1898), with (1903) 1 missionary and his wife and 1 place of worship. Station also of the ME, with 2 missionaries and their wives, 9 native workers, 6 outstations, 2 Sunday schools, 7 Sunday schools, 26 places of worship, and 1,316 professed Christians. Station also of the PB.

NANDGAON: A town in the Central Provinces of India, situated in the native state of the same name, of which it is the capital, and 42 miles W. by S. of Raipur. Station of the Pentecost Banda of the World (1896), with (1903) 3 missionaries, 2 of them with their wives; 2 women missionaries, 2 native workers, 1 place of worship, 1 Sunday school, 1 book-room, 1 industrial school, 1 orphanage. Society writes the name Raj Nandgaon.

NANDIAL: A prosperous town in Madras, India, situated in the district of Kurnool, 108 miles E. by N. of Bellary. Population, 10,700; Hindus, 5,000; Muslims, 3,500. Station of the SPG (1854), with (1903) 3 missionaries, 110 native workers, 11 places of worship, 1 boarding school, 1 theological school, and 2,251 professed Christians, of whom 374 are communicants. Some write the name Nandyal.

NANG-WA: A town in Fo-kien, China, situated 20 miles N. E. of Yen-ping-fu. Station of the CEZ (1891), with (1903) 2 women missionaries, 2 native workers, and 1 day school.

NAN-KANG-FU: A town in the Province of Kiang-su, China, situated 12 miles S. by W. of Kiu-kiang. Station of the CIM (1887), with (1903) 1 missionary and his wife and 1 native worker. Some write the name Nan-k'ang.

NANKING: The "southern capital" of China; so called from its having been the seat of government during the Ming dynasty (1368-1644). It is situated in the Province of Kiang-su, on the south bank of the Yangtze, which makes a right angle, and borders the city on the north and west, 223 miles west of Shanghai, and almost midway between Canton and Peking. It formerly possessed one of the finest walls known, 20 miles in circuit, 70 feet high, 30 feet wide, and pierced with 13 gates. The interior of the city has much unoccupied ground. The famous Porcelain Tower, built by the Emperor Yung Loh (1403-28), was an object of the wonder and admiration of Europeans, until it was destroyed by the Tai-ping rebels during their occupancy of the city in 1853-6, at which time most of the public buildings were ruthlessly destroyed. It
was formerly a literary center, and was noted also for its industries. Cotton cloth, called nankeen, from the name of the city; satin, crêpe, and pottery were all manufactured. An arming representative of the Nankin market. European superintendence, where firearms and vessels of war are manufactured. Sir Henry Pottinger signed here the famous Nanking treaty in 1842.

Not far from the city are the tombs of the emperors of the Ming dynasty, with an avenue left representitive bordered by gigantic stone figures of men and animals.

By a treaty made with France in 1858, this port was thrown open, but practically no commerce is carried on with foreigners. The climate is warm and dry, and not unhealthy. Population (1901), 225,000. The importance of the city as a center for educational work has been appreciated by the Methodist Episcopal Church, who have established here a university with an endowment of $200,000. The Disciples of Christ are also about to erect a college. The medical work in connection with the Methodist Episcopal Hospital, said to be the largest in China, is most important. The missionary societies at work in Nanking and vicinity are the following: The American Adventists, APM (1890); FCMS (1891); ME, S. and W. (1876). These societies now (1903) have 46 missionaries, 225 men and women; 57 native workers, 12 places of worship, 16 day schools, 16 higher institutions, 3 hospitals and dispensaries, 1 printing house, and 711 professed Christians. The YMCA has a representative here.

NAN-PU-HSIEH: A town in the Province of Szech-ewan, China, situated on the river, about 12 miles S. by E. of Pao-ning-fu. Station of the CIM (1902), with 2 women missionaries and 1 place of worship.

NANUYOA: A village in the Central Provinces of Ceylon, situated about 26 miles S. of Kandy. Station of the CMS Tamil Coolie Mission, with (1903) 1 missionary, 87 native workers, 44 day schools, and 1,140 professed Christians.

NANZELA: A settlement in Northwest Rhodesia, Africa, situated in Barotseland, about 60 miles E. S. E. of Ndala and 160 miles N. of Victoria Falls. Station of the Primitive Methodist Missionary Society, with (1903) 1 missionary, 14 native workers, 1 outstation, 1 Sunday school, 1 dispensary, 1 day school, and 14 professed Christians.

NAORANGPUR: A town in Madras, India, situated in the Indravati River, about 18 miles N. E. of Kotpad. Station of the Brekum Missionary Society (1890), with (1903) 3 missionaries, 1 with his wife; 5 native workers, 4 day schools, 1 place of worship, 1 Sunday school, 2 orphanages, and 728 professed Christians, of whom 428 are communicants. Name also written Nowrangpur.

NARIAD: A town in Bombay, India, situated in the District of Kaira, 30 miles N. E. by N. of Cambay. It is the center of an extensive trade in rice. Pop. 28,000. Station of the ME, with (1903) 1 missionary and his wife, 103 native workers, 33 Sunday schools, 92 day schools, and 5,809 professed Christians. Some write the name Nadiad

NARAINGANJ: A town in Bengal, India, situated on the Lamcham River, 10 miles S. S. E. of Dacca. Population, 17,700, of whom 9,700 are Hindus and 7,000 Muslims. Station of the BMS (1898), with (1903) 1 missionary and his wife, 5 native workers, and 18 professed Christians. Society writes the name Narayangunge.

NARASARAPUDET: A town in Madras, India, situated in the Krishna District, about 230 miles north of the City of Madras. Station of the ABMU (1883), with (1903) 2 missionaries, 1 with his wife; 41 native workers, 121 outstations, 12 places of worship, 30 Sunday schools, 17 day schools, 1 boarding school, 1 dispensary, 1 hospital, and 4,956 professed Christians. Station of the ELGS also. Name is also written Narasavapetta.

NAROWAL: Town in the Punjab, India, situated in the District of Sialkot, 35 miles N. of Amritsar. It is famous for its leather-work. Population, 5,000. Station of the CEZ (1885), with (1903) 2 women missionaries, 9 native workers, 1 boarding school, 2 day schools, 1 dispensary, 1 hospital. Station also of the CMS (1859), with (1903) 1 missionary and his wife, 14 native workers, 1 place of worship, 1 day school, 2 boarding schools, and 1,366 professed Christians, of whom 50 are communicants.

NDARINYERI LANGUAGE: A language of the Papuan group, which is found among the surviving aborigines of South Australia. It has been reduced to writing with use of the Roman letters.

NARSAPUR: A town in Madras, India, in the District of Godavari, on the right bank of the river Godavari, 39 miles E. by N. of Masulipatam. Population, 1,600. of whom 1,500 are Hindus. Station of the PB, with (1900) 4 missionaries, 1 with his wife, and 5 women missionaries.

NARSINGHIPUR: A town in the Central Provinces, India, situated in the District of N., of which it is the capital, 50 miles W. S. W. of Jabalpur. It is an important trade center for the Narbada Valley. Population, 10,200 (Hindus, 7,600). Station of the ME, with (1903) 1 missionary, 22 native workers, 1 place of worship, 22 Sunday schools, 1 day school, and 253 professed Christians.

NASA: A village in German East Africa, situated on the lake coast at the Lake Vinderia, Nyanza, near its S. extremity. Station of the CMS (1888), with (1903) 2 missionaries, 1 of them with his wife; 6 native workers, 1 place of worship, 4 day schools, and 78 professed Christians, of whom 36 are communicants.

NASARAPUR: A town in Bombay, India, situated in the native State of Bhor, S. W. of Poona. Station of the Poona Indian Village Mission, with (1900) 12 missionaries, 5 women missionaries, 1 native worker, 1 Sunday school, 1 industrial school, 1 dispensary, 1 hospital, 2 orphanages.

NASIK: An important town in Bombay, India, situated on the Godavari River, 39 miles N. W. of Ahmadnagar. It is a famous resort of Hindu pilgrims, and has considerable manufactures of metal wares. Population, 21,700. The Christian village of Shanapur is one of its outskirts. Station of the CMS (1832), with (1903) 1 missionary and his wife, 35 native workers, 1 place of worship, 13 day schools, 1 boarding school, 1 industrial school, 2 orphanages, 1 widows' home, and 519 professed Christians, of whom 190 are communicants. Station also of...
the ZBM, with (1903) 3 women missionaries, 18 native workers, 1 outpatient, 6 day schools.

NASSIRABAD: A town and cantonment in Ajmere, India, situated about 18 miles from the town of Ahmedabad, on the Delhi, open road, which slopes eastward from the Aravalli Hills. Station of the UFS (1861), with (1903) 2 missionaries, 1 with his wife; 3 women missionaries, 1 outpatient, 69 native workers, 7 Sunday schools, 10 day schools, 2 high schools, 1 dispensary, 1 hospital, 1 dispensary, and 250 professing Christians.

NASSAU: A settlement in British Columbia, situated at the mouth of the Nass River, 50 miles N. E. of Port Simpson. Station of the MCC (1877), with (1903) 1 missionary and his wife, 1 Sunday school, and 96 professing Christians. Society calls the station Nas River.

NASSAU: The capital of the Bahamas Islands, West Indies, situated on the N. coast of the island of New Providence. Population, 11,000. Station of the WMS, with (1903) 3 missionaries, 11 native workers, 3 outstations, 6 places of worship, 7 Sunday schools, 6 day schools, and 814 professing Christians, of whom 749 are communicants.

NATAL: A crown colony of Great Britain in South Africa. It has an area of 42,000 square miles, and a bordering coast of the Transvaal and Zululand, annexed in 1897, and about 7,000 square miles taken from the Transvaal and annexed in 1903. The population, including the annexed areas (1901), is 953,000, that of Natal, including Zululand, being 925,118. The colony lies to the south of the Transvaal and Portuguese E. Africa, has a coast line on the Indian Ocean of about 350 miles, and is bounded south and west by Basuto-land and the Griqualand dependencies of Cape Colony. Utrecht and Vryheid, taken from the Transvaal, carry the northern boundary to the Pongola River.

The Drackenberg Mountains, from 9,000 to 10,000 feet high, separate it from Basutoland and the Orange River Colony. Piemtermaritzburg, one of the most delightful cities in Africa, is the capital. Durban, the only port, is 1,000 miles from Cape Town. The climate is delightful and invigorating. The temperature ranges from 56° to 82° Fahrenheit. The coast region is semi-tropical, and produces the sugar-cane, pineapple, banana, and coffee. Wool, corn, and sugar are the staple products. In the northern districts magnificent coal deposits are found. All the European cereals are cultivated. Hippopotami, monkeys, baboons, and crocodiles are to be seen. Antelopes abound. There are many poisonous snakes. The population consists of whites (English, Dutch, and German), Zulus, and Asiatic coolies.

The crown is represented by a governor and legislative council of 12 members, including one for Zululand. There are (1901) 626 miles of railway, including a main line from Durban, which connects with the lines to Johannesburg and Pretoria.

Natal may be called civilized, tho there are sections where the old heathenism may still be seen. The WMS, the UFS, Wesleyan Mission, the Free Church of Scotland, the Norwegian, and the Berlin Missionary societies, the Hermannsburg Mission, the SPC, the ABCFM, and the Roman Catholic Missions are each and all doing a good work in Natal. The ABCFM Mission began in 1835, and was the first among the Zulus, who were then a savage people, with a language as yet unwritten and unknown. The above named societies have 23 stations in Natal, with about 15,000 children in their schools.

NASCARAB: A town and cantonment in Ajmere, India, situated about 18 miles from the town of Ahmedabad, on the Delhi, open road, which slopes eastward from the Aravalli Hills. Station of the UFS (1861), with (1903) 2 missionaries, 1 with his wife; 3 women missionaries, 1 outpatient, 69 native workers, 7 Sunday schools, 10 day schools, 2 high schools, 1 dispensary, 1 hospital, 1 dispensary, and 250 professing Christians.

NASH: A settlement in British Columbia, situated at the mouth of the Nass River, 50 miles N. E. of Port Simpson. Station of the MCC (1877), with (1903) 1 missionary and his wife, 1 Sunday school, and 96 professing Christians. Society calls the station Nas River.

NASSAU: The capital of the Bahamas Islands, West Indies, situated on the N. coast of the island of New Providence. Population, 11,000. Station of the WMS, with (1903) 3 missionaries, 11 native workers, 3 outstations, 6 places of worship, 7 Sunday schools, 6 day schools, and 814 professing Christians, of whom 749 are communicants.

The ABCFM Mission began in 1835, and was the first among the Zulus, who were then a savage people, with a language as yet unwritten and unknown. The above named societies have 23 stations in Natal, with about 15,000 children in their schools.
agents employed by missionaries are naturally called "native helpers." This descriptive term has persisted in missionary literature beyond the time it had any real meaning, and is now a relic of the actual situation. In the later stages of mission work the native agency becomes the main force, and the missionary becomes the "helper." The timely recognition of this change in the relative position of the workers will always greatly contribute to the success and efficient prosecution of their cooperative work.

With reference to finding evangelists, it may be said that, being given of Christ, the missionary can always find as many of them as Christ wishes him to have at any given time. This implies, however, that it is incumbent upon those who would evangelize that Christ wants, and in the way that Christ would approve. To this end it is essential always to keep in mind the real character of the end in view, which is the planting and extension of the kingdom of God on earth. The mode of propagating the kingdom must depend on the nature of it, and the evangelist's qualifications must be those that fit him for that specific work. If the end in view were the propagation of Western civilization or Western ideas of government, a certain character of native agency would be sought for the purpose. In China, for instance, such a man as was the late Li Hung Chang, not converted, but thoroughly Westernized, would make the best possible evangelist. But the kingdom of God is "not of this world," although its mission is to save the present world. It must be, first of all, a child of the kingdom, a man spiritually alive, called out of the world, and yet, because of the Christ spirit in him, loving the world somewhat as Christ did, and ready, as He was, to live and die for it. He should be a man of strength of personality and force of character. Men who, before their conversion, by reason of possessing this quality are natural leaders in their communities, are sure to be, after their conversion, the most efficient ones in leading men to Christ. Social position and literary culture will be conducive to the evangelist's power and usefulness, provided they are not associated, as is too often the case in Oriental lands, with intellectual pride, lack of sympathy with the common people, and aversion to work. The literati of China are as a class disqualified by these weaknesses for making successful evangelists, even when they are converted to Christianity; for it usually requires not only regeneration but quite a long period of progressive sanctification also to eradicate these traits, characteristic of their class, from their character. The evangelists drawn from the Samurai class in Japan were very effective in reaching those of the same social grade to which they belonged. But for the evangelization of the common people in Japan there is now almost a felt need for a supplementary body of evangelists, drawn from the masses, so as to be in full sympathy with them, and so as to be free from the class spirit, and trained to hard work. The next great evangelist in every country is likely to be a man who, like the Apostle Paul, adds to his high social position, literary character and intellectual quality, a natural enthusiasm which Pharisaic formalism could not kill in him as it did in the common run of Scribes and Pharisees. Hence, it is that the 'men after the flesh, not many mighty, not many noble are called' to this work, the few of this kind who are called are the ones who make the greatest and most successful leaders in the propagation of the Gospel.

Owing to the absence of women in the Oriental lands it is necessary to send out women as missionaries, who need native female help for the prosecution of their work. These female native workers are usually called Bible Women. They are evangelists for the heathen women who could not otherwise be reached. As such, they need the same qualifications, in a large degree, as are needed by the male evangelists. Their work differs from that of the male evangelists in that it is done almost exclusively in the home, and by the wayside, rather than in public assemblies.

2. Native Pastors: The Native Church is organized by the ordination in it of one or more Native Pastors. The qualifications of native pastors are given in the Scriptures with a minuteness and detail that shows the great importance of not getting the wrong men into that office. It is to be remembered that these qualifications were laid down at a time when the churches to be supplied with pastors were in their youth. The presence in most of them of Jews of the Dispersion, who had had training in the Old Testament Scriptures, made it easier to find men possessing these qualifications than is now the case in young churches organized in heathen lands of the present day. A very important question is: What modification of these qualifications is to be made in the requirements for ordination to the pastoral office in our modern mission churches because of the scarcity of those who can fulfil them even in a tolerable degree? Some great and wise missionaries think that great allowance should be made for the condition prevailing in any given place, and that the church should be organized as soon as possible with the best material for pastors to be found in it. Others hold that it is better to ordain no natives to the office of pastor until they have the men that are fitted for it, even if that means to wait for the second generation of Christians to obtain them. This article is perhaps not the proper place for the discussion of this question. It does not admit of question that so soon as properly qualified men for native pastors can be found, the church should be organized and advanced under their guidance. It must be well, also, under any circumstances, to remember the Scriptural admonition to lay hands on no man suddenly for responsible office in the church. It will always be true that novices clothed with authority are in danger of being lifted up with
pride and thereby falling into the condemnation of the devil.

The following are the three points to be considered in the conduct of native missions:

1. THE ERA: The training of native pastors, evangelists and other helpers is one of the chief concerns in the work of the foreign missionary. When the institution of the Christian home has been long enough established in any field to furnish the native supply of Timothys and Titus, the problem of their training becomes practically the same as that of the missionaries. In all places the Mission schools should be established at an early stage of the work and their development made to keep pace with the development of the native church, so that when the time comes that the native church has need of them, the regularly organized Christian College and Theological Seminary may be on hand to do their necessary work.

In the earlier stages of the work the missionary home should be made a center around which young men and young women may be gathered for Bible study. Much effective use has been made of summer schools and institutes, where those who have had previous training with the missionaries have the benefit of lectures and other forms of oral instruction. An essential feature of any good method of training will always be that which gives emphasis to the moral and religious development. Jesus ordained the twelve, first, "that they should be with him," and then, "that he might send them forth to preach." Hence the supreme importance of the missionary himself being the right man rightly trained for his work; for the men he trains are likely to be the reproduction of himself. As he is or is not, so will the native ministry he trains be or not be, sound in the faith, mighty in the Scriptures, humble, meek, emptied of self and full of the power of the Spirit of Christ.

NATIVE STATES: The collective term applied to those portions of India which are not under the direct control of the British Government, but are still ruled by native princes. The native states are scattered over the whole of India. Some of them are large and important districts, covering thousands of square miles, with millions of inhabitants, with military and civil departments of administration, with mint, post, educational establishments, educational systems, courts, and all the machinery of modern government; some of them are hardly large enough to be noted upon an ordinary map, and consist simply of a village or so with a handful of inhabitants, under the control of some petty descendant of the chief of an aboriginal clan. Between these two extremes the native states range themselves in all degrees of importance. They vary greatly with reference to their populations. Some of them consist almost wholly of Hindus, under a Hindu prince. In others, the ruling family will be Mussulman, the population will consist of persons of all the races usually found in the districts of Hindustan. Others again are made up almost wholly of aboriginal tribes, still owning the headship of the hereditary chieftain. The midst of territory under the authority of the British Government, these islands of native rule should be left, may be briefly and generally explained as follows:

The English acquired territory in India little by little. As they were brought into contact and relations with the native chiefs and princes, conflicts more or less bitter were natural. The result of these conflicts of races was often that the British prince passed wholly into the hands of the British. Some of these wars were waged by the English in self-defense; some of them, it is to be feared, had less of justification. Sometimes the territories of a prince joining English districts would not be morally or physically possible, either because, of itself, became a ground for annexation. Nevertheless, among the native rulers with whom the British power has been brought in contact, there have been those whose authority over hereditary domains there was no valid reason for disturbing. Some such reigning families have been allied by treaty to the growing British power for a century or two, and have always been faithful friends and allies. Some princes and chiefs have been confirmed in their possessions simply because in the absence of glaring reasons their removal would provoke hostility inconvenient to face. Thus it has happened that while, as the result of conquest, almost all India has now passed under British rule, many purely native governments still continue in enjoyment of their ancient power. The control exercised over the native states varies in different cases, but all are bound by treaty to the "paramount power," which undertakes to guarantee to them protection against foreign enemies. No one of them is permitted to enter into relations with any other power or with each other, save under orders of the paramount power, to maintain military establishments above a specified limit. In order to protect the populations of these states from misgovernment, as well as to insure a due degree of subjection to the paramount power, they are all closely supervised by the British Government, acting through a class of officials designated to that duty. These officials are known as "residents," or "political agents," or "political superintendents." A resident is one appointed to reside permanently in the court of a native prince, and to be the medium of communication between the prince and the paramount power. Political agents and superintendents usually have supervision over groups of smaller states not large and important enough to require the services of a resident. There are many such groups of inferior states or chiefships connected with all the provinces and commissionships. The political superintendent will often be the nearest British magistrate, who discharges the duties of supervision in connection with the general duties of his official station in British territory. Under the supervision of these officers the internal affairs of the several states are usually left to be managed by their own princes. Continuous and incorrigible incompetence will generally result in the deposition of a prince by the English Government that the throne of the government of his state will often be administered by the English until his successor, if a minor, be of age; or some successor will be at once placed upon the throne.

The most important native states—some of which have exercised authority over large and subject of separate treatment in this work—are Kashmir, in the far north; Baroda, in the northern part of the Bombay Presidency; the dominions of Holkar and of Sindia, in Central India; of the Nizam of Haidarabad, in the Central Deccan; of Mysore,
in the Madras Presidency, and of Travancore and Cochin, at the extreme south of the peninsula.

Some of these states missionary operations are carried on successfully. This is notably the case with Travancore and Cochin; also with Mysore. In others the degree of independent action which the chieftain or prince is suffered to exercise, united with the fact that these princes are usually Hindus or Mohammedans who hold themselves separate, as it were, for the defense of their respective faiths, is sufficient to prevent any large and effective evangelistic agencies. Of late years, however, the more important native states have become more and more tolerant. Often some of the smaller states will be found the most backward, the most difficult to enter, and the most impervious to all new influences of enlightenment.

**NAVULOAL**: Settlement in the Fiji Islands, Polynesia, situated on the S. E. coast of the island of Viti Levu. Station of the American Wesleyan Mission, with (1900) 1 missionary, 29 native workers, 2 outstations, 32 places of worship, 41 Sunday schools, 68 day schools, and 1,256 professed Christians.

**NAYUDUPETA**. See NAI DUPET.

**NAZARETH**: Town in Palestine, 65 miles north of Jerusalem, with a history linked with that of the Christian Church from the time of Jesus Christ. It is beautifully situated in a valley surrounded by hills on all sides. The houses are mostly well built of stone. The population has a more prosperous appearance than in most parts of the country, and the women of Nazareth are famous for their beauty. Population, 7,000, the Roman Catholic element being influential. Station of the CMS (1852), with (1903) 1 missionary and his wife, 6 women missionaries, 27 native workers, 17 day schools, 1 outstation, and 434 professed Christians, of whom 161 are communicants. Station also of the Edinburgh Medical Mission Society (1861), with (1903) 1 missionary and his wife, 3 native workers, and 1 dispensary. The Turkish name of the town is Nasira.

**NAZARETH**: A town in Madras, India, situated in Tinnevelly, about 25 miles S. by E. of Palamkotta. Station of the SPG (1826), with (1898) 1 missionary, 91 native workers, 39 places of worship, 19 day schools, 8 boarding schools, 1 theological school, and 6,615 professed Christians, of whom 2,424 are communicants.

**NAZARETH**: A town in Natal, Africa, situated in the valley of the Tugela River, about 90 miles N. by W. of Durban. Station of the Hamburgh Missionary Society (1879), with (1901) 2 missionaries, 1 of them with his wife; 3 native workers, 1 outstation, 2 places of worship, 1 day school, and 178 professed Christians.

**NDEJE**: A settlement in Uganda, Central Africa, situated in the Bulemezi District, 20 miles N. W. of Gyaza and 32 miles N. N. W. of Mengo. Station of the CMS (1895), with (1903) 1 missionary and his wife, 2 women missionaries, 517 native workers, 2 day schools, 1 dispensary, 1 theological class, and 4,457 professed Christians, of whom 1,448 are communicants.

**NEEMUCH**. See NIMACH.

**NEESIMA, Joseph Hardy**: Born in Japan, February, 1844—ten years before Commodore Perry's fleet awaited in the Bay of Yedo the opening of Japan to the world. At five years of age he was taken to the Shinto temple to give thanks for his life. When in his teens, having never seen a Christian, Neesima had some conviction of His presence Who is not far from any one, and of the vanity of idols. When he met in a Chinese book the words, "In the beginning God created the heaven and the earth," he said: "this is the God for whom I am going to Japan," and secretly determined to know more of that God, even if he left all to find him. These words from the Bible as he understood were brought by an American, and to America he must go. To leave his country was unlawful, and punishable with death. But this of high character and self among some produce in a boat, and reached Shanghai and ultimately America, working his way as a sailor. The owner of the vessel in which he sailed was the late Hon. Alpheus Hardy of Boston, who, on his reaching America, received him into his family, and provided for his education, giving him nine years in Phillips Academy, Amherst College, and Andover Theological Seminary. The elevation of his countrymen became his absorbing purpose.

While in course of study, the Japanese Embassy to the United States, to the United States, and to Europe in 1871, to observe the condition of education in Western countries, summoned Mr. Neesima to act as his interpreter. He replied that he was an outlaw from his country, and was subject to no ruler save the King of Kings. He therefore upon received formal pardon for leaving his country. He visited with the embassy the principal colleges and universities of the United States, Canada, and Europe. Not only was he thus brought into close and friendly relations with Japanese, but also with high character and position and of enlarged views, but his wish to devote his life to the Christian education of his countrymen was greatly strengthened. He was appointed a corresponding member of the Japanese Mission of the ABCFM and was ordained in 1874 in the Amherst Vernon Church, Boston. He responded to his modest but moving plea at the meeting of the American Board in Rutland, nearly $4,000 were pledged for the school which he proposed to establish in Japan. After ten years' absence, he arrived in his native land, in November, 1874, "cherishing," as he says, "in my bosom this one great purpose, i.e., the founding of an institution in which the Christian principles of faith in God, love of truth, and benevolence toward one's fellow-men" should train up not only men of science and learning, but men of conscientiousness and sincerity.

In November, 1875, he opened the Doshisha College at Osaka. A remarkable revival occurred in the Doshisha in 1884, during which the strain upon his health was such as obliged him to leave the country for a while. He revisited the United States in 1885. On returning to Japan in 1886, he formed a plan for the enlargement of the Doshisha, so that it might have the rank of a university. Not in any wise concealing his purpose to make it a Christian institution, he yet appealed for aid to the non-Christian statesmen and influential men of Japan. He so won their confidence that he secured contributions from those in high social and official positions amounting to nearly $60,000, and also the gift of $100,000 from an American gentleman for the
same purpose. In 1889 he received from Amherst College the degree of Doctor of Laws.

In the fall of 1889 he was in Tokio, working to interest leading men at the capital and secure funds for his enlarged plans. He took a severe cold, and, renewing his efforts too soon, was prostrated. His wife and other friends were summoned and pastors, teachers, and students flocked from east and west to catch some fare-
well word. Maps were brought at his request to his bedside, and eagerly, almost with dying breath, he pointed out places which ought at once to be filled by the Christian teacher. He passed away January 23, 1890. All classes united to attend his funeral. The governor, the chief
justice for the district, and many other officials were present. The students from one government
school and one private school were in the procession. One banner from Tokio was inscribed with one of Mr. Neesima's own sen-
tences: "Free education and self-governing churches: if these go together, the country will stand for all generations." Another was ins-
cribed: "From the Buddhists of Osaka."

NEGAPATAM: A town in Madras, India, chief
port of the Negapatam District, situated 49 miles
E. by S. of Tanjore, on the Bay of Bengal. It was one of the earliest Portuguese settlements on the Coromandel coast. Population (1901)
57,190, of whom 39,000 are Hindus and 14,000 Muslims. Station of the Leipzig Mission Society (1864), with (1903) 1 missionary and his wife, 16
native workers, 21 outstations, 2 places of worship,
5 school, 1 boarding school, and 419
professed Christians. Station also of the SPG
(1825), with (1903) 8 native workers, 1 place of worship, 3 day schools, and 447
professed Christians, of whom 233 are communicants. Station also of the WMS, with (1903) 3 mission-
aries, 109 native workers, 9 outstations, 11 places
of worship, 21 Sunday schools, 25 day schools,
and 205 professed Christians, of whom 171 are communicants.

NEGOMBO: A town on the west coast of Ceylon, 20 miles north of Colombo. Population
14,400. Station of the WMS, with (1903) 2
missionaries, 2 native workers, 28 places of
worship, 25 Sunday schools, 22 day schools,
and 902 professed Christians, of whom 631 are communicants.

NEGRO RACE: Much ignorance and con-
fusion attend the use of the word Negro, and there is much trouble in properly classifying the race. In its widest sense the term is applied to those sections of the human species who have black, or distinctly dark, skins as opposed to those who have yellow or brown complexions. In this somewhat ill-defined use it designates the inhabitants (1) of Africa south of the Sahara, (2) of the peninsula of India south of the Indo-
Ceylonese, (3) of Malaysia and the greater part of Australasia. In this wide dispersion the peculiar characteristics of the pure Negro have been modified by contact with the Mongol on one side and the Caucasian on the other.

In a more restricted sense, the Negro race includes all of the west coast lying along the Niger, the Senegal, and Gambia rivers, and the country between them, together with the tribes of the Sudan. This area is thus a thin belt of territory along the center of Africa, not all of which is inhabited solely by Negroes, and which forms but a very small part of the whole continent. Here and there, scattered through other sec-
ctions, especially the north, occasional tribes of true Negroes may be met, but the limits above given are in the main correct. The home
of the race in its purity is in the district between the Volta and Niger, the Kong Mountains and the
coast, where are found remains of the Negro
kingdoms of Benin, Dahomey, and Yoruba, while just west of the Volta is Ashanti. Di-

This generally accepted opinion that the Negroes were the aborigines, or, at least, the first settlers, in the region they occupy. If, as seems probable, they belonged to the Hamitic family, the indications are that they were among the first to come from Asia into Africa. The Bantu race followed, crowding the Negro to the south and west, and pushing the Hottentot Bushmen ahead until the three
divisions of the African races occupied their respective localities as now defined. Within these limits, however, the Negroes have been subject to much unrest and change. The slave trade diminished their numbers, and in later years the return of the descendants of former slaves has perhaps modified in a slight degree their racial characteristics.

Racial Characteristics: The true Negro is marked by an unusual length of arm; projecting jaws; small brain; black eye; flat, short nose; thick, red, protruding lips; thick skirt; short woolly hair; weak legs, prehensile great toe, and projecting heel; black or brown skin, thick and
vellut, with a strong odor.

In their native home the race is regarded as
naturally inferior in mental development to many of the races of the world. The possibilities
of development are affirmed and denied by writers of equal weight. In the aboriginal state the Negro is a mere savage. His nature is sunny and childlike. Inordinately susceptible to flattery, he can easily be influenced. While rendered
cruel by the lust for gold, he is naturally gentle. He appreciates the beautiful, and is fond of songs and
mirth. The victim of gross superstition, he retains belief in a supreme being. He is indolent, slothful and improvident. If his animal wants are satisfied, he is content. He knows no law to control his feelings, and can be an enigma hard to solve if he so chooses.

He responds quickly to kindness, and will prove his gratitude by great devotion. Morally, his standard is very low. Polygamy is practised, but marriages are among the slave trade. Cannibalism is sometimes indulged in, and human sacrifices have been offered to the fetish objects of their worship, some of which are most hideous. Some of the tribes have a great degree of skill in the arts and manufactures. Buildings, metalwork, clothes of skins,—all show a degree of civiliza-

Nellore

Build the houses, hunt, and fish, leaving the heavier work to be done by the women. The latter are more modest than the rest of the Polynesian races. The Papuan languages form a class by themselves, differing widely from the Polynesian and Melanesian, and split into dialects by so small an obstacle to intercourse as a brook.

III. Mixed Races: The slave-trade has scattered the Negro race throughout the globe. In most countries of the eastern hemisphere the Negro is found in the general population; and also a trace of black blood is seen in Arabia, Malabar, and Ceylon, and in the various races lying between India and New Guinea, where the Papuan type is met with, they have left no distinctive mark, and no statistics are available to indicate the number of Negroes, or the proportion of the population which they form.

The degree of intermingling which has gone on in the western hemisphere has given rise to many mixed races, with more or less of Negro blood in them. The terms Creole, Quadron, Octoroon, or Mulatto are well known.

Language: The zone occupied by the Negro presents a greater diversity of tongues than is to be found elsewhere in the world, except perhaps in Central and South America. The languages spoken by the original inhabitants of Madagascar, the Fiji Islands, and New Zealand, are included in the Polynesian group. The贿nese group contains the Tongan, Tuvaluan, and other languages of the islands south of Polynesia. The Austronesian languages are those of the Philippine Islands, the Formosans, the Thais, and the other peoples of the Malay Peninsula.

The Polynesian and Austronesian languages are characterized by their regularity and by the absence of case distinctions. They are also noted for their extensive use of monosyllables and for their lack of article and noun inflections. The Polynesian languages are divided into three groups: the Oceanic, the Polynesian, and the Micronesian. The Austronesian languages are divided into five groups: the Malayic, the Batakic, the Bornean, the Sulawesi, and the Papuan.

The Papuan languages are a group of languages spoken by the Papuans, who are the native inhabitants of New Guinea and the adjacent islands. They are characterized by their monosyllabic nature, their absence of grammar, and their lack of articulate quality. The Papuan languages are divided into two groups: the Papuan proper, which includes the languages of the Papuans themselves, and the Non-Papuan languages, which are spoken by the Melanesians and the Polynesian peoples.

modified by his environment in the United States, presents a mixture of good and evil, of childlike simplicity and cunning secessiveness, of deal-and-executive ability and self-sacrament, of what is upright life equal to that of the Caucasian; and these instances, when viewed in connection with the great majority which seem to give weight to the opinion that the Negro is mentally and morally inferior to, and can never be on an equality with, the white race which surrounds him.

It has been suggested that the Negro is not so much immoral as non-moral, for there seems to be such a lack of the perception of right and wrong that a Negro will stop on his way to or from a prayer-meeting, at which he takes a fervid part, to lift a chicken from a neighbor's hen-roost. The Rev. Dr. Tucker, at the American Church Congress in 1883, brought out this side of the American Negro character when he spoke of Negroes who were earnest and successful, unconscious of hypocrisy, but who were guilty of lives of the grossest immorality, were addicted to lying and thieving, and yet were respected and heeded by their flocks.

The Negro question is looked at in two distinct ways, not only by the politician but by the Christian, and the difference is due mainly to presence or absence of perspective. By those who live away from the daily contact with the Negro, who look at him idealized, as a man entitled to the rights of men, to all the privileges of citizenship, and to all the yearning love which a fallen image of God should excite in the Christian heart, the practical difficulties in the way of civilizing, Christianizing, and elevating the Negro to the lauded plane of equality are often-times overlooked, and theory takes the place of practice. The community, partly in love and hope, partly in love and hope overpower "works." To those who live among the Negroes, who daily see the deficiencies in their character, in their capabilities, in their morals, there is an absence of perspective, and they take the other extreme view: that little can be done for them, that liberty and equality should have some time, at least, be mere words without practical meaning. This is not only true of upright and honorable men who are not distinctively Christian, but men who are anxious to save the souls of the Negroes but have an aversion as their political neighbors to contact with Negroes on terms of equality, or to recognition of their political rights. Among the men who are ready to keep the Negro from the polls, by violence if necessary, are men who are active in Christian work. Between these two widely divergent views of the Negro there is, without doubt, as in all things, a middle ground, and to that mean the opinion of wise men is turning; but as yet it cannot be clearly defined, nor is the question yet solved.

While the political part of the Negro question is tangling the judgment of the statesmen, the Church is doing her part to aid in the solution. In addition to the missionary work of the different churches, and that of the American Missionary Association, there is a large and flourishing church among the Negroes themselves. The African Methodist Episcopal Church was organized in 1816, and in 1820 it had a local membership and supported a missionary society which was organized in 1844 as the Parent Home and Foreign Missionary Society. In 1888 nearly 300 missionaries were engaged in the home work of the church, tho it has been only within the last ten years that any successful mission has been established in foreign lands.

In addition to their own church, the Negroes form fifteen conferences of the Methodist Episcopal Church (South). Of the Baptists, a large proportion in the Southern States are Negroes, and many of the ministers have been men of great power and of great zeal in law, 50,000.

There is also a considerable number of Negroes in the Episcopalian Church, and a certain number are Roman Catholics.

2. In Mexico: It is difficult to calculate the number of Negroes in Mexico, for there the mixture is so blended that Negro ancestry is hard to trace. Of the population (1900), 13,500-1890, the Negro element is put at 60,000. But by the constitution of 1824 all distinctions of race were abolished, and they are virtually amalgamated with the rest of the people. About 43 per cent of the people are of mixed race, Negroes, Indians, and other races.

3. Central America: The number of the colored or Negro population in Central America has been estimated at 50,000. In this section of the country intermingling with the Indians and other races is great, and there is little social distinction between them.

4. South America: Brazil was the last country in America to abolish slavery. In 1850 the slaves were estimated at 2,500,000; in 1887 the slaves were reduced from this official return as number 723,419, and by a law passed in 1888 slavery was abolished. The Negroes are found principally in the provinces of Pernambuco, Bahia, Rio de Janeiro, and Minas, and according to the census of 1890 numbered 2,097,420. In other parts of Brazil a great number of the Negroes live in the banks of the rivers, and there are engaged in the capture of gold and other minerals.

5. West Indies: The number of Negroes in the West Indies is about 3,000,000. Slavery was abolished in the British West Indies in 1834, in the French possessions in 1848, and in Cuba in 1863.

The vitality of the race is surprising and is unaltered by their destination, except when they leave the tropics or sub-tropics. The farther north they go, the greater the mortality, and their stability as a race, in constitution and numbers, depends upon the restriction of their habitation to the warm climates.

NELLORE: A town in Ceylon, situated about 30 miles S. E. of Jaffna. Station of the CMS, with (1905) 1 missionary and his wife, 1 native worker, 1 place of worship and 1 boarding school. Church statistics are included in Jaffna.

NELLORE: The capital of a district of the same name, Madras, India; stands on the Tenner River, 96 miles N. by W. of Madras. Has important irrigation works on the river. Population (1891), 29,300, of whom 22,600 are Hindus. Station of the ABMU (1840), with (1905) 3
missionaries, 2 of them with their wives; 5 women missionaries, 35 native workers, 2 outstations, 3 places of worship, 5 Sunday schools, 5 day schools, 3 boarding schools, 1 dispensary, 1 hospital, and 2,500 professed Christians, of whom 343 are women.

NELSON HOUSE: A trading post in the Dominion of Canada, situated in Keewatin Territory, about 450 miles N. W. of Winnipeg. Station of the Middle Canada Mission (1857), with (1903) 1 missionary and his wife, 2 outstations, and 93 professed Christians.

NEMURO: A town in Japan, situated on the E. extremity of Hokkaido. Station of the ABMU (1887), with (1903) 1 woman missionary, 4 native workers, 5 outstations, 1 place of worship, 2 Sunday schools, and 86 professed Christians.

NEPAL: An independent kingdom lying along the southern slopes of the Himalayas, in North India, and the two dispensary stations are maintained there by the Board of Eastern Missions. The separation from the great body of Eastern Christians was due mainly to political and national forces. Christianity spread eastward very early. The Syriac-speaking Christians of the great Nestorian patriarchies, on which number of Persian and Arab Christians, were the subjects of the Parthian, and then the Sassanian kingdom. Syriac was the ecclesiastical language of all. The persecuting zeal of the Persian kings was increased by the feeling that their Christian subjects were secret allies of the Roman enemy. The school of Edessa, the theological center of these Christians, was closely associated with that of Antioch; and Theodore of Mopsuestia, the true father of Nestorian theology, was revered. Hence, it was natural for the first Nestorian Christians to be one of Nestorius against Cyril, of Antioch against Alexandria, and at the same time to gain greater security by dissociating themselves from the Christians of the Roman Empire, in repudiating the creed of Ephesus, and erecting the See of Seleucia into a patriarchate. On the other hand, the emperors hastened the schism by persecution. In 489 the Persian school was expelled from Edessa, in Roman territory, and established beyond the Persian border at Nisibis. The great organization of the Nestorian Church, with a smaller Barsumas, Bishop of Nisibis. A similar cooperation of political and theological forces led, in the next century, to the organization of the other Syrian National Church, the Jacobite. The centers of Nestorian population were about Nisibis, Mosul, and Seleucia, and in Khuzistan in Southern Persia, while considerable bodies were found in Khurasan, Armenia, and Arabia.

The technical expression of the Nestorian Christology is "two natures, two hypostases (Syriac quma), and one person (Syriac paropo)."

The terms are difficult of definition, but one thing is defined in the theological treatises as including the generic attributes, that part of the nature possessed by each individual, while paropo includes those that are individual. Thus, it is said that Peter, Paul, and John are separate qumas with respect to common qualities, and separate paropas with respect to differing qualities. It is argued that nature implies such individualization and is incomplete without it. They conceived of the Incarnation as an indwelling, the union of the divine person with an individual person united with human nature. A corollary is the denial to the Virgin Mary of the title Theotokos, mother of God.

Practically, this Christology served as a badge of separation, and had little effect otherwise. In other regards, the Nestorian Church differed from other Oriental churches by way of arrested development. Its liturgy is briefer, and less explicit in some doctrines, but it contains the invocation of the saints and prayers for the dead. The cross is revered, but neither pictures nor images are used. The real presence, the sacremental power of the priests, is taught, but not transubstantiation or confession to priests. The parish clergy marry, but mon-
asticism was a powerful institution, and the bishops were chosen from the monks. For several centuries the episcopal succession, contrary to the church canons, has become dynastic, usually passing from uncle to nephew. The patriarchal seat was first Seleucia, then Baghdad, later Mosul, and finally Kachane, in the heart of the Zagros Mountains.

The history of this church is checkered and obscure. The bloody persecutions of Christians by the Sassanian kings were previous to the rise of Nestorianism, but the Nestorians were harassed by some of the Sassanian kings, and were outlawed by the Roman emperors. Islam at first was mild by contrast, and the Arab conquest was welcomed. The Church extended more widely than ever, and Nestorians, especially as physicians and secretaries, were in high favor in the Caliph's court, while their bankers and artisans amassed wealth. They were the translators of Greek literature, and the transmitters of philosophy to the Arabs. The toleration extended was limited and in the end worse than persecution. The Christians were subject to special taxes, and held an inferior status before the law. The Caliph exercised the right of investing the patriarchs, and thus the highest office became the prize of bribery and was secularized. Along with this went a tacit acceptance of the prohibition of proselytizing Mohammedans. The missionary spirit was deadened but not extinguished, and found vent in work for non-Mohammedans. Christianity had entered India before the rise of Islam, and bishops were still appointed to that country. During the 8th Christian century active propaganda was carried on among the pagan tribes on the borders of the Caspian, and about 650 a.d. Nestorian monks entered China. Christian cemeteries, medieval travelers, and Syriac historians testify to the existence for several centuries (about 800-1300) of large bodies of Turkish and Mongol Christians in Central Asia, and in Northwest China, especially along the northern slopes of the Tien Shan and the Yellow River. When the Mongol hordes overran Western Asia, not a few Christians were numbered in their ranks and some were high in office. It seemed as if the opportunity for Christian triumph had come, but in reality its downfall was near. The large Christian communities had been left in the anarchy, famine, pestilence, and war that had cursed Western Asia; and finally the Nestorian Church was well nigh exterminated in the terrible Mongolian forays ending with the massacres of Tamerlane. Since a.d. 1400 its history is only that of a few shattered dioceses of the mighty line that once spanned Asia.

At present the number of Nestorians, including those who have seceded to other Christian churches, is little more than one hundred thousand. They live in three distinct regions, the plains of ancient Assyria, the rugged valleys of the Zagros Mountains in Turkey, west of Lake Urmi, and the plains in Persia, between the mountains and the lake. The large majority are engaged in agricultural or pastoral pursuits. Those in the mountains, like the Kurds among whom they live, have maintained a peculiar independence, and the Sultans have usually subjecting them to taxation, without, however, maintaining peace and security in those wild regions. Those in the plains of the Tigris, and a few elsewhere, are Roman Catholic. The majority of those in Persia are enrolled as members of the Greek Church. A smaller but very important body is the Nestorian, or, as it is often called, the Persian, Protestant. Probably less than half of the whole number still acknowledge the authority of the Nestorian patriarch.

The part of Persia in which the Nestorians live is closely united to Russia in an industrial way. The rapid development of Transcaucasia has given work to thousands of Nestorians, while many more have gone farther into Russia. Almost every adult male has at some time spent several years in Russia. This fact has given a sense of Russia's power and a conviction of its future supremacy, while the absence from home has had a disintegrating religious and moral effect. The increasing misgovernment of Persia has made the people long for a change, a temper induced also by the various missionary operations. All these influences prepared for the Russian Mission of 1898, that received in Urmi an extraordinary welcome. Without any religious persuasion almost all the adherents of the Nestorian Church in the region of Urmi renounced its teachings and professed their acceptance of the Orthodox faith. Subsequent events did not disappoint; thus they numbered as permanent additions to the Russian Church. Time must reveal the future of this ancient church, but the political predominance of Russia makes very probable the absorption of most of the Nestorians, in Turkey as well as in Persia, into the Russian Church. The old church has not the strength to stand. The only body that seems to have the promise of a separate destiny is the small but vigorous body of Protestant Nestorians.

NETHERLANDS MISSIONARY SOCIETIES:

The first missionary work by the Dutch was connected with their colonial extension, and dates back as far as the beginning of the 17th century, when the Dutch East India Company was formed (1602). This commercial society was bound by its charter to care for the church interests of the colonists, and also to endeavor to teach the heathen. There were no special missionaries, but the colonial clergy were relied upon for work, and in order to the provision of the right class of men, there was organized at Leyden (1622) a seminary for the training of candidates. The seminary was not long continued, and the some earnest and faithful workers sent out, for the most part the colonial clergy were very perfunctory in the performance of their work. Some fairly good work appears to have been done in the way of Bible translation and education of native clergy, but work for natives, for the most part, was very superficial. This was due partly to the short service of the preachers, partly to their small number, and chiefly to lack of interest on the part of the Government. The influence of the Roman Catholic Missions, e. g., in the Moluccas, was disadvantageous. Baptisms were made by wholesale, and on such easy terms that at the close of the 17th century it was reported that there were 300,000 Christians in Ceylon, 100,000 in Java, and 40,000 in Ambonins. The West India Company, formed in 1621, made some attempts in the same line in Brazil,
the with no practical result, but laid the foundation for the Dutch Church in the American Colonies.

During the 18th century all these undertakings gradually fell into decay, and at the revival of missionary interest in the last decade of the century, there was almost no missionary spirit in the churches of Holland. An appeal from the LMS soon after its organization stirred the hearts of some clergymen and laymen and resulted in the formation of the Netherlands Missionary Society in 1797. For some time they worked through the LMS, but later established missions of their own. For half a century this remained the only Dutch society, but beginning with 1847 a number of societies were formed by those who felt unable to accept the somewhat rationalistic and formal management of the old society. These included: The Menonite Union (1847), The Christian Reformed Missionary Society (1854), the Java Comité (1855), the Ermelo Association (1856), Netherlands Mission Union (1858), Utrecht Mission Union (1859). Of these, the Christian Reformed Missionary Society and the Netherlands Reformed Mission Union united in 1892 to form the Reformed Churches in the Netherlands. There is also a society auxiliary to the Moravian Missions (formed in 1793), and there are several aid societies.

1. Netherlands Missionary Society, 1797: (Nederlands Zendelinggenootschap): The oldest of the Dutch societies owes its origin, in so far as its influence of Dr. Van der Kemp, who went to South Africa in the service of the LMS. It represents chiefly the Established Church, tho' from the beginning it has had relations with the Reformed Church, and the General Synod has no immediate control over its conduct.

The first missionaries of the Society under its own direction, Vos, Erhardt, and Palm, were sent to Ceylon, but they were unable to accomplish much in that field, owing perhaps to the hostility of the Dutch Consistory of the island. In 1812 three missionaries, Kam, Supper, and Bruckner, were sent to Java. Mr. Kam established himself at Amboina, in the Molucca Islands, Mr. Bruckner at Samarang, and Mr. Supper at Batavia. Two years later, Holland, having regained its independence from France, the Dutch Government, the society, and the Synod, sent out five missionaries to work with Mr. Kam. These established themselves at Celebes, Ceram, Ternate, Banda, and Timor, and found abundant opportunities for labor. In 1833 Mr. Kam, who had endured much exposure in his efforts to travel from island to island, and had been often employed, even by the government, as a peace-maker among the tribes, died from the effects of overwork. In 1826 the same Society sent out Mr. Gutzlaff to China. A mission was also established at the Dutch colony of Surinam in Guiana, and Alphonse F. Lacroix, was sent to the Dutch territory in India. When in 1825 the Dutch settlements on the continent of India were ceded to the British Government, their four missionaries connected themselves with the British India Society, but it became not to render their time and labor and knowledge of the languages of the people of no avail. The fields at present (1901) occupied are Java, Celebes, Sumatra, and Savu, near Timor. In 1900 it had 24 missionaries, 62 native helpers in 11 stations and 49 outstations, 1,722 communicants, 42 schools with 2,707 pupils, 1 physician, and 1 hospital, with 4,000 patients.

2. Menonite Missionary Union, 1847 (Doopsgezinde Vereeniging): The Anabaptists of Holland had worked through the BMS of England, but in 1847 formed their own organization as above, and commenced work in Java and Sumatra. The report (1900) shows 11 missionaries, 32 native workers, occupying 4 stations and 8 outstations, with 458 communicants, 9 schools, with 366 pupils, 1 hospital treating 2,280 patients.

3. Java Committee (1855), (Java Comité te Amsterdam): The first of the societies organized to protest against the Netherlands Society in 1855. It carries on work in Java, and has (1900) 6 missionaries, 11 native workers in 6 stations and 8 outstations; 500 communicants, 8 schools, 225 pupils.

4. Mission of the Reformed Churches in the Netherlands, 1892 (Zending van de Gereformeerde Kerken in Nederland): The Dutch Reformed Missionary Society was founded at Amsterdam in 1859 by the Rev. Dr. Schwartz, missionary of the Free Church of Scotland to the Jews in that city. The original intention was to form a society for the propagation of the Gospel among the Jews living among the heathen and Mohammedans in the Dutch (Indian) colonies, and through them to reach the heathen and Mohammedans. The government, however, out of deference to the Jews in Holland, refused to recognize the proposed society, and it was resolved to commence work among the heathen and Mohammedans in the island of Java. Additional cause for this resolve lay in dissatisfaction with the old Netherlands Missionary Society, on account of the Synod. There had been formed the "Utrecht Mission Society" and the "Netherlands Mission Union," neither of which, however, founded on orthodox principles, accepted the confession of the Dutch Reformed churches, and the new Society therefore formed to act in conformity with the recognized standards of these churches, in general following the Presbyterian polity. In 1892 this Society united with the Christian Reformed Union, under the title as above. The work is in Java, and the report (1900) shows 16 missionaries, 12 native workers, 8 stations, 9 outstations, and 718 communicants.

5. Netherlands Mission Union, 1858 (Nederlandse Zendingsenvereeniging): This Society, organized in 1858, began its work in Western Java among the Sundanese. It had (1900) 11 missionaries, 32 native helpers, 9 stations and 19 outstations, 871 communicants, 24 schools with 851 pupils.

The Utrecht Missionary Society, 1859 (Utrechtse Zendingsenvereeniging): It employs (1900) 14 missionaries, 41 native workers in 7 stations and 43 outstations, with 246 communicants, 19 schools with 1,070 pupils.

The Committee for the Mission to the Sangir and Talaut Islands (1886): This Committee collects aid for various needs of the work of the 13 missionaries and 210 native workers. Their salaries are assumed by the Dutch Government. The number of communicants reported in the islands is 10,459, a very much larger number than is shown by any other Dutch Society working in that region. There are also 26 schools with 4,184 pupils.

NEU BETHEL. See Bethel, German East Africa.
NEUEN DEITELSAU MISSIONARY SOCIETY.
See Germany; Missionary Societies in.

NEUENKIRCHEN: A station of the Hermannsburg Missionary Society in Natal, South Africa, situated in the Tugela valley. It has (1901) 1 missionary and his wife, 4 native workers, 1 school, and 23 native Christians, of whom 1 are communicants.

NEU HALLE: A village in the Transvaal, South Africa, situated about 80 miles N. E. of Pretoria. Station of the Berlin Missionary Society (1873), with (1903) 1 missionary, 13 native workers, 4 outstations, and 1,008 professed Christians. The village was formerly called Marapjane in the Society reports.

NEU HANOVER. See New Hanover.

NEU KIRCHEN MISSIONARY INSTITUTE.
See Germany; Missionary Societies in.

NEW AMSTERDAM: A town in British Guiana on the right bank of the Berlisse River, near its mouth, 63 miles S. E. of Georgetown, with which it is connected by railway. Station of the Moravian Missions, with (1900) 1 missionary and his wife, 19 native workers, 3 outstations, 4 places of worship, 2 day schools, and 203 professed Christians. Also with 2 missionaries, 1 physician; church statistics in Georgetown. Station also of the SPG, with 1 missionary, 2 native workers, 1 day school, and 130 professed Christians. Station of the West Indies Wesleyan Methodist Conference, with 1 missionary and his wife, 5 outstations, 4 places of worship, 5 Sunday schools, 5 day schools, and 409 professed Christians.

NEW CALEDONIA: An island in Melanesia which, together with its dependency, the Loyalty Islands, is a French colony, lying about 720 miles northeast of Australia, in latitude 20°-22° 30' south and longitude 164°-167° east. It is 200 miles long, 30 broad, with an area of 6,000 square miles, and a population (1901) of 51,000: 29,000 natives, the remainder colonists, soldiers, and convicts. The natives resemble the Papuans. The Roman Catholics have established missions at various points on the island, but so far little Protestant work has been undertaken beyond that which Christian natives of the Loyalty Islands are able to do. It was occupied by the French in 1853, and has been a penal settlement since 1872.

NEW CARMEL: A village in Jamaica, W. I., situated in the W. part of the island, S. E. of Savanna la Mar. Station of the Moravian Missions (1827), with (1901) 1 missionary and his wife, 28 native workers, 1 outstation, 1 place of worship, 2 Sunday schools, 1 Society for Young People, and 688 professed Christians.

NEWCHWANG: One of the treaty ports of China, in the Manchurian province, Shing-king; situated on a branch of the Liao-ho, 35 miles from the Gulf of Liao-tung, in a vast alluvial plain, extending for 15 miles. The chief port is Ying-tao, farther down the river, to which the name of Newchwang is also applied. The port is closed by ice for four or five months in the year. The product of pulses and beans is the principal export. Population about 50,000. Station of the Presbyterian Church in England (1800) a missionary and his wife, 21 native workers, 8 outstations, 10 places of worship, 1 theological class, and 110 professed Christians. Station of the SPG (1892), with a chaplain for English residents.

NEWELL, Samuel: Born at Durham, Me., U. S. A., July 24, 1784; graduated at Harvard College and Andover Seminary. He was one of that band of young students whose devotion and earnest entreaty to the ministers of Massachusetts called the American Board into existence. He married Harriet Atwood, and sailed February 19, 1812, as a missionary of the American Board for Calcutta. Forbidden by the East India Company to remain in its territory, he sailed with his wife for Mauritius to establish a mission for that island and Madagascar. Mrs. Newell died soon after their arrival, and Mr. Newell went to Ceylon, the opening there for a mission being favorable; but in January, 1814, he joined his former fellow-students and his associates under the ABCFM, Hall and Nott, at Bombay. Seven years later a terrible epidemic of cholera swept through the country. Mr. Newell devoted himself to the sick until he himself took the disease from the natives and died May 30, 1821. His grave is in the English cemetery at Bombay.

NEW ENGLAND COMPANY: Headquarters, 1 Hatton Garden, London, E. C., England. In the early part of the 17th century the English Missionary Society, founded by Edward Coke, and other English denominations, petitioned Parliament for permission to send missionaries to the Indians of America; and the grant made (1612) to the Society for Propagating the Gospel in New England was applied to this end. In 1678, the Society for Propagating the Gospel in New England (1649) was reorganized as the New England Company. In 1687, a charter was granted by the Long Parliament, which was approved by the Lords. A new charter was granted in 1693; the society was declared to be a charitable company, authorized to carry on its work. In 1694, the society was changed into a company, with a president, treasurer, and twelve assistants, and charged with the task of converting the Indians to the Christian faith, and endowing them with property. In 1722, a new charter was granted, and the society was authorized to receive contributions for the purpose of converting the Indians to the Christian faith, and endowing them with property. In 1722, a new charter was granted, and the society was authorized to receive contributions for the purpose of converting the Indians to the Christian faith, and endowing them with property. In 1722, a new charter was granted, and the society was authorized to receive contributions for the purpose of converting the Indians to the Christian faith, and endowing them with property. In 1722, a new charter was granted, and the society was authorized to receive contributions for the purpose of converting the Indians to the Christian faith, and endowing them with property. In 1722, a new charter was granted, and the society was authorized to receive contributions for the purpose of converting the Indians to the Christian faith, and endowing them with property.
states until the outbreak of the War of American Independence, when the company was obliged to cease its labors there, and then transferred to New Brunswick, but after a fair attempt was found unprofitable, and was removed to Ontario, where since 1822 the work has been permanently maintained. Between the years 1825 and 1840 large sums were contributed by the British and the American Missionary Societies for the New Indies, but the increase of the work in North America of late years has necessitated the withdrawal of funds from that quarter, and all have been devoted to the missions of the company. 

**Present Work:** The funds of the company are derived from three sources, the original charter fund and two legacies. The money coming from two of these sources may be used only for work among the American Indians and work in American dependencies of the British crown, while that from the third may be used for spreading the Gospel in any British colonies. The work carried on now by the company is evangelistic and educational among the Indian tribes of British North America. The company's stations at the present time are:

2. Mohawk Institution, Brantford, Ont., an industrial boarding school for Indian children of both sexes.
3. St. George's School, near Lyttton, British Columbia, an industrial boarding school for Indian boys.

**NEW GUINEA.** See Papua.

**NEW HANOVER:** A town in Natal, South Africa, situated in the N. Hanover district, 22 miles N. W. of Pietermaritzburg. Station of the Hermannsburg Missionary Society (1862), with (1900) 1 missionary and his wife, 3 native workers, 2 outstations, 1 place of worship, 3 day schools, and 227 professed Christians.

**NEW HEBRIDES ISLANDS:** A group included in Melanesia, Pacific Ocean, lying between latitude 21° and 15° south, and longitude 171° and 160° west. It covers about 1,600 miles north of New Zealand. They were discovered and described by Cook in 1773. There are about 30 islands of volcanic origin, mountainous, with wooded ridges and fertile valleys, nearly all of them inhabited. Coconut and other magnificent trees grow in profusion, and the soil, like that of most volcanic islands, is very fertile, and fruits and vegetables are raised in abundance. The population numbers perhaps 80,000, and belongs in general to the Papuan race. The general type is rather ugly, below the middle height, fairer than the typical Papuan, with low, receding foreheads, broad faces, and flat noses. Bracelets, earrings, and nose rings made out of shells very often used to be their only clothing, the oil and red clay were smeared over the body in some of the islands. The characteristics and habits of these people vary greatly in the various islands, several islands having become Christianized, while on some of the other islands cannibalism is still possible. The languages of the islands are about twenty in number, and sometimes two or three are used on the same island, so that the missionaries laboring at opposite sides of the islands are unable to use each other's books for their respective congregations. These languages are alike in grammatical construction, and belong to the Melanesian family. Of the dialects, 12 have been reduced to writing by the missionaries.

The history of these islands furnishes many illustrations of the short-sightedness of the theory that savage tribes ought to be given civilization “through commercial intercourse rather than the Gospel.” But it also offers abundant proof of the power of the Gospel of Jesus Christ to change and elevate the most degraded races, and to develop stable and noble character in converts from heathenism.

Traders were the first Europeans to deal with the inhabitants of these islands. The aim, of course, of these men was the benefit of the trader, not of the people whom commercial intercourse was to civilize and elevate. Just at this point—of aim, and interest, and motive—is where the expectation breaks down that savages will be civilized through commerce. Religion only controls beneficently the dealings of men with those who are ignorant and unsuspicious of the powers which civilization confers. The articles of barter of the European traders were tobacco, rum, rum, and liquors, both of which fed the flames of war among the tribes. The early agents of “civilization” used fraud and deceit; they seized, by force, what they could not get by free consent; they even carried off men's wives, and later they kidnapped men to sell as plantation laborers. Many of these might be a market for sturdy muscle of chiefs or petty; and their brutality and ungovernable passions drove the islanders to frenzy. If the savages were cruel and treacherous, the traders made them more savage and treacherous and cruel, while the loss of some of the strangers introduced decimated the population of the teeming islands, and made it certain to all that white men can cause disease and death. Thus the New Hebrides became one of the most dangerous and discouraging of mission fields.

Beginning at the southern end of the group the following are the more important of the islands: Anetium is a very picturesque, and even imposing, island, with a climate in general good, and not unhealthful to those who understand how to avoid the malaria of the lowlands. It was occupied in the first quarter of the last century by European traders seeking sandalwood. In 1841 the LMS sent native converts from Samoa there to teach the people. They had to flee for their lives, and, returning later, were always in jeopardy. They were followed in 1848 by Rev. John Geddie, sent out by the Presbyterians of Nova Scotia, and he, after long and perilous efforts, won a hearing. The inhabitants are all Christians now, and it is a station of the New Hebrides Mission, with a missionary physician and his wife and about 30 native workers occupied in different parts of this and neighboring islands. Tanna contains an active volcano which shines in cloud by day, and in fire by night—“the lighthouse of the South Pacific, lit by the finger of God.” This island was occupied in 1839 by native teachers from Samoa, sent by the LMS. Two missionaries of the LMS barely escaped from it with their lives in 1848, and the story of savagery and hostility was repeated during ten years. At last a permanent missionary settlement was effected in 1869. There are now 3 missionaries of the New Hebrides Mission at Tanna, with
several native workers, a printing house, and about 30 communicants. At Futuna, the first missionaries were Samoan converts, sent by the LMS in 1841. They were at once killed and eaten by the inhabitants. In 1851 a convict from 300 feet in height, andromorphic to an extent gaining the hearts of some of the people. It is still treated as an outstation of Aneitium, and the people have made progress in adopting Christian principles of life. Aniva, like the other islands, is of volcanic formation, but it is only 800 feet above the sea, and composed of reef of coral upon which the surf is ever breaking. The LMS sent Samoan teachers there in 1840, one of whom was killed. Other teachers were sent from Aneitium, but little progress was made until Rev. J. G. Paton arrived there in 1868. This was the island of scanty water supply, where the back of heathenism was broken by the tact of the missionary in digging a well which supplied the people with water. It is now a station of the New Hebrides Mission, with 1 missionary and his wife, 1 missionary woman, 5 schools, and 800 children, of which Efate was visited by Rev. John Williams, of the LMS, in 1839. He chanced to go toward a place where the natives were holding a feast. Traders had seized the food from such feasts in years gone by, and the natives, supposing that Mr. Williams and his companions were about to do the same, killed him in self-defense. The LMS sent native converts from Samoa there in 1840, but they were driven away. Others were sent in 1852, some converts were made, taken away, and educated by the LMS and sent back to teach their own people; and in 1857 the Rev. G. Gordon and his wife were sent there by the Nova Scotia Presbyterians. They were both murdered. Mr. Gordon’s brother went out to take up the martyr’s work, and he, too, was murdered. The same year the New Hebrides Mission sent another missionary and his wife to Erromanga, and this temerity has been justified, for in 1900 there were 330 church members in the island under charge of a missionary and his wife, and 16 native workers. Efate, or Vate, is a beautiful island about thirty miles long, described by the earliest missionaries, and renowned in the history of noble aspect and gentle manners. The traders, with their oppression and their brutal crimes, had driven these people to fury, and the first missionary teachers, sent by the LMS in 1839, were killed and eaten. More Samoan teachers went there in 1845, and the New Hebrides Mission sent a missionary there in 1865. It now has about 250 church members. Nyuna was first entered by the native teachers of the LMS in 1845. The people now are all Christians, and there are 800 church members. Apia is another town which the LMS stationed teachers who were converts from other islands. Missionaries of the New Hebrides Mission settled there in 1882. It now has 480 church members. Ambrym is a small island in the central part of the group, with an active volcano. It was occupied as a station by the New Hebrides Mission in 1892, after having been visited by native missionary teachers. It is now a center of work for several neighboring islands, with a hospital and a strong missionary force. Malakula is one of the larger islands, being about sixty miles long. It is inhabited by a cannibal people still. It has 3 missionaries of the New Hebrides Mission. Espiritu Santo is seventy miles long, and is the largest of the New Hebrides. It was discovered by the Spaniard Fernandez de Quiros in 1606. He supposed it to be a great continent, bestowed upon it the pious and cumbersome name "Tierra Australis del Espiritu Santo," and named it permanently in consequence of his discovery. The name is commonly reduced in practice to Santo, or at most to E. Santo. Cannibals are still found on this island also. The New Hebrides Mission has established there several flourishing stations and an industrial school. The northern part of the island and the Torres Islands and the Torres Islands, is the field of the Melanesian Mission, begun by Bishop Selwyn of New Zealand in 1859. This has been a very successful mission. In Mota the inhabitants are all Christians, and in Merelava and Motalava there are strong Christian churches with some hundreds of members.

Taking the New Hebrides as a whole, probably few mission fields have so brought into prominence the splendid courage and devotion of both missionaries and native workers, and the depth and permanence of the change produced in a barbarous and heathen people by acceptance of the leadership of Jesus Christ.

NEW HEBRIDES MISSION: This is a synodical union of missionaries of several different Presbyterian carrying on mission work in the New Hebrides Islands. The Presbyterians supporting this mission are the Presbyterian Church in Canada (formed by the union in 1876 of the various branches of Scotch Presbyterians in Canada); the United Free Church of Scotland, and the Presbyterian Churches of Victoria, New Zealand, Otago, Tasmania, South Australia, and New South Wales. The Established Church of Scotland also renders support in connection with the Church in Canada.

The representatives of these various branches of the Presbyterian Church have formed themselves into a union called the "Presbyterian Mission Synod," which meets annually, and is the supreme authority in the mission in all general matters, each missionary being under the Synod in a general way, while personally responsible only to the church by which he is supported.

The first missionary was the Rev. John Geddie, sent out in 1848 by the Secession Church in Nova Scotia. He was joined later by the Rev. John Inglis of the Reformed Presbyterian Church of Scotland, originally appointed to the Maoris of New Zealand, and followed in 1857 by Rev. John G. Paton and Rev. Josiah Copeland. Then one by one the other churches came into the union, some sending workers, some contributing to the general support of the mission. The field of the mission is called "the islands of the New Hebrides, excepting those farthest to the north, which fall within the field of the Melanesian Mission.

NEW NICKERIE. See Nickerie.

NEW ROTTERDAM. The same as Nickerie.

His body was buried in the ocean about 240 miles from Lagos. He was a laborious, deeply pious, and successful missionary. His wife preceded him to her heavenly home only by a few months. Both died from exposure to the terrible African climate. These two have a special claim to remembrance by the church to which they belonged, in that they helped greatly in the reestablishment of Southern Baptist Missions in Africa after the interruption caused by the Civil War in America.

NEWTON, John: Born about 1811; appointed missionary to India, 1835; died Murree, India, July 21, 1891.

He went to India as a missionary of the PN in 1835, arriving at Calcutta in June of that year, accompanied by Rev. James Wilson and his wife. Setting out from Calcutta in a native boat on the Ganges they began their long journey of 1,200 miles to their chosen field at Lahore.

His labors were most various. Always foremost with him was the direct preaching of the Word, and that hand-to-hand effort by conversation with individuals which he felt to be one of the missionary's most effective methods. He was a persuasive preacher, both in English and in the vernaculars.

Dr. Newton took with him when he first went to India an old-fashioned wooden printing press, which he set up in a little house secured for that purpose, and thus laid the foundation for that publishing establishment which, during the next fifty years, was destined to issue about two hundred and sixty-seven million pages in ten different languages. In this literary work, Dr. Newton throughout his missionary career was eminent. The Punjabi language is indebted to him for the foundation of its religious literature. Besides the translation of the New Testament into Punjabi and numerous tracts in that language, his literary labors, with those of his associate, Rev. L. Jaavier, included a Punjabi grammar and dictionary, a commentary on Ephesians in Urdu, and important tracts in both Urdu and Hindi.

From the Ludhiana Mission, of which Dr. Newton was then the senior missionary, was issued in 1858 that call to the observance of the week of prayer, which has since become so widespread and so fixed a custom throughout the Christian world.

NEW ZEALAND: The colony of New Zealand consists of three islands, viz., North, Middle, and South, or Stewart's Island, together with certain small islets. The North Island is 44,000 square miles, the Middle Island 55,000, and Stewart's Island 1,000 square miles. Thus the area of the three islands in round numbers is about 100,000 square miles. The principal islands are separated by Cook's Straits, and Poveaux Straits separate Stewart's from Middle Island. The entire length of the colony is 1,100 miles, and resembles Italy in form, while in size it is somewhat less than Great Britain and Ireland.

In the North Island the mountains occupy one-tenth of the surface, and vary from 1,500 to 6,000 feet in height. There are a few lofty volcanic mountains, as Tongariro (5,600 feet), which is occasionally active; Ruapehu (9,100 feet), which is inactive; and extinct volcanoes above the snow-line. In the Middle Island Mount Cook rises to about 13,000 feet in height. New Zealand is situated in the South Pacific Ocean, 1,200 miles south of the Australian continent, and about 8,000 miles from San Francisco. The entire group lies between 34° and 48° S. latitude and 166° and 179° E. longitude.

The climate is unquestionably one of the finest in the world. The mean annual temperature of the different seasons for the whole colony is, in spring 55°, in summer 63°, in autumn 57°, and in winter 45°. In future it will become the favorite resort of persons seeking health from all parts of the world, possessing, as it does, within a limited area, the most charming scenery and most desirable climate. The death rate is only 10.29 per 1,000.

The natives (called Maoris) are of Malay origin, and superior to other inhabitants of the Pacific intellectually and physically. The Maori is the average size of a European, viz., 5 ft. 6 in but not so well developed. Mentally the natives are capable of very considerable development, and may hereafter fulfill Lord Macaulay's prediction of them.

The government is administered by a Governor appointed by the crown, and a Ministry, a Legislative Council nominated by the crown, and a House of Representatives elected by the people. The population is about 800,000; of these, 40,000 are Maoris.

New Zealand was first discovered by Tasman in 1642, and surveyed by Captain Cook in 1770. Thereafter it was frequently visited by whalers, and Maoris from New Zealand were frequently taken to Australia. It was to this circumstance that the beginning of missionary work in New Zealand is due. The apostle to the Maoris was Rev. Samuel Marsden, of the Church of England, who was chaplain of the penal settlement at Port Jackson in Australia. He was struck by the superiority of the Maoris whom he saw, and in 1807 he returned to New Zealand as the CMS to Macedonia, a mission in New Zealand. Matters did not move quickly, and it was not until 1814 that Marsden set out with three lay missionaries in a brig that he had bought for the purpose. He had with him several Maoris, with whom he had become acquainted; two of them chiefs. He landed his party at the home of one of these men, and on Christmas Day, 1814, inaugurated the mission by an open-air service, the first Christian service ever held in New Zealand; one of the Maoris translating to the people what Mr. Marsden said in his sermon.

The work went on in a marvelous manner until, the European settlers in the islands having greatly increased in numbers, Bishop Selwyn was consecrated as Bishop of New Zealand in 1841. He was amazed at what he found. Everywhere he found the natives eager for instruction, meeting for daily prayers, keeping Sunday, learning to read the portions of Scripture that had been translated into their language. "In short," he wrote home, "I seem to see a nation born in a day." But not long after this war broke out in the islands, largely due to the missionaries at the grabbing by English settlers; the "Hau-hau" superstition invaded the churches, and within twenty years the whole missionary enterprise seemed doomed, through the rapid diminution of numbers of the natives.

Meanwhile the Church of England was consolidating and increasing its forces among the European settlers. It sought from the beginning to make the adjacent islands of the Pacific
the field of its own efforts at evangelization, and has nobly fulfilled its duty. It was Bishop Selwyn who began that work in the New Hebrides, which is now the Melanesian Mission, and as early as 1855 the martyr Bishop Patteson was appointed over the islands, which now form a diocese of New Zealand, while New Zealand itself is hardly to be called a foreign mission field at present.

The WMS was the first society to follow in the footsteps of the CMS. It sent its first missionaries to New Zealand in 1822. But disaster followed the effort. In five years no impression had been made; the mission station at Kaeo, in what is now the district of Auckland, was destroyed by hostile Maoris, and the missionaries, barely escaping with their lives, retired to Australia early in 1827. But they returned and opened a new station in New Zealand the same year. After five years more of seemingly fruitless work light began to appear, and in 1834 eighty-one converts were baptized in one day. In 1855, when the Australian Wesleyan Conference was formed and took the control of the mission, there were 16 circuits or stations, 500 European and 2,500 Maori members, 2,500 European and 7,500 Maori and native churches or other places of worship for Europeans, and nearly 200 for Maoris. Then the same experience befell the Wesleyans that for a time seemed to overwhelm the Church of England missions. War and the revival of superstitions paralyzed growth. The Maoris shot Whiteley in 1869, a missionary who had given his life to their welfare. The whole enterprise seemed to be coming to an end. But, as in the case of the Church of England, so in the case of the Wesleyans: the European Wesleyan churches of New Zealand grew and prospered; in 1794 the Wesleyan Conference of New Zealand was formed and the local church has since then done its share in the work of evangelizing the remains of the Maori people.

New Zealand as a Christian country has also its Presbyterian Church organization. Presbyterian missions to the Maoris began in 1841. While the Presbyterians of New Zealand have done their share of the local work of evangelization, their special field has been the New Hebrides mission, well known to the world through the thrilling descriptions of the saintly Paton. The Presbyterians, while they have given up the stations in New Zealand and give their funds for missionary work to the LMS, with which they cooperate. The Baptists came late into the field, but they have a vigorous missionary organization and besides work for the Maoris they maintain missionaries of their own in India.

Work of missions for the Maoris is thus seen to be a work of the churches in a Christian land, aided also by volunteers like the Salvation Army, who have come into the islands and attracted the attention of the Maoris in their own way. New Zealand is no longer an outpost of evangelization, but a new center whence the blessed influences go forth. Meanwhile contact with the great outside world has brought to the natives a variety of adverse influences. One notable example of this is the great inundation of Mormons, who, it is reported, have won 3,000 native converts. Those who have carefully studied the subject speak of the Maoris' future as not promising. Christianity has striven to elevate the natives; but so-called civilization, introducing alongside the Gospel message many forms of vice, has done much to degrade and destroy.

NEYOOR: A town in Travancore, India, 22 miles N. of Cape Comorin. Station of the LMS (1828), with (1903) 3 missionaries and their wives, 2 women missionaries, 229 native workers, 71 outstations, 59 day schools, 61 Sunday schools, 4 boarding schools, 7 dispensary, 1 leper asylum and 13,259 professed Christians, of whom 1,699 are communicants. Station also of Mission to Lepers (1887), with (1903) a home for untainted children of lepers.

NGANDA: A settlement in the French Congo Territory, Africa, not far from the Congo River. Station of the Swedish Missionary Society (1890), with (1901) 3 missionaries, 2 of them married, his wife; 2 women missionaries, 15 native workers, 15 outstations, 1 place of worship, 1 Sunday school, 1 boarding school, 1 dispensary, 1 industrial school, and 248 professed Christians.

NGAN-HSIEN: A village in the Province of Sze-chwan, China, situated 25 miles N. of Mien-chau. Station of the CMS (1894), with (1903) 3 missionaries and their wives, 1 woman missionary, and 8 professed Christians. The name is also written An-hsien.

NGAN-JEN-HSIEN: A town in the Province of Kiang-si, China, situated 45 miles N. E. of Fu-chau-fu. Station of the CIM (1859), with (1903) 3 women missionaries, 4 native workers, 3 outstations, 4 places of worship, 1 Sunday school, 1 day school, and 66 professed Christians. Some write the name Gan-ren.

NGAN-KING-FU: A town in the province of Ngan-hwei, China, on the left bank of the Yangtse-kiang, 100 miles S. W. by W. of Wu-hu. Station of the CIM (1869), with (1903) 2 missionaries, 2 with his wife; 1 school, 1 day school, and 34 Christians, of whom 26 are communicants. Some write the name An-k'ing.

NGAN-LU-FU: A town in the province of Hu-pei, China, situated at the left bank of the Han-kiang, 65 miles N. E. of I-chang. Population, 50,000. Station of the WMS, with (1903) 1 missionary, 7 native workers, 1 outstation, 5 places of worship, 1 Sunday school, 2 day schools, and 154 professed Christians, of whom 74 are communicants.

NGAN-SHUEN-FU: A town in the province of Kwei-chau, China, situated 30 miles S. W. of Kwei-yang-fu. Station of the CIM (1888), with (1903) 2 missionaries, 1 of them with his wife; 4 native workers, 2 outstations, 3 places of worship, 1 Sunday school, 1 day school, and 63 professed Christians. Some write the name Gan-shun.

NGAN-TUNG-HSIEN: A town in the province of Kiang-su, China, situated at the head of the estuary of the old course of the Hoang-ho, and about 23 miles N. E. of Hwei-ngan-fu. Station of the CIM (1893), with (1903) 3 women missionaries and 1 native worker. Some write the name Ang-tung.

NGAO: A German mission station in British
East Africa, on the Tana River, about 12 miles N. by W. of Golbanti. Station of the Neukirch Mission Institute (1887), with (1903) 2 missionaries and their wives, 2 outstations, 1 place of worship, 1 Sunday school, 3 day schools.

NGAZI. See VUQA.

NGOOGWE: A village in Uganda, Africa, situated in South Kyagwe region, N. by S. of the Victoria Nyanza and about 26 miles E. by S. of Mengo. Station of the CMS (1893), with (1903) 1 missionary and his wife, 2 women missionaries, 235 native workers, 4 day schools, 1 dispensary, and 3,795 professed Christians, of whom 1,453 are communicants.

NGOMBE: A town in the Congo Free State, West Africa, situated about 60 miles S. W. of Leopoldville and about 6 miles from the left bank of the Congo River. Station of the BMS (1884), with (1903) 5 missionaries, 3 of them with their wives; 1 woman missionary, 166 native workers, 6 outstations, and 407 professed Christians. The town is the property of Mr. Wathen. The name is given to the place by Europeans.

NGU-CHENG: A village in Fo-kien Province, China, situated 22 miles S. W. of Fu-chau-fu. Station of the ME, with (1903) 3 women missionaries, 24 native workers, 2 outstations, 5 places of worship, 1 Sunday school, 12 mission schools, 11 day schools, and 2,192 professed Christians.

NGUNA: An island in the New Hebrides group. Station of the New Hebrides Mission Society, with (1900) 2 missionaries, 1 with his wife; 32 native workers, 1 Sunday school, 1 day school, 1 dispensary, and 820 professed Christians.

NIAMKOLO: A settlement in British Central Africa, situated at the S. end of Lake Tanganyika. Station of the LMS (1889), with (1903) 2 missionaries and their wives, 14 native workers, 31 professed Christians, 1 Sunday school, 4 day schools, 1 dispensary, 1 industrial school.

NIAS: An island lying to the west of Sumatra, in latitude 1° north. Area, 2,523 square miles. The Nias are a daughter people of the Javanese. The native town is situated on the island. The population is estimated at 250,000. They are a lively, active people, fond of dancing and of cutting off heads; and they are pagans who have so far resisted the invitations of Mohammedan missionaries. These islanders are in race allied to the Battaka of Sumatra, but their language is a dialect peculiar to the locality. The number of Christians in the island (1900) is 4,300, with some 2,000 more who are candidates for baptism.

NICARAGUA: A republic of Central America, bounded north by Honduras, east by the Caribbean Sea, south by Costa Rica, and west by the Pacific Ocean. Area, about 49,500 square miles. The principal mountains are in a range from 10 to 20 miles back of the west coast, and running parallel to it, sometimes rising in high volcanic cones, sometimes subsiding into low plains or places of slight elevation; it seems to have been the principal line of volcanic action, and Nicaragua is marked by some very high volcanoes. The Coco River, which rises in the Segovia Mountains, is the longest in Central America, its course being about 350 miles. The San Juan River, 120 miles in length, is the only outlet of the beautiful lakes Managua and Nicaragua, and plays an important part in the plan for an interoceanic canal by the Nicaragua route. Climate, except in the very highest portions, is essentially tropical; the northeast part is very damp; rainfall is moderate. The soil is very rich, particularly on the Pacific slope, where all tropical fruits and plants thrive abundantly. Population is about 600,000, consisting of aborigines, mulattos, negroes and half-breeds. The full-blooded Indians, who are civilized, are a sober and industrious race, but the half-breeds are lazy, vicious, and ignorant. The executive power is in the hands of a President, elected for four years. The legislature has but one house. Education is at a low ebb. The state religion is Roman Catholic, and other religions are not publicly tolerated. The chief industry is cattle-raising. The capital, Managua, has 30,000 inhabitants.

Mission work in Nicaragua is carried on by the Moravians on the Mosquito Coast. In 1890 permission was given the Moravians by the Nicaraguan Government to follow their converts into the interior, from which the missionaries have been jealously excluded.

NICKERIE: A village in Dutch Guiana, South America, located on the estuary of the Corentyne River. Station of the Moravian Mission (1885), with (1901) 1 missionary and his wife, 9 native workers, 1 place of worship, 2 Sunday schools, 1 day school, and 113 communicant Christians.

NICOBAR ISLANDS: A small group of islands attached to British India, lying in the Bay of Bengal, northeast of Sumatra, and south of the Andaman Islands. There are 8 large islands and 12 small ones. Great Nicobar is 30 miles long and from 12 to 15 miles wide. The islands are well wooded and fertile. Coconuts are raised in great abundance. The inhabitants, numbering (1901) 6,310, are of the Malay race, and speak a form of the Malay language. They have been known to history for at least 1,500 years. The Nicobar swallow is the builder of the edible birds' nests, so highly prized by the Chinese, and these nests are the principal exports, together with bèche-de-mer, tortoise-shell, and ambergris.

Mission work is carried on in these islands chiefly by the Danish Mission Society.

NICOMEDIA: A town and seaport in Asiatic Turkey, situated 53 miles E. S. E. from Constantinople, at the head of the gulf of the same name. It was the ancient capital of Bithynia, being built by Nicomedes I. in 264 B.C., and during the Roman Empire it was frequently used as an imperial residence. Under Turkish rule it decreased very much in importance, but has grown again since the extension of the railway from Constantinople to the interior of Asia Minor. It has a Turkish navy yard. Population about 15,000. Station of the ABCFM (1847), but now (1903) an outstation with 6 native workers, 2 places of worship, 4 Sunday schools, 2 day schools, and 258 professed Christians. The Turkish name of the place is İsmid.

NIEN-HANG-LI: A town in Kwangtung, China, situated about 60 miles N. E. of Swatow. Station of the Basel Mission Society (1866), with (1903) 3 missionaries, one of them with his wife; 18 native workers, 3 outstations, 9 day schools, and 893 professed Christians, of whom 489 are communicants.

NIGERIA: A British possession and sphere of
influence in W. Africa. It comprises Northern Nigeria, Southern Nigeria, and Lagos. Its southern limit is on the Gulf of Guinea and it extends northward to Lake Chad and the French Sahara. On the east it is bounded by Kamerun, and on the west by Dahomey and the French military territories. The whole area is about 480,000 square miles, with an estimated population of 25,000,000, almost wholly native tribes. Much of this territory was formerly administered by the Royal Niger Company, but in 1900 that company turned all its rights over to the crown. The revenues are collected by the coast ports of Lagos and Southern Nigeria, and apportioned to the provinces by the colonial secretary.

Northern Nigeria, divided into 8 administrative provinces, has an area of about 320,000 square miles. The region to the northward is especially subject to the raids of slave traders. In 1900 the country was ravaged as far south as Jebba and Bij. An expedition was made against the raiders, and as a result of these disturbances the emirs of Bida and Kontagora were deposed, and new rulers acceptable to the natives were appointed. A decree was issued making all children under the age of 1, 1901, free, for bidding the removal of domestic slaves for the purpose of sale, and applying the penalties for slave dealing to the entire protectorate.

The Amb Berbers constitute a portion of the inhabitants, and many of the natives are nomadic. The Fulani race has ruled the land, with headquarters at Sokoto. It is the great Mohammedan power in all this region. It has openly or secretly opposed the British efforts to break up the slave trade. In 1902 and 1903 punitive expeditions under British officers have done much to bring the Fulani Mohammedan secretary, who speaks Hausa language, the one in general use among the tribes north of the Benue river. Missionary stations are established at Gierko (1903) north of the Benue, and in the regions near the confluence of the Niger and the Benue rivers, in the southern part of the territory.

Southern Nigeria, with an area of 48,000 square miles, with seat of government at Old Calabar, in the Oil River region on the Gulf of Guinea, is inhabited by the Jakiri, the Idzos, the Ibnos, and other tribes, some of which are more or less cannibalistic. Cannibalism is, however, being gradually stamped out. Missionary enterprise is active in the territory. The CMS is the society occupying the most points in Nigeria. The UFS has a strong mission in the Oil River region, and the Primitive Methodists have missionaries on the coast. About 20 points are occupied, all but one being in S. Nigeria.

NIHATA: A seaport and the place of greatest commercial importance on the west coast of the main island of Japan; situated on a low strip of land at the mouth of the Shinano River, 137 miles N. W. W. of Tokio. The city is neatly laid out, the streets leveled, paved with gravel, well drained, cleaned, and lighted with coal-oil obtained in the neighborhood. Many streets have 100,000 square miles, with 1,000 different buildings. It has a flourishing inland trade, and contains national and private banks, a government hospital, and a school of foreign languages. Climate extreme both in summer and winter. Population (1898), 53,556. Station of the ABCFM (1883), with (1902) 2 missionaries with their wives, 1 woman missionary, 1 native worker, 13 outstations, 5 places of worship, 8 Sunday schools, and 100 professed Christians.

NIKA LANGUAGE (Ki-Nazi): Belongs to the Bantu family and is spoken by some tribes in the vicinity of Ribe, British East Africa. It has been reduced to writing by missionaries of the CMS, and missionaries of the United Free Missionary Society (of Japhet) have also made literary use of it. It has been written with Roman letters.

NIMACH: A town of Central India, situated in Gwalior state, 134 miles N. W. by N. of Indore. Altitude, 1,613 feet. Population (1891), 6,300, of whom 3,800 are Hindus and 1,300 are Mohammedans. Station of the PCC (1884), with (1903) 4 missionaries, two of them with their wives; 15 native workers, 2 outstations, 1 place of worship, 3 Sunday schools, 7 day schools, 2 dispensaries, 1 hospital, 1 orphanage, and 27 professed Christians. Society writes the name Neemuch.

NIMBE: A village in West Africa, situated about 25 miles from the mouth of Brass River in the Delta of Benin. Station of the CMS (1886), with (1903) 2 missionaries and their wives, 4 native workers, 2 outstations, 1 place of worship, 2 day schools, 1 boarding school, 1 industrial school, 1 dispensary, and 595 professed Christians, of whom 59 are communicants. These statistics include also Brass Tuwon, at the mouth of the river. Society writes the name Brass Nnembe.

NIMBA: A town in the Central Provinces of India, situated in the Narbada division, 18 miles S. of Hoshangabad. Station of the Swedish Evangelical National Society (1856), with (1902) 2 missionaries and their wives, 4 native workers, 2 outstations, 1 place of worship, 1 day school, and 115 professed Christians, of whom 61 are communicants.

NING-CHUA: A town in the province of Shantung, China, situated on the coast 18 miles E. of Chi-fu. Station of the CIM (1890), with (1903) 1 missionary and his wife, 1 woman missionary, 3 native workers, 1 place of worship, 2 day schools, 1 dispensary, and 92 professed Christians.

NING-HAI-CHUA: A town in the province of Che-kiang, China, situated 35 miles S. S. W. of Ningpo-fu. Station of the CIM (1868), with (1903) 1 missionary and his wife, 1 woman missionary, 3 native workers, 1 day school, and 116 professed Christians, of whom 61 are communicants.

NING-KWO-FU: A prefectural city in the province of Nganhwei, China, 92 miles northwest of Hang-chau. Station of the CIM (1874), with (1903) 2 missionaries and their wives, 1 woman missionary, 7 native workers, 1 Sunday school, 1 day school, and 131 professed Christians, of whom 88 are communicants.

NING-PO-FU: One of the five treaty ports of China opened to foreigners by the treaty of 1842. Situated in the province of Che-kiang, east of the mountains, in a plain on the left bank of the Ningpo River, 16 miles from its mouth. The old walls surrounding it, 25 feet high and 16 feet broad, is in a good state of preservation. There are the usual gates of all Chinese walled cities, north, east, south and west, and two others, besides two passages for boats, in the 5 miles circuit. The principal striking buildings are the large ice-houses, the pagoda, 100 feet high, and the Drum-tower, built earlier than the 15th cen-
tury. Temples and monasteries are numerous and very handsome. The houses are mostly built of brick, and are usually of but one story. The city suffered from the ravages of the insurgents during the Taiping rebellion, when it was occupied for six months (1864). It has a library of 50,000 volumes.

The foreign trade of Ningpo is quite considerable. Silks, cottons, and white-wood carvings are this city's most important products. It was occupied by the English forces on the 12th of October, 1841, after the fort at the mouth of the river Chinhai was successfully stormed.

The climate of Ningpo is variable: the usual range of temperature is from 29°-100° F. The rainfall is about 50 inches, and the river is often subject to malaria. Population (1901), 2,250,000.

The following missionary societies carry on various enterprises in the city and adjacent region: The ABM (1843), CMS (1848), PN (1854), CTM (1859), and the UMFC (1864). These societies, together with the Nova Scotia brethren (1903) 45 missionaries, men and women; 175 native workers, 32 days schools, 7 boarding schools or higher educational institutions, 7 hospitals and dispensaries, and 4,801 professed Christians.

NING-TE-HSIEN: A town in the province of Foo-chien, China, situated on the coast about 45 miles N. E. of Fu-chau. Station of the CMS (1890); 3 women missionaries, 51 native workers, 2 outstations, 12 days schools, 1 boarding school, and 1,243 professed Christians. Society writes the name Ning-Taik.

NISBET, Henry: Born September 2, 1818, at Laurieston, Glasgow, Scotland; studied at Glasgow University, Relief Divinity Hall, Paisley, and Cheshunt College; sailed August 11, 1840, as a missionary of the LMS, and arrived at Tamsui on the New Hebrides Islands. The natives were so hostile that he went to Upolu, Samoan Islands, where he settled at Fasitoa, and had the charge of ten villages. He spent much time in visiting the outstations, and was one of the missionaries who accompanied the Nova Scotia brethren to select their station in the New Hebrides, on the island of Anetium. He was one of the revisers of the Samoan Bible.

Later he had charge of the Mission Seminary and of the Press at Malua. During his residence at Malua he prepared for the students many lectures, sermons, notes of Scripture, etc., which were subsequently published in England under his supervision. He spent some eight years longer in the mission field in various departments of usefulness, and died at Malua May 9, 1876. He received the degree of L.L.D. from the University of Glasgow.

NISKY: A town on south coast of St. Thomas Island, West Indies, one and one-half miles from St. Thomas town. Station of the Moravian Missions (1753), with (1900) 1 missionary, 4 native workers, 1 place of worship, 2 day schools, and 249 communicant Christians.

NIU-CHWANG. See New-chwang.

NIUE or SAVAGE ISLAND: An island lying between the Hervey and Samoan Isles, and about 1,500 miles S. and E. of the former. Climate hot; temperature 75°-95° Fahr. Population, 4,726 stationary and 363 away in ships, etc. Race, light copper-colored Malays, Polynesians. Language, a combination of Tonganese and Samoan. Missionary work was commenced here in 1849 by the LMS. Out of a population of 4,850 about 4,000 are Christians, 1,650 of them members of the church. The natives of this place have lately maintained a certain number of evangelists in New Guinea, who come home at intervals to tell of the blessing of God on their work.

NKALA: A settlement in northwest Rhodesia, Central Africa, situated in Barotseland about 125 miles E. of Lealui. Station of the Primitive Methodist Missionary Society, with (1903) 1 missionary and his wife, 1 native worker, 2 places of worship, 1 Sunday school, and 4 professed Christians.

NOAKHALI: A town in Bengal, India, situated in the Noakhali district, 180 miles E. of Calcutta. Population, 5,500, of whom 2,500 are Hindus and 2,000 are Mohammedans. Station of the Queensland Australian Baptist Mission Society (1889), with (1901) 2 missionaries, 1 woman missionary, 9 native workers, 1 outpost station, 1 day school, and 10 professed Christians.

NODOA: A town on the island of Hai-nan, Chinese Empire, situated about 90 miles S. W. of Hai-nan, and lying in a wilderness almost entirely surrounded by mountains, and has very pleasing environs. The people are of several distinct races, many of them being Hak-kas from the province of Kwang-tung. The different dialects found here constitute a serious obstacle to missionary work. Station of the CMS (1903) 9 missionaries, 1 woman missionary, 6 native workers, 2 outstations, 2 places of worship, 1 Sunday school, 1 day school, 2 boarding schools, 1 hospital, 3 dispensaries, 1 printing house, and 84 communicant Christians.

NOGUGU: A settlement on Espiritu Santo Island, New Hebrides. Station of the New Hebrides Mission Society, with (1900) 1 missionary and his wife, 8 days school, and 24 professed Christians.

NONGSAWIA. See Cherra Punji.

NONGOMA: A settlement in Zululand, Natal, Africa, situated about 12 miles N. E. of Bethel. Station of the Zululand Missionary Diocese (1892), with 1 missionary and his wife, 2 native workers, 3 outstations, 2 Sunday schools, and 1 dispensary.

NORFOLK ISLAND: An island situated in the Pacific Ocean, between New Zealand and New Caledonia, about 1,200 miles E. N. E. of Sydney; a dependency of New South Wales. Population, 500. Headquarters of the Melanesian diocese and of the Melanesian Mission. The training school for all the native workers for the Solomon Islands, Banks Islands, and the northern New Hebrides is at Norfolk Island. The other inhabitants of the island are descendants of the "Bounty" mutineers from Pitcairn Island. The SFG maintains a chapel at Norfolk Island for their benefit. The Melanesian Mission has (1900) 3 missionaries, 1 with his wife; 1 theological class, 1 printing house, and a steamer.

NORTH AFRICA MISSION: With the fall of the French Empire and the establishment in its place of the French Republic, religious liberty was granted not only to France, but also to Algeria, which was subdued by her in 1830. Thus was North Africa opened for the introduction of the Gospel. Mr. George Pearce, who visited Algeria in 1876, revisited it in 1880, and returning to England aroused considerable interest in the Kabyles, or the Berber tribes inhabiting the mountains a
little to the east of the city of Algiers. A mission to these interesting people was started. Mr. Grattan Guinness, who paid a brief visit to Algeria, and Mr. Edward Glenny, who had independently been sent to the same place, united in forming a committee for its management. In November of 1881 Mr. Pearce, accompanied by Mr. Glenny, returned to Algeria, taking with him two young brethren to work under Mr. Pearce's direction. They settled at Djemmâa Saârij, but met with so much difficulty through the suspicion and opposition of the French local administrator, that one of the young men, a Syrian, retired from the work, and the other returned in the summer of 1882 to Europe to seek a fellow-laborer with a French diploma who might be more favorably received by the local authorities. After encountering many difficulties, which threatened again and again to destroy the whole work, the mission was reorganized in 1883. Several other friends joined in forming a council, and a fresh band of workers was taken out by Mr. Glenny, who then proceeded to Tangier, the council having determined to widen its sphere to the other aboriginal or Berber races of North Africa. Since then it has step by step extended its work, establishing stations in various places in Morocco, Algeria, Tunisia, and raising a home mission to the Bedouins in Northern Arabia. It now no longer confines itself to the Berbers, but seeks to evangelize among all the Muslims, and is hoping to do definite work also among Europeans and Jews. There are seven fields into which the work is divided, but the few existing stations and home missions, in North Africa, have hitherto worked under direct control from London.

The character of the mission is like that of the Young Men's and Young Woman's Christian Associations, evangelical, and embraces members of all denominations who are sound in their views on fundamental truths. The missionaries seek, by itinerant and localized work, to sell or distribute the Scriptures far and wide; and by conversation in the houses, streets, shops and markets, in town and country, to teach Christian doctrine, encouraging to profession of faith and baptism. Educational work is not a prominent feature in this mission, but is subordinate to evangelical work. Medical aid has been found most useful in removing prejudices. A hospital and dispensary are established at Tangier and a dispensary at Fez, but in Algeria much difficulty has been experienced through the law forbidding the practise of medicine without a French diploma.

The Mission in Algeria has stations at Djemmâa Saârij, with two missionary women; Shershell, two women; Constantin, 7 missionaries; Algiers, 7 missionaries. Total in Algeria, 18, of whom 5 are men. In Morocco: Tangier, 10 missionaries; Fez, 5 missionaries; Tetuan, 4 missionaries; Casablanca, 5 missionaries; El Arajah, 2 missionaries. Total, 26 missionaries, of whom 6 are men. In Tunisia: Sousse, 9 missionaries; Kairuan, 4 missionaries; Bizerta, 2 missionaries. Total, 24, of whom 5 are men. Tripoli: Tripoli, 6 missionaries (2 men); Egypt: Alexandria, 4 missionaries; Shebin-el-Kom, 7 missionaries. Total, 11 missionaries, of whom 4 are men.

This growth indicates the general type of work, viz., house to house visiting, with some instruction of children and women. It is much like the Zenana work in India.

NORTH AMERICAN INDIANS: The name Indian as applied to the aborigines of America perpetuates the mistaken supposition of Columbus that he had landed upon the eastern shores of India. From this time the aboriginal inhabitants of the northern and southern states of the United States of America, which continued, the people are now generally designated as American Indians or Red Indians, to distinguish them from the inhabitants of India.

Origin: Archeological investigations are bringing to light evidence that man was on this continent in very ancient times, but whether he existed here at as early a period as in Europe, is an unsettled question. Nor is it yet determined whether the natives are autochthons or came hither from Europe or Asia. There is reason to believe that during the past ages there had been intercourse between the inhabitants of the islands of the Atlantic, on the one side, and those of the Pacific on the other, but there is no proof that this intercourse left here any dominant influence, or was potent in bringing about the civilizations developed on the uplands of Peru, or in the valley of the plateau. To-day, however, much has been achieved in Northern or in South America was the work of the same race that was here discovered by Columbus.

Culture: The aborigines of America suffered a serious drawback because of the absence, upon this Western Hemisphere, of any race capable of domestication. The llama had been tamed, but its habitat was limited, nor could it serve man as did the sheep, ox, and horse of the eastern continent. These latter animals had given stability to man's food supply, and, in the strength of their stamina, had enabled him to both time and energy for the exercise of his thought upon the devising of means for his individual and social advancement. The native of America was without such animal assistants. He had to hunt and fish and depend upon his ingenuity and commerce for whatever he possessed. His development of the maize from a tropical plant of slender capacity to a productive staple, capable of being grown over a wide geographic range, a range which even our race has not been able to greatly extend, was a remarkable agricultural achievement. Ample time, careful observation, and persistent labor. He had mastered the art of irrigation, which was extensively used in the semi-arid regions, and hundreds of miles of ditches can to-day be traced upon the abandoned plains of the Southern States. Fruits and vegetables were cultivated for food; cotton was grown and woven into cloth; wool from the buffalo and mountain sheep was spun for clothing; different vegetable fibers and the inner bark of trees were woven into articles of use; dyes were manufactured and employed for ornamentation; the calf of deer, wood, and bone; pottery-making, basketry, and the making of implements and weapons were among the widespread industries of the peoples. Skill in craftsmanship and beauty of design were particularly noteworthy in the native baskets and vases of the various tribes. Habitations were of stone, adobe, wood and tanned skins. The legends and folk-tales recounted about the fire-side were dramatic in character and contained wise and witty sayings, while the myths and rituals connected with the ceremonies were replete with mystery symbolism and touched with poetic fervor. Song accompanied all religious and social gatherings, as well as the daily avocations of the people; they pled for the lover, inspired the warrior, and sped the departed to
the spirit land. That the culture of the tribes was unequal was, in part, owing to their varying environments and to the isolation and enmi-
s caused by the great diversity of languages upon the New England coast. This isolation, which disappeared within the last two hundred years, is to-day within the limits of the United States about forty linguistic stocks, each of which contains several languages and dialects.

Organization: The political organization of the people was tribal. Most of the tribes were composed of a number of clans, but in all, the kinship group was fundamental, and to it the rights of the individual were subordinate. The ruling power was vested in a council of chiefs and leaders, but the duty of enforcing the traditional rules or laws devolved upon the chiefs. Marriage was generally exogamous, that is, a man or woman could not marry within his or her kinship group or clan, and in a large number of the tribes descent was traced through the mother only. In many instances the tribal structure was elaborate in its details, and all the members of the tribe regarded the religious ideas and symbols of the people as closely interwoven with their political organiza-

Religion: Among peoples so diverse as to language, avocations, and general culture, it is almost astonishing that they generally preserved their religious beliefs and practices. Broadly speaking, all regarded the vital and formative force of the universe as akin to that peculiar quality or power of which man is conscious within himself as defending or as defending himself. Religion was worship as-willing a course to bring about certain results—a word, as deified will power. This mysterious, invisible, animating force manifested itself in all forms, each of which had endowed with some special gift or capacity. The sun, stars, moon, winds, thunder, lightning, and all living creatures, were manifestations of this power and served as inter-

mediaries through which man could seek help of the mysterious one. The priestly class—men whose minds were open to the teaching of the gods—had charge of the rites by which these inner forces could be called upon. Praying, fasting, prayer, acts of purification, and occasionally sacri-
ifice, were observed in all religious ceremonies. While the underlying thoughts of the native religion were high and reverent in character, the overlying rites were sometimes distorted by prac-

tises arising from the abuse of priestly privilege. The belief in a future life was universal, and the character of a man's life here was considered as affecting his future hereafter. Truthfulness, hon-
esty, justice, and hospitality were persistently inculcated by priests, chiefs, and leaders.

Missionary work in the 17th and 18th centuries: Protestant missionary work began soon after the founding of the colonies. In 1621 the "East India School" was organized and endowed at Charles City, Va. The uprising in the follow-
ing year was due to a great deal of antisocial behavior. The settlers had not the Christian Indians of the West Indies, nor had the colonists, and they were thus protected by the Christian Indians. This unfortunate event checked all systematic missionary efforts by this colony until near the close of the century, when, in 1691, a legacy from the Hon. Robert Boyle was used to form the Brasserton School, "that the English language may be propagated amongst the Western Indians." This school was connected with the newly char-
tered college of William and Mary.

In New England the natives were early in-

structed in the Christian religion, but no mission work exclusively Indian was undertaken until John Eliot, in eastern Massachusetts, and Thomas Mayhew, in Martha's Vineyard, began their labors. Eliot had obtained a grant of Martha's Vineyard and the neighboring islands, and became both patentee and governor. His son, Thomas Mayhew, Jr., was minister to the settlers and extended his work to the Indians living thereabouts, who numbered several thousand. He mastered the Mayhew language, and soon had a successful mission. The first convert, Hiacoomes, placed himself under Mr. May-

ewhew's instruction, and later became a teacher and afterward a preacher to his own people. In January, 1651, the first school in New England for the instruction of Indians was established by Mr. Mayhew. In October, 1652, the first mission church was organized, with 282 members; the coven-
nant was prepared by Mr. Mayhew in the In-
dian language. In 1657, when on his way to England to solicit aid for his work, Mr. Mayhew was lost in a storm. His father, the governor, after seventy years old, began in 1721 the study of the native language, and carried on the mission, preaching at least once a week at some of the plantations, "walking sometimes twenty miles through the woods to the Indians," and continued these labors until his death, in his ninety-third year. His grandson, John, became associated with the work and continued in it until his death in 1688, when his son Experience took up the task and continued to preach to the Indians for thirty-
two years. In 1709 he translated the Psalms, and later the Gospel of John. In 1670 the first Indian church with a native pastor was organized, the adult Christians on the island numbering about three thousand.

John Eliot was born in Essex, England, 1604. He came to New England in 1631, and the next year was settled over the First Church at Rox-
bury, and continued in this charge until his death in 1690. Soon after his arrival he began the study of the native tongue and taught all the Indians who visited him from two catechisms he had framed in their language. In 1647 the General Court set a tract of land, called Newton, on the borders of the present towns of Newton and Watertown, for the use of the Indians. As John Eliot's mission work progressed, he gathered the Christian Indians into these towns, which became known as "Praying Indian Towns." He established schools, taught the natives various industries, and organized a form of government similar to that proposed by Jethro to the Israelites. The first of these towns was located at Natick in 1651 and six other towns were soon after established. Between 1670 and 1673 seven more towns were organized, and in 1674 these towns contained one thousand one hundred and fifty church members. In 1675 King Philip's war broke out. The first warning came from the Christian Indians who, in the face of fearful hardships, rendered invaluable service to the colonists. The story of the grievous wrongs done these faithful friends can be read in Mr. Daniel Gookin's narrative, "An Historical Account of the Doings and Sufferings of the Christian Indians of New England, in the years 1675, 1676, and 1677, impartially drawn, by the well acquainted with them. In 1678 John Eliot completed the translation of the Book of Psalms, which, together with the catechism, was printed at Cambridge the same year. No copy
is extant. In 1661 the New Testament was printed and two years later the entire Bible. This was the first Bible ever printed on the America continent. A new edition was called for and printed in 1680.

In 1742 Rev. Jonathan Edwards took a double charge at Stockbridge, of both whites and Indians. He had to give up the language of the natives, and this knowledge proved of service to him in his work among the Indians in western Massachusetts.

When, in 1657, John Eliot attended a council held at Hartford, Conn., he preached to the Podunk, but they utterly refused to receive a missionary, because the English having "taken their lands sought to make them servants." Rev. James Fitch, pastor of the church at Norwich, Conn., being acquainted with the language of the Mohicans, succeeded in establishing a church among these Indians, with some forty members.

The Moravians began work at Sharon, western Connecticut, in 1742. In the following year Rev. Eleazer Wheelock, of Lebanon, Conn., took into his family a young Mohican, Samson Occom, as a pupil. The rapid advance made by this Indian youth in English, Latin, Greek, and Hebrew enabled him to become a teacher at New London, Conn., in 1748, and to be ordained to the ministry in 1756. Mr. Wheelock's success with Samson Occom led to the establishment, by the aid of Mr. Joshua Moor, of the Moor Indian school at Williamstown, Conn. In 1765 the Rev. Samson Occom went to England to raise funds for this school, and succeeded in securing some ten thousand pounds from friends of the cause in England and Scotland. On his return, Dr. Wheelock removed the school from New Lebanon, Conn., to Hanover, New Hampshire, where, after a time, it became merged in Dartmouth College. A number of notable Indians were trained under Dr. Wheelock, who became teachers, missionaries, and leaders among their people.

Four chiefs of the Iroquois of New York visited England in 1708 to ask Queen Anne that missionaries be sent to instruct their people. Their request was granted, and a school was opened in Albany among the Mohawks, and a portion of the Scriptures translated into their language. The mission prospered, and in 1743 Rev. Mr. Andrews reported that but a few remained unbaptized in the tribe. Alto the war of 1744-48 interfered with the work, still just before the Revolution, the Rev. John Stuart reported that the Indians were cultivating their lands, learning trades, and were "an industrious and virtuous in their conduct as the white people."

The Rev. Samuel Kirkland, a pupil of Dr. Wheelock's school, and later of Princeton, began a mission among the Oneidas of New York in 1760. He instructed the people forward in agriculture and in Christian living. Through the influence of Mr. Kirkland the Oneidas remained neutral during the Revolutionary War or were friendly to the Colonists. In 1793 the Hamilton Oneida Academy was founded for the higher education of the white and Indian youth. This academy afterwards developed into Hamilton College.

The headquarters of the Moravian Church in America was established at Bethlehem, Penn., in 1740. From this center various missionary enterprises were undertaken among the Delaware tribes with wonderful results. The native villages and others which grew up around the missions became prosperous and orderly, and the inhabitants became Christians in their belief and mode of living. The history of the Moravian missions in Pennsylvania and Ohio is a dark page in our annals, and presents a fearful record of suffering, heroism, and martyrdom on the part of these friendly Christian Indians. (Heckewelder's Narrative of the Mission among the Delaware and Mohogan Indians. Schweinitz: Life of David Zeisberger. Loskiel: History of the Mission to the Indians.)

In Georgia the Moravian Church started a mission on the Savannah river, but difficulties between the Spaniards and the English resulted in the breaking up of the school, and the return of the missionaries to Bethlehem, Penn. No further work was undertaken until the 19th century.

While few if any of the mission stations established during the 17th or 18th centuries remain at the present day, this fact does not indicate failure of the Christianizing work of the missionaries, but is due to the great changes that have rapidly followed the displacing of the native population by the white race in the settlement of the country. The unsuccessful efforts of the early missionaries were not lost; they have borne double fruit, as, on the one hand, in the improved condition of the descendants of those Indian tribes who were the subject of so much care and solicitude, and on the other hand, they tended to foster in the white race the growth of a broader view of human relations, and a philanthropy that has since found practical expression in beneficent laws and generous government acts toward the natives of this country. Many were the friends of the Indians, and many of the missionaries were among them. Among the problems that confronted the leaders of the American Revolution, none was more pressing than that of the Indian. On June 17, 1775, the Continental Congress appointed a Committee on Indian Affairs, with Gen. Schuyler as chairman. At the suggestion of this committee, Congress divided the colonies into three departments, northern, middle, and southern, and appointed commissioners to superintend each department. By this plan the tribes were to be brought directly in contact with accredited officials within their own territory, and efforts made to reduce to a minimum the dangers of Indian hostility to the colonies. Care was also exercised to institute measures looking to the betterment of the natives. The first direct connection between the general government and mission work occurred in 1776, when Congress directed the commissioners of the Middle Department to employ a minister, a schoolmaster, and a blacksmith for the Delaware Indians. In September of the same year, as a means of conciliating the friendship of the Canadian Indians, Congress directed that $5000 be paid to Dr. Wheelock, president of Dartmouth College, to maintain the Indian youth under his tuition. On July 31, 1781, Congress authorized the payment of one hundred and thirty-seven pounds, "currency of New Jersey, in specie, for the support of tuition of the Indian youth of the Delaware nation, now at Princeton College."

By Article IX of the "Articles of Confedera-
tion," "the United States in Congress assembled" were charged with the sole and exclusive right and power of managing all affairs with the Indians. In 1784 the "Secretary of the War Office" was directed to cooperate with the commissioners on the treaties. Two years later the Indian "departments" were reduced to two, the Ohio River being the dividing line, and a superintendent placed over each and made subject to the Secretary of War. After the adoption of the Constitution, and the creation of a War Department on August 7, 1789, the Indian Department continued to be under the charge of the Secretary of War. By the Act of March 3, 1849, the Department of the Interior was created. The Bureau of Indian affairs was transferred to this Department, and the Indians passed from military to civil control. (Indian Education and Civilization. A. C. Fletcher. Senate Ex. Doc. No. 95. 48th Congress 2d Session.)

Indian Land Tenure: In the proclamation of George III., dated October 7, 1763, four principles of government in Indian affairs were laid down, which since have been in force.

The recognition of the Indian's right of occupancy. 2d. The right of the Government to expel white intruders on Indian lands. 3d. The sole right to purchase Indian lands vested in the Government, and, 4th, The right to regulate trade and intercourse with the Indians.

In 1783 the "Congress of the Confederation" issued a proclamation forbidding private purchase or gift of lands from Indians, or any settlements to be made upon unceded Indian territory.

Upon the adoption of the Constitution in 1789, the right of eminent domain was vested in the United States. (Article IV.) The relation of the Government's right of eminent domain to the Indian's right of occupancy was fully set forth by the Supreme Court in the decision rendered by Chief Justice Marshall in the case of Johnson v. McIntosh:

"On the discovery of this immense continent, the great nations of Europe . . . were all in pursuit of the same object. It was necessary, in order to avoid conflicting settlements, and consequent war, to establish a principle, which all should acknowledge as the law by which the right of acquisition, which they all asserted, should be regulated as between themselves. This principle was, that discovery gave title to the Government by whose subjects, or by whose authority, it was made, against all other European governments, which title might be consummated by possession.

"In the establishment of these relations the rights of the original inhabitants were in no instance entirely disregarded, but were necessarily to a considerable extent impaired. They were admitted to be the rightful occupants of the soil, with a legal, as well as a just, claim to retain possession of it, and to use it according to their own discretion; but their rights to complete sovereignty, as independent nations, were necessarily extinguished, and their power to dispose of the soil at their own will, to whomever they pleased, was denied by the original fundamental principle that discovery gave exclusive title to those who made it. . . . However extravagant the pretension of converting the discovery of an inhabited country into conquest may appear, if the title was acknowledged and the instance and afterward sustained, if a country has been acquired and held under it, if property of the great mass of the community originates in it, it becomes the law of the land, and cannot be questioned. So, too, with respect to the comonitant principle that the Indian inhabitants are to be protected, indeed, while in peace, in the possession of their lands, but to be deemed incapable of transferring the absolute title to others. However this restriction may be opposed to natural right and to the usages of civilized nations, yet, the Government was indispenizable to that system under which the country has been settled, and adapted to the actual condition of the two people, it may, perhaps, be supported by reason, and certainly cannot be rejected by courts of justice."

In the early years of the Government the treaties with the Indians often defined a boundary line between the "Indian country" and the United States. At first this extended from the lower of the Great Lakes to Florida, and beyond this line the United States claimed no control, so that the citizen who ventured to pass over into the Indian country could claim no protection from the Government. Recently, trading and military posts were established, and the land adjoining them secured from the Indians; and roadways between these stations were obtained, until finally the Indians were hedged in by their cessions, and were restricted to defined tracts known as "reservations." These were established either by treaty or by order of the President.

The reservations held by treaty, Act of Congress, patent, or acknowledged Spanish grants, number about 110, and cannot be alienated except by consent of Congress. They are located in Arizona, California, Colorado, Idaho, Indian Territory, Iowa, Kansas, Michigan, Minnesota, Montana, Nebraska, New Mexico, New York, North Carolina, North Dakota, Oklahoma, Oregon, South Dakota, Washington, Wisconsin and Wyoming.

At the request of the Indian Department, the President is authorized to set apart public lands as Indian reservations. (The Public Domain, 1883, p. 243.) There are between sixty and seventy. Executive orders require that this class be restored to the public domain by the President without an Act of Congress.

Three hundred and seventy treaties have been made with Indian tribes. The first was with the Delaware, September 7, 1778, and the last with the Nez Perce, August, 1868. The Act of March 3, 1871, prohibited the making of any future treaty with Indians; since then "agreements" have been made with the tribes, subject to the approval of Congress. The first of these "agreements" was with bands of the Sioux, September 20, 1871; the last, with the Choctaw and Chickasaw, March 21, 1902. (Report of Com'r Ind. Afs., 1903.)

All these treaties and agreements had reference to land. The payments to the tribes for the cessions made were sometimes cash, but generally in the form of annuities. The bulk of these annuities were in clothing, food, etc., with perhaps a small payment of money. This form was more acceptable to the white merchants than to the Indians, and the interests of trade have predominated in determining the kind of payment that should be given the Indian for his lands.

The land within a reservation was regarded as belonging to the tribe, and not subject to indi-
individual ownership. This condition tended to perpetuate tribal relations and to retard the progress of the people along the lines of the civilization of the white race. Actually as late as the close of the 19th century, a number of treaties made at that time contained provisions for the allotment of individual holdings to Indians, but this policy did not become general until the passage of the Severalty Act of February 8, 1887. The provisions of this act applyable to lands that are agricultural and grazing, but not to lands that are fitted only for grazing, or which require irrigation. This law gives 80 acres of agricultural land to each member of the tribe, regardless of sex or age. Where the land is classed as grazing, the amount is doubled.

Section 5 states: "That upon the approval of the allotments provided for in this act by the Secretary of the Interior, he shall cause patents to issue therefor in the name of the allottees, which patents shall be of the legal effect, and declare that the United States does and will hold the land allotted for twenty-five years, in trust for the sole use and benefit of the Indian to whom such allotment shall have been made, or, in case of his decease, of his heirs according to the laws of the State or Territory where such land is located, and that at the expiration of the period the United States will convey the same by patent to said Indian, or his heirs, as aforesaid, in fee, discharged of said trust and free of all charge and encumbrance whatsoever; Provided, That the President of the United States may, in any case in his discretion, extend the period. Under this act a number of reservations have been allotted to the tribes living thereon, and the remainder of the lands purchased by the Government and thrown open to white settlement. The work of allotment is still going on, and the time is not far distant when the Indians' tenure of land will have ceased to be merely the right of occupancy, and will be the same as that of white landholders.

Population: According to the report of the Commissioner of Indian Affairs for 1908, the Indians within the United States, exclusive of Alaska, number 258,665. These people are sparsely scattered within the States or Territories in which their reservations lie, with the exception of the Indian Territory, where their numbers and location are such as may enable these tribes to become a political power.

Citizenship: Section 6 of the Severalty Act of 1887 provides as follows: "That upon the completion of said allotments and the patenting of the lands to said allottees, each and every member of the respective bands or tribes of Indians to whom allotments have been made shall have the benefit of and be subject to the laws, both civil and criminal, of the State or Territory in which they may reside; and no Territory shall pass or enforce any law denying any such Indian within its jurisdiction the equal protection of the law. And every Indian born within the territorial limits of the United States, to whom allotments shall have been made under the provisions of this act, or under any law or treaty, and every Indian born within the territorial limits of the United States, who has voluntarily taken up, with his family, the occupation of a laborer, and is not apart from any tribe of Indians therein, and has adopted the habits of civilized life, is hereby declared to be a citizen of the United States, and is entitled to all the rights, privileges, and immunities of such citizens, whether such Indian has been or not, by birth or otherwise, a member of any tribal limits of the United States, without in any way impairing or otherwise affecting the rights of any such Indian tribal or other property."

About 41 per cent. of the Indian population are now citizens of the United States, by virtue of the act of 1887. This percentage will be largely increased in the near future when the "Five Civilized Tribes" of Indian Territory have relinquished their separate form of government, while the number is constantly increasing as allotments are made.

Self-support: Self-support is becoming more and more the rule and dependence upon the Government the exception. When the rapidity with which enforced changes have come upon the tribes in regard to their food supply are considered, together with the bewilderment and difficulties which attend the extinction of old customs and habits, the progress that has been made is a credit to the race, and promises well for the future of the Indian.

Education: One of the earliest authentic expressions from the United States Government, in reference to Indian education, occurs in the instructions given to Brig.-Gen. Thomas Jefferys, who, in May, 1792, was sent to negotiate with the late hostile Indians near Lake Erie: "That the United States are desirous of imparting to all the Indian tribes the blessings of civilization, as the only means of perpetuating them on the soil which they inhabit. This is done for the expense of teaching them to read and write, to plow and sow, in order to raise their own bread and meat, with certainty, as the white people do."

The first treaty provision was made December 2, 1794, with the Oneida, Tuscarora, and Stockbridge Indians, who had been faithful to the colonists.

The first general appropriation for Indian education was made March 3, 1819, for $10,000. The policy to be pursued is indicated in the following extract from the circular issued September 3, 1819: "... The plan of education, in addition to reading, writing, and arithmetic, should, in the instruction of boys, extend to the practical knowledge of the mode of agriculture, and of such of the mechanical arts as are suited to the condition of the Indians; and in that of the girls, to spinning, weaving, and sewing. It is also indispensable that the establishment (of schools) should be fixed within the limits of those Indian nations who border our settlements. Such associations or individuals who are already actually engaged in educating the Indians, and who may desire to cooperate with the Government, will report to the Department of war."

In 1825 there were 38 schools under the charge of various missionary organizations. Toward their support the Government contributed that year $13,620.41, and the Indians gave from their annuities and by their treaty provisions, $11,750. (Ibid., pp. 678 and 680.)

In 1848, 16 annual labor schools and 87 boarding and other schools were in operation. The following year the Indian Commissioner reported that "nearly the whole of the large amount
required for the support and maintenance of the schools now in operation is furnished by the Indian Department and the Northern Missionaries.

And he urged that the annual appropriation of $10,000, made in accordance with the Act of 1819, be raised to $50,000.

In 1865 the Secretary of the Interior recommended:

"That Congress provide a civilization and educational fund, to be disbursed in such mode as to secure the cooperation and assistance of benevolent organizations."

By a treaty made with the Osage Indians, September 29, 1865, Article 2 provided that the proceeds from the sales of certain ceded lands should, under the direction of the Secretary of the Interior, be applied to the education and civilization of Indian tribes residing within the limits of the United States. This fund amounted to $770,179.42, and was exhausted by 1882.

Up to 1873 Indian schools had been maintained either wholly by missionary funds or jointly with the aid of the Government, except of those supported entirely from tribal funds and under the charge of United States teachers. At this time Government day schools were established with Indian pupils increasing with each year. During the last decade of the past century all Government financial support to mission schools ceased, and at the present time most of the Indian schools are under the classified service of the Government. Where mission schools exist, they are entirely independent of the Government and supported by missionary organizations.

During the year 1903 the Government maintained 26 boarding schools off the reservations. These are large industrial and manual training schools located in the midst of thrifty communities, and their capacities range from 90 to 1,000 pupils. A valuable adjunct to these schools is the "Outing System." This "System" was instituted and has reached its highest development in connection with the Training School at Carlisle, Pa.

"This system consists in placing Indian boys and girls out in the families of surrounding farmers, the boys for general farm work, and the girls for various household duties. They usually attend public schools and are paid a stipulated sum for their labor, thus learning the value of labor in dollars and cents, and the resultant benefits of thrift." (Rep. Ind. Com', 1903.)

The average attendance at these schools for 1903 was 7,793; 91 boarding schools were in operation on the different reservations, with an average attendance of 11,290; 140 day schools were in operation on the reservations, and their average attendance was 4,497.

These figures do not include Indians attending the public schools in different parts of the country, or those pursuing higher branches in various institutions and colleges, or under missionary training.

The appropriation made for Indian education by Congress for the year ending June 30, 1904, was $5,226,650 dollars. This sum does not include the full amount expended upon Indian schools by the Government, for there are several schools on reservations which are either wholly or in large part maintained by tribal funds.

As a result of education, Indians are to-day to be found in all vocations—as farmers, mechanics, laborers, clerks, merchants; in the professions, as clergymen, physicians, lawyers, teachers; as authors and artists, and also in the army and navy of the United States.

While the favored have advanced and are well on their upward course, the transition period is still pressing heavily upon a large proportion of the people. Their faith in the ancient ideas of their fathers is shaken or gone, while faith in the new is not sufficiently established. The old ties and restraints no longer exist; old avocations are closed; old social honors and pleasures have disappeared; the people thus bereft and distraught stand to-day in greater need of the wise missionary than ever before. While his work is difficult and more onerous than in the past, it is more hopeful and less isolated. His toil and sacrifice become akin to those which confront his fellow-workers in our cities and rural districts, and demand a similar treatment.

NORTH GERMAN MISSIONARY SOCIETY.

See Germany; Missionary Societies in.

NORTH LAKHIMPUR. See Lakhimpur (North).

NORTH AND SOUTH SHEPSTONE: Towns in Natal, South Africa, situated on opposite sides of the Umzimkulu River at its mouth. Station of the Swedish Holiness Band (1889), with (1900) 2 missionaries and their wives. Station also of the PB, with (1900) 1 missionary and his wife. Societies write the name Port Shepstone; for the mission.

NORWEGIAN MISSIONS: The missionary activity of the Norwegian people began with Hans Egede. But as Norway at that time was united to Denmark, and as Egede was supported and controlled by the royal government in Copenhagen, he has been identified with Danish Missions. Entirely Norwegian in operation, for there are several Norwegian Mission societies now at work—the Norwegian Mission to the Finns, the Norwegian Mission Society, and the Mission of the Norwegian Church by Schreuder.

The Norwegian Mission to the Finns: Head-
quarters, Stavanger, Norway. On February 28, 1888, Bishop Skaar of Tromsø, to whose diocese the Finns who occupy the northern part of Norway mostly belong, sent out an appeal to the Norwegian people that missionaries or itinerant preachers to the Finns should be sent. The language should be sent out among them. This appeal was promptly taken up, and by means of a yearly subscription of about 4,000 crowns it has already been possible to set two Finnish-speaking Norwegian preachers to work among the Finns.

The Norwegian Mission Society (Det Norske Missions Selskap): Headquarters, Stavanger, Norway. In the third decade of the 19th century, after Norway had become an independent state by the separation from Denmark in 1814, there were formed all over the country, but more especially among the followers of the great revivalist, Hans Nilsen Hauge, a number of minor mission associations, the first and the largest among which was that of Stavanger, 1826. These associations sent their money and their missionaries, if any they had, to the above Stavanger station, however, placed its first missionary, Hans Christian Knudsen, in the service of the Rhenish Mission Society. In 1827 the “Norsk Missionsblad” was founded, and in 1845 followed “Norsk Missionsstidende,” which is the organ of the mission to the heathen. Then, in 1841, Jon Haugevald, a small trader, went out from Stavanger, but a personal friend of Hauge, and seventy-one years of age, went to Germany to investigate mission societies and missionary schools; and the result of his journey was, that August 8, 1842, all the minor associations in Western Norway consolidated into one society. In 1843 they were joined by all the minor associations of Eastern Norway, and thus was formed the Norwegian Mission Society. This movement was carried on almost exclusively by laymen, while the Norwegian Church, in its official position as a state institution, assumed a very cool and reserved attitude toward it—a circumstance which later proved of importance for the formation of the Mission of the Norwegian Church by Schreuder.

The Norwegian Mission Society is thoroughly democratic in its organization. The minor associations, numbering 900, besides 2,300 women’s societies, still exist, and have retained a considerable proportion of autonomy. They form eight circles, each circle holding a conference two years in succession, in June and July, and the third year the General Assembly meets. The central administration, consisting of the director of the Mission School, a secretary and eight members elected by the Conferences, has its seat in Stavanger.

The society receives some annual support from the Norwegian churches in the United States, and owns a fund of 200,000 kroners, a donation from Mr. P. von Möller, at Helingsborg, Sweden, from which it pensions old and worn-out missionaries, or missionaries’ widows and children. The widow’s pensions are not allowed to marry without the permission of the Central Board. It maintains a mission-school at Stavanger, founded in 1843, closed in 1847, but reopened in 1858, and also owns a mission steamer, presented to it by special subscription, and usually stationed at Madagascar.

The spiritual character of the Society is strictly Lutheran. According to its laws its missionaries must receive ordination from a bishop of the Lutheran State Church, and a license from the king, which is valid only for a certain field.

The Society is engaged in two different fields: (1) Zululand, and (2) Madagascar.

(1) The Zulu Mission was begun in 1844 by Schreuder, To the Norwegians, as to other missionaries, Zululand proved a very hard, but after the first hindrances were overcome, a very promising field. The first station was founded at Umpumulo, in 1850, and in 1858 the first convert, a Zulu girl, was baptized at Umpumulo. When Bishop Schreuder in 1876 transferred his services to the Mission of the Norwegian Church, he carried with him a part of the field already under cultivation; but the Society continued its labor with great energy and considerable success. In 1900 there were reported 27 missionaries (including wives), 41 native workers, 15 stations and 73 outstations, 1,016 communicants and 2,060 adherents, 32 day schools with 714 scholars, and 1 of higher grade with 182 pupils.

(2) The Madagascar Mission was begun in 1866, and soon assumed large proportions, including not only the Hovas in the inland, with a station in the capital, Antananarivo, but also, since 1874, the Sakalavas, on the western coast, and since 1888 some points on the southern coast never before visited by Europeans. In 1900 there were reported 88 missionaries (including wives), 1,785 native workers, 23 stations and 839 outstations, 34,649 communicants and 51,371 adherents, 950 day schools and 4 of higher grade, with 57,475 scholars, 3 physicians, and 2 hospitals.

The Norwegian Church Mission by Schreuder (Den Norske Kirkes Mission ved Schreuder): Headquarters, Christiania, Norway. Hans Palludan Smith Schreuder, born at Sogndal, Norway, June 18, 1817; died at Untunumbali, Natal, Africa, January 27, 1882, consecrated bishop of the Cathedral of Bergen 1866, was the father of the Norwegian Mission. His “A Few Words to the Church of Norway,” 1842, had a great effect throughout the whole country. He started the Zulu Mission under tremendous difficulties, and it is indeed to his power of personality. During the war between the English and the Zulus most of the English and German mission stations were disturbed or wholly destroyed. But Entumeni was not touched, owing to the deep respect of King Cetewayo for Schreuder. The Madagascar Mission he also directed and superintended at its beginning. Nevertheless, altho he served the Norwegian Mission Society for thirty years, it was always his wish to be the missionary of the Church of Norway, of the official state institution. Accordingly, in 1873 he separated from the Society and a committee was formed, with Bishop Tandberg at its head, and representing the Church of Norway. Bishop Schreuder took Entumeni with him, and shortly a new station was founded at Untunumbali in Natal, where a church was built and consecrated in 1881. After his death the mission was continued by his pupils, among whom are several natives, under the direction of the above mentioned committee, which has its seat in Christiania. In 1900 there were reported 13 missionaries, 8 native workers, 3 stations, 323 communicants, 665 adherents, 3 schools with 180 scholars.
In addition to these there are several minor societies: The Norwegian Committees, in aid of the Indian Home Mission to the Santals; the Bethany China Mission in Trondheim, assisting the China Inland Mission and the Norwegian Lutheran China Mission. These are closely allied to the State Church, but there are several that have sprung from the spirit manifest in the China Inland Mission and Christian and Missionary Alliance, such as the Norwegian Board of Mission printed in 1886 under the Free East Africa Mission, which carries on work in China as well as Africa; the Norwegian China Mission, in alliance with the CIM, and the Missionary Union of the Norwegian YWCA, also in alliance with the CIM. There is also a Committee for the Norwegian Medical Mission in Madagascar, and the student movement has had great influence and accomplished much for the general interest in missions.

Nott, Henry: Born in 1774; sailed in 1796 under the LMS for the South Seas. He was not an ordained missionary, but a plain, godly briefs clergyman sent to instruct the inhabitants in the trade of which he was master. On arrival he was stationed at Tahiti. He at once showed superior traits of character. When a panic seized the missionaries, and eleven of their number abandoned the island, Nott was a leader of those who insisted on enduring yet longer. When it was important to explore the island Nott was one of the two who made that dangerous missionary tour. When preaching to the natives at last began, after five years of study, Nott was one of the two men who mastered the language. And when in 1809 a rebellion broke out against King Pomaré, and the mission houses were burned, the types from the printing office melted into bullets, and twelve years of heroic effort seemed to have ended in utter failure, it was Nott who remained alone at Eimeo, while all his associates, excepting Hayward, at the neighboring island of Huahine, fled to Australia. It was the admission of the Society, and of Mr. Nott’s associates, that this bricklayer was the salvation of that mission. It was he who saw, as others did not, that little could be taught by preaching unless the people read the Bible in their own tongue. He worked twenty-seven years upon the preparation for the work and upon the work itself, sending home in the meantime for books to enable him to learn Hebrew and Greek. When the translation was complete he broke down in health, carried his manuscript to England in 1836 that he might give it a final revision, induced the BFBS to publish the book, and in 1838 loaded 3,000 of the new Bibles on a ship and sped away to his beloved island home. The great work of his life was done.

He died at Tahiti, May 2, 1844.

Nowgong: A town in Assam, British India, situated in the district of Nowgong, 56 miles E. by N. of Gauhati. Population, 5,000. Station of the ABMU (1841), with (1803) 1 missionary and his wife, 2 women missionaries, 21 native workers, 7 outstations, 5 places of worship, 5 Sunday schools, 13 day schools, 1 boarding school, and 418 professed Christians, of whom 281 are communicants.

Nowgong: A town in Central India, situated in the Bundelkhand region, 15 miles N. W. of Chatarpur. Population, 10,000, of whom 6,700 are Hindus. Station of the AFFM (1896), with (1901) 3 women missionaries, 4 native workers, 1 outstation, 3 Sunday schools, 2 day schools.

Nowrangapur. See Naorangpur.

Nsaba: A settlement in the Gold Coast Colony, West Africa, situated 45 miles N. E. of Cape Coast Castle. Station of the Basel Missionary Society (1891), with (1903) 3 missionaries, 2 of whom with their wives; 24 native workers, 7 outstations, 17 day schools, and 1,582 professed Christians, of whom 724 are communicants.

Ntonda: A plantation of 1,000 acres in Angoliland, British Central Africa, situated south of Lake Nyasa, about 100 miles N. N. W. of Blantyre. Station of the Zambesi Industrial Mission, with (1902) 2 missionaries, 1 with his wife; 6 outstations, 1 place of worship, 9 Sunday schools, 9 day schools, 1 boarding school, 1 industrial farm, and 150 professed Christians.

Nuba Language: A language spoken in the Sudan, Dongola and surrounding regions of Africa, belonging to the Nuba-Fulah group of African tongues, and written with Arabic characters. Missionaries have tried without success in this language to substitute Roman for Arabic letters, in the favor of the people. The language is used by about a million people and has great vitality.

Nuba-Fulah Race: A very considerable number of tribes, some in Egyptian Sudan, and some over against them on the west coast of North Central Africa, are found to differ so much, both linguistically and ethnographically, from the several races into which the Africans have been heretofore divided, that some of the ablest recent writers on these subjects, such as F. Müller and Dr. R. N. Cust, have added a new class or group, with two sub-groups, which they call Nuba and Fulah. This twofold race, Nuba-Fulah, is evidently very ancient—doubtless aboriginal in the lower basin of the Nile, which still continues to be the headquarters of the Nuba portion of the general group. It finally came to have its headquarters in the lower basin of the Senegal, and thence to be known as the Fulah. The Nuba-Fulah people, being so called because they were of a light brown, and thus in strong contrast with the Negroes of a purer black around them. The present scattered or fragmentary condition of the Nuba-Fulah race, a portion of it being found on the east of Victoria Nyamza, as the Kwaki and Masai, other portions on the sources of each of the two Niles, and yet other portions in different parts of the Sudan, all the way from Darfur to the Senegal, or in groups here and there among the mid-African tribes, all goes to support the idea that the original Nuba-Fulah race was broken and scattered, as already indicated, by the divisive and compelling force of another powerful race, like the Bantu, at an early age of African history.
Some live as nomads in tents, and some as a settled, industrious, thriving people, in well-built houses. There is also a tribe or group of tribes, evidently related to the Nuba family in both blood and language, in Kordofan and Darfur. They differ from the Negros around them in color and features, and also, in some two of them, what is called the Koldagi dialect, some of them the Tumale, and some the Konjara. Other tribes of this class, as the Kwaif and Masai, who call themselves Loikob, and designate their language as the Enguduk, are found on or near the Equator. The Kwaif have the Victoria Nyanza on their west and the Masai on their south. Both tribes, differing materially, as they do, from the Hamitic race on the north, and from the Bantu on other sides, are counted as belonging to the Nuba-Fulah group. They are represented as the most savage of all East African tribes. Still another group of tribes, such as the Berta and Kamal, belonging to the Nuba-Fulah race, has its home on the Blue Nile, north of the Gallas and west of Abyssinia. In this race are included also the Nyam-Nyan, together with the Golo and the Monbutto, on the sources of the White Nile and the Shary.

Turning now and going westward between the 10° and 15° of north latitude, we come upon several families of the sub-Fulah group, scattered here and there all along from Darfur through the Hausa and Mandingo countries till we come to where they abound in Bundu, Futa Jalo, and Futa Toro, south of Lower Senegal, where "they dominate," says Dr. Cust, "as Mohammedan foreign conquerors. They have placed their foot firmly down in the land of the Wolof, and the people of the coast have come under their influence as far as the river Nunez. They are numerous and powerful in Mandingoland and in the kingdom of Massina, south of Timbuktu. The kingdom of Sokoto and Cando is their creation, including the whole of the Hausa-speaking territory. Far to the east we find them in Bornu, Mandara Logon, Baghirmi, Wadai, and even in Darfur. Their tendency to expand is not on the wane, and they have made a powerful impression on the Negro population; from the union of the two races, a new population has been formed, called Torodo, Jhalonki, Toucouleur, and other names." It is unnecessary here to detail their history or speculate on their origin. Their movement has been comparatively of late date, by force of arms, and coupled with the spread of the Mohammedan religion. They are spoken of by a recent writer as "an interesting Mohammedan people of the Western Sudan in Africa, remarkable for their enterprise, intelligence, and religious zeal. They are a race, and not a nation; have many tribes, several shades of color and varieties of form, probably from the fact that they have blended with various subject races. They cultivate Mohammedan learning with much enthusiasm. Their history is quite obscure. Sokoto is their principal state, but they are the predominant people of many crypto-converts in the Sudan."

NUEVO LAREDO: A town in Mexico, situated on the right bank of the Rio Grande, opposite Laredo, Texas. Station of the American Baptist Home Missionary Society, with (1900) 1 missionary and his wife, 2 orphanages, 1 place of worship, 1 Sunday school, and 28 professes Christians.

NUKUALOF: A settlement on Tongatapu, Tonga Islands. Station of the SDA and Religious Mission Society of the same church, with (1900) 3 missionaries, 2 of them with their wives; 1 place of worship, 1 Sunday school, 1 dispensary, and 10 professes Christians.

NUMPANI. See NIMPANI.

NUPE LANGUAGE: A language belonging to the Negro group, and spoken in the country W. of Lokoja, Nigeria, W. Africa. It has an uncertain constituency, but appears to be of considerable vitality. Missionaries have written the language with Roman letters.

NURSARAVAPETTA. See NARASARAOPEET.

NUSTARIZEYI: The origin of the Nustarivey people seems lost in the obscurity of antiquity. In asking concerning their origin the most he could say was that it was very ancient. Another says that they descended from the Persians; others from the Philistines or from the tribes that Joshua drove out of Palestine. They have dwelt for hundreds of years in the mountains of northern Syria, and the regions along the Mediterranean coast as far as the plains of Cilicia. It is probable that the ethnologists and historians have taken little or no notice of them because of their political insignificance and low state of civilization. However, their religious practices sustain the theory that they are descended from some of the ancient heathen tribes of Palestine. At present they are a mixed race, as are the most of the races bordering on the Mediterranean; owing, in this case no doubt, to the Crusades, when many thousands of Europeans were lost and became mingled with the inhabitants of the country. This circumstance probably accounts for the existence of so many blonde complexions among these swarthy tribesmen. They receive their name from Nusair, one of their chieftains, or from Nusair, a dispersed leader and teacher among them some centuries ago. They inhabit Northern Syria and Cilicia, and number about three hundred thousand souls.

As to their religion, they are a branch of the Shiites, who separated under the leadership of Nusair; and their religious system was brought to perfection by one of his descendants named Khusaib. Nevertheless, while claiming to be followers of Mohammed, in private they are practically pagans. They reject the caliphate of Abu Bekr and his successors down to Abd el Hamid, the present Sultan-Caliph, and claim that the succession belonged of right to Ali. Tradition says that Abu Bekr compassed the death of his rival, Ali, by strategy, the circumstances being that Ali was praying in a mosque, and Abu Bekr, learning of it, sent two of his retainers to simulate a deadly quarrel outside the mosque, knowing that Ali, hearing the disturbance, would rush out to separate the combatants. The men would resent this interference, and would fall upon Ali and kill him. The result was as anticipated, and the deadly feud was begun which continues to this day.
This branch of the followers of Ali devised a religion of their own, and, being in the minority and fearing persecution, they bound themselves by the most horrid oaths to keep it secret. None are initiated into its mysteries under 18 years of age. The applicant for initiation to the secrets of the Nusairiyeh is rigorously examined or men as security, and these must be vouched for by two others. Such is their distrust of mankind, however, that the situation is not secure even after this, and the candidate is required to swear by the sun, moon, and stars that he will never reveal the mysteries about to be made known to him, and that if he violates his promise, he will accept the penalty of having his head, hands, and feet cut off; the same penalty being his due if he fails to complete the course of study now begun. For this reason the Nusairiyeh are extremely reticent on the subject of their religion. To reveal it is an unpardonable sin. Some years ago one of their number, a certain Suleiman Effendi of Adana, made some revelations respecting their mysteries, in a book which he published in Arabic, and which has been used in proportionately. After the publication of the book, Suleiman Effendi suddenly disappeared and was never heard of again. Doubtless he suffered the penalty. Women are not taught religion, excepting a single prayer, which is supposed to have been inculcated in particular; and in fact, women are held to have a different origin from men. When mankind sinned, Ali created the devils out of men's sins. The sins of the devils were then used as the material from which womankind was created.

The Nusairiyeh system of religious belief recalls to mind some of the Gnostic sects, being a conglomeration of almost all religions, ancient and modern, false and true. They have introduced the beliefs and the ceremonies of the Jews, the Greeks, the Egyptians, and Phcenicians, the Mohammedans, and, above all, the Christian. They worship the Caliph, Ali Ibn Abu Talib, the prophet Mohammed, and Suleiman the Persian. They consider Ali the Father, Mohammed the Son, and Suleiman the Holy Spirit, but they pay their chief adoration to Ali, ascribing to him the divine nature and attributes, and also creative power, and the dovot worshiper is represented as supplicating “his Lord, Ali Ibn Abu Talib, with a reverent heart and an humble spirit, to deliver him from his wickedness.” They teach the Caliph in pedal Mothamad, and that Mohammed created Suleiman, and that Suleimen created five great angels, and that the angels created the universe, and that each angel is entrusted with the management of some particular part thereof, viz.: One has charge of thunder, lightning, and earthquakes; another of the twelve bodies; another of the twelve hands and receives the spirits of men at death; another has charge of the health and sickness of human beings, and another furnishes souls for the bodies of men at birth. Fatima, daughter of Mohammed, and wife of Ali, in given a place very much like that assigned by Roman Catholics to the Virgin Mary. They consider that the moon is Ali’s throne, and that the man in the moon is Ali with a veil over his form, but in the hereafter the veil will be removed and all true believers will see him as he is: Hence they worship the moon. They believe that the sun is Mohammed, and pay divine honors to it. They worship fire, the wind, the waves of the sea—anything that manifests power—the shades of ancestors, and even living men of influence and renown. These last they consider to be possessed of the spirits of the prophets, it may be of Ali himself. They believe in the transmigration of souls, teaching that Muslim religious teachers after death disseminate good or evil among men in another life, and that teachers of Christians will enter the bodies of swine, and of those of the Jews, the bodies of apes. Wicked Nusairiyeh are destined to enter the bodies of clean beasts. Those who are part evil and part good enter the bodies of those who belong to sects other than the Nusairiyeh, while all good Nusairiyeh enter the bodies of Nusairiyeh, each one according to his grade and station. If one of another belief should unite with them, they claim that in past generations he was of them, but for some sin he was compelled to enter a strange sect and remain a stated time as a punishment, when he was allowed to transmigrate to his own religion. Should one of the Nusairiyeh apostatize they declare that his mother committed adultery with one of the sect with which he has united, and that he has returned to his own source.

The chief moral duty of the Nusairiyeh is to make a perpetual effort for the good of their religion. This sacred effort is divided into two parts. The first part is to revile and curse Abu Bekr, Omar, Othman, the first three caliphs, and utter imprecations against all who believe that any of the prophets, or Ali, were born of women, had human, excepting in an illusory sense, or ate or drank, or married as other men do. The second part of this sacred effort consists in keeping their religion secret from the world. This supreme effort to preserve secrecy respecting their religious belief has cultivated deceit among the Nusairiyeh to an astonishing development. They will not acknowledge that they believe in Ali. They will rather deny the belief with an oath, because admission of it would be to reveal a part of their religion. For this reason, too, this people easily distance all competitors in hypocrisy. They always accommodate themselves to their surroundings, provided they are not able to overcome them. For example, should one enter a mosque with a Muslim, he performs the prostrations and genuflections like his companion; but instead of praying as does the Muslim, he inwardly curses Abu Bekr and all his successors, and likewise him who bows at his side. Their theory in such a case is that the Nusairiyeh religion is the body, while all other religions are clothing to be worn and thrown aside at pleasure; and it matters not what a man wears; it does not injure him; and he who does not dissemble thus lacks good sense, for no sensible person will walk through the streets naked. The Nusairiyeh are revengeful. They practice blind atonement in righting wrongs among themselves. They are thievish, and consider stealing, especially from infidels, a virtue. Nevertheless they are cowardly and will not attempt either revenge or theft unless assured of personal safety. In social relations they are semi-barbarous, and there are many feuds among them, tribe against tribe. They often have bloody encounters, and leave the bodies of the slain to the hyenas and jackals. Their morality is low. All classes practise polygamy. Social purity is disregarded among women. A certain class of men, known as chiefs becomes the guest of another of like rank the host sends a wife to share the room of his guest.
This abomination is not practised among the common people. Politically they are under the absolute sway of the Turk, and are therefore much oppressed. A wall of dense prejudice met the pioneer missionaries at the outset; but as the continued dropping of water will wear away the adamantitic rock, so persistent effort, personal contact, uniform kindness, and patient forbearance for Christ's sake wore away the prejudices of the people, and if the mission were blotted out of existence to-day it would be considered a public calamity. 

By aiding the destitute, by healing the sick, by sympathizing with the sorrowing, a way was made for the Gospel of peace, and, notwithstanding the dogged, determined, persistent opposition of the authorities, in closing the schools and otherwise hindering the work, the mission has enjoyed encouraging success. Converts to Christianity have been won. But such converts have been cruelly maltreated by the Turkish Government. Some were imprisoned and others drafted into the army, the authorities thus hoping to destroy the germs of Christianity that had taken root among the Nusairiyeh; and in this they were aided and abetted by the chiefs of the people themselves, who began to fear the consequences.

One of the converts, David Makhluf, was very sorely tried. He was in the army during the Turkish-Russian War. His Bible was taken from him. He was flogged and imprisoned in a dungeon with the design of forcing him to deny Christ; but with all the fortitude of the early Christian martyrs, he stood firm, holding fast to the profession of his faith without wavering. He was wonderfully preserved, having several horses shot under him while in action. He was in the siege of Plevna, but was providentially spared to return to his family, and he is now a burning and shining light in his own native mountains.

Were it not that the Turkish authorities place every possible obstacle in the way of the education and enlightenment of these people, the rising generation would soon be brought under power of the Gospel.

NYASALAND: This territory, also called the Central African Protectorate, lies along the west and south shores of Lake Nyassa, with a spur extending southward toward the Zambezi, and is in the west by Northeast Rhodesia.

The area is 42,217 square miles; the population about 900,000, of whom about 450 are Europeans. Lake Nyassa is about 360 miles long, varying from 14 to 60 wide, and covers an area of 12,000 square miles. It, like the Tanganyika, is a deep fissure in the earth's surface. Furious gales sweep over it, rendering care in navigation necessary. It is drained by the Shire River, which sweeps over the Murchison Falls, where navigation from the lake is arrested. By means of the channel afforded by the Chindé River, navigation between Murchison Falls and the ocean is uninterrupted. The lake is nearly surrounded by mountains. The densest population is found at Karonga, on the northwestern shore of the lake. This region is unhealthy in the rainy season, during which the missionaries resort to Memba, in the upper part of the valley. Kota Kota, on the west coast, 120 miles from the southern extremity, is the main center of trade, and was a great market for slaves. Kiswahili is the dominant tongue. Ninety miles south of Lake Nyassa, in the Shire upland, is Blantyre, founded in 1856 by Scotch missionaries, and named after Livingston's birthplace. It has a population of 6,000. Its elevation above the sea level is 3,400 feet. A telegraphic line runs through the territory, and steamers ply on the lake. The traveled roads are kept in good condition between the principal towns.

The Church of Scotland, the English Universities Mission, the Zambesi Industrial Mission, and the National Baptist Convention all carry on missionary enterprises in Nyasaland. Altogether there are (1901) 101 missionaries and 304 native workers, men and women, established at 17 stations, with 161 schools and about 2,000 church members.

NYENHANGI. See Nien-hang-li.

NYLANDER, J. C.: Born in Germany; appointed missionary of the CMS to Sierra Leone in 1806. Here Mr. Nylander became chaplain of the colony till about 1816, when he went to Yongroo Pomah, opposite Free Town, and seven miles from it, where he commenced a mission among the Bullocks. He labored among this superstitious people with unremitting zeal, teaching and preaching. He translated into the Bulom language the four Gospels, the Epistles of St. John, morning and evening prayers of the Church of England, hymns, and elementary books. The mission was abandoned on account of the slave-trade, but Mr. Nylander transferred his flourishing school to Sierra Leone, taking his scholars with him. He died in 1825.

O

OBJECTIONS AND CRITICISMS: If the Church has always contained and contains to-day people who are in no sympathy with missions, it is natural that there should be objections to, and criticisms of missions in as well as outside the Church.

Much of the criticism is due to the failure to apprehend what Christianity is. Men who do not believe in the Supreme Ruler, and who have no personal understanding or experience of His religion, cannot be expected to sympathize with the effort to spread it over the world, unless they do so on merely ethical or philanthropic grounds. And within the Church merely nominal Christians who for one reason or another accept the form, while ignorant of the power of Christianity, are not likely to value highly an effort to extend what has no vital meaning to themselves to the people of other lands.

Beside the criticisms resting on these funda-
mental differences of view, there is, of course, a mass of unintelligent objection springing from ignorance or utter misconception of the facts of the work, of the operations of the human mind, or of the course of history. The common criticism of the immeasurable results of the missionary propaganda illustrates the first. Travelers are constantly expressing amazement at the vast sums expended on foreign missions, and the good that this could do at home. The total amount spent by all nations annually would not pay the naval expenditure of Japan for one year, or the cost of maintaining the German army for two months. A different type of ignorance is illustrated in criticisms like General Chaffee's, to the effect that he did not meet in Peking "a single intelligent Chinaman who expressed a desire to embrace the Christian religion," as though there was a fact that had any bearing on the matter at all except a sorrowful reflex implication. A great mass of current criticism rests on such sheer ignorance of the idea of the propagation of religion or the facts in the case of Christianity, as when a Hindu writes in a non-Christian magazine: "Notwithstanding their (the missionairys') great efforts, not a single true Aryan has been converted in these three or four hundred years." Such criticisms must choose between the alternatives of falsehood and ignorance.

The religious aspect cannot be dismissed by attributing the great bulk of it to absence or lukewarmness of Christian faith on one hand, or to ignorance or malice on the other. The supporters of missions cannot neglect objections which spring from these sources. Such objections may be classified in four groups:

I. Criticism of the missionary idea or principle.

II. Criticism of the methods of missions.

III. Criticism of the agents of missions.

IV. Criticism of the results of missions.

I. Criticism of the Missionary Idea: 1. It is objected that Christianity is not the only true religion, that the other religions of the world are good enough for the people professing them, that Christianity can only claim to be one of the world's religions, that it is not necessary for the hopes of men that there is salvation in other names than Christ's. Of course, this involves eliminating or interpreting away the words of Christ, "I am the way, the truth and the life. No man cometh unto the Father but by Me." "No man knoweth the Son but the Father, and no man knoweth the Father save the Son, and he to whomsoever the Son willeth to reveal Him;" and the words of Peter, "Neither is there any other name under heaven, that is given among men, wherein we must be saved."

It is replied to-day that the truth of these words is not denied, but that it is the Christian God and the essential Christ who are found in the non-Christian religions. But this is to raise a simple question of fact: "Do the non-Christian religions produce the fruits of Christianity?" In reply, and as bringing the entire question of comparative religion, it may be said: (1) There are good things in the non-Christian religions, but (a) these are concealed and overlaid, (b) they are held in distillation, unbalanced by necessary counter truths, as the Muslim idea of the divine unit, and (c) the good of all these religions is found in Christianity also, there rightly related and perfectly fulfilled. (2) There is good in Christianity which is not found in any other religion, as indicated in the modern lacerity of Christian doctrine and moral ideals by all other religions—Hinduism, for instance, having undergone, under missionary influence, a complete transformation. (3) Every religion is full of evils from which Christianity is free. (4) The worst evils of heathen lands are the products of or are sanctioned by the non-Christian religions. All the evils of Christian lands are under the ban of the Christian religion. (5) The best virtues of heathen people are, in the main, their racial qualities, unaffected by their religion. The best virtues of Christian peoples are the direct product of Christianity. (6) Christianity is the only purely moral religion. It alone identifies religion and ethics, demanding that personal religion be expressed in personal behavior. In all other religions, ceremonial behavior will suffice. (7) The sacred Book of Christianity is different from other sacred books, not in degree, but in kind. (8) The non-Christian religions grow worse and worse. The chasm between the best results of the actual teachings and the ideals widens constantly, save as they borrow from Christianity. Christianity alone has the power of self-renewal. (9) Christianity is the only religion of progress, and it alone can live with the spirit of progress, because it alone is the truth. (10) The non-Christian religions at their best are the imperfect aspirations of men toward God. Christianity is the self-revelation of God to man. They are religions, not of one, but of different classes. Christianity is exclusive and unique. All others stand together. As Mr. Griffith John says: The offer of Christ to sinful men wherever they can be found is not the offer of an alternative religion to the n in the sense in which Hinduism and Taoism and Confucianism are religions. It is the offer to men of the secret of life, of something that will enable them to realize their true selves, and become true men in the true and full sense of the word. Do we our Master little honor when we place Him among a group of teachers competing for the acceptance of men? He is not one of the many founders of religions. He is the Source and Fountain of all, in so far as they have caught a prophetic glimpse of His truth, and anticipated something of His spirit, and given a scattered hint here and there of His grace. He is the truth, the type, the saving grace of which they are the representation and the picture. Christianity alone is the crown and essence of humanity; the Savior of the world, who, by the loftiness of His teaching, the beauty of His character, the power of His doctrine, the brightness of His Sun, is able to save to the uttermost all who will come to Him and trust in Him.

2. It is contended that all religions are but elements in the evolutionary process, that Christianity is but a development of a line of descent to our Western minds; while the non-Christian religions are the religious influences developed in the growth of these peoples as best suited to them. Even if this were true, it is true also that since these other nations develop, as they are fast developing, into a life which adopts the principles of Western civilization, the evolutionary theory itself would allow for a religious development also, and the acceptance of a religious opinion and life conformable to the new stage of progress. As Mr. Griffith John again has remarked:

The nations called Christian are everywhere pressing hard upon all other nations. Western civilization in all directions is disintegrating both the customs of savage nations and the institutions of civilized. Eastern civilization is everywhere being shown that in this general break-up of old and effete orders there is an imminent peril. For where our civilization penetrates without our religion it is invariably disastrous in its effects. It never fails to destroy the confidence of subject races in their own creeds and customs without furnishing anything in place of their sanctions and
restraint. The result is everywhere to be seen in the way in which heathen nations neglect our virtues and emulate our vices. States anxious to round off their missions, therefore, to leave the people to whom be ministers to their simpler faith, is beside the mark. These faiths are inevitably going to be extinguished; and the problem is, How shall we bring them to an end? If history proves anything, it proves that a people who have no faith, no nation; that it cannot hold together; that it inevitably decays and dies. From this point of view alone, then, there is a tremendous responsibility laid upon every important mission, of effecting in the uprooting the fabric and undermining the foundations of the ethnic religions. Without religion of some sort, nations must perish. It is not easy to see to it that we do not give something in the place of what we take away, and that something must be the Christian faith or it will be nothing.

But more than this is to be said. As Mr. Gulick has shown in The Evolution of Japan, it is the Christian convictions, however veiled, which are the really powerful forces in working the transformation of the backward nations. In the development of mankind, the religious force is indispensable. The evolutionary hope makes a demand for Christian missions.

3. Some deny this, and would have missions, as a disturbing factor, eliminated from the forces which the West is wielding upon the East. But (1) this is to misunderstand entirely the character and source of Western civilization, which derives its power and virtue from the altruistic strength of its faith, and calls it, with all respect, humanity from the life and cross of Christ. (2) It is to surrender the heathen world to the purely material, selfish, and often shamefully iniquitous side of our Western life. Commerce and diplomacy have done an immense and salutary work in the non-Christian world, but there is room for the protest of an "Uncommercial Traveler," against the idea that secular civilization is to redeem the world:

I, too, have spent some eight years away from the United States, during which time I have seen this haughty foreign commerce-veying with native merchants in corrupting the custom house officials; seen fabricated liquors fraudulently sold; seen cheap goods with false American trademarks; seen the ignorant Indians debauched by bad rum, in order to swindle them in trade; seen hostile savages supplied with firearms. I have seen chasing boxes to polish off traces of gold dust from foreign gold coins before it is put in circulation; placer gold dust, mixed with copper to increase its weight, sold for the little value it is elevating or good done by foreign merchants. It is a well known fact that large firms in England are engaged in the manufacture of false dusk, and are sent as mixed current. There is no unfairness in stating clearly that the character of Western commercial and political intercourse with the non-Christian world has been no unmixed blessing. Mr. Fukuzawa contended that as to Japan, it would have resulted in ruin had it not been for the missionaries. And (3) to demand the elimination of missions is to admit as to the worst we possess a principle denied as to the best. How can any one justify a position which results in freedom to sell rum to the world, but in refusal of liberty to give the Ten Commandments and the Sermon on the Mount, the foundation of civilization?

4. It is objected that the newer theological teachings of the love of God for all mankind, with their consequence in universalism, render unnecessary a difficult and unappreciated effort to preach Christianity everywhere. But what matters it, in that respect? Such an objection comes from the non-Christian peoples as indicates their need of the very message they do not welcome. How could General Chaffee's intelligent Chinese be expected to desire Christianity, when (1) they do not understand what it is, (2) when from the conduct of nominally Christian nations they suppose it to be something quite different from its real character, and (3) when they had just been engaged in gratifying that spirit of murder against which the Christian spirit is perpetual protest? The difficulties in the way of missions reveal the world's need of them. Any "new theology" would be a poor substitute for the old which was deterred from being carried to the end by difficulties to which a more antiquated doctrine refused to surrender. For just in proportion as any body of men believe themselves to be possessed of the best doctrine of God, they will be eager to spread it over the world. No amount of talk about a loving God, who made the world by difficulties to which those who speak believe in such a God unless they show a proportionate eagerness to make Him known to all mankind. Missions have much to fear from insincerity, but nothing from the love of God. It was that which produced them. "For God so loved the world!" "For His Name's sake, they went forth."

5. It is said that the heathen will not be lost without the Gospel; that God would condemn no man for ignorance of Christ. No one has ever contended that men would be lost for not accepting a Saviour to whom the nations are blind, but that men are lost because sin destroys. Their condition is not a matter of eschatological speculation. They are lost, not as heathen, but as sinners, just as enlightened people in Christian lands who have rejected Christ. There is no space here to deal with the question of the future fate of the heathen. Future destiny is only a consequence of present faith and character, and regarding this enough has been said. Some who are perplexed here, however, may well read the words of Mr. R. F. Welsh. In his recent book, The Challenge to Christian Missions:

The heathen today are B.C. What operated B.C. in God's treatment of the Jews operates proportionately in Asia and every continent and island which is not yet Anna Domini. That the Jews had fuller light and clearer symbols of the Unseen is beside the point here. God's method or principle is the same for all alike, when dealing with different races all of them B.C. The grace which was at least within reach of the humble hearted Jew has always been and is now within reach of the Gentile in proportion as there is similar response to appeals of the Spirit.

"Our conception of salvation itself has been changing at the very time when our theory of the heathen has been changing and the one comes aptly to interpret or correct the other. The enlightenment which has been enlarging our sympathies has, in the same process, been deepening our insight into the true nature of salvation. Here enters the principle, that salvation is salvation from sin, not from destines. The real and urgent question is not a matter of destines at all, one way or the other. It is one of present moral condition and character. It is not what we are coming to, but what we are becoming, that matters. Destines, good or bad, while momentous enough, hang entirely on the character which constitutes their quality. The actual problem is, not the man's future, but the man, Look at pagan peoples with the most godlike eye, and there is enough in their condition to appall our hearts, if we can but beheld the face of their natural content. However large the mercy of heaven, they most palpably stand in dire need of being morally saved from sin's degradation, and spiritually enlightened and enfranchised as the sons of God."

6. It is argued that the need at home is so great that we have first the need. But (1) who is responsible for this long continuance of a great
need at home? Phillips' Brook's reply is unanswerable: " 'There are heathen enough at home; let us convert them first, before we go to China.' That plea we all know; and I think it sounds more cheap every year. What can be more shameful than to make the imperfection of our Christianity at home an excuse for not doing our work abroad? It pleads for exemption and indulgence on the ground of its own neglect and sin. It is like a murderer of his father asking the judge to have pity on his orphanhood." (2) The acceptance of this plea nineteen hundred years ago would have condemned Europe to perpetual heathendom. The agreement proposed here is tantamount to an abolition of missions. There will always be need at home. The tares will be in the wheat until the harvest. (3) The only way to meet the need at home is to increase the spirit which sends missionaries abroad to the heathen.

7. The simple fact is that the missionary spirit is the Christian spirit; that the possession of good is an obligation for its transmission. The best spirit of the modern world is now permeated with this conception, and we must either give up our Christianity as of no use even to ourselves, or share it with the world. We are debtors. We must also be ready to pay.

II. Criticisms of the Methods of Missions: It is impossible to sympathize with criticisms of the missionary idea. That is the essence of Christianity—even of common honesty and courtesy, and fair and kindly dealing among men. To deny this is to display some radical lack of character, and an utter failure to appreciate the finer side of life, and the nature of the Christian religion. But criticism of the methods of missions is a different matter. So long as a man is earnestly supporting missions, he may be allowed liberty to criticise methods he disapproves. But the man who is doing nothing for missions at all, who has no genuine sympathy with the idea, has no right to voice his disapproval of missions on the methods pursued.

No one is more anxious than the missionaries to discover the best methods, or more ready, accordingly, to listen to sincere criticism. Canon Isaac Taylor justified his assault upon missions in the Fortnightly Review in 1888 by the words of Bishop Steere, "Let me say that all missionaries owe a debt of gratitude to those who call attention to the mistakes and failures of missions;" and Canon Taylor said, in closing, that Mackay of Uganda had encouraged him to make his criticism public.

1. A common criticism is that the cost of administration is extravagant, that "it costs a dollar to send a dollar." There never was any ground for this criticism, nor is there any. In the absence of any even partial justification, its origin and conclusiveness can only be called mental heathenism. The cost of administration of the great foreign mission agencies ranges from 4 to 10 per cent. The higher amount is due largely to the cost of collection, publication, deputation work, and other measures for arousing interest. Roughly, it is accurate to say that the cost of sending a dollar to foreign missions is the price of a foreign postage stamp.

2. It is said that the business methods of missions are inefficient. It is not possible to make any better answer than to say that the business methods of missions have been examined at this point. Mr. John Wanamaker, as successful a business man as America has produced, recently examined the Presbyterian work in India, and on returning expressed this judgment:

"I went out and about, simply as an individual, saying: 'I will see for myself exactly what this business of foreign missions is, and whether it is worth while or not!'

By persons who were with the commission work, I convinced myself that the work of missionaries—clergymen, teachers, doctors and nurses, who are the helpers of the heathen, is practically and well administered. In its business administration, it is quite as economically done as any business firm could establish, and support business extensions permanently and successfully in lands far distant from home, climate and custom requiring different modes of living. No private business man, in my judgment, can administer from the United States, properties and finances in India more effectively for less, as a rule, than the Board is administering them at this time.

3. The missionaries are accused of living on too expensive a scale, instead of imitating the lives of the fakirs or dervishes or holy men of the non-Christian lands. Mr. Wanamaker reported his judgment on this point also:

"It is an unjust aspersions on the Church and its heroic men and women for any fair person to say that, because the customs of the country oblige missionaries, if they are to maintain influence with the people, to employ servants and live in houses it is only fair that they should be as well cared for by other private families, therefore they live in luxury, idleness or extravagance. While I saw homes of Christian workers in large cities bought from the lowest class of Hindus, the sums, now worth much more than they cost—which is the credit of the missionary—were not enough; nor the income of the missionaries. The Missionary Board—I failed to find any extravagant buildings in use by missionaries or others in the services of the Board. As to the servants, they board themselves, coming in the morning and going off at night, for the pay of ten to twelve rupees a month, which, on an average, is $3.65 a month for house servants. It is impossible to find anywhere in the world simpler and more consistent home living than at the homes and tables of the mission houses.

4. The idea that by adopting the ascetic ideal and living as the natives do, the missionary would increase his influence is often advanced by those who are under precisely as much obligation to pursue this course as may rest on the missionary. The conception that the ascetic method will be more fruitful than the general method has often been tested. George Bowen gave it a fair trial in Bombay. His life was one of great value and of large influence, but not more so than the lives of scores of other missionaries who never followed his plan, and who were far more successful in winning converts and in establishing self-supporting churches. There is room for the ascetic ideal, but it is not the only ideal.

5. A great many criticisms on the methods of missions are mutually contradictory. One urges that the native churches should be sooner trusted and left to themselves. General Armstrong complained that this was done too soon in Hawaii. One urges that educational and medical work should be diminished, and the direct preaching of the Gospel absorb all the time and strength of the missionaries. The newspapers, the diplomats and the wandering philanthropists see in these forms of work the only really valuable part of the missionary enterprise. One complains that the missionaries are timid and cautious. Others that they are reckless and aggressive, and should be confined to fixed stations. One regards the attitude of the native as a direct offense to the wicked; others think that even polygamy and ancestor-worship should be tolerated. And so opinions vary on a hundred points and correct one another.

6. Criticism is both just and unjust, has been directed in this connection of the worship of polities. The Boxer uprising brought the subject forcibly before the world. While there were
other and far more responsible causes for the outbreak than any connected with missions, the interference of Chinese Christians under cover of missionary, and ultimately consular, protection, and by no means the least of these the interference of missionaries themselves in Chinese life and thought. The Chinese have long cherished the idea of increasing the anti-foreign feeling of the people, and to confuse in their minds the missionary propaganda with the political movement of the West upon China. Whatever errors individual missionaries may have made at this point, the body of Protestant missionaries has not offended the burden of guilt resting on the Roman Catholics.

The whole discussion has been profitable as defining more clearly the spiritual character of the missionary enterprise and also as illustrating how easily missions are criticised for adopting, however slightly, the principles of those who praise the benevolence of the movement but deprecate its religious character. If missions are valuable and justifiable, as the critics allege, solely because of their philanthropic spirit, interference in behalf of the wronged in law suits would be impossible.

III. Criticism of the Agents of Missions: Some such critics are foolish extremists. Mr. Sydney Brooks represented this class during the discussion of the relation of missionaries to the Boxer uprising. He declared that the missionaries in China were "not well educated," were untaught, careless of local prejudice, spoke a "bastard Chinese," were guilty of "blundering provocation," and ignorant of the philosophy they are "intent on overthrowing, or the language which must be their chief weapon, bigoted and sect-like, and bands of "enthusiasmic girls who scamper up and down the country." Such criticism, of course, answers itself. It is enough to ask the critics the names of the missionaries they know. This judgment rests on no personal knowledge, but on the gossip and talk of steamer saloons or clubs in the ports, whose resentment is often due to the fact that their spirit and conduct are condemned by the standard which the missionary sets up. Where the common criticism of the missionary does not spring from such a source, it is due to large measure of sympathy with the missionary idea, and to a want of appreciation of the Christian faith.

Other critics are more cautious than Mr. Brooks. Mr. Henry Norman says:

So, far as education goes, both men and women among the Protestant missionaries are often quite unfit to teach at home, where there would be little danger of misunderstanding; in their present sphere of work they are often not too hardly described by the phrase which has been applied to them, "ignorant declaimers in bad Chinese." ... I am well aware, of course, that to some missionaries the world is deeply indebted for its knowledge of the Chinese language and literature; and that among the Protestant missionaries of the present day there are some men of the highest character and devotion, under whose careers no criticism can be passed. These, however, are a small minority.

The profound scholars are, of course, a minority, but the statement that the men of highest character and devotion, upon whose careers no criticism can be passed, are also a minority, is a simple untruth due to the writer's ignorance of the men of whom he is writing, to the difference of standard prevailing between him and them, as illustrated in his interest in what the missionaries have always ignored or deplored (e.g., the Yoshiwara), and his willingness to accept his judgments at second-hand from men as ignorant as himself. In any large body like the missionary body there will be men of all grades. But in general it is true to say of them that they love and understand their people; that they know men about them and can talk with them more freely than any other foreigner, Mr. Yen, of Shanghai, says, "I have never found the missionary a more fluent and accurate speaker of Chinese than the Chinese themselves; that missionaries as a class are the ablest and most highly respected foreigners in Asia, and that without their correcting influence the nauseous immorality of many immoral conditions in Asia would be riper than it is. It is not the element of most intelligence and character in these cities and at home which attacks the missionaries. Of missionaries in the Orient generally, the Hon. John W. Foster declares that "up to the middle of the last century the Christian missionaries were in absolute necessity to diplomatic intercourse."

Of S. Wells Williams, most prominent in this diplomatic service, U. S. Minister Reed declared: "He is the most learned man in his varied information I have ever met. He is the most habitual tourist the man I have ever seen."

And on a visit to India in 1894, the Rev. Francis Tiffany, a distinguished minister of the Unitarian Church, bore the testimony:

To the missionaries, deified and sneered at on every hand, are added the admiration such as never before has been paid to any reform in education, in medicine, in the revelation of the idea of common humanity, in the elevation of the condition of women, after such a long period of unutterable wrongs. It seems, however, to be the correct thing for the ordinary Protestant to protest to this influence of missionarism; and then, to avoid being prejudiced in any way, carefully to refrain from ever going within ten miles of them and their mission. The result is to make for the great uneducated, viler, with nothing they care to import into India but bile. To all this, I want to enter my enthusiastic and indignant protest. Such of them as I have fallen in with, I have found the most earnest and broad-minded men and women anywhere to be encountered—the men and women best acquainted with Indian thought, customs and inward life, and who are doing the most toward the elevation of the rational and material character of the nation. It is a deep wound to my eyes to inspect such educational establishments for girls and young women as that of Miss Thoburn, in Lucknow, and to see what new heavens and new earth she is opening up to them. The consecration of spirit with which these young women are dedicating themselves to the work of getting ready to lift out of the gulf of ignorance and superstition their sister women of India was one of the most moving sights I have beheld.

Missionaries might be better and abler men and women than they are. That could be said of any body of men and women in the world. But none wish this for themselves more ardently than the missionaries; and, speaking in careful comparison, it may be said that the missionaries of the Christian Church have been and are the best body of men and women who have ever given their lives to a great cause.

IV. Criticism of the Results of Missions: It is said that foreign missionaries have accomplished nothing, or that they have accomplished nothing justifying the great expense in money and life, or that they have accomplished too much and done more harm than good.

1. "They have accomplished nothing": This was naturally a much more common criticism one year ago than to-day. At first, the work had to produce its results. Now that it has produced them, it is possible only for ignorance to deny them. For a time all professed converts were "rice Christians," but now there are too many millions who get no rice, and there have been too many millions. As an able critic, Mr. Michele says, "It is a very gratifying fact, which cannot be gainsaid, that Christians of the truest type—men ready to burn as
martyrs, which is easy, and who lead 'helpful and honest' lives, which is as hard as the ascent from Avernus, crown the labors of missionaries, and have done so from the beginning." The mass of testimony to the beneficial religious, moral, and social influence of missions may be summed up as follows: I have just stated that I underestimated the forces which have been brought to bear on the races in the Punjab by the Christian missionary movement; but I am convinced that the effect on native character produced by the self-denying labors of Christian missionaries, and the influence of their history, is the historical role of the names of many Christian statesmen who have honored God by their lives and endeared themselves to the people by their faithful works; but I venture to say that if they could speak to us from the great unsee, there is not one of them who would not proclaim that the work done by men like St. Francis Xavier, Black, Newton and Farmer, who went out among the people for a whole generation or more, who produced these effects, is far more valuable, or rather, in my opinion and the lesson of love to God and man, is a higher and nobler work, and more far-reaching in its consequences.

3. "They have done more harm than good": This is the current form of criticism. The critics used to call missionaries ineffective and their work and qualification. Christianity over to the site extreme. The missionaries are pestentially active and effective, and are turning the world upside down. "For my own part," says Mr. Norman, "I am convinced that if the subscriber to Chinese missions could only see for themselves the minor results of good and the considerable results of harm that their money produces, they would find in the vast opportunities for reformatory work at home a more attractive field for their charity. At any rate, in considering the future of China, the missionary influence may not be counted upon for any good." The omission of a bill of particulars is often a convenient oversight for critics. "The minute results of good" is a judgment which time will reveal in its true ludicrousness. What are the considerable results of harm? Mr. Sydney Anglo took up this tale. He held that the influence of the missionary is subversive, and that his propagandists will have revolutionary effects. In a sense this is not true. The missionary's work is not destructive. It follows the lines of national character and qualification. Christianity is a power of upheaval and renovation. It turns the world upside down. It begets wrath against injustice, eagerness for liberty, impatience with ignorance and sloth, and passion for progress. It has done this in China. It will continue to do this in China, whether in war or in peace; whether with the sympathy of the Christian nations or with petty criticism and futile opposition of newspaper publicists. That is its mission in the world.

A larger and nobler and truer view of the influence of missions was expressed in the speech of President McKinley at the Ecumenical Conference in New York City in 1900:

"I am glad of the opportunity to offer without stint my tribute of praise and respect to the missionary effort, which has wrought such wonderful triumphs for civilization. The story of the Christian Missions is one of thrilling interest and marvelous results. The services and the sacrifices of missionaries for their fellow men constitute one of the most glorious pages of the world's history. The missionary, of whatever church or ecclesiastical body, who devotes his life to the service of the Master and of men, carrying the torch of truth and enlightenment, deserves the gratitude, the support, of the body of mankind. The noble, self-sacrificing minsters, whose services and goodwill should be classed with the world's heroes, . . . They count their labor no sacrifice; say, rather, it is a privilege." They furnish up examples of sacrifice, unselfishness, self-denial, and unyielding purpose, and of spirit which triumphs, not by the force
of might, but by the persuasive majesty of right.

Who can estimate their value to the progress of nations? Their contribution to the onward and upward march of humanity; how they gave up their persecution and left him in peace. An estate of four acres was soon purchased by the Brethren, where they built a church and dwelling-house, and named the place “Friedensthal.” The work increased more and more till the little church at Friedensthal could not contain the hearers, and service for nearly twelve months was held in the open air. As many as a hundred negroes were annually baptized into the church.

OITA: A town and seaport on Kiushiu Island, Japan, 105 miles E. by N. of Nagasaki. Silk yarn is produced in large quantities. This town was visited by the Portuguese adventurer, Mendez Pinto, in 1543 and by the Jesuit missionary St. Francis Xavier about 1550. Population, 15,200. Station of the CMS (1894), with (1903) 1 missionary and his wife, 4 native workers, 2 outstations, 1 place of worship, 2 Sunday schools, and 51 professed Christians, of whom 25 are communicants. Station of the MES (1886), with (1903) 1 missionary and his wife, 2 native workers, 1 outstation, 1 place of worship, 2 Sunday schools, and 28 professed Christians.

OJ: A village in the suburbs of Tokio, Japan, now containing paper and cotton mills, but still a favorite holiday resort on account of its picturesque scenery and especially in certain seasons when flowering trees are in bloom. Population, 3,000. Station of the Christian Church Mission Board (1889), with (1903) 1 missionary and his wife, 1 woman missionary, 2 native workers, 5 outstations, 1 place of worship, 3 Sunday schools, and 65 professed Christians, of whom 51 are communicants. Some write the name Ohnemose.

OKAK. See OKAK.

OKAT: A settlement in the Oil River region of South Nigeria, Africa, situated near Iba River, 25 miles from its mouth. Station of the Qua Ibo Mission (1893), with (1903) 1 missionary and his wife, 2 native workers, 7 outstations, 1 place of worship, 1 Sunday school, 5 day schools, 1 dispensary, and 43 professed Christians.

OKAYAMA: A town in South Japan, 100 miles west of Kobe, on the highway thence to Hiroshima, 5 miles from Inland Sea. Climate mild, humid. Population (1898) also 0,000. Station of the ABCFM (1857), with (1903) 1 missionary and his wife, 2 women missionaries, 6 native workers, 18 outstations, 6 places of worship, 12 Sunday schools, 1 industrial school, 1 orphanage. Station also of the SPG (1897), with (1903) 1 missionary, 4 native workers, 1 place of worship, 1 Sunday school, and 47 professed Christians, of whom 25 are communicants. Station also of the Salvation Army. The Okayama Orphanage is an independent enterprise of value, founded by Mr. Ishii and placed under a board of trustees, composed partly of missionaries.

OKAZAKI: A town in Hondo Island, Japan, situated 56 miles E. of Kioto. Population,
OKAZEVA: A village in German Southwest Africa, situated about 180 miles E. by N. of Swakopmund. Station of the Rhenish Mission Society, with 1 missionary, 3 native workers, 1 day school, and 49 professed Christians, of whom 9 are communicants.

OKKAK: A settlement in Labrador, situated on the N. coast, 80 miles N. W. of Nain. Station of the Moravian Mission Society (1776), with (1900) 8 missionaries and their wives, 20 native workers, 1 day school, 1 place of worship, and 156 professed Christians.

OKOMBAHE: A mission station of the Rhenish Mission Society, in German Southwest Africa, about 120 miles N. N. E. of Swakopmund, with (1903) 1 missionary and his wife, 8 native workers, 2 outstations, 3 day schools, and 568 professed Christians, of whom 166 are communicants.

OLD CAIRO: A mission station of the CMS (1899), and a suburb of Cairo, Egypt, with (1903) 1 missionary and his wife, 2 women missionaries, 5 native workers, 2 day schools, 1 dispensary, 1 hospital, and 60 professed Christians, of whom 34 are communicants.

OLUKONDA: A settlement in the N. part of German Southwest Africa, in the territory of the Ambo tribes. Station of the Finnish Missionary Society (1871), with (1900) 3 missionaries, 2 of them with their wife, 1 missionary, 9 native workers, 4 outstations, 1 place of worship, 1 kindergarten, and 142 professed Christians.

OMARURU: A village in German Southwest Africa, situated in Damaraland, about 135 miles N. E. of Swakopmund. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 7 native workers, 3 outstations, 5 day schools, and 595 professed Christians, of whom 150 are communicants.

OMBURU: A village in German Southwest Africa, situated in Damaraland, about 150 miles N. of Swakopmund. Station of the Rhenish Mission Society (1903), with (1900) 1 missionary, 6 native workers, 3 outstations, 1 Sunday school, 5 day schools, and 1,411 professed Christians, of whom 390 are communicants.

OMBOLATA: A settlement on Nias Island, situated on the E. coast about 5 miles S. of Gunong Sitoli. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 6 native workers, 3 outstations, 1 Sunday school, 5 day schools, and 1,411 professed Christians, of whom 390 are communicants.

OMUPANDA: A village in German Southwest Africa, situated in the Ambo region, near the frontier of Angola, and about 30 miles N. of Olukonda. Station of the Rhenish Mission Society, with 2 missionaries, 1 of them with his wife; 1 native worker, 1 day school, and 102 professed Christians, of whom 28 are communicants.

ONDANGA: A settlement in the N. part of German Southwest Africa, in the Ambo tribe territory about 25 miles W. N. W. of Olukonda. Station of the Finnish Mission Society (1890), with (1900) 1 missionary and his wife, 1 woman missionary, 5 native workers, 3 outstations, 1 place of worship, and 54 professed Christians.

ONDIVA: A village in German Southwest Africa, situated in the territory of the Ambo tribe, on the border of Angola, and about 40 miles N. of Olukonda. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 1 woman missionary, 1 native worker, 1 day school, and 53 professed Christians.

ONGOLE: A town of 9,000 inhabitants in the Nellore district, east coast of Madras, India, half-way between Nellore and Masulipatam. Missionary work was begun in the Nellore district in 1842. From 8 members in 1867 the Christian community increased to 3,269 in 1877. Then the famine came. Idols were prayed to, but in vain. The missionaries came to the rescue, and with the aid of natives 150 miles money a canal was built, which will prevent the recurrence of any similar famine. The grateful Ongolites then came in large numbers to listen to the preaching of their benefactors. Station of the ABMU (1868), with (1903) 4 missionaries and their wives, 3 with (1900) 3 missionaries, 144 native workers, 40 Sunday schools, 6 boarding schools, 1 orphanage, 1 college, 1 industrial class, and 19,421 professed Christians.

ONICHA: A village and mission station in South Nigeria, W. Africa, on the left bank of the Niger opposite Asaba. Station of the CMS (1857), with (1903) 2 missionaries, 6 women missionaries, 3 native workers, 4 outstations, 1 place of worship, 2 day schools, 1 boarding school, 1 industrial school, 1 hospital, and 427 professed Christians, of whom 125 are communicants. Some write the name Onisha.

ONIPA: See ONIPA.

ONTSHA: See ONICHA.

ombochi: A town in Japan, situated in Hiroshima district, 18 miles W. by S. of Kobe; a prosperous town on the Inland Sea, noted for its manufacture of ornamental mats. Population, 18,700. Station of the MES.

ONYIPA: A settlement in the N. part of German Southwest Africa, situated in the territory of the Ambo tribe, about 30 miles N. of Olukonda. Station of the CMS (1903), with (1900) 2 missionaries and their wives, 2 women missionaries, 7 native workers, 2 outstations, 1 place of worship, 1 printing house, and 101 professed Christians. Some write the name Onipa.

OODAVOLE: A town in Jaffna, North Ceylon, forming a suburb of Mannar. Hot, but healthy. Population, 2,354. Station of the ABCFM (1831), with (1903) 2 women missionaries, 34 native workers, 4 outstations, 10 day schools, 2 boarding schools, and 486 communicant Christians.

OOTACAMUND: See Utakamund.

OTOKI: A post town in New Zealand, situated on the Aupouri Peninsula, 110 miles S. E. of Napier. Population, 1,500. Station of the CMS, with (1903) 1 missionary and his wife, 16 native workers, and 1,500 professed Christians, of whom 102 are communicants.

ORAN: A seaport of Algeria, Africa, situated 70 miles N. E. by N. of Tlemcen. It was in Spanish hands from 1509 to 1708 and from 1732 to 1792, and was occupied by France in 1831.
At 6 or 7 miles S. is the Great Salt Lake of Oran, 27 miles long and 3 to 6 miles wide. Population (1901), 87,801. Station of the Algiers Spanish Mission, with (1900) 2 missionaries and their wives and 4 woman missionary. Also station of the French Society for Evangelizing the Jews, with 1 missionary.

**ORANGE RIVER COLONY:** A territory of South Africa, formerly the Orange Free State. It was annexed to Great Britain May 24, 1900, as a consequence of the Boer War. There is a governor over the Transvaal, and the Orange River Colony is governed by a lieutenant-governor under him. The colony has an area of 48,326 square miles. The population (1900) was 207,503, of whom 129,787 were natives. It is believed that the white population has been reduced in consequence of the war. The colony lies between the Transvaal on the north and Basutoland and Cape Colony on the south, extending east and west from Natal to Bechuana land. The arable area is small, pastureage for grazing furnishing much of its resources.

Since the British accession England has become the official language and must be taught in all schools. Religious and denominational are the Dutch Reformed Church, with (1860) 68,940 adherents, the Wesleyans with 753, the Church of England with 1,353. There are also Lutherans, Roman Catholics, and a few Jews. The natives are of the Basuto and Bechuana branches of the Bantu race, nearly allied to the Kafirs. The Berlin Missionary Society has 4 stations in this colony, the SPG 2, and the South African Wesleyan Missionary Society has 8 stations, with a considerable body of native adherents.

**ORGANIZATION OF MISSIONARY WORK:**

The purpose of this article is to furnish a statement of the different forms of organization used in mission work, and the agencies of administration, employed both at home and on the foreign field.

1. At Home: Into the question of the degree of organization needed, it is not necessary to enter here. It is sufficient to say that the present forms have been the direct outgrowth of the pressing needs of the situation. 1. Missionaries in foreign lands must be supported (the instances of self-support being so few and so exceptional as to be practically ruled out of the question), and money must be raised and forwarded to them. 2. It is not every man or woman who, however willing, can advantageously work in foreign lands; there must be some means for selecting those who are best qualified. 3. In the conduct of foreign work two things are essential: first, that expenditures be proportioned to receipts; second, that different sections of the great work shall not assume relatively undue importance. It thus becomes necessary that there be some central authority to keep, so far as practicable, an even hand over the whole enterprise. In the support of missions have a natural and righteous desire to know what is accomplished by them, and there must be the means of collecting and imparting information. 5. As mission work in most instances involves the holding of property, there should be a recognized existence before the law.

The necessity of meeting these demands has resulted in the formation of missionary societies or boards, so organized as to provide for these varied departments. These societies or boards may, for convenience’ sake, be classified into groups.

I. Societies which are engaged directly in general foreign missionary work by sending out missionaries, and which are not confined by their constitutions to any particular phase of that work or to any special country. They are either interdenominational, i.e., drawing their support from different churches, or represent some one denomination and are self-supporting.

II. Woman’s Boards, organized by women, with special reference to work among women, and either independent, i.e., sending out their own missionaries, or acting in connection with some general society.

III. Societies which are limited by their constitutions to specific branches of work or to distinct territories. These include: (a) Aid societies, which merely collect funds to assist other societies, especially from people who are interested in their work, but are not naturally included in any denominational connection. (b) Contract societies, which engage directly in foreign work by the employment of colporteurs and distributing agents. (c) Medical missionary societies, whose object is to train and furnish physicians, men or women, who shall enter the foreign field either with denominations or in connection with some general society.

IV. Individual efforts and miscellaneous organizations. We are concerned in this article chiefly with the general statement of the organization and its agencies of administration.

*Organized Missionary Societies or Boards:*

These may be classed under three general heads:

1. Those directly controlled by some ecclesiastical organization. 2. Those ecclesiastically connected with some denomination, but not controlled by it. 3. Those independent of any ecclesiastical connection.

1. Those directly controlled by some ecclesiastical organization include the Presbyterian Boards; the Missionary Society of the Methodist Episcopal Church, U. S. A.; the Domestic and Foreign Missionary Society of the Protestant Episcopal Church in the United States; the Missionary Society of the Moravian Church; and most of the Lutheran Boards of America and Europe. In them the society or board is a committee appointed by and responsible to the general governing body of the church or denomination. These are: the General Assemblies of the various Presbyterian Churches; the General Conference of the Methodist Episcopal Church; the General Convention of the Protestant Episcopal Church in the United States; and the General Synod of the Moravian Church. Whenever there are so-called members, directors, etc., the term is merely honorary, indicating that such persons have by virtue of certain grants of money been allowed certain privileges, e.g., of receiving regularly the Society’s publications, or attending meetings. They do not indicate any right to vote upon any action of the Society or Board. Officials are required to belong to the denomination, and missionaries must have received ordination from authorities recognized by the Church. In case of difference between the missionaries and the Board there is an appeal to the General Assembly, etc.

2. Those ecclesiastically connected with some denomination, but not directly controlled by
it, comprise such societies as the Church Missionary Society, the Society for the Propagation of the Gospel, and various Baptist, Methodist, and Wesleyan Societies of England, the United States, and Canada. In these the societies or boards are composed of members of denominations which they represent, either by virtue of grants of money or by appointment to represent certain churches. Their officials and missionaries are members of the denominations, and are required to conform to its customs and discipline. In the affairs of the society or mission is concerned, the authority of the board itself is final—there is no appeal.

(3) Those independent ecclesiastical relations include the American Board of Commissioners for Foreign Missions, the London Missionary Society, the Paris Evangelical Society, the Basel and Berlin Missionary societies, the Bible societies, and most of the special societies. Here, however, we find again two classes: (1) those which are general in their membership, and (2) those that are self-perpetuating, or close corporations.

The first class includes the London Missionary Society, the Bible Societies, and most of the special societies. In them the membership is absolutely unlimited in number, and any person can become a member by acceding to certain conditions. He then has the right to vote in the annual or general meetings of the Society when the special committees or boards are elected.

The second class includes the ABCFM, the Paris Evangelical Society, and the Basel and the Berlin, and other German independent societies. In them the membership is restricted in number, and the right to vote at any meeting of the society is confined to the actual members of the society who alone have the right to elect other members.

In neither class is there any restriction of denominational connections or of special ordination and discipline, tho', as a matter of fact, both the ABCFM and the London Missionary Society have some Congregational societies. The decision of the general society in every case is final—there is no appeal.

VI. *Faith Missions*: These in general are mission enterprises, in which the missionaries go to the foreign field without the assurance of any definite or continued support from the home land. They usually claim to put forth no efforts to secure such support, beyond the offering of prayer to God. In some cases they seek to support themselves by some occupation on the ground, but as a rule they give themselves entirely to their work, relying solely upon whatever gifts may come to them from friends at home, or may be given by travelers and others who visit them. For the most part such missions are carried on by individuals, but occasionally they have a more or less elaborate organization. The most prominent instance of the last named type is the China Inland Mission. There is no formal organization, but a committee or council receives and forwards funds, publishes reports, and renders accounts. The same thing is practically done by individual friends for all the small missions, the appeals for public support are seldom made, as in the case of the organized societies, and the missionaries are absolutely independent (in most cases) of any ecclesiastical direction, tho' they are always connected with some religious body.

The agencies employed by the organized societies for the administration of the undertaking in its different departments, viz., collection of funds, sending of missionaries, direction of the foreign work, furnishing reports, and holding of property, are, 1. A committee; 2. Executive officers.

1. *The Committee*: In the case of the societies of the first class enumerated above, viz., those directly under the control of an ecclesiastical organization, the committee and the board are identical. In other classes they are generally appointed by the general society, tho in some cases, as in the American Baptist Missionary Union, the society appoints a Board of Managers, which in its turn appoints an Executive Committee. However appointed or however named, the Board of Managers, Executive Committee, Prudential Committee, Advisory Committee, etc.—its duties are to conduct the affairs of the society under the general direction of the society or the board. All matters pertaining to the particular policy or active operations both at home and abroad are discussed and decided in its meetings, and it is rarely the case that an appeal is taken to the general society or church, or, if taken, sustained. In fact, these committees are, for all practical purposes, the societies, the latter doing, as a rule, little more than mark out general lines of policy. Each committee appoints sub-committees for the special departments. These vary greatly in their form, according to the differing customs of each society.

2. *The Executive Officers*: These are the secretaries, treasurers, agents, etc. Scarcely any two societies apportion their duties in the same way, but those duties are so familiar that they need no special mention. They are never voting members of the committee, but merely executive officers. The definition of a few of the terms in general use among such of the societies as make a distinction between the different officers will suffice. A *foreign secretary* has charge of the correspondence with the missions, presents to the committee or to a committee of missionaries reports of the conduct or interests of the foreign work, and the estimates for the missions. A *home secretary* has general charge of the home department, with special reference to the raising of funds, and the relations of the committee or board to the churches. In some cases all applications for appointment to the foreign field pass through his hands; in other cases they go to the foreign secretaries. An *editorial secretary* has general charge of the publications of the society, edits the periodicals and the annual reports, and superintends the preparation of the various leaflets, tracts, etc., by which the knowledge of the society's operations is disseminated. A *field secretary* is one whose special work is to visit the churches, attend meetings of ministers, and arrange plans for public presentations of the needs of the society. This work of visiting is shared by all the secretaries, according to their time and ability. In some cases there is a *recording secretary*, as a permanent official, whose special duty it is to keep the record of all the transactions of the committee. In other cases that work is divided among the other secretaries. Some societies also employ *district secretaries*, who have special charge of certain
sections of country, gather the subscriptions, arrange for visits and addresses sent to the committee, generally through the home or the recording secretary. The treasurer has charge of all moneys and accounts. He receives all remittances, makes all payments, keeps all accounts, and receives and disburse the appropriates after the estimates have been passed upon in committee. He furnishes to the monthly periodicals full statements of moneys received, and his accounts are submitted to auditors for careful examination. In some instances the office of treasurer is honorary, the regular work being conducted by an assistant treasurer or a financial secretary. Usually there is also a general or business agent, who has charge of the publishing department, and the purchase and forwarding of outfits, supplies, etc., for missionaries.

The term honorary secretary, etc., is applied in British societies to persons who serve without receiving any remuneration.

The executive officers are the only persons connected with the society who receive salaries. Members of committees or of boards invariably serve gratuitously. In the case of some of the smaller societies, where the duties are not numerous or heavy, they are performed, commonly without salary, by some minister or layman, but in all the large societies, where the duties require time, salaries are paid.

The work of administration of a missionary society commonly comprises:

1. The Collection and Application of Funds:
   The income of a missionary society includes:
   (a) donations, collections, subscriptions, whether by individuals, churches, Sunday schools, auxiliaries, bands, etc. These are sent either direct to the treasurer or through some local or church organization, and are, as a rule, applied to the general work of the board.
   (b) Legacies. These are usually payable in full by the executors of a will, but are in some instances subject to conditions of annuity or application to some specific purpose.
   (c) The income of invested funds. In some cases these funds have been dedicated to special objects by their donors; e.g., the payment of the salaries of the executive officers, or the support of the agents of mission work. It has become increasingly the custom for the large societies to own the premises where their offices are located. The original erection or purchase of these has been, in almost every case, from moneys contributed for that special purpose, and entirely apart from the ordinary donations to the missionary work of the society.
   The remittance of money to the field is generally through some well-known banking-house of New York or London which has commercial dealings with the country where the mission is located, and is in the form of bills of exchange or letters of credit such as are issued to travelers.

2. The Selection of Missionaries: This is one of the most difficult duties that devolves on a mission board. The peculiar elements that enter into foreign life, the strain of changed climate, the necessity of intimate relations with associates, the demands of sudden emergencies, etc., all enter into the consideration. Then, again, the strange misconceptions as to nature of the missionary work, the idea that personal conse-

3. The Conduct of the Foreign Work: The Missionary Society, as indicated in the article on Methods of Work, is: (1) A great evangelistic agency, employing hundreds of men and women whose chief duty is to preach the Gospel. (2) A bureau of education supplying every grade of instruction to thousands who would otherwise be absolutely ignorant. (3) A publishing society with different departments of translation, editing, publication, and distribution. (4) A building society for the erection of churches, colleges, hospitals, etc. (5) A charitable society for the assistance of the suffering poor, the diseased, the widowed and orphaned. All these various departments that in Europe and America are divided among a dozen different organizations are combined in the foreign work of every great missionary society. As a rule, the decision in almost every detail and conduct of the missions is committed to the missionaries on the field. Questions, however, are constantly arising which can only be decided by the home authority. Such are: 1. The question of expenses to be incurred in different departments, and the accounting for payments
made. 2. The beginning of new work. 3. Relations between different missions and different societies in the same field. 4. General questions of policy. These are all perplexing questions, and questions in regard to which there is much division of opinion even among those best informed on the field. Perhaps the most difficult one of all is that which involves the decisions made in the article Finances of Missions. To enter into detail more fully is beyond the limits of this article. Enough has already been said to show that the men who meet weekly or oftener to consider and decide such complicated questions are undertaking a more important and difficult form of their labor than those who go to the foreign field.

4. Reporting to the Churches: This is becoming more and more an important branch of the home work of the societies. There is a marked difference between societies in this particular. Some societies publish very full reports, like the CMS (which has the services of skilled editors and contributors), and some very meager. Some most carefully arrange and index everything; others give interesting general statements, but are not explicit in details.

5. The Holding and Securing of Real Estate: This has great importance in the prosecution of missionary work. The laws relating to the holding of property are very different in different lands; but whatever be the form of title, the actual ownership rests with the committee at home, where it usually resides.

II. On the Foreign Field: Turning now to the organization of mission work abroad and the administrative agencies employed, we find that the organization is: 1st, Territorial; 2d, Ecclesiastical. The agencies are: 1. Missionaries; 2. Native Pastors or local Ecclesiastical Bodies.

Missions: The word "mission" is used in a great variety of senses, denoting sometimes a single undertaking; but, as found in the majority of the reports of the missionary societies, it indicates an organized (or simply associated) body of missionaries occupying a certain territory, e.g., the North Africa, the Mid-China, the Java Mission. It includes a number of stations, with their outstations and stations, and the extent is usually regulated by the ease of communication between the different parts. In the usage of the Methodist Episcopal Churches of the United States the mission, upon the formation of a regular local ecclesiastical organization, becomes a conference. The Wesleyan Methodists of England limit the use of the word so that it is practically synonymous with district, having (e.g.) four missions in the island of Ceylon. The Society for the Propagation of the Gospel uses the term in the most restricted sense, combining its individual missions in dioceses. The CMS passes over parts of the supervisory work of the mission to qualified local bodies, and reports such work in a separate category.

Speaking now of missions in the general sense, as organizations or associations of missionaries occupying a certain territory or working for a special race, we find them, in the majority of cases, including the Baptist, Congregational, Presbyterian, Methodist, and most of the Episcopal societies, having a more or less complete form of organization. They have regular meetings, conferences, or councils annually or semi-annually, with permanent officers, treasurer, secretary, or presiding elder. Action affecting the mission as a whole is transacted in these meetings, and transmitted to the home department through the appropriate office. Thus the estimates arranged at the annual meeting are transmitted by the secretary of the mission organization to the treasurer; the appropriations made by the board return to the treasurer of the mission, who keeps all the accounts.

Stations: This word also has varied meanings. Usually it denotes some city or large town occupied by a number of missionaries, from which the work extends to the surrounding territory. Sometimes it includes the whole field worked from that place as a center, but the restricted use is the more common, and is that usually adopted in this Encyclopedia. In the stations, too, there is, as a rule, some organization, especially when there are a number of missionaries, an extended field, and many departments.

Outstations or Sub-stations: These are places—sometimes an important city, more often a town or village—where mission work is carried on by active workers alone. Usually there is a church or congregation ministered to by native preachers, and the schools are under native teachers. It is seldom the case that an outstation is the residence of a missionary. In the usage of the Methodist and some Baptist boards, however, there is really no distinction between stations and outstations, except as the most important centers of work are called principal stations and the remainder stations; the missionaries frequently reside at the different stations in turn. They also use the term circuit in the foreign field as at home, to indicate what other societies mean by station field.

2. Ecclesiastical Organization: This varies greatly with the different societies, is governed by the rules of the denominations at home, and follows the lines of the three classes mentioned above. Wherever the missionary societies are organically connected with the church, the missions, whether as Presbyterian Synods, Conferences, etc., are organic parts of the church. They are thus entitled to representation in the governing body of the church, and as a matter of fact are usually represented.

In the second class, where the relation of the board to the church is not organic, the missionaries are under the ecclesiastical discipline of the church or churches at home, by the laws of the Society. In the third class individual missionaries are free to arrange their own ecclesiastical relations, entirely independent of the board.

With regard to the native churches, there is a wide difference of custom. As a rule they follow the lead of the missionaries, who, except in the Episcopal Churches, there is no law governing them; and there is a large liberty left by almost all the societies to their representatives in the field in regard to the details of formal organization.

B. Administration:

1. Foreign Missionaries are the first of the administrative agencies. These are ordained—lay, female, and medical.

The great majority of foreign missionaries are, and except in special instances always have been, ministers regularly ordained according to the laws of the churches to which they belong.
Specific instances in the history of the early missions of the London Missionary Society and the Moravians of the sending out of entirely or comparatively uneducated parsons, to encounter the perplexities, trials, and hardships of missionary life, made it all the more evident that the rule must be that a man to be a successful foreign missionary must be a man of education and special training. This was for many years synonymous with preparation for the ministry, and probably it was due as much to this as to the special work of preaching that it became so decided a rule that all missionaries should be ordained. There were instances where laymen went out as printers, but that was considered exceptional, and in some instances they afterward received ordination. Another element in the case was the fact that the people of many foreign lands could not understand how a man who was not a "priest" could administer spiritual help and counsel, and they were somewhat unwilling to apply to any one whose ministerial status was not of the highest. As, however, missionary work has developed its different departments, as education in the home lands has become more normal and the foreign lands more exacting, as medical work opened up, as the general work has extended to include publication, treasury work, etc., the lay element in mission service became more prominent.

At the present time, in all the organized societies, lay missionaries are employed chiefly as business agents, printers, instructors in the higher schools and colleges, and in medical work. It is increasingly the custom to put a layman in charge of the treasury, the accounts, and the publication work of the different missions. In medical work it is becoming increasingly evident that a physician who is to excel in his profession cannot also be a theologian, and in his practice he finds less and less need of it; indeed, it is in many cases a positive hindrance to be known as a preacher or priest.

Women missionaries take an increasingly important position, both in numbers and in work done. Whether as wives or as single women, they have done and are doing some of the best work, both pioneer and constructive, that is found. They are not always mentioned separately in the tables of statistics, except in the reports of the European societies.

(a) Location: It has been the custom in most countries to send and locate two or more missionaries and their families together. The reasons for this are so obvious that they only need to be mentioned: Mutual consultation in cases of perplexity, sympathy in trial, support in anxiety, social relief from the strain of work, division of labor. In much the same way as it has been found to be wise for missionaries, as a rule, to be married, so it is wise for families to be associated. When female missionaries, whether as teachers or Zanana workers, are sent out, they also, as a rule, go "two and two" together, and establish a home of their own, or else join with the families of the stations. Thus a mission station almost invariably forms a social circle of its own, with its own Christian people, whose individual labors are scarcely more important than their combined power as a Christian community. Since the increase in numbers and importance of lay workers, there has risen a "community" method of life which is somewhat peculiar. Without being in any sense monastic, it seeks to reap the advantage of association. This is primarily economy, both of funds and of men. Under the community method a number of lay workers can be supported for the same sum that it costs to maintain a single missionary family. Another advantage lies in the possibility it offers of utilizing agencies that otherwise would hardly be available. The China Inland Mission and the Salvation Army have largely adopted it and other societies are considering it.

(b) Manner of Life: It is the universal custom in foreign missions to provide for the missionaries, so that their manner of life shall differ as little as possible from that of the home life. The limitations of surrounding customs, etc., are of course considered, and great expense is avoided; but so far as it is practicable it is the policy of the societies to enable their missionaries to have such comforts as a family in moderate circumstances is accustomed to have at home. These are: a substantial, healthy, dwelling comfortably furnished; clothing and food adapted to the climate and their habits of life; service sufficient to enable them to give their whole time to the mission work, so much of adornment of the home as should make it home-like. It is primarily a question of economy. To send a man or a man and wife to Africa, India, or Japan, and compel them to live as the natives do, would, in the immense majority of cases, doom them to early death, or at least to permanent disability. It pays for a mission board to keep its missionaries in good health. But there is an additional reason. With rare exceptions, a missionary has influence in proportion as he preserves his own individuality. In pioneer work it may be wise to conform to the customs of the land, and sink the foreigner in the native; but after his position is once established, the rule is that his own national and racial individuality should assert itself. This is matter of experience, as well as of theory; and notwithstanding the constant reappearance of the other idea, it has a stronger hold to-day than ever before.

(c) Method of Support: This is usually by a fixed allowance, arranged either by or in consultation with the missionaries themselves, and graded according to circumstances of location or of family. The basis is an adequate support from year to year for the missionary and his family, without accumulating property.

(d) Vacations: It is the custom in most if not all missionary societies to allow the missionaries to return to the homeland once in a certain number of years. This, too, is the result of experience, and is found to be economy in the long run. It is needful for the missionaries: first, for rest from the unceasing strains of missionary life; second, for recuperation by contact with vigorous life, and for the purpose of retaining sympathy with, and sympathy with the churches; third, for the care of children and arrangements for their education.

2. Native Workers: These constitute naturally the great body of the working force. Not only is it impossible, but it is undesirable, for the missionary to undertake all the work in his field. His chief aim, next to the conversion of individual souls, is the establishment of the Christian Church on its own distinct basis, with all its different departments. As soon as there are converts they are utilized as workers, each with some responsible share in the work of the missionary.—at first as Bible-readers; then
as catechists, teachers, preachers; and at last as pastors, in full charge of the general work of an organized body of believers. The missionary is the organizer and superintendent, and thus, in a degree, director; yet those who in a sense work under him still work with him, and follow him as leader, rather than obey him as master. It has been the custom of many missionary societies to keep the missionary and native force entirely distinct. This has been due not to any lack of appreciation of the value of native work, or to any desire to exalt the missionary, but rather to the feeling that it was not advantageous from the point of view of the best development of the native churches to a position of independence of all missionary direction and assistance. In those societies where the work is but the extension of the home church this becomes less noticeable, and in them it is frequently the case that native clergy are placed on the same official basis as the missionary. A marked instance of the success of this is the great work done by Bishop Crowther of the Church Missionary Society in Africa. In every case there is the fullest mutual consultation not only upon general plans, but in all details, and it is very seldom a step is taken by the missions without the full concurrence of the native workers.

The question of their support is one of varying difficulty in different fields. At first it is usually assumed by the mission, but as the churches grow they are urged to take the entire support of their preachers and teachers, and also of those who do the aggressive work. In some missions the custom is adopted of requiring that a certain proportion of the pastor’s salary be met by the people before they can have a distinct organization. There is, however, no rule, different arrangements being made according to circumstances of time, place, and condition of the people. In the older-established communities in many cases the entire running expenses of preaching are met by the native churches, the mission only assuming the support of those engaged in distinctively mission work, e.g., Bible, book, and tract translation, colportage, etc. Even this work is in some cases assumed by native organizations, such as the Bulgarian Evangelical Alliance, the Church Council of Travancore, under the auspices of the Church Missionary Society, etc. In some countries, notably in Japan, the churches commence their life with a good degree of self-support, and such an organization as the United Church of Christ in Japan is a wonderful power for good, by reason of its development of native workers, identified with the native church.

Innumerable questions come up in this connection with regard to the amount of education to be given, the salaries to be paid, etc., which can only be a mention here, with the simple statement that whatever rules are adopted by different societies working in different fields, they all have one specific end in view—the training up, as rapidly as possible, but not too hastily, of a body of workers native to the land and in perfect sympathy with their churches, so that in the age the foreign element may take up other work, confident that the churches thus left dependent upon itself will grow stronger rather than weaker, until it becomes able to itself cope with the problems of Christ’s kingdom in its own land. (See Native Agency.)

The classification of native workers is not essentially different from that of Christian workers in America or Europe. Pastors, preachers, evangelists, catechists, colporteurs, Bible-readers, teachers, are essentially the same, and have similar duties and relations wherever they are found.

ORISSA: One of the subdivisions of the lieutenant-governorship of Bengal, India. It constitutes the southwestern part of Bengal. The area is 9,841 square miles, and the population (1901), 4,343,150. Several tribal states lie adjacent to the territory now described, and are under the political supervision of the Orissa officials. The area of these is 15,187 square miles, and the population about a million and a half, largely consisting of aboriginal tribes. This native district occupies the northwestern part of the territory, a hilly region, with a sparse population. British Orissa consists largely of fertile alluvial plains formed out of the deltas of three large rivers—the Mahanadi on the south, the Baitarani on the north, and the Brahman on between them. The people are almost exclusively agriculturists; rice is the staple food. Over 95 per cent. of them are Hindus and only 21 per cent. Mohammedans. The number of aborigines in British Orissa is over 130,000, many of whom have professed Hinduism, although not being included among the Hindus; only about 7,000 still practise their ancient aboriginal religion. Of the million and a half in the tribal states a fraction less than 75 per cent. are Hindus, and a fraction less than 25 per cent. are aborigines, many of whom have professed Hinduisn. The only spirit-worship is the cubic of the statues of the gods; there are also some Kols and Santals, who are more numerous elsewhere. Some of the larger tribes also spread beyond the borders of Orissa into adjacent districts of the Central Provinces or the Madras Presidency. A few Mohammedans, Buddhists, and Christians make up the rest of the population. The aborigines—are needed to cultivate the land and to the majority of the Christians. While the Hindus inhabit the valleys lying between. It was among the Kandhs that the practise of semi-annual human sacrifices to their earh-god prevailed, until the entrance of the British authority in 1853 put a stop to it. Kidnapping and sacrifice—for the victims were usually obtained by raids among the quiet inhabitants of the valleys—was then made a capital offense; and the Kandh priests were induced to substitute buffalos for human beings in their sacrificial rites. The Kandhs are finely developed and intelligent specimens of humanity, possessing capacities which it may be confidently believed will before long be fully brought out by Christian education. The language of Orissa among the Hindus is the Oriya, an Aryan dialect closely related to the Bengali; sometimes it has been classed simply as a dialect of that tongue, but the latest scholars regard it as distinct. Among the aboriginal tribes different languages prevail; those of the Kandhs and the Gonds belong to the Dravidian family of South India. The Kols, Santals, and Bhumijs speak languages of the Ko and Santal families. Many dialects are spoken by as many distinct tribes inhabiting Orissa and other regions.

Brahmanical records in the Great Temple of Jagannath profess to trace the chronology of the earliest Hindu kings of Orissa to the year 1907.
Little reliance can be put upon these dates, but this much they make clear, that for many centuries before Christ Orissa was governed by Hindu kings. The most illustrious of these kings that the Kols, Gonds, etc., could ever recall, was under these kings that the Kols, Gonds, etc., could ever recall, was under these kings that the Kols, Gonds, etc., could ever recall, was under these kings that the Kols, Gonds, etc., could ever recall, was under these kings that the Kols, Gonds, etc., could ever recall, was under these kings; the Kols, Gonds, etc., were pushed back from the plains to the mountains. Then from about 500 b.c. to the Christian era is the period of Buddhist development and dominion. Buddhist caves, dug out during this period, probably (some assign a date as low as 1000 b.c.) during the Yavanahs. Then followed the period of the Yavana invasions, the just who the Yavanas were not fully settled. They came, however, from some northern quarter. They were at last expelled, and Orissa was governed by two successive Hindu dynasties from the 6th century of our era until well on into the 16th. The worship of Jagannath, which, according to tradition, had long been practised in Orissa, was restored, after the Buddhist and Yavana eras, by one of these dynasties, and the present Great Temple at Puri built by the other, in the 12th century. During the 16th century the Mohammedans came, and Orissa became a part of the Mogul Empire of Delhi. In the 18th century, when the Mogul power faded before the rising Marathas, the latter ruled for a time over this province. From them it was taken by the British in 1803.

The Hindus of Orissa are excessively religious. Temples and shrines abound. But the chief one, and one of the most famous in all India, is the one sacred to Jagannath (“Lord of the World,” one of the titles of Vishnu), at Puri. To this temple 300,000 pilgrims have been known to come in one year. The great Car Festival alone sometimes draws to it as many as a third of that number. The government has done all in its power to prevent the outbreak and spread of disease among these crowds, and to enable the pilgrims to reach home safely. With Western people the general idea of this great festival is associated with that of the self-immolation of devotees under the wheels of Jagannath’s car as it is dragged from the temple to the “Summerhouse” of the god, a mile away. The descriptions of these religious suicides have been exaggerated. The cult of Jagannath is to the sacrifice of life, tho’ probably some devotees in moments of religious frenzy have caused themselves thus to be destroyed. But self-immolation during recent years may be said to be almost wholly unknown. The long traditional connection of Jagannath with Orissa helps to make his worship popular within the province itself; the popularity of it beyond the limits of Orissa is maintained, and within the province is still further helped by the fact that he is represented as a god of the people, without reference to caste or sect; he is the “Lord of the World.” In short, the religious peculiarities of Orissa are of the utmost interest; the Jagannath worship involves some of the noblest as well as some of the most corrupting features of Hinduism; and its historic development is associated with the memory of some of the noblest souls in all the annals of Hindustan.

Owing to the exposed situation of Orissa it suffers occasionally from inundations from the sea. Vast tidal waves, impelled by the tremendous cyclones which sweep at times over the Bay of Bengal, accompanied often by heavy falls of rain which aggravate the disaster by swelling the rivers, will devastate several hundred square miles of low-lying territory, and cause enormous destruction of life and property.

The Baptist missionaries at Serampore undertook, previous to the year 1820, evangelization work in Orissa. Unfortunately, the withdrawal in favor of the General Baptist Society (formed in England in 1816), which began work in this province in 1822. Cuttack, the chief city, was first occupied, and later Puri, the seat of Jagannath’s temple and worship. The BMS now carries on work in these and throughout the province. Among the Baptist Missionary Society entered the northern part of Orissa in 1835, and now (1900) has seven stations in that part of Bengal. The two Baptist societies, together, have in Orissa about 8,000 professed Christian adherents, including church members.

ORIZABA: A town in Mexico, situated in the state of Vera Cruz, 78 miles E. by S. of Puebla. Altitude, 4,200 feet. Population (1900), 31,512. Station of the ME, with (1903) 1 woman missionary, 19 native workers, 358 professed Christians, of whom 253 are communicants; 9 places of worship, 9 Sunday schools, and 1 day school. Station of the BOQ (1898), with (1903) 2 missionaries, 1 wife, 1 woman missionary, and 1 day school. The first Protestant church in Bolivia was organized here in 1902.

ORUKO: A town in Bolivia, capital of the district of Oruro; formerly capital of the republic; situated 155 miles by rail S. S. E. of La Paz. It is the center of tin and silver mining. Population, 8,500. Altitude, 12,117 feet. Station of the BOQ (1908), with (1903) 2 missionaries, 1 wife, 1 woman missionary, and 1 day school. The first Protestant church in Bolivia was organized here in 1902.

OSAKA: One of the large cities of Japan, situated on the main island, 25 miles southwest of Kioto. It is one of the three imperial cities; is well built and clean, and is the center of large tea districts. A government college and academy are located here. The climate is mild. Population (1898), 821,235. Its importance as a center of influence has been fully recognized by the missionary societies of the world, which are represented in the city. Station of the ABCFM (1872), with (1903) 2 missionaries, 3 women missionaries, 3 native workers, 10 outstations, 14 places of worship, 20 Sunday schools, 1 boarding school, 1 dispensary, and 1 printing house. Station also of the CMS (1874), with (1903) 5 missionaries, four of them with their wives; 6 women missionaries, 17 native workers, 4 places of worship, 3 day schools, 2 boarding schools, and 745 professed Christians, of whom 305 are communicants. Station also of the Cumberland Presbyterians (1880), with (1903) 2 missionaries with their wives, 2 women missionaries, 16 native workers, 2 outstations, 14 places of worship, 4 Sunday schools, 1 boarding school, and 214 professed Christians. Station also of the PN (1881), with (1903) 1 missionary and his wife, 2 women missionaries, 9 native workers, 2 outstations, 3 places of worship, 1 day school, 1 boarding school, 1 kindergarten. Station also of the MES (1890), with (1903) 1 missionary and his wife, 3 native workers, 2 outstations, 3 places of worship, 4 Sunday schools, and 121 professed Christians. Station also of the ABM (1899), with (1903) 2 missionaries and their wives, 2 women missionaries, 3 native workers, 10 outstations, 14 places
THE ENCYCLOPEDIA OF MISSIONS

of worship, 20 Sunday schools, and 1 printing house. Station also of the FCMS (1859), with (1902) 1 missionary and his wife, 1 woman missionary, 1 kindergarten, 1 place of worship, 2 Sunday schools, 2 day schools, 14 day schools, 1 industrial school, and 942 professed Christians.

OSCARSBORG: A settlement in Natal, Africa, situated 42 miles E. by N. of Ladysmith. Station of the Church of Sweden Mission (1785), with (1900) 2 missionaries, one with his wife; 2 women missionaries, 7 native workers, 6 outstations, 2 places of worship, 3 day schools, and 140 professed Christians.

OSGOOD, Dauphin William: Born at Nelson, N. H., November 5, 1845; studied medicine at Brown University and dwell at the University of New York in 1869; sailed as a medical missionary of the ABCFM for Fuchau, China, December, 1869. He soon mastered the intricacies of the Chinese language, acquiring a knowledge of both the Mandarin and local dialects. Some of his earliest efforts was the establishment of the Fuchau Medical Missionary Hospital. During the ten years of its existence medical aid was given gratuitously to 51,838 patients among the poorer classes. He established also in connection with the mission an asylum for the victims of opium, and in two years 1,300 patients received treatment, a large number of whom were cured. He was frequently called as a consulting physician by his medical confères.

Every hour he could spare from the active duties of his profession for the last four years of his life was devoted to the translation into Chinese of a standard work on anatomy. The finishing touches were put to it only on the day before his death. The work has been published in five volumes, illustrated by numerous plates. It is the first Chinese translation of the Chinese language, and has been much used in China.

He died at the sanitarium near Fuchau August 17, 1880.

OSHIMA: A town in Japan, situated on Kiushiu Island, about 10 miles E. of Nagasaki. Station of the Scandinavian Alliance Mission, with (1900) 1 woman missionary.

OSMANLI TURKISH: The Western dialect of the Turkish language as distinguished from the Eastern. It is used in Turkey, and the Eastern dialects, of which the Jagatai is the type, are used by Turks of the main stock in Central Asia. The term Osmanli Turkish is needlessly used by some also to distinguish the Turkish language when written with the Arabic letters from the same written with other letters. See Turkish Language.

OSSETIAN LANGUAGE: The language of some of the tribes inhabiting the Caucasian region of the Russian Empire. It belongs to the Iranian group of the Aryan family of languages. It has no alphabet of its own, but has been written with Georgian and also with Russian (Cyrillian) letters.

There are three recognized dialects, and probably more than three.

OSTYAK LANGUAGE: The language of a people found in Western Siberia in the provinces of Tomsk, adjoining the Altai Mountains, and Tobolsk, lying E. of the Ural range. It belongs to the Finnic or Ugrian branch of the Ural-Altaic family of languages and has been written with Russian (Cyrillian) letters.

OTAKI DISTRICT: A post in New Zealand, on the W. coast of North Island, about 45 miles N. N. E. of Wellington. Population, 1,500. Here the CMS has (1903) 1 missionary, 14 native workers, 1 day school and 1,597 professed Christians, of whom 235 are communicants.

OTJIHAENENA. See OTJIHAENENA.

OTJIMBINGUE. See OTJIMBINGUE.

OTJOSAZU. See OTJOSAZU.

OTJOZONDJUPA. See OTJONZONDJUPA.

OTJIHAENENA: A village in German Southwest Africa, situated in the Herero country, about 230 miles E. of Swakopmund. Station of the Rhenish Missionary Society, with (1903) 2 missionaries and their wives, 12 native workers, 8 outstations, 1 day school and 6,481 professed Christians, of whom 1,134 are communicants. Some write the name Otjihaenena.

OTJIMBINGUE: A mission station of the Rhenish Missionary Society in German Southwest Africa, situated on the railway about 110 miles E. N. E. of Swakopmund, with (1903) 1 missionary and his wife; 6 native workers, 1 outstation, 1 day school, 1 Sunday school and 764 professed Christians, of whom 476 are communicants. Some write the name Otjimbingue.

OTJONZONDJUPA: A settlement in German Southwest Africa, situated in the Herero district, about 230 miles N. E. of Swakopmund. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 7 native workers, 6 outstations, 7 day schools, and 310 professed Christians, of whom 131 are communicants. Some write the name Otjonzondjupa.

OTJOSAZU: A village in German Southwest Africa, situated in the territory of the Herero, about 20,000 miles N. of Swakopmund. Station of the Rhenish Missionary Society, with (1903) 2 missionaries, one with his wife; 9 native workers, 3 outstations, 4 day schools, and 537 professed Christians, of whom 168 are communicants. The Society writes the name Otjosazu.

OUDE: Formerly an independent native kingdom, annexed by England in 1856. Now a part of the United Provinces.

UGAVIGAMUTE: A settlement in the S. W. part of Alaska, situated on the Kuskokwim River, about 125 miles from its mouth. Station of the Moravian Mission (1892), with (1901) 1 missionary and his wife, 2 outstations, 1 place of worship, 1 Sunday school, and 60 professed Christians. The name is sometimes written Ugavigamut.

UIRO PRETO: A town and railway station of Brazil, capital of the state of Minas Geraes, situated 180 miles N. by W. of Rio do Janeiro. The city is overlooked by the double peaked Itatolium. It owes its origin to gold deposits discovered in 1908. Population, 20,000. Station of the "Help for Brazil" Mission.

OWEN, Joseph: Born at Bedford, New York,
THE ENCYCLOPEDIA OF MISSIONS

OSBORN PUBLICATION

June 14, 1814; graduated at Princeton College, 1835, and theological seminary 1839; ordained as an evangelist by the Presbytery of Westchester October 2, 1839; sailed as a missionary of the PN for India, August 5, 1840. Most of his life was spent at Allahabad (1840-68). His labors, like those of most missionaries in India, were various—preaching, teaching, translating, and revising former translations of the Scriptures, and preparing commentaries on different books of the Bible. He was president of the Allahabad Missionary College, and professor in the Allahabad Theological Seminary. After 28 years of continuous labor he left in ill health for America via Scotland, intending, after spending a few days in Edinburgh, to visit his native land, and then return to India, but died in Edinburgh December 4, 1870. He took high rank as a scholar. When he left India he had just completed a second revision and edition of the Old Testament in Hindi and a commentary on Isaiah in Hindustani for the American Tract Society. He wrote a new translation of the Psalms in Hindustani and several commentaries in the same language.

OXFORD MISSION TO CALCUTTA: Headquarters, Calcutta, India. The mission was founded in 1850 in answer to an appeal from the Bishop of Calcutta to the University of Oxford to "send out men to work among the natives of that city who have received or are receiving the advantages of the system of education provided by the English Government." The form selected for the mission was that which was suggested by the late Bishop Douglas of Bombay—that of a "missionary brotherhood." It was decided, therefore, that the Oxford Mission should form a community under a superior, altho its members would not be bound by any vows for life, but would be allowed to withdraw at pleasure. The rules of the community were tested by two years' work in Calcutta, after which the bishop incorporated the first members of "The Oxford Brotherhood of the Epiphany."

The mission consists of 8 ordained and 2 unordained members, all Oxford University men, who carry on work in Calcutta and Patna, in three lines:

1. Interviews with the natives, lectures, and discussions. 2. The conduct of a school for natives.
3. The editing of a weekly paper called The Epiphany, in which free discussion of all religious questions is carried on between members of the mission and inquirers.

The brotherhood also undertakes special work in India, for which funds are provided by the SPG. There is also a Ladies' Association, organized in 1857, in aid of the Oxford Mission.

YOY: A town in West Africa, situated 180 miles N. E. of Lagos, in the Yoruba country. Population about 50,000. Station of the CMS, with (1903) 2 missionaries, one of them with his wife; 3 women missionaries, 3 native workers, 2 day schools, 1 theological class, and 142 professed Christians. Station also of the SBC, with (1903) 2 missionaries and their wives, 4 native workers, 2 places of worship, 1 Sunday school, 1 day school, and 43 professed Christians. Station also of the WMS, with (1903) 10 native workers, 6 Sunday schools, 5 day schools, and 176 professed Christians, of whom 150 are communicants. Some write the name Auyaw.

PABALLONG: A town in Cape Colony, Africa, situated in Griqualand East, near the border of Basutoland, and about 15 miles S. of Matatiela. Station of the Paris Evangelical Missionary Society (1876), with (1902) 1 missionary and his wife, 1 teacher, 7 outstations, 1 place of worship, 1 Sunday school, 5 day schools, and 365 professed Christians.

PABNA: A town in Bengal, India, situated 75 miles W. N. W. of Dacca. It has a large indigo factory. Population, 16,500, of whom 6,400 are Hindus and 9,000 Mohammedans. Station of the Furreedmore Mission (1890), with (1901) 2 missionaries, one with his wife; 2 women missionaries, 7 native workers, 4 day schools, and 1 place of worship.

PA-CHAU: A town in the province of Sze-chwan, China, situated 150 miles N. by E. of Chung-kingfu. Station of the CIM (1887), with (1902) 1 missionary and his wife, 3 women missionaries, 2 native workers, 1 place of worship, 1 day school, 1 Sunday school, and 47 professed Christians.

PACHIUC: A mining town in the State of Hidalgo, Mexico, about 56 miles N. E. by N. of Mexico City. Silver mines were worked here before the Spanish conquest, and silver has been extracted almost continuously ever since. The mines of Pachuca and the neighboring Real del Monte produce one-sixth of the aggregate silver mined in the year in the whole country. Station of the ME, with (1903) 1 missionary and his wife, 2 women missionaries, 30 native workers, 5 outstations, 8 places of worship, 9 Sunday schools, 9 day schools, 1 boarding school, and 1,494 professed Christians, of whom 508 are communicants.

PADDANG: A town in Sumatra, Dutch East Indies, situated on the W. coast. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife and 64 professed Christians, of whom 59 are communicants. Station also of the Seventh Day Adventists (1900), with (1900) 1 missionary and his wife and 1 boarding school.

PAGODA ANCHORAGE: A seaport in the province of Foo-kien, China, situated on the S. side of the mouth of the estuary of the Min River, about 18 miles E. of Fu-chau. Station of the ABCFM (1860), with (1903) 3 missionaries and their wives, 60 native workers, 30 outstations, 30 places of worship, 30 Sunday schools, 26 day schools, 3 boarding schools, 1 dispensary, 1 hospital, and 501 professed Christians.

PAHANDUT: A village in Southern Borneo, Dutch East Indies, situated about 95 miles N. W. of Banjermasin. Station of the Rhenish Mission Society, with (1903) 1 missionary and
his wife, 3 native workers, 2 outstations, 1 day school, and 75 professed Christians, of whom 34 are communicants.

PARKOHI: A town at the head of the Gulf of Tonkin, Kwan-tung, China; is a treaty port, with a population of 25,000. Station of the CMS (1860), with (1903) 3 missionaries and their wives, 12 native missionaries, 2 day schools, 2 boarding schools, 1 dispensary, 1 hospital, 1 jepers' asylum, and 173 professed Christians, of whom 72 are communicants.

PAKOKKU: A town in Upper Burma, India, capital of the district of Pakokku, on the right bank of the Irawadi, 20 miles N. E. of Pagan. Population, 20,000, of whom 18,400 are Buddhists. Station of the WMS, with (1903) 1 missionary, 19 native workers, 7 outstations, 7 Sunday schools, 6 day schools, and 60 professed Christians, of whom 51 are communicants.

PAKAUR: A town and railway station in Bengal, India, situated in the E. of the Santal Parganas, about 160 miles N. N. W. of Calcutta. Station of the ME, with (1903) 1 missionary and his wife, 18 native workers, 1 place of worship, 6 Sunday schools, 5 day schools, and 279 professed Christians, of whom 79 are communicants. Some write the name Pakur.

PAKUR. See PAKAUR.

PALABALA: A village in the Congo Free State, West Africa, 110 miles from the mouth of the Congo River, and a few miles from the left bank of the Congo River, near Matadi. Station of the ABM (1878), with (1903) 3 missionaries, 2 of them with their wives; 12 native workers, 7 outstations, 3 places of worship, 7 day schools, and 800 professed Christians, of whom 324 are communicants.

PALAKONDA: A town of Madras, India, situated 70 miles N. N. E. of Vizagapatam. Population, 10,400, of whom 10,100 are Hindus. Station of the Canada Baptist Convention of the Maritime Provinces (1892), with (1900) 1 missionary and 3 native workers.

PALAMKOTTA: A town in Madras, India, situated about 5 miles E. of Tinneveli. Population, 5,000. Station of the CMS (1820), with (1903) 7 missionaries, 5 of them with their wives; 6 women missionaries, 4 boarding schools, 1 theological class, 1 college, 462 day schools, 861 native workers, and 54,970 professed Christians, of whom 13,439 are communicants (including the district of Tinneveli Church Council). Station of the CEZ (1891), with (1903) 5 women missionaries, 66 native workers, 3 day schools, 1 boarding school, 1 industrial school, 1 dispensary, and 1,139 Zenanai pupils. Some write the name Palamcottta.

PALANI. See PALNI.

PALAPYE. See ROWE.

PALESTINE. See SYRIA.

PALGHAT: A town in the Malabar district, Madras, 30 miles south-southwest of Coimbatore, 68 miles east of Calicut, in a famous pass of the Western Ghats. Has a large trade and active manufactures. Population, 39,500, of whom 33,000 are Hindus. Station of the Basel Missionary Society (1858), with (1903) 3 missionaries, 2 of them with their wives; 27 native workers, 5 outstations, 1 Sunday school, 5 day schools, and 443 professed Christians, of whom 248 are communicants.

PALLYO LANGUAGE: One of the Indic group of the Aryan family of languages. It is the language of Buddhist sacred literature in Ceylon and Farther India, and is written with various local characters. It is classed as an old colloquial Prakrit, as contrasted with the literary or Sanskrit, but it is not now colloquial in the lands where it is cultivated in literature.

PALIPPI: A village in the Toba Lake region of Sumatra, Dutch East Indies. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 1 native worker, 1 Sunday school, 1 day school, and 7 professional Christians.

PALOKONDA. See PALAKONDA.

PALLAM. A town of Travanore, India, situated about 4 miles S. W. of Kottayam. Station of the CMS (1845), with (1903) 1 missionary and his wife, 43 native workers, 11 day schools, 1 boarding school, and, in the district including Kot-tayam, 188 native workers, 90 day schools, and 20,645 professed Christians, of whom 5,194 are communicants.

PALMENAR: Town in North Arct, Madras, India, near the summit of the Magli Pass, 2,247 feet above the sea and 115 miles W. of Madras. A healthy station, 10° cooler than the rest of the district. Population, 1,931. There is a busy trade. Station of the RCA (1857), with (1903) 1 missionary and his wife, 1 woman missionary, 16 native workers, 1 place of worship, 4 Sunday schools, 1 day school, 1 theological class, and 145 professed Christians, of whom 61 are communicants.

PALMETTONTAINE: A settlement in the Klip-plaat region of Cape Colony, S. Africa, situated about 54 miles S. W. of Graaff Reinet. Station of the Hannover Lutheran Free Church Mission Society (1890), with (1901) 1 missionary and his wife, 4 native workers, 4 outstations, 5 places of worship, 5 day schools, and 1,500 professed Christians.

PAMLUR: A town in the native state of Haidarabad, India, situated about 63 miles S. W. of the city of Haidarabad. Climate healthy but hot. Station of the ABMU (1855), with (1903) 1 missionary and his wife, 29 native workers, 5 outstations, 10 places of worship, 14 Sunday schools, 10 day schools, 1 boarding school, 1 dispensary, 1 hospital, and 851 communicant Christians.

PALNI: A municipality in Madras, India, situated about 28 miles W. N. W. of Dindigul. Population, 16,900, of whom 15,000 are Hindus. Station of the ABCFM (1862), with (1903) 1 missionary and his wife, 34 native workers, 12 outstations, 10 places of worship, 11 Sunday schools, 9 day schools, 1 boarding school, and 169 professed Christians. Some write the name Palani.

PALWAL: A municipality in the Punjab, India, in the district of Gurgaon, 33 miles S. by E. of Delhi. It is of great antiquity, and is said to have been restored by Vikramaditya in 57 n. c. Population, 11,200, of whom 7,400 are Hindus and 3,700 are Mohammedans. Station of the BZM (1891), with (1903) 6 women missionaries, 7 native workers, 4 Sunday schools, 4 day schools, 1 industrial school, 1 dispensary, 1 hospital, and 84 Zenanai pupils. Station also of the BMS
(1895), with (1903) 2 missionaries and their wives, 8 native workers, 3 outstations, 6 Sunday schools, 3 day schools, 3 dispensaries, and 120 professed Christians, of whom 59 are communicants.

PANADURE: A village in the Western Province of Ceylon, India, situated on the W. coast about 15 miles S. of Colombo. Station of the WMS, with (1903) 1 missionary, 20 native workers, 7 places of worship, 5 Sunday schools, 5 day schools, and 145 professed Christians, of whom 126 are communicants.

PANAIETI: An island of the D'Entrecasteaux group in Malaysia, lying about 40 miles S. E. of the extreme eastern point of New Guinea. Station of the Australian Wesleyan Methodist Mission, with (1901) 1 missionary, 5 native workers, 6 places of worship, 5 Sunday schools, 5 day schools, and 47 professed Christians.

PANCHGANJ: A town in Bombay, India, situated 22 miles N. N. W. of Satara. Station of the ZBM, with (1903) 4 women missionaries, 7 native workers, 1 outstation, 1 boarding school. Station write to the Panchganj Mission.

PANGASINAN LANGUAGE: One of the languages belonging to the Malayian linguistic group and spoken by about 1,000,000 of the inhabitants of Luzon, P. I. It is written with Roman letters, having been reduced to writing by the Spanish friars.

PANGALOAN: A village in Sumatra, on the Batang Toru River, 23 miles E. by N. of Siboga. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 1 woman missionary, 84 native workers, 6 outstations, 1 Sunday school, 8 day schools, and 3,700 professed Christians, of whom 1,665 are communicants.

PANGHAREPAN: A town on the island of Java, near the head of Wynkoop's Bay, on the W. coast and about 50 miles S. of Batavia. Station of the Netherlands Missionary Society (1872), with (1901) 2 missionaries, 7 native workers, 1 outstation, and 106 professed Christians.

PANGARIBUAN: A village in Sumatra, Dutch East Indies, situated 32 miles N. E. of Siboga. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 41 native workers, 8 outstations, 7 Sunday schools, 12 day schools, and 1,623 professed Christians, of whom 748 are communicants.

PANG-CHUANG: A town in Shan-tung, China, 53 miles from Tsii-nan-fu, 125 miles south-southwest of Tsientin and 6 miles southeast of Grand Canal. Natives poor, low, crowded for room in which to live. Station of the ABCFM (1879), with (1903) 2 missionaries and their wives, 2 women missionaries, 39 native workers, 24 outstations, 24 places of worship, 24 Sunday schools, 8 day schools, 2 boarding schools, 1 dispensary, 1 hospital, and 734 professed Christians.

PANGKHOI: A village of South Borneo, Dutch East Indies, Malaysia, situated 32 miles W. N. W. of Banjermassin. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 7 native workers, 3 outstations, 3 day schools, 1 Sunday school, and 271 professed Christians, of whom 100 are communicants.

PANGKUMU: A village in Mallicollo, New Hebrides, situated S. of Aulua. Station of the New Hebrides Missionary Society, with (1900) 1 missionary, 12 native workers, 1 outstation, 9 day schools, 1 boarding school, and 37 professed Christians.

PANGOMBUSAN: A village in Sumatra, Dutch East Indies, situated at the S. E. extremity of Toba Lake. Station of the Rhenish Mission Society, with (1903) 1 missionary and his wife, 20 native workers, 3 outstations, 1 Sunday school, 4 day schools, and 206 professed Christians, of whom 126 are communicants.

PANHALA KODOLI: A town in Bombay, India, situated 12 miles N. by E. of Kolhapur. Station of the PN (1877), with (1903) 3 women missionaries, 11 native workers, 6 outstations, 6 Sunday schools, 7 day schools, 1 dispensary, and 164 professed Christians.

PANGGARAPITU: A settlement in Sumatra, Dutch East Indies, situated in the Silindung Valley, about 24 miles N. E. of Siboga. Station of the Rhenish Missionary Society, with (1903) 1 missionary and his wife, 47 native workers, 2 outstations, 4 Sunday schools, 4 day schools, and 2,588 professed Christians, of whom 1,257 are communicants.

PANTA: A station of the Netherlands Bible Society, in the Island of Celebes, Dutch East Indies, situated near Posso Lake. A missionary and his wife are stationed here for Bible translation work.

PAO-KING-FU: A town in the province of Hu-nan, China, 250 miles S. of Ichang. It is a small but busy place. The missionary was driven out by a mob in 1902, but later allowed to return. Station of the CIM, with 1 missionary. It is a center for German associates of the CIM.

PAO-NING-FU: A town in the province of Szechwan, China, situated 145 miles N. N. W. of Chung-king. It is the center of a large silk-producing district. Station of the CIM (1856), with 1,000,000 people, 2 of them with their wives; 6 women missionaries, 6 native workers, 4 outstations, 5 places of worship, 1 day school, 1 Sunday school, 1 boarding school, 1 hospital, 1 dispensary, and 102 professed Christians.

PAO-TING-FU: A town in China, in the province of Peking, about 80 miles S. W. by S. of Peking. At the point the missionaries of the ABCFM, PN, and CIM were all killed by the Chinese during the Boxer movement in 1900. Station of the ABCFM (1873), with (1903) 3 missionaries and their wives, 2 women missionaries, 8 native workers, 9 outstations, 9 places of worship, 9 Sunday schools, 3 day schools, 2 boarding schools, 2 dispensaries, 1 hospital, and 234 communicant Christians. Station of the PN (1893), with (1903) 5 missionaries, 4 of them with their wives; 2 women missionaries, 3 outstations, 1 place of worship, 1 Sunday school, 2 day schools, 2 dispensaries, 1 hospital, and 150 communicant Christians.

PAO-TEO (Mongolia). See PAO-TU.

PAO-TU: A town in Mongolia, China, situated near the Hwang-ho River, about 335 miles W. of Peking. Station of the Scandinavian Alliance of N. A., with (1901) 2 missionaries and 1 woman missionary. Station write the name Paoteo.

PAPETTE: A town in Tahiti, on the N. W. coast of the island in the small bay at the mouth of the River Papeete, of charming aspect. All the houses are surrounded by gardens. It is in regular communication with France by New Caledonia, with New Zealand, and San Francisco.
Station of the Paris Evangelical Missionary Society (1863), with (1903) 4 missionaries and their wives, 6 women missionaries, 4 native workers, 6 outstations, 2 places of worship, 2 Sunday schools, 2 day schools, 1 boarding school, and 293 professed Christians. Station also of the Seventh Day Adventists (1891), with (1901) 5 missionaries, 2 of them with their wives; 1 native worker, 3 outstations, 2 places of worship, 3 Sunday schools, 1 printing house, and 80 professed Christians.

PAPETOAI: A town on the N. coast of Eimeo Island, in the Society group. Station of the Paris Evangelical Mission Society (1867), with (1903) 1 missionary and his wife, 1 place of worship, 1 Sunday school, and 100 professed Christians.

PAPUA, or NEW GUINEA: Is the largest island on the globe, except Australia and Greenland. It is very irregular in its outline, but extends for about 1,300 miles between latitude 0° 30′ to 10° 40′ south, and longitude 131° to 150° 30′ east, and contains an estimated area of 312,329 square miles. Boundaries not yet determined and surveyed. In general it is a mountainous country in the northern part, while the southern coasts are low and wooded. Vegetation is very luxuriant; tropical fruit trees are found in abundance, while the woods of the interior produce fine timbers, brilliant flowers, orchids, and plants of wild sugar cane, tobacco, and rice are raised. The climate is healthful, the great changes in temperature occur during a very short time. The inhabitants, so far as they have been classified, are kin to the negro race, though there are several varieties of Polynesians represented. In number they are estimated at 800,000. Of their language the only knowledge we have is gained from the researches of the missionaries, who collected a vocabulary. This seems to show that the Papuan languages belong to a separate class from the Malayo-Polynesian languages. The three great powers exercise authority over the country as follows: British New Guinea, 29 per cent. of the terri’ory, the S. E. quarter of the island; German New Guinea, 25 per cent., its territory north to the 1° 30′; and Dutch New Guinea, constituting 45 per cent., the western half of the island. The missionary first entered the Dutch portion of the island, but the communicants in the Dutch churches are few in number. The London Missionary Society next sent missionaries from the Loyalty Islands into British New Guinea, and ever since this Society has accomplished the largest results in New Guinea and has had the strongest force. Australian Anglicans opened a mission on the north-east shore in 1891. In German New Guinea two German Societies are laboring.

PARAGUAY: A republic in South America, situated between 22° 30′ and 27° 30′ south latitude, and 54° 35′ and 61° 40′ west longitude, southwest of Brazil and northeast of the Argentine Republic. Area, 91,970 square miles. The country in general consists of a series of plateaus with wooded slopes and grassy plains. The climate is very fine, though at times the heat is excessive. The mean temperature for winter is 71°, and for summer 81°.

According to the Constitution of November, 1870, the government consists of a president, a Congress of two Houses, a Senate, and a House of Deputies. The senators and deputies are elected directly by the people, and the president holds office for four years.

The capital (1889) is Asunción (45,000), the capital, rapidly growing in population and importance; Concepción (15,000), San Pedro (8,000). One-third of the inhabitants live in the central districts, containing the capital; one-third in the districts of Villa Rica and Cusasapa, and the remainder in the cultivated portion of the country. Agriculture and the raising of cattle are the principal occupations of the people, and Italian, Spanish, and German colonists are developing its resources in both these directions. Railway, telegraph and telephone lines are in operation. The Roman Catholic is the established religion of the state, but other religions are tolerated. Education is free and compulsory. The Protestant Societies located in Paraguay are the South American Missionary Society and the Missionary Society of the Methodist Episcopal Church Board of Missions. The republic is open to Gospel influences, and the prospect of Christian missions is bright.

PARAMARIBO: Chief town of Surinam, South America, situated near the mouth of the Surinam River. Population, 31,000. In the year 1835 the first Moravian missionaries landed in Surinam. The object was at first to commence a mission in Berbice, making Paramaribo the headquarters. Here a company of five Brethren worked at their trades in order to support themselves and the mission in Berbice. Their attention was soon directed to the negroes in Paramaribo. At first they had to face a good deal of opposition, but they gradually overcame ill-grounded prejudice, and were permitted to purchase a piece of land in the town. For a considerable time their missionary work continued very limited, but gradually it expanded, and Paramaribo became endowed with a church, a school, and several classes for negro children, which has five separate places of worship in the city, the branches being Rusten Vrede, Wanica, Combe, and Sarón. The Moravian Mission Society has here (1903) 21 missionaries, 19 women missionaries, 5 places of worship, 4 Sunday schools, 2 day schools, 1 orphanage, and 18 professed Christians. Station also of the SDA (1887), with 1 missionary, 3 native workers, and 10 professed Christians. The auxiliary International Medical and Benevolent Association also maintains (1901) 1 missionary here.

PARANTJ: A town in Bombay, India, situated 31 miles N. N. E. of Ahmadabad. Population, 8,800, of whom 5,800 are Hindus. Station of the Presbyterian Church of Ireland (1807), with (1901) 2 missionaries, 9 native workers, 1 place of worship, 2 Sunday schools, 2 day schools, 1 orphanage, and 15 professed Christians.

PAREYCHALEY: A district in Travancore, India, situated between Neyyor and Trivandrum. It is the meeting-place of the Tamil and Malayalum languages. Population of the district, 130,000. It gives name to a station of the LMS (1845), with (1903) 1 missionary and his wife, 175 native workers, 85 outstations, 85 Sunday schools, 67 day schools, and 22,063 professed Christians, of whom 2,083 are communicants.
PARGARUTAN: A village in Sumatra, Dutch East Indies, situated about 50 miles S. E. of Siboga. Station of the Java Committee, with (1901) 1 missionary and his wife and 1 day school with 12 native pupils.

PARIS EVANGELICAL MISSION SOCIETY: The Paris Society for Evangelical Missions among non-Christian Nations (Société des Missions évangéliques chez les Peuples non-Chrétiens, établi à Paris) was formed in November, 1822, as a result of the general religious revival in Western Europe. Before this time several missionary committees had been organized in Alsace, in Southern France, and in Paris, which now joined the Paris Society as auxiliary associations. Among the founders of the Society were some of the most prominent of the French Protestants. Its first president was Admiral Count Verhnel, and Jean and Frederick Most Baron A. de Staël, and other celebrated men were on this first committee. Its first general assembly was held in 1824, and in the same year an institution for training future missionaries was established.

Until 1840 the work of the Society went steadily forward; from this time its funds began to diminish, and after the Revolution of 1848 the want of money forced the Society to close the training institute. Of the 82 pupils who had joined it, 34 were laboring as missionaries in heathen countries, 17 as pastors in France, and 6 as teachers; the mission work in Basutoland, South Africa, was still carried on in spite of difficulties.

One of the Society's first missionaries, the Rev. E. Coalis, returned to France in 1849. His missionary addresses, delivered in churches all over the country, were crowded with most remarkable success, and a new love for missions seemed to spring up everywhere. The yearly income soon amounted to 180,000 francs. In 1856 the Training Institute was opened, and the Missions Institute of its head, and new spheres of labor were soon added to that in South Africa. Missionaries were sent to China (1859) and to Senegal (1862). The colonial policy of the French Government being hostile to non-French organizations in the colonies, calls were made to take up work that had already been started by others. Thus in 1863 it took over the work of the LMS in Tahiti, and later that of the American Presbyterians (in part) in the Gabun region. In 1885 additional work was undertaken among the Kabyles or Berber tribes living in North Africa, and in 1886 a long-hoped for mission was begun on the Upper Zambesi. In 1889 mission work was begun in the French territories on the Ogowe and Congo Rivers. Until 1887 the training-school, being dependent on hired rooms, had migrated from one end of Paris to the other; in 1888 a mission-house admirably adapted to its purpose was erected at 102 Boulevard Arago. In 1896, as a result of the French conquest of Madagascar, application was made to the Society to take up at least a portion of the work there. Altho the task seemed herculean it was met courageously and successfully, with the result that the other societies laboring in Madagascar were also placed on a better foundation.

The Paris Society is undenominational. Its management is in the hands of a council composed of 15 members, the presidents, 2 secretaries, two auditors, a treasurer, and twelve assessors. This council makes its own laws, and also the regulations to be followed by auxiliary committees formed outside of Paris. The services of the council are rendered gratuitously. A general assembly of the whole membership of the Society is held annually.

1. Basuto Mission: The first three missionaries of the Society, Messrs. Bissequx, Lemme, and Rolland, were sent to Transvaal in 1829, first stationed in Wellington and at Kuruman, in Bechuana-land. The work, however, progressed but slowly, and these enterprises were handed over to the LMS and the German Berlin Society, and the Paris Society concentrated its efforts in a mission in Basutoland, commenced in 1833 at Morija. There were reported (1902) 17 missionaries, 8 teachers, 367 native workers, 22 stations and outstations, 12,676 church members, 176 schools, 11,626 pupils. The mission suffered from the Transvaal war, but has since been rallying strength.

2. Senegal: In 1862 the Society commenced work on the West Coast of Africa, in the French colony of Senegal. For a number of years St. Louis was the only station occupied, but in 1886 work was inaugurated at Kerbals, 80 miles inland, up the Senegal River. The climate has been very difficult to endure, but the work, especially among the children of freed slaves, encouraging.

3. Tahiti and French Polynesia: The occupation of Tahiti by the French in 1845 was followed by a request from the LMS to the Paris Society to send missionaries to that field. This was done, and in 1865 the entire work was handed over to it by the English. So thoroughly Christianized are the islands that they belong to the home rather than the foreign field. It has, however, been extended to Raiaeta (1893), Atieana, in the Marquesas group (1899), and to the Loyalty Islands, Mare (1891-1900). The number of European missionaries is small (12, including 6 teachers), but there are 35 native pastors and 4,451 church members in 57 parishes. In the Loyalty Islands there is an interesting temperance movement.

4. Zambesi: In 1877 Mr. and Mrs. Francois Colillard, who for many years had labored among the Basutos in South Africa, endeavored to open among the Banyal tribes, north of the Limpopo River, a mission field for the native churches of Basutoland. They were made prisoners by the king of the Matabele, and their project failed. Subsequently they traveled to the Upper Zambesi, and found the tribes there had been conquered by the Basutos, and spoke the language of their conquerors. This language being familiar to Mr. and Mrs. Colillard, and their interest in these Zambesian tribes being aroused, they decided to give up home and work in Basutoland, and to open a mission where the people were unspeakably ignorant and degraded, and where no mission had ever penetrated. In 1880-81 they visited Europe to plead for this part of Africa. As a result the Evangelical Mission to the Zambesi was founded. A committee was appointed in England and Scotland to receive funds for its support.

In 1885, after a very difficult journey of more than 1,000 miles from Basutoland, Sesheke, on the Upper Zambesi, the residence of 15 chiefs, was reached. Here the missionaries took up
their abode, and in the midst of many hardships a station was opened. In 1886 Mr. Coillard left Seheke and undertook the first wagon journey ever made to the Barofi valley, a distance of 500 miles. After two months he succeeded in reaching Sefula. He returned to Seheke, for Mrs. C., who, in the face of great perils, went with him to Sefula, where a station was opened.

Subsequently the mission was assumed by the Paris Society and has become one of its most important fields, as well as one of the longest for great effort. The climate has proved very severe, 9 missionaries dying in three years (1899-1901). Of late, however, the work has been more successful, and there were reported (1904) 17 missionaries (11 ordained), occupying 7 stations. The Society’s reports are not clear upon the details of work in this field.

5. French Congo: In 1887 the American Presbyterian Board of Missions asked from the Paris Missionary Society some French teachers to help in their work on the Gabun and Ogowe Rivers, the French Government having forbidden the instruction of the natives in any language but French. Accordingly three teachers and one industrial assistant were sent out in 1888. In 1889 two young ordained missionaries were sent to the Ogowe River to visit the American stations.

From this developed a work in the French Congo which now includes four stations: Talagoua (1892), Lambarene (1893), Ngoma (1898), Samkita (1900). In this field the Society is making an experiment with industrial training, following the lead of the Basel Mission. The schools are successful. The force of 18 European workers includes 10 missionaries, 3 female teachers, 4 artisans, and 1 assistant.

6. Madagascar: Seldom in the history of missions has a society met such a crisis as faced the Paris Evangelical Society in Madagascar. With the occupation of the island by the French forces it seemed that the power of the Jesuits would crush out all evangelical work. Under the plea that all foreign influence was hostile, and therefore should be eliminated, they sought to outlaw the preachers employed by the LMS, the Norwegian Society, and the Friends. The only remedy was in securing French evangelical workers, and an earnest appeal was made. Offers of redistribution of field and work, on the most advantageous terms, were made, and at the same time the work was all that the society would carry, it took up work in this field courageously. The result has been most happy. The French churches have become interested in their new field; the old Societies have been enabled to continue their work, and the French Government has come to recognize the value of their services to the general interests of the community.

In 1902 the President of the Society, with his wife, went to the island for a two years’ residence, so as to become more thoroughly acquainted with the needs of the work and the methods to be employed. The stations occupied are: Antananarivo (1890); Ambatomanga, Ambobieloms, Tsiafalhy, Fihaomanana, and Fianaranisoa (all in 1897); Anosibe, Mahereza, and Ambositra (1889); Mahasaorivo (1899); Ambatomampy (1900). The force includes 33 Europeans, 5 native ministers, 33 native teachers, 2 deaconesses, 5 male and 7 female teachers, 2 deaconesses, 1 assistant missionary. An idea of the nature of the educational work in which the Society is rendering invaluable assistance to the government is found in the seven districts of Imenina, including the capital. There are 275 schools, with 344 native teachers and 16,000 pupils. The thoroughness of the drill is shown by the proportion of successful candidates in the official examinations. At Antananarivo the rates were: Paris Society, 78 per cent.; LMS, 64 per cent.; official schools, 65.5 per cent.; Roman Catholic, 59 per cent. At Fianarantsoa the rates were: official schools, 69 per cent.; Paris Society, 90 per cent.; Norwegian Society, 72 per cent.; Roman Catholic, 69 per cent.

More than once it seemed as if the limit of ability of the French Evangelical churches was reached, but the churches have always responded to renewed appeals, and the other missions have not suffered.

PARLIAMENT OF RELIGION: A gathering of adherents of the various religions throughout the world, which met at Chicago from September 11 to 27, 1893, during the Columbian Exposition, and in one of its buildings. Such an Exposition would have opened together from different parts of the world and would afford an opportunity for telling all nations what place religion holds in the world, and what it has done. In this way it seemed to be possible to have at the World’s Fair what might even be called an Exhibit of the World’s Religions.

The leading mind occupied in organizing this great Parliament was that of Rev. John H. Barrows, D.D., pastor of one of the Chicago churches. The aims of the Parliament as they presented themselves to his mind may be stated as follows: 1. To bring together representatives of all historic religions; 2. To show what and how many truths all religions teach in common. 3. To foster sentiments of brotherhood. 4. To set forth accurately the essentials of each religion. 5. To open up the fundamental facts on which rests the acceptance of Thelism, and so to unite all religions in opposing materialism. 6. To bring together full statements, from different parts of the world, of the effect of the different religions upon the great problems of life. 7. To ask what light each religion affords to other religions. 8. To acquire definite information of the present conditions of each one of these religions. 9. To learn what light each of the various religions has to offer upon current social and moral problems of the world. 10. To aid in bringing nations into a more friendly fellowshipp with each other.

The plan of holding such a Parliament was violently opposed in many quarters. The Holy Synod of Russia put its ban upon it; and so did the Sultan of Turkey, forbidding Mohammedans under his influence from attending it. The Archbishop of Canterbury also used his influence against it. Official representatives were present at the Parliament from the Roman Catholic Church of America; from China; from the Buddhists of South India, from the Braham Somaj, and one or two similar groups in India. But the chief advocates of the Parliament, the representatives of the various religions appeared at the Parliament, eminent individuals were there belonging to all leading religions, except Islam. This last religion was represented by some rather heretically liberal adherents, and by an American who professed Islam. In Mohammed, but was not admitted by the omens of the Caliph to be qualified to speak for that faith.
The sessions of the Parliament were marked by the most cordial feeling on the part of the Chris-
tian element, and sometimes appeared that
foreign attacks upon Christianity put a
heavy strain upon the patience of the audience.
Once only in the whole seventeen days of the
Parliament was there any unseemly conduct on
the part of the assembly. This was when Mr.
Mohammed Webb undertook to justify polygamy,
his voice being drowned in a storm of cries and
thunders. The Parliament, in short, thoroughly
satisfied the expectations of its promoters; and
when at its close a fine choir sang the "Hallelujah
Chorus," in circumstances in which it had never
been sung before, to the excited minds of many
it seemed like a prophecy of the triumph of
Christianity over all who now hesitate to accept it.

The Parliament undoubtedly did a good work
in showing what of truth there is in some of the
Oriental faiths which are so little known among
the masses of people in the Western lands. It
probably served a good purpose also in leading
the various Christian denominations to realize
once more how near they are to each other. It
did not, however, draw from the representatives
of non-Christian religions the cordial goodwill
which had been hoped for:

One of the most refreshing results of the gathering was to con-
vince many thinking men in Eastern countries
that the Parliament betokened a lack of faith in
Christianity among Christians who attended the
meetings. Another somewhat unexpected result
was to introduce to American audiences eloquent
philosophers, like Swami Vivekananda, who
did not fail to make the utmost possible use of the
opportunities which the Parliament suggested
and left to them as a sequel to its meetings. On
the whole, one is inclined to judge that, so far as
Orientals are concerned, the alluring scheme
of holding such a Parliament of Religions was some-
what in advance of their present stage of develop-
ment.

Barrows, J. H.), The Parliament of Religions, 2 vols., Chi-
cago, 1893.

PARKER, H. P.: Died March 26, 1888, at the
Victoria Nyanza. As Secretary of the CMS mission
at Calcutta he accomplished great good; but he
left this important post, at the suggestion of the
Society, and entered upon work at Mandla,
among the Gonds. Among this people, in the
midst of the most trying difficulties, the laborer
faithfully and effectively until he was called to be
the second bishop of Eastern Equatorial Africa.
his six years' service as the Society's secretary
at Calcutta, and his experience in the Society's
mission in the interior of the central districts
of Central India, prepared him for his new position.
He landed at Frere Town on November 27, 1886,
and for six months, like his predecessor, Bishop
Hannington, he gave all his energies to the East
Africa Mission proper, setting things in order at
Frere Town and Rabai, and visiting Wray at
Taita, Fitch in Chagga, and the native teachers at
other stations. In June, 1887, he
accompanied by Mr. Blackburn, started for the
interior, and, taking an entirely new route, they
went direct from Rabai to Mboibo; thence,
westward, they reached the south end of
Nyana, by the way of Mpapwa and Uyui,
where they found Mackay in the charge of the district.
Here the missionary Conference was held in
the interior; and, largely through the advice of
Parker, wise conclusions were reached in the
Society's future policy toward the savage natives.
Bishop Parker urged the importance of women
missionaries for East Africa, and in April 5, 1887,
the committee of the Society took the initiative
in this important matter.

PARKER, Peter: Born at Framingham, Mass.,
June 18, 1804. He graduated at Yale College in
1831, spent two years in Yale Divinity School,
and took a course of medical study, receiving the
degree of M.D. in 1834. He was appointed medical
missionary to China by the ABCPM, at Phiadelphia,
May 26, 1834, and sailed the next month for Canton.
He opened a hospital at Canton for diseases of the eye, which
contributed greatly to disarm prejudice, and
furnished opportunities for making known reli-
gious truth. In 1836 his eye inflammatory had
received 3,012 patients, and in 1837 $1,200, all
of which was given by resident foreigners. In
this hospital he was forced to receive patients suffering
from other than eye diseases, and became
famous for wonderful surgical cases. He, using
the influence thus gained to secure a larger
number of mental patients regularly. He
also educated Chinese young men in the practice
of medicine, one of whom became an expert
surgeon.
The outbreak of war with the English in
1840 made it necessary to close the dis-
pensary, but he later visited Canton. In
1842 he returned to Canton. In 1844, with
the hope thereby of aiding the missionarv work, he
accepted the appointment of Secretary and Interpreter to the United States Legation to
China, and his connection with the American
Board was soon after dissolved, tho he did not
cease missionary work, and his labors in the
hospital continued till he resigned his secretary-
ship on his return to America in 1855. He often
acted during these years as chargé d'affaires ad
interim. Soon after his return he was appointed
secretary of the Missionary Society of China, with plen-
ipo tentia powers for the revision of the treaty of
1844. This service being completed in two
years, he returned to America with health
impaired, owing to the effects of a sunstroke.
He resided in Washington, and in 1868 was
elect as Regent of the Smithsonian Institution.
He died in Washington, January 10, 1888, aged
83. He published A Statement respecting Hos-
pitals in China, and an account of his visit to Lu-
Chu Islands and Japan.

PARLA-KIMEDI: A municipality of Madras,
India, situated 50 miles S. W. by W. of Ganjam.
Population, 16,400, of whom 15,900 are Hindus.
Station of the Canada Baptist Convention of the
Maritime Provinces (1892), with (1903) 1 mission-
ary and his wife, 6 native workers, 1 outset-
tation, 1 place of worship, 2 Sunday schools, 95 profess-
ed Christians.

PARPAZARAN: A village in Sumatra, Dutch
East Indies, situated in the Toba Lake region,
now the S. E. extremity of the lake. Station of the
Rhenish Missionary Society, with (1903) 1 mission-
ary and his wife, 15 native workers, 2 outset-
tations, 3 day schools, and 456 profess-
ed Christians, of whom 200 are converts.

PARRAL: A town in Northern Mexico, 200
miles e. S. E. of Chihuahua. Climate
even, healthy. Population, 6,000. Station of the
ABCMP (1884), with (1903) 1 woman mis-
sionary, 3 native workers, 10 outstations, 3 places
of worship, 7 Sunday schools, 3 day schools, 1
boarding school, and 277 professed Christians.

PARSEE: A people in India, numbering less
than 100,000, resident mostly in Bombay.
THE ENCYCLOPEDIA OF MISSIONS

 Parsis
 Parvaripur

 which, because of its romantic history, unique religion, commercial enterprise and fine character, is an interest and credit to Persia. The Parsis, i.e., "Persians," are descendants of the Zoroastrians who flourished in Persia until the 7th century, when the sword of the Mohammedans well nigh exterminated them, less than 10,000 of the sect, now called Guebres, surviving to this day. But a portion of the Zoroastrians escaped to India, where they settled in Gujarat as agriculturists until Muslim conquest in India again dislodged them and drove them southward. They reached Bombay between 1650-1700, about the time that this island city was ceded to the English by Portugal. The contact with Europeans, and especially with the English, caused a wonderful transformation, awakening in this hitherto agricultural people a genius for business which has brought them immense wealth and prestige. They became and have continued to be the chief factors in the English trading houses in Bombay, and successful as traders, shopkeepers, and contractors on their own account. Up to the middle of the 19th century, when the development of the great steamship companies changed conditions, practically the whole of the trade of Bombay and China passed through their hands. Much of the latter was in their own ships, and the business was transacted through their own houses in London and the East. They also established branch steamship companies, and dealers in European goods in the larger and in many of the smaller cities of India. A long succession of master builders in the government shipyards in Bombay have been Parsees; some have achieved success as army engineers, and many contractors, Jamshedji Dorabji, the without doubt the most successful and much less engineering schooling, being the builder of large sections of the great India Peninsula Railway, and of other public works to the extent of a million sterling; some have established in Bombay extensive cotton, jute, silk, and cotton mills, while others became bankers; and the Times of India, one of the leading English papers in India, owes its origin to Parsee enterprise. In recent decades they have entered the learned professions and held prominent positions in the Bombay government.

Existing as a community by themselves in the midst of the composite mass of the Indian population, separated from others by their peculiar religion and customs, and with their own social organism, the Parsees are everywhere well-to-do, intelligent, and thrifty. The average degree of wealth is probably higher among them than among any other class in India. A Parsee beggar is never seen; the Parsee community always attends to the wants of its own poor, and suffers no members of its race to become a public burden. In their daily dress and habits Parsees and Parsees in India are a Hindu-European combination, in which the latter element tends to increase. Their ladies, handsomely dressed, with faces unveiled, are seen driving in well-appointed carriages and at public functions. Family life among them is generally happy. Formerly child marriages were a Parsee custom, but have now been abandoned, largely through growing appreciation of education for boys and girls.

Zeal for education is a notable characteristic of the Parsees. Up to the time of their contact with the English, education in their common speech, Gujarati, was rare. A smattering of English was taught in Parsee missionary schools; but the educational movement dates from the early part of the 19th century, when Parsees chiefly took advantage of the English schools opened by Eurasians. The Bombay Native Educational Society, founded in 1820 under the patronage of Governor Mountstuart Elphinstone, was the open door to higher education for the Parsees especially. Upon the retirement of this most eminent governor of Bombay, the Parsees took a leading part in commemorating his services by raising an endowment for the Elphinstone Institute for the teaching of the higher branches of European sciences and literature, and to this institution the little Parsee community has always supplied the majority of the students and in later years occupants for important chairs. They have also been quick to take advantage of the opportunities offered by the Jesuits, the Scotch Presbyterian Missionary schools and colleges, and by the English and vernacular schools, established by the government and by private individuals.

But they have not been merely recipients of educational advantages. In 1842, upon the knighting of one of their eminent men by the Queen, the Parsees celebrated the event by forming the Sir Jamshedji Jijibhoi Translation Fund, to be used in the translation of useful books into the Gujarati language, and the king and his lady responded to the compliment by founding the Sir Jamshedji Jijibhoi Parsee Benevolent Institution, with an endowment providing a revenue of not less than 40,000 rupees per annum, devoted to the support of schools and maintenance of poor and aged Parsees. This and other endowments have provided a complete system of schools, which furnishes an English education for practically the whole rising generation of Parsees, and many, continuing their studies in the technical schools of Bombay and in Europe, have attained distinction as teachers and professional men. The Parsee Girls' School Association has made generous provisions for female education. Gifts for education have been a part of a larger benevolence, for the Parsees have not only been eminent as money-makers, but as money-givers as well, and they have given good examples to Western donors in making it their habit to give during their lifetime, rather than by legacy. Bombay is so dotted with roads, bridges, wells and fountains, hospitals, asylums, and colleges given by them that the city itself may be said to be their monument. At the time of his death in 1859, Sir Jamshedji Jijibhoi bore the palm in the history of philanthropy, having given more than $1,500,000 to public charities, and he by no means stands alone as a princely Parsee giver. Their philanthropy has extended beyond their own people, and every public enterprise, and especially their assumption of the heavy tax imposed by Persia upon their fellow Zoroastrians, the Guebres, and by their gifts to various funds in England and to the Sanitary Commission during the Civil War in the U.S. The Zoroastrian or Parsee religion is a monotheism, recognizing but one God, Ahura Mazda, orOrmuzd, the Creator, Ruler, and Preserver of the universe, without form and invisible, and to him all praise is to be given for all the good in this world and for all the blessings we enjoy. Under him are two spirits, Spéngi Mainyush (the creator spirit), and Angro Main-
yush (the destructive spirit), through whose agency and interaction he is the cause of all causes in the universe. The Parsee creed also involves the dualism of spirit and matter, immortality, and the resurrection of the body and soul in rewards and punishments. The Zend Avesta (the Zoroastrian Scripture), written in the Bactrian branch of the Iranian language, is free from immortality and cruelty, both in its characterization of deity and its directions for worship. It counsels resistance to all the activities of the evil spirit, and predicts the final triumph of good over evil.

Parsee temples are small, simple buildings, and contain no idols or sacred objects except the ever-burning fire. The priesthood is hereditary. Worship consists in reading the Zend Avesta, adoring the sacred fire as the fittest symbol of Ahura Mazda, to whom, and the good spirits, prayer is offered, sprinkling with consecrated water, partaking in common of bread and wine, and offering up the joint of the Homa plant, which is done only in the temples in the houses twice a day. Magusism has influenced the development of the religious system, and astrology is practised in connection with all important events of life. The Parsees are frequently called horse-traders, but they resent this appellation, and declare that their best symbol through which to worship deity, just as the Roman Catholics claim to use images, with probably a similar measure of truth. Reverence for the four elements, earth, air, fire, and water, is a part of their faith and has induced that peculiar method of disposing of the dead which is their most commonly known peculiarity. According to their belief, a dead body, the result of the working of the powers of evil, is unclean, and must not be allowed to contaminate by its presence any of the elements. It can neither be buried nor burnt nor thrown into the water, for in that way one of the elements would be defiled. It is therefore exposed in a circular structure without a roof, round the interior of which runs a shelf slightly sloping toward an opening at the center. After being deposited in place, the vultures make swift work with it, and the bones, stripped of flesh, are afterward swept down through the central aperture into a cavity below. These structures are called "towers of silence," and by their use the elements are saved from contamination and sanitation is maintained.

The study of the Parsee faith and people invites the judgment "not far from the kingdom of God." Their outward life and demeanor is always respectable and decorous. It is to be feared that their religion exerts but small influence over them, and that it has deteriorated to the level of a merely perfunctory formalism. Practically they are materialists—or at least secularists, given up to the enjoyment of the good things of this world and satisfied with the practise of the ordinary secular virtues. And their success in securing riches and position has induced a pride that makes them little accessible to the Gospel. The Parsee community was greatly stirred and made formal protest to the government when in 1839 two Parsee youths, who afterward served long as Christian ministers, were converted to the faith of Dr. Whitman. The resentment quickly subsided, and gave place to marked affection for that distinguished missionary, few Parsees have been converted since; and because the other inhabitants of Bombay present so much more promising field, little missionary work has been done among them. But their close and intelligent contact with the people and literature of Christendom has already modified their beliefs. With their readiness to receive the adoption of foreign usages in other departments of life, the hope is not groundless that they may yet, like their Magi of old, be drawn to Christ and prove a power in establishing His kingdom in the East.

Debashri Karska's History of the Parsees, 2 vols.

PARSO N S, Justin Wright: Born at Westhampton, Mass., U. S. A., April 26, 1824; graduated at Williams College 1848; sailed April 24, 1850, as a missionary of the ABCFM, for Turkey. He was stationed at Nicomedia and Bardezag. For thirty years he labored with unflagging zeal, never so well contented as when upon tours among the hills and valleys of the district he traversed so often, that he might preach Christ to the villagers, who learned to love him and heed his teachings. Brave enough and cool enough to lead an army, he carried with him no weapon but the sword of peace. During the night some nomad Turks charged that way and shot the sleeping missionary and his companion for the sake of plundering their meager traveling kit. The outing of the whole population at the funeral bore witness to the power which the man's simple, devoted life had among the people.

PARSONS, Levi: Born at Goshen, Mass., July 18, 1792; graduated at Middlebury College 1814; sailed November 3, 1819, with Pliny Fisk for Smyrna as a missionary of the ABCFM. After spending some months in Smyrna and at the Greek College on the island of Scio in order to learn the modern Greek, Mr. Parsons with Mr. Fisk made a tour of exploration through the region of the "Seven Churches of Asia." This was an experience of considerable danger at that time as well as of great interest. Leaving Mr. Fisk at Smyrna, Mr. Parsons went to Jerusalem in January, 1821, to prepare for its permanent occupation. He was the first Protestant missionary ever resident in Jerusalem with the intention of making it his field of labor. He had letters to prominent Greek ecclesiastics there and was cordially welcomed. But the outbreak of the Greek Revolution placed the Greeks of Syria in jeopardy of their lives, and Mr. Parsons was compelled to return to Smyrna, where in fact the danger from Turkish fanaticism was still greater. After Mr. Parsons and Mr. Fisk met again, the two went together to Egypt, hoping to reach Jerusalem safely from the south. But Mr. Parsons sickened and died at Alexandria February 10, 1822, a victim to his zeal to perform his duties as a pioneer in that strange undertaking to carry the Gospel to the people living heedless in the land where the history of the world had been written.

PARUR: A town in Madras, British India, situated in the district of S. Arcot, about 32 miles S. W. of Madurantakam. Population, 5,000. Station of the PB, with (1900) 1 missionary and his wife.

PARVATIPUR: A town in Madras, India, situated 75 miles N. of Vizagapatam. Popula-
tion, 10,100, of whom 9,900 are Hindus. Station of the Berlin Missionary Society (1889), with (1903) 1 missionary and his wife, 19 native workers, 2 outstations, 1145 pupils of worship; 1 Sunday school, 3 day schools, 1 theological class, 1 dispensary, and 67 professed Christians.

PASHTU LANGUAGE: The language of some 5,000,000 people inhabiting Afghanistan and adjacent territory. It is also called the Afghan language, or Afghani. It belongs to the Iranian group of Indian languages, and is written in a Persian alphabet modified by adding dots, as in Persian, and in a few cases in a fashion peculiar to Pashtu.

PASUMALAI: A town in Madras, India, 3 miles southwest of Madras City, on the railway to Tuticorin. Climate healthy; average annual temperature, 85° F.; rainfall, 35 inches. Station of the ABCFM (1845), with (1902) 2 missionaries, one with his wife; 36 native workers, 7 outstations, 1 place of worship, 9 Sunday schools, 6 day schools, 2 boarding schools, 1 theological school, 1 printing house, 1 industrial school, 1 dispensary, and 700 professed Christians.

PASPUR: A town in the Punjab, India, situated in the district of Sialkot, 47 miles N. by W. of Amritsar. Population, 9,200, of whom 2,400 are Hindus and 6,400 Mohammedans. Station of the UP (1876), with (1900) 1 woman missionary, 5 Sunday schools, 5 day schools, and 74 community cases.

PATERSON: A town in Cape Colony, South Africa, situated in the Transkei region, about 18 miles W. by N. of Blythwood. Station of the UFS (1888), with (1903) 1 missionary and his wife, 25 native workers, 14 outstations, 2 places of worship, 5 Sunday schools, 11 day schools, and 1,408 professed Christians.

PATTANKOT: A municipality in the Punjab, India, situated in the district of Gurdaspur, about 68 miles N. E. of Amritsar, the nearest railway station to Kangra and Dalhousey, a sanitary hill station. Population, 5,000. Station of the UP (1880), with (1900) 1 missionary and his wife, 1 woman missionary, 4 outstations, 1 day school, and 1 Sunday school.

PATIALA: An ancient town in the Punjab, India, about 24 miles W. by S. of Ambala. Population, 5,000. Station of the ME, with (1903) 15 native workers, 2 places of worship, 28 Sunday schools, 11 day schools, and 474 professed Christians, of whom 33 are communicants. Station also of the Reformed Presbyterian General Synod of the United States, with (1901) 1 woman missionary, 5 native workers, 4 outstations, 60 professed Christians, 2 places of worship, 1 day school, and 1 dispensary.

PATNA: A city in Bengal, India, on the Ganges, 320 miles northwest of Calcutta. The town is extensive, but its streets are narrow and crooked, and its houses irregularly built, of many materials. It is on the East Indian R. R., and is the center of the opium trade. Climate said to be unhealthy, but the natives are strong in physique and give no evidence of this. Population (1901) 134,785. Station of the BMS (1888), with (1903) 2 missionaries and their wives, 3 native workers, 1 Sunday school, and 1 day school. Station also of the ZBM, with 7 women missionaries, 7 native workers, 1 day school, 1 dispensary, 1 hospital, and 150 Zemnian pupils.

PATPRA: A town in the Central Provinces of India, situated in the district of Mandla, 42 miles S. E. of Jabalpur. Station of the CMS (1887), with (1903) 2 missionaries and their wives, 1 place of worship, 6 day schools, 1 dispensary, 1 orphanage, and 576 professed Christians, of whom 103 are communicants (including Marpha). Station also of the MLI (1895), with (1903) 1 leper asylum.

PATTERSON, Alexander: A native of Leith, Scotland; sent out by the Scottish Missionary Society to explore Tataria in 1802, accompanied by Henry Brunton. On arriving at St. Petersburg he met so many discouragements that he felt inclined to turn back, when he unexpectedly found a friend in the lord of the emperor's bedchamber, M. Novassilgoff. Passports were given him, and full liberty granted to travel through the empire, and select any place as a residence agreeable to him. The government also gave him a large grant of land, and permission to keep under their care and instruction any Tatar youths they might ransom from slavery until they were twenty-three years of age.

They lived at the Mohammedan village called Karass, in the Nogai Steppe, as the place for the commencement of their mission. Both the missionaries studied the Turkish language. As soon as they began circulating some tracts they had written in the language great interest was excited, and discussions arose as to the merits of Christ and Mohammed, and many persons of rank became interested in the teachings of the Gospel.

In 1805 Mr. Patterson had the joy of seeing several of the ransomed youths embrace Christianity and be baptized. They also went with him on his journeys, acting as interpreters. In 1810 the mission was making such progress among the people that the Mohammedan priests became alarmed, and aroused the bitter opposition. The Mohammedan tribes south of Karass were so strong that they threatened all who bore the Christian name. The Mohammedan schools were crowded with scholars, who were taught to read that they might defend the faith.

In 1813 the missionaries were obliged to move to the fortified town Georgievisk, about 30 miles from Karass, on account of the constant irritations of hostile Turks. While here the translation and binding of the New Testament were finished. In 1814 the missionaries again went back to Karass. In 1816 Mr. Patterson took with him one of the ransomed slaves as a tour through the Crimea, distributing tracts and Turkish Testaments. The journey almost cost him his life, but he felt amply repaid in the reception he met from all classes of people.

PATTESON, John Coleridge: The missionary bishop and martyr of Melanesia, born London, England, April 2, 1827. His father was Sir John Patteson, a distinguished English judge and member of the Privy Council. He studied at the University of Oxford, graduating in 1845. In 1849 he obtained a scholarship in Merton College, but through lack of funds he left England and became a teacher in India. In 1852 he became a Fellow of Merton College. In 1853 he was curate of Allington, and in 1854 was ordained. In 1855, March 29, he sailed with Bishop Selwyn to the Melanesian Islands, in the South Pacific. During the voy-
age he acquired the Maori language. For five years he was assistant to the bishop in conducting a training school for native assistants. In 1861 he was made bishop of the Melanesian Islands. He now reduced to writing several of the island languages, which before this had never been written. He also prepared grammars of these languages and translated parts of the New Testament into the Lifu language. After being appointed bishop he was at Motu, in the Northern New Hebrides, from which he made frequent excursions and voyages to the other islands of his diocese in the mission ship "The Southern Cross," exerting himself in various ways for the good of the people. When the missionary ship, as it cruised among the islands, approached Nakapu Island, some of the islanders, mistaking it for a craft which had kidnapped some of the islanders, determined to avenge themselves. The bishop, unsuspicous, lowered his boat, and went to meet them coming in their canoes. According to their custom, they asked him to get into one of their boats, which he did, and was taken to the shore. He was never seen alive again. Immediate search was made, and his body found, pierced with five wounds. In each case the spurder in a hand made weapon. The same elastic strength of body and skill in manipulation fitted him to be preacher, teacher, navigator, friend, and exemplar in the useful arts to the Melanesian tribes.

PAUL, Samuel: Born in 1843. Died in 1900. A native Christian of India. Educated at Palamcottap Peddierai Institution. Appointed by the CMS catechist at Ootacamund, and in 1874 he was ordained pastor of the Tamil local mission at the same place. He was the first to organize this mission, and after his faithful service at Ootacamund he was transferred to the Northern Pastorate, in the city of Madras, where he accomplished much for the development of the congregation at Black Town. Subsequently Sachiapuram, in the Tinnevelly district, was his headquarters, and he was appointed vice-chairman of the native church council in Tinnevelly, a position of two important church circles. Mr. Paul did a good work for Tamil Christian literature. He prepared for publication a large number of important works—original and translations—which have been widely read by Tamil Christians. The following works from his pen and a great many of similar mention are included in the appendices to the "Dictionary of the Tamil Language:

PAURI: A town in the United Provinces, India, situated in the district of Garhwal about 25 miles N. N. W. of Dwarahat. Station of the ME, with (1903) 1 missionary and his wife, 1 woman missionary, 60 native workers, 7 places of worship, 12 day schools, 2 boarding schools, 1 orphanage, 35 Sunday schools, and 521 professed Christians, of whom 218 are communicants.

PAYNE, John: Born in 1814; appointed in 1836 by the Protestant Episcopal Missionary Society in the United States as missionary to Africa, and sailed May, 1837, reaching Cape Palmas, Liberia, on the 4th of July following. He was appointed missionary bishop July 1, 1851. During thirty-four years he was a faithful and laborious worker, both as a missionary and bishop, in one of the most unhealthy portions of the globe, until the strain of it left him a mere wreck of a man. He resigned his office in 1871, and died at Oak Grove, Westmoreland Co., Va., October 23, 1874, aged 60.

PEA RADJA: A settlement in Sumatra, Dutch E. Indies, situated in the Silindung Valley, about 25 miles N. E. of Siboga. It is the central point of the Rhenish mission in the Silindung region, with (1903) 3 missionaries and their wives, 4 women missionaries, 90 native workers, 8 outstations, 8 Sunday schools, 11 day schools, 1 dispensary, 1 hospital, and 8,946 professed Christians, of whom 3,701 are communicants.

PEDDAUR: A town of Madras, India, in the district of Godavari, 87 miles W. S. W. of Vizagapatam. Population, 13,700, of whom 13,000 are Hindus. Station of the BOQ (1891), with 1 missionary and 3 workers, 8,046 places of worship, 7 outstations, 7 places of worship, 11 Sunday schools, 8 day schools, 7 places of worship, and 320 professes Christians. Some write the name Pedaparam.

PEDI LANGUAGE: One of the Bantu family of African languages, spoken by a number, not yet known, of tribes inhabiting, for the most part, the Transvaal Colony in South Africa. It has been reduced to writing by missionaries, but this purpose is not likely to be accomplished until the alphabet has been used.

PEGU: A town in Burma, British India; the former capital of the kingdom of Pegu, 40 miles northeast of Rangoon, on the railroad to Mandalay. The inhabitants are largely Talangs or Peguans. Station of the ABM (1887), with (1903) 2 women missionaries, 13 native workers, 6 outstations, 5 places of worship, 2 Sunday schools, 3 day schools, and 275 professed Christians. Station also of the ME, with (1903) 1 missionary and his wife, 6 native workers, 5 Sunday schools, 1 day school, and 157 professed Christians, of whom 59 are communicants.

PEI-KAN: A town in the province of Kiang-su, China, situated 26 miles E. of Nan-ching-fu. Station of the CIM (1893), with (1903) 2 women missionaries, 3 native workers, 2 outstations, 4 places of worship, and 25 professed Christians. Some write the name Peh-kan.

PEKING: Capital of the Chinese Empire, situated on a plain about 12 miles south of the Pei-ho, in latitude 39° 51' N., longitude 116° 27' E. Its name means Northern Capital, in opposition to Nanking, which was the capital for a time. It became the seat of government under Kubilai Khan in 1264, and has continued to be the capital ever since, except during the years when the emperors held their court
at Nanking. The city is divided into two parts, each surrounded by a wall. The inner or Manchu city, where are the palace, government buildings, and barracks, is surrounded by a wall of an average height of 50 feet and a circumference of 14 miles. The walls of this city, the ancient capital, is the oldest and best Chinese city, whose wall is one of the finest in the world, being 10 miles in circuit, 30 feet high, 15 feet broad at the top and 30 feet at the ground, pierced with 16 gates, each one surmounted with a many-storied tower 100 feet high, with crenellations. For convenience, the several parts of the city are enclosed about 26 square miles, and the great size of Peking, with the numerous public buildings, the palaces, pagodas, temples, broad avenues, lofty gates and massive wall, has challenged the wonder of all visitors since the stories of Marco Polo gave him an unjust reputation as a second Munchausen. Within the Manchu city a smaller enclosure, of three miles in circuit, surrounds the "Forbidden City," containing the palaces of the emperor and his consort. The age of the city is not definitely known. It has been built and rebuilt at least seven times, and the emperor of the Ming dynasty, who had it built, in the 15th century, was already the 10th such enclosure. The population of China is not accurately known. It is estimated at 300,000,000, or about 300 per square mile, which is less than the average of most other countries. The city wall, which is 16 feet thick and 30 feet high, was made of the Sacrificial Hall to Confucius; the monument to the lama who died, some say was murdered, at Peking; the examination hall, and the parks and artificial lakes with which successive emperors have beautified the city. The ruins of the Summer Palace, the residence of the Manchu princes, which were destroyed by the allied French and English forces during the occupation of the city in 1860, lie to the northwest of the city, about 7 miles away. Here small hills with intervening vales had been beautified with pleasure-houses and bowers in the best of Chinese style, and in the various buildings were collected the treasures of many dynasties and monarchs; a rich booty they proved to the wanton pillage of the soldiers. Following the Boxer outbreak and the memorable siege of the British Legation, the city was not reconquered until 1900, similarly likewise the palaces of the Forbidden City. The incident shows the impossibility of foreign occupation of Peking will not readily be forgotten by any Chinese.

The streets of Peking are in general wide and spacious. The center is sometimes paved and somewhat narrower than at the edges. In summer the dust from the unpaved portion, and in winter the mud, make them intensely disagreeable to the passer-by. The aspect of the city entirely differs from that of the other Chinese cities, where commerce brings a distinctive European element and settlement. The climate is healthy, but subject to extremes of heat and cold, and the dryness for ten months of the year is hard to bear. Peking Mandarin, as the language of the capital is called, is the standard language of the empire.

Missionary work is carried on in Peking by the following Societies: LMS (1861), SPG (1863), ABCFM (1864), ME (1869), CA, and the Mission to Chinese Blind. These societies together have (1903) 57 missionaries, men and women; 48 native workers, 24 places of worship, 92 schools and Sunday schools, 2 printing houses, and 1,473 professed Christians. Besides these societies the YMCA has a local secretary here and the National Bible Society of Scotland maintains an agent, with 8 native workers.

PELLA: A town in the Transvaal, South Africa, in the district of Rustenberg, and about 100 miles W. by N. of Pretoria. Population, 3,000. Station of the Hermannsburg Missionary Society (1868), with (1901) 1 missionary and his wife, 2 native workers, 1 outstation, 2 places of worship, 1 day school, and 728 professed Christians.

PELOTAS: A town and seaport of Brazil, South America, situated in the State of Rio Grande do Sul, at the S. W. of Lake Pato. Population, 33,000. Station of the American Church Missionary Society (1874), with 1 missionary and his wife, 1 outstation, 2 places of worship, 1 Young People's Society, and 93 professed Christians.

PEMBA ISLAND: An island off the E. coast of Africa, 30 miles N. of Zanzibar, and belonging to the British protectorate of Zanzibar. It produces excellent sugar, which is sent to Mombasa for shipping. Population, 10,000. Station of the Universities Mission to Central Africa (1898).
with (1903) 1 missionary and his wife, 1 woman missionary, 3 native workers, 1 outstation, 1 place of worship, 2 day schools, 1 boarding school, 1 dispensary, and 41 professed Christians, of whom 24 are communicants.

**PENANG, or PRINCE OF WALES ISLAND:** An island lying at the north entrance of the Straits of Malacca, and one of the Straits Settlements belonging to England. It contains 106 square miles, reaches an altitude, in the hilly district, of 2,922 feet, and has a rich, fertile soil, where tropical fruits and spices are cultivated. The climate is healthy, and rain falls every month in the year. Georgetown, the capital, is at the north-eastern extremity, lying 3 miles south of Penang Island and Province Wellesley and the Dindings (1901), 249,207, of whom 140,102 are Chinese, Malays, and other Asiatics. The Europeans and Americans number 1,160. Station of the ME, with (1903) 2 missionaries, one with his wife; 4 women missionaries, 8 native workers, 1 outstation, 4 places of worship, 10 Sunday schools, 4 day schools, 2 boarding schools, and 242 professed Christians, of whom 132 are communicants. Station also of the PB, with 5 missionaries, four of them with their wives, and 4 women missionaries. Station also of the SPG (1871), with (1903) 5 native workers, 2 places of worship, 2 day schools, and 143 professed Christians, of whom 25 are communicants. The BFBS has an agent residing here.

**PENDRA ROAD:** A railroad station in the Central Provinces of India, situated about 60 miles N. W. of Bilaspur. Station of the CWBM (1901), with 1 missionary and his wife.

**PERAK:** A protected British state in the Malay Peninsula, lying between the Tampin River and Province of Wellesley, and N. of Selangor. In Perak is a station of the PB, with 2 missionaries and their wives and 1 woman missionary. There is a station also of the SPG, with (1903) 1 missionary, 1 native worker, 2 places of worship, and 92 professed Christians.

**PERIYAKULAM:** A municipality in Madras, India, situated 44 miles W. N. W. of Madura. Population, 16,400, of whom 14,000 are Hindus. Station of the ABCFM (1856), with (1903) 1 missionary and his wife, 52 native workers, 42 outstations, 34 places of worship, 29 Sunday schools, 23 day schools, and 996 professed Christians.

**PERIE:** A village in Cape Colony, South Africa, situated 15 miles N. W. of King William's Town, in a well-timbered region, Station of the UFS, with 1 missionary and his wife, 23 native workers, 9 outstations, 1 place of worship, 9 day schools, and 737 professed Christians. Some write the name P. E. R. E.

**PERKINS, Justin:** Born at West Springfield, Mass., March 12, 1805; graduated at Amherst College, 1829; studied theology at Andover; embarked September 21, 1833, as a missionary of the ABCFM, and one of the founders of the Nestorian Mission at Urnia, Persia. Schools established by Dr. Perkins and his Grant are now flourishing seminaries. Dr. Perkins translated the Scriptures and several religious books into Syriac. He visited the United States in 1842, accompanied by the Nestorian bishop, Mar Yohannan, whose presence and addresses awakened a deep interest in the mission. Returning to Persia in 1843, he labored successfully at his post, and "duly defended Protestantism against misrepresentation and persecution. In 1860 impaired health compelled him to relinquish the work, in which he had been engaged for thirty-six years. He died at Chicopee, Mass., in the same year.

**PERNAMBUCO:** A city and seaport on the N. E. coast of Brazil, S. America, situated at the mouth of the Beberibe and Capeberibe. It is the greatest sugar mart in the country. The business houses of the city are chiefly built on a low, sandy peninsula called Recife, and the city is often spoken of as "Recife" for this reason. The central part of the city stands on the island of S. Antonio, while the finer residential districts are at Bôa Vista, on the mainland. Formerly the city was very dirty and suffered from a lack of water. This has now been changed to a great extent, as prosperity has brought wealth and attracted Europeans as residents. The population (1890) is 111,555, composed of very mixed elements. Station of the PS (1879), with (1903) 1 missionary and his wife, 5 native workers, 2 places of worship, 1 theological class, 1 dispensary, 18 outstations, and 576 professed Christians. Station also of the SBC (1859), with (1903) 2 missionaries and their wives, 12 native workers, 14 outstations, 2 Sunday schools, 29 day schools, and 569 professed Christians. Station also of the Help for Brazil Society.

**PERSEA:** The modern kingdom of Persia, called by the natives *Iran*, occupies, roughly speaking, that part of Western Asia lying between the Caspian Sea on the north and the Persian Gulf on the south, Afghanistan and Baluchistan on the east, and the Turkish frontier on the west. Its exact boundaries have not as yet been definitely located, but starting from Mount Ararat at the northwest, the river Aras forms the greater part of its boundary line between that part of Russia lying west of the Caspian Sea, thro' there is a small strip of country extending south of the river Aras along the Caspian Sea which does not belong to Persia. East of the Caspian, Russian Turkestan bounds it on the north, the the exact limits of Persian territory have not been accurately settled, Russian authorities claiming more than is allowed by the other Powers. The boundary lines between Afghanistan and Baluchistan have been determined by British commissioners at different times, altho some parts of it are still disputed. Its southern and south-western boundary is the coast-line of the Arabian Sea and the Persian Gulf. Its western boundary from Mount Ararat in a general southwesterly direction to the Persian Gulf is the disputed Perso-Turkish frontier, for the settlement of which a mixed commission, appointed in 1843, labored for 25 years, with the result that the disputed territory has been defined rather than the exact boundaries delimited.

Persia extends for about 700 miles from north to south, and 900 miles from east to west, and includes an area estimated at 628,000 square miles. The greater part of this region is an elevated plateau, almost a perfect tableland in the center and on the east, but cut up by mountain chains on the north, the west, and the south. More than three-fourths of its entire surface is desert land, but many of the valleys between the high mountain ranges are wonderfully fertile and exceedingly beautiful. Rare flowers, luscious fruits, valuable timber, and mountain brooks and torrents make the land a...
scene of picturesque beauty which is celebrated in history and song, and indissolubly connected with the ideas of Persia. With such a diversity of physical characteristics there is of necessity a diversity of climate; at Isphahan summer and winter are equally mild, and regular seasons follow each other. At the north and the northwest severe winters are experienced, while the inhabitants of the desert region in the center and on the east are at times scorching summer and frozen in winter. Along the Caspian Sea the summer heat is intense, while the winters are mild, and heavy and frequent rainfalls make the low country marshy and unhealthy. In the southern provinces, the heat in autumn is excessive, winter and spring are delightful; and summer, tho hot, is not unpleasant, since the atmosphere of Persia in general is remarkable for its dryness and purity.

The population of Persia is about 9,000,000. The majority are engaged mainly in agriculture, and the best wheat is grown in the vales. Wheat with other cereals, is raised, and cotton, sugar, rice, and tobacco are produced in the southern provinces. The wandering tribes dwell in tents, and move about with their flocks and herds as the seasons succeed each other, spending the spring and summer on the mountain slopes and the winter on the plains. The two principal races are the Turks and the Persians. There are also Arabs, Kurds, Leks, and Baluchis.

The principal cities of Persia, with their populations, are: Tehran, 250,000; Tabriz, 185,000; Isphahan and Meshed, each with 80,000; Kerman and Yezd, each with 60,000. It is estimated that 8,000,000 of the population belong to the Shia faith, 750,000 are Sunnis, 10,500 Parsees, 20,000 Jews, 53,000 Armenians, and 39,000 Nestorians.

The government of Persia is similar to that of Turkey. It is a kingdom whose king is called the Shah. He is the absolute ruler and the master of the lives and goods of all his subjects; but tho his power is absolute, he must not act contrary to the beliefs and usages of the Medes and Persians. His laws are based on the precepts of the Koran, and the Shah is regarded as viceregent of the prophet. He appoints an executive department of the government. A governor-general is appointed over each one of the 27 provinces, which is directly responsible to the central government. The nomad tribes are ruled over by their chiefs, who are responsible to the governor.

The only instruction of the bulk of the population is from the teachings of the Koran, but there are a great number of so-called colleges supported by public funds, where students are instructed not only in religion, and Persian and Arabic literature, but also in scientific knowledge.

History: It is not the province of this article to give any sketch of the history of the country of Persia, but the following dates of the principal epochs in his history may be of service. From the earliest records, dating back to about 2,000 B.C., the first and probably the most important of the Medes, who conquered Babylonia and established a Medo-Persian empire, which lasted, under the rule of famous kings—Cyrus, Cambyses, Darius, Xerxes, and Artaxerxes—until the conquest by Alexander the Great, 331 B.C., when the Greek and Parthian Empire was established, which ended about the middle of the 2d century. The Sassanian Empire, from the beginning of the 3d to the end of the 7th, when the period of Arabian domination commenced, and gradually grew in extent and influence. Mohammedanism completely captured the life and permeated the thought of the people to the very core. Persia was at that a province, and the center of the Arabian Empire, under successive rulers of Arab, Turk, or Mongol origin. The sway of the Timurides and Turkomans lasted from 1405 to 1499. From 1499 to 1736 the Suli or Sufawi dynasty ruled the country. Its founder was Jazmaul Sulq. With the accession of Nadir Shah, 1736, the last native Persian dynasty passed away. At the death of Nadir Shah in 1747 A.D. a period of anarchy, followed by short reigns of various despots, ensued, until in 1794 A.Gha Mohammed ascended the throne—the first of the reigns of the Kajars. The present Shah, Muzaffar-ed-din, succeeded his father in 1896.

Mission in Persia: When the religion of Christ was accepted by Constantine (312) it was stagnatized by the rival empire of the East as the religion of the Romans, and still exists, although national feeling united against it, and bitter persecutions continued in Persia for a century after they had ceased in the Roman Empire. The sufferings of Christians under Shapur II., the Sassanian, were as terrible as any experienced under Diocletian.

In the face of these obstacles it is clear that the Christian faith had a harder mission field in Asia than in Europe. The 3d century saw Christian missions there advancing generally in peace. The 4th century was full of conflict and persecution, with an open door and many missionaries. The pious and zealous monks of Egypt and Syria were the leading missionaries, and their labors are still attested by the many churches that bear their names in Mesopotamia and among the Netherians. The Armenians were largely converted, and the Georgians. In this century also strong heretical sects took shape, that have left relics to the present day.

In the 5th century the bitter controversies within the church resulted in the separation of the Eastern Christians from the West. The Nestorian controversy at the Council of Ephesus (431) resulted in a schism which was carried thence to Edessa, and thence to Persia. The separation of the main body of Christians under the Persian rule was completed in a council held at Seleucia 499. There were political reasons for this separation as well as theological. It gave satisfaction to the Persian Government to have its Christian subjects break their connection entirely with the Romans, and thus it gave rest from persecution. In the 6th and 7th centuries there was much missionary activity by the Persian Church.

Under the Caliphs: 641-1258. The dominant religion of Persia from the primeval days had been the faith of Zoroaster. Christianity failed to overthrow it. To this mighty religion, which once seemed likely to supersede all others, the Persians were suddenly, and from a quarter least expected. The Persian Emperor received a letter one day
from “the camel-driver of Mecca,” bidding him abjure the faith of his ancestors and confess that “there is no God but God, and Mohammed is his prophet of God.” The indignant monarch tore the letter to pieces, and drove the camel-drivers who brought it from his presence. But before ten years had passed the Arab hordes had driven the Persian from his throne. Persia, defeated in three decisive battles, reluctantly gave up the contest. The whole system fell, as it were, and the only remnants left to perpetuate its rites are some 5,000 souls in Yezd, a city of Persia, and 100,000 Parsees in Bombay.

The faith of Mohammed from that day to this has ruled in Persia. The Persian is the only Aryan race that accepted Islam.

Under the Mogul Tartars: 1258-1430. The Moguls arose in Chinese Tartary. The last of the race of Christian kings—Christian in name, doubtless, more than in reality—was slain by Genghis Khan about 1292. Genghis had a Christian wife, the daughter of this king, and he was tolerant toward the Christian faith. In fact, the Mogul conquerors were without much religion, and friendly toward all. The wave of carnage and conquest swept westward and covered Persia, and overwhelmed the Caliph of Bagdad in 1299. The Moguls were for a time favorable to the Christians, as the rulers openly declared themselves Christians, or were partial to Christianity. The patriarch of the Nestorians was chosen from people of the same speech and race as the conquerors—a native of Western China. He ruled the Christian Church in Persia for the interval of seven reigns of Mogul kings; had the joy of baptizing some of them, and of indulging for a time the hope that they would form such an alliance with the Christians of Europe against the Muslims as would render all Asia, across to China, a highway for the Christian faith. But the period of such hope was brief, and soon ended in threatened ruin. The Christian faith was thrown back upon its last defenses, and became a hunted and despised faith, with only a remnant of adherents clinging with a death grip to their cherished symbol of life.

The Period of Greatest Depression: 1400-1830. Persia was torn by factions and wars for a century. As France rejected the Reformation and reapplied her reward in anarchy and blood, so Persia suffered on a larger scale. The Christian Church was lost—a buried and apparently lifeless seed, only remaining—and the Christian name became a by-word.

The Sufi or Sufawī kings (1499-1736) ruled over large populations of Armenians and Georgians, Nestorians, and Jacobites, in what is now Russian and Turkish territory. Meanwhile the Reformation came to Europe, and the revival of the spirit of propagandism in the Roman Church. Toward the close of the 16th century occurred some events bearing on Persian missions, especially in the reign of Shah Abbas the Great (1582-1627), the contemporary of Queen Elizabeth. One was diplomatic intercourse between England and Persia. The first attempt was a failure, for in 1561 Anthony Jenkinson arrived in Persia with letters from Queen Elizabeth to Shah Jasmāp Shah. At their interview with Shah’s first question was, “Are you a Muslim or an infidel?” He replied that he was not a Muslim nor was he an infidel. But the Shah expressed his dissatisfaction, and the Englishman retired, and every step of his was immediately sprinkled with sand and swept to remove the defilement of his contact with the royal person. But in 1598 Sir Anthony and Robert Shirley visited Persia, bringing in Persia with a numerous retinue, and for many years were intimately associated with Shah Abbas, and laid the foundation of English influence in the East.

Following upon the Sufawi kings was an Afghan Basal Mission in Persia, lasting them seven years of massacre and misrule. Then arose Nadir Shah, who extended the Persian frontier far eastward and westward, and pillaged India. A generation of anarchy and civil war followed until the rise of the present line of kings, called the Kajar line, from the ancestral tribe from which they spring. Since the opening of the 19th century these kings have ruled, and an era of comparative peace has come. For twelve centuries Mohammedanism, in one form or another, has controlled the government, and molded the laws and morals and destinies of the millions of Persia.

Modern Christian Missions: Manifestly the ancient and medieval missions in Persia have failed to Christianize the nation. The way for modern Protestant missions began to open with the opening of the 19th century. The Persian language, through the Mogul emperors and the conquests of Nadir Shah, became the polite language of a large part of India, and the lingua franca of all Western Asia. The East India Company required its officials to study the Persian, and found that for them, more than English became the official language. Persia also from its position has an importance as a political power that was courted by Napoleon, by Russia, and by England. Thus it came to pass that splendid embassies were sent to Persia early in the century, and English influence most of all controlled affairs for several decades. Henry Martyn was a chaplain in India, and there acquired the Persian language. He came to Persia in 1811 to complete and improve the Persian translation of the New Testament. No one has reached his memoir covering the eleven months that he spent in Shiraz and not marvel at his boldness in confessing Christ and his deliverance from the bigoted Mollaḥs. But both his witnesses and his book were rejected with scorn. The devoted missionary left the country without knowing of a single convert. Nevertheless his translation of the New Testament and the Psalms was the lasting fruit of his labors. He wrote on completing it this prayer: “Now may the Spirit who gave the word, and called me, I trust, to be an interpreter of it, graciously and powerfully apply it to the hearts of sinners, even to gathering an elect people from the long-estranged Persians.” Many wonderful facts in later years show that this prayer is being answered.

The next laborer was the Rev. C. G. Pfander, of the Christian Society. He visited Persia in 1829, and at intervals for a few years sojourned there, passing part of his time in Shusha, Georgia, where his brethren from Germany then had a flourishing mission. This learned and devoted man came near sealing his labors in Persia with martyrdom, as he was captured in Western Persia, but was preserved for protracted labors. He died at Constantinople in 1869. His great work for Persia is “The Balance of Truth,” a book comparing Christianity and Mohammedanism. This work and several
other treatises on the controversy with Islam were published in India, and are doing a great deal secretly in Persia. Many thousands of Persians whose faith in their religion is shaken. The same works, perhaps unwisely published in Turkey before Dr. Pfander's death, led to severe persecution, and to a strict suppression of all books aimed at the system of Islam. But the books still live, and have their work to do, for they are exhaustive and unanswerable.

After several such sporadic missionary ventures in Persia, Dr. Joseph Wolf, about 1827, visited Persia. He was a converted Jew, a great traveler, and a voluminous writer. To this latter fact was ascribed the decision of the ABCFM to send men in 1830 to examine the condition of the Nestorian Church, described by Dr. Wolf. As a result the ABCFM determined to establish a mission to the Nestorians. Rev. Justin Perkins and his wife embarked in the fall of 1835, and they reached Tabriss about a year later, and in the summer of 1835 were joined by Dr. and Mrs. Grant. This little company of two missionaries and their wives arrived at Oroomiah formally to occupy the place as a station in November, 1835. Meanwhile the ABCFM had by the shores of Isphan in Shapur, Dr. Merrick, who had specially prepared himself to explore the Mohammedan field of Persia and Central Asia. He continued a missionary till 1843. He traveled extensively in company with Mr. Haas, and both came near losing their lives in an enemies' attack. The Nestorian Church had been partly converted, but even the missionaries were not able to induce the people to live in the town. Merrick's labors resulted only in teaching some Persian youths the English language and science, and in translating the Shi'ite traditional Life of Mohammed. It became evident that Providence had not been pleased with the way to labor directly for the Mohammedans.

The roll of this mission counts fifty-two missionaries, men and women, sent out previous to 1871. Time would fail to tell of all these. The pioneers, Messrs. Perkins and Grant, were enthusiastic, and as apostolic men. One of them, Dr. Grant, finished his career in 1845. Thousands in America and England became familiar with his work through his letters and his book on the Mountain Nestorians, and his Memoir, written by a colleague in the mountain work, Dr. Laurie. His fat was by the shores of Tigris, while the account of his labors has passed into the annals of the Church's heroes.

Justin Perkins, D.D., was spared to labor for more than thirty-six years, dying on the last day of 1869. His eminent services were seen in pioneer work, and in making known the Nestorians. In his later days he was a real patriarch, with all the venerable bearing and deep piety of the best fathers of old.

The force of missionaries was steadily increased from time to time by the arrival of other men. The work of the ABCFM was almost entirely for the Nestorians, numbering about 100,000 souls, partly in Persia and partly in Kurdistan, under Turkish rule. The preparatory work was followed by a remarkable ingathering, and then came years of organizing and training.

The work accomplished was to establish an enterprise with all the appliances and parts of an aggressive reformation in this old church, a thousand miles east of Constantinople, in the heart of Islam—the press, the training-schools for young men and young women, a band of over fifty native pastors and evangelists, an aggregate of over eighty schools and congregations. The results were great in themselves, and greater in their bearing on the future of those thousands whose faith in their religion is shaken. The same works, perhaps unwisely published in Turkey before Dr. Pfander's death, led to severe persecution, and to a strict suppression of all books aimed at the system of Islam. But the books still live, and have their work to do, for they are exhaustive and unanswerable.

The Presbyterian Board, 1871 to this day: By the union of the two great branches of the Presbyterian Church in 1870, the New School body ceased its support of the ABCFM, and claimed a portion of the mission as its heritage. The Mission to the Nestorians was transferred to the care of the Presbyterian Board in 1871. The work has since been widely extended into Eastern Persia and to reach Armenians, Kurds, and to some extent Persian Mohammedans. On the other hand, the work among the Nestorians has been profoundly affected by the entrance of Russian missionaries, who have won a large proportion of the Nestorian Church to rejoin the Eastern Church from which their fathers seceded fifteen hundred years ago.

A notable event was the celebration of the jubilee of this work in 1885, followed by prevailing revivals in many of the congregations. The hope of the work is in the gift of the Holy Spirit in its convincing and renewing power.

The Archibishop's Mission to the Nestorians (the word Archibishop referring to the Archibishop of Canterbury) and another enterprise of a missionary character. No time need here be spent upon it, however, since it has been sufficiently described in another place.

The Mission of the CMS: In 1869 the Rev. R. Bruce, of the CMS, on his way back to India visited Persia. He and the CMS decided to assume these enterprises and prosecute the work so incidentally begun. Three other stations have been occupied, and medical missions and Zenana missions have been undertaken. Moreover, God has given His blessing to this new enterprise in Persia.

The following societies are now at work in Persia: The Presbyterian Board, North; the Archbishop's Mission to the Assyrian Christians; the London Society for Promoting Christianity amongst the Jews; the Church Missionary Society, and the Bible Society. Educational work has received prominence from the beginning of modern missions in Persia, and the work of medical missionaries has been highly appreciated by the Persians. The great need of Persia was suggested by Lord Curzon in 1892: "... Those philosopohers are right who argue that moral must precede material and internal reform in Persia. It is useless to graft new shoots on to a stem which sap is exhausted or poisoned. We may give Persia roads and railroads; we may work her mines and exploit her resources; we may drill her for clothes and clothing, but this shall not have brought her within the pale of civilized nations until we have got at the core of the people, and given a new and a radical twist to the national character and Institutions." This need can only be met by divine message, borne to Persia by the missionary of the cross.

PERIODICALS: The Persian is one of the Indo-Germanic family of Aryan languages, of sufficient importance in itself to be sometimes called the Western Aryan. It is called Irani in Persia and in the West Asia it is known as Persian. It is one of the chief and most important of the Aryan languages of the world, and in the number of its speakers it has four times as many speakers as the other Indo-European languages. Its literature is very rich, and it is the most important literary station of the Aryan family. The language is still in use in the Persian Gulf, and in the north and south of Persia, as well as in the north of India and in the south of Russia. The language is divided into several dialects, the chief of which is the Persian or Persian, which is spoken in Persia, and the Persian, which is spoken in the eastern provinces of Persia.

THE CALLAO: The Callao, known as its literature, is the decree of Persian, of which few literary remains are extant. The language is still in use in Peru, and is still used in that country. The language is still in use in various parts of the world, and in various countries, and is still used in the Persian Gulf.

THE DECREE OF PERSIAN: The decree of Persian is a very useful and important instrument for the convenience of the Persian language. It is a very useful and important instrument for the convenience of the Persian language, and is used in the Persian Gulf, in the north and south of Persia, and in various parts of the world. The language is used in the Persian Gulf, in the north and south of Persia, and in various parts of the world. tude, 1,180 feet. Population (1901) 95,147, of whom 70,000 are Mohammedans, 17,500 Hindus, and 5,500 Sikhs. Station of the CEZ (1882), with (1903) 1,700 workers, 2 native workers, 3 day schools, 1 boarding school, 2 dispensaries, 1 hospital, and 15 Zenana pupils. Station also of the CMS (1885), with (1903) 4 missionaries, two of them with their wives; 4 native workers, 2 outstations, 2 day schools, 1 boarding school, 1 dispensary, 1 hospital, and 94 professed Christians of whom 97 are communicants. Station also of the WMS, with (1903) 1 missionary, 3 native workers, 4 places of worship, 1 Sunday school, and 57 professing Christians.

PETCHABUREE: A town in Siam, on the west side of the Gulf of Siam, 85 miles southwest of Bangkok, with which it is connected by railroad. Has 10,000 inhabitants. Station of the PN (1861), with (1903) 3 missionaries and their wives, 1 woman missionary, 5 native workers, 2 outstations, 2 day schools, 1 place of worship, 1 Sunday school, 1 day school, 2 boarding schools, 1 dispensary, 1 hospital, and 97 professed Christians.

PETRUSBURG: A town in Cape Colony, South Africa, 6 miles S. S. W. of King William's Town. Station of the Berlin Missionary Society (1856), with (1903) 2 missionaries, 1 woman missionary, 9 native workers, and 478 professing Christians, of whom 128 are communicants (including Emidges, the first). 1350

PETROPOLIS: A German colony in Brazil, South America, 28 miles N. of Rio de Janeiro. It is the summer residence of the rich inhabitants of the city. Station of the MES (1895), with (1903) 3 women missionaries, 49 native workers, 2 outstations, 1 place of worship, 1 Sunday school, 3 kindergartens, and 106 professing Christians.

PFANDER, Karl Gottlieb: Born, 1803; died, 1865. Prepared for his missionary work at the Training Institution, Basel, from 1820 to 1825. Pfander, who had a gift for languages, was destined by the Basel Committee for Asia, and particularly for the translation of the Bible into Asiatic languages. He was first sent with Zaremba, the former Russian count, also a graduate of the Basel Institute, to the Armenians living in the vicinity of Shusha, in the region near the Caspian Sea, which is now known as the Russian province of Transcaucasia. He and his associates were, soon after their arrival, in danger of death by starvation, for the Prince of Persia besieged Shusha for forty days, in 1826. The Shusha Mission was intended to be a work among the Mohammedan population, but its influence was felt among many Eastern Christians. Pfander, only 22 years old, had now to learn three languages: Turkish, Armenian, and Persian. The Turkish had not been provided with grammar and vocabulary till the missionaries used it. The Persian was necessary that he might be able to cope with learned Muslims. Pfander also studied the tone of the Mohammedan thought, by frequently conversing with the people, and studying their books, especially the Koran. The greatness of the problem of applying the teachings and saving the Mohammedans grew upon him. He was impressed by the facts that here was a people who acknowledged God as their Master and Owner, but who took Mohammed as their example; that they covered a large proportion of the world's surface; that for a thousand years they had waged a bitter combat against Christianity; that they had great difficulty in receiving the truths of the Gospel; and that their deepest desire was for the comfort and safety which only the knowledge of the truth, and that the problem was complicated by the Mohammedans being divided into sects, which had been engaged in deadly combat with each other. He wrote a little book for distribution among them, and it was blessed mightily by God. In 1829 he decided to go to Baghdad to learn Arabic, and when the dangers of that journey were brought to his attention, he wrote: "I have no care for my life; it will be preserved as long as it is needed for the service of the Almighty." He left Baghdad after heroic work, to visit Persia, and in 1831 we find him in Isphahan. His book, written in German, had been sold, with the help of the natives, translated in Armenian, Turkish, and Persian, and one of his objects in the present journey was to make the Persian edition more correct. He joined a caravan, wore native dress, and on his journey he spoke to Tatars and Kurds of the Christian religion, and distributed tracts and Persian New Testaments. He favorably impressed Catholic and Armenian Christians, and the Syrian archbishop asked for and received a number of Syrian and Arabic New Testaments. His visit proved a great blessing to Syrian Christians, and he greatly strengthened them by his words, both spoken and written, in their purpose to honor God. In the town of Kirmanshad he had a struggle with fanatical Mullahs. He knew the danger of propagating the Gospel and the truth of the vailing thought of Mohammedanism; but, putting his trust in God, he answered boldly all of their questions and preached unto them Christ. The enraged Mullahs held a council at night, and it was announced next day in the mosques that his books must be destroyed, and that he must be killed. A rumor that some of his books were bound in pigskin greatly disturbed the peace of these followers of Mohammed. He visited the Prince of Kirmanshad, and was protected from the violence of the Mullahs. His way to Tabreez he distributed the Scriptures, preached the Word, and had the joy of seeing souls saved by the grace of God. From Shusha he visited and labored in the neighboring towns of Shamakhi and Baku, and for eight years, having been a pilgrim in missionarial work among many peoples, he visited Europe, where he spent a year. In 1836 he and his companions were ridden by the Russian Government to cease at once and forever from all missionary work in the country, and from March to September, Pfander and Kreiss were engaged in a journey of exploration that opened a prospect to Constantinople. Soon afterward they both received appointments under the CMS, started for India by the way of Persia and the Persian Gulf, and after thirteen months they reached Calcutta. He spoke of the years from 1837 to 1841 as a time of waiting, instead of working and saving, the Mohammedans grew upon him. He was impressed by the facts that here was a people who acknowledged God as their Master and Owner, but who took Mohammed as their example; that they covered a large proportion of the world's surface;
Peshawar, and during this terrible uprising he showed the firmest faith and the highest courage. The Mutiny over, he visited Europe, and in 1858 he returned to America by way of the Cape, accompanied by Dr. Koelle. Here, as elsewhere, his tongue and pen were mighty forces in the proclamation of the truth. This gifted missionary, able writer, and great linguist left a permanent impression upon each of the peoples among whom he labored, when his body, brought to Mindanáo, was buried in its weakest point, and still exercise a powerful influence in India, in Persia, and in Turkey and Egypt.

PHALANE: A settlement in the Transvaal, South Africa, situated about 46 miles N. W. of Pretoria. Station of the Hermannsburg Missionary Society (1867), with (1901) 1 missionary and his wife, 4 native workers, 1 outstation, 2 day schools, and 631 professed Christians.

PHALAPYE. See Serowe.

PHILIP, John: Born in England; studied at Hoxton Academy; was appointed as a deputation with Rev. John Campbell to visit the stations of the LMS in South Africa; sailed December 10, 1818, reaching Cape Town February 26, 1819. Accompanied by Mr. Moffat and Mr. Evans, the deputation visited the stations within the colony, but were prevented by the Kafir war from proceeding beyond. Mr. Philip returned to Cape Town. In 1820 he received from Princeton College, New Jersey, U. S. A., the degree of Doctor of Divinity. The Deputation having completed their work, Dr. Philip was appointed superintendent of the Society's missions in South Africa. He was also pastor of an English congregation at Cape Town. In 1826 he visited England by invitation of the directors, his place as superintendent being supplied by Rev. R. Miles. He earnestly championed the rights of the Hottentots as against greedy and unprincipled settlers, and secured certain regulations which ameliorated their civil status. On his return to South Africa he was sued for libel and made to pay a fine of £1,200. Dr. Philip died at Hankey, South Africa, August 27, 1851. His Researches in South Africa were published in 2 vols. in London, 1828.

PHILIPPOLIS: A city in Eastern Rumelia, Bulgaria. It is the most important city of the southern province. Population (1900), 42,849. The city stands upon and between three isolated syenite rocks (the highest 993 feet) on the right bank of the Maritsa, 97 miles N. N. W. of Adrianople. It was founded 340 B.C. by Philip II. of Macedon. Station of the ABCFM (1859), with (1903) 2 missionaries and their wives, 27 native workers, 17 outstations, 12 places of worship, 17 Sunday schools, 8 day schools, 1 printing house, and 472 professed Christians.

PHILLIPS, Jeremiah: Born at Plainfield, N. Y., January 5, 1812; attended Madison (now Colgate) University, but did not complete his course of study, the Committee of the Missionary Society desiring that he should accompany Dr. Sutton on his return to India. He was ordained at Plainfield, and embarked for Calcutta in company with Dr. E. Noyes, September 22, 1855, under the Fund of the Missionary Society. In his labor was Orissa, a region of country hitherto wholly untouched by missionary effort, which was occupied in 1836. Balasor was first occupied in 1840 and a boarding school opened, with six native children. The same year Mr. Phillips commenced a new station at Jaleswar with some of the Balasor boarding scholars and native converts of the society. He also commenced the study of the native language of a race of aborigines previously unknown to missionaries. He reduced their wild language to writing, prepared and published a grammar and dictionary, and established schools among them—for the first time in their existence, so far as known. In a report of his correspondence and published articles in the papers of India and America, seven missions have been established, and are successfully working among them. He translated the Gospels and other portions of the Bible into their language, and also prepared school-books. The degree of doctor of divinity was conferred upon him by Bates College, Maine. The India Government officially thanked Dr. Phillips for his great work among the Santals. He died at Hillsdale, Mich., December 9, 1879, having served 43 years in India.

PHILIPPINE ISLANDS: A group of islands lying in the Western Pacific Ocean, and extending almost due N. and S. from Formosa to Borneo and the Moluccas, through 16° of latitude and 90° of longitude. The group contains nearly 2,000 islands, some of which are mere islets. The largest islands are Luzon, with a population of 5,500,000, Mindanao, 750,000, Cebu, 504,600; Samar, 200,753; Leyte, 270,491; Mindoro, 200,000; Palawan, 70,000, and Mindanao, 600,000. The whole area of the group is estimated at 122,000 square miles, and the population is about 8,000,000. The climate of the islands is equable, and is determined by position and altitude. In general it may be described as hot, tempered somewhat by ocean breezes, but very moist and more than ordinarily trying to American residents. One of our people going to the islands in perfect health and remaining two or three years without taking regular change of air in the mountains, will find his general health seriously affected. Vegetation is luxurious and on the whole offers the people an easy support.

The majority of the inhabitants are of the Malay stock, now very much mixed. There are about 25,000 Europeans in the islands, about 100,000 Chinese, in whose hands are the principal industries, and a considerable number, not yet ascertained, of wild tribes, some of whom seem to be Negro dwarfs. The languages of the people are numerous. Spanish has been the official language and is used by educated Filipinos, but has not at all displaced the native languages in the households of the people. It will now be quickly replaced by English. The chief of the forty or fifty native languages spoken in the islands are the Tagalog, the Pampangan, the Pangasinan, the Visayan, in two main dialects, the Cugnan and the Zambales, besides the Moro dialects of the south, which have taken up a certain number of Arabic words.

The Philippines were discovered and conquered by the Spaniards in the 16th century. Having received a certain amount of advantage from Spanish control and tutelage during 350 years, and having been eed to the United States by the treaty of peace signed December 10, 1898, they want to see their American influence will be more beneficent and stimulating than the Spanish. With the exception of the southern portion of Mindanao and the Sulu archipelago, inhabited by Mohammedan Malays,
whom the Spaniards called Moros (Mohammedans or Moors), the islands are under civil government, with practical autonomy in the municipalities, and a governor elected by the people through their municipal councils. The law-making power rests with a commission at Manila under a Governor appointed and supervised by the President of the United States.

Upon the islands of the Philippines, excepting that of the Mohammedan Sulu archipelago and part of Mindanao, is overwhelmingly Roman Catholic, altho in the mountain districts of the larger islands paganism in the form of ancestor-worship and spirit-worship also exists. The Roman Catholic Church has divided the islands nearly 900 parishes, of which some 600 have been administered by foreign friars of the Augustinian, Dominican, and Franciscan orders. These friars have had not only the religious, but in actual fact, the civil, control of the islands, and have used their power for the advantage of their orders rather than of the people. They have acquired ownership, for instance, of more than 400,000 acres of choice land in the islands, besides holding title to a great number of churches and other public buildings. Through various causes needless to enter into here, the membership of foreign friars, that is to say the Roman Catholic establishment, has alienated the affections of the mass of the Filipinos, and as soon as the Spanish power in the islands was broken all of the friars were forcibly expelled from their parishes, saving a few taking refuge in Manila or even in foreign lands. The people have said: “Our people have had 300 years of friars’ religion, and now we want a better one.” This does not, however, imply a revolt from Roman Catholicism, for most of the people still belong to that form of religion. In some provinces the Roman Catholic clergy still sharply control public sentiment, but in others there is a tendency to form a national Roman Catholic Church, which has been commenced by certain of the native clergy who have used their influence to the advantage of the nation.

The whole situation of Roman Catholicism in the islands is one which causes the gravest inquietude among the August prelates at Rome, the change which withdraws national support from that church and establishes schools outside of the control of the bishops, being one to which European Roman Catholics cannot readily adapt themselves.

In the meantime the condition of the common people in the Philippines who are Christians in name has attracted the sympathetic attention of the Protestant missionary societies of the United States. While there are exceptions among the educated classes, the characteristic qualities of the common Roman Catholic Filipino (that is to say, of the mass of the people) are the following: There is a strange lack of either religion or political fraternity between them, a mere dialect separating neighbors as widely as the ocean. Like all Asiatics, they look upon representatives of Western civilization with an instinctive dislike and suspicion, and they hardly know the meaning of lofty ambitions or aspirations.

In their religious concept, it is a conviction that all foreign clergy are immoral, and they allow nothing in the religious teaching of foreigners to restrain them from being idle, dissipated, deceitful, vacillating and essentially worthless. The two interests capable of thoroughly engaging their attention are, first, cock-fighting (with gambling), and, second, gorgeous church processions. It is clear that no great future for these is apparent through a more profound understanding of the Gospel of Jesus Christ.

The Presbyterian Board of Foreign Missions in the United States (North) was the first Protestant society to establish a mission in the Philippines. The first station was opened in 1899 by some of the great denominational societies a conference for such arrangements as to comity and territorial limitations as will prevent any impression of rivalry between the denominations. This has resulted in the formation of “The Evangelical Union of the Philippine Islands,” an amalgamation adding in brackets its distinctive name. Comity being settled upon, the PN established Mr. Rogers its first missionary in Manila in April, 1899. It now has 4 other stations on the islands of Panay (1900), Negros (1901) and Cebu (1902), with 10 organized churches, several schools, one of them industrial; 2 hospitals and about 500 communicants. The CA has sent out missionaries temporarily working with the PN. The Methodist Episcopal Church in the United States, after Methodist laymen had commenced holding meetings in Manila in 1898 (before the Presbyterian mission was opened), organized a mission station there in May, 1900, taking its field the northern section of the island of Luzon. It now has work in 27 places, with three central stations, the first of which was set up in Manila. It has about 4,000 professing Christians unless its actual communicants number 1,000 of them being communicants. The American Baptist Missionary Union opened its first station in 1900 on the island of Panay, and its second in 1901 on the island of Negros. It now has 3 organizational churches and another in the Ilocano-speaking provinces (1901) in the N. W. coast of Luzon. The ABCFM has a station (1902) in the island of Mindanao. All of these missions are working with the hope of benefiting the people. It is not their aim to waste time in fighting the Roman Catholic Church. The B and FBS and the ABS also have agencies in the islands and are pressing forward Bible translation and have circulated about 80,000 copies per annum of the Gospels and other portions already printed.

PHOKWANE: A railway station in S. Bechuana-land, Africa, situated about 70 miles N. of Kimberly. Station of the SFG, with (1903) 1
missionary and 905 professed Christians. Some write the name Phokoane.

PHYENG-YANG: A town in Korea, about 80 miles W. by S. of Wonsan, beautifully situated on the right or N. bank of the T'ongdong, 50 miles from Wonsan. The river on which it stands is navigable by vessels of moderate draught to within 15 miles of the city. It is the center of a large silk industry. The Japanese defeated the Chinese at this place in September, 1894. Population, 20,000. Station of the ME, with (1903) 4 missionaries, seven of them with their wives; 3 women missionaries, 11 native workers, 17 outstations, 18 places of worship, 1 Sunday school, 1 dispensary, 1 hospital, and 2,079 professed Christians, of whom 269 are communicants. Station also of the PN (1903), with (1903) 3 missionaries, seven of them with their wives; 2 women missionaries, 51 native workers, 185 outstations, 136 places of worship, 40 day schools, 1 boarding school, 1 dispensary, 1 hospital, and 4,358 professed Christians, of whom 2,926 are communicants. The name is also written Pu-ying.

PIETERMARITZBURG: Capital of Natal, Africa, situated in a fertile plain, 2,000 feet above sea, surrounded by a circle of hills, and 40 miles N. W. of Durban. It has an excellent climate, especially curative of pulmonary complaints, and the rich vegetation of its gardens and surrounding woods makes it one of the most delightful cities of Africa. Its population, numbering (1901) 30,000, is most cosmopolitan in character, consisting of Zulus, Kafris, Europeans, Hindus, Chinese and Arabs. Station of the Swedish Holiness Union (1893), with (1901) 1 missionary and his wife, 1 woman missionary, and 1 day school. Station also of the Mission Association for the diocese of Natal (1898), with (1901) 1 missionary, 2 women missionaries, 2 native workers, 1 theological class, 1 industrial school, and 215 professed Christians. Station also of the UFS, with (1903) 2 missionaries and their wives, 2 outstations, 1 place of worship, 4 day schools, and 701 professed Christians. Station also of the South Africa Wesleyan Methodists, with (1900) 56 native workers, 14 outstations, 14 places of worship, 2 Sunday schools, 9 day schools, and 978 professed Christians.

PILGRIMSDAL: A town in the Transvaal, South Africa, Zwartberg division, about 140 miles N. N. E. of Pretoria. Population, 1,500. Station of the Berlin Missionary Society (1896), with (1903) 1 missionary, 10 native workers, 4 outstations, and 304 professed Christians, of whom 134 are communicants. Station of the SPC, with (1903) 1 missionary.

PILGRIM MISSION at St. Chrischona. See ST. CHRISCHONA.

PILKINGTON, George Lawrence: Born in Ireland, 1865. Died in Africa, 1898. Educated at Cambridge and at the age of 20 appointed Assistant Master at Harrow and Bedford Schools. Sailed January 23, 1890, under the CMS to join the Uganda Mission, Africa, Mission.

On March 9, less than three months after his arrival, he had already, with the help of Henry Wright, almost completed a translation of the Acts of the Apostles, induced the natives to translate Old Testament stories from Swahili, and begun to compile a Luganda grammar. He had completed the grammar and vocabulary, finished the Acts, and translated about twenty hymns by the end of May in the same year. Of the books of the New Testament, all but 1. and II. Corinthians, Romans, James, and John's Gospel were translated by January, 1892. The Gospels had been translated previously. The New Testament was finished, sent home, and printed by the Bible Society by Christmas, 1893. The Old Testament, of which he translated all but some of the minor prophecies, was completed in 1895.

Nor was Mr. Pilkington a translator only. The letters of that period show that he took his full share in teaching with the rest, and in all the events of that troublous time. The prominent position he took very early is shown by the fact that when, on December 27, 1891, only one year after Mr. Pilkington's arrival in Uganda, Mwanga, in one of his many changes, announced his intention of becoming a Protestant, it was to Mr. Pilkington that the chiefs first took the news.

Early in the year 1898, while he was engaged in aiding as interpreter the British officers sent to restore order, he was struck down by the Sudanese mutineers. Mr. Pilkington's translations make a long list, and one which, for a young man of thirty-three, is amazing. In the forefront of them all, he completed the translation of the whole Bible, except the Gospels, into Luganda, in a beautiful monument. He also revised and in part translated the Prayer Book, translated a hymn-book, catechism, and Bible stories; wrote a small work, Anonymalaba ("He that seeketh findeth"), in Luganda; compiled a Luganda grammar, a Luganda-English and English-Luganda vocabulary, and other smaller works. While at home he wrote, aided by Mr. Baskerville, a pamphlet called The Gospel in Uganda and made designs for Central Africa for Christ.

PING-LIANG-FU: A town in the province of Kansu, China, situated in the eastern part of the province, 145 miles E. by S. of Lan-chau-fu, and a short distance E. of the Liu-pan pass over the mountains. This is the center for the Scandinavian Alliance missionaries, and associates in China, with (1903) 1 missionary and his wife, 1 woman missionary, 2 native workers, 1 place of worship, and 1 Sunday school. Some write the name P'ing-liang.

PING-TU-CHAU: A town in Shan-tung, China, situated about 95 miles S. W. of Chi-fu. Station of the S. W. China Mission (1903) 1 missionary and his wife, 1 woman missionary, 5 native workers, 5 outstations, 10 places of worship, 3 Sunday schools, 7 day schools, 1 boarding school, 1 dispensary, and 354 professed Christians. Some write the name Ping-tu.

PING-YANG-FU: A town in the province of Che-kiang, China, situated near the coast in the
building was dedicated and given over to her charge. There men, women, and children of all nationalities and religions received treatment. In 1902 there were 666 Syrians and 112 other patients in the hospital, cared for by the eight nurses, who belonged to the Kaiserswerth order of deaconesses.

Sister Charlotte's work was recognized in Germany as well as in Jerusalem. The Crown Prince of Prussia (later Emperor Frederick of Germany) visited Jerusalem in 1869, and took pains to go to Talitha Kumi and express to Sister Charlotte his pleasure with the work. The Emperor William II. having visited Jerusalem in 1869 for the dedication of the new German Evangelical Church of the Redeemer, also took pains to go to Talitha Kumi and the hospital to see the work of the deaconesses. Great honor was shown Sister Charlotte on March 25, 1903, when the members of the German colony in Jerusalem met to express their appreciation of her work, and as a token of this appreciation they gave her the duty of laying the cornerstone of a new school building. She was presented with a Bible from the Empress of Germany, and addresses were made in behalf of the deaconesses' work in the name of the colony in Jerusalem, and of the children for whom they labored.

PLOISANCE: A town near the center of the Island of Mauritius, about 45 miles S. E. of Port Louis. Station of the CMS, with (1902) 2 missionaries, 1 with her wife; 23 native workers, 1 orphanage, and 392 professing Christians, of whom 50 are communicants.

PLYMOUTH BRETHREN: Missions of the. See Christian Brethren.

PNIEL: A village of Cape Colony, South Africa, situated in Griqualand West, about 5 miles N. W. of Kimberley on the left bank of the Vaal River. Station of the Berlin Missionary Society (1845), with (1903) 2 missionaries, 1 with her wife, 116 native workers, 44 day schools, 1 Sunday school, 8 places of worship, and 8,088 professing Christians, of whom 3,285 are communicants.

POELO TELLO: A settlement in the Butu Islands, Dutch East Indies, situated S. E. of Nias Island and W. of Sumatra. Station of the Netherlands Lutheran Missionary Society, with 1 missionary and his wife and 1 day school.

POERBOLINGGO: A town in Java, Dutch East Indies, situated in the central part of the island, about 75 miles S. W. of Samarang. Station of the Neukirchen Missionary Society, with 2 missionaries, 1 of them with his wife; 5 native workers, 5 outstations, and 1 day school.

POERWOREDO: A town in Java, Dutch East Indies, situated in the S. part of the island, about 60 miles S. W. of Samarang. Station of the Reformed Church of the Netherlands (1878), with (1903) 2 missionaries and their wives, 3 native workers, 3 outstations, 3 day schools, and 1 theological class.

POINT BARROW: A settlement in Alaska, situated on the coast of the Arctic Ocean and on the most northerly point of U. S. territory. Station
of the Presbyterian Home Missionary Society (1890), with 1 missionary, 1 woman missionary, 1 chapel, 1 Sunday school, 1 day school, and 30 professed Christians.

**POINT PEDRO:** A town in Ceylon, India, situated in the Northern Province on the N. coast of the island. It has 1 mission and 1 mission station. Station of the WMS, with (1903) 1 missionary, 1 woman missionary, 126 native workers, 20 outstations, 26 Sunday schools, 29 day schools, 22 places of worship, 1 boarding school, and 204 professed Christians, of whom 97 are converts.

**POLADPUR:** A town in Bombay, India, situated in the Kolaba district, about 30 miles S. of Bombay. Station of the Mission to Lepers (1894), with 1 home for untainted children of lepers.

**POLES:** The Poles form the most numerous branch of the Western Slavs. They number about 10,000,000, distributed by the division of Poland in 1772 in 14 districts. They are all Catholics, except 500,000 Protestants, and they use the Latin alphabet, modified so as to express the sounds peculiar to their language. Their language belongs to the western branch of Slavic languages, and is divided into four or five dialects, which, however, are not very different from each other. The Polish language has been influenced more than any other Slavic language by the Latin (which in olden time was the literary and church language of Poland), the German and the French. Its distinctive characteristics are the nasal expression or rhymes of a and e, peculiar to the ancient Bulgarian or ancient Slavic, but which has disappeared from common use now among the Slavs, and that it always accents the penultimate syllable of words. The Polish language bears quite a close resemblance to the language of the Bohemians and the Lusatian Serbs.

The history of the ancient settlements of the Poles is uncertain. Their history becomes more trustworthy with the introduction of Christianity, of which the first of the church is assigned to the date of 966. It is difficult to determine the date of the establishment of the Eastern Church were taught among them in the time of Sts. Cyril and Methodius, the Slavic apistles, long before this date, but were soon supplanted by Latin Christianity. If so, the Eastern form has been so thoroughly extirpated that it has left no traces in Polish literature. Along with the introduction of Latin Christianity through German preachers, the Latin language acquired a firm footing in Poland, and was the language of the learned and higher classes, as well as of the courts. Luther's reformation penetrated into Poland, where it found zealous and ardent defenders and followers; but, in spite of all the earnestness with which it was defended, it was overthrown by the Roman Catholic reaction. The political history of Poland is too long to be treated in detail here. We can characterize it in a few words by saying that it was full of political vicissitudes, of glorious deeds, and of internal instability. The shahata, or nobility, had the upper hand, while the common people had very little share in the government. The jealousies and the arrogance of the nobility were always a hindrance to all good, and more than once the king's authority was set at naught. So the internal condition of Poland grew worse and worse, internal dissensions and strifes tended to weaken the government, and Poland fell a prey to more powerful neighbors, who resolved upon her partition, and thus put an end to her independent political existence.

**POLFONTEIN:** Village in the Transvaal, South Africa, situated about 20 miles E. S. E. of Pretoria. Station of the Home Missionary Society (1877), with (1903) 1 missionary and his wife, 1 native worker, 3 outstations, 3 places of worship, 3 day schools, and 540 professed Christians.

**POLONIA:** Village in Transvaal, South Africa, situated 20 miles W. by N. of Pretoria. Station of the Hermannsburg Missionary Society (1883), with (1900) 1 missionary and his wife, 2 native workers, 2 outstations, 1 place of worship, 1 day school, and 389 professed Christians.

**PONAPI.** See CAROLINE ISLANDS.

**PO-NA-SANG:** A station of the ABCFM (1849), in the suburbs of Fu-chau-fu, q. v. for statistics.

**PONCE:** A station of the American Baptist Home Mission Society (1899) in Porto Rico, West Indies, with (1900) 2 missionaries and their wives, 1 woman missionary, 1 native worker, 2 outstations, 2 Sunday schools, and 80 professed Christians. Station also of the Christian Church (1901), with 2 missionaries, 1 of them with his wife. Station also of the PB, with 1 missionary and his wife. Station also of the Feni Missionary Society, with 2 women missionaries and 1 outstation. Station also of the UB, with (1903) 3 missionaries and their wives, 1 day school, 1 dispensary, 8 places of worship, 1 printing house and 73 professed Christians.

**POO:** A town in Kunwar, on the border of Punjab, India, toward Tibet, situated on the Surlej River, about 100 miles N. of Simla. Station of the Moravian Mission Society (1865), with (1903) 1 missionary and his wife, 1 native worker, 1 outstation, 2 places of worship, 2 Sunday schools, 2 day schools, and 13 professed Christians. The aim of the enterprise is to convey knowledge of Christianity into Tibet by means of Tibetans who come to these border regions for trade. So far, few caste people, almost to be regarded as slaves, are the only ones who have been converted here.

**POOLA:** Capital of a district of the same name in Bombay, India. Situated in a plain, on the Moota River, 119 miles by railway southwest of Bombay. It was formerly the capital of the Maratha power. The seven quarters of the city are named after the days of the week. Its climate is very pleasant and salubrious, making it a favorite place of resort during the rainy season. Population (1901) 153,320, including the garrison in the cantonment about two miles northeast of the city. Marathi, Gujarati, and Hindustani are the languages of the various races included in its mixed population. Station of the UFS (1851), with (1903) 2 missionaries, 3 women missionaries, 27 native workers, 2 outstations, 1 place of worship, 5 day schools, 1 boarding school, 1 orphanage, 1 printing house, and 186 professed Christians. Station also of the Church of Scotland Women's Board (1841), with (1900) 12 women missionaries, 38 native workers, 8 day schools, 1 boarding school, 1 dispensary, 1 hospital and 1 orphanage. Station also of the CMS (1882), with (1903) 2 missionaries, 23 native workers, 1 outstation, 9 day schools, 1 theological class, and 398 professed
Christians, of whom 174 are communicants. Station of the Ramsahab Association, with a home for widows which is called Sharada Sadan. Station also of the ME, with (1903) 2 missionaries, one with his wife; 2 dispensing missionaries, 38 native workers, 3 outstations, 5 places of worship, 9 Sunday schools, 17 day schools, 2 boarding schools, and 2 orphanages. Station also of the Poona Indian Village Mission, with 3 missionaries, 3 women missionaries, 1 place of worship, 1 day school, 1 dispensary. Station also of the WMS, with (1903) 1 missionary, 2 native workers, 2 outstations, 1 place of worship, 1 Sunday school, and 35 professed Christians. Station also of the ZBM, with (1903) 27 native workers, 5 day schools, 1 boarding school, and 1 orphanage. Station also of the Salvation Army.

POOR, Daniel: Born at Danvers, Mass., June 27, 1789; graduated at Dartmouth College, 1811; studied for theology at Andover Seminary, and was ordained and appointed missionary to Ceylon by the ABCFM, embarking October 23, 1815, with the first party of missionaries sent to that field by the Board. He was stationed at Tillypally until 1823; then appointed to charge of Batticotta station, where he remained nearly 35 years. Served in the Madura mission in 1836; returned to Tillypally, 1841; visited the United States 1848-1851; on his return to Ceylon was stationed at Manepiy until his death by cholera in 1855, after 39 years of mission service and in the sixty-sixth year of his age. He was graduated of D.D. from Dartmouth College in 1835.

Dr. Poor was one of the founders of the ABCFM mission in Ceylon and left the impress of his strong personality upon its policy, as well as upon the Madura mission. He was in advance of his age in appreciating the place of higher education in the scheme of missions. Consequently he had to defend his views more than once or twice. He opened a school at Tillypally shortly after his arrival, and the seminaries for boys at Batticotta, to which all the other mission boarding schools should be feeders, was largely the child of his mind as well as the convincing proof of the soundness of his theories of education. In the Madura mission also he was largely responsible for the establishment of some 55 native schools in five years. He also wrote:

He excelled all his associates in the use of the Tamil language, in which he preached his first sermon one year after his arrival in Ceylon. His familiarity with the language and his knowledge of Hindu literature, his clear mind, his self-command and quickness of repartee, coupled with a rare courteousness in debate, enabled him to meet the arguments and expose the sophistries of learned Hindu opponents with telling effect.

During Dr. Poor's visit to the United States in 1848-49 he was much in demand among the churches for addresses on missions, and the powerful addresses which he gave were cherished memories with many who heard him.

POPO LANGUAGE: A dialect of the Ewe, used as a vernacular by tribesmen in Dahomey and Togoland, living between Lagos and the Volta River.

PORAYAR. A suburb of Tranquebar, Madras, India, situated in the district of Tanjore, 21 miles N. of Negapatam, and 5 miles E. of Karikal. Population, 14,500, of whom 11,000 are Hindus. Station of the Leipzig Mission Society (1842), with (1903) 2 missionaries and their wives, 21 native workers, 7 outstations, 8 places of worship, 25 day schools, 4 boarding schools, 1 industrial school, and 2,003 professed Christians, of whom 921 are communicants. The name is also written PORAIAR.

PORTO ALEGRE: A town and seaport in Brazil, South America, situated in the state of Rio Grande do Sul, of which it is the capital. It is the chief commercial port in S. Brazil. Population, 32,472, with 14 native stations, the Chinese Church Missionary Society (1890), with (1901) 1 missionary and his wife, 1 woman missionary, 2 native workers, 1 outstation, 3 places of worship,
2 Sunday schools, and 133 professed Christians. Station also of the MES (1890), with (1903) 1 missionary and his wife, 4 native workers, 6 outstations, 23 places of worship, and 60 professed Christians. Station also of the SDA, with 1 missionary and his wife.

PORTO NOVO: A town in Dahomey, West Africa, under French authority, situated about 50 miles E. of Whydah. Station of the WMS, with (1903) 1 missionary, 44 native workers, 12 outstations, 31 places of worship, 9 Sunday schools, 7 day schools, and 417 professed Christians, of whom 25 are communicants.

PORTO RICO: An island of the West Indies, lying east of Haiti. It contains an area of 3,550 square miles and a population (1899) of 953,243, of whom over 350,000 are negroes or of negro blood. It is described as "the healthiest of all the Antilles." Slavery was abolished by the National Assembly on March 23, 1873. The principal towns, with their population, are: San Juan, 32,000; Ponce, 28,000; San Germain, 38,000.

Porto Rico became United States territory by the treaty with Spain December 11, 1898. The adjacent islands of the Virgin group are also possessed by the United States and contain about 6,000 inhabitants.

PORT SAID: A town and seaport in Egypt, situated at the entrance to the Suez Canal, about 100 miles E. of Alexandria. Station of the Pearl S guessing, with 3 women missionaries, 1 native worker, and 1 day school. The BFBS also maintains an agent here, with a Bible depot and a colporteur.

PORT SHEPSTONE. See NORTH AND SOUTH SHEPSTONE.

PORT SIMPSON: A town and seaport in British Columbia, N. A., situated on the S. side of the entrance to Portland Channel. Station of the MCC (1874), with (1903) 2 missionaries, one of them with his wife; 6 women missionaries, 1 place of worship, 1 Sunday school, 1 boarding school, 1 dispensary, 1 hospital, 1 industrial school, and 404 professed Christians.

PORT OF SPAIN: Capital of Trinidad and Tobago, West Indies. It is one of the handsomest towns in the West Indies, with a good harbor and an active trade. Temperature, 70°-93°Fahrenheit. Population, 34,000, English, English and French creoles, Indian coolies, Chinese, Spaniards, and Portuguese. Each race speaks its own language, and the creole dialects of French, Spanish, and English. Social condition, too far from good, is better than in most of the West Indies. Station of the UFS (1836), with (1893) 1 missionary and his wife, 1 outstation, 1 place of worship, and 250 professed Christians. Station also of the Moravian Missions, with (1903) 1 missionary and his wife, 22 native workers, 2 outstations, 3 places of worship, 4 Sunday schools, 2 day schools, and 234 professed Christians. Station also of the SDA (1893), with (1900) 2 missionaries, one of them with his wife; 16 native workers, 7 outstations, 1 place of worship, 5 Sunday schools, 1 day school, and 220 professed Christians; the auxiliary International Medical and Benevolent Association also has here 1 woman missionary. Station also of the African Methodist Episcopal Church, with 1 native worker.

PORTUGUESE EAST AFRICA: A colony of Portugal, lying along the east coast of Africa for a distance of nearly 1,000 miles, extending from the Rovuma River and the borders of German East Africa on the north to Amatongaland on the south, and including part of Mozambique, Matabilland, and the Transvaal on the west. The total area is about 297,750 square miles; the population about 1,500,000. It comprises three districts: Mozambique, Zambesia, and Lourenço Marques, to which, however, must be added the district of Delagoa Bay. In 1885, administrative concession to the Inhambane Company failed in 1889, and the Gaza region, which constitutes a military district. Two trading companies, the Nyassa and the Mozambique Companies, administer certain regions under a royal charter that confers sovereign powers. With Lourenço Marques, Beira, Inhambane, and Lourenço Marques are the most important towns. The Delagoa Bay railway, touching the coast at Lourenço Marques, has a length in the colony of 57 miles, and extends to Pretoria. The Beira railway extends in the colony 22 miles, and is continued in British territory to Bulawayo. Telegraphs, with a mileage of 1,850 miles, connect the principal towns and communicate with the British systems. The country far from the coast and from navigable rivers is still largely unexplored by white men. The climate is subject to sudden changes, but the mean annual temperature is high, and, with moderate care, danger to health is avoided. The whole region is intersected by numerous rivers, and is very fertile, but the tsetse fly is, in some districts, a real handicap in the forests. The mineral resources (gold, copper, iron and coal) are of exceptional importance. The Chindé River, 45 miles south of Quaquas, is a mouth of the Zambesi, and furnishes a channel three fathoms deep and 500 yards wide, with good anchorage. An ordinary steamer can thus pass directly into the river. Formerly goods, after several days' journey up the Quaquas, had to be carried eight miles over a swampy depression to the Zambesi, where they were transferred to the small Zambesi steamers. A railway is planned to give collective sense to the tribes originally inhabiting the southern part of this territory, are a peaceful and industrious people. Their language has been reduced to writing, and a hymn-book and the whole New Testament have been translated. The Zulu language is spoken by a great majority of the people. There are two other extensively spoken languages—the Isiisena, spoken from the Sabi to the Buzi, the Istlhwenga south of the Sabi. North of the Buzi the Sena language is spoken by a people who only occasionally speak Zulu. Roman Catholic Missions have long existed in the colony, and of Protestant Missionary Societies the SPC, the Free Methodists of America, and the Swiss Romande Mission have stations in the southern coast regions.

PORVENIR. See LIMON.

POTOANE: A village in Transvaal, South Africa, situated on the Aapies River, 32 miles N. by E. of Pretoria. Station of the Hermannsburg Missionary Society (1871), with (1901) 1 missionary, 1 native worker, 1 place of worship, 1 day school, and 169 professed Christians.

POTRIBO: A village in Dutch Guiana, South America, situated in the Connewyne district,
about 30 miles E. by S. of Paramaribo. Station of the Moravian Society (1896), with (1903) 1 missionary and his wife. By December, in 1 place of worship, and 129 professed Christians.

**POTCHESTROOM:** A town in the Transvaal, South Africa, 90 miles southwest of Pretoria. Population, 2,000. Station of the SPG (1864), with (1903) 1 missionary. Station also of the Berlin Missionary Society (1872), with (1903) 1 missionary, 13 native workers, 4 outstations, and 1,298 professed Christians, of whom 313 are communicants. It also occupies the WMS, with a missionary, 81 native workers, 38 outstations, 22 places of worship, 22 Sunday schools, 8 day schools, and 1,582 professed Christians, of whom 380 are communicants.

**POWERS, Philander O.:** Born at Phillipston, Mass., August 19, 1865; graduated at Amherst College, 1880, and Andover Theological Seminary, 1891; sailed November 10 the same year as missionary of the ABCFM, arriving at Smyrna January 12, 1895; released from the service of the Board, 1862; reappointed in 1866; he was stationed at Broosa, Trebizond, Sivas, Antioch, Kesab, Urfa, and Marash. His self-sacrificing spirit appeared in rest and mission work, always giving his support to another, never allowing the comforts of home to interfere with or keep him from his work at a distance. He had a fine taste for music. This talent, together with his skill in versification, made him an excellent hymnologist. Many of the best hymns in the Turkish are from his pen. He died October 2, 1872, at Kesab, an outstation of Antioch, in the house he had built, and the funeral services were held in the large and pleasant chapel, the erection of which he had superintended. His remains rest at the foot of Mount Cassius.

**PRASLIN.** See Seychelle Islands.

**PRAU, ANDREW T.:** Born at Black Rock, near Buffalo, N. Y., February 22, 1826; graduated at Yale College, 1847; studied one year at Union Theological Seminary, New York, and two in New Haven; pursued medical studies at the New York College of Physicians and Surgeons; ordained August 22, 1852; sailed on January 10 the same year as a missionary of the ABCFM in Turkey. His first station was Aintab, but he removed to Aleppo in 1856 and to Marash in 1859. In 1868 he was transferred to the Western Turkey Mission, and removed to Constantinople, the seat of his labors, especially with Dr. Rigs, in the work of revising the Turkish Scriptures, in the hope of securing a uniform version for both Christian and Muslim readers. He died December 5, 1872. His grammar of the Turkish, partly a translation of a Turkish work and partly his own, is proof of his proficiency as a Turkish scholar. In fact, he was a distinguished scholar, with extensive general information. He was fond of music and had a poetic taste. He was, therefore, an excellent hymnologist, and wrote original hymns in Turkish, as well as translating others from the English. He was a good physician, and trained several native Armenians as physicians, who became useful in the medical profession.

**PRESBYTERIAN CHURCH IN CANADA:** Home and Foreign Missions of: In June, 1875, the four Presbyterian churches of Canada—two were in the Maritime Provinces and two in the Western Provinces—met in Montreal and constituted the "General Assembly of the Presbyterian Church in Canada," to take up and prosecute the home and foreign missionary operations of the several churches of the churches. In 1875 a church had sent Rev. John Geddie to commence work in the New Hebrides. For many years this New Hebrides work absorbed the interest of the church, but in 1869 another Nova Scotian, Rev. John Morton, commenced work in the island of Trinidad, and three years later George Leslie Mackay, of Toronto, went to North Borneo. About the same time some Canadian women had gone as missionaries to India, and when the organization was completed these four missions were in operation. Work in China was commenced in 1887, Demerara 1896, Korea 1903. As early as 1866 special efforts were made for the North American Indians, and in 1891 the needs of the Chinese in Canada were recognized.

1. **New Hebrides:** After the efforts of the LMS in the New Hebrides, and the martyrdom of John Williams at Eromanga, work in these islands was confined chiefly to occasional visits by the LMS missionary ship until 1848, when the Nova Scotia Presbyterian Church sent Rev. John Geddie to settle at Anetum. The Secessions and Reformed Presbyterian churches of Scotland, had, for a long time, a deep interest in the field, and sent Rev. John Inglis and Rev. John G. Paton to take up the work. The Canadian Presbyterians have been from the beginning a strong element in the New Hebrides Mission Synod, made up of representatives of eight Presbyterian churches. In the apportionment of mission work, between the Eastern and Western divisions of the Presbyterian Church, these islands, very naturally, fell to the Eastern division. As its share of the work it reports (1903) on the three islands of Santo, Efate, and Eromanga 8 missionaries, and 3 churches with 400 members.

2. **Trinidad and Demerara:** In 1869 the Rev. John Morton, a minister of the Presbyterian Church of Nova Scotia, who, having visited Trinidad for the benefit of his health, noticed the deplorable condition of the imports among the people, and attended the Tuesday evening services to go and establish a mission for their benefit. In 1871 he was joined by the Rev. Kenneth J. Grant, who is now at San Fernando, a considerable town on the island, and from time to time the mission has been reinforced and in 1896 was extended to include Demerara. This also is under the care of the Eastern division, and reports in the two fields 18 missionaries, 72 native workers, 9 churches with 917 communicants. Special attention is paid to education, and there are 35 schools with 5,095 pupils.

3. **Formosa:** The Mission in Northern Formosa has been one of the Church’s most successful enterprises. It was commenced in 1872 by Rev. George Leslie Mackay, a native of Oxford County, Ontario. In 1875 he was joined by Rev. J. B. Fraser, M.D., and subsequently by Rev. Kenneth F. Junor, now of New York. At present the Rev. John Jamieson, of Ontario, is associated with Dr. Mackay. Dr. Mackay married a Christian Chinese lady, who was very helpful to him in gaining the attention of the women and in superintending the girls’ school. His efforts to train a native agency and his custom of taking with him on his journeys his class of young men proved most effective, and, while he had most able associates, the success of the work, both among the Chinese and the Pehoohan, was largely due to him.
The 4 missionaries (1903) and 57 native workers had the care of 27 churches and 61 outstations, with 2,037 communicants. Oxford College, at Tamsui, had over 50 students.

4. Central India: Previous to the union of 1875, the Presbytery had broken ground in India by sending thither female missionaries who were associated with a mission of the Presbyterian Church of the United States. In 1875 Rev. James Fraser Campbell, of Nova Scotia, was sent to Madras. About the same time, the Rev. James Douglas MacGregor, son of Rev. D. MacGregor, Indore, Central India, situated about four hundred miles west by north from Bombay. From that beginning the work has developed until (1903) 7 stations are occupied by 47 missionaries and 88 native workers. There are 7 churches with 418 communicants, and in the 12 schools of all grades are 1,152 scholars. Medical work and work among the Bhils, and for the famine children, have received special attention. In 4 hospitals over 20,000 patients are treated.

5. China: This mission was begun in 1838, by the appointment of the Rev. Jonathan Goforth and Dr. Donald MacGillivray, graduates of Knox College, Toronto, the Rev. James Smith, M.D., of Queen's College, Kingston, and Mr. William McClure, M.D., who was ordained as an elder and designated as a medical missionary to th is field. The year following three students of the Presbyterian College, Montreal, were ordained and set apart as missionaries to Ho-nan, viz., Messrs. Murdoch Mackenzie, John Macdougall, and John H. MacVicar, a son of the principal of the college. The General Assembly of 1839 authorized the formation of a Presbyterian Church in Hunan, which was accordingly constituted on the 5th of December in that year. This is, perhaps, the first instance of a Presbyterian being formed before its constituent members had even reached the field of their prospective labors. This unique Presbyterian fellowship was met with not in Ho-nan, but in the adjoining province of Shan-tung, and then and there fixed upon desirable points in Ho-nan at which to commence missionary operations.

Subsequently Dr. MacGillivray removed to Shantung to take part in the work of the Society for the Diffusion of Christian and General Knowledge. In 1902, with a view to utilizing the wish of Chinese converted in Canada for work among their own people, a mission was started in Macao. The report (1903) shows in China 32 missionaries, with 12 native workers. There are 200 communicants, and in the 2 hospitals 2,150 patients were treated.

6. Home Work: Missions to the Chinese are carried on in Montreal and Toronto, and British Columbia, and to the Indians in the Northwest, Manitoba, Saskatchewan, Alberta, and to the Eskimos in the Arctic regions. In 1903, there were 12 missionaries in the former, and 61 in the latter work, reporting 50 and 375 communicants. In the Indian work some attention is paid to schools, there being 16 with 370 pupils, the great majority being in boarding schools. The woman's work of the Church is carried on by two Women's Foreign Missionary Societies, with headquarters at Toronto and Halifax, representing the Eastern and Western divisions of the Missionary Enterprise.

PREACHERS OF THE CHURCH OF ENGLAND, Foreign Missions: The Presbyterian Church of England, virtually founded in 1670, was the legal form of doctrine in 1641. After the time of Cromwell it gradually became the mere representative of the divided Presbyterian Church in Scotland, till 1776, when the congregations (in England) of the Free and United Presbyterian Churches united and formed the Presbyterian Church in England.

The Missionary Society was organized in 1847, and its first work was to send a missionary, Rev. Wm. C. Burns, to China. In 1865 it commenced work in Formosa, in 1875 in Singapore, and three years later in India. As the Scotch Church in England, whose work had been in China Mission, so, in 1902, it was resolved that the English churches should have a share in the Livingstonia Mission in Africa.

1. China: For the first four years after Mr. Burns' arrival in China, he worked at Hongkong, Canton, and the neighborhood, but in 1851 he visited Amoy on business, and was much impressed with the needs of this city, and the opening it gave for missionary effort, that he transferred his work there, and made it the first center of the organized labor of the Presbyterian Church of England. As the work grew, the Society was formed in 1853, the Rev. James Johnstone to join Mr. Burns; but in 1855 he was obliged to return home, and his place was filled by the Rev. Carsstairs Douglas, who, with the Rev. David Sandeman, was sent out by the Scottish branch of the mission.

The work has since developed, until it is now carried on in three districts: Amoy, including the stations of Amoy, Yung-chun (Engchhun); Tsuen-chau (Chinchew), and Changpu; Swatow, including Swatow, Chao-chau-fu, and Sua-bue; Hokkaid, including Wu-king-fu and San-ho (Sampo).

By an arrangement with the American Reformed Church, the native churches in the Amoy district are united in one presbytery, and the theological college represents both boards. The founding of an Anglo-Catholic College in 1868 indicates the interest felt in education, while the fact that the 9 medical missionaries, with 8 native assistants in the three districts, have treated over 20,000 patients, shows the attention paid to medical work. The report (1903) shows 16 ordained missionaries in the three districts (11 married), 9 medical missionaries (7 married), 4 missionary teachers (3 married), 25 missionaries of the Women's Association (including 3 physicians). There are 180 congregations, including 29 native pastors, and 5,666 communicants.

The Mission suffered from the general disturbance in the Boxer rebellion, but has also shared in the renewed interest manifest since.

2. Formosa: This Mission was commenced in 1865. By arrangement with the Canadian Presbyterian Board, that mission occupies the parts of the island north of a line a little above the 24th parallel of latitude, while the English Board cares for the southern section. This is divided into 6 districts with 79 congregations, of which 34 have trained preachers, 2,325 adult members, and 10,620 candidates preparing for baptism. There are 5 ordained missionaries (3 married), 3 medical missionaries (2 married), 1 missionary teacher (married), 3 missionaries of the Women's Association. The college at Taerian, with 53 students, and the pressroom are influential agencies. Since the enforcement of the occupation of the island, the work of the Mission has been made easier. The Japanese officials have manifested interest in the work, and the restric-
tions in regard to opinion have been helpful. The Mission in the Pescadores Islands is carried on by the native church, at its own expense, tho under the patronage of the Mission Committee of the Church.

3. Singapore: Work among the Chinese who came to the Straits Settlements was commenced in 1875, but the first ordained missionary went out in 1881. The work has since developed among the Babas, and there are now under the superintendence of the one ordained missionary the same (married) 12 congregations, including 2 pastors, with 7 native preachers, 240 communicants.

4. India: Work in Rampur Bealia, in Bengal, was begun by the Rev. D. Morrison in 1878, and has (1903) 1 ordained and 2 medical missionaries (1 married). The chief work is medical, nearly 8,000 patients having been treated.

The Women's Missionary Association, organized in 1878, cooperates with the Foreign Mission Committee of the Church, and there is also a Students' Missionary Society, of the Presbyterian Church of England, organized in 1878 for general assistance in the work.

ORGAN: Monthly Messenger; of the Women's Association: Our Sisters in Other Lands.

PRESBYTERIAN CHURCH OF IRELAND,
Foreign Missions: Headquarters, 12 Man, St. George's Churchyard, Belfast, Ireland. In 1840 the "Synod of Ulster" and the "Secession Synod" became united under the name of the "General Assembly of the Presbyterian Church in Ireland." Led by Dr. Duff's eloquence and a missionary survey which Dr. John Wilson, of Bombay (both of the Free Church, Ireland), had made of the states of Kathiawar, they chose India for their first field and sent out as their first missionaries the Revs. A. Kerr and J. Glasgow. These men had not offered themselves for the service, but had been chosen and called upon by the Assembly's Committee to undertake it. As this mode of obtaining missionaries was deemed by them preferable to the ordinary practice of receiving voluntary offers of service, they recorded it, "that it may serve to be a precedent in all time to come."

The mission, proceeded to Kathiawar in Gujarat and located in Raj Kot, one of the principal towns. As reinforcements arrived other places were occupied, including Gogo (1841), Surat (1846), Borsad (1860), Ahmadabad (1861), Anand (1877), Broach (1887). In 1909 there were 43 missionaries, 251 native workers in 13 stations and 18 outstations, 674 communicants, 120 schools with 6,929 pupils. The medical department is carried on by 5 physicians, of whom four are women.

China: The work of the Irish Presbyterian Church in China was begun in 1879 in the province of Manchuria, North China. Their earliest station was New-chwang, from which, as a center, itinerating journeys were made over all the province to the far north. The work is carried on in close proximity to and fraternal cooperation with the United Presbyterian Church in the same regions. There were, in 1900, 28 missionaries, 195 native workers, occupying 9 stations, and 93 outstations, 1,589 communicants, 33 schools with 375 pupils, 6 physicians (one a woman), 5 hospitals and dispensaries with 12,761 patients. The work is supported by the Missions in Jersey, and in Germany; Colonial missions in Canada, Australia, and New Zealand, and Continental work in various parts of Europe.

The Women's Association for Foreign Missions to Women in the East, headquarters 119 University Street, Belfast, Ireland, was organized in 1874 and carries on the women's work in connection with the Foreign Mission Board of the Presbyterian Church in Ireland.

PRESBYTERIAN CHURCH (North), U. S. A., Board of Foreign Missions: Foreign Missions were undertaken by the Presbyterian Church in the United States at a very early date. The "Society for Propagating Christian Knowledge," formed in Scotland in 1709, established in 1811 a "Board of Correspondents" in New York, by whom the Rev. Azariah Horton, a member of the Presbytery of New York, was appointed to labor as a missionary among the Indians on Long Island. The second foreign missionary for the Presbyterian Church was David Brainard, who was ordained by the Presbytery of New York, then meeting at Newark, N. J., June 12, 1744. In 1763 the Synod of New York ordered a collection to be made in all its churches for the support of the Indian missions, and in 1766 sent the Rev. Chas. Beatty and the Rev. George Duffield upon a mission to the Indians on the Muskingum River in Ohio. In 1796 was formed the "New York Missionary Society," independent of any presbyterian or other society, and it consisted principally of members of the Presbyterian Church. In 1807 the "Northern Missionary Society," like its predecessor an independent body and composed in part of Presbyterians, was instituted, and both were engaged in sending out missionaries to the Indian tribes for several years. In the year 1800, however, the General Assembly of the Presbyterian Church took up the work of foreign missions in a systematic manner. In 1802 the General Assembly's Standing Committee on Missions addressed a circular to all the Presbyteries under its care, urging collections for the support of missions, and making inquiries for suitable men to be employed.

In 1803 the Rev. Gideon Blackburn established a mission among the Cherokee Indians in Georgia. After eight years' labor Mr. Blackburn's health failed, the General Assembly was not able to fill his place and the Rev. Mr. Kingsbury, acting under the American Board, established himself in the Cherokee country and built up a flourishing mission. From 1805 to 1818 the General Assembly carried on work among the Indians in various directions, and with some degree of success; also from 1818, a new society, consisting of the Presbyterian, Reformed, Dutch, and Associate Reformed Churches, was formed, called the "United Foreign Missionary Society," whose object was "to spread the Gospel among the Indians of North America, the inhabitants of Mexico and South America, and other portions of the heathen and anti-Christian world," and until 1826 all the existing missionary interests of the Presbyterian Church were merged in this society. In 1826, when the Society had under its care nine missions, with a force of 60 missionaries, the whole work was transferred to the ABCFM, and the "United Foreign Missionary Society" ceased its operations.

Many Presbyterians desiring to prosecute foreign missions through the Church of their preference, the Synod of Pittsburg, which from its organization has always been in sympathy with the United Foreign Missionary Society, organized in 1831 the "Western Foreign Missionary Society," intended not for that synod alone, but for all others which might wish to unite with it.

Operations were at once commenced, and the
Society, organized for the purpose of "conveying the Gospel to whatever parts of the heathen and anti-Christian world the providence of God might enable it to extend its evangelical exertions," had already planned missions among the American Indians, in India, in Africa, and was contemplating work in China, when, in June, 1837, a Board of Foreign Missions was established by the General Assembly, to which the work of the Society was surrendered. At this point, the Society of the Presbyterian Church was divided, and the "Old School" continued its work through the "Board of Foreign Missions," while the General Assembly of the "New School" continued to prosecute its missions by its "Committee on Foreign Missions" through the ABCFM. Upon the reunion of the Old and New School Assemblies in 1870, the Persian, Syrian, Gabun and several Indian missions were transferred from the American Board, and since that period all the missions of the Presbyterian Church, with the exception of those carried on by the Southern churches, have been prosecuted through the Board of Missions of the Presbyterian Church.

The Board of Foreign Missions is simply a Permanent Committee of the General Assembly. The members, 21 in number, are appointed by the General Assembly, which possesses exclusively the general authority, supervision and control of the work of the missions, the Board being but a form of its executive agency. From 1838 to 1870 the Board was composed of 120 members, from whom an Executive Committee was appointed of persons residing in or near New York City, the Board's headquarters. At the reunion, the membership was reduced to fifteen, and the Executive Committee was dispensed with, and in 1900 the amended charter provided for the present number.

Development of Work: On its organization in 1837, the Board found one Presbyterian mission already established in India, where the Rev. John C. Lowrie and the Rev. William Ross had commenced work in Ludhiana in 1833. The next fall (1837) two missionaries were commissioned to open work for the Chinese, with headquarters at Shanghai. One was Rev. R. W. Orr, spent a month in Bangkok, and sent home an urgent plea for a mission to Siam, which was accordingly commenced in 1840, tho' by the failure of health of the missionary in 1844, work was not fully established until 1847. In 1856 work in South America was fairly inaugurated at Bogota, Colombia. Three years later the open door of Japan was entered and in 1860 the mission to Brazil was established. The next decade witnessed no new enterprise, but in 1870 on the reunion of the Old and the New School branches, three missions were started by the American Board—Syria (1819), Persia (1833), and Gabun (1842)—were transferred by that society to the Presbyterian Board. In this selection of the fields, regard was had to the special interest of the Presbyterian members of the ABCFM, as well as to the desire to extend the interest of the Church as much as possible. In 1872 the mission in Mexico was started, and in 1873 the work commenced by the American and Foreign Christian Union in Chili was taken over. Guatemala was occupied in 1882; in 1884 the Korean mission was started, and in 1886 that in Vietnam. Missionary, and in 1899 the Board entered with vigor upon the new opportunities presented by the Philippine Islands. The work among the North American Indians undertaken at different times and in different localities has been discontinued, passed over to local presbyteries, or to the Board of Home Missions of the Presbyterian Church in the United States.

Statement of Missions. I. India: The first missionaries of the Western Foreign Missionary Society, the Rev. John C. Lowrie and the Rev. Wm. Reed, reached Calcutta in November, 1833, and decided to locate in Ludhiana, the ancient capital of the north-west Provinces. Mr. Reed's health failing, Mr. Lowrie was left alone, but he was soon reinforced and other places were occupied until, when the work was transferred to the Assembly's Board in 1837, there were four stations, Ludhiana, Allahabad, Surrampur, and Sahibzada. The nature of the foundation work is indicated by the establishment of a mission press and the appointment of a practical printer as early as 1838. The Anglo-Vernacular High School here was the first started in North India.

(1.) Punjab Mission: From the first the attention was specially directed to the Punjab, and in 1846, after the first Sikh war, Jullundur was occupied, followed in 1848 by Ambala. Then came the second Sikh war, and almost on the heels of the British forces Messrs. John Newton and C. W. Forman entered into this field. From this time the Board's work, which they were identified for nearly half a century, and one of the fruits of which is the Forman Christian College, with a larger number of students than any college, government or missionary, north of Calcutta. Other stations have since been added—Dobhi (1853), with a fine Christian girls' boarding school; Hoshyarpore (1867), where the work is entirely under the control of native workers; Mussoorie (1847), a fine sanitarium in Landour, chiefly known through the Woodstock School, originally established for the children of missionaries, but later developed into a college; Ferozepore (1882) and Kasur. This mission, originally called by the name of its first station, Ludhiana, is now known as the Punjab mission. Its medical and leper work, as well as its educational and general work, has been pressed forward, and from the first it has had the hearty endorsement of the British officials, from Lord Lawrence and Sir Herbert Edwards to Lord Curzon. It reports (1903) 38 outstations, 65 missionaries, 22 native workers, 20 organized churches, 2,109 communicants, 50 schools, 4,878 pupils, 4 hospitals, and 8 dispensaries, with 41,847 patients. (2.) Furrukhabad, or United Province Mission: This was started in 1836, by the Rev. James McEwen, who while on his way to Ludhiana remained for a time at Allahabad to superintend the replacing of some lost parts of a printing press. This remains the chief station of the mission, well provided with educational and institutional instruments, a blind asylum, a leper asylum, as well as a printing press. Other stations are: Mainpuri (1843); Fateghar, with its native city, Furrukhabad (1844), notable as the only station where missionaries lost their lives in the mutiny of 1857; Fatehpur (1855); Etawah (1863); Morar, the capital of Gwahor, and the only station in a native state (1873); Jhansi (1890) and Cawnpore (1901). Aside from Allahabad and Furrukhabad, the work of this mission is more distinctively evangelistic. The report
(1903) shows 20 outstations, 174 native workers, 10 churches, 646 communicants, 89 schools, 1,779 pupils, 1 hospital, and 3 dispensaries, with 35,951 patients.

(3.) Western India Mission: This mission, lying in the Deccan, south of Bombay, was started in 1853 under the general Board of the ABCFM, by the Rev. Royal G. Wilder, who located at Kolhapur. Subsequently on the refusal of the ABCFM to approve some of Mr. Wilder's educational plans, he started an independent mission, which in 1870, at the time of the reunion, was accepted by the Presbyterian Board. Missions are in Ratnagiri (1873), the only station in British territory; Kodoli (1877); Sangli (1884); Miraj (1892); Vengurler (1900). The work of the mission is largely in the villages, and it has done much for the sufferers from famine. There is an industrial school with 42 famine laies at Vengurler, and the Brownie Orphanage, with 600 children, at Kodoli, as well as a hospital and leper asylum at Miraj. The report (1903) shows 12 outstations, 41 missionaries, 68 native workers, 7 churches, 1,180 communicants, 54 schools, 1,941 scholars, 2 hospitals, and 4 dispensaries, with 31,095 patients.

The special phases of work carried on through all the India missions are: the Zenana work, Christian literature, including Bible translation, commentaries, periodic literature, etc., medical and asylum work, educational work, higher and lower, work among the outcasts, and especially the development of a native church.

II. China: Three months after i.s organization, in December, 1837, the Presbyterian Board sent two missionaries, Revs. J. A. Mitchell and R. W. Orr, to commence work for the Chinese at Singapore. Mr. Mitchell died soon after reaching Singapore, and Mr. Orr was compelled by failure of health to return home. Mr. McBride, sent out in 1840, returned for the same reason in 1843. In the same year Dr. J. C. Hepburn and Mr. Walter Lowrie were sent out. They transferred the mission from Singapore to Amoy, reinforcements were sent to them, and a most important agency, the mission press, was established. A special appeal for funds was made by the Board, and as a result a large force of workers was sent to strengthen the mission, and Macao, Amoy, and Ningpo, now as we have seen, dropped. Amoy was afterward dropped, Canton took the place of Macao as a headquarters and Ningpo became the first station of the Central China mission.

(1.) Central China: This mission includes Ningpo (1844), Shanghai (1850), Hangchau (1859), Suchau (1871), Nanking (1876) and Hwai-yuen (1901).

Ningpo, one of the five ports opened in 1842, was entered in 1844 by Dr. McCarte. A few months later he was joined by a large force of missionaries, among them the Rev. W. M. Lowrie, who was in 1847 killed by pirates. The first convert was baptized in 1846, and a church was organized later in the same year. The girls' boarding school dates from 1846, the industrial school for women from 1861, and the Presbyterian Academy, for the sons of native Christians, and almost wholly supported by the tuition fees and the native churches, from 1881. The boys' boarding school was organized early in 1877, and was removed to Hangchau in 1877.

Shanghai, also one of the five ports, was occupied by Messrs. Culbertson and Wight in 1850. While other lines of work are efficiently prosecuted, the great work of this station is the Mission Press, one of the most powerful agencies in the Chinese Empire. It has furnished fonts of type for other Chinese and European presses, has done a large amount of Bible work, and published a number of periodicals, and now meets all expenses but turns in several thousand dollars a year into the mission treasury.

Hangchau, visited by Dr. Nevius (1859), but not occupied as a place of residence until 1865, has a fine academy for boys, with about 85 students and a new boarding school for girls. Suchau (1871) has always been the seat of special hospitality to foreigners, but the Tockner Hospital has done much to disarm this feeling. Other stations are Nanking (1876) and Hwai-yuen (1901). The report (1903) shows 37 outstations, 62 missionaries, 121 native workers, 20 churches, 1,841 communicants, 25 schools, with 961 pupils, 1 hospital and 3 dispensaries, with 3,712 patients.

(2.) Canton Mission: This was started at Macao, but Canton was occupied in 1845, and this was more than 10 years after the only station. In 1879 a chapel was opened at Hangchau, and in 1886 Yeung-kong was made a center of work. Hong-kau in the Hakka country was long visited by the missionaries and a church was organized in 1890, but it was subsequently deemed advisable to withdraw the missionaries and leave it under the care of a native pastor. The work in Canton has been successful, a number of churches having been organized, both in the city and the immediate vicinity. This is the seat of the Canton Christian College, founded in 1881, under the Rev. A. Roper, D.D., and the Rate Board of Trustees, but cooperating with the mission. It was at Canton also that Dr. Peter Parker in 1855 gave the first impulse to distinctively medical missions, and there is now a fine hospital owned by the Medical Missionary Society in China, the physicians are supplied by the Presbyterian Board. Other departments of educational, philanthropic and evangelistic work are carried on. The report of the mission (1903) shows 60 outstations, 31 missionaries, 117 native workers, 25 churches, with 3,834 members, 32 schools, with 2,928 pupils, 6 hospitals and 6 dispensaries, with 41,847 patients.

(3.) Hainan Mission: Mission work in the island of Hainan was begun in 1881 by Mr. C. C. Jeremiasen as an independent enterprise, but was taken up by the Canton Mission in 1885 and organized as a separate mission in 1893. There are three stations: Kuang Chow and Noda, both occupied in 1885 and Kachek (1902). The work is largely among the Loo tribe, aboriginal inhabitants, and offering some special attractions to missionary effort. But many Hakkas from the mainland have also been made. The report (1903) shows 5 outstations, 21 missionaries, 23 native workers, 131 communicants, 5 schools, with 152 scholars, 1 printing press, 2 hospitals and 3 dispensaries, with 14,932 patients.

(4.) Hunan Mission: The Canton Mission for many years looked toward the province of Hunan as one offering a fine field for work, but it was not until 1900 that the Rev. W. H. Lingle, Dr. H. W. Boyd and Dr. Leila M. Doolittle were authorized to open a station at Siang-tau. Then came the Boxer uprising and they were obliged to withdraw. They have since returned and a new station has been opened at Hsing-cho (1902). The work, still (1903) in its infancy, reports 10 mis-
sionaries, 2 native workers, 6 communicants, 1 school, with 12 pupils.

3. Peking Mission: Work in Peking was begun in 1863 by Rev. W. A. P. Martin, who withdrew from the mission in 1869 to take the presidency of the Imperial Lung-wen College, but has always been identified with the mission. As in the case of Canton, the work for many years was confined to the city of Peking, and was developed successfully there. The mission station was opened at Pao-ting-fu. The Peking mission suffered severely during the Boxer rebellion. The company of missionaries at Pao-ting-fu were massacred, including Dr. Taylor, Mr. and Mrs. Simcox and three children, and Dr. and Mrs. Hodge. The buildings in both stations were destroyed. Since the subsidence of the troubles the work has been resumed with energy and the report (1903) shows both stations occupied, 4 outstations, 29 missionaries, 211 communicants. Both school and medical work have suffered and are not yet fully reorganized.

(6.) East Shantung Mission, including the stations of Teng-chau, Chi-fu and Tsing-tau.

(7.) West Shantung Mission, including the stations of Chi-nan-fu, Wei-hsien, I-chow-fu and Chining-chow. For many years these two were included in one Shantung mission, afterward divided for convenience of administration.

The province of Shantung, the home of Confucius, Laotze and other Chinese sages, was first visited by the Rev. J. L. Nevius, who opened the station of Teng-chau in 1865, and that of Chi-fu in 1862. The next place entered was Chi-nan-fu (1872), followed by Wei-hsien (1882), I-chow-fu (1891), Chining-fu (1892) and Tsing-tau (1898). Severe famines in 1877 and 1889 occasioned the organization of relief work, which, under the general supervision of Dr. Nevius, who had become by extensive itineration personally known and respected all over the province, enabled the missionaries to gain a strong hold upon the people. Dr. Nevius made a thorough study of methods of mission work with special reference to the development of the native church, and in this respect he and his associates were most successful. Educational and medical work also were pushed, and the Teng-chau College is one of the best in China. The entire work was disorganized by the Boxer uprising, and churches and hospitals were destroyed, tho the college was uninjured. Thousands of native Christians lost their lives, but, largely through the skill and energy of Mr. Cornwell, the U. S. Consul at Chi-fu, the entire missionary force escaped in safety to Chi-fu. For many years this work has gradually resumed its former conditions and the report (1903) shows for the East Shantung Mission 71 outstations, 30 missionaries, 117 native workers, 46 churches, with 2,638 communicants, 48 schools with 770 pupils, 1 hospital and 2 dispensaries, with 5,350 patients. Stated figures for the West Shantung Mission are not complete, but as given show 158 outstations, 31 missionaries, 168 native workers, 15 churches with 3,952 communicants, 51 schools with 565 pupils, 3 hospitals and 4 dispensaries with 28,124 patients.

III. Siam and Laos. (1.) Siam Mission: The Rev. R. W. Orr on his way to Singapore in 1838 spent a month in Bangkok and sent back an urgent plea for a missionary to work among the Chinese. Rev. W. P. Buell arrived in 1840, but left in 1844 on account of ill health, and it was not until 1847 that Rev. Stephen Mattoon and Rev. S. S. House, M.D., were permanently established. For several years this work had to work very quietly because of the bitter hostility of the king, but the accession to the throne in 1851 of Prince Somdet Phra, who had been under the instruction of Rev. Jesse Caswell, of the ABCFM, made a great change. From that time the mission of Siam has been a triumph. For furnishing the government and repeatedly missionaries have been placed in positions of honor and influence. Special attention has been given to medical and educational work and the preparation of Christian literature, but also to touring, and a mission schooner, the Kalama zoo, is well known all along the coast. It was difficult, however, to secure results and it was not until 1859 that the first Siamese convert was baptized. Among the most important schools is one for girls, which numbers among its pupils a great many from the upper classes.

Other stations are: Petchaburee, occupied in 1861, Rababuree (1889), Pitsanuloke (1889), Nakawn (1900). In all the stations there has been much earnest labor, with comparatively small visible results. The enervating climate, to which so many workers have succumbed, the mobile, unretentive character of the people, whose unthinking acquiescence is more discouraging than opposition, are obstacles to be overcome only by great faith and endurance. In no mission of the Board has the effort to secure self-support been more earnestly and successfully pushed, and with so much opposition. In Petchaburee, the boarding schools were closed and many individuals who had been employed or assisted by the Mission withdrew when obliged to depend upon themselves. The recent revival of interest in Buddhism does not seem as yet to have affected the work greatly. The presence of some strong self-supporting churches is a pledge of future success. The report (1903) shows 7 outstations, 29 missionaries, 25 native workers, 9 churches with 430 members, 6 schools with 437 pupils, a printing press, 3 hospitals, and 4 dispensaries with 7,530 patients.

(2.) Laos Mission: The missionaries in Siam were led to consider the claims of the Laotian tribes who occupy the hill country in the north of Siam, by encountering a settlement of Laos refugees near Petchaburee. In 1864 a deputation visited Chiang Mai and three years later Rev. Daniel McGilvary and Rev. Jonathan Wilson opened a permanent station there. Success was more rapid than among the Siamese and there were several conversions within a few months. Then followed bitter persecution and the work was checked, but received a new impulse until 1878, when in consequence of the bitter opposition of the people to Christian marriage without the usual ceremonies of devil-worship, appeal was made to the king of Siam for a proclamation of religious liberty to the Laots. From that time the work progressed rapidly. The general policy of the Mission, based on the experience of other missions, has been from the beginning to throw the responsibility of maintaining the missionaries on the people whenever the result that the evangelistic work is now virtually supported by Laotian Christians, including a foreign mission to the Ku Mu tribe across the Me-kong in French territory. There has also been a comprehensive scheme of education, a
mission press established and the medical work has been one of the most effective agencies in disarming opposition and reaching the people. Other stations occupied are Lakawn (1885), Muang Pré (1893), Nan (1894), Chiang Rai (1897). Lampun was occupied in 1891, but on account of its proximity to Chiang Mai it was opened at that station.

The Mission is anxiously looking forward to work among the other Laos tribes, particularly those in French territory, but is hampered by the objections of the French Government. The report (1903) shows 23 outstations, 40 missionaries, 26 native workers, 16 churches, with 2,706 communicants, 17 schools with 300 pupils, 4 hospitals and 4 dispensaries with 7,632 patients.

IV. South America: The first mission work of the Presbyterian Church in South America was undertaken in Buenos Aires in 1827, but was soon abandoned; another attempt in 1853 was also without permanent results. In 1856 a missionary was sent to Colombia, reaching Bogota in June. The next step was to Rio de Janeiro in 1860. In 1873 work which had been established in Chile in 1850 by the American and Foreign Christian Home Mission Board, was united with the Presbyterian Board, and that again was followed in 1897 by the opening of a station in Caracas, Venezuela. The work in Brazil developed so that a division seemed best into Central and Southern Brazilian Missions.

1. Colombia: The early years of this mission from its commencement in 1856 were times of great difficulty on account of opposition of the Roman Catholic Church. The revolution in 1860, however, threw the government into the hands of the Liberals; the Jesuits were banished; monasteries and churches were given over to mission work, and received a new impulse. The mission has never had the success apparent in some of the Asiatic fields. Not only is there bitter opposition on the part of ecclesiastics, but the intelligent classes are largely indifferent or skeptical; the poorer people very ignorant. Bogota was the only station for a number of years, then in 1888 Barranquilla was occupied, followed by Medellin in 1889. The report (1903) shows 16 missionaries, 11 native workers, 3 churches, 181 communicants, 4 schools, 220 pupils.

2. Brazil Mission: The first missionary to Rio de Janeiro, Rev. A. G. Simonton, was peculiarly qualified for pioneer work in such a country, and to his wisdom and scholarly qualities is largely due the success of the work. Three years later the city of Sao Paulo was occupied, and made the center of the educational and publishing work, which have been two of the most important departments of the mission. In 1886, Horace M. Lane, M.D., was put in special superintendency of the educational work, and under his lead Mackenzie College has been developed into a most influential institution. Other stations at present occupied are Curitiba (1885), Novo Friburgo (1891), Florianopolis (1898). Work has also been done in Rio Claro and in Brotas. The strongest churches are those in Sao Paulo, which grew up under the care of Dr. G. W. Chamberlain. But throughout the mission there has been excellent evangelistic work done. The report (1903) shows 40 outstations, 13 missionaries, 4 native workers, 29 churches, 3,107 communicants, 26 schools, 762 pupils. (Some of these figures are incomplete.)

3. Central Brazil Mission: This field includes the states of Bahia, Sergipe and parts of others. The stations are: Bahia (1871), Cachoeira (1873), Sergipe (1876), Vila Nova da Bahia (1894). Work in this section has presented unusual difficulties, yielding less fruit than any other of the mission fields in Brazil, owing partly to the population, principally made up of blacks and their descendants, and partly to the power of the ecclesiastical element. The hope is to extend the work into the interior provinces, inhabited exclusively by Indians, some independent tribes, others semi-civilized and varying greatly in character. Appropriations were made in 1899 for this work, but Mr. George Witte, who was assigned to it, and an associate, were both smitten by fever, and it was for the time being postponed. The report (1903) shows 39 outstations, 13 missionaries, 4 native workers, 7 organized churches, with 467 communicants, 11 schools with 400 pupils.

In 1888 the missions of the Northern and Southern Presbyterian churches were united in the Synod of Brazil, which meets every three years and is entirely independent of the General Assemblies in the United States. The Synod has a vigorous Home Mission Society, and supports a theological seminary at Sao Paulo. At its triennial meeting in 1900 a membership of 7,000 communicants was reported, a gain of 10 per cent. in the three years. In view of the excellent work of this Synod, the American societies are reaching out toward the distant regions as yet unevangelized.

4. Chile: The first American missionary in Valparaiso was the Rev. D. Trumbull, representing the Seamen's Friends Society, and the American and Christian Foreign Union. He labored chiefly for the English-speaking people; others came to enter upon Spanish work. A Spanish paper was established, and a school and orphanage conducted. The Presbyterians took charge of it in July, 1873. Other stations are: Santiago, occupied first in 1861; Concepcion (1876); Talca (1879), Copiapo (1888). Aside from the educational, publication and general evangelistic work, much has been done in the outlying sections, and in the mining regions. The work in Chile has shared in the change that has come over so many of the Southern American states, the control of Liberals, and in 1888 the mission received a special charter. The report for 1903 shows 34 outstations, 12 missionaries, 29 native workers, 10 churches, 522 members, 4 schools, 560 pupils.

5. Japan: While the Christian Church was watching the opening of Japan, the Presbyterian Board requested Dr. McCartee, a missionary in China, to visit that country and make inquiries preparatory to mission work. He was, however, unable to reach Japan, and as the treaty opening the ports (1856) and the new Viceroyate (1859) and the opening of Yokohama in 1859, in the previous April, the Board commissioned Dr. J. C. Hepburn and wife, formerly of China, to enter the country. They reached Japan early in October and settled at Kanagawa, a few miles from Tokyo. The Buddhist temple was obtained as a residence, the idols were removed, and the people were found to be civil and friendly. There was, however, constant surveillance, and aggressive work was scarcely possible. Meanwhile, there was opportunity for studying the language, and Dr. Hepburn devoted himself to it, laying the foundation for
a translation of the Scriptures and a Japanese-
English Dictionary, the first edition of which
was published in 1867.

In 1862 the station was moved to Yokohama,
and a mission house and hospital were opened. 
Other missionaries were also engaged in this field of work. In February, 1869, three converts were baptized. During this decade, also, occurred the political revolution which changed the entire policy of Japan toward the outer world, and which brought into prominence as leaders several young natives who came under the influence of Dr. Hepburn, and Dr. Verbeck, of the Reformed Church in America, and others.

In January of 1872 a week of prayer was observed by all of the missionaries and English-speaking residents of all denominations in Yokohama, and the result was a great manifestation of spiritual life. Two years later there were still more marks of divine favor. Churches were organized, and the Presbyterian and Reformed Missions worked together in cordial sympathy and moved forward in the initiation of these two missions, together with that of the United Presbyterian Church of Scotland, which resulted in the organization of the United Church of Christ in Japan, an independent self-governing Japanese Church, in which the missionaries were only advisory members. An effort, in 1889, to unite the Congregational churches with this body failed, and soon after the term "United" was dropped from the title.

In 1877 a Union Theological School was organized, and a Union College in 1883. In 1886 these were united, and with the special department then organized became the Meiji Gakuen, "College of the Era of Enlightened Principles."

The unprecedented advance of these years was followed by a reaction of intense prejudice against foreigners and foreign teaching, which again was largely overcome by the bearing of the Christians during the war with Japan, and has been more recently followed by a renewed increase of interest.

(1) Eastern Japan Mission: The work commenced at Yokohama has resulted in two self-sustained mission stations. But the headquarters of the mission were changed in 1869 to Tokio, the capital, where the first church was organized in 1873. The mission work includes open-air evangelistic work, a Training School for Bible Women, a Girls' Boarding School, and a Training School for Nurses. Other lines of work connected with this mission include the work in Hokkaido and the Kurile Islands. The headquarters of this section are at Sapporo (1887), but several other places are occupied. In one, Oaru, the work began as a Sunday school for the fishermen's children. There is now a church and an excellent school, with two kindergartens and three Sunday schools. The report in 1903 shows 24 outstations, 31 missionaries, 59 native workers, 8 schools with 882 pupils.

(2) Western Japan: The first station occupied on the Western coast was Kamagawa, by Rev. T. W. Winn, in 1879. At that time, so far as known, there was not a single Christian living in these provinces. To-day every important city has its groups of Christians, and a number of vigorous churches. The next station to be occupied was Tokyo (1871), followed by Kioto (1887), Kiushiu (1890), Yamaguchi (1891), Fukui (1891), Matsuyama (1901). In all of these places the mission work includes evangelistic and educational departments, and Hiroshima is peculiarly attractive for its opportunities for work among the soldiers and sailors. Educational work at Kioto is especially interesting, with the mission house of Kokuryo Club, the result of which is to make to the neighboring island of Kiushiu. The report for 1903 shows in Western Japan, 29 outstations, 30 missionaries, 77 native workers, 8 schools, 463 pupils. The church statistics for both missions are 36 churches, 6,825 communicants and 9,992 members.

VI. Africa. (1) Liberia: Presbyterian work in Liberia was commenced in 1833 by Rev. J. B. Pinney, especially for the aborigines, and stations were established along the Kruo coast near Cape Palmas. The climate proved so fatal that the experiment was tried of sending colored ministers, but it was found that these were not excepted from fever, and lacked the ability to organize and superintend. Other white men were sent out, including Rev. D. A. Wilson, and among the colored men Rev. E. W. Blyden, and several new stations were occupied. In 1857 there came a great enlargement through reorganization. As the Methodist, Lutheran, and Protestant Episcopal churches have successful work in that region, the Presbyterian Board in 1894 decided to withdraw, and by 1890 had transferred all its interest to the Presbyterian of West Africa, including 15 churches with about 400 members.

(2) West Africa: In 1842 the ABCFM occupied the station of Baraka in the Gabun district, sending out Rev. J. L. Wilson, Rev. Benjamin Griswold, Rev. Albert Bushnell, and Rev. William Walker. Eight years later the Presbyterian Board established a station on the island of Corisco, sending out Rev. J. L. Mackey, Rev. C. De Heer, and Rev. Ibis J'Ikegko. On the union of the old and new school branches, in 1870, the mission of the ABCFM was transferred to the Presbyterian Board, and the station became known as the Gabun and Corisco Mission. Subsequently, on the extension of the work into the interior among the Fang tribe, the name was changed to the West Africa Mission.

The work of the American Board was extended to several stations, and there was great success among the Dikele people, but the occupation of the coast by the French brought special restrictions, and the unhealthy climate and the hostility of the people combined to reduce the work so that there remained but the one station at Baraka at the time of the transfer. Similarly the work in Corisco suffered from the Spanish Government (which forbade the teaching of any religion except the Roman Catholic), the unhealthy climate and the tribal quarrels, and there, too, the four stations were reduced to one, the native church is a strong one.

In 1865 the Rev. George Paull founded Mbane station on the Benito River, north of Corisco, and on his death, after thirteen months, the work was taken up by Rev. R. H. Nassau, the patriarch of the West Africa Mission. There are now to be occupied stations on the Ogowe River, south of Corisco; and Mr. Nassau opened a station at Belambila (1874), which was later (1876) removed to Kangwe. In pursuance of a plan to form a line of stations to the Congo, Talaguga was occupied in 1882 and three years later Rev. A. C. Good established a station. By this time new stations were organized and the mission was progressing favorably when the interference of the French
Government, forbidding any language but French in the schools, and hampering the evangelistic work, became so serious that the Board decided in 1892 to transfer its work to the Paris Evangelical Mission Society.

Then came the development on the North. Batanga, at first an outpost of Benito, was made a regular station in 1889, and to this station was transferred the work which had been commenced on the Ogowe River. Under the General Board, Gombe was opened in 1891, and Dr. Good's explorations and the long experience and faithful service of several of the missionaries who have been identified with the mission from its beginning are bearing fruit. Baraka and Benito still remain as centers of work, but the station at Abeih includes Efufen (1893), Elat (1895), MacLean Memorial Station, Lolodorf (1897). This last station is the result of a report by Dr. A. C. Good of a visit to the dwarfs. Miss Margaret MacLean, of Glasgow, Scotland, had become interested in these people, through the letters of Captain Harper's, and offered to support a mission among them, under the auspices of the Board. The work is extremely difficult because of the climate, the diversity of languages, and the timidity of the little people.

The report (1893) shows 65 outstations, 34 mission houses, 50 native workers, 13 churches, 1,716 communicants, 22 schools with 984 pupils, 2 hospitals, and 2 dispensaries with 1,900 patients.

**VII. Syria:** Mission work in Syria was commenced under the ABCFM, by Pliny Fisk and Levi Parsons, who went to Jerusalem in 1821, but were unable to stay there. In 1823 Messrs. Bird and Goodell arrived at Beirut, and except for a time when (1825-1830) they withdrew to Malta on account of political disturbances, this has been the center of mission work. The other stations were opened in the Abash (1843), Tripoli (1848), Sidon (1851). After the transfer of this mission from the ABCFM to the Presbyterian Board (1870) an extension of work into the Lebanon was planned and the station of Zahleh opened in 1872.

In the years that special attention has been paid to education and publication. Messrs. Bird and Goodell brought with them a printing press and immediately commenced translation and publication. Dr. Eli Smith commenced a translation of the Arabic Bible, completed by Dr. C. V. A. Van Dyck, which is one of the finest in existence. Schools were established in Beirut in 1824, including one for girls. From these have grown seminaries in Beirut, Sidon, and Tripoli, while the Syrian Protestant College at Beirut is one of the finest educational institutions in mission lands. Not organically connected with the mission, it has always, nevertheless, been in closest sympathy with evangelistic work.

Medical work under the lead of Drs. Van Dyck and Post has from the first had a prominent place. The medical department of the college has furnished physicians for the entire Arabic-speaking sections of Western Asia and Northern Africa.

Evangelistic work has been always rendered difficult by the peculiar situation of the country, the rivalry of the different communities, the hostility of the Mohammedans, and the Hindus and Catholics, especially the Jesuits, who have taken advantage of French influence in Syria to hinder, so far as possible, the work of Protestant missions. The churches have suffered also from emigration. Still there has been good progress and the advance in the number of communicants from 294 in 1870 to 2,542 shows good results. The report for 1893 shows 107 churches and stations, 19 native workers, 29 churches, 2,642 communicants, 108 schools, 5,982 pupils, 1 hospital, and 1 dispensary with 5,622 patients, while the press issued 23,395,410 pages.

In this last item appears a hint of what is, after all, the greatest work of the Syria Mission. As a center from which the whole Arabic-speaking world may be reached, the fruits of labor here are found all over Asia and Africa, and in the East Indies. In scarcely any other mission in the world do the actual, immediate returns, as given in statistical tables, give so meager a view of the real extent of the work.

**VIII. Persia:** The first American missions to Persia grew out of a visit of Messrs. Eli Smith and H. G. O. Dwight of the ABCFM in 1829. On their representations that Society determined to establish a mission in Persia for the Nestorians, and apprised the Mission Committee of their intention. He sailed in 1833 and reached Tabriz a year later. In 1835 he was joined by Dr. Ashel Grant, and a station was established at Urmiya, in November, 1835. One of the most intelligent of the Nestorian bishops, Mar Yohanan, gave Mr. Perkins permission to establish a school. His school was opened very soon, and other helpers were added after a few years, among them, in 1843, Fidelia Fiske, who came to take charge of the Girls' School. For some years there was considerable discouragement, but then came a revival, and for twelve years it continued, the number of converts being very large. At first the effort was to reform the old Church, but a separation became absolutely essential, and in 1862 the first Conference was held, and a confession of faith adopted, as also rules, discipline, etc. In 1870 this mission was transferred from the ABCFM to the Presbyterian Board, and then commenced a policy of extension. Teheran was occupied in 1872, Tabriz in 1873, Hamadan in 1880. Distance between the stations and the nationality of languager in the language of the mission into two missions, a Western and an Eastern, Urmiya and Tabriz constituting the former, and Teheran and Hamadan the latter.

(1) **Western Persia Mission:** The work in Urmiya is chiefly among the Nestorians of that city, the surrounding plains and in the Kurdish Mountains. It is the seat of a college, originally established at Mt. Seir, and for which David Tappan Stoddard did much; more lately removed to a fine location in the plain near the city. This college has exercised a great influence throughout the entire section. Fiske Seminary also has become well known throughout that whole region. The missionary press established here has been successful, and the work of Bible translation and the preparation of Christian literature commenced by Dr. Perkins, and more lately carried on by Dr. Benjamin Lubaroe, has been very effective. Medical work has always been prominent. Originally started by Dr. Grant, and carried to a high success with a hospital and a training school by Dr. Cochran, it has been one of the most effective agencies employed in the field. The greatest portion of the mission have been its protectors in times of stress. The greater number of churches connected with the Nestorian work are in the plain, but there are quite a number through the moun-
tains, extending across the Turkish border into Mesopotamia. For a time the work among the Syrians of Mosul was taken over by the Presbyterian Board from the ABCFM, but was afterward transferred to the CMS on account of the great distance, the difficulty of access, etc. The work in Tabriz, as also in the outstation of Shamakhi, had been continued by one of the CMS missionaries, for the Muslims has been carried on with some success, altho the number of converts is not great. The mission has felt the hostile influence of Russian officials, as Russian political power has developed in North Persia; also the unfortunate effect of the number of independent workers, who have won support from Plymouth Brethren, German Lutherans, and others.

The report (1903) shows 117 outstations, 28 missionaries, 178 native workers, 21 churches with 2,653 communicants, 99 schools with 2,279 pupils, 3 hospitals and 2 dispensaries with 26,312 patients.

(2.) Eastern Persia Mission: The city of Teheran was occupied in 1872 by the Rev. Jas. Bassett, after an extended tour, including Tabriz, Teheran, and Hamadan. Educational and medical work has been carried on successfully, and the recognition of the physicians by the Government has been one element in securing a considerable attendance of Mohammedans in the school for boys. From Teheran tours are made to Kazvin and Resht (on the Caspian) and occasionally to Meshed, one of the Muslim holy cities. Hamadan was first visited by colporteurs from Urmia in 1869, made an outstation of Teheran in 1872, and a station in 1880. The work in both Teheran and Hamadan is chiefly among the Armenians; but at Hamadan there is a Jewish church. The report (1903) shows 5 outstations, 24 missionaries, 44 native workers, 4 churches, 244 communicants, 6 schools, 513 pupils, 1 hospital and 4 dispensaries with 8,393 patients.

IX. Mexico: In 1872 the General Assembly voted to open work in Mexico, and in September of the same year Messrs. Thomson, Phillips, and Pitkin, with their wives, went to Mexico City. There they found a large body of Mexican believers of anti-prelatical convictions, gathered in nine independent congregations, largely the result of the work of Miss Rankin, Mr. Riley and others, who were a joint agent of the different missions that entered the country and furnished the nucleus for their work. The next year Zacatecas and San Luis Potosi were occupied, then Saltillo (1884), Zitacuaro (1883), Chilpancingo (1894), Jalapa (1897). The work in Saltillo is the immediate successor of Miss Rankin's work at Monterey. The story of the mission contains many incidents of great heroism, in bitter persecution, especially in Guererro and Zitacuaro. Educational and publication work has had a prominent place, and the press at Mexico City has been a most effective evangelistic agency. For a time there were two missions, Northern and Southern. In 1884 these were united, and the native churches have been organized in three presbyteries, Zacatecas, Mexico City and the Gulf. The Mexican Home Mission was organized in 1890 by the Presbyterian Board of the City of Mexico, supports two evangelists in Guererro and Mexico.

The report (1903) shows 146 outstations, 23 missionaries, 81 native workers, 45 churches, 3,002 communicants, 29 schools, 683 pupils.

X. Guatemala: Work was commenced in Guatemala in 1882 in response to special appeals for Protestant teaching and the assurance by President Barrios of sympathy and full freedom of action. The first work of the Rev. John C. Hill was the organization of a church for the Europeans and Americans. This has since been united with the church at Resht, and a little later work in Spanish was commenced, Rev. E. M. Haymaker, formerly of Mexico, assisting greatly in the undertaking. School work has also been established. While no other station than that at Guatemala City has been opened much good has been done in the various outstations among them Quezeltango and San Augustin. Everywhere there is the greatest opportunity. There is absolute religious liberty, and even many loyal Roman Catholics welcome Protestant missions as an agent for the purification of their church. The report (1903) shows 12 native and 44 Presbyterian churches with 85 communicants, 1 school with 38 pupils. The climate has proved difficult, and the missionaries who have built up the work were compelled to return, their places to be filled soon by others.

XI. Korea: The first mission work in Korea was by Messrs. Ross and McIntyre, of the Scotch United Presbyterian Mission in Manchuria. A number of conversions resulted, and it was evident that a good basis for mission enterprise existed. In 1880 a Korean of high rank, representing the Government of Japan, became a Christian and begged earnestly for missionaries for his country. In response to this appeal, the Presbyterian Board, in 1884, appointed Dr. H. N. Allen, then a medical missionary in China, to go to Korea. He was appointed physician to the United States Legation at Seoul, and thus was assured safety and favorable reception. His influence soon became very great, and he was received as physician to the royal household and placed in charge of the Government hospital.

Some months later Dr. H. Bassett and Rev. C. Underwood joined the mission. For several years the work was chiefly medical and literary. The first convert was baptized in 1886, and the first church organized in 1887. After 1890 the advance was marvelously rapid. In the "Presbyterian Council" including the two Presbyterian Missions from the United States, the one from Canada, and the Woman's Union of Victoria, the number of catechumens and adherents was over 22,000 in 1903. The opportunities for direct preaching have so absorbed the energies of all that the schools have been less prominent than in some other missions, yet there is a well-established system of education. Medical work has developed so that there are three hospitals at Seoul, Fusun and Phien-yang, all powerful evangelistic agencies. In addition to the work at Seoul, the stations have been opened at Fusun (1891), Phien-yang (1893), Taiku (1898), and Syen-chun (1901).

At the time of the terrible cholera epidemic in 1895, the missionaries of all the Boards turned their attention to hospital work, and were not met by many lives, but to overcome much of the hostility to mission work. The work among the women has from the beginning had phenomenal success, and the general indications for permanent church life are most satisfactory.

The report in 1903 shows 340 outstations, 64 missionaries, 140 native workers, 3 organized
churches (312 incompletely organized churches), 5,481 communicants, 66 schools, 1,082 pupils, 2 hospitals and 5 dispensaries, with 2,824 patients.

The printing press at Seoul has done most excellent work, issuing over 400,000 pages.

XII. The Philippine Islands: Immediately after the Philippine Islands passed into the hands of the United States, the Presbyterian Board took up the question of sending missionaries there. The Rev. J. B. Rodgers, who had already had experience in Spanish work, was sent to Manilla in 1899. Jiloio, on the Island of Panay, was occupied in 1900; Dumague on, on the Island of Negros, in 1902. As was natural, there was at first a marked interest in the work; then followed somewhat of a reaction, but the later reports show that the congregations are developing steadily in numbers and in earnestness. The very generous gift in the unbounded wealth of the United States makes it a little difficult to secure self-support in the native churches, but the progress is encouraging and the opportunity, as one of the missionaries expressed it, is "for all there is in a man." Especially attractive is the field among the young men. Efforts were made to arrange some apportionment among the different missionary societies, but not with the greatest success. The work done in India and in Japan by preachers from this country led to a visit by Dr. George F. Pentecost, to the Philippines in 1902, the results of which are most gratifying, not merely among the natives, but in the American community. The hostility or lack of interest on the part of American officials, of which something has been made, has been more apparent than real, in consequence of the peculiar religious situation.

The report of 1903 shows 28 outstations, 15 missionaries, 32 native workers, 10 churches, 469 members, 2 schools with 234 pupils, 2 hospitals, 635 patients.

The mission work on the women of the Presbyterian Church (North) is carried on through seven societies, all auxiliary to the Board of Foreign Missions of the Presbyterian Church in the U. S. A. These are:

1. Woman's Foreign Missionary Society of the Presbyterian Church, Headquarters, 501 Witherspoon Building, Walnut Street, Philadelphia, Pa.; organized 1870.

2. Woman's Board of Foreign Missions of the Presbyterian Church, New York: Headquarters, 156 Fifth Avenue, New York City; organized 1870.

3. Woman's Presbyterian Board of Foreign Missions of the Northwest: Headquarters, 40 Randolph Street, Chicago, Ill.; organized 1870.

5. Woman's Occidental Board of Foreign Missions of the Presbyterian Church: Headquarters, 708 Powell Street, San Francisco, Cal.; organized 1873.

6. Woman's Presbyterian Board of Foreign Missions of the Southwest: Headquarters, 4,020 Westminster Place, St. Louis, Mo.; organized 1877.

7. Woman's North Pacific Presbyterian Board of Missions: Headquarters, 741 Hoyt Street, Portland, Ore.; organized 1888.

Reference should be made to the exceptionally complete arrangement of the library connected with the Board's office in New York City, and to

the organization of mission study classes. In both departments the Board has the advantage of the free-will service of two gentlemen of means. The literature department also is specially well developed.

Organ: The Assembly Herald, Woman's Work for Woman. History: minutes; W. H. Gurney, Origin of the Board of Foreign Missions of the Presbyterian Church, New York, 1875; Speer (J. E.), Presbyterian Foreign Missions, Philadelphia, 1901.

Presbyterian Churches of Scotland; Missions of: See Scotland.

Presbyterian Church in the United States (South); Executive Committee of Foreign Missions of: The history of the missionary work of the Presbyterian Church of the southern portion of the United States runs parallel with that of the northern portion up to the year 1861. At that time, in consequence of the civil war, the synods of the Southern States united in the formation of a separate body, known as the General Assembly of the "Presbyterian Church in the Confederate States of America," which title, subsequent to the war, was changed to the "Presbyterian Church in the United States South." Immediately on the organization of the Southern Assembly, at Augusta, Ga., in December, 1861, a committee was chosen to conduct the work of foreign missions, with the Rev. J. Leighton Wilson, D. D., as Secretary, and the Rev. John Trapp, D. D., as Treasurer. Dr. Wilson had labored nearly twenty years as a missionary in Africa, but for some time previous to the outbreak of the war had been connected with the Foreign Mission Office of the Presbyterian Church in New York. Dr. Woodrow was a professor in the theological seminary at Columbia, South Carolina. The Committee was located at Columbia. The first efforts of the committee were directed to the Choctaws, the Chickasaws, and other tribes of the Indian Territory. During the most of the war, more than a dozen faithful laborers were sustained in this field, among them Drs. Kingsbury and Byington. A number of Presbyterian missionaries, natives of the Southern States, were laboring in foreign lands, and invitations were extended to these, who had originally been sent out by the Presbyterian Board in New York, to become the representatives of the Southern Church in their respective fields. Some of these labored in Africa, others in China, Japan, and Siam. As the outcome of these negotiations, the Rev. Elias B. Inslee of Hang-chau, China, entered into a correspondence with the committee, which resulted in the establishment of its first mission in foreign lands. This, however, was not until the close of the war. Mr. Inslee, who was a member of the Synod of Mississippi, returned to the United States in 1866, was formally appointed, and sailed for his field in China in June, 1867. In August of the same year the committee appointed Miss Christine Ronzone, a missionary under its care, to Italy. In 1868 the Rev. G. Nash Morton was sent to Brazil.

Missions were established in Mexico and Greece in 1874, in Japan in 1875, and in the Congo Free State in 1890. In 1889 the Indian Mission was transferred to the Home Mission Committee.

Statement of Missions: I. China: (1) Middle China: The first station of the mission was Hang-chau, to which Rev. Mr. Inslee returned
in 1867, and where he was joined the following year by several associates, including Rev. M. H. Houston. Others are Su-chau (1872), Hsin-chang (Sinchang) (1892), Kiang-yin (1895), Kia-hsing (1895). In common with other missions this one suffered interruptions during the Boxer outbreak. About 1,000 foreign and Chinese students were still in the interior stations. The missionaries instructed the students and sailors and soldiers at Shanghai. Since their return the various departments of work, including the girls' schools at Hsin-chang and Hsin-chau, other schools, and the medical work have been resumed with success.

(2.) North Kiangsu: This mission includes the stations of Chin-kiang (1883), Su-tsin (Suchien) (1894), Tsing-kiang-pu (1887), Hwai-nan-fu (Whai-san-fu) (1897), and Hen-chau-fu (1897). Here also the missionaries were obliged to withdraw during the Boxer troubles, but native workers remained, and except for a few weeks, services were continued. Since the reopening of active work this mission has shared with all the others the increased interest on the part of the natives and the larger opportunities for each department of work.

The report (1902) shows for the Mid-China Mission 24 outstations, 42 missionaries, 36 native workers, 7 churches with 448 communicants, 10 schools with 204 pupils. North Kiang-su Mission, 6 outstations, 26 missionaries, 10 native workers, 1 church with 95 communicants, 1 school with 12 pupils.

II. Brazil: (1.) Southern Brazil: This includes the stations of Campinas (1869), Lavrns (1892), Aracatuba (1893), São Paulo (1895), São João del Rei (1895). As in so many cases, the early history of the mission was one of patient labor in the face of great difficulties, but of late there has been considerable improvement. The organization of the Synod of Brazil, by the cordial cooperation of the Northern and Southern Presbyterian Churches in the U.S., has been a distinct advantage, and the single theological institution at São Paulo for both boards has been very helpful. The development of Mackenzie College also has made possible a concentration of the denominational work. To its missions, besides their care of schools and press work, superintend 60 outstations, and report 1,316 communicants.

(2.) Northern Brazil: The work in this mission was commenced in 1875 at Recife (Pernambuco). In 1882 Fortaleza or Ceará was occupied, followed by Maranhão (1885), Parahyba (1894), Natal (1895), Caxias (1896). An indication of the difficulties encountered is found in the statement in the report for 1902 that even at Pernambuco it is still rare for services to be conducted in the chapel without stones being thrown at the building. The prevalence of gambling and intemperance makes work very difficult and the general poverty of the people hampers the sale of Bibles and other books. There are (1902) 14 missionaries, 18 native workers, 17 outstations, 10 organized churches, 1,114 communicants, 2 schools with 127 pupils.

III. Mexico: The work in Mexico was commenced in 1874 at Brownsville, Texas, and the city of Matamoros, just across the Rio Grande River. It has since been extended to include Victoria (1880), Linares (1887), and Monte-morelos. The 5 missionaries and 11 native helpers care for the work in 53 outstations, with 10 organized churches and 602 communicants. As the country is sparsely populated there is a large amount of traveling necessitated. As in Brazil, the churches connected with the two Presbyterian Boards (North and South) in Mexico united in 1901 in the Synod of the Presbyterian Church of Mexico. The Mission Board has had the cordial support of the Board and the churches have already felt the advantage from the union.

IV. Cuba: In response to an earnest appeal from Protestant Christians in Havana, the Executive Committee sent Mr. Graybill of the Mexico Mission to Cuba in the summer of 1890. This visit resulted in the organization of two Presbyterian churches, one in Havana and one in Santa Clara, a town in the interior of the island. Mr. Graybill also licensed and ordained to the gospel ministry Sr. Evaristo Collazo of Havana.

The disturbed condition of the country seems to have interfered with the continuation of the work, but at the close of the Spanish War in 1899 the Board took up the field again and placed a missionary, Rev. J. G. Hall, at Cardenas. Work has also been undertaken at Caibarien and Remedias. The report (1902) shows 7 missionaries, 2 native workers, 1 organized church, 63 communicants. Attention is paid to education, and in one instance the missionary gained access to a large private school with free permission for Bible instruction in return for lessons in English.

V. Japan: The first station founded in Japan by this Board was Kochi (1885). Then followed Nagoya (1887), Tokushima (1889), Kobe and Okazaki (1890), Takamatsu (1893), and Susaki (1898). There are also 80 outstations, and the missionary force of 28, with 35 native helpers, reports (1902) 4 organized churches, with 1,438 communicants. These churches are connected with the Church of Christ in Japan. The strength of the mission is given to evangelistic work, and the 20th century forward movement under the auspices of the Japan Evangelical Alliance has had manifest good results in uniting the churches, giving them material courage and success, and emphasizing before the community the essential unity of the Japanese Churches.

VI. Africa: For many years the Southern Presbyterian Church had cherished a desire to plant a mission in Africa. During the latter part of his life, the Rev. Dr. J. Leighton Wilson, the father of the mission work of his Church, and who had himself labored nearly twenty years in Africa, earnestly laid this matter before the General Assembly; but various obstacles prevented the accomplishment of his heart's desire until he had passed to his rest. In the mind of the Southern Church there was an abiding conviction that because of the large negro population within her own bounds she was specially called of Providence to undertake this work. Accordingly, at the meeting of the General Assembly in 1889, the Executive Committee of Foreign Missions was directed to take steps looking to the opening of the long-contemplated mission in the "Dark Continent." Early in 1890 the Rev. Samuel N. Lapsley (white), of the Synod of Alabama, and the Rev. W. H. Sheppard (colored), of Atlanta, Ga., were commissioned to report with
tions to found a new mission in the Congo Free State. The appointment of Mr. Sheppard (who had already explored the interior and had become a valuable worker) was of special interest, since he was the first fruits of a long-cherished desire on the part of many in the Southern Church to see some of his race bearing the Gospel to the land of their forefathers. He was also the first fruits, in the history of the Presbyterian Church in the United States, of a Seminary in Tuscaloosa, Alabama, which had been established some years before by the Southern Presbyterian Church exclusively for the purpose of training a colored ministry. Proceeding first to England, and then to Brussels in Belgium, they recruited every encouragement and assistance in preparation for their work. King Leopold himself granted Mr. Lapsley a personal interview, in which he expressed the deepest interest in his mission. They have gone as pioneers, with instructions that their station be opened, if separated from other missions to give it the character of a thoroughly independent work. They were instructed to seek a locality as healthy as possible, on some highlands removed from the coast, and yet not too distant from the basis of supplies. Luebo, near the southern border of the Congo State, and the junction of the Luebo and Lubua rivers, was selected and has been the headquarters of the mission. In 1897 Ibani, a short distance from Luebo and a point of convergence for the trade of a large section of territory, was occupied. The missionaries are enthusiastic over the outlook, hoping for results as remarkable as those manifest in Uganda, as the tribes already reached seem peculiarly accessible to the Gospel. The report (1902) shows 9 missionaries, 20 native helpers, 88 outstation communicants, and 266 pupils in the 2 schools. A noticeable feature is the addition of 382 members in a single year.

VIIL Korea: The first work of the Board in Korea was in 1892, but the present location was not made until 1896, when the station of Chung-ju was opened, 25 miles south of the busiest mission town of Hankow. Island (Mokpo) in 1898, all on or near the west coast south of Seoul. There are (1902) 18 missionaries, and special attention is paid to medical work, one of the physicians from the Woman's Board reporting 1,250 visits from women patients at Chung-ju, 3 churches, 2 dispensaries, and 24 Sunday schools, and one of the most interesting features is the employment of a native evangelist by a few of the native Christians.

In 1874 work was commenced among the Greeks at Athens, extending afterward to Belo and Salonica. Later it was confined to the capital city and finally, under pressure of need elsewhere, was passed over to the care of the ABCFM. Women's work in connection with this Board is represented by individual church societies and Presbytery unions.

ORGAN: The Missionary, monthly.

PRESBYTERIANS OF WALES: Missions of.

See Welsh Calvinistic Methodists' Foreign Missions.

PRETORIA: Capital of the Transvaal Colony, S. Africa, situated about 280 miles W. by N. of Lourenco Marques. White population about 10,000. Station of the Berlin Evangelical Missionary Society (1866), with (1903) 1 missionary, 17 native workers, 6 outstations, and 2,628 professing Christians, of whom 1,232 are communicants. Station also of the SPG (1870), with (1903) 3 missionaries. Station also of the Swiss Romande Mission (1897), with (1903) 2 missionaries, a woman missionary, 1 place of worship, 1 printing house, 2 day schools, and 36 professed Christians. Station also of the WMS, with (1903) 5 missionaries, 25 native workers, 5 outstations, 7 Sunday schools, 3 day schools, 1 theological class, and 680 professed Christians, of whom 412 are communicants. Station also of the African Methodist Episcopal Missionary Society.

PRIMITIVE METHODIST MISSIONARY SOCIETY: Publishing House, 48 Aldersgate St., E. C., London. The Primitive Methodists are a body which arose in England in 1810. Finding themselves gaining strength, they organized in 1843-44 a foreign missionary society, adopting Canada, New Zealand, and Australia as their fields of labor. These fields were afterward transferred to Methodist bodies in those countries, and the Society, aside from its home department, carries on foreign work in West Africa (Fernando Po), South Africa (Cape Colony), and Central Africa (Upper Zambesi). The work in Fernando Po was commenced in 1870, in response to an appeal by a sea captain and carpenter who visited Santa Isabel and found a small community of tradesmen there, who were interested in becoming a missionary who had been driven away by the Spaniards. Spanish law having changed, the Missionary Committee of the Primitive Methodist Connexion sent two missionaries, Revs. R. W. Burnett and H. Roe, with their wives, to open a station at Santa Isabel. The Missionary Committee was at first somewhat skeptical at the welcome. In 1871 Rev. D. T. Maylott joined them, and an attempt was made to open a new station along the west coast. The plan met with some difficulties, but in 1873 George's (or San Carlos) Bay was occupied.

Associated with Mr. Maylott in this mission was the Rev. W. N. Barleycorn, one of the first converts of Santa Isabel, and his work among the Bubis was very successful, the first convert of the west mission being baptized in 1874. Since then several new missionaries have been sent out, and stations have been opened at Jemba, Bubin, Idua, Jamesownt, Urua Eye, and Ikot Ntaka, and schools have been established in a number of towns. There are 5 missionaries and 4 native teachers.

In 1889 an appeal for help came to the Missionary Committee from Aliwal North, a town and district in Cape Colony, bordering on the Orange River, and in 1870 Rev. H. Buckenham sailed for Cape Colony and settled in Aliwal North. He was joined later by others, and the work grew, extending across the river into Orange Free State. The war disturbed it greatly, but since the return of peace the natives are returning to their homes, and the work of the Mission has been resumed. Aside from the two missionaries a native pastor, the Rev. John Miskinya, a graduate of the Lovedale Institution is associated in the work at Aliwal. A training-school for native youths has been opened, which it is the purpose of the Mission to make, as far as possible, self-sustaining.

It had long been a wish of the Missionary Committee that there should be a separate station in the Upper Zambesi, but owing to the expense of pioneer work in such a difficult region, they had not been able to collect funds sufficient for the purpose.

In April, 1889, however, the Rev. H. Bucken-
ham (formerly at Aliwal North) and Mrs. Buckingham, with Rev. A. Baldwin and Mr. J. Ward, sailed for Africa and opened a mission for the establishment of four stations: Nkala, Namzala, Moomba, and Walker's Drift, besides several outstations. It is still largely pioneer work, even in the work of reducing the language of the Sajobas to form. Schools are successful and medicine, too, has brought many within reach of the preaching.

There were in the three missions in Africa, in 1900, 39 missionaries (including wives), 10 stations and 11 outstations, 1,463 communicants, and 2,600 adherents. A Woman's Foreign Missionary Society, organized in 1897, is auxiliary to the general society.

PRINCE ALBERT: The chief settlement of the district of Saskatchewan, Canada, on the North Saskatchewan River, about 35 miles above its confluence with the southern branch. Station of the Canada Presbyterian Church (1866), with (1903) 1 woman missionary, 1 Sunday school, and 1 acting agent of the CMS (1879), with (1903) 1 missionary, 2 native workers, 3 out stations, 3 day schools, 1 college, and 426 professed Christians, of whom 167 are communicants.

PROME: A city in the district of Pegu, Burma, India, on the Irawadi, 166 miles north-north-west of Rangoon. Climate temperate, healthy. Population, 30,000, of whom 27,000 are Buddhists. Station of the ABMU (1854), with (1903) 1 missionary and his wife, 15 native workers, 3 outstations, 3 places of worship, 4 Sunday schools, 6 day schools, and 273 professed Christians, of whom 222 are communicants. Station also of the SPO (1871), with (1903) 1 missionary, 2 native workers, and 57 professed Christians, of whom 24 are communicants.

PROTESTANT COMMUNITY: In Turkey the system of civil administration requires each tribe or race, or other division of the people to have a chief to whom the Turkish officials can look for its proper control. From the time of the conquest by the Ottoman Empire the religious heads of the various sects found in the Turkish empire have been recognized as political chiefs of their respective flocks, with certain official rights and privileges. In 1843-47 the prelates of the Armenian Church withdrew from their friendly attitude toward the Protestant missionaries, and the various communicants were boycotted and boycotted those who adopted the idea of independent study of the Bible, using their position as political chiefs to turn the Turkish police force upon the work of exterminating the Church.

To secure the Evangelical Armenians against such persecution, the British Ambassador at Constantinople obtained from the Sublime Porte recognition of the "Protestant Community" as a separate political body, having a civil head (called in Turkish Vekil, or representative), and liberty of conscience in matters of religion for all who might place themselves under protection of the new political organization. In 1850 an imperial edict confirmed these arrangements, placing the Protestant community upon the same political footing as the Greek Church or the Armenian Church.

This community now numbers about 100,000 souls, adherents of the various evangelical denominations in different parts of the empire. All of these "Protestants," or evangelicals, look to their civil head, or Vekil, to represent them and their civil and political interests at the palace of the Sultan, and to inform them of their sovereign's wishes in his correspondence. The protestant minister is the only one of the various religious groups who is allowed this honor.

Anderson (R.), Missions to the Oriental Churches, Boston, 1870; Dwight (H. G. O.), Christianity Revised in the East, New York, 1830.

PROTESTANT EPISCOPAL CHURCH IN THE UNITED STATES OF AMERICA: 1. Domestic and Foreign Missionary Society. 2. American Church Missionary Society. The American Protestant Episcopal Church, being, in its early history, a mission itself, generations passed before it felt strong enough to found missions on a large scale, either within or without its own borders. In the beginning of the 19th century interest in mission work became manifest in the American Church, one of the prime causes in the case being Bishop Griswold, who in correspondence with the Secretary of the Church Missionary Society suggested that an American clergyman be sent out by that Society into the foreign field. The suggestion was carried out, and in 1817 a committee was formed to select and offer such a missionary. The recommendation was acted upon, and the Domestic and Foreign Missionary Society was instituted in 1820, the Rev. J. R. Andrews being the first of the American clergy to consider himself as a foreign missionary.

1. Domestic and Foreign Missionary Society: Alton organized in 1820 as a society it was not until 1835 that it assumed its present character and became but another name for the Church in America. Previous to that time the administration of the Society had been with its work, not only to the Board of Directors, but also to a Board of Directors, the latter having been formed in 1857, and consisting of 10 clergymen and laymen, with 15 laymen and 15 laymen. The first Board of Directors consisted of 16 bishops, 15 clergymen and 15 laymen. The other bishops, and the Secretary and Treasurer of the Domestic and Foreign Missionary Society, and of the Board of Managers are members ex officio, but have no vote.

The first foreign field chosen by the Society immediately on its organization was Africa, but it was not until 1850 that work was actually begun in Morocco, where someDynastic Society had founded a colony of free colored people. In 1830 Greece was chosen as a field where general Christian intelligence and education were
sorely needed, and Athens was decided upon as the most favorable point for location. In 1834 the Society voted to take China a field of mission labor, and in 1835 Rev. F. R. Hanson and the Rev. H. R. Lockwood were accepted as laborers for that field.

In 1839 Rev. Messrs. C. M. Williams and J. Liggins, the first Protestant missionaries to Japan, were sent there by the Society of the Protestant Episcopal Church of America. In 1865 a mission commenced by a clergman four years before in Haiti was transferred to the Society of the Protestant Episcopal Church, and became one of their fields of active labor.

Africa: The mission work in Africa is confined to the island of Palmas. Mr. and Mrs. J. M. Thompson (colored), residing at Monrovia, were appointed as missionary teachers in 1835, and in 1836 Rev. Thomas S. Savage, M.D., the first foreign missionary, landed at Cape Palmas. During the early years of the mission frequent difficulties occurred between the colonists and the native "bushmen," and the missionaries and mission property were often in danger. In 1843 troubles arose which compelled the missionaries at Cape Palmas to abandon the town and take refuge in the ship the school at Cavalla, an outstation, had to be closed. The next year found the work going on quietly, but in 1845 the disturbances again threatened the mission; still in spite of the political troubles there were substantial proofs of the progress of the mission. In 1849 the corner-stone was laid of the first Episcopal church edifice of Liberia, and in 1850 Rev. John Payne was appointed Missionary Bishop of Cape Palmas and the parts adjacent. The work gradually extended its borders from this time, with the exception of the years of financial trouble. The mission was obliged to discontinue work at some of the stations and curtail it at others. The principal native tribes reached by the mission are the Grebos in the northern, the Bassas in the central, and the Veyes in the southern section of the country.

For administrative purposes the mission is divided into four districts: Cape Palmas, Sinoe, Bassa, and Montserrado. Monrovia being the work of the Bishop. The report of 1903 shows 75 clergy, 69 catechists and teachers, 88 places where services are held, 1,767 communicants (1,137 native and 630 Liberians), 38 day schools, 18 boarding schools, 1,490 pupils (including 1,169 natives).

Greece: The work in Greece was begun at Athens in 1830 by the Rev. J. J. Robertson and the Rev. J. H. Hill. The principle on which the mission was established was that of not attempting to make proselytes, or to withdraw the people from their own Church, but simply to spread Scriptural truth among them in the expectation that this would lead eventually to the reformation of the Church by the Greeks themselves. The work was begun by establishing schools, and a printing-press set up at Athens, which last, however, was given up. In 1837 a station was begun on the island of Crete, but was occupied only a few years. In 1839 the Rev. Dr. Robertson removed to Constantinople with a view to working specially among the Greeks, but the object of the Mission was afterward extended to the other Eastern Churches. The mission in Greece has been wholly educational, and after the death of Mr. Hill the Society ceased to consider it a part of its field.

China: The China Mission dates from the landing at Canton of the Rev. Messrs. Hanson and Lockwood in 1835. They proceeded, however, to Java, to labor there, at Batavia, among the Chinese. The third missionary, the Rev. W. J. Boone, M.D., reached Batavia in 1837. In February, 1840, he really began work on Chinese soil by the opening of a station at Amoy. Four years later he was consecrated as the first bishop of the Anglican communion in China. In 1845 the mission moved from Amoy to Shanghai, and in 1846 Mr. Kong Chai Wong, afterward a clergymen, was baptized, the first convert, on Easter Day. In 1868 stations were opened in Wuchang, capital of the province of Hu-pe, and in Hang-kau. The work is now divided into two districts, Shanghai and Han-kau. The former includes, as stations, Kia-tung (Kia-ting) (1882), Shanghai City and Tsing-pu (1902). The latter, besides Han-kau and Wu-chang, Shansi, and Ichang (1886), Han-chiu'an (1892), and Wuhu (1891), Kin-kiang (1901) and Ngan-king.

Aside from the evangelistic work which is pushed energetically, St. John's College, at Shanghai, founded in 1884, and hospitals at Shanghai, Wu-chang and Ngan-king are kept up to a high grade of efficiency. The missionary staff includes (1903) 3 bishops (one, the venerable Dr. Schereschewsky, residing in Japan), 34 Presbyters (19 foreign, 15 Chinese), 13 deacons (2 foreign), 8 physicians (foreign), 21 missionary teachers (foreign), 25 wives of missionaries, and 157 other native workers.

There are 56 places of preaching, 1,449 communicants, 45 day schools, and 9 boarding schools, with about 1,500 pupils. English services are also conducted at several places.

Japan: This mission was established in 1859 by the Rev. Messrs. C. M. Williams and J. Liggins, who were the first Protestant missionaries to settle in the empire. The first baptism was reported in 1866. Until 1874 the Mission was under the jurisdiction of the Bishop of China, but in that year, owing to the increased extent of both fields, it was decided to separate them into two dioceses. Rev. C. M. Williams, then Bishop of China, was appointed Bishop of Japan, and a new bishop set over China. With the growth of the work Japan was divided into two dioceses, Tokio and Kioto. The former includes the stations of Tokio (1873), Matsuyama, Takasaki, Maybachsee (1888), Fukushima (1893), Sendai (1894), Hiroasaki (1897), besides a number of subordinate stations. The dioce of Kioto includes Kioto (1889), Nara (1887), Osaka (1875), Kamakura (1897), and a number of subordinate stations.

Holy Trinity Cathedral, at Tokio, has a full series of services in Japanese and in English, and a church house is arranged for near the Imperial University, as a center for work among students. There also are Trinity, Divinity, and Catechetical School, St. Paul's College, and St. Margaret's School, all rapidly growing. The medical department includes St. Luke's Hospital, Tokio, and St. Barnabas Hospital, Osaka.

The missionary staff includes (1903) 3 bishops (one, Bishop Barnabas), 34 Presbyters (14 Japanese), 9 deacons (7 Japanese), 2 physicians, 39 other foreign workers, including wives of missionaries, 138 other native workers. There are 74 places of preaching, 2,033 Japanese communicants, 19 schools, with 1,357 scholars.
Haiti: The Board’s connection with Haiti dates from 1865, when the financial responsibility for the work at Port-au-Prince, carried on by Rev. J. Theodore Holly, was transferred by the American Church Missionary Society. It was organized in 1874 as a mission, when the church in Haiti was recognized under certain conditions by the General Convention and Dr. Holly consecrated as its first bishop. The work has been constantly hindered by fire, war, pestilence, and famine; yet, considering the very limited resources at any time at the disposal of the bishop, the work has been piece-meal successfully. By action of the House of Bishops, taken in 1883, the church in Haiti was reorganized as an independent church, but, nevertheless, regular assistance is given by the Society to it as a Church in communion with the Protestant Episcopal Church.

Aside from the Bishop, 12 clergymen are enrolled as missionaries; there are 22 places of preaching, 557 French-speaking and 41 English communicants, 9 day schools with 185 pupils. There is also some work among the Spanish-speaking Dona Station.

Mexico: The work of the Society in Mexico is carried on both among Spanish-speaking and English-speaking people. Assisting the Church’s representatives are 10 presbytery and 7 deacons, all Mexicans, who minister to 871 communicants. There are also several schools.

The Philippines: In the fall of 1901 the Board of Missions commissioned Bishop Brent to take charge of work in the Philippines, and he arrived at Manila in May, 1902. Already two clergymen were at work there and a lay worker. One of these was assigned to English services and the other took up Spanish work. Later a missionary was appointed to labor among the Chinese population, who had come from Amoy. For the present the plan appears to be to press the work among the American colony, while making careful investigation as to the possibilities among the native tribes.

The Woman’s Auxiliary to the Board of Missions, headquarters Church Missions House, 4th Av. and 22d St., New York City, was organized in 1871, and has been a most efficient factor in the work of all the Church in all its departments.

II. American Church Missionary Society: While there was no formal agreement it had been generally understood that the Foreign work of the Church should be left in the hands of what was known as the Low Church party, while missionary work in the U. S. was committed to the High Church element. In 1850 a local society was formed in Philadelphia for the purpose of collecting and distributing funds for the work of the Episcopal Church in the West, on what were known as strictly evangelical lines. Then came a demand for a general society of the same character, and after several preliminary meetings, such a society was organized at New York City in May, 1860, for the conduct of mission work on a purely voluntary and independent basis. Various efforts were made to effect some arrangement between the two societies, and in 1877 an agreement was reached by which the American Church Missionary Society retains its charter and organization, but is recognized as an auxiliary to the Domestic and Foreign Missionary Society. It agrees not to send missionaries to China, Japan, or Africa, while the Domestic and Foreign Society promises to send to those countries, with the approval of the Bishop, in each case, any missionaries possessing the qualifications required by its rules, who shall be nominated, and whose support shall be provided by the American Church Missionary Society. In regard to Domestic Missions, an agreement for mutual appointment and approval of missionaries has been made.

The foreign work of the Society is in Brazil. There are 8 clergy, including the bishop, 7 churches or chapels, 488 communicants. The headquarters of the mission are at Porto Allegre, and among other places occupied are Pelotas, Jaguero, and Rio Grande.

The Society has also taken up work in Cuba, where it occupies Havana and Matanzas with 5 clergy, who report 256 communicants, 3 schools with 250 scholars, and 1 orphanage with 58 inmates.

PROVINCE WELLESLEY: A strip of territory on the west coast of the Malay peninsula, opposite Penang, 45 miles in length, with an average width of about 8 miles, including a total area of 370 square miles. It forms part of the British Colony of Straits Settlements. Station of the SPG (1879), with (1903) 1 missionary, 8 native workers, 2 places of worship, 5 day schools, 2 boarding schools, and 265 professed Christians, of whom 75 are communicants.

PUBNA. See Farna.

PUDUKKAI: A town in Madras, India, 28 miles southeast of Trichinopoly; is unusually clean, airy, well built; small, but having a fine mosque, palace, and several temples. Population, 15,384, Hindus, Muslims, Christians. Station of the Leipzig Missionary Society (1849), with (1903) 2 missionaries and their wives, 24 native workers, 7 places of worship, 5 day schools, 3 boarding schools, and 265 professed Christians, of whom 153 are communicants. Station also of the SPG, with (1903) 28 native workers, 16 places of worship, 9 day schools, 2 boarding schools, and 1,591 professed Christians, of whom 621 are communicants. Some write the name Pudukkali.

PUEBLA: A city in Mexico, 76 miles east-southeast of Mexico City. The sacred city of Mexico, containing many charitable institutions. Population (1900), 93,521. Station of the ME (1851), with (1903) 1 missionary and his wife, 1 native worker, 6 outstations, 6 Sunday schools, and 105 professed Christians. Station also of the ME, with (1903) 2 missionaries, 1 of them with his wife; 3 work missionaries, 26 native workers, 1 place of worship, 2 Sunday schools, 3 day schools, 2 boarding schools, 1 theological class, and 414 professed Christians, of whom 193 are communicants.

PUNGO NDONGO: A town in Portuguese W. Africa, a few miles to the N. of the Kwanza, and 180 miles E. S. E. of S. Paulo de Loanda. It is the chief entrepot of the trade with the interior and a Portuguese military post. It is one of the ancient cities of Angola, and a health resort. It is beautifully situated in the midst of masses of conglomerate rocks. Station of the ME, with (1903) 1 missionary and his wife, 1 outstation, 1 place of worship, 1 Sunday school, 1 day school, and 14 professed Christians. Some write the name Pungo Andongo.
PUNJAB: One of the great provinces of British India; its highest northern point is in latitude 35°, its most southern, 27° 39'. Its limits of east longitude are 69° 35' and 78° 35'. The area of that portion of it under British administration is 97,200 square miles; population 203,300,000. But the 34 native states which it borders on are intermingled with that of the British possessions—all of which are under the political supervision of the Punjab Government, the each has its own native chief (see article Native States, where these relations are explained in more detail) and the area of these swells the total area of the Punjab to 133,741 square miles, and its aggregate population to 21,000,000. The Punjab is governed by a lieutenant-governor, under the general supervision of the governor-general and viceroy of India. It contains one-fifth of the Mercantile population, but only one twentieth of the Hindu. The name means "Five Waters," and is derived from the fact that its territory is intersected by five great Himalayan rivers; these are the Sutlej, the Beas, the Ravi, the Jhelum, and the Indus. The Indus River, into which these all flow, and which runs near the western (political) boundary, and the Jumna, which forms a part of the eastern (political) boundary, describe a course outside the territory to which the name was originally given; but that name has recently been made to cover the entire province placed under the administration of the local government. On the north and west the Punjab meets the N. W. Frontier Province.

The history of the Punjab is of exceeding variety and interest. So extensive and so various is its area, that it must here be left almost wholly untouched. Suffice it to say that here was the original Indian home of the Aryans; here the Vedict rites were first practised, and here probably the Vedas written. Here Hinduism began its development; and hence did the Hindu race, a little more enlarged to larger size and power, emerge for the conquest first of the great Gangetic valley, and then of all the Deccan and southern India. The beginning of this Hindu history cannot be later than 1500 B.C., and may be earlier. Here also the Mohammedan power in India first took root. Later, when it became the Mohammedan capital, after a time Delhi was occupied as their imperial city, and later still Agra, by a few of the Mogul emperors in the 16th and 17th centuries.

The city of Delhi, which indeed lies outside of the natural area of the Punjab, the now within its political area, stands on the site of Indraprastha, a prehistoric Hindu capital, the foundation of which is said to go back to the 15th century B.C. It was in 1849 that the Punjab was finally made a part of the English dominion.

Classifying the people by religions, nearly 60 percent are Mohammedans; about 40 percent Hindus; nearly 7 percent Sikhs. In round numbers, there are 11,000,000 Mohammedans, 5,000,000 Hindus, and 1,500,000 Sikhs. There are nearly 38,000 Jews, and over 40,000 Christians, of whom less than 5,000 were natives. The preponderance of Mohammedans is explained partly by the fact of early and long Mohammedan possession of the Punjab by rulers of that faith (as just described), and partly by its position and relations. The bordering countries to the northwest, whence immigration is so easily accomplished.

The people of the Punjaub are largely agriculturists. A sixth of the population of British Punjab is thus returned. The commercial and artisan classes number nearly 1,500,000. The rainfall is slight; in some parts of the province artificial irrigation is necessary to yield any results. The rivers swell with the melting of the mountain snows, and when they subside leave well-watered strips of alluvial land enriched with the fresh deposits of each season. Education is in a tolerably forward state. It is stimulated somewhat by the existence of the Punjab University, which dates only from 1882, with which a number of colleges are affiliated. The language of the Hindus is Punjaib—alleged to Hindi. Hindustani and Persian are used by the Mohammedans. The Afghans speak Pashhtu.

Missionary work in this province began in 1834. The American Presbyterians were first on the ground, and their earliest station was at Ludhiana, where, besides the usual work of preaching, schools were at once begun, and a printing-press established, from which have since issued hundreds of tracts, and tracts, and tracts, including Biblical translations. Many other places have since been occupied. The Church Missionary Society occupied Amritsar in 1851. In 1870 that Society began a theological school at Lahore for training native preachers, which was the first school of the sort in India, it is said, to include Hebrew and New Testament Greek in the curriculum of study for native Christian students. The United Presbyterians of America have a mission in the Punjab, in Sialkot, and adjoining districts. The Church of Scotland has a station at Chamba. Several leper asylums have been founded in connection with one and another of these missions, but these are now managed by the "Mission Lepers in India."

The Moravians, true to their instincts of selecting the most difficult, laborious, and apparently unpromising fields, started a mission in 1858 at Kailang, far up among the Himalayas, thro British territory, among the Tibetan mountaineers. Their work has involved severe hardship and unusual self-denial, but it has been without its direct results. Circumstances have compelled the Moravians, as their number is small, Mohammedans probably to a greater extent than has been attempted elsewhere in India. More than half the population being Mohammedans, opportunities have been constantly presented for meeting them, which it has not seemed right to disregard, although there has not been hope of great success. Several of the missionaries of the Punjab have studied the religion of Mohammed profusely, and have published scholarly works in elucidation of it, while not neglecting the preparation of other works designed to commend Christianity directly to the Muslims themselves. Their labors have resulted in the conversion of many Mohammedans, some of whom have become able and fearless preachers of the Gospel.

PUNJABI LANGUAGE: A language spoken by Sikhs and others in the Punjab, India. The number using this language is estimated at over 20,000,000. The language belongs to the Indie group of the Aryan family, but has been much profited by borrowing from Hebrew, Arabic, and Persian. It is written with characters called Gurmukhi and derived from the Sanskrit Devanagari.

PURDIE, Rev. Samuel Alexander: Born in the
State of New York March 5, 1843. Died in San Salvador, Central America, August 6, 1897. In 1871 he entered upon his work in Mexico, being the first foreign missionary sent out by the American Friends. Locating at first in the city of Matamoros in the state of Tamaulipas, he gathered a church of believers, opened a boys' and girls' school, established a printing and publishing house, and founded a monthly paper, El Ramo de Olive, which continues to be published, and is now in its thirty-first volume. This paper has a large circulation, and it has gained entrance into nearly all Spanish-speaking countries and islands, carrying the Gospel where the living messenger has not come. Primarily to supply the schools he compiled and printed school-books, inserting in them passages from the Bible and extracts from Christian books. He translated and printed a number of religious books and tracts. His influence was felt not only through the printing press. He traveled throughout the entire state of Tamaulipas, preaching in cities, towns, and ranches. He had the joy of seeing seven of his converts become faithful ministers of the Gospel. He established six regular churches and many preaching places, all of which he visited annually, and some of them more frequently. Into these churches he received more than six hundred by baptism. In 1887, because of the decline of Matamoros as a business center and the removal of the capital of the state to C. Victoria, he removed to this city, and hereafter his headquarters were there. In 1897, while visiting San Salvador, Central America, he died of tetanus, induced by a slight injury to his hand, received while binding a book which he had just translated and printed.

PURIAH: The chief town of the district of the same name in Orissa, India; is situated on the coast, covers an area of 1,871 acres, and is a city of lodging-houses. Its ordinary population in 1891, 28,800, is almost entirely Hindu, but during the great festivals of Jagannath, which are held here, there are 100,000 pilgrims added to the ordinary residents. Station of the BMS, (1825), with (1903) 1 missionary and his wife, 11 native workers, 3 outstations, 3 Sunday schools, 4 day schools, and 645 professing Christians, of whom 300 are communicants.

PURNAH. See Purnaiah.

PURNAIHA: A town in Bengal, India, and capital of the district of Purnaiah, 50 miles N. E. by N. of Bhagalpur. It has a large jute trade. It is subject to severe epidemics of fever. Population (1891) 14,000, of whom 9,600 are Hindus and 4,800 are Mohammedans. Station of the BMS (1899), with (1903) 1 missionary and his wife and 2 native workers. Some write the name Purneiah.

PURITY: Capital of the Manhum district, Chota Nagpur, Bengal, India. Population, 5,695. It has good public buildings, a hospital, and considerable trade. An important center for mission work among the Kols. Station of the Gossner Missionary Society, with 4 missionaries, 37 native workers, 7 places of worship, 5 Sunday schools, 1 boarding school, 1 home for untainted children of lepers, and 1,673 professing Christians, of whom 870 are communicants. Station of the Mission to Lepers (1887), aiding the leper work carried on by the Gossner Society.

PUTIKI: A town and port of North Island, New Zealand, situated 79 miles S. E. of New Plymouth, on the Wanganui River, crossed by an iron bridge 600 feet long. It is the principal port on the W. coast and has sawmills, woodenware factories, foundries, flour mills, etc. Near the town is a Maori college for the education of native youths. Population, 5,000. Station of the CMS, with (1903) 1 missionary and his wife, 16 native workers, 1 day school, and 320 professed Christians. The district appears in report sometimes as Wanganui.

PYENG-YANG. See Pheung-yang.

QUALIFICATIONS OF THE MISSIONARY: In Missions, as in all human enterprises, the man is the central factor. "One Paul did more for the spread of the Gospel than the ten Apostles." That is true and but expresses in the concrete the supreme importance of the selection of men. Livingstone wrote: "The sort of men wanted for missionaries are men of education, standing, enterprise, and piety. It is a mistake to suppose that any one, so long as he is pious, will do for this office. Pioneers in everything should be the ablest, best qualified men, not those of small ability and education. This especially applies to the first teachers of truth in regions which may never before have been blessed with the name and Gospel of Jesus Christ." Qualifications are more important than numbers. "Missionaries must be weighed and not counted." He who is to represent Christ and the Church before heathenism, should be Christ-loving and Christlike, should have a passion for the salvation of souls, and should not hesitate to give up luxury and life as his Master did, in order that the world may come to a knowledge of the Gospel that saves. The conversion of men, the spiritual vitality of converts, the interest and enthusiasm of the Home Church will depend upon the quality of the Church's representatives in the foreign field. At no point are carefulness and discrimination more important than at the selection of candidates, for if a high standard be not maintained, defeat and disappointment are inevitable. The qualifications that should be expected in a missionary do not differ essentially from those expected in any other true minister of the Gospel of Christ in any land. These qualifications have been so amply illustrated in the lives of eminent and successful missionaries, and so frequently portrayed in manuals and addresses, as to be familiar to all who are acquainted with mission literature. In the Pastoral Epistles, especially, but elsewhere in the New Testament as well, such prominence is given to these qualifications, and they are delineated with so much detail as
clearly to indicate their importance to the future church. The following are some of the characteristics specified as essential to ministerial usefulness: 1. A bishop must be ἀνεπιλεκτός (I. Tim. iii: 2) or ἀνεπιλεκτὸς (Titus i: 7), both of which are translated "blameless." These terms mean, that his character should have nothing upon which an enemy can take hold, or against which he can hurl an accusation. 2. He must be "apt to teach," capable, by natural gifts and scholarly attainments, of imparting instruction to others. 3. He must be "sober," having a calm, well-balanced, judicial judgment, that can view a subject under its true and most deliberate and wise conclusions. 4. "No Striker," a man who will not, under the impulse of passion, be provoked to strike back; who, when reviled, revives not again. The experience of missions justifies attaching much importance to this feature of character. 5. "Temperate," having such a control of all powers of body and mind as can utilize them to the best advantage, resulting in that mental poise, that self-reliance which is the anticipation of victory. 6. "Vigilant," having eyes and ears open to see and hear, and turn everything good account which may be current in spirit—that enthusiasm that can concentrate on one thing—under the constraint of love. 7. An affectionate disposition (I. Thess. ii: 7-12) which wins affection in return and secures sympathy for the message he has to give. Such references as these to missionary character are scattered throughout the New Testament, and their careful study and classification will repay any candidate for this sacred calling.

Instead of more minute inquiry in that direction, however, it may prove even more profitable to gaze upon the features of the Master Himself, who was the great missionary and is the model for all missionaries. Certain salient characteristics of His life may be regarded as essential and fundamental, and, indeed, inclusive of all others that fill in a complete equipment.

1. Jesus Christ was called to the work. He was sent of the Father. "As the Father sent me, even so send I you." How that call is to be recognized and distinguished is one of the perplexities of many an earnest life, and an exceedingly important problem. With the call of God should go the assurance, "It will not fail in the darkest hour, but without that certainty, there will often be misgivings lest after all there may have been a mistake. How can the mind of the Master be known in this matter? To Paul the call received on the way to Damascus was unmistakable. Aniskar had his visions and commissions. Voices came to him out of the ineffable light, "Go hence and return to me with the martyr's crown." "Fear not; I am he that blotteth out thy transgressions." Francis of Assisi heard a voice amid the silence of the Umbrian hills, "My temple is falling into ruins, restore it." In the strength of that inspiration he not only became a missionary, but sent forth an army of missionaries, who counted it a privilege to lay down their lives for Christ's sake. Some men, prominent in history, who were epoch-makers, have had no such assurance. They worked, with the "imagination of their heart," through the judgment of others. They were, however, filled with a sense of supreme importance, had better abandon his profession. His ministry will prove a disappointment and a waste.

2. Jesus Christ was sent. "The Scriptures cannot be broken." "That the Scriptures might be fulfilled." He staked His all upon their integrity, and instilled the same confidence into the minds of His disciples. They, too, quoted freely in their epistles, and the addresses of Peter at Pentecost, and of Stephen...
before the Council were but rehearsals of the Old Testament story. The Scriptures are the sword of the Spirit, the weapon used by the Apostles and by the Church in all the ages. There is no other weapon. The success of any Gospel mission must depend upon the ability to use the revealed truth of God. The mind of man cannot accept it as axiomatic that his mind must be steeped in the truth, that his whole nature must be charged with a sense of the glory of the Message, and the magnitude of the interests at stake. It ought not to be necessary to say, and yet men need to be reminded that this truth cannot simply in a knowledge of theological books, nor even in an acquaintance with the mechanism of the books of the Bible, all of which may be very important in their way. It is an experience of the heart and life, so that, like the Apostles, he must speak it out. "We cannot but speak the things we have seen and heard."

4. Jesus Christ emptied Himself. He made Himself of no reputation, and took upon Him the form of a servant. By right His place was in the glory, where from eternity He dwelt with the Father, and underlay His place and在地上 had nowhere to lay His head.

He might have delivered essays that would have become the literary classics of all the ages, but He emptied Himself of the right to speak and became an echo of the Father. "He that sent me is true, and I speak to the world those things which I heard of Him." By nature He was the brightness of the Father's glory, and yet that glory was laid aside, and He became obedient unto death. He who knew that all things were given into His hands, and that He was come from above and went to God, girded Himself with a towel and washed the disciples' feet. He who could have commanded twelve legions of angels, allowed Himself to be bound and buffeted and scourged. He emptied Himself of His power. What an emptying that was, that He might in due time be exalted? He became the perfect High Priest through suffering, and now is seated at the right hand of God, a Prince and a Savior. This is hard doctrine. Who can receive it? The old nature dies hard. Yet it is the parting of the ways. The missionary who will take up his cross and follow Christ must share with Him the victory, while the other way leads to failure and defeat. Among the supposed sayings of Jesus, found in Egypt, is this sentence: "Unless ye fast from the world ye shall not find the Kingdom of Heaven." Whether the saying is authentic or not its testimony is true. Love not the world, neither the things of the world; set your affections upon the things that are above where Christ sitteth.

The missionary life is exposed to peculiar temptations in this respect. He labors among a people intellectually and morally beneath him. He naturally shrinks from the closest identification with such people and craves the companionship of better society. It is a great temptation, but where not resisted, an impossible gulf is fixed between him and success. He must empty Himself that he may be exalted. He must become all things to all men that He may save some. Jesus made His soul an offering for sin; He went down to the depths that He might lift men up to God. The great Apostle strove in all things to be approved ministers of God, to much patience, in afflictions, in necessities, in distresses. He endured hardness and cultivated the graces of humility and Christian charity that the ministry might not be blamed, and that the Kingdom of God might come. He emptied Himself before receiving the crown of righteousness that fadeth not away.

5. Jesus Christ had power in prayer. Prevailing prayer is a central law of His kingdom. Indeed, if in anything He might seem to be unique, it is in this respect, and it is in this connection. "If ye abide in me, and my words abide in you, ye shall ask what ye will, and it shall be done unto you" (John xv: 7). "Whatsoever ye desire, when ye pray, believe that ye receive them and ye shall have them" (Mark xi: 24). This is surely giving men an unlimited privilege of drawing upon infinite resources, yet it is the plane on which He himself moved. At the grave of Lazarus He said to the Father, "I know that thou hearest me always." In that confidence His requests were made known. He lived in this as in all other respects up to the standard of His teaching. He understood the secret, and without it, even He would have failed in His mission. He so taught His disciples. As Andrew Murray quaintly says, He did not teach His disciples to preach but taught them to pray. Is it not true that they who can preach well are more in number than they who can pray well? The greater the gift the greater the sacrifice necessary to acquire it. Never will the largest results be reached until the Church has a ministry at home and abroad that has been divinely trained by personal and private prayer. The missionary life is a life of prayer. It is the salvation of the soul. It is the source of its strength and power. It is the grand key to success. A missionary who prays is a missionary who will succeed.
they had, learned this art. The Acts of the
Apostles are punctuated with prayer. It is from
the "Prayer Watch" that the remarkable
record of the Moravian Church sprang. Louis
Harms and Gossner and Fliedner and Brainerd
and Müller and Hudson Taylor are not
as well as for encouragements to the Church to take
advantage of this power, which she is invited to
exercise. The extent of the field, the vastness
of the work to be done and the inadequacy of the
forces at work, ought to impress every thoughtful
man and woman with that absolute dependence
of the Church upon the help that comes from
above. If men are to be born into new life, it
must be done through the creative power of the
author of life. He hears and answers prayer; therefore, pray without ceasing.

7. One more qualification must be mentioned,
as it is most important of all. Jesus Christ acted
under the constraint of love. It was love that
impelled the Father to give His Son. And it was
love that constrained the Son to give His life a
ransom for many. Even as His Father loved Him, so did He love sinful men. This is the one
more important of all. There are many other
considerations, such as the civilizing power of
the Gospel, the moral and spiritual condition of the
heathen, commercial and political advantage,
the success of Missions—all of which have
weight, but will not make and sustain mission-
aries nor will they make a missionary church.

When Peter the Hermit aroused Europe to
attempt the rescue of the Holy Land from the
hand of the infidel, his battle cry was, "It is the
will of God." "It is the will of God" is our
battle cry. The constraint of the love of Christ
is alone strong enough to maintain this
conflict.

Dr. Griffith John says that he often thought of
Paul and the Yang-tse together. The great river
in its way to the sea encounters many obstacles
and flows in varied channels. Now it dashes
against the rocks like a mad thing and then
rushes through a narrow gorge at a wild race
speed. It then emerges into a wider and more
even channel, and flows quietly, calmly, and
majestically, but it flows on continuously and
irresistibly. Try to turn it back, and you will
find it impossible. Ask it to stop, and it will
tell you it cannot. Ask why, and it will tell you,
"Almighty law has taken possession of me and I
cannot help myself. The law of gravity con-
straineth me." So with Paul, a mighty law, the
law of love, took hold of him and he could not stop.
"The love of Christ constraineth me."

The same writer quotes the advice given to a
novice by a senior missionary in China. "Try as
fast as possible to learn to love the Chinese for
Christ's sake, for you will find it very difficult
to love them for their own sake."
The heathen are His and He loves them and
for His sake even the most unlovely can become
the object of our affection. A heart overflowing
with much love will not find it hard to associate
with the downcast and fallen, and will quickly
elect a response. Love is the world's need and
hope.

In conclusion, let it be said there is work for all;
and missionary training should vary with the class
of men and the work they are expected to do, yet
the qualifications specified above should be com-
mpassed by all. Certain attainments in scholarship
may be beyond the reach of some who, neverthe-
less, would be useful in the foreign field, but all
can acquire and none will be useful without the
Christ-like spirit.

There are many points of a physical, intellec-
tual, and practical nature that deserve mention,
and will claim the attention of earnest candidates,
but need not be detailed. On the other
hand, there are points that deserve notice in order
that they may be avoided, which, tho in them-

selves apparently trivial, have been stumbling-
blocks, and have brought disaster into many a
mission. Good men have sometimes come under
the influence of peculiar views as to questions of
economy, or salary, or prophecy, that have
impaired, if not wrecked, their usefulness. Bet-
ter judgment might still have entertained these
views, while not offensively obtruding them upon
others, and thus the loss of influence would have
been avoided. A loving, prayerful spirit will
ever be of the least the enemy gain an
advantage. "Lo, I am with you always!" is the
guarantee of wisdom and guidance in every time
of need. The missionary above all men needs to
realize the apostle's prayer; To be strengthened
with might in the inner man, that Christ
may dwell in your hearts by faith, that you
may be rooted and grounded in love, may be able
to comprehend with all saints what is the breadth
and length and depth and height, and to know
the love of Christ which passeth knowledge, that
you might be filled with all the fulness of God."

Somerville (Andrew), Lectures on Missions and Evangeliza-
tion, Student Volunteer Movement; Call, Qualifications
and Preparation of Missionary Candidates, New York, 1901;

QUDSHANIS. See Kochang.

QUEENSTOWN: A town in British Guiana, South America, situated on the W. bank of the
estuary of the Essequibo River. Station of the
PB, with 1 missionary and his wife and 1 woman
missionary.

QUEPE: A river in Chile, South America,
which gives the name to the Agricultural
and Industrial station of the SAMS at Maquehue
Reserve, situated about 30 miles S. E. of Chol-
chol, and 10 miles S. of Temuco. The people
reached by this mission are Mapuche Indians.
The station has (1903) 2 missionaries, 1 native
worker, 1 school, 1 dispensary, 1 hospital, and
1 industrial school.

QUESSUA: A settlement in Angola, West
Africa, situated about 185 miles E. by S. of S.
Paolo de Loanda. Station of the ME, with
(1900) 2 missionaries and their wives, 1 boarding
school, 2 Sunday schools, 4 native workers,
and 44 professed Christians, of whom 25 are
communicants.

QUETTA: A town in Baluchistan, India, situ-
tated about 190 miles N.W. of Shikarpur, in
the Northwest Frontier Province, India, with which
it is connected by railway. Station of the CMS
(1886), with 4 missionaries, three of them with
their wives, 5 native workers, 1 place of worship,
1 hospital, and 23 professing Christians. Station of
the CEZ (1895), with (1903) 2 women mission-
aries, 10 native workers, 3 day schools, 1 board-
ing school, 1 hospital, and 50 Zennah pupils.

QUEZALTENANGO: A town in Guatemala,
Central America, situated about 125 miles N. W.
of Guatemala city, nearly destroyed by an earth-
quake in 1874. Station of the ME, with 1 mis-
ionary residence. Station of the PN (1898), with
1 missionary and his wife and 1 outstation.
QUICHUA LANGUAGE: A South American language spoken by various tribes of Indians in the western and northwestern part of the continent. It is found also with variant dialects among the Indians of Ecuador, Colombia, and, perhaps, in Bolivia and Argentina. It is written with Roman letters.

QUINHONGA: A town in Angola, West Africa, situated about 160 miles S. E. of S. Paolo de Loanda. Station of the ME, with (1903) 3 missionaries, one of them with his wife; 1 place of worship, 1 Sunday school, 1 printing house, 1 industrial school, and 1896 professed Christians, of whom 472 are communicants.

QUILON: An ancient town and seaport in Travancore, South India, situated on the Malabar coast, 40 miles N. of Trivandrum. It had a trade with China as early as 851. Portuguese established a trading post here in 1503, which was afterward seized by the Dutch. Population, 3,000. Station of the CMS (1821), with (1903) 1 missionary and his wife, 78 mission workers, 20 outstations, 24 Sunday schools, 1 boarding school, 44 day schools, and 2,515 professed Christians, of whom 472 are communicants.

RAIPTJR: 8 miles E. of Loanda. Station of the ME, with (1903) 3 missionaries, one of them with his wife; 1 place of worship, 1 Sunday school, 1 printing house, 1 industrial school, and 1896 professed Christians, of whom 472 are communicants.

RAJABAI: A town in British East Africa, situated about 10 miles N. W. of Mombasa, on the mainland. Station of the CMS (1846), with 1 missionary and his wife, 2 women missionaries, 15 native workers, 1 place of worship, 2 day schools, 1 boarding school, 1 dispensary, and 839 professed Christians, of whom 399 are communicants.

RAGHAVAPURAM: A village in Madras, India, situated between the Kista and Godavari Rivers, about 60 miles E. by S. of Kanchipuram. Station of the CMS (1872), with (1900) 1 missionary and his wife, 16 native workers, 1 place of worship, 15 day schools, and 2,608 professed Christians, of whom 461 are communicants.

RAJATEA: One of the Society Islands in the South Pacific, situated N. W. of Tahiti. It played an important part in the early history of the LMS mission to Tahiti, having yielded almost the first encouragement in the depressing period of early effort. Station of the Paris Evangelical Mission Society, with 2 missionaries, 4 native workers, 4 places of worship, 1 day school, 1 primary school, and 624 professed Christians from four different villages on the island.

RAINY: A settlement in W. Pondoland, Cape Colony, South Africa, situated 40 miles N. W. of Port St. Johns. Station of the UFS (1897), with (1903) 1 missionary and his wife, 21 native workers, 15 outstations, 1 place of worship, 12 day schools, and 186 professed Christians. Some use the old name Eltubeni.

RAIPUR: A town in the Central Provinces, India, situated in Chatisgarh division, about 150 miles W. by S. of Sambalpur. Population, 24,948. Station of the German Evangelical Synod of N. A. (1880), with (1903) 2 missionaries and their wives, 36 native workers, 16 outstations, 11 places of worship, 1 Sunday school, 8 day schools, 1 boarding school, 1 dispensary, 1 orphanage, and 910 professed Christians. Station also of the ME, with (1903) 1 missionary and his wife, 22 native workers, 1 outstation, 2 places of worship, 5 Sunday schools, 4 day schools, 2 orphanages, 1 industrial school and 324 professed Christians, of whom 88 are communicants.

RAJMAHAENDRI: A historic town in Madras, India, on the left bank of the Godavari River, 32 miles W. by N. of Cocomada. Population, 24,555. The surrounding country is rich and the people are prosperous. Station of the General Council, Evangelical Mission Church, with (1903) 2 missionaries, one of them with his wife; 2 women missionaries, 1 place of worship, 1 Sunday school, 1 printing house, 2 boarding schools, 1 industrial class, 1 dispensary, 1 hospital, and 139 native workers. Some write the name Rajahmundry.

RAJANJUR: A town 23° Chota Nagpur, India, situated on the Gajipur state on the Bengal and Nagpur Railway, about 75 miles S. W. of Chaibasa. Station of the Gossner Mission Society, with (1903) 1 missionary, 30 native workers, 2 day schools, 31 Sunday schools, and 9,192 professed Christians, of whom 194 are communicants.

RAJ NANDGAON. See NANDGAON.

RAJPUTANA: A vast territory in the northwest of India, which derives its name from the Rajput clans who inhabit it. The word "Rajput" means "son of a king," and the Rajputs trace their origin from the princely families among the original Aryan invaders of India. Some of these clans have had their abodes here from time immemorial. The exact boundaries of Rajputana it is difficult to give. In a general way it may be said to lie between Sindh on the west, the Punjab on the northwest, the United Provinces on the northeast and the Malharta states of the Gaikwar, Sindhia, and Holkar on the south. Its limits of north latitude are 23° and 30°, and of east longitude 69° 30', and 75° 15'. Its area is supposed to be about 127,541 square miles, containing a population (1901) of 9,723,301 people. The population is predominantly Hindu, only about 10 per cent. being Mohammedan and about half as many Jains. Those of other faiths furnish a mere sprinkling in the total mass. There are many wild jungle tribes—especially the Bhils, of which any exact enumeration is well high impossible; the Bhils, however, are supposed to number nearly 200,000, included mostly among the Hindus, whose religion they follow. Much of the territory of Rajputana, especially in the western part, is mere desert. The southeastern portion is more fertile. The chief city is Jaipur, capital of the native state of the same name. Population (1901), 160,000. Missionary
work in Rajputana is chiefly that of the United Free Church of Scotland, and dates from 1860. The principal stations are Jaipur, jumla, Naimbana, Udaipur, Alwar, and Jodhpur. Much attention has been given to medical work, and the diligence of the missionaries in relieving distress during famine has given them a firm hold upon the hearts of the people. There is a mission press at Ajmere.

RAMAPATHAM: A town on the Bay of Bengal, India, about 43 miles N. of Nellore. Climate not unhealthy, but generally debilitating. Mission station of the ABMU (1869), with (1903) 3 missionaries and their wives, 1 woman missionary, 20 native workers, 6 outstations, 2 places of worship, 4 Sunday schools, 5 day schools, 2 boarding schools, 1 theological class, and 2,000 professed Christians, of whom 727 are communicants. The name is given to the Ramapatam.

RAMAD: A town in Madras, India, situated about 65 miles S. E. of Madura, near the line of islands stretching toward Ceylon, which are known as "Adam's Bridge." Of this "bridge" the princes of Ramnad used to be the guardians. Station of the SPG (1825), with (1903) 1 missionary, 24 native workers, 3 places of worship, 6 day schools, 3 boarding schools, 1 industrial school, and 665 professed Christians.

RAMPURT: A settlement in Alaska, within the Arctic circle, situated on Porcupine River at the frontier of British Columbia. Station of the CMS (1903), with (1903) 1 missionary, 1 place of worship, 1 hospital, and 25 professed Christians.

RANCHI: A town in Chota Nagpur, Bengal, India, capital of Lohardaga division. Population, 13,000. Station of the Gossner Missionary Society, with (1903) 7 women missionaries, 93 native workers, 38 places of worship, 27 Sunday schools, 8 day schools, 2 boarding schools, 1 theological class, 1 dispensary, 1 hospital, and 8,200 professed Christians, of whom 4,446 are communicants. Station also of the SPG, with (1903) 3 missionaries and their wives, 2 women missionaries, 175 native workers, 1 place of worship, 5 day schools, 2 boarding schools, and 13,867 professed Christians, of whom 6,209 are communicants. These statistics include the district with the town.

RANGOON: The capital of Burma, British India, situated on the left bank of the Rangoon River, 26 miles from the sea. It was annexed by Great Britain after the war of 1852. Large sums of money have been expended in improving the city, and the European quarter contains many fine buildings, tho the native town is not much improved. Buddhism has here its stronghold, and the city is noted for the number and splendor of its temples and shrines. The most magnificent and venerated one is the Shwe Dagon, or Golden Dagon dagoba, said to be 2,300 years old. It is heavily decorated with gold, and is the receptacle of relics of the last four Buddhas, including eight hairs of Gautama.

Much internal and foreign commerce is carried on in Rangoon, as it has communication by rail and by water with the upper provinces. An English newspaper is published here. Population (1901), 234,881.

Station of the ABMU (1813), with (1903) 13 women missionaries, 332 native workers, 29 outstations, 150 places of worship, 67 Sunday schools, 75 day schools, 3 boarding schools, 2 theological classes, 1 printing house, and 9,196 professed Christians. Station also of the SPG (1884), with (1903) 8 missionaries and their wives, 62 native workers, 6 day schools, 4 boarding schools, and 3,750 professed Christians. Station also of the Leipzig Missionary Society (1878), with 13 native workers, 7 outstations, 1 place of worship, 1 day school, 2 boarding schools, and
325 professed Christians, of whom 272 are communicants. Station also of the ME, with (1903) 2 missionaries and their wives, 4 women missionaries, 40 native workers, 5 Sunday schools, 3 Sunday outstations. Station of the WMS, with (1903) 2 missionaries, 14 native workers, 9 outstations, 9 places of worship, 6 Sunday schools, 7 day schools, 1 orphanage, 1 lepers' asylum, and 262 professed Christians, of whom 241 are communicants.

RANIGANJ: A town in Bengal, India, situated on the railway 55 miles N. of Bardwan. Population, 19,578. Station of the Mission to Lepers (1891), which aids the leper work of the WMS. Station of the WMS, with (1903) 2 missionaries, 14 native workers, 5 outstations, 9 places of worship, 6 Sunday schools, 7 day schools, 1 orphanage, 1 lepers' asylum, and 262 professed Christians, of whom 241 are communicants.

RANIPET: A town in Madras, India, situated in the N. Arcot district, 65 miles W. of Madras City. Station of the RCA (1856), with (1903) 1 missionary and his wife, 2 women missionaries, 81 native workers, 35 outstations, 30 places of worship, 24 Sunday schools, 1 boarding school, 1 hospital, 1 dispensary, and 1,566 professed Christians, of whom 406 are communicants. Some write the name Ranipet.

RAO-CHAU. See JAO-CHAU-FU.

RAROTONGA. See HERVEY ISLANDS.

RAROTONGAN LANGUAGE: One of the Polynesian languages, and one of several spoken in the Hervey or Cook's Islands. It is the dialect found in those islands, selected by the missionaries for printing, and has been reduced to writing in Roman letters.

RATNAGIRI: A town in Bombay, India, and capital of the district of Ratnagiri, situated 82 miles N. of Kolhapur. Population, 12,616. Station of the FN (1873), with (1903) 1 missionary and his wife, 5 women missionaries, 10 native workers, 3 outstations, 2 places of worship, 5 Sunday schools, 1 boarding school, 1 orphanage, 1 leper asylum, and 63 communicant Christians. Station of the ZBM, with (1903) 5 mission- ary workers, 2 native workers, and 1 day school.

RATNAPUR: A village in Bengal, India, situated in the Nagaon district, 62 miles N. N. W. of Calcutta. Station of the CEZ (1894), with (1903) 7 women missionaries, 10 native workers, 3 outstations, and 1 hospital. Station also of the CMS, with (1903) 12 native workers, 1 place of worship, 4 day schools, and 804 professed Christians, of whom 111 are communicants.

RAWAL PINDI: A town and military post in Punjab, India, situated about 88 miles E. S. E. of Peshawar. Because of its broad, straight, handsome streets, and its excellent drainage and sanitary arrangements, it is said to present a cleaner appearance than any other town in Northern India. Trees have been freely planted, and give the place a very pleasing appearance. Bishop Milman was buried here. Population (1901), 87,688. Altitude, 1,652 feet. The place is now fortified in a very elaborate manner. Station of the UP (1856), with (1901) 3 missionaries with their wives, 3 women missionaries, 20 outstations, 1 Sunday school, 1 orphanage. Station also of the WMS, with (1903) 1 missionary, 2 native workers, 6 outstations, 1 Sunday school, 6 places of worship, and 83 professed Christians.

REBMANN, John: Born in Germany; was appointed, in 1846, by the CMS, to the East African Mission. On his arrival at Mombasa arrangements were made by him and Dr. Krapf for commencing a mission among the Wa-Nikas, and Kisu- lutini (Rabai), fifteen miles inland, was selected for the station. The people gave their consent for a mission, assuring the missionaries of their friendship and protection. They found the place more healthful than Mombasa, but the people exceedingly ignorant, superstitious, intemperate, sensual, and cruel. They now began the journeys in the interior which led to the remarkable Central African discoveries. They brought to light a new country highly favorable for missionary labor, and three groups of mountains, from 4,000 to 5,000 feet high, enclosing the Taita country. In 1847 Mr. Rebmann made a new journey to Kadiaro in the Taita country, and in 1848 he explored the country beyond the Taita, called Jaggar or Chagga, 300 miles inland, the Switzerland of East Africa, traveling on foot for seven days in a thorny jungle infested with wild beasts. On May 11 he discovered the smoking Mount Njaro. Rebmann and Krapf, tho giving much time to exploration, were above all missionaries. Their grand aim was the spreading of the Kingdom of God. Yet their regular work led to great results for science. Their remarkable journeys into the interior were the basis for many years of both missionary and scientific enterprises in East Africa. In 1856 Rebmann, being alone at Rabai, was driven from the place by an incursion of the Masai, who destroyed the station and dispersed the Wa-Nika people. Retiring to Zanzi- bar, he continued his linguistic studies for two years, and then, returning to his old station, resumed his labors. Until 1875 he was there alone. He finally became blind. When the mis- sion was reinforced in 1875, he returned home. An attempt to restore his sight was unsuccessful. He took up his abode near Dr. Krapf in Konthali, and died October 4, 1876, after a missionary ser- vice of twenty-nine years. Rebmann translated Luke's Gospel into Ki-Swahili, and compiled also Ki-Nika and Ki-Nyasa dictionaries of great value. After discovering the two large African moun- tains, Kilima Njaro and Kenya, a map was prepared from native information, showing a great inland sea two months' journey from the coast, which led to the journeys of Burton, Speke, and Grant, and later influenced the travels of Livingstone, and the expeditions of Stanley and Cameron.

RECIFE. See PERNAMBUCO.

REEVE, William: Born in England, 1794; studied at Gosport; sailed April 22, 1816, as a missionary of the LMS to India; stationed first at Bellary. In January, 1821, accompanying Mrs. Reeve to Madras, on her way to England for health, he remained in Madras, occupied in the revision and publication of the Kanarese version of the Old Testa- ment. He returned in October to Bellary, leav- ing again for Madras in January, 1824, to arrange for printing his Kanarese and English dictionary. The same year he sailed for England; reembarked for India in 1827, and was stationed at Bangalore. In 1831 he went to Madras to superintend the printing of the Kanarese and English versions, which, being completed, he returned to Banga- lore. In 1834, on account of ill-health, he left.
with his family for England. He died at Bristol February 14, 1850.

**REFORMED (Dutch) CHURCH IN AMERICA**, Board of Foreign Missions: As early as 1643 missionary work was carried on by ministers of this body among the Mohawk Indians, and the interest grew with the years. In 1816 the Church united with the Presbyterian Association and formed the Reformed Churches in forming the United Missionary Society, which sent missionaries to the Indians, until 1826, when it was merged in the ABCFM. In 1832 the General Synod elected "The Board of Foreign Missions of the Reformed Protestant Dutch Church," which, operating through the American Board, was allowed to conduct its missions according to the ecclesiastical polity of the Church. It continued its connection with the American Board until 1857, when an amicable separation took place, due to no dissatisfaction existing, although the bounds of that more would be accomplished if the two Boards acted independently. In the same year the American Board transferred to this Board the mission at Amoy, in China, and the Aret Mission in India, with the individual missionaries connected with it. Contributions in kind and cash, to the amount of $10,076, rose the next year to $25,034; and have since gone on increasing, till in 1902-3 they reached the sum of $158,895.

**Constitution and Organization**: The Board of Foreign Missions of the Reformed Church in America consists of 27 members, ministers and laymen, of whom at least one-half shall be ministers, chosen by the General Synod, and regularly incorporated under the laws of the State of New York. Its members are chosen for three years, and are divided into three classes, so that one-third of the membership is elected each year.

In addition to the regularly constituted Board, each Classis nominates from its own members a missionary agent, subject to the approval of the General Synod, for the purpose of advancing the interests of missions and disseminating the Gospel.
There is also at Palmaner a theological seminary, opened March, 1888, for which a special endowment fund of about $50,000 was raised by Rev. Jacob Chamberlain, D.D., while in the United States in 1887. The Mission has also a hospital and dispensary at Yorokawa, and the Mary Tabor Schell Hospital for Women, at Vellore. At Vellore is also the Elizabeth R. Voorhees College, with more than 1,000 students.

A mission to Japan was begun in 1859, when Rev. G. F. Verbeck and Rev. S. R. Brown, with Dr. D. B. Simmons, sailed for that Empire. Mr. Verbeck went to Nagasaki, and Dr. Brown to Kanagawa, and later to Yokohama. In 1889 the Mission was divided into the North Japan Mission, having its center at Tokio-Yokohama, and the South Japan Mission, with its headquarters at Nagasaki.

The North Japan Mission has a force of 20 missionaries, six ordained men and one unordained; seven married and six unmarried women. It occupies five principal stations: Yokohama, Tokio, Nagasaki, and four outstations and preaching-places. Many churches have been gathered and organized, with thousands of communicants, which have no longer any formal connection with the Mission, and of which no report can be made. The churches or congregations at present directly under its care are two, with 498 communicants, whose contributions, in 1901, amounted to $1,059. Its principal institutions are the Ferris Seminary at Yokohama, a boarding school for girls, with 96 pupils, and the Meiji Gakuin at Tokyo, the support and conduct of which it shares with the Board of Foreign Missions of the Presbyterian Church. This institution has an academical department with 168 students and a theological department with 12.

The South Japan Mission has its field in the large southern island of Kiushu. Eleven missionaries are connected with it. Five ordained men, two married and four unmarried women. It occupies four stations: Nagasaki, Saga, Kagoshima, and Kumamoto. It has 4 churches under its care, with 339 communicants, whose contribution amounted to $960. At Nagasaki are located the Steele College for boys and young men, having 100 students, and the Sturges Seminary for girls, with 54 students.

The Arabian Mission was established as an independent and undenominational Mission in 1859 for special work among Mohammedans. It was adopted by the Reformed Church in 1894. Its stations, on the west coast of the Persian Gulf, are three: Busrah, Bahrein, and Muscat, with two outstations at Amara and Nasaryieh. In all the territory occupied by it there is no other mission. It has access to a population estimated at 1,600,000. Its missionaries are 13, seven men, of whom two are physicians and one unordained; four married women, of whom two are physicians, and two unmarried. During the year 1902 were sold 4,059 Bibles, Testaments, and Scripture portions, in seventeen different languages; 3,362 were sold to Mohammedans. The Mason Memorial Hospital at Bahrein, for which a donation of $6,000 was received in 1901, was completed in 1902, and promises to be an efficient aid in the work of the Mission.

Although in part the original intention of the Reformed Church, as expressed in the constitution of its Board of Foreign Missions, that Classes or ecclesiastical bodies similar to those in the United States, and having organic relation to the Synod, should be organized at as early a date as possible in each of its mission fields. This purpose has been carried out only in the Arcot Mission in India. The Classis of Arcot was organized in 1854. The attempt to secure a similar organization at Amoy was made in 1857. It was met, however, with earnest remonstrance by the members of the mission, who were closely associated in sympathies and labors with the missionaries of China. English Presbyterianism in India was finally prevailed, and the missionaries of both churches, together with their native pastors and elders, now form a single ecclesiastical body.

In 1876 the union of the missionaries of the Reformed Church in Japan with those of the United Presbyterian Church of Scotland and the Presbyterian Church (North) of the United States in the “Council of United Missions,” and the formation of the “United Church of Christ in Japan,” embracing the churches organized under those missions, was approved by the Synod.

In 1886 the General Synod formally affirmed the stand taken by its Board of Foreign Missions “on the important subjects of Union and Cooperation in Foreign Missions, etc.,” and “permitted and advised” the Classis of Arcot “to initiate such measures as shall tend to bind together the churches of the Presbyterian polity in India.” In September, 1902, the “Synod of the South Indian United Church” was constituted, by the union of the Classis of Arcot, with the Madras Presbytery of the United Free Church of Scotland.

The Reformed Church, therefore, occupies advanced ground in relation to the principle of cooperation in mission work, and the establishment in each mission field of a national, self-governing, self-supporting, and self-propagating church, “that shall grow from its own root.”

The Reformed (Dutch) Church in the United States; Foreign Missions of the: The Board of Foreign Missions of the Reformed Church in the United States was organized on September 29, 1838, at Lancaster, Pa. The suggestion came from the Home Missionary Society, and met with a most cordial response.

From 1840 to 1865 the Board had no foreign missionary of its own, but was a regular contributor to the ABCFM toward the support of Rev. Benjamin Schneider, D.D., missionary in Turkey.

Beginning with 1860, the Synod became dissatisfied with this method, and in 1862 it decided to establish its own mission, applying its funds to the support of the India Mission, and to the work among the Winnebago Indians in Wisconsin. In the year 1873 the Board was reorganized, and laid the foundation for its present flourishing mission in India.

The first missionaries, the Rev. A. D. Gring and his wife, settled in Yokohama in 1879, but it was thought best to remove to Tokio, and there, in May, 1884, he organized the first church. Other fields of labor in Japan have been Fukushima, Saga, the North and South Mission, and Akita. The report (1901) shows 19 missionaries in charge of about 50 places, where work is conducted in the different fields, assisted
by 10 ordained ministers and 25 evangelists. The church membership was 2,142, and there were 40 schools, with 130 teachers and 1,420 pupils. The Mission suffered a serious loss in the burning of the girls' school building at Sendai, but the result has been enlargement rather than retreat. Missionary literature has been another important feature in the work.

In 1899 the Board commenced work in China, sending out Rev. Mr. Hoy and, later, Rev. Frederick Cromer to Yo-chow, in the province of Hua-nan. A medical missionary and his wife, also a physician, have been more recently appointed. Auxiliary to the Foreign Mission Board is the Woman's Missionary Society, General Synod of the Reformed Church in the U. S., with headquarters at Tiffin, Ohio.

REFORMED PRESBYTERIAN (Covenanter) CHURCH IN NORTH AMERICA; Foreign Missions. In 1818, a committee was appointed to inquire into the expediency of establishing a foreign mission. Nothing was accomplished then, however, and it was not until 1841 that the question was seriously entertained and plans for foreign work were proposed. In 1843 a committee was chosen to select a field for cultivation, and the island of St. Thomas, in the West Indies, was chosen. In 1864 this spot was abandoned in favor of Haiti, and a mission commenced in 1847, which, however, was discontinued in 1849.

At a meeting of Synod, held in 1856, interest in missions was revived, and it was resolved to recommence foreign work. Syria was chosen as the field of operations. The Rev. R. J. Dodds and Joseph Broome were chosen missionaries, and with their families sailed for Syria in October, 1856. After spending some time in Damascus and Zahleb, Latakia, on the Mediterranean, was selected in October, 1859, where the mission was permanently established.

In 1867, the New Presbyterian Church of Scotland having abandoned its mission to Aleppo, Dr. R. J. Dodds took charge of it until his death in 1870. The work was extended to Suedieh on the River Orontes in 1875, to Tarsus, in Cilicia, in 1882, and later to Mersine. The latter mission is so important that it is built on the island of Cyprus. Within recent years a Chinese mission has been in progress in Oakland, Calif., and Indian missions have been established at several points in the United States, and more recently a station has been opened at Te-tsing-chau (Tak-hing-chuan), in the western part of the province of Kwang-tung, China.

The work in Syria has been chiefly among the Nusairiyeh, who, while nominally Muslims, are really a pagan people. They are the lineal descendants in race and religion of the Canaanites who dwelt before Joshua, and are as yet almost absolutely inaccessible to any Christian influence. Holding to their ancient faith with a pertinacity that is wonderful, yet compelled by a relentless oppression to cover their belief under the forms of a hated religion, they have developed a power of deceit and dissimulation probably not equalled in the history of any race. They have repelled, in their gloomy isolation, all Christian workers, except the sturdy Scotch Covenanters, who, with persistency not less dogged than their own, but with a faith which lays hold on the power of the high ideals of the Christian dispensation.

The missionary force consists (1900) of 20 missionaries, 48 native workers, in 4 stations and 9 outstations, with 310 communicants, and 730 pupils in 14 schools. In China there are (1903) 8 missionaries (2 physicians). The work is yet in its infancy.

REGIONS BEYOND MissIOnary UNION (Formerly known as the East London Institute for Home and Foreign Missions): In 1873 the Rev. H. Grattan Guinness, D.D., a Baptist minister in London, organized the East London Institute for Home and Foreign Missions, for the special purpose of training for missionary service those anxious to enter it, but unable to do so for lack of means. An old house at Stepney Green was secured, and during the first year 32 students were received. A second house was taken, and as the needs increased a third was added, as also a wing to the original building, known as 'Harley House.' From the beginning this has been strictly undenominational, its property vested in a board of trustees representing different Christian bodies, and has had the cordial support and counsel of such men as Rev. F. B. Meyer, G. E. Morgan, Esq., of The Christian; George Hanson, D.D., R. Wright Hay, and others. This has resulted in the evident fact that men and women have had a longer or shorter training in this institute, and have gone to the foreign field in connection with about forty missionary societies, or as independent, self-sustaining missionaries. They have represented various nationalities: English, Scotch, Irish, and American, French, German, Italian, Spanish, Swedish, Danish, Russian, Bulgarian, Syrian, Egyptian, Kaffir, Negro, Hindu, Parsee, Kurd, and Hebrew. They have gone into all parts of the world: Nepal, India, Syria, Armenia, Egypt; to France, Spain, Portugal, Italy; to the east and west coasts of Africa, Natal and Cape Colony; to Prince Edward's Island, Cape Breton, Canada, and the Western States of America; to the West Indies, Brazil, and the Argentine Republic; Australia, and New Zealand.

In addition to this foreign work, a large home-mission work is carried on in the East London district of Bromley, where students and deaconesses receive practical training in evangelistic and medical mission work, and a large amount of helpful literature is brought to bear upon the neglected masses of the great city.

For some years the attention of Rev. A. Tilly, of Cardiff, one of the directors of the BMS, turned to Dr. Guinness and invited the cooperation of the institute in an attempt to send a few evangelists right into the interior. Messrs. Cory, of Cardiff, and Irvine, of Liverpool, promised assistance, and upon the publication of Stanley's letters, in the fall of 1877, it was decided to attempt an entrance into Africa by the new route, the friends above named forming themselves into a committee for the conduct of the enterprise, to which was given the title, The Livingston Island Mission. The Mission was to be evangelical, but undenominational, and it was hoped at first that it might be made self-supporting; but this idea was soon relinquished by the committee. Funds to start with having been contributed chiefly by the committee, volunteers were furnished by the Institute. Mr. Tilly was Secretary for the first three years, but in 1880
the work had so increased as to require more time than he could spare from his pastoral duties, and Dr. and Mrs. Guinness were asked to undertake the work of the school. At first, it was a branch of the East London Institute, the committee to resign all share in its management, and act only as an advisory council. Dr. and Mrs. Guinness assented to this plan, and the Mission was thus conducted for several years.

In 1883 the ABMU turned its attention to the Congo, and overtures were made by the Institute to take up the work, which was already well established, and leave the English organization free to go to the “regions beyond.” The policy of the ABMU was one of concentration and radiation from a center, while the idea upon which the Livingstone Inland Mission was organized was a chain of stations to reach far into the interior. The Union felt that the Livingstone Mission, with its extreme stations, 800 miles apart, would give them room enough and to spare for several years to come, and they were unwilling to extend operations beyond the equator. The directors of the Institute, on the other hand, were constantly asking what of the region beyond, with its tens of millions of people yet to be evangelized! And at length, in 1888, they resolved to take up the African work again, extending it farther up the Congo and along the tributary rivers. Thus the Congo Balolo Mission was formed to be in perfect harmony with, but independent of, the ABMU.

The Swedish missionaries, when the mission passed under American management, formed a separate society and continued work on the north bank of the cataract of the Congo, one of their number, Nils Westlind, translating the entire New Testament into the dialect used there.

In 1886 Dr. Harry Guinness became associated with his father and mother in the work of the Institute, and in 1891 sailed for the Congo to study the conditions and possibilities of missionary service in Central Africa. Subsequently he turned his attention to Central and South America. Gradually the scope of the Society’s work enlarged until in 1884 it assumed the name of the Presbyterian and Missionary Union,” by which it is now known; the central thought being to reach lands beyond those already within the sphere of missionary labor. Dr. Guinness visited Panama, Ecuador, Peru, Bolivia, and Chile, crossed the Andes and descended the Amazon. The result was the establishment of mission work at Cuzco, in Peru, and in Argentina. The last field occupied by the Union is in India, where it commenced work in 1899 in Behar, one of the darkest and most needy sections of the empire.

Livingstone Inland Mission: The pioneer of this mission, Mr. Henry Craven, with a Danish sailor, who was quickly recalled as unworthy, reached Banana, at the mouth of the Congo, in February, 1878. A passage in a trading vessel was secured to Boma, 70 miles up the river, which by canoe to Yellala Falls, 30 miles farther. After the usual African experience a landing stage was built at Matadi, at the end of the lower river navigation, and a station formed at Pala Vala, 15 miles inland on a plateau 1,600 feet above the sea, where the population were, in the main, friendly.

Two thousand miles were passed in the mission boat in the summer, and seven more by the end of the year, and a station was formed at Bansa Manteka. The question of transportation became a most difficult one. The natives were unreliable, the Kroo-men from Sierra Leone expensive. A well-equipped party from England arrived in 1889 to find that several of the company that preceded them had died; but they were encouraged and took possession. In 1881 the little steamer-launch “Livingstone” was sent out with another band of volunteers. The vicissitudes of the work, the sickness of so many, and the loss by death of five, led to doubts as to the wisdom of continuing the attempt. The experiment was continued till Mr. Guinness encouraged them, and new stations were formed until, when in 1884 the mission was transferred to the ABMU, seven stations were in working order: Mukimocka, Palabalala, Bansa Manteka, Mukimbungu, Lukunga, Leopoldville, and Equatorville. The “Henry Reed” was sent on the Upper Congo, and twenty missionaries, four of them married, formed the working staff of the mission.

Since the foundation of the work nearly fifty had volunteered for it and had been sent out. A few proved unfit and were recalled, some were taken back to England, and eleven had given up their lives on the Congo.

Congo Balolo Mission: Until early in the 19th century, the dwellers on the southern bank of the Upper Congo were peaceful members of the Baara race. At that time a great nation came traveling down, and took possession of the left bank of the stream, turning out the former occupants and bringing in a new language, customs and people. The powerful invaders were significantly called Balolo, from people, or the strong tribe. The country where the former Balolo conquered, and have since kept and dwelt in, is nearly five times as large as England, and fills the horseshoe bend of the Congo—extending from the Lomami in the east to Lakes Mantumba and Leopold on the west, and from Lopori on the north to the headwaters of the Bosira and Jaupa on the south.

In 1888 Mr. John McKitttrick, of the Livingstone Mission, returned to England on furlough from the advanced outpost of the mission, Equator Station, with an intense interest in the Balolo, and also a living specimen of the race, a Balolo boy named Bonpole. The result of this apparently accidental visit was the organization of the Balolo mission. When the pioneer party for the new field was ready to sail a farewell meeting was held at Exeter Hall, in March, 1888. Many speeches were made—one at least unexpected and unpremeditated. It was spoken by Bonpole’s dark lips, and in his high, shrill voice. Hundreds of listeners in the great hall were hushed into silence to hear the few and ignorant words framed into broken sentences, for Bonpole’s vocabulary was very limited, and of grammar he knew nothing. The little lad said his people “wanted Gospel,” and then asked, “Isn’t it a shame—shame to keep Gospel to yourself? Not meant for English only! Isn’t it a shame? My people want Gospel, isn’t it—a shame?” Was ever the cause of foreign missions more forcibly put? The mission band sailed from England on the 18th of April, 1889, and reached its destination on the Lulonga River in the middle of August—four months only to accomplish what ten years before could not have been done at all! How different the experience of this party from that of the pioneers of the Livingstone Mission! The hearty cooperation of the missionaries already in the field not only facilitated the journey, but also averted the
danger from exposure and inexperience to which the earlier workers in so many cases had succumbed. No fatal illness occurred on the journey, and the mission was able to arrive in London in good health. Early in 1890 the second party arrived, and with them the Mission's own steam-launch, the “Pioneer,” which had been built in London, and was to be reconstructed as the “Henry Reed” had been, at Stanley Pool. This was followed in 1892 by the “Lusitanian,” a better boat than its predecessor.

Of the 96 missionaries who, in the thirteenth years, 1889-1902, entered the service of this mission, 30 have died, 35 remain on the mission staff, 6 are in the home work, 8 have joined other missions, 9 broke down in health and retired, and 8 proved unsatisfactory. The results in the field have not been as apparent as in some other sections, notably the cataract region, where the ABMU and the Swedes are working; but later reports show spiritual awakening, and there are classes of enquirers numbering 100. In the missions there are about 1,500 children, and to these the missionaries look for the best fruit.

**Argentina and Peru:** The work of the Regions Beyond Missionary Union in South America was the result of the visit to that continent of Dr. Harry Guinness, after whom the union was named. This seemed to have been no definite enterprise, as in the case of the Congo-Balolo Mission, but a number of those who had graduated at Harley House went out independently, and afterward were gathered into two missions in Argentina and Peru, the without any very complete organization. In Argentina, work, partly evangelistic, partly educational, is carried on at Buenos Aires, La Floss, Coronel Suarey, and Tres Arroyos, in each case under the care of a missionary and his wife, with the assistance of native evangelist, and teacher. The present system and the income contributes materially toward the expense of the mission work, the RBMU meeting deficiencies. In Buenos Aires a group of nurses has been established, especially for maternity work, and access being thus gained to the schools, the education was secured throughout the whole of Argentina the hearts of the people are becoming more open to spiritual instruction. School work may not be profitable from a pecuniary point of view, but is of great value for its effect upon the parents, as well as the children.

In Peru the work was commenced in 1893 by two men, Messrs. Jarrett and Peters, who secured an entrance into Cuzco despite the most bitter opposition. The clergy daily preached against them in all the churches, the people passed them with averted glance, and every door was closed at their approach. Their assassination was advocated by some, and at last they were compelled to leave (1895). Another attempt the next year was unsuccessful, but in 1897 they established themselves. Opening a British artstore as the reason for their residence, and supporting themselves partly by the sale of photographs, they succeeded in gaining the confidence of the people until after six years they were welcomed in every part of the city, and were free to speak the Gospel message wherever they chose. The work of relief work was already under way, and Mr. Jarrett and Mr. Peters, were even invited to give instruction in athletics and drawing in the Government schools. In February, 1903, the first evangelical church in the interior of Peru was organized by Mr. Jarrett at Cuzco. Mr. Peters has been made a citizen of Cuzco and been elected a member of the municipality—a striking illustration of the change that is taking place in more than one South American community.

**REHOBOTH:** A town in German Southwest Africa, situated in the Hesco country, about 170 miles E. S. E. of Swakopmund. It is celebrated for its hot springs. Station of the Rheshian Mission Society, with (1903) 2 missionaries, one of them with his wife; 6 native workers, 1 Sunday school, 2 day schools, and 1,209 professed Christians, of whom 484 are communicants.

**RELIEF WORK OF MISSIONS in Public Calamities:** In the limits prescribed, it will be impossible to give any history or performance of missionary relief work. This article will treat only the necessity, principles and wider results of such effect.

1. **Necessity:** The object of Christian Missions is to extend the spirit and teaching of Christ. He taught by act as much as by word. He was about doing good. When John the Baptist, in prison, sent for proofs of Jesus’ Messiahship, he was referred to the acts of mercy which the Christ was doing. Jesus said that He would recognize His followers at the day of judgment by their works. Their mission was to be to feed the hungry, clothe the naked, and help the homeless. Works of mercy, considered meritorious even under Mohammedan and heathen systems, are of the essence of Christianity. It is the wiser and deeper, the often unconscious, working of the spirit of Jesus that has differentiated Christendom, through numerous institutions and laws for the care of the orphan, the blind, the deaf and dumb, the sick, insane, and poor, and for the humane treatment of even the lower animals. No one who is careless or slack in any business is a fit representative of civilization, still less a worthy herald of the Good News. The necessity, therefore, of missionaries engaging in relief work in times of great public calamity does not admit of argument. They are under even greater obligation to such services on the part of the missions, because throughout the whole of Argentina the hearts of the people are becoming more open to spiritual instruction. School work may not be profitable from a pecuniary point of view, but is of great value for its effect upon the parents, as well as the children.
the part of missionaries, officers of boards, and the Christian public, a firm and glad acceptance of the proposition that philanthropy is always a legitimate use of the individual's means. In some cases of acute and wide-spread distress, through famine, flood or earthquake, through pestilence or war, relief work may rightly, for the time, absorb the strength of an individual or even of a whole mission, to the apparent detriment of the regular literary, educational or even evangelistic forms of service.

II. Principles Governing Mission Relief. 1. Fidelity: It goes without saying that funds placed in the hands of missionaries for relief should be not only sacredly guarded, but also applied in accordance with the exact wishes of the donors. It is a great tribute to the integrity of missionaries the world over that, so far as the writer's knowledge goes, no questions are raised as to their fidelity in handling the vast sums of money that from time to time are thrust into their hands. This is the more striking in view of the fact that relief work is with them a self-imposed task, that they are almost invariably people with no support except a small living salary paid them for other less arduous services, and that they are under no bonds, nor any supervision in the management of the work committed to them. Because of the confidence reposed in them, and as a justification of its continuance, missionaries should always, from the outset of any relief effort, keep exact accounts of all moneys received and expended, and render these accounts, duly audited, to the boards, committees, periodicals, or individuals through whom the funds have been transmitted. Many such reports are remarkable for detail and accuracy, especially when we consider the many and pressing cares resting on those who prepared them.

2. Selection of Beneficiaries: The first and, in general, the principal consideration should be that of need. In questions of life or death no tests of race or creed should hold. Help should be given the starving Kurd or Armenian, and to the plague-stricken Christian or Hindu or Chinaman on that principle that the Father “maketh his sun rise on the evil and the good.” Such impartiality is especially imperative where relief funds have been raised by appeals to the general public on purely humanitarian grounds, to which people of all classes have responded. The missionaries or any temptation to use funds so given in such a way as to directly favor the institutions or the spiritual results which he may have at heart. He must be content to scatter the bread on the waters with impartial hand. In so doing he will discharge his plain duty and may in the end find that he has given to blind and prejudiced hearts the most impelling proof of the truth of his message. I would not modify the above principle in spirit of a conviction, based on an experience of several years in raising popular funds for sufferers by the Armenian massacres and by the famines of India, that at least nine-tenths of the moneys contributed, even through purely secular committees, came from Protestant people of a positively religious character. Jews and Catholics maintain splendid charities of their own, but do not, as far as I have been able to ascertain, to the boarded, closed general relief funds of the above character. But while trying to do good to all men, the missionary and his constituency at home will also, naturally, make special provision for “them who are of the household of faith”; and after the crisis of a calamity is over, and the relief problem ceases to be of an acute nature, the missionary will be freer to continue the relief on more limited lines, both as to its nature and recipients. Popular funds will then dwindle, and the money that continues to come will be from people who are in full sympathy with the aims of the mission and who will approve of orphanages, industrial schools, etc., which shade into the regular work of the missionary.

3. Methods of Relief: In order to know who are most in need, some sifting process is necessary. This may be done either by actually going to the homes of the people, finding out their exact circumstances, and giving them money and provisions, or, on the other hand, by providing remunerative labor under such conditions that only those most in need will apply for it. The latter method has much in its favor. In the first place, it will save much time and expense. Secondly, by a process of natural selection it will eliminate impostors. Thirdly, it avoids pauperizing, an evil second only to the calamity itself. Fourthly, it can make relief funds go further by being used over and over. For instance, one poor family bound to the door by one set of poor people can be woven into cloth by another, made up into garments by a third, and finally sold at reduced prices or given to the absolutely helpless. Fifthly, the relief work may be so planned as, in a measure, to forestall such disasters in the future, the end may be attained by setting the people to work digging wells, reservoirs and canals, to insure a better water supply; or making roads for better transportation; or by erecting buildings for orphanages and hospitals; or by teaching new and improved arts and trades, by which the people can earn more and not be so largely dependent on agriculture for a living. The large and excellent results that have often been achieved by missionaries with such efforts is a splendid proof of their administrative ability and practical wisdom. The first method of seeking out the needy in their homes must also often be followed. For there are some too ignorant, others too young or feeble to come of themselves, and there are others prohibited by social status, caste, or sex from public and promising labor. It is just these classes, often most destitute and beyond the scope of government aid, for whom wise and sympathetic special provision should be made by the missionary.

4. Spirit: But the fidelity, impartiality and wisdom emphasized above need to be exercised in a spirit as sympathetic as it is wise, and as patient as it is masterful, if the work is to bear spiritual as well as material fruits. Even in the conduct of well-organized charities and asylums in Christian lands it is necessary to guard against a hard, sordid, and demoralizing tendency among the employees. The poor, faint, and distracted victims of disaster will appreciate what is done for them all the more if done in a gentle and kind way.

III. Wider Results of Missionary Relief Work. 1. On the Missionary: The first and most apparent results may be the exhaustion and possible breakdown of some of the missionaries under the great strain, physical, mental, and moral. This should be foreseen by the Boards and needed rest provided at the earliest moment,
with a complete change of scene if possible. Barring a breakdown, the missionary will find himself better equipped than ever. The closer insight into the life and thought of those who have been brought to understand their conditions of life, sentiments, and moral qualities. Missionaries have frequently developed greater efficiency through the calling out of latent faculties under the stress of enlarged responsibility. The need of thoroughly practical and common-sense methods is brought out by these crises, and the lessons they teach should be fruitful in correcting defects of the missionary system. Industrial schools and manual training, now widely maintained with enthusiasm and success, are in many cases the direct outgrowth of relief work. The product of these schools cannot fail to be a more manly and competent type of convert, who will help to solve the problem of self-support.

2. On the Native Christians: There is every reason to believe that the above influences affecting the missionary for good are felt also by the native Christians. A spiritualization of the churches in connection with the relief work has been reported in some cases. This may be true to some degree, especially when, as in Armenia, the relief work necessitated by the massacre was given the shape of a very serious effort to interfere with the regular work of the churches and schools, but also had to be continued so long as to lose something of the sacred tenderness felt by all at the outset. Jealousies sometimes arise among church members over the selection of distributors of relief, and the handling of large sums of money proves a temptation to some, as it does in every land. Another unfortunate result is said to be an impression that the missionaries have unlimited means at their command, and hence that they should be less urgent in native contributions.

3. Evangelistic Results: The effect on the unevangelized is generally reported to be highly beneficial. This is the case in proportion as the people understand that missionary relief funds are not supplied by any government treasury, but are free gifts from the people of Christian lands, made and dispensed without any proselytizing, but in the spirit of loving service personified by Christ. So conducted, relief work will not encourage "rice Christians." That no money sticks to the fingers of the missionaries is an object lesson not lost in lands where official corruption is the rule.

4. Reflex Influence: The effect on the constituencies of the boards is helpful, first, by stimulating sympathy and overcoming the selfishness which is chiefly responsible for the niggardly gifts of many to missions. There is abundant evidence that relief funds are not disadvantageous to the treasuries of the boards. The gifts of regular contributors are not lessened by these special appeals, while many whose first gift is for relief become interested in the missionaries and the support of their regular work. Secondly, these crises are of great educational value through the popular interest aroused in the conditions of life and characteristics of races who are the objects of missionary effort. Thirdly, the dark background of a great calamity often solves the very purpose for which Mozarteum, if only for a moment, the noble and truly great personality of missionaries who by the nature of their calling must labor in spheres so remote and humble as to escape the recognition they richly deserve.

The effect on the general public is also most salutary, resulting as it does in the exercise and consequent strengthening of the noble sentiments of philanthropy and the brotherhood of man. There is no doubt that relief from one or many lands to another in distress is productive of international good feeling and hastens the day when the nations shall not learn war any more.

"We hate those whom we have injured," said a philosopher of heathen Rome. It is equally true that we love those whom we have befriended. Every wisely conducted relief effort may therefore be encouraged both as a cause and an effect of the coming of the Kingdom.

Theological Missionary Conference Report, Vol. 2, pp. 230-231,
New York, 1891.

RELIGIOUS TRACT SOCIETY (1799): During the outbreak of missionary enthusiasm that marked the close of the 18th century, a group of practical Christian men, among whom were Rowland Hill and the Rev. G. Burder, met at St. Paul's Church in London to consider the great need of making Christian literature available to the masses. The result of their meeting was the establishment of the Religious Tract Society. The aim of the society was to promote the circulation of Christian tracts and books for the general improvement of the public. The society's work began in 1802, with the publication of the first issue of the Religious Tract Society's London Chronicle, which became a valuable resource for the dissemination of religious knowledge.

The society's work continued throughout the 19th century, and it expanded its activities to include the publication of other religious literature, such as books and periodicals. The Religious Tract Society was also involved in the formation of other mission societies and the support of missionary work. The society's work was marked by a commitment to the dissemination of religious knowledge and the promotion of moral and ethical values.

Religious tracts were distributed through the society's network of agents, who were often local clergy or mission workers. The society's work was supported by voluntary contributions from individuals and churches, and it was also supported by government grants and other sources of funding.

The Religious Tract Society continued to operate until the early 20th century, when it was succeeded by other religious organizations that continued the work of promoting religious knowledge and the dissemination of religious literature. The society's legacy continues to influence the work of missionary organizations and religious publishers today.
In France the Society makes grants in aid of the Dépôt Central, the Paris Tract Society, the McAll Mission and smaller grants to individual Christians. The German Evangelical Society of Switzerland and the Belgian Evangelical Society of Belgium both receive small grants. In Italy the depot at Rome and the Italian Evangelical Publication Society, Florence, have received annual grants. Since 1870 the work of the Society in Spain has been carried on from Madrid as a center with subdepots at Barcelona, Saragossa, Seville, and Gibraltar. In 1902 those at Saragossa and Seville were closed. Colporteurs are employed to visit the villages with Bibles and Christian literature. In Portugal a depot is maintained at Lisbon, and a subdepot at Oporto, but in 1902 it was decided to discontinue the latter. Colporteurs are employed, and the publications of the Society are scattered through the country. At St. Miguel (Azores), and S. Vicente (Cabo Verde), depots are maintained without expense to the Society.

In Germany grants are made to the German Evangelical Book and Tract Society; the Baden Christian Colportage Union, the Society for the Free Distribution of Holy Scriptures and Religious Tracts, Dresden, and several individuals are aided in Christian work. In 1902 the committee of the Society became convinced that the time had come to place upon the Protestants of Germany the task of carrying on their evangelical work, and decided to reduce the annual grants to German organizations. Individual grants are made to Christian workers in Holland and Denmark, chiefly for distribution among sailors. In Sweden the Society has made a subvention to the National Evangelical Society of Sweden, one of the most active centers of religious publications in Europe, but in 1903 it was decided to discontinue this grant. In Norway the Society has assisted the Christiana Home Mission. In Russia every opportunity for disseminating Christian literature has been seized, and the committee are ever on the lookout for new openings. A depot is maintained in Poland at Warsaw, and grants are made to individual workers; assistance has been given in the Bacteriological Mission of Finland. In Greece the only regular work of the Society for some time has been tract publication work under the superintendence of Dr. Kalopothakes, of Athens. In Austria work is carried on in Vienna in conjunction with the British and Foreign Bible Society, and at Graz and Budapest. Subdepots were for many years established at Lemberg, Trieste, Bucharest, and Belgrade, but were discontinued in 1902. Aid has been given an active evangelical pastor in Prague, Bohemia. For over 35 years the Society has had a depot in Hungary, but not until 1902 was it granted a legal existence by the government, and able to work openly without hindrance.

In Turkey the Society has made grants to the publication work in Constantinople under the American Board, to the Mission Institute in Smolov, Bulgaria, and to individual missionaries in Turkey in Asia, especially at Aintab and Marash. Since 1871 the Society has sustained an important publication work through the American Press at Beirut in Syria, and special grants have been made to individual workers in Syria and Palestine. Since 1882 the Society has made grants for the preparation of a vernacular Christian literature in India, and many large auxiliary tract societies have been formed in various parts of the empire, all of which have been aided by the Society. Perhaps the most important of these organizations is the Christian Literature Society for India, which received grants from the Society from 1870 to 1879. The Book and Tract Society has been aided annually since 1831. The North India Christian Tract and Book Society, Allahabad, has received grants of money and printing paper. The Bombay Book and Tract Society, founded in 1827, has received yearly grants from the Society since its formation. The Gujarat Tract and Book Society and the Orissa Tract Society receive annual grants of printing paper. The Madras Religious Tract and Book Society, the oldest existing organization of this kind in India, has received grants since its formation in 1818. Other societies in India receiving regular aid of money or printing paper from the RTS are the Bangalore Tract and Book Society, the Malayalam Religious Tract Society, the South Travancore Tract Society, the Ceylon Christian Literature and Religious Tract Society, while grants of stock have been made to the depots at Thiruvananthapuram at Trangassu, Mamlain, and Mandalay. Publications connected with the various missions in India have been aided and grants have been made to individuals working in the empire. The Decennial Conference of Indian Missionaries convened at Madras in 1902 sent to the Society an acknowledgment of the services it had rendered in India: "Without the books, tracts, and leaflets published with the aid of this and kindred societies, mission workers would be seriously crippled."

In China the Society cooperates with the Society for the Diffusion of Christian Knowledge among the Chinese, and works through the various auxiliary organizations of the empire. The Chinese Tract Society of Shanghai receives grants in aid of the vernacular publication work, and in 1898, with the support and encouragement of the London Committee of the RTS, published an annotated Bible for the Chinese—one of the greatest works ever undertaken by the missionary body in China." For twenty-six years the Central China Religious Tract Society and the Mission of the RTS have worked at Hankow, Wuchang and Hanyang. It is managed by a committee representing four nationalities and six missions, but its mainstay has been the RTS, of London, yearly grants having been made for its work ever since its formation. Annual grants are made to the Hongkong Religious Tract Society, and to the Bible, Book, and Tract Depot in that city; to the Religious Tract Society of Canton, Amoy, and West China; to the North China Tract Society, and the Manchurian Tract Society. Special grants have been made for the colportage work of the National Bible Society of Scotland, the China Inland Mission, and individual missionaries of other denominations in China. In Japan the Society makes large grants to the Japan Book and Tract Society, located in Osaka, and made a special grant in aid of the Japanese vernacular literature for the visitors of the Osaka exhibition. Few organizations have such a far-reaching scope as the Religious Tract Society. Besides its work in the larger countries of Europe and Asia, it makes grants to workers in the Straits Settlements, in Persia, in North and South Africa; in Egypt; in Tunis; in the Sudan; and Central Africa, through the CMS workers. In South Africa the Port Elizabeth Railway Mission is supplied with literature.
at reduced rates, the South African Auxiliary of the Bible Society received grants of tracts for hospital use; books were granted at half price for the Dutch Girls’ Home at Cape Town, and for Sunday school libraries in six or more denominations, as well as grants of pictures, tracts, etc., for individual workers. In West Africa grants of books, tracts, pictures, electrotypes, etc., have been made to missionaries of various creeds and nationalities. In Madagascar a grant of paper alone, from the London Missionary Society, was made to the Protestant Episcopal Church in Madagascar, a grant of £1,825 was made to the Methodist Mission in Madagascar, and a grant of £1,474 to the Baptist Mission, Madagascar. In New Zealand the £19,501 was made to the London Missionary Society, £2,010 to the London Missionary Society for New Zealand, £1,475 to the London Missionary Society for New Guinea, £1,004 to the London Missionary Society for Tahiti, £1,000 to the London Missionary Society for the South Pacific, £600 to the London Missionary Society for the Samoas, £350 to the London Missionary Society for the New Hebrides, and £350 to the London Missionary Society for the Society Islands. In Australia, £11,175 was granted through the London Missionary Society, £1,000 to the London Missionary Society for New Guinea, £700 to the London Missionary Society for the Samoas, £350 to the London Missionary Society for the New Hebrides, and £350 to the London Missionary Society for the Society Islands.

In Canada grants are made in aid of the Montreal Auxiliary Religious Tract Society, the Bible Society Auxiliary of Quebec and the South-Alaska Mission. In Nova Scotia the British American Book and Tract Society of Halifax receives annual grants of tracts and favorable terms on books for Sunday school libraries, and for colportage work on the coasts of Newfoundland and Labrador. Special grants have been made to individual workers in Newfoundland. A single grant of tracts was made in British Columbia, and to the American Seaman’s Friend Society, at New York, applied for by the Secretary.

In Mexico the United Tract Committee of Mexico City received aid for Spanish tract printing, and workers have been aided in British and Spanish Honduras and in Costa Rica. In South America at British Guiana, Brazil, Argentine Republic, Chile, and Colombia, to individual workers. In the South Pacific, books and colportage work have been made, for Sunday school and day school libraries, and tracts for general distribution at Jamaica, Antigua, Bahamas, and Bermudas. In Australia the same grants have been made to New South Wales, Victoria, Western Australia, and Tasmania. In New Zealand grants have been made of publications at reduced rates to the Scripture Gift Association of Auckland; the New Zealand Bible Tract and Book Society at Dunedin and Woodville for use in the Bush country.

The LMS Mission Press of New Guinea receives grants of printing paper. In Samoa a like grant is made. In Fiji the Wesleyan Missionary Society has been aided with literature, and in Tahiti a missionary of the Paris Evangelical Society has received grants of French and English publications.

During 1903 the total circulation from the Home Depot, including books, tracts, periodicals, cards, and miscellaneous issues, was 29,481,210, of which 19,843,350 were tracts. The total for the issues from the foreign depots have been estimated at 20,000,000, making about 49,481,210 issues for the year, a grand total of 3,540,196,440 since the formation of the Society. The receipts of the Society from all missionary sources amounted to £19,501 to the General Fund, £4,174 to the Centenary Fund. Grants of money, paper, electrotypes, books, tracts, and other publications in Great Britain and Ireland, £11,175; similar foreign grants, £7,084; a total of £18,259.

REWA: A settlement in the Fiji Islands, situated on the E. coast of Viti Levu. Station of the Australian Wesleyan Methodist Society, with (1900) 1 missionary, 620 native workers, 23 outstations, 220 places of worship, 480 Sunday schools, 527 day schools, 1 theological college, and 6,729 professed Christians.

RHEA, Samuel Audley: Born at Blountville, Tenn., January 23, 1827; graduated at Knoxville University, 1847; Union Theological Seminary, New York, 1850; ordained February 2, 1851; sailed for India in the spring of 1850. He was the first of the ABCFM Missionaries to go to the East Indies. In 1851 Mr. Rhea went to the new station at Gavar, among the mountain Nestorians. His health broke down under the strain of that lonely and arduous life, and he was obliged to visit the United States for recuperation in 1859. At his return in 1860 he was stationed at Urmia. He was well versed in Hebrew and Syriac; spoke the modern Syriac with great accuracy and fluency; was able to preach in Azerbaijan Turkish with acceptance to the Armenians and others. While at Tabriz he pursued investigations in the Eastern Turkish, with the view of translating the Scriptures into that tongue, having already rendered in it the Sermon on the Mount. While in Kurdistan he studied Kurdistani, and wrote a valuable synopsis of the grammar. He was treasurer of the mission, and its business agent in general. He also had the charge of evangelistic work in fifteen villages, some of them very large. His travels among the wilds of Kurdistan were often protracted and perilous. In 1864 he returned to America as a representative of the mission. The next day he appeared convalescent, and started to return to Urmia, but died at the roadside village of All Shah, September 2, 1865.

RHEES, Rev. Henry Holcombe: Appointed a missionary of the ABM July 15, 1878, and went immediately to Tokio, Japan, where he built the first American Baptist Mission house in Japan. In 1882 he moved to Kobe, where the remainder of his missionary life was passed. He visited America in 1889 and 1891, and the latter year he received the degree of Doctor of Divinity from Shurtleff College, Alton, Ill. The writer of these words met him at Kobe in the year 1895, and was deeply impressed by his intelligent views on the mission work in Japan, his indefatigable spirit, and his self-sacrificing service for his Master. For years he was the senior missionary of the Baptist Mission in Japan; and the influence of this consecrated servant of God in all departments of the work was noticeable in permanence. He fell in sleep at Kobe, May 10, 1890.

RHENIUS, Charles Theophilus Ewald: Born November 5, 1790, at the fortress of Gaudens, West Prussia. He was led to become a missionary by reading the writings of the Moravians. He sailed for India as a missionary of the CMS, February 22, reaching Madras July 4, 1814. He soon proceeded to Tranquebar, his appointed station. At the end of five months he was sent to Madras to found a new mission, being the first to labor there under the CMS. During the five years of his residence in Madras he was constantly employed preaching the Gospel in public meetings, conversing with individuals, holding discussions with Brahmins or other learned men, studying the Tamil and Telugu, and making frequent tours to various cities and temples. It was then decided by the committee that Mr. Rhenius should establish a mission in Tinnevelly district, and in June, 1820, he removed to Palamcottam, chief city of the district. Mr. Rough, the English chaplain, having left Palamcottam in 1821, Mr. Rhenius held an English service on the Sabbath for English residents until the arrival of another
chaplain. In 1822 a seminary was established for the education of youth, which has furnished catechists and schoolmasters for the mission. A

istinguishing feature of this mission, largely due

to Mr. Rhenius, was the formation and settlement of Christian villages. In order to withdraw the converts from the influence of heathenism, pieces of

land were purchased, those who forsook idolatry were located on them, and formed into a Christian congregation. A catechist was

appointed, a school established, and a small chapel erected at Calabar. When, in 1826 and the following year, the Christian mission had increased in num-

ber, to relieve the missionary of the burden of their management an association of natives was formed called "The Native Philanthropic Society," having for its object the settling of

native Christians in villages, the building of schoolhouses, the acquisition of grounds, etc., for these purposes, and the rendering of other assistance to the native Christians in their external affairs. In 1832 an unhappy controversy arose between Mr. Rhenius and the CMS

on the subject of the form of ordination to be used for native ministers. This led to his dismis-

sal from the service of the Society, and his continuance in the same field as an independent missionary, often at variance with his former missionary associates. He continued this independent mission work until June 5, 1836, when he died.

Mr. Rhenius was one of the greatest mission-

aries working in India in the first half of the 19th century. He had extraordinary power over those natives who came under his personal influence. The happy union of cheerful piety and

muslimine energy with a bodily constitution capable of great and sustained exertion rarely appears in the missionary field. In addition to

this, Mr. Rhenius was an accomplished scholar and a master of the Tamil language. To him it was given to revise and improve and to fabricate a translation of the Tamil Scriptures. He published in Tamil a Harmony of the

Gospels, which remains in general use. Other

works in Tamil were The Essence of the True Veda, A Summary of Divinity, and a very useful Tamil Grammar.

RHENISH MISSIONARY SOCIETY. See GER-

MANY; MISSIONARY SOCIETIES IN.

RHODESIA: A British territory and sphere of influence in South Central Africa, comprising the region lying to the north and west of the Trans-

vaal Colony and Bechuanaland, bounded on the east by Portuguese East Africa, on the north by the Congo Free State and on the west by German Southwest Africa. Total area is estimated to be about 600,000 square miles. It is divided by the Zambesi River into Northern and Southern Rhodesia.

Northern Rhodesia was first opened by David Livingston. It is divided into Northeastern Rhodesia and Northwestern Rhodesia, both

provinces being administered by the British South African Company, the defense of the ter-

ritory being assumed by the British Central African Protectorate. Northeastern Rhodesia has about 120,000 square miles, and a population

of about 339,000. It comprises the region lying between Lake Nyasa and Lake Mweru, with its affluent, the River Luapula, and extends from

Lake Tanganyika nearly to the Zambesi.

Northwestern Rhodesia, or Barotseland, with an indefinite area, somewhat larger than Northwestern Rhodesia, extends from the Congo Free State southward to the German ter-

ritory and the Zambesi, and is bounded east and west respectively by Northeastern Rhodesia and Portuguese West Africa.

Southern Rhodesia, with an area of 144,000 square miles, a population of about 500,000,

embraces the territory from the Zambesi to the Transvaal and Bechuanaland, extending west-ward from Portuguese East Africa to the German territories. It includes Matabililand and Masho-

naland. It is especially in the line of the British immigration and mining movements of Central and South Africa, and is fast being explored and

exploited. In Matabililand about 15,000,000

acres of land, and in Mashonaland about 12,000,-

000 acres, have been surveyed. Townships to the number of 12 have been organized. In 1901 there were 11,000 whites, 6,000 Africans in the terri-

tory. Lines of railway, built and projected, connect the chief centers with Cape Colony.

There are about 3,000 miles of telegraph. The territory has deposits of gold. The vast table-

land of the north and northeast has an elevation of about 3,000 feet, and is well watered by a

rich soil and fine climate. The Matabili, so called from an immense shield behind which they were "hidden" in war, were originally a band of Zulu warriors, whose ranks were recruited from the lands they conquered. They are very fierce, daring, and proud. The Makalaka and Mashona were the former masters of the land. The former were nearly exterminated, the latter form the substratum of the northern population, and are very industrious. The Banyai are distinguished by their physical strength, light complexion, clean habits, and by the respect paid to women.

In 1896 there was a native revolt in Matabil-

land, immediately followed by a similar disturb-

ance in Mashonaland. Both these were thor-

oughly quelled.

The Missionary societies operating in Rhodesia are the LMS with 8 stations, the SPG with 7

stations, the Paris Society in the N. W., the ME and the ABCFM, in the extreme east, besides the WMS, the PB, the SDA, and the Berlin Society.

RIBE: A settlement in British East Africa, situated near the coast about 15 miles N. of Mombasa. It stands on a high tableland, with a fine

view over the ocean. Station of the United Free Methodist Churches (1861). The estate belonging to the UMFC Mission is about 750

acres. There are (1903) 2 missionaries, 5 native workers, and pupils, line. Mission, 1 day

school, 2 Sunday schools, and 359 professing

Christians.

RIBEIRAO PRETO: A town in Brazil, South America, situated in the State of Sao Paulo on the railway, about 200 miles N. by W. of Sao Paulo
city. Station of the MFS (1893), with (1903) 2 missionaries and their wives, 2 women

missionaries, 2 native workers, 3 outstations, 2
places of worship, 3 Sunday schools, 2 boarding schools, and 550 professed Christians.

RICHARDS, William: Born at Plainfield, Mass., U. S. A., August 22, 1792; graduated at Williams College 1819, Andover Theological Seminary 1822; sailed November 29 same year as a missionary of the ABCFM for the Sandwich Islands, accompanied by four natives educated in the United States. He was stationed at Lahaina, on Maui. In 1837 he visited his native land with his wife and six children, arriving in May and returning in November. In 1838 the king and chiefs requested him to become their teacher in the science of government and laws, and also their chaplain and interpreter in their intercourse with foreigners. The code of laws adopted by the nobles and people was translated into Hawaiian by Mr. Richards, occupying 228 pages. From 1842 to 1845 he was absent on a mission to secure the acknowledgment of the independence of the islands by Great Britain, France, and the United States. After this recognition by foreign powers, he was sent as ambassador to England and other courts. On his return in 1845 he was appointed minister of public instruction, which office he held till his death, November 7, 1847. His influence with the king and government was very great.

RICHMOND: A settlement on one of the small islands of the Fiji group, S. of Vitu Levu Island. Station of the Australian Wesleyan Missionary Society, with (1900) 1 missionary, 228 native workers, 11 outstations, 76 places of worship, 150 Sunday schools, 150 day schools, and 2,351 professed Christians.

RIETFOINTE: A settlement in Bechuana-land, Cape Colony, South Africa, situated on the front of German Southwest Africa, about 320 miles E. of Angra Pequena. Station of the Rhenish Missionary Society, with (1903) 1 missionary, 2 native workers, 1 day school, and 420 professed Christians, of whom 168 are communicants.

RIFFIAN LANGUAGE: The tribes inhabiting the Rif Mountains in the northern part of Morocco use this language, which belongs to the Hamitic group of the African languages. It is spoken as a Berber dialect, and is often spoken of as a distinct language. So far as it is written the Arabic alphabet has been used for the purpose.

RIGGS, Elias: Born at New Providence, N. J., November 19, 1810. Died at Constantinople, Turkey, January 17, 1901. During his early years he showed decided linguistic talent, and while at college he applied himself especially to the mastery of Hebrew, Syriac, Arabic, Chaldean and modern Greek, and produced an Arabic grammar and Chaldean manual. While he was completing his last year at Andover Theological Seminary he was invited by the American Board to join its mission in Greece, and on September 20, 1832, he was ordained. With Mrs. Riggs, on October 30, 1832, he sailed from Boston, and three months afterward joined Rev. Jonas King at Athens. For six years he labored at Argos, largely along educational lines, in Greece; and in 1844, because of governmental restrictions, he was transferred to Smyrna, Turkey, where he continued his work among the Greeks in that city. In 1844 he was assigned to the Armenian branch of the mission; and the greater part of his time from 1845 to 1852 was engaged in the work of translating the Scriptures into Armenian. In 1853 he was transferred to Constantinople, and for three years he was in charge of the Greek department and instructor in theology in the Bebek Training School. He visited the United States in 1856, and after filling the position of instructor of Hebrew at Union Theological Seminary, he was offered the professorship in that institution. Upon his return to Constantinople he began the translation of the Bible into Bulgar- gian, another language he had mastered, and the complete edition of this work was issued in 1871. In 1873 the American and British and Foreign Bible Society appointed him the president of a committee to revise the Turkish translation of the Bible, so as to make it acceptable both to the mass of the people and to the educated. The members of the committee were Dr. W. G. Schaff, Rev. George F. Herrick, Rev. Robert Weakley, and Dr. Riggs. In 1878 the work, which has become the standard, was issued in both Arabic and Armenian characters. Besides his more important translations, Dr. Riggs wrote numerous tracts, school-books, and devotional books; and he produced during his long missionary life, perhaps one of the most remarkable series of extracts and hymns in the Bulgar- gian language alone. To give an idea of the linguistic attainments of Dr. Riggs, it may be stated that he had a working knowledge of twenty languages, and was a master of twelve. There are four nations reading the Word of God as he translated it for them; and as Dr. Herrick says: "The homes, the schools, the churches, where Dr. Riggs' translations of the Word of Life are read, and where the hymns he has translated are sung, are numbered by the tens of thousands, and extend from the Adriatic to the Persian Gulf, from the snows of the Caucasus to the burning sands of Arabia.''

RIGGS, Stephen R.: Born Steubenville, Ohio, U. S. A., March 25, 1812; graduated at Jefferson College; studied theology at Alleghany Seminary; ordained April 6, 1837; went at once, with Mr. Riggs, under appointment of the ABCFM to the mission among the Dakotas. Here he labored in an arduous and zealous manner in the linguistic and literary work at various places till the Sioux outbreak of 1862, when, barely escaping with his life, he fled to St. Paul, returning soon as chaplain of the military forces sent to suppress the outbreak. After a long absence he died, August 24, 1853, aged 71, having spent over 45 years in active and successful work among the Indians. Dr. Riggs reduced the Dakota language to a written form, organizing and adapting it to religious expression, and translated into it nearly the entire Bible. He prepared also a Dakota dictionary of more than 16,000 words, which was published by the Smidtsonian Institution. Upward of 50 volumes, religious and literary, partly translated, partly original, were prepared by him for the use of the Dakotas in their language. He lived to see ten churches organized and efficient, under native pastors. Of his eight children, five entered the missionary field, four among the Indians and one in China.

RIO DE JANEIRO: The capital of Brazil and the most important commercial city of South America. It is situated on one of the finest harbors of the world, 75 miles west of Cape Frio. The bay is land-locked and is
entered from the south. It extends inland 17 miles, with a greatest breadth of 12 miles, and is said to be the most spacious and secure bay in the world. The city itself, like Rome, is built on seven hills, and is intersected by a valley, extending along the sides of the green slopes, present a most picturesque appearance as one approaches from the sea. The old part of the town lies nearest the bay, while the elegantly built new town is situated on the west of it. Here are fine streets, handsome public buildings, hospitals, asylums, over fifty chapels and churches, and many convents and nunneries. A national college, academy of medicine, theological seminary, and a national library meet the literary and educational wants of the people. A splendid aqueduct conveys pure spring-water from a mountain three miles southwest of the city. The climate is tropical, ranging from 54° in August to 97° in December. The annual rainfall is about 60 inches, one-fifth of the whole amount falling in February. The commerce of Rio is based on sugar, and steel, and sugar, and steel, and sugar. As Brazil is the greatest coffee-producing country in the world, Rio is the largest coffee-exporting city. The population consists largely of Portuguese, with a mixture of negro blood, and is estimated (1900) at 750,000. Station of the MES (1878), with (1900) 3 missionaries, 6 of them with his wife; 2 women missionaries, 2 native workers, 2 outstations, 1 place of worship, 4 Sunday schools, 1 printing house, and 245 professed Christians. Station also of the SBC (1884), with (1900) 1 missionary and his wife, 4 native workers, 3 outstations, 1 place of worship, 1 printing house, and 233 professed Christians. Station also of the SDA (1891), with (1900) 5 missionaries, 4 of them with their wives; 1 woman missionary, 6 native workers, 25 outstations, and 697 professed Christians, 18 Sunday schools; 5 day schools. The YMCA (1892) and the ABS (1876) each has an agent here and the BFBS has an agent and 13 native Bible workers.

RIO DE ORO: A possession of Spain on the Atlantic coast of north-west Africa, extending from Morocco to Cape Blanco in Senegambia, and including the island of Fernando Poo. It is governed by a sub-governor under the governor of the Canary Islands. The area is about 243,000 square miles; population about 100,000. In case of the future sale of the territory the right of pre-emption has been given to France. The inhabitants are Moors, Berbers, and negroes, chiefly Mohammedan. No missionary enterprises have been undertaken in this territory.

RIO MUNI: A territory of Spain, on the Gulf of Guinea, having Kamerun on the north and the French Congo on the east and south. Area 9,000 square miles. Population about 300. There is one missionary station of the PN in this territory, situated on the Benito River near its mouth.

RIO VERDE: A village in Mexico, situated in the state of San Luis Potosi, on the Rio Verde. Station of the Associate Reformed Presbyterian Synod of the South (1895), with (1900) 1 missionary and his wife in charge of the station, 40 students, 2 places of worship, 1 Sunday school, 1 day school, 1 orphanage, and 23 professed Christians.

RIU KIU ISLANDS. See Lu-chu Islands.

RIVERSDALE: A town in Cape Colony, South Africa, 150 miles E. of Cape Town, and 50 miles W. of Mossel Bay, on the railway thence to Cape Town. Station of the Berlin Evangelical Missionary Society (1865), with (1903) 2 missionaries, 3 women missionaries, 22 native workers, 6 outstations, 4 day schools, and 1,417 professed Christians, of whom 512 are communicants.

ROATAN ISLAND: An island in the Bay of Honduras, Central America, about 30 miles long. Population, 3,000. Station of the WMS, with (1903) 1 missionary, 38 native workers, 4 outstations, 22 places of worship, 11 day schools, 16 Sunday schools, and 737 professed Christians, of whom 575 are communicants. The name is also written Ruanan.

ROBBINS, Elijah: Born at Thompson, Conn., March 12, 1828; graduated at Yale College 1856, and East Windsor Theological Seminary 1859; ordained August 3; sailed as a missionary of the ABCFM September 29 of the same year for the Zulu Mission, where he labored for nearly thirty years. He was stationed first at Umzumbe, but the latter portion of his life was spent in connection with the Mission Training School at Amanzimtotse. He died there June 30, 1889. This seminary for training Zulu men for the promotion of the great work in the interior of South Africa has seen and been sundered by the death of Robbins' zeal and perseverance. The qualities of the native laborers in the field testifies to the thoroughness of their teacher.

ROBERT COLLEGE, Constantinople: Robert College is an outgrowth of American missions in Turkey. It was founded in 1863 by Christopher R. Robert, a merchant of New York, in connection with Cyrus Hamlin, D.D., who became its first president. The aim was to establish at Constantinople something as nearly as possible like a first-class New England college, thoroughly Christian, but not sectarian, and open to young men of all the nationalities and religions of the East, with the English language as the common ground upon which all could meet. The College was opened in an old mission building at Bebek, with four students, all English or Americans. It was transferred in 1871 to its present location on a commanding eminence on the Bosphorus, six miles from Constantinople, where it owns some fifteen acres of land, secured to it by an imperial charter. It now has three large stone buildings, one of which is used for classrooms and dormitories, a second for scientific instruction and public assemblies, and a third for the preparatory department. Besides those a gymnasium is now (1903) in process of erection, and other buildings are projected. The College also owns a president's house and two professors' houses.

Incorporated under the laws of the State of New York, it is governed by a Board of Trustees, residing in or near the City of New York, who have charge of its funds and appoint its president, professors and tutors. Local affairs are administered by the president and faculty, by whom also all other teachers are appointed. Its endowment fund is now about $350,000, and the value of its real estate at Constantinople is estimated at about the same amount. Of this total sum Mr. Robert contributed somewhat more than $400,000. Its board of instruction consists of 30 persons, of whom 15 are Americans. The enrolment for the academic year 1898-1900, the first year, was between 12 to 15 nationalities, chiefly
Armenian, Bulgarian, Greek and Turkish. The number of languages which must be taught in the College is eleven, and more or less instruction is given in half a dozen more. The common language of the College, however, is English, in which all public exercises are conducted and in which all the students after the third preparatory year become proficient.

There are two departments in the College, the preparatory, with a three years' course, and the collegiate, with five classes. The collegiate course is modeled on that of the smaller American colleges, according to the students a certain amount of Greek, Latin, or other classical and scientific or commercial studies, and leading up to the degree of A.B. or B.S. About 20 students now graduate each year. The aim of the College is, however, to give to those who are unable to take the full course a thorough general education in accordance with the American Christian principles. As the majority of them expect to become business men a course has recently been organized which, while retaining the more important liberal studies, includes a number of commercial subjects, but omits Latin and the more advanced mathematics. Additional arrangements have also been made for more thorough instruction in the physical sciences. In the appointment of instructors great care is exercised to obtain men who are in cordial sympathy with the Christian purpose by which the founders of the College were animated. While there is no interference with the religious beliefs of the students, it is the earnest effort of the faculty to develop in them a, manly, Christian character. All are required to be present at morning prayers, and all boarders at the Sunday evening exercises. They also meet regularly for the study of the Bible, and the different nationalities have their separate YMCA[s], while there is one general association whose exercises are conducted in English. It is its moral, quite as much as its intellectual, tone which has given the College an influence of a high order, and its students have been known to stand in a high position among the other students. A. B. and B. S. degrees have been conferred since 1877, when the College was incorporated. In the intervening years, and during those of the College, a large number of its graduates have been engaged in various callings, and have been of great service to their fellow men. Among them are many physicians, army officers, civil engineers, and business men in all parts of the world. Some 80 of them now fill official positions in Bulgaria.

Since the resignation of Dr. Hamlin in 1877, Rev. George Washburn, D.D., L.L.D., who had previously been connected with the College for eight years, has been its president. Its success has been in large measure due to his eminent ability and his thorough knowledge of oriental character and life. In September, 1903, having reached the age of seventy years, he resigned the office, and, on his nomination, Rev. C. Frank Gates, D.D., L.L.D. formerly president of Ephrates College at Harpoot, was chosen to succeed him. Dr. Washburn continues to give instruction as before, and it is hoped that the College may long have the benefit of his wisdom and his large experience.

The officers of the Board of Trustees are:
State did not allow itself to be deterred by the inconsistency of forcible proselytism with the Gospel. The clergy, in the main, were like wolves in sheep's clothing. And the Roman Church, which maintains her own right to compel the baptized to remain, hereby broke the force of her protest against compelling the unbaptized to enter. Latin Christianity, indeed, being so predominantly an institution, cannot possibly be quite so sincerely disinclined to the ruder forms of conquest as Protestant Christianity, which emphasizes the necessity of inward appropriation of the Gospel.

Spanish America: Here there appears to have been but little forcible proselytism. The conquerors, indeed, prohibited the pagan worship on the ground that the worship of the true God, as practised by Christians or Jews, has alone a right to demand toleration of a Christian government, but the actual incorporation of the American natives into the Christian Church was essentially the work of persuasion. The conquered Indians, indeed, except where they retreated to untenable tribes into the Andes or the Sierras, had little reluctance to accept the forms of the conquering religion. A French priest, however, declares that the Mexicans are Catholics but are not Christians, as Southey says of the common people of England before the Reformation. Such people, who had been through two religions, were not yet evangelized.

The first Mexican missionaries were Franciscans. They are charged with having afterward, at least in Northern Mexico, become hard slaveholders, who brought back their runaway Indians with the lasso. But it does not appear that any shadow rests on the names of the early missionaries. They came first in 1532 from Ghent. One of them, as Kalkar relates, Pedro de Musa, a simple lay-brother, who devoted fifty years of unwearied activity to the Evangelization of the Indians, was invited by the Emperor Charles the Fifth's near relative, Pedro of Ghent, likewise a simple lay-brother. He writes to his imperial kinsman: "Because the people possess a peculiar skillfulness, I can truly say that there are among them good copyists, preachers, and singers who might well be put in the San Francisco of Your Majesty's chapel. In a school and chapel built here there are every day 600 boys instructed. A hospital has been put up near our cloister, which is a great comfort, and a means of conversion." "Most heartily, and in the true evangelical temper, he raised his voice to plead against all oppression of the natives." The Mexican Indians, however, unlike the West Indian and the Peruvian, were treated mildly, or at least with comparative mildness, except in the mountain mines.

In 1532 appeared the first Dominicans, who hitherto furnished most of the bishops. Then came Augustinians, Antony de Roa being the most distinguished. In 1572 came Jesuits, who went into New Mexico, where they have always remained the chief influence. By their skilful kindness, they have been able to win the hearts of the natives by their works and oaths, and established them in villages.

The Inquisition was soon transplanted and raged fearfully. The Indians, however, were not so much exposed to it as the whites, partly from their simplicity, partly from the contempt in which their intellect was held as hardly capable of heresy (the sometimes of pagan practices), and partly from the fact that they were not mentally competent to be admitted to the communion, although analogous to this was also found in their old religion. Mexico, converted, became, in her turn, a basis of missions, particularly to the Philippines and Ladrones.

The Indians of the West Indies, a gentle and pleasing race, were under the Franciscans and Jesuits, who turned their memorial visits to the tombs into veritable orgies of lewdness, met the first wave of Spanish adventure, fierce, cruel, and rapacious, as yet unchecked by the slower steps of civil justice or religious benevolence, and were almost at once swept away.

Peru was conquered in 1535, and after twenty years of disturbances was brought to tranquility in 1555 by the viceroy Mendoza, who took care to provide the natives with priests of good conduct. The Jesuits, too, easily from the mild paganism of sun-worship into a nominally and formally Catholicism. Throughout Spanish and Portuguese America little pains seems to have been taken to build up an intelligent Christianity, adapted to deeply influence the heart and life, and the less enlightened and energetic apprehensions of evangelical truth exerted a marked influence.

The famous Jesuit mission of Paraguay was established in 1556, after the intolerable tyranny of the Spaniards had long rendered fruitless all the attempts of the Franciscans and Jesuits to secure the conversion of the Indians. The Jesuits, judging that the Spaniards needed reconverting first, turned their efforts toward their reformation, with so good effect that before long the Indians, believing, at length, that there must be something in a religion which could change the conduct of the whites, began to return to Christianity, or to seek baptism for the first time. The Jesuits were indefatigable. There was no tropical wilderness too intricate or wide-stretching for them to traverse, no water too wide for them to cross in their hollow logs, no rock or cave too dangerous for them to climb or enter, no Indian tribe too dull or refractory for them to undertake. Their only weapons were the Word of God and the language of love. The Jesuit, like a Christian Orpheus, would often go up and down the rivers drawing the savages to him by the force of music and sacred songs.

The missionaries, apparently becoming convinced that the reformation among the Spaniards, the sufficient to set the good work of Indian conversion in motion, was not enough to make them, on the whole, desirable neighbors for their converts, obtained from the King of Spain the right to govern their 200,000 or 300,000 neophytes with entirely independent authority. Under their mild control the Guarani enjoyed a hundred years' peace, and the Mohaves were as happy as the Pueblo Indians, and the Guatemalans, and the Aztecs, and the Sinaloans. The Jesuits were expelled in 1767. The withdrawal of personal and minute supervision and leadership, as in other Roman Catholic Missions, resulted here in the loss of all that had been gained, and the Indians relapsed into their idolatry and savagery.
North America: In 1526 Pamphilus de Narvaez, a Spanish explorer, set out to conquer Florida. Accompanied by a number of Franciscan monks, he landed at Pensacola Bay April 16, 1528. The party immediately planted a mission near San Luis, Florida, and in the fall of a few months, they turned back, and on reaching the coast built frail boats, in which they attempted to reach Mexico. They reached land, only to perish later on from starvation, sickness, or at the hands of the natives. Little is known of the work of the missionaries beyond this, and the no regular organized mission was established.

In 1545 a Dominican Father, Louis Cancer de Barbastro, with three associates, proceeded to the coast of Florida, where he and two of his associates were murdered, and the mission came to naught. Another mission to Florida was attempted by a number of Dominicans, but, like the preceding efforts, ended in suffering and death for the missionaries. From 1566 to 1570 some French Jesuits sustained a mission near the present site of St. Augustine. The first successful attempt to establish a mission in New Mexico was in 1573 by the Spanish Franciscans. This mission continued until 1673, and had during this time over six hundred converts.

In 1608 a missionary, Father De Monts, attempted to reach the Zuni Indians, but succeeded only in planting a large cross on the hill which commanded the Zuni city of Cibola. Of the missionaries who went out with De Soto's expedition, every one perished before the remnant of the company reached the coast. In 1577, the Franciscan monks made a successful attempt to establish a permanent mission in New Mexico. Thirty years later this mission reported over eight thousand converts to Christianity. So rapid had been the progress among these missions that large numbers of Indians were converted before the Puritans had begun missionary work in New England.

The first religious body to do missionary work among the Indians of Canada and of the West was the French Jesuits. In all the early French exploration, the missionary idea was prominent as that of the extension of territory.

Cartier's commission authorized him to explore "in order the better to do what was pleasing to God, our Creator and Redeemer." De Monts was also required to have the Indians "instructed, invited, and impelled to a knowledge of God, and the light of faith and Christianity."

In 1608 De Monts planted his first settlement at the mouth of the St. Croix, on Bonn Island. A short time later this mission was transferred to the Nova Scotia shore, where it was removed in 1615 by the name of Port Royal. This was the first foothold of France and the Catholic Church in the North. In 1611 two Jesuit missionaries began work among the Micmacs of Nova Scotia, removing a little later to Deer Island, near the mouth of the St. Croix River, in order that they might work among the Indians known to the French as the Abenakis, or Abnakis, and to the English as the Tarantans. These Indians were one of the most powerful of the Algonquin tribes, occupying a greater part of what is now known as the State of Maine. They were settled in villages, and possessed many of the arts of civilized life. This first mission among them was shortly attacked and destroyed by the English under Argal. A little later (1619) the Recollects, or Reformed Franciscans, also opened a mission in Acadia, but made their principal station on the St. John's River. They continued their efforts until 1624, but no authentic account of their remains.

The real work for the Abnakis of Maine was done in 1642 by Father Gabriel Lalemant, who was rescued from captivity by missionaries at Sillery, near Quebec. The captives were sent back to their homes on the Kennebec in 1646, Father Gabriel Druilletes accompanying them as far as Norridgewock, the chief settlement of the Abnakis.

Thirty-six years devoted service in an effort to Christianize the Abnakis and other Indian tribes, traveling great distances and enduring every fatigue and every danger. As Father Druilletes traveled to the North and West as well as to the South, the Abnakis took up the habit of going to Quebec to see him. As occasioned them settled at Sillery, which station was moved in 1683 to the south side of the St. Lawrence, at the Chaudiere Falls. It was not until 1668, seven years after the death of Father Druilletes, that two other missionaries were sent to Norridgewock. Before the close of the 17th century most of the Abnakis had become Christians, and at this time the Indians of the Jesuit missions of Maine were equal in piety and devotion to the priests of the seminary at Quebec. The wars between the French and English disturber of the progress of the Mission; the country was devastated; missionaries lost their lives, and after the English finally occupied Quebec in 1763 the Mission was abandoned. In the War of the Revolution the Abnakis sided with the Americans.

Another settlement was made by Bishop Carroll, of the Society of Jesus in Maryland, asking for a missionary, and in 1784 one was sent from France, who for ten years lived at Oldtown and ministered to the Abnakis.

The nation known to the French by the name of Hurons extended from Lake Huron to the English to Quebec. It was occupied, when the French settled Quebec, a strip of land to the south of Georgian Bay, about 75 miles long by 25 wide. They numbered about 30,000, living in 18 large, well-built, and strongly defended towns. One of the Recollects who came out in 1615 was sent to Huron, and on his return Father Le Caron began labors among them. In 1623 Father Viel took his place, but was killed by the Indians two years later. In 1626 Father Brebeuf began his long and faithful service among them. War with England resulted in his being sent out of the country by the victors. On the restoration of peace he returned (in 1633), and eighteen years after the first missionaries entered the Huron country he began to find converts. In 1649, however, the Iroquois devastated the Huron country, murdered Father Brebeuf and his companion with horrible tortures and put an end to the Mission by scattering the Hurons in every direction. Fragments of the tribe moved to the vicinity of Quebec, and were gradually absorbed in the population. Others moved westward to Green Bay, finally settling at Detroit in 1702. The last Jesuit missionary among them died in 1781. The last remnant of the Hurons ultimately removed to the Indian Territory.

In 1641 two French Jesuits, Father Charles Raymbaut and Father Isaac Jorgues, were sent to visit the Hurons of their western firm. Only a short visit was made at this time, the intention being to return soon and establish a mission. The death of Raymbaut prevented this. Fifteen years later, a flotilla of Ottawas appeared upon the St.
Lawrence, seeking a French alliance and asking for French missionaries. Two missionaries started back with the expedition, but were captured by the Iroquois. Father René Menard, and later Jean de Brébeuf, renewed the attempt, setting up his little cabin one hundred miles west of Sault Ste. Marie, near Keweenaaw. The following summer he was either murdered by hostile Indians or died of exposure. In 1665 Father Claude Allouez went to take up the mission left vacant by the death of Menard. After two years of labor on the shores of Lake Superior, Allouez returned to Quebec, staying there only two days, and returned, taking with him Father Louis Nicholas as an assistant. During that fall and winter they received into the faith eight Indians. In the spring of 1668 the celebrated Father Marquette left Quebec, in company with Father Le Boeuf, to join the Ottawa mission. In 1669 Father Claudius Dablon was appointed Superior of these missions, and Allouez proceeded to Green Bay, where he spent the winter and spring in ministering to the needs of the Sac and Fox, the Pottawatamies, and the Winnebagoes. Later, in the early summer, he went to the Menomines, and then to the Winnebagoes. In 1670 two new missionaries were sent to the Ottawa tribes on the islands and shores of Lake Huron, and Sault Ste. Marie. In the meantime, Marquette had opened communication with the Sioux, but war prevented work in that direction. In 1671 Marquette established the mission of St. Ignatius at Michilimackinac. The Jesuit mission work in the Northwest came to a close in 1781. It had been the fond hope of the Jesuit fathers for many years to extend their work to the Dakota or Sioux tribes. In 1680, while Father Hennepin was ascending the Mississippi on a voyage of exploration, he was captured by a band of roving Sioux, and for several months remained a captive among them, acquiring something of their language, but accomplished little as a missionary. Other attempts were made later, but the Jesuits never succeeded in planting a mission among this people. Following these efforts of the missionaries for half a century, the Indians of the Northwest were either exterminated, or ultimately accommodated, not only the missions, but many of the results of their work, were obliterated.

The early history of the French Jesuits who went out from Montreal and Quebec to work among the Iroquois is one of terrible suffering, bloodshed, and death; yet, after all this, a foothold for mission work was finally obtained among this warlike people. In 1669 Father Réflexeix began, on a tract of land opposite Montreal, a mission for the Iroquois. The mission was named St. Francis Xavier des Prés. In 1647 the village representaives not only of the five Iroquois tribes, but also of the Hurons, Mohicans, Eries, Abnakis, and others. A form of government was adopted, and laws were passed excluding from the colony those who would not give up idolatrous practices, drunkenness, and the changing of wives. Missionaries were constantly engaged in instructing the people in religious and secular things. In 1676 the Mission, now numbering over two hundred, found that it had grown beyond the capability of the land to support, and emigrated to Portage River, where Father de la Mothe et Charton was erected in 1679 a house for girls' school was begun, and in 1680 a school for boys. These schools rapidly progressed, both boys and girls learning to speak, read, and write English. The breaking out of border troubles and the establishment of the line giving to the English all territory south of the lakes, including New York, gradually but surely broke up the French missions to the Iroquois.

Between 1717 and 1833 twenty Franciscan missionaries labored among the Indians of Texas. In 1769 Father Junipero Serra, a Franciscan monk, founded a mission at San Diego, California. In 1774 he founded his and all associated with the first months of hardship. A mission at Monterey was founded in 1770 by the same missionaries. Other missions were established, occupying the entire coast line from San Francisco to San Diego. Into these were gathered over twenty thousand Indians, who led regular and industrious lives. It is said of the Indians of California that they are devoted to Roman Catholicism with all their hearts, their highest feelings and ideals being bound up with its teachings.

The heroism, both natural and regenerate; the humbleness and unwaveringness of devotion to the most dreary and unfruitful field of labor, the patience and sweetness of temper of the heroes of the Roman Church, who explored and sought to reclaim these vast and pathless wilds, form one of the noblest pages in history. Even quite all the original missionaries died as martyrs, commonly under atrocious torments, which they always foresaw, but from which they never shrank. The heroic Brebeuf, before his martyrdom, who he suffered conjointly with Père Lallemand, had baptized 7,000 Hurons. Even the most friendly historians, however, lament the measure in which the Jesuits accommodated themselves, never to Indian fierceness or immorality, but too often to the grossness of Indian superstition. But such writers also condemn the blind hatred with which the English followed them up in the inhuman regions in which they bore every hardship for the love of God and men.

India: The first Christians from Europe to enter Hindustan were the Portuguese, who landed, under the lead of Vasco da Gama, in 1498, at the mouth of the Ganges. The dissensions of the many independent states opened the way for their conquests, of which, in 1510, Goa became the capital. Here a bishopric was established, which was then raised into an archbishopric, still existing, whose incumbent bears the title of Patriarch of the East. His metropolitan authority formerly extended from Southern Africa to China. Neither Archbishop nor Inquisition, however, could accomplish much amid the flood of sheer ungodliness which poured in from Europe. The reputed wealth of India brought an innumerable company of adventurers, whose unrestrained profligacy moved the indignation and incurred the rigid rebukes of the Hindus themselves. Meanwhile the uncertain endeavors of Diego de Borba and of Miguel Vaz, viceregents of Goa, to extend the Gospel, received little. They established a school in Goa, it is true, for the Christian training of young people from India, China, and Abyssinia, which did good service for many years, but there was lacking anything like a fixed plan of work. At last the right opportunity appeared. On May 6, 1542, the illustrious Francis Xavier landed in Goa. Of the high nobility of Spain distinguished for learning and for eloquence, he
had, in Paris, been brought over by his fellow-
Spaniard and fellow-Basque, Ignatius Loyola, from visions of earthly glory to a burning zeal
for the cause of Christ and of Rome, which in his
mind were so absolutely one that there is no
reason to suppose that even the shadow of a
suspicion crossed his bosom of the divine
happiness which he saw they were ever lost
upon the simple loyalty of his mind. Of Jesuit
astuteness and accommodation to a worldly standard, as they afterward
developed themselves both abroad and at home, there
does not appear to have been a trace in Xavier.
Such a one does not slip off so much as in the early Church
no one scrupled to use such names as Phobe, De-
metrius, DIOTREPHES, Apollo, Hermes, and the like.

The accommodations of De Nobili and his
followers did not disfigure from the Brahmas
at large that the sages of Rome proposed to
them a fundamentally new religion. Angry
oppositions arose, but before long 30,000 con-
verts had been gathered. Separate churches
were built for the higher and lower castes, the
latter being rigorously forbidden to join with
the former in their worship, while the parishes,
outside were given into the hands of the priests.
Even the last sacraments were administered to them at the end of a staff, so
that the administrator might not be defiled.

One of Robert de Nobili's chief associates was
Juan de Brito, son of the viceroy of Brazil.
He brought great numbers to the faith in the
kingdom of Marava, and died a martyr in 1693.
Another associate, Veschi, was equally able,
learned, successful, and heroic, and barely escaped
martyrdom. He lived to become a mortal antag-
onist of the more enlightened Danish missionaries,
dying in 1742.

The accommodations of Robert de Nobili and
the Jesuits to heathenism could not fail to arouse
great scandal at home. The rumor even that De Nobili had apostatized. His kinsman,
the great Cardinal Bellarmine, himself a Jesuit,
the better informed than to suppose this,
expressed his grief over such principles of pro-
ceeding, saying: "The Gospel needs no such false
coloring; that Brahmas are not converted is of
much less account than that Christians should not
preach the Gospel with joyful openness. The
trouble is in teaching that the faith is the
Jews a scandal, and to the Greeks foolishness; but St.
Paul did not therefore cease to preach Christ,
and him crucified. I will not," he continues,
"argue as to individual points, but cannot refrain
from deploring great numbers to the faith in Brahman-
iac haughtiness is sadly at variance with the humility
of our Lord Jesus Christ, and that the observance
of their usages has something exceedingly dan-
gerous to the faith." Unhappily the pressure
of his order brought this great and good man at
length to something very much like a retraction
of these sound and evangelical principles.

The other orders were naturally scandalized
over the Jesuit policy. While, as yet, it was
represented at Rome that nothing was intended
beyond an allowance of certain harmless national
usages, according to the 1552 concessions, but
not unfavorable to the Jesuits. But these took
occasion, thereby, it is said, to push their com-
pliances farther and farther, until at last, in 1703,
the Pope sent Cardinal Tournon to India, where,
after thorough investigation, he suggested the
abolition of the Veda, by which, in 1710, Clement XI. rigorously
forbade all accommodations whatever to heathen
usages.
The Jesuits, however, paid scarcely the least attention to the decree, and soon obtained from a later Pope, Clement XII., a virtual revocation. But Father Norbert, of the Capuchins, came to Rome, and there opened the matter with so much insight and unreservedness that Benedict XIV., in the bull Omnium sollicitutudinum, of October 7, 1745, not only directed that the prohibition be made public, but permitted them further in the most peremptory terms. Nevertheless, in India the order founded for the vindication of the Papacy became its antagonist, mocked at and scorned the other orders, engaged in mercantile and other secular undertakings, until these things also became the basis of its failure.

These conversions around Goa, proceeding from Robert de Nobili as a center, are to be distinguished from those in the more southern parts of the peninsula, and among the humber classes, who did not provoke so much disingenuousness. No such snail, happily, rests on the memory of Xavier. He had his share of Spanish imperiousness, but nothing of De Nobili's Italian craftiness.

The result of the collapse of Jesuit missions in India was, that more than half a century passed during which the Roman Catholic Church was almost without any agent among them for itself. Nevertheless, when Catholic missions were resumed over a million converts, it has been claimed, were found to have remained steadfast to the great truths of creation and incorruptible redemption, tho', of course, their minds had become greatly obscured as to all secondary Christian doctrine, and overspread with many heathenish superstitions. These numbers, however, must be too large, as the official statements of the Church make the number of Roman Catholic Christians (1901) to be only 1,214,415. About 100,000 of these Roman Catholics are proselytes from the Syrian Church of India, not from heathenism. There are also 534,000 so-called Goa Christians—Catholics who have fallen out of communion with Rome during the long disputes between Portugal and the Pope over the right of nomination to the Indian bishoprics, and over the prerogatives of the Archbishopric of Goa.

There are (1901) 7 archbishoprics, 15 bishoprics and 4 prefectures, 602 stations, 3,708 churches and chapels, 809 European missionaries, 349 native priests, 2,089 schools, and 191 orphanages. The European communities of the religious orders, which used to be about 200, now number from 200 to 250. They then follow Colombo, 198,120; Pondicherry, 133,-

770; Quilon, 87,000; Kumbakonam, 85,000; Mangalore, 83,690, etc.

Farther India: Roman Catholic missions were established in Ava and Pegu (Burma) in 1722, in Cochin China, 1659; in Malacca, 1557; in Siam, 1662; Tonkin, 1627. These have developed into (1901) 1 diocese and 15 vicariates, with 948,820 members, 512 missionaries, 527 native priests, 858 churches, 2,787 chapels, 2,342 schools, and 250 charitable institutions.

Africa: The Roman Catholic Mission in the kingdom of Congo, near the mouth of the great river, began as early as 1491. A vast number of negroes were baptized, so that, as with Xavier, the missionaries could hardly hold up their hands for weariness. Père Labat puts the number of the baptized at 100,000! Of preliminary instruction there had been none; an enemy at hand moved the missionaries to enroll as many as possible of those who might soon fall in battle in the ranks of the regenerate. The people had followed the example of their king and queen. Soon, however, the scene changed. "The mystery of the faith," says one of the Dominican Fathers, "were something of which they were very willing to hear. But when we began to preach the moral virtues to them—that was another matter." A persecution even unto death, and headed by the newly baptized king, broke out. But the crown prince Alphonso, soon succeeding, displayed few scruples for Christianity. He even became the not a priest, yet a zealous preacher. It appears, however, that he did not demand that his subjects should forsake their polygamy, but did demand, on pain of death, that they should forswear the strange and rude mixture of superstition, Gospel and form, which is characteristic of Catholic medievalism, was shown here in its perfection.

Portugal, with the profound selfishness which distinguishes all her early dealings abroad, took advantage of this new influence in Congo to secure enormous supplies of slaves. Dependent as they were on Portuguese protection, the priests made faint opposition to this iniquity, and even became accomplices in it. Soon they declined in zeal, and the princes and the people in interest; "the shepherds became plunderers;" it is said they quarreled with their bishop, and went back to Portugal with great substance. Yet baptisms went on, and soon Congo was proclaimed "wholly Catholic!" The court relapsed into the deepest dullness, which remained proof against the efforts of the few Jesuits who came to Congo about 1550, altho' these did a good deal, temporarily, for religion and education among the people. But after 150 years, Christianity is little more than a shadow. This closes the first period of the Congo Mission.

The second period opened in 1640, when the Capuchin friars arrived, and set about counteracting the heresy of the Dutch, with the help of persecution. They, however, fell into the evil ways of their predecessors in many respects, and neither they nor the Benedictines were able to accomplish anything. In 1816, an English explorer, Captain Tuckey, found "no trace of Catholicism, except some crucifixes and relics, strangely intermingled with the amulets and fetishes of the country. A single man claiming to be a priest, with some sort of a certificate, did too much himself as having a wife and five concubines."

Within the last quarter of a century, however, the Roman Catholic Church has done much to redeem the errors and failures of the past. Missions have been established in all parts of the continent, and the report for 1901 shows 53 provinces (mostly vicariates apostolic, and prefectures), with 481,782 members, 1,084 churches and chapels, 1,172 priests, 1,753 schools, and 287 charitable institutions. The largest communities are: Madagascar, 67,550; Equatorial Congo, 67,180; Victoria Nyanza (Uganda), 39,556; Benin, 16,400; the five Congo provinces, 15,081, etc. In this work the White Fathers of Algeria, under the lead of Father Lavigeria, have been the most important factor. While there has been frequent clashing between them and the native missionaries, due to political ambition, there has been much noble work done. In Madagascar especially is the record of Roman Catholic work too nearly of kin to the type that caused the failure of the earlier missions.

China: In 1294 the Pope sent the Franciscan John de Monte Corvino to Peking, of which Rome
afterward appointed him archbishop. He was a genuine missionary, spared no pains in giving people the Word of God in their own language, and in encouraging the education of the children, as well as training up missionaries from among the people themselves. He translated the New Testament and the Psalms into the Mongol language, and had these translations copied in the most beautiful style and sent back to the pope.

He had, during his residence in this place, baptized from five to six thousand; and he believed that, had it not been for the many plots laid against him by the Nestorians, he would have succeeded in baptizing above thirty thousand. Tensely, he says, the repressers of Chinese independence, under the Ming dynasty, and the overthrow of the friendly Mongols, drew after it the destruction of Christianity, of which every trace seems to have disappeared.

In 1517, Europeans, in the persons of the Portuguese, recaptured Canton—this time by way of the sea. In 1556, for services rendered against the pirates, who have always been so formidable on the waterways of China, the Portuguese were pardoned and permitted to establish missions, and in 1552, Francis Xavier closed his heroic and consecrated life. "Rock, rock, when wilt thou open?" expressed the spirit of his last sighs, the words were those of an earlier missionary, in front of the frowning seclusion of the great heathen empire.

The first Roman Catholic missionary who came to China in this second era was the Provincial of India, Nunes Barreto, S.J., who, traveling to Japan in 1555, twice spent a short time at Canton. Neither he nor his immediate Jesuit successors were able to establish themselves in China, to leave to remain, and many privileges from the viceroy of Canton—the first public baptism was given in 1584. In 1586 there were 40 Christians, but then persecution broke out. After the Jesuits had adopted the dress of the mandarins they were less annoyed. In 1598 Ricci, already in high repute for his scientific attainments, who was one of the independent Chinese mission, was received in Peking, and established himself permanently there in 1601, dying in 1610. He is accused of having carried the conformity to Chinese usages to such a length as to have dispensed himself from his vow of celibacy, and to have married a Chinese woman, who bore him two sons. But the animosity of the other orders toward the Jesuits had become so great that we are not to be too sure of the justice of any particular accusation against these. This animosity, which seems to have been strongest in the Dominicans, had various grounds. Jesuitism had an alertness and flexibility that reached attainments in literature and science, and drew public favor to them, and showed a wise consideration of circumstances which was in marked contrast to the Dominicans.

When the Dominicans asked the Jesuits how soon they intended to introduce the discipline of fasting for their converts, the latter replied: "Not until Providence relieves them from the continual fasts imposed by their poverty." In the great question of accommodation, the controversy turned especially upon the custom of ancestor-worship. The Jesuits argued—and the emperor, in a public edict, confirmed their position—that the gods of China, is only a civil and religious act, implying nothing in the nature of religious homage. The Pope, however, and the Protestant missionaries, after full investigation of the opposing arguments, have decided that the Dominicans and the other protesting orders were right and the Jesuits were wrong.

In 1617 the Jesuits had about 13,000 converts; in 1650 about 150,000; in 1664, 257,000. The Franciscans and Dominicans together had hardly more than 10,000. The conversions went on increasing until toward the end of the century, when the papal regulations against the accommodations allowed by the Jesuits, and the bitterness with which the other orders and the papal legates enforced them, led to violent persecutions. One of the legates, Cardinal Tournon, was sent to Macao, and died in prison there. Some even say that the Jesuits poisoned him. Many Christians were martyred; much greater numbers fell away, partly under the terror of death, and partly under the exasperation of national feeling. Compromises were for awhile submitted by the representatives of the Pope, which somewhat stayed the desolation. But Rome last, in 1742, in the pontificate of Benedict XIV, issued a peremptory and irrevocable decision, forbidding every accommodation that could be interpreted as a concession to paganism. Then the persecutions broke out more violently than ever, and the Christian faith was almost rooted out. This stand of the Pope, however, seems to have been taken with such haughtiness, such a contempt of the imperial representations, and such a determination to carry the papal rigidity against the overbearing will, that the emperor, the mandarins, and the people gathered the deep impression that if they would become Christians they must cease to be Chinese.

At various times the devoted Roman Catholic missionaries in China underwent various persecutions—banishment, imprisonment, scourging, and even death. The first actual martyr was the Jesuit Francis Martínez, murdered in 1606. The Dominican Francis de Capillas was beheaded in 1648. In 1665 five Christian mandarins were beheaded in Tancang, where commanded this was, however, soon after punished by the young emperor with death. During the exasperation caused by the decree of Benedict XIV, the Dominicans, Peter Sanz, Serrano, Rovy, Alcoter, Diaz, and the catechist Ko (Sanz being a bishop), and the Jesuits, Anthemis and Henriquez, suffered death in 1747.

Only obscure accounts are accessible as to the subsequent resuscitation of Roman Catholic missions in China. There were still hundreds of families in which Christianity had become hereditary, and there have doubtless been many conversions in this century. In 1805 there was a cruel persecution; also in 1816 and in 1820. In these later persecutions three or four priests suffered death, one of them being Vicar Apostolic and Bishop Suplici Tornai.

As in Africa, so in China the last few years have seen a great advance. Roman Catholic missions now cover the entire empire, and report (1901) 720,540 members, 4,126 churches and chapels, 904 missionaries, 471 native priests, and 5,584 schools.

In the Boxer outbreak the Roman Catholics
suffered with the Protestants and maintained the early record of faithfulness. To what degree the policies of the Jesuits, and whether or not they were responsible for the troubles it is difficult to say, but something of the same spirit that ruled and ruined formerly appears to have been manifest.

Japan: Japan had scarcely opened to Europeans when St. Francis Xavier, with some companions, hastened thither to plant the standard of the Cross. For a long while the preaching of the missionaries was undisturbed, and in less than 40 years there were more than 200,000 Japanese Christians, with 250 churches. Even three Daimios were baptized. At last, however, the Shogun Taiko, or Taikosama, gradually became jealous of the missionaries, suspecting them of being agents of Portugal, and, after the temporary union of the two Iberian crowned agents of Spain for reducing Japan to dependence.

Taiko began to persecute the Christians about 1592. The stedfast charity of Christian maidens is said to have been one of the causes which inflamed the wrath of the imperial voluptruous. The inconsiderate zeal of some Franciscans, also, who persisted in public preaching after the Jesuits had discontinued it, is said to have increased the evil. In the staff of February 1597, 6 Franciscans, 3 Jesuits, and 17 other Christians were crucified. With the sound of psalms these heroes and followers of Christ breathed out their souls. From 1598 till 1611, under a new Shogun, there was a respite. But then a fearful revolution of sentiment in the Shogun's mind brought him and his three successors to that persevering and concentrated cruelty toward the Christians which finally rooted out their religion. The guilt of this is laid by the Catholics on the Dutch, who revenged the cruelties inflicted in Spain toward them, fanning up the slumbering jealousies of the government toward Spain and Portugal, and toward the Jesuits, until its rage was so great that all common forms of torment being too little for the wrath of the rulers, they exhausted their ingenuity in devising new tortures.

It has well been said that the Roman amphitheaters never witnessed, in men, women, or children, more resolute heroism of martyrdom. Here again, for a good while, the blood of the martyrs was the seed of the Church. From Taiko's death, in 1568, to 1598 the Jesuits baptized 100,000 converts, and for many years afterward they baptized several thousand yearly. Some apostasies took place, but in general all the Christians—princes, nobles, men, women, and children—went joyfully to their doom. Children endured the most terrible deaths, without giving a sign of suffering. When any were conducted to the crown of martyrdom so greatly desired, they would be accompanied by many thousand Christians, who followed in triumphal procession, praying, praising, and bearing lighted tapers in their hands. But persecution raged incessantly, and finally outstripped the increase of the Church. At last, in desperation, 37,000 Christians seized the fortified place Simbara, since known as the Mount of Martyrs, and there, after a long defense, were at length slain almost to a man, with women and children. The edicts forbidding "the God of the Christians, on pain of death, to reenter Japan." Then, too, was introduced the requirement, maintained till within a few years, that all the subjects of the realm should, once a year, trample on the crucifix.

When Japan was reopened by the Americans it was discovered that there were hundreds of thousands of uneducated people who had never heard of the Name of Jesus. A number of martyrdoms have taken place even since then, but are now, of course, discontinued. In the absence of Bibles, which unhappily, Rome, as usual, had neglected to provide, these secret Christians had even forgotten the baptismal formula, and used to baptize their children in the name of the Holy Jerusalem. A Jesuit missionary being asked whether such a formula would be valid, replied: "No, the Church must have her rules. But God is very much kinder than the Church.

The present number of Roman Catholic Christians in Japan (1901) is 53,400, and there are 115 missions, 32 native priests, 28 schools, and 20 charitable institutions.

In Korea there are reported (1901) 32,200 members, 39 missionaries, 9 native priests, 60 schools, 5 charities; in Java, 49,500 members, 50 missions, 29 schools; in the Pacific Islands, New Zealand, etc., 219,210 members, 742 churches and chapels, 421 missions, and 479 schools.

In Persia, Turkey, and the Balkan States, the work of our missions is confined to the different branches of the Eastern Church. They have been somewhat successful among the Jacobites by methods which are too distinctly political, but elsewhere they have not won over many. It is difficult, indeed impossible, to give statistics, as the figures in the "Roman Catholic Federation" for those countries include the Roman Catholic communities of Armenians, Maronites, etc.

Missionary Organization of the Roman Catholic Church: Rome divides the whole world into two great sections, the (or) a (or) and the (or) a (or) (or). Within the former her missionary organization has, properly and ordinarily, no application; within the latter it controls all ecclesiastical persons and processes whatever, archbishops and bishops themselves being subject to it. The (or) a (or) a (or) (or) (or) a (or) is definable as including all those countries whose governments lend the support of the secular arm for the coercion of all baptized persons, whether Catholics, heretics, or simple schismatics, into obedience to the Holy Roman Church; that is, to the Roman Bishopric, which claims a maternal superiority to all other churches, that is, bishoprics, and claims the right to instruct them, and by inference to govern them. All schismatics or heretics, therefore, within the limits of any bishopric, may (it is held by the prevailing opinion) be lawfully compelled to yield obedience to their Catholic bishop, and in him to the Supreme Bishopric of Rome, which possesses throughout the Church both an ordinary and an appellate authority. The latter is chiefly in use, but the former may also be by apostolic dispensation. Wherever, then, the civil government, being apprised by the Holy Office of the Inquisition (a commission of Cardinals, of which the Pope himself is the Prefect) that heresy or schism is prevailing within its jurisdiction, lends its authority to crush it, there, and there only, is terra a (or) a (or). All the rest of the world—Christian, Muslim, and heathen—is a (or) missions.

Thus in Europe, Great Britain, Holland, Norway, Sweden, Denmark, Germany, the Balkan States and Greece are mission lands; in America, Canada, the United States, British and Dutch
Guiana and Patagonia; all of Africa, except Algiers and Tunis, and all Asia and Oceania. The exchanges of the past half century and the great interest in the United States, as well as the loss of the temporal power of the papacy, have raised a question as to the continuance of this system which has manifest disadvantages as well as advantages. No decision has, however, been reached, and there is still a noticeable distinction between the two regions, the popular and even legal presumption commonly recognizing Roman Catholicism as the predominant religion of the Catholic countries. Rome still thinks it prudent to maintain the distinction dumtaxat.

Rome has no different agencies for proselytism of Christians, and for conversion of unbelievers. Any country which does not, through its government, give effect to its spiritual subjection to her, is indiscriminately included in the terra missionis. Even the Eastern Churches, although their ordinances are acknowledged, and although the prevailing Roman theory concedes to them spiritual jurisdiction, are, nevertheless, subject to the activity of the Propaganda, which, however, does not appear in fact to extend its operations among them so far as they are in Muslim or pagan countries.

Rome, however, makes very important distinctions, within the terra missionis, between infidelis, schismatics, and heretics. The first term includes all who have never embraced the faith. For the protection of these, it is held, the only lawful means is persuasion, as they have never been subject to the jurisdiction of the church. Heretics, being baptized, are subject to her jurisdiction. For the restoration of these the papal authority requires persuasion and coercion, the former being preferable. Schismatics, who are orthodox, but disobedient to Rome, may likewise, as occasion serves, be either persuaded or coerced into returning. Perhaps the only simple schismatics are the members of the Greek Church, which is not impeached by Rome of heresy, and sometimes speaks doubtfully of her orders, and even of her baptism. The Greek and even the Monophysite and Nestorian bishops appear to be often recognized by Rome as the legitimate bishops of their sees, although the Nestorian bishops at last had the privilege of being received into the communion of the church.

The Greek is allowed to have the priest, and in training for public life. In the Levant, if Rome supplies an abbey, she is very apt to forget her concessions, and to thrust in her own nominees where she cannot secure the submission of the actual incumbents. Recognition, however, of the Eastern clergy she does not permit, even where, as in Abyssinia, the rites are extraordinarily irregular and defective. The succession, she says, is unquestioned, and the apostolical intention is sound, and sufficiently expressed.

In the Protestant world, however, she is not embarrassed by any question of orders or of jurisdiction. Only as to the Anglican communion is there with her even a pause of thought as to the former, and since the accession of Elizabeth she has always treated the Anglican orders as null, maintaining that the probabilities against their valid transmission are so overwhelming as to leave her under no obligations to pursue remote considerations and abstract possibilities. And as to jurisdiction, she declares even the Old Catholics of Holland, Germany, and Switzerland to be void of this, although she acknowledges the validity of their episcopal institution. Protestants, therefore, are held to be destitute of all the ordinary means of grace except the sacraments of Baptism and Matrimony. She pursues her missions among them almost as if they were heathen. She does not, however, as often supposed, treat them as pagani, or pagani barbati, as partes infidelium. Infideles, as noted above, is the technical term of Rome and of Trent for all human beings who are neither baptized nor catechumens. Its application to cover heretics is casual, and seldom, if ever, official. Partes infidelibus, however, is the term that ancient Christian cities now give a titular dignity to some three hundred Roman Catholic bishops who have no actual dioceses. As they are largely employed in Protestant countries, their former style of "bishops in partibus" was often mistaken as referring to the place of their residence, and not, as it did refer, to the location of their nominal sees. To obviate this not unnatural misunderstanding, the present Pope has courteously directed that they shall henceforth be known as episcopi titularis in partibus.

All ecclesiastical activity of the Roman Catholic Church within the terra missionis, whether of proselytism, conversion, or ordinary administration, is subject to the control of the Congregatio de Propaganda Fide. This great and powerful congregation (the term Roman congregation signifying a committee of or commission of cardinals)—subject, of course, to the Pope's intervention at any point—exercises papal authority over all Roman Catholics throughout the Protestant, Oriental, Muslim, and pagan world. It was instituted in its present form in the year 1622. This Pope was the first pupil of the Jesuits who had ascended the chair, and, therefore, was naturally interested in missions. The Congregatio de Propaganda Fide, familiarly called The Propaganda, has permanent authority of administration in regions yet exotic and Christian, and within Christian regions until they become again terra catholicae. It has, of course, its seat at Rome, and is composed of a varying number of cardinals, some being non-resident correspondents, having a Prefect, a Secretary, and a Propaganda, on whom the practical business mainly devolves. There are also consuls and a large force of officials. It also maintains a training college for pupils from almost every nation under heaven. There are also in Rome various national colleges and monastic training houses for missionaries. Yet the whole number of pupils appears to be small compared with those that are trained for the priesthood in Protestant countries and other missionary jurisdictions.

While the Roman Catholics in a country, being few, have never been organized into a diocese, or where the bishoprics have fallen under Mohammedan or heretical control, there the Pope, as having ordinary jurisdiction throughout the Church, is sole diocesan. The first stage of organization is the appointment of a representative as papal representative, with the title of Prefect Apostolic. He has almost unbounded authority (under the Propaganda), being empowered to station priests at discretion within his prefecture, and to grant dispensations almost ad libitum from every ecclesiastical precept not included in the jus divinum, from which last, of course, the Pope
himself cannot dispense. If the mission flourishes, and there is a call for a superintendent, with power to ordain to the priesthood, the Prefecture Apostolic becomes a Vicariate Apostolic. The distinction does not appear to be a hard-and-fast one. As there are Vicariates Apostolic that are simply priests, who have to send elsewhere for new clergymen.

Almost all, however, are bishops in postulator, or, as they are now called, titular bishops. Both prelates and vicars are movable at pleasure.

If the Church has won or recovered such a following (especially in Protestant countries) as to warrant it, the Pope proceeds to organize a regular hierarchy of diocesan bishops, usually arranged in metropolitan provinces, each under the presidency of an archbishop, who, besides his ordinary diocesan authority, has a certain right of determining appeals from his suffragan bishops, and always presides in the Provincial Council, whose decrees, when ratified by the Pope, have binding force.

The bishops of England and America are not, like mere vicars apostolic, removable ad nutum, but are understood to enjoy fixity of tenure, like those of Catholic lands. The cardinal's rank enjoyed by the present Archbishop of Baltimore greatly increases his influence, but adds nothing to his episcopal or metropolitan authority. As cardinal he has no jurisdiction outside the city of Rome; and as belonging to a missionary jurisdiction, he, and all other American bishops, are still controlled by the Propaganda, due regard, of course, being had to the more developed character of their sees. The bishops enjoy the same powers as vicars apostolic, of dispensing from ordinary canonical restrictions. These powers, granted from Rome for terms of five years, are known as the Quinquennial Licenses.

Previous to the institution of the Propaganda missions were pursued in a somewhat disconnected way. Each order sent out its missionaries for itself, who rendered account of their activity only to their own provincials and generals, these latter, doubtless, frequently communicating with the Congregation de Propaganda Fide. But such suggestions, exemptions, consecrations, pensions, and other aids as it might be inclined to grant and they to receive. But since 1822 the control of all missions among heretics, schisms, and pagans has lain in the hands of the Propaganda. Yet the bonds of connection within each monastic order are so strict, the authority of its superiors so unbounded, its policy and spirit, and even its doctrinal tenor, so specific, and the character attributed to each of the orders so sacred, that the comparatively new Congregatio de Propaganda Fide has, doubtless, to accommodate itself largely to this distinctness of action. In what way, and how far, the missionary operations of the orders, especially the Jesuits, have been actually subordinated to the Propaganda is not clear. It must suffice us to know that every missionary—Jesuit, Benedictine, Francisian, Dominican, of whatever order or of the secular priesthood—is subject to the supreme and universal episcopate of the Pope as ordinarily exercised through the Propaganda.

The Propaganda, notably the Dominicans and Capuchins over against the Jesuits, have carried on their mission, especially in India and China, with far more bitterness of controversy against each other than has prevailed between Protestant denominations the most widely remote. The Jesuits, indeed, long seemed disposed, both among pagans and Protestants, almost to claim a monopoly of conversions, and if any one of another order, even to the amount of a success, their animosity would sometimes go to great lengths. These internecine wars came near to ruining Roman Catholic missions in the Far East, but since the suppression and restoration of the society, which has now an almost uncontested right of control in the Church, and which, in its turn, has doubtless learned wisdom by its tribulations, these dissensions no longer appear. The Jesuits, doubtless, take whatever fields of activity they wish, and leave the rest to others. There appear to be among the missionaries but few secular priests; that is, priests who, like the ordinary parish clergy, are subject only to the general authority of the Church, and not to that of any monastic order. The native clergy from among the heathen are probably for the most part secular.

The Propaganda has been richly endowed, but has lost many of its resources, especially since the loss of the temporal power of the Pope, and its present (1901) income, about $135,000, is barely sufficient to support its personnel, college, university, and printing establishment.

The missionaries on the field are expected, so far as possible, to secure their support among the people they are evangelizing, but where this is impracticable, they are provided for through charitable associations founded for this purpose. Of these the most important, besides the Jesuit, is the Society for the Propagation of the Faith, with headquarters at Lyons, France. There are also: The Association of the Holy Childhood; the Association of Oriental Schools in France; the Society of St. Francis Xavier in Aix, Lyons, France; the Société du Saint-Esprit in Salzburg; The Leopoldsverein, in Austria; The Ludwigmissionsverein, in Bavaria. These all, however, as well as some others, are limited in aim or nationality, the only one which, in truth, can be called a general missionary society being the one at Lyons, and this deserves special mention.

The Society for the Propagation of the Faith: In 1815 Bishop Dubourg, of New Orleans, during a visit to France, interested in his work a widow, Mrs. Petit, and suggested the founding of a charitable association to aid in supplying the spiritual needs of Louisiana, fixing the contribution of members at twenty-five cents a year. The suggestion was enforced by earnest appeals for aid from missionaries in the East, and an effort was made, by the Seminary for Foreign Missions of Paris, to revive a union for prayer, which had been disbanded by the French Revolution. The benevolence of Christians in Lyons, in 1820, was thus turned to several separate objects. Two years later a visit to Lyons of the Vicar-General of Louisiana excited special interest in that field of labor. It then became clear to those interested in missions that if an aid society would be permanently successful it must undertake to aid all needy Roman Catholic missions, and so combine all interests. On this basis those engaged in helping one and another mission, united, and the "Work (œuvre or opus) for the Propagation of the Faith" was organized at Lyons, May 3, 1822. This name is commonly
translated into English as "Society for the Propagation of the Faith," and so produces in the minds of Protestant readers confusion with the great "Congregatio de Propaganda Fide" at Rome. But the duties of the Lyons "Society for the Propagation of the Faith" have relation to missions in one or more ways to the establishment and control of missionary enterprises, nor to the choice of missionaries.

The Lyons Society has branches in various parts of France and of the world. The seat of the American "Society for the Propagation of the Faith" is at Baltimore, Md. The trustees of the American branch are the Archbishops of Baltimore, Cincinnati, Philadelphia, and St. Paul, and four otherclergy. Members of the Society are called "Associates" in the work. The conditions of membership are two: (1) The receipt daily for the assistance of Roman Catholic Missionaries, of one Father and one Mary, with this invocation: St. Francis Xavier, pray for us; (2) the giving of at least five cents monthly, or sixty cents a year, in alms for the missions. The usual method of collecting these funds is through the local central representative of the Society, and the no less important duty of circulating among the members of the band the periodical Annals of the Propagation of the Faith. Promoters are provided with membership certificates to be given new members, and with cards on which to record collections. The efficiency of the system and, in fact, the success of the whole work, rests upon the faithful diligence of the promoters. The Society has fixed a day in May and another in December as a time of special prayer and thanksgiving. Various popes have granted indulgences to those who have contributed in this work, and missionaries offer prayers and say masses for the associates. In the merits and prayers of the missionaries, and in masses said by them, both living and dead associates share.

The Society has two councils, chiefly laymen, at Lyons and Paris, respectively, and these, for ordinary purposes, divide the entire field of mission work, but act on common consent in the distribution of funds. No funds are invested, and at the beginning of each year the entire receipts of the Society for the previous year are distributed.

In 1822 the Society, through its central body at Lyons, collected about $4,000, of which one-third was sent to the Eastern missions and two-thirds to Louisiana and Kentucky. Other dioceses also were aided, and up to 1890 the Society had expended nearly $6,000,000 in missionary work in the United States. In 1827 gifts were sent to Africa and the Hawaiian Islands, and today it aids more than 300 dioceses, vicariates, and prefectures in all parts of the world. Its total distribution, from 1822-1900, was $65,690.917. Of this sum $1,120,420 went to the Society from the United States during the same period.

A list (see Appendix) of Religious Orders and Societies engaged in Roman Catholic mission work shows that, although the number of clergy, there are more than 30 orders of Brothers and 125 orders of Sisters working as auxiliaries, in addition to the lay-brothers, catechists, and other native helpers.

ROMANDE MISSION. See Switzerland (French).

RODEPOORT: A settlement in the Transvaal, S. Africa, situated in the Potchefstroom district. Station of the Hannover Lutheran Free Church Mission, with (1903) 1 missionary and 5 outstations.

ROSARIO: A city of the Argentine Republic, South America, situated in the province of Santa Fe, on the right bank of the Paraná, 170 miles N. W. of Buenos Aires. Population (1901), 112,461. It is the second commercial city of the republic, is well laid out, with neatly-paved, gas-lit streets, traversed by cars. It stands on a site of 500 acres, settled in 1877. The climate is temperate and healthful. Station of the ME, with (1903) 2 missionaries and their wives, 17 native workers, 7 outstations, 7 places of worship, 10 Sunday schools, 4 day schools, and 454 professed Christians, of whom 293 are communicants. Station also of the South American Missionary Society, with (1903) 3 missionaries, 1 of them with his wife; 15 women missionaries, 1 native worker, 1 place of worship, 1 day school, 2 boarding schools; the work of this Society extending into the suburban town of Alberdi.

ROSE, Rev. A. T., D.D.: Appointed missionary among the Burmans by the ABMU in 1851, and at the time of his death in 1896 he was one of the oldest missionaries on the staff of this Society. Most of his missionary life was spent at Rangoon; and, besides his influence as a faithful missionary, to him is largely due the development of the Burman Bible Training School, which became the Burman department of the Theological Seminary at Insein. Dr. Rose possessed a strong personality, was a powerful preacher, was especially gifted in opening up new work, and especially wise in his administration. In educational matters he showed marked ability. He passed from his earthly labors at Rangoon, July 5, 1896.

ROSE BELLE: A village in the island of Mauritius, situated about 150 miles S. E. of Port Louis, with which it is connected by railway. Station of the CMS (1856), with (1903) 1 missionary and his wife, 25 native missionaries, 1 orphanage, 2 day schools, and 162 professed Christians, of whom 45 are communicants.

ROSS: A settlement in Cape Colony, South Africa, situated in Tembuland in Mgwali District, about 25 miles E. of Clarkebury. Station of the UFS, with (1903) 1 missionary and his wife, 25 native missionaries, 17 outstations, 14 day schools, and 364 professed Christians.

ROTUMA: An island about 300 miles N. N. W. of the Fiji Islands, to which colony it was annexed in 1880. It is 16 miles long and 4 or 5 miles wide, of volcanic origin and inhabited by about 2,500 people, who export a considerable quantity of copra. The first work was commenced there in 1841 by the WMS missionaries stationed at the Fiji Islands. The people are now Christians,
with 21 places of worship, 37 schools and 460 church members, and 35 native workers in connection with the Australasian Wesleyan Methodist Missionary Society.

**ROUMANIAN LANGUAGE**: A language spoken in the island of Rotuma, which lies north of the Fiji Islands. It belongs to the Melanesian type of languages and has been reduced to writing by missionaries with the use of the Roman letters.

**ROUMANIA**: A kingdom formed in 1878 from the united principalities of Wallachia and Moldavia. Its independence from Turkey was proclaimed by its people in 1877, and was confirmed by the congress of Berlin in 1878. Its area is estimated at 48,307 square miles. On the northeast it is separated from Russia by the River Pruth and the Kilia mouth of the Danube, which latter river forms its southern boundary west of Silistra. The Transylvanian Alps and the Carpathian Mountains form its western and north-western boundaries. That portion which lies between the Danube and the Black Sea is called the Dobrudja, and differs greatly from the rest of Roumania in climate and extent of temperature; in winter the cold northeast winds are very trying, while in the summer the southwest wind is scorching in its intense heat. The rainfall is not abundant. Agriculture is the principal occupation of the people, and not a very important one. Roumania, of a constitutional monarchy, and the king is assisted by a senate of 120 members and a chamber of deputies of 183 members, all of whom must be Roumanians by birth or naturalization. The population of Roumania is of very mixed origin, including (1899) 6,900,000 Roumanians, 260,000 Jews, 250,000 Gypsies, 200,000 Bulgarians, 70,000 Germans, 66,000 Magyars, 7,000 Armenians, 4,000 French, 2,000 English, besides 5,000 Italians, Turks, Poles, and Tatars. The population of the Dobrudja is estimated at 175,000, and contains a larger Russian element than the other part of Roumania. The Orthodox Greek Church is the ruling church, but Roman Catholics, Protestants, Armenians, Lipovani (Russian heretics), Jews and Mohammedans are also found. Education is supposed to be more active than in the other Balkan countries, so that only about three per cent. of the population are able to avail themselves of the free instruction. The principal cities, with their population, are Bucharest, the capital, 282,000, and Jassy, 78,000.

Mission work in Roumania is carried on only by the colporteurs of the BFBS. The entire Bible has been translated into the Roumanian language, besides the Psalms and Isaiah into Polish for the Jews.

**ROUMANIAN LANGUAGE**: Belongs to the Greco-Latin branch of the Aryan family. It is spoken in Roumania, and is written with Roman letters, somewhat modified to suit peculiarities of pronunciation. In some respects it is closely allied to Latin. Wallachs from Roumania who have settled in Macedonia speak a dialect known as Macedonian Rouman, which is also a written language.

**ROUMLIA**: Now supplied by some European writers to European Turkey in distinction from Anatolia, or Asiatic Turkey. The name is derived from the usual Turkish appellation of European Turkey: Rum-teh, which means “the Roman People” (or territory). Eastern Roumlia is a name sometimes applied to the southern part of the principality of Bulgaria.

**RUATAN**. See Roatan Island.

**RUK, or HOGULU, ISLAND**. See Caroline Islands.

**RUNGWA**: A settlement in German Central Africa, situated about 35 miles N. W. of the N. extremity of Lake Nyassa, high up on the mountain slopes. The chief station of the Moravians among the Konde tribe is in this district (1891), with (1903) 4 missionaries, 2 of them with their wives; 1 place of worship, 1 day school, 1 boarding school, 1 industrial school, and 27 professing Christians.

**RUNING-FU**. See Ju-Ning-Fu.

**RURAT**. A town in the United Provinces, India, 22 miles east of Saharanpur. It is a modern manufacturing town, and has the most important Engineering College in India. Altitude, 887 feet. The place is rather malarious. Population, 17,400; Hindus 10,200; Mohammedans 5,600. Station of the SPG (1861), with (1903) 5 missionaries. One of the most important Mission schools.

**RUSSIA; Empire of**: A vast dominion, next to Great Britain the largest in the world, which includes eastern Europe, the whole northern part of Asia, and a considerable portion of Central Asia. It occupies fully one-sixth of the land surface of the earth, but is peculiar among the great empires of the world in possessing no colonies detached at any distance from the main mass of its territory. Its area is 860,282 square miles and its population (1897) about 128,932,173.

The purpose of this work does not require an extended topographical description of the Russian Empire. In population Russia comprises a greater variety of races than any other European state. While the Slavonic stock predominates in European Russia, the Finnish race is strong in the north and east, extending southward throughout the length of the Ural Mountains; many Turkish tribes are found in the valley of the Volga and in Russian Asia; other tribes of Tatar origin are found in the Crimea and the regions bordering the Caspian; Circassians, Georgians, Kurds, and Armenians people the Caucasus and Trans-Caucasia, while Mongols, differing but little from the Tibetan type, roam over vast spaces of territory north and east of the Central Asian provinces.

The government which holds this vast collection of races together is an unlimited monarchy. The Empire of Czar of Russia is the supreme head of the church and of the legislative, executive, and judicial systems, as well as of the military and naval forces of the empire. The Holy Synod, composed of men selected by the Czar from among the higher clergy of the Russian Church, has control of the interests of religion
throughout the empire, a procurator, or minister representing the Czar in its deliberations, and reporting its decisions to the Czar for assent or otherwise. A council of state, whose members are chosen by the Czar, controls in a similar manner the political affairs of the State, a Secretary of State reporting to the Czar its plans and receiving his orders. There is nothing exactly corresponding to a cabinet of ministers, as the terms are understood in other European countries. The minister in charge of a department of affairs prepares all plans for its administration independently of other ministers, and submits them to the Czar for his supreme permission. It often happens that two departments, for lack of joint responsibility, may pursue different and inconsistent, and even opposing, lines of policy. As to legislation, the Czar's approval must precede any elaboration of new laws; and after the council has discussed it, the Czar's decree alone makes a new law binding. This decree approving a new law may effectively issue even tho the council has disapproved it. At the will of the Czar the ordinary procedure of justice may be suspended and a criminal may be punished by "administrative process," which is not subject to review in the courts. Notwithstanding this unlimited autocracy, a surprising degree of self-government is permitted the different village communes and tribal organizations. The tendency increases, however, to centralize authority by taking away or restricting such local privileges, and to substitute languages that have been recognized as a part of local privileges. The Poles, the Jews, the Finns and the Armenians have all suffered intensely from the determined effort of the Russian Government to extinguish their separate speech, and separate historical conditions, if not their separate religious belief and guaranteed liberties.

The religion of Russia is that of the Greek (Eastern) Church. All existing religions, however, are tolerated, and refusal to profess the State religion does not disqualify a person for office or full enjoyment of civil rights. No one who refuses to accept the State religion is called a Christian. From the missionary point of view, Russia is noteworthy as the one government bearing the Christian name which permits in its territory no religious liberty in political cases of necessity of conscience. No Russian subject may leave the sect in which he was born, excepting that being born outside of the Russian Church he may join that church, that is to say, he may become a 'Christian.' Any missionary propaganda, except that of the Russian Church is strictly forbidden; and any attempt by dissenters to teach religion to members of the Russian Church is a misdemeanor punished most severely. Through such laws Protestant missionary operations in Russian territory are made impossible, and the heathen or Mohammedan populations of Asiatic Russia are walled against the Gospel, unless the Russian Church gives it to them. It often does, but not very effectively. At the same time the Russian Government permits and sometimes aids the circulation of the Scriptures in certain prescribed versions.

Mission work has been attempted at different times in different parts of this empire by the Basel and Moravian Missions, the London Missionary Society, the Scotch Church, etc., but it has never been of long duration, owing to the repressive action of the Russian Government. The American and British and Foreign Bible Societies have accomplished a good deal in the form of Bibles and portions of Bibles.

Russians: The Russians are the most numerous Slavic nation, numbering over 65,000,000. They are divided into three chief branches: Great Russians, Little Russians, and White Russians. The Ruthenians or Red Russians, living in Austria, are also classed as a branch of the Russians. The distinction between these various branches is rather linguistic than national. While the great mass of the Russians belong to the Eastern Church, 3,108,000 are Uniates (members of the Eastern, who have united with the Roman Church), 500,000 Catholics, and the number of dissenters (Raskolnikи) is variously estimated from 3,000,000 to 11,000,000 and even 15,000,000. The Orthodox Russians use the Slavonic language in their church services; so also do the Uniates and the Dissenters, while the Roman Catholic Russians use the Latin liturgy. In their literature all the Russians use the alphabet invented by Cyril, the "Apostle of the Slavs." The Russian language belongs to the southeastern branch of Slavic languages, and is related to the Iranian and the Caucasian. It is divided into three dialects: the Great-Russian, the Little-Russian, and the White-Russian. The first of these dialects forms the Russian literary language of the present day; the Little-Russian may be considered as a distinct language, the related to the Georgian and the Servian. It is divided into seven languages, the Great-Russian occupies a middle place between Great-Russian and Little-Russian, and contains elements of both these and of the Polish language. The language of the Ruthenians in Austria is Little-Russian.

The origin of the Russians has been traced back to a group of Slavic tribes who inhabited the country around Kieff. They lived in separate communities, and were united into one government when Rurik, with his Varangian companions, came to rule over them. During the reign of Prince Vladimir (972-1015) Christianity was introduced into Russia by Byzantium, and with it the productions of Byzantine literature found their way into the country. Owing to the very close proximity then existing between the Bulgarian and Russian languages, the Russians copied also several portions of the ancient Bulgarian literature. The most ancient monument of this literature is "Ostro-mirov's Gospel," of 1053. In 1224 the Mongols invaded Russia and ruled over her for more than two centuries; and although their rule did not denationalize the people, it left its imprint upon the civil administration of the country, upon the social condition of the people, and upon their language. The Mongol dominion retarded the onward progress of Russia, and it was only during the reign of Peter the Great (1689-1725) that Russia began its emancipation from its semi-Asiatic, semi-barbaric condition, and became fit to take rank among the European powers.

Reforms of Peter the Great could not be executed without producing discontent in various directions. Because his reign the Patriarch Nikon, one of the greatest men on the Russian throne in Russia, roused the indignation of the people by attempting to revise the Bible and the liturgical books, and to purge them from the errors which had crept into them through the ignorance of the transcribers. Nikon was denounced as a
heretic, his corrections were deemed sacrilegious, and a great many people refused to accept the revised books, and seceded from the Church. These were and are still called Dhimme (Rasul Kobshe), and alotho the points on which they originally disagreed with the Church were puerile, they have clung and do still cling to their notions with an astonishing pertinacity. In their eyes the present Russian Church is not a true Church, the Czar is an antichrist, and they only are the true Christians, because they hold to the old faith. The Russian Dissent has given rise to a great many sects, some of which profess the wildest vagaries. Nikon's revision of the church books is the one used now in the Russian, Bulgarian, and Servian churches, and its language, modified according to the Russian orthography, is known as the Church-Slavonic.

The Russian Church was governed originally by archbishops or metropolitans, ordained by the Greek Patriarch of Constantinople, and several of them were Greeks. But after the capture of Constantinople in 1453 the metropolitans began to be consecrated by a council of bishops, and in 1589 the chief metropolitan was raised to the rank and dignity of a Patriarch. The Patriarchate lasted till the time of Peter the Great, who, in order to curb the opposition of the clergy to his reforms, abolished it and replaced it by a Synod, whose head was to be the Czar. This is the present system by which the Russian Church is governed. But the Czar is the real president of the Synod, he never takes any part in its deliberations, but is represented by a substitute, usually a layman, who bears the title of ober-prokuror. The Synod can do nothing without the sanction of the prokuror; in fact he is the Synod. The Czar's prerogatives, however, are limited to the administration of the Church; his authority does not extend to matters purely spiritual, and he cannot interfere with the dogmas of the Church. The constitution of the Synod, and of the Russian Church in general, is such that it places the clergy under the authority and supervision of the government and makes it subservient to the interests of "the powers that be." The capture of the Nestorians of Persia by the Russian missionaries has been mentioned in the article on the Nestorian Church. Politically and religiously Russia is aggressive.

In recent years Russia has opened more than 300 schools in Syrian communities, and about $300,000 is spent every year on these. Russia's activity in Manchuria and in other parts of the East is attracting world-wide attention; and it cannot be denied that she is playing an intelligent diplomatic game, of which the prize is the control of all Asia.

RUSTENBURG: A town and district in the Transvaal, South Africa, situated 52 miles W. of Pretoria. Station of the Herrmannsburg Missionary Society (1864), with (1901) 1 missionary and his wife, 2 native workers, 4 outstations, 3 places of worship, 2 day schools, and 1,032 professed Christians. Also station of the SFG (1874), with (1903) 1 missionary.

RUST EN VERDE: A part of Paramaribo, Dutch Guiana. The Moravian Missions have a congregation here, of which the statistics are included under Paramaribo.

RUTENGANO: A settlement in German East Africa, situated about 35 miles N. W. of the N. end of Lake Nyasa. Station of the Moravian Missions (1894), with (1903) 4 missionaries, 3 of them with their wives; 1 place of worship, and 18 professed Christians. The mission has also established a coffee plantation in order to teach the people to support themselves so soon as means of transportation give access to markets.

| SABJEANS or MANDJEANS: An ancient people of whom remnants are found in the lower Euphrates and Tigris regions of Mesopotamia. There is a group of people calling themselves Sabreans in the Hauran, Syria, but Chwolson says they have no real relation to the Mesopotamian Sabreans. As to the Sabreans of Mesopotamia, they are also called Nasoreans, Zabians, and Christians of St. John. Some of their peculiarities have been expressed in theories formed as to the origin of their name. Gesenius derives the name Sabean from Tsaboth (Heavenly Hosts), because they worship stars; Noldeke and others derive the name from the Syriac Subba (wash, baptize), because they practise baptism with diligence. They seem to be entirely distinct from Jews, Christians, and Mohammedans. They are isolated from other races, not marrying outside of their own body. They are quiet and industrious people, occupied in raising cattle, and some follow trades like boat-building; some of them, too, are good silversmiths. In physical appearance they are tall, well made, with good features and fine black beards; the women go about unveiled and seem to be taller and rather more masculine than Mohammedan women. On feast days they all dress in white. Their language, which is known in Europe as Mandatic, is a dialect of Syriac written with characters peculiar to itself. Priests only read and write the language and they refuse absolutely to teach it to strangers. Some Mandatic manuscripts exist in European libraries which, however, are no more ancient than the 16th century. The Sabreans of lower Mesopotamia were numerous when Mohammedanism came into being in the 7th century, and under the Abasside Caliphs they had some four hundred places of worship in the regions about Baghdad. The Koran mentions the Sabreans along with Christians and Jews, as people who have a divinely inspired book. They themselves have a tradition that they are descended from the Egyptians of Pharaoh's host lost in the Red Sea. Sabreans are mentioned in the Bible, but none of the three people there called by this name can |
THE ENCYCLOPEDIA OF MISSIONS

Sabaeans
Saint Thomas' Mount

be certainly connected with those in Mesopotamia. During the brief era of literary and scientific activity among the Mohammedans of Baghdad, much propaganda was done for the converted Sabaeans patronized by the Caliphs were really Sabaeans, according to Chwolsen; it having been the practise of the Caliphs to bring together learned men from outside of the Mohammedan fold. The Sabaeans have a sacred book which they hold in high repute. The Sabaeans are very much inclined to belief in regard to God are that all things proceeded from Chaos or "the Great Abyss." With Chaos was the "Spirit of Glory," or the King of Light; he called into being the Hayye kaduma, "the primal life," who is the supreme God in Sabean theology. Also described is the Seth, Yushamin, Jehovah, and Manda Hayye, "the Messenger of Life." It is from the latter that they derive the name Mandaeans, and he holds the place in their theology of mediator between man and his Creator, but is generally believed to have been the same as the Abel, Seth and other Biblical characters down to John the Baptist. The Sabaeans also believe in a host of demi-gods or demons in the under-world, which has numerous hells and vestibules and guarding, and from which spring the evil of the world and the diseases among men. Some of these demons are good, others evil. The polar star is regarded as the central sun of the sky, and when the people meet for prayer they always face the north star. They do not have fixed places of worship, but construct low houses of huts for each occasion. As to the relation with other religions, they believe that all the prophets named in the Bible were false prophets, including Jesus Christ. They have deep reverence for Abul, Seth, and they hold that Abul was incarnate in John the Baptist, and that he baptized Jesus by him. They hold that Mohammed was a false prophet. As to religious rites, they observe Sunday as a feast-day and perform the rite of baptism every Sunday, primarily, somewhat as the Mohammedans do, with the idea of preparing for worship. These Sunday baptisms are by immersion. They have several religious feasts during the year, the chief one lasting five days, when all of them are baptized, by sprinkling, three times a day. Their most important service has been described as held at midnight, when every one on altar at the appointed place, of the more than 50 miles into the hurdle but provided for the purpose, fasts, serves, and puts on white clothes before joining the circle of worshipers. The sacred book lies open on the altar, the priest takes one of two pigeons, holds it up to the north star and sets it free, while reciting a prayer of adoration of the "Living one." Then while the assistant reads from the book, the High Priest takes fresh baked cakes, and, cutting the throat of the other pigeon, drops four drops of blood on each cake arranged in the form of a cross; he then puts a cage into the mouth of each worshiper, saying, "Be marked with the sign of the Living one." The pigeon is then buried with ceremony behind the altar. This curious people appears to be dying out. It is estimated that there are between four and five thousand living near Amara, Suk- kara, and Eritrea, the Sabeeas.

SACHIAPURAM: A village in Tinnevelly, Madras, India, situated N. by W. of Tinnevelly town. Station of the CEEMS (1881), with 7008 population. Missionaries, 27 native workers, 11 day schools, and 481 Zenana pupils. The place is called North Tinnevelly by the Society.

SAFED: A town, formerly of considerable note, on a hill overlooking the western coast of the Lake of Tiberias, Asiatic Turkey, 65 miles west of Damascus. Station of the London Jews Society with 81 native missionary and his wife, 1 school, 1 dispensary and 1 hospital. Station also of the UFS Jewish Mission Committee (1889), with 1 missionary and his wife, 2 women missionaries, 10 native workers, 3 day schools, and 1 dispensary. Also station of the CA.

SAFFI: A town and seaport of Morocco, situated on the W. coast, about 70 miles N. E. of Mogador. Population, 9,000. Station of the Southern Morocco Mission (1892), with (1903) 1 missionary and his wife and 1 dispensary.

SAGA: A town on the island of Kiushiu, Japan, situated 45 miles N. E. of Nagasaki. Population, 25,000. Station of the Evangelical Lutheran Church in the South (1893), with 3 missionaries and 28 of their wives. Also station of the National Church, with 1 missionary and his wife, 9 native workers, 1 place of worship, 1 Sunday school, 12 outstations, and 150 professing Christians.

SAHARANPUR: A town in the United Provinces, India, situated in the Meerut division, 130 miles S. E. of Ludhiana. A large town, rather substantially built, and steadily improving in appearance and increasing in importance. Owing to its low, moist situation it was very unhealthful, but modern sanitary improvements have somewhat remedied this evil. Station of the PN (1830), with (1903) 2 missionaries and their wives, 1 woman missionary, 13 native workers, 3 outstations, 2 places of worship, 6 day schools, 1 boarding school, 1 theological class, 1 industrial school, 1 dispensary, 2 leper institutes, 1 orphanage, and 101 communicant Christians. Some write the name Saharanpore.

SAINT ANN: A town and seaport in Jamaica, West Indies, situated in the parishes of St. Andrew and St. Thomas, on the N. coast of the island. Station of the UMFC (1838), with (1903) 1 missionary, 40 native workers, 5 places of worship, 3 Sunday schools, 3 day schools, and 358 professing Christians, of whom 281 are communicants. The name is sometimes written Saint Ann's.

SAINT AUGUSTIN: A village in Madagascar, situated on the S. coast, 15 miles S. by E. of Tulear. Station of the United Norwegian Church in America, with (1900) 5 missionaries, 1 of them with his wife; 3 women missionaries, 20 native workers, 18 outstations, 18 day schools, 1 boarding school, and 100 professing Christians.

SAINT CHRISCHONA PILGRIM MISSION (Pilger Mission or Mission Chrisehora, Basle). The society, organized first (1840) by Pastor Spittler of St. Chrischona, as a mission school, developed about 1860, a well-known and rather ambitious project for missions in Abyssinia, one feature of which was the "Apostelstrasse" (Road of the Apostles), consisting of a series of stations which were to be built in Jerusalem. The selection included Alexandria, Cairo, Assuan, Khartum, and Metamne. Only two, however, Cairo and Alexandria, were occupied, and the severity of conditions in Abyssinia and the
Sudan led to the giving up of the work. The institute continued, but sent its graduates to other societies and interested itself more especially in evangelistic work. Since 1895, however, it has resumed foreign work as a recognized branch of the China Inland Mission. It occupies (1902) 4 stations, with 5 missionaries, and reports statistics through the CIM.

SAINT CUTHBERT'S. See Tsoilo.

SAINT CROIX: One of the West Indies. It has been a Danish possession since 1716. It has an area of 74 square miles and an estimated population of 18,000. The inhabitants are mostly free negroes, and are engaged in the raising of sugarcane and the manufacture of rum.

The Moravian Brethren commenced their mission to the Danish West Indies at this island in 1754, and now have stations at Friedensthal, Friedensberg, and Friedensfeld. The Danish Lutheran Church has also quite a membership here.

SAINT EUSTACHE: One of the Dutch West Indies, and forms part of the colony of Curaçao. It contains a population of 3,000 in its area of 7 square miles. Mission station of Wesleyan Methodist West Indian Conference.

SAINT HELENA: An island belonging to Great Britain in the Atlantic Ocean, 1,200 miles west of Africa, and 3,000 miles east of South America. Area, 47 square miles. Population, 5,000, negroes and half-breeds. Mission field of the SPG: 3 stations, St. Paul's, Jamestown, Longwood, with 450 communicants. There are also 1 Roman Catholic and 2 Baptist chapels.

SAINT JAN, or SAINT JOHN: One of the Dutch possessions in the West Indies; has an area of 21 square miles and a population of about 1,000, among whom the Moravian Brethren commenced work in 1754, with stations at Bethany and Emmaus (see St. Thomas). Mission field of the Danish Missionary Society.

SAINT JOHN'S: The chief town on the island of Antigua, West Indies, situated on the W. coast. It is the seat of government for the British colony of the Leeward Islands. Population, 10,000, chiefly pure negroes and mulattoes. A station of the Moravian Brethren, opened in 1756 by a missionary from the Danish Islands, who mistook the miserable spiritual condition of the negro population in Antigua to come to their assistance. He accomplished much, and his work is now (1903) being carried on by 3 missionaries and their wives, I woman missionary, 51 native workers, 3 outstations, 3 places of worship, 3 Sunday schools, 2 day schools, 1 theological school, and 857 communicant Christians.

SAINT KITTS', or SAINT CHRISTOPHER: One of the Leeward Group of the British West Indies. Its greatest length is 23 miles, and it contains an area of 65 square miles, with a population of 45,000. The island is of volcanic origin, the scenery is rich and beautiful, and the soil is fertile and well watered. Basseterre, with a population of 7,000, is the capital. Mission field of the Moravian Brethren, with stations at Bethesda, Basseterre, Bethel, and Eastbridge. The Wesleyan Methodists have been for years active on this field.

SAINT LUCIA: One of the Windward Islands, British West Indies, has an area of 122 square miles, with a population about 50,000, principally negroes and half-breeds. Chief town, Castries. Little success in the Protestant Mission on this island. A number of schools have been established, with many pupils in attendance.

SAINT MARY'S ISLAND: A large island off the coast of Gambia, West Africa, at the mouth of the Gambia River, east of Cape St. Mary. The principal city on the island is Bathurst. Mission station of the Wesleyan Missionary Society, with a force of 6 missionaries, 40 native helpers, 6 chapels, and 5 schools containing about 1,000 pupils.

SAINT PETER'S (Indian Settlement): A village in Canada, situated on the S. end of Lake Winnipeg, about 40 miles N. E. of Winnipeg. Station of the CMS, with (1903) 1 missionary and his wife, 17 native workers, 1,135 professing Christians, of whom 355 are communicants; 6 day schools, and 1 Sunday school.

SAINT PAUL DE LOANDA: Capital of the province of Loanda, in the Portuguese Colony of Angola, on the west coast of Africa. It is situated on a beautiful landlocked harbor, sixty miles by sea north of the mouth of the Quanza. Its population, estimated at about 20,000, consists of a few hundred Portuguese, and the rest are negroes.

SAINT THOMAS: A town on the island of St. T., West Indies. It is picturesquely situated on three hills on the south coast, overlooking a fine harbor. For many years it was the terminus of several steamship lines, a depot for the surrounding islands, and a port of call for vessels of all nations; but the laying of West India telegraph cable greatly changed these conditions, and its commercial importance is rapidly declining. It is the residence of the Danish governor. The inhabitants are largely negroes. In 1843 the Moravian Brethren, who had hitherto confined their labors to the sugar plantations, found it necessary to provide instruction for the many converts who had come to the town to live, and a place of worship was procured near the center of the town, where a school and preaching services were held. Here a small building was completed, and was a memorial church of the 150th anniversary of the beginning of Moravian Missions. The Danish Government provided schools and churches for the people at a very early date in their occupancy of the island. The Moravian Mission now (1903) has there 1 missionary and his wife, 14 native workers, 1 place of worship, 1 Sunday school, 1 day school, and 421 communicant Christians. The town is also known as Charlotte Amalie.

SAINT THOMAS: One of the West India Islands belonging to Denmark (1716); has an area of 23 square miles and a population of 14,586, mostly negroes and half-breeds. Mission field of the Moravian Brethren (1732), with stations at New Herrnhut, Nisky, and St. Thomas.

SAINT THOMAS' MOUNT: A town in Madras, India, situated in Chengelpat district, 7 miles S. W. of the Government House in Madras. It is also a military station. On the summit of the Mount is a Portuguese Church, on the spot where 1547 Admiral Vasco da Gama found the products. Mission field of the Moravian Brethren (1732), with stations at New Herrnhut, Nisky, and St. Thomas.

SAINT THOMAS' MOUNT: A town in Madras, India, situated in Chengelpat district, 7 miles S. W. of the Government House in Madras. It is also a military station. On the summit of the Mount is a Portuguese Church, on the spot where 1547 Admiral Vasco da Gama found the products. Mission field of the Moravian Brethren (1732), with stations at New Herrnhut, Nisky, and St. Thomas.
day schools, 20 day schools, and 292 professed Christians.

SAINT VINCENT: One of the Windward Islands, West Indies; is a British colonial possession (1763), under an administrator and colonial secretary. Its area is 122 square miles. Population (1888), 46,672, mainly negroes and half-breeds. Kingstown is the capital; population, 5,393. Mission field of the WMS and SPG.

SAKANJIMA: A settlement in Portuguese West Africa (Angola), situated in Benguela about 35 miles N. E. of Bailundu. Station of the ABCFM (1893), with 1 missionary and his wife, 1 woman missionary, 5 native workers, 4 outstations, 2 day schools, 1 dispensary, 1 kindergartens.

SALATIGA: A town and district in Java, Dutch East Indies, situated in the central part of the island, about 35 miles S. by E. of Samarang. Station of the Neukirchen Mission Institute (1893), with (1903) 1 missionary and his wife. Church statistics are included under Samarang.

SALEM: A town in Madras, India, situated in the Salem district, 110 miles W. by S. of Cuddalore. Population (1901), 70,621, nine-tenths of whom are Hindus. The manufactures of Salem are carpets and cutlery, the last-named being famous. Station of the LMS (1827), with (1903) 4 missionaries, three of them with their wives; 2 women missionaries, 71 native workers, 14 outstations, 7 Sunday schools, 18 day schools, 1 boarding school, 1 theological class, and 711 professed Christians, of whom 321 are communicants. Also station of the SPG (1875), with (1903) 1 native worker, 1 place of worship, and 205 professed Christians, of whom 90 are communicants.

SALMAS: A district in Persia, north of Lake Urmia, half way between Tabriz and Urmia and near the eastern boundary of Turkey. (It is spoken of as a city, the really is no city of that name.) Mainly Chutorians, Parsees, and equable. Population, 35,000, Armenians, Muslims, Nestorians, Jews, and Kurds, each speaking its own language, and generally Turkish also. Station of the SPG for work among the Nestorians.

SA-LONG: A village in the Province of Fo-kien, China, situated about 55 miles N. by W. of Fuchau. Station of the CEZ (1893), with (1903) 3 women missionaries, 3 native workers, 1 dispensary.

SALONICA: A city and seaport in European Turkey, at the northeastern extremity of the Gulf of Salonica, which is an inlet from the Greek Archipelago. S. is the leading city of Macedonia, having commercial importance. Population, 105,000: Greeks, Bulgarians, Wallachians, Turks and Spanish Jews. Station of the ABCFM (1894), with (1903) 2 missionaries, 1 of them with his wife; 26 native workers, 22 outstations, 12 places of worship, 10 day schools, 23 Sunday schools and 490 professed Christians. Also station of the Church of Scotland Jewish Committee, with 1 missionary and his wife and 1 day school.

SALT. See Es Salt.

SALTILLO: A city in Mexico, capital of the frontier state of Coahuila, 60 miles W. of Monterey. Climate, mild, temperate, and healthful. Population (1901), 23,996, mixed Spanish and Indian, speaking Spanish and Indian dialects. Station of the SBC (1850), with (1903) 1 missionary and his wife; 23 native workers, 6 outstations, 5 places of worship, 5 Sunday schools, 2 day schools, and 482 communicant Christians. Also station of the PN (1884), with 2 missionaries and their wives, 2 women missionaries, 18 native workers, 6 Sunday schools, 6 day schools, 1 boarding school, 1 academy, and 436 communicants. Station also of the MES (1857), with (1903) 3 women missionaries and 1 native worker.

SALUR: A town in Madras, situated in the Vizagapatam district, about 50 miles N. W. of Chicaole. Population, 10,633. Station of the Breklyn Missionary Society (1884), with 2 missionaries, 1 of them with his wife; 2 women missionaries, 24 native workers, 5 outstations, 1 place of worship, 1 Sunday school, 4 day schools, 1 dispensary, and 326 professed Christians, of whom 313 are communicants.

SALVADOR: A republic of Central America, bordering on the Pacific coast for 160 miles from the mouth of the Rio de la Paz to the mouth of the Guacaran, in the Gulf of Fonseca. Its inland boundaries are Guatemala on the west and Honduras on the north and east. It is the smallest of the Central American republics, having an area less than New Jersey. Except along the coast, where there are low alluvial plains, the country consists of a high plateau, 2,000 feet above sea level, and volcanic mountains. The volcanic forces are still at work, as shown by the frequent earthquakes.

Since 1853, when the union with Honduras and Nicaragua was dissolved, the government is that of a republic, with a president elected for two years by suffrage of all citizens, and a congress of 70 deputies. The population is nine times as dense as the average of the other Central American countries. The bulk of the inhabitants are of aboriginal or mixed races; only 12,000 are whites, or descendants of Europeans. The natives are engaged principally in agriculture, tho there is much mineral wealth as yet undeveloped. The climate is mild and pleasant. Roman Catholicism is the state religion, but there is tolerance of other religions. Education, which is under the care of the government, is carried on in free schools, attendance upon which is obligatory. Railway, telegraph and telephone lines are being built, and the resources of the country are being developed. The ABS is doing effective work in Salvador.

SAMARANG: A commercial center of great importance in Java, Dutch East Indies, situated on the N. coast of the island about 150 miles E. by S. of Batavia. Population (1900), 89,286, of whom 4,800 are Europeans, 12,372 are Chinese, 1,688 Arabs and other Orientals, and 70,426 are native Javanese. Station of the Neukirchen Missionary Institute, with (1903) 9 missionaries, 22 native workers; 37 places of worship, 11 day schools and 925 professing Christians.

SAMHPA. See SAN-NO.

SAMKITA: A village in the French Congo, West Africa, situated on the Ogowe River, about
THE ENCYCLOPEDIA OF MISSIONS

Saint Vincent Sung-yong

15 miles N. of Lambarene. Station of the Paris Evangelical Missionary Society, with (1903) 2 missionaries, 11 communicants, 1 place of worship, 1 boarding school, and 1 dispensary.

SAMOA: A group of islands in the South Pacific Ocean, 14 in number. The western islands belong to Germany, and those east of the 174th meridian to the United States of America. The people are of the finest Polynesians to be found in the Pacific. The men are above the average height, with straight, well-rounded limbs and erect figures. The women are slight, symmetrical and graceful in all of their movements. The people are all nominally Christians—Protestants and Roman Catholics, with a few Mormons. Nearly all the population over seven years of age can read and write. In short, the islands offer one of the illustrations of the wonderful fruits of missionary enterprise.

German Samoa: The chief islands of German Samoa are Upolu, Manono, Apolima, and Savaii. There are some smaller islets. All of these islands are mountainous, very fertile and quite populous. Apolima is the most thickly inhabited of the group (1901) of 18,341. Apia, the seat of government, is a seaport of this island, with a German Imperial Governor, supported by a native high chief and council. The LMS began its missions in Upolu in 1836 and now (1903) has 38 native workers, 38 schools, 1 industrial school, and 5,119 professed Christians; Malua (3 missionaries, 9 native workers, 10 schools, 1 boarding school and training institution, 1 printing house, and 2,133 professed Christians); Aana (1 missionary, 41 native workers, 33 schools, and 4,700 professed Christians), and Falealili (1 missionary, 55 native workers, 31 schools, and 4,700 professed Christians).

Savaii: Lying west of Upolu, has an area of 669 square miles and a population (1901) of 13,201. It was occupied by the LMS in 1830, which now has in the island stations at Faasoleleaga (1 missionary, 49 native workers, 33 schools, and 4,949 professed Christians), and Mataatu (1 missionary, 32 native workers, 30 schools, and 3,145 professed Christians). Manono and Apolima are smaller islands, with a population, together, of barely 1,000.

American Samoa: This consists of the islands of Tutuila, Manua, and some smaller islets. The whole taken together is officially known as the Tutuila naval station. Tutuila is high and mountainous, of volcanic origin, thickly populated, and very fertile. The bay of Pago Pago is the colonial station which made the place desirable to the United States. The area of Tutuila is 54 square miles, and the population about 4,000. Manua is a smaller island, with about 2,000 inhabitants. The LMS has (1903) on Tutuila 3 missionaries, and on Tutuila and Manua together 38 native workers, 42 schools, and 5,366 professed Christians.

SAMOKOV: A town in Bulgaria, European Turkey, situated on a mountain plateau about 35 miles S. by E. of Sofia. Climate healthful. Station of the ABCFM (1867), with (1903) 4 missionaries, 1 professor, 9 women missionaries, 25 native workers, 9 outstations, 9 places of worship, 9 Sunday schools, 1 day school, 2 boarding schools, 1 theological class, 1 college, 1 kindergarten, 1 industrial department, and 300 professed Christians.

SAMSOUN: A city on the Black Sea, Asiatic Turkey, 500 miles E. of Constantinople. Population, 7,600. It is the port through which passes the greater part of the trade between Constantinople and northern and eastern Asia Minor. A carriage road has been built connecting it with the principal cities in Eastern Turkey, except Erzerum, and the missionaries have easy access to these cities. It is very malarious, and continued residence has been impracticable for the missionaries. There is a thriving native church connected with the Marsovan station.

SAMULCOTTA: See CHAMRLAKOTA.

SANDOWAY: A very ancient town in Arakan, Burma, on the Sandoway River, 15 miles from its mouth. Climate, except in the town itself, unhealthful, owing to mangrove swamps. Before the Pegu province of Burma was taken by the English, Sandoway was the headquarters of the Bassein Karen Mission, and thousands were baptized there. Population about 2,000. Station of the ABM (1858), with (1903) 1 missionary and his wife, 3 native workers, 19 outstations, 18 Sunday schools, 6 day schools, 1 boarding school, and 460 communicant Christians.

SANDY LAKE: A settlement in Northwest Canada, situated in the territory of Saskatchewan, about 50 miles N.W. of Prince Albert. It is also called Assiniboia. Station of the CMS (1875), with (1903) 1 missionary, 1 native worker, 2 day schools, and 260 professed Christians, of whom 86 are communicants.

SAN FERNANDO: A town in Trinidad, West Indies, on the W. coast, about 25 miles S. by E. of Port of Spain. Station of the UFs (1850), with (1903) 1 missionary and his wife, 1 native worker, 1 outstation, 2 Sunday schools, and 218 professed Christians, of whom 80 are communicants. Also station of the PCC (1870), with (1900) 2 missionaries and their wives, 1 woman missionary, 13 native workers, 2 outstations, 23 Sunday schools, 17 day schools, 1 boarding school, 1 theological class, 1 college, and 218 professed Christians. Station also of the AME, with 1 native worker.

SANG-HIA-CHUANG: A town in Shen-si, China, situated about 55 miles W. of Hsi-ning-fu. Station of the CMS (1894), with (1903) 1 woman missionary, 3 native workers, 1 place of worship, 1 Sunday school, and 2 professed Christians. Some write the name Sang-kia-chuang.

SANGI or SANGIR Islands: A group of islands in the Dutch East Indies, lying between Celebes and Mindanao. The area of the group is about 350 miles, and the population about 45,000. The largest of the islands is called Great Sangir. Its characteristic feature is the volcano of Gunong Abu, to which belongs a terrible history of destruction. This island is also the center of evangelistic effort now supervised by the "Sangir and Talaut Islands Committees," whose seat is in Batavia. Other stations of this committee's mission are in the islands of Straw and Tagulandang. Taking the Sangir group and the neighboring Talaut islands together, the number of professed Christian adherents found there (1901) is about 44,000.

SANG-YONG: A village in Fo-ken, China, situated about 55 miles N. of Fu-chau-fu. Station of the CEZ (1894), with (1903) 3 woman mission-
aries, 5 native workers, 1 day school, and 1 boarding school.

SAN-HO: A town in the province of Kwang-tung, China, situated about 20 miles N. of Swatow. Station of the FCE (1859), and of CMS. Mission of the ELCG (1899), with (1903) 3 missionaries, 2 of these with their wives; 1 place of worship, and 1 dispensary. Some write the name Sanhoppa.

SAN JUAN: A town in the island of Porto Rico, of which it is the capital; situated on the N. coast of the island. Climate warm, but healthful. Population, 32,048. Station of the Am. Baptist Home Miss. Society (1890), with (1903) 2 missionaries, one of them with his wife; 1 woman missionary, 2 native workers, 2 outstations, 1 place of worship, 2 Sunday schools, and 96 professed Christians. Also station of the ELCG (1899), with (1903) 1 missionary and his wife, 1 woman missionary, 1 outstation, 1 place of worship, 2 Sunday schools, and 40 professed Christians. Station also of the ME (1900), with 4 missionaries, three of them with their wives; 1 woman missionary, 1 outstation, 1 day school, and 1 boarding school. Station also of the PE, with 1 missionary. Station also of the Presbyterian Home Miss. Soc. (U. S.), with (1903) 3 missionaries, two of them with their wives, and 1 outstation. Station of the CA. The ABS also has an agency here.

SAN LUIS POTOSI: A town in Central Mexico, situated in the state of the same name, of which it is capital, and about 200 miles W. of Tampico. Climate, semi-tropical; elevation, 6,000 feet. It is an important mining center. Population (1900), 61,019. Station of the PN (1873), with (1903) 1 missionary and his wife, 5 native workers, 8 outstations, 3 day schools, 17 Sunday schools, and 392 communicant Christians. Also station of the MEs (1883), with (1901) 1 missionary and his wife, 2 women missionaries, 1 native worker, 1 place of worship, 1 dispensary, 1 hospital.

SAN-SHI-HSIEN: A town in Shen-si, China, situated 70 miles N. W. of Hsi-nga-nu. Station of the CM (1897), with (1903) 3 missionaries, one of them with his wife; 2 native workers, 1 place of worship, 1 day school, 1 Sunday school.
